He also perceived that the Religious could not remain long with the Christian *daimyo* without creating grave difficulties. He therefore called together another counsel of the Religious, this time at Arima. The *daimyo* of that place took part in the deliberations. From the beginning, and without even allowing the Religious time to explain their attitude, he protested strongly against the tyranny of Hideyoshi, and declared that he would not allow any of the Religious to leave. Father Coelho thanked him for his good will, but showed him that this excess of zeal would only precipitate the ruin of the Christian religion. It was therefore decided that the churches should be closed and all assemblies of the Christians forbidden, that the Religious should exchange their clerical costume for ordinary dress, and that they should disperse still more widely. It was in consequence of this decision that the Nobles' College was transferred at first to Chijiwa and, seven months later, to Arie. The noviciate with its 73 pupils was fixed at Hachirao. Before separating, the Religious resolved to die sooner than abandon their Christians.

However the edict of Hideyoshi, denouncing the Christian religion as offensive to the gods of the country, did not have the evil consequences the Christians at first feared. It never entered the minds of the *daimyo* to molest ever so little any follower of the proscribed doctrine. Hidenaga, the brother of Hideyoshi, and Maeda Motokatsu, Governor of Kyoto, even reassured the Jesuits by promising them their protection. (89) More than that, Kinoshita Katsutoshi, the nephew of Mandokoro, the wife of Hideyoshi, and probably for that reason the spoiled child of the Palace, declared himself a Christian and took the name of Peter in baptism. (90) He was the eldest son of Kinoshita Iesada, *daimyo* of Himeji, and possessed at this time the daimyate of Obama (Wakasa). He was, says Japanese history, a distinguished poet, delighting much more in poesy than in the profession of arms, which besides he detested. Hideyoshi's edict had sufficed to exalt his poetic soul and to make him decide on ranging himself in the number of the proscripts.

Perhaps it was the same reason which induced Ota Nobuo, the second son of Nobunaga, to have himself enrolled among the Christians, at this time. (91) Nobuo was then at Kyoto and it was on the advice and following the example of his former teacher that he became converted. This teacher, say the annals of the Religious, was a member of the Ota family, and it may be asked if he were not the celebrated Yurakusai Joan, very deeply versed in the tea ceremony, for he was the uncle of Nobuo and his family name was Ota Nagamasu.

Matsura of Hirado and Otomo Yoshimune, the new convert, were the only persecutors. As to Matsura, his conduct was quite natural. Since the Portuguese had made Nagasaki the centre of their commerce, his hatred of the Religious and of all the Christians in general had only increased. And since the death of Anthony Kotoda (1582), protector of the Christians, Matsura had not lost a single opportunity of annoying the latter. Kotoda's two sons had indeed protested against this injustice, but not having either the prestige or the influence of their father with the *daimyo*, their protests had not the least effect. However, Matsura had not put any Christian to death since the publication of the edict: his zeal was limited to overthrowing the crosses of the cemeteries and destroying several churches.

But what appeared impossible, was that Otomo Yoshimune, baptized only yesterday, should have declared himself the persecutor of the Christians. Nevertheless so it was. As soon as the edict was published, the pagan party did its utmost to show Yoshimune that all the Christian *daimyo* would share, sooner or later, the fate of Takayama. Yoshimune at first resisted for a certain time, but soon he became afraid, and commenced by sending away the five Religious, whom only lately he had invited to his house. Then he

issued orders that the Christians should be forced to apostatize. His brother Pantaleon, Shiga and the widow of Sorin immediately opposed these orders and took the Religious and the Christians under their protection. But Yoshimune, longing to win the favour of Hideyoshi, put to death six Christians who had manifested their religious convictions in public. He even tried to denounce Shiga to Hideyoshi as a protector of the Christian rebels but, whether from contempt for the baseness of Yoshimune or esteem for Shiga, when the latter came towards this time to Osaka, Hideyoshi affected to treat him with much regard.

In the middle of so many trials, another celebrated conversion came to carry a little consolation to the Jesuits: that of the daughter of the traitor Akechi Mitsuhide. Married to Hosokawa Tadaoki (92), *daimyo* of Tanabe (Tango), she first heard of the Christian religion from her husband himself. The latter, an intimate friend of Takayama, had during their sojourn in Osaka, before the Kiushu expedition, often heard the superiority of the Christian religion explained, and even more than once he had been asked to embrace it. Hosokawa repeated all these conversations to his wife, whom he loved very much. She, deeply struck by what she had heard, communicated her impressions to her followers, who in their turn shared her enthusiasm. From this moment their grand desire was to visit the church of the Christians and hear one of the preachers. While Hosokawa was in Kiushu, they profited by this opportunity and went to the church of Osaka. Father Cespedes welcomed them with affability and confided them to Brother Vincent, a Japanese. The latter spoke to them on different points of the Christian religion, and must even have made a certain impression on his hearers, for all asked to be baptized. The Religious, fearing to have anything to do with some of the numerous concubines of Hideyoshi, or of some other personage, excused himself for not being able to at once accede to their request. When they retired, however, he had their litters followed by a domestic, and thus discovered the name and the quality of his visitor. For several days the confidential waiting-maid of Hosokawa's wife came to the church to set forth her doubts and to ask explanations. This maid was the daughter of the Kuge Kyohara Ekata, who had been baptized in the time of the Shogun Yoshiteru, and whom the Religious designated by the name of Gekidono. She was, besides, a relative of Hosokawa, and it was owing to this consanguinity that she had entered the family as the waiting-maid of his wife (93).

Finally this maid and sixteen of her companions were baptized in the Church of Osaka. The mistress alone had to see herself deprived of this favour: inexorable etiquette forbade her leaving the house a second time for the moment. When she learned however that Hideyoshi had just banished the Jesuits from Japan, she wished at any price to receive baptism before their departure. As she threatened to set at naught all the etiquette of Japan, in order to attain her end, Father Cespedes authorized Mary, the confidential waiting-maid, to baptize her in her own house. She was named Gratia and it is only under this name that she is known in history (94).

This happened at the beginning of August 1587. Gratia also caused to be baptized Semmaru, her second son, whom she called John (95). This son was then dangerously ill but he was cured almost immediately. He is better known under the name of Tatsutaka and it is thus he will be called in the sequel.

After her baptism Gratia lived with her maids as in a convent: their time was divided between prayer and the reading of the Imitation or other pious books. But the return of Hosokawa brought trouble into this peaceful house. Gratia wrote afterwards herself to the Jesuits, describing how great had been her husband's anger when he learned what had passed. He ill-treated the

(92) He was then called Nagaoka Tadaoki.

maids and sent several of them into a bonzerie. Gratia was not exempt from this bad treatment and in a letter addressed to Father Organtino, she announced her intention of flying from the house rather than submit to such trials. It was only after Father Organtino had reminded her that a Christian ought to be ready to endure all evils, that she became resigned to her unhappy lot.

CORRESPONDENCE.

YOKOHAMA GENERAL HOSPITAL.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir,—Prefacing the copy of proposed agreement published in your morning's issue, I notice that you say: "This contract was approved by Mr. F.S. James, Chairman of the Hospital Committee." I wish to point out that this phrase is rather misleading. It is true that I did approve of the terms, but not as Chairman of the Hospital Committee. I did so in a private note to Mrs. Bellows, and asked her to allow me to keep the copy, to show to my fellow Committee-men. This was done subsequently at a Committee meeting, but as in the meantime all negotiations between the Ladies and Dr. Mécère had been put an end to, there was no occasion to ask the Committee to approve the proposed agreement, or otherwise.

There seems to be a mistaken idea amongst a number of Yokohama residents as to the subscription list, which was circulated a short time ago by the Hospital Committee.

The subscriptions asked for were for the up-keep and general expenses of the Infectious Ward at Nakamura—quite separate from the General Hospital, and with which Dr. Mécère has nothing whatever to do, and also for the fees of Charity Patients under treatment at the General Hospital.

Dr. Mécère pays the whole expenses of the General Hospital out of his own pocket, and receives no subscription from the public. By giving publicity to this letter you will greatly oblige

Yours faithfully,

F. S. JAMES, Chairman,
Yokohama General Hospital Committee.

Yokohama, October 10th, 1902.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir,—The publication of the correspondence between Mrs. Bellows and Dr. Mécère, together with copy of the agreement between the General Hospital Committee and Dr. Mécère, having been followed by that of the proposed contract for the engagement of a foreign nurse, we are now able to judge of the actual position of the ladies *vis-a-vis* Dr. Mécère; and the uncompromising stand taken by Dr. Mécère against signing a contract of any kind is undoubtedly what brought negotiations between him and the ladies to a deadlock and prevents the possibility of their being reopened. What then is to be done? The deficiency in the Nursing Staff and the inefficiency of the present service generally at the General Hospital are recognised by the Committee and admitted, even by Dr. Mécère himself.

Dr. Mécère thinks that this can be rectified by the employment of extra Japanese nurses whose work, he says, leaves nothing to be desired, but the ladies hold a different opinion and most people will be disposed to agree with them. Because it is manifest that although additional Japanese nurses would increase the number of hands to do the work they were told to do by Dr. Mécère, the general supervision, with improved internal management that might confidently be looked for from a foreign nurse acting as Matron would not be forthcoming in the case of Japanese nurses however capable, for reasons too obvious to require elaboration. And yet from all accounts there is much to be desired in this respect at the General Hospital, apart altogether from the actual deficiency in the Nursing Staff.

To go back to the question—what is best to be done? I think the only thing is for the ladies to inaugurate a Nursing Home, to be managed by themselves, on a scale dependent on the extent of the support likely to be accorded them by the Community. This brings us face to face with the question: what is the amount already subscribed by the Community towards the up-keep of the Infectious Diseases Hospital, and support of Charity patients at the General Hospital, and what proportion of the funds is expended annually on each. If the General Hospital Committee would give this information it would be appreciated by the public interested, and I put the question because I notice in their letter to the newspapers handing in Dr. Mécère's correspondence they say that they were prepared to provide the salary of two extra Japanese nurses from funds

at their disposal, which would seem to imply that they had a balance in hand over and above what is expended on the Infectious Diseases Hospital and charity patients at the General Hospital. I do not notice that there is any provision or stipulation in the Committee's agreement with Dr. Mécère binding them to send charity patients to the General Hospital, and it might be possible for them to divert with the approval of subscribers, such patients and whatever money is contributed for their support, to the proposed Nursing Home. They might even be able to do more than this for the Nursing Home out of the funds at their disposal after meeting the wants of the Infectious Diseases Hospital. The knowledge of what is annually subscribed towards the latter and charity patients, would therefore enable the ladies to estimate how much more might be expected from the Community, and so place them in a position to judge what scope and dimensions the suggested Nursing Home Scheme should take. I hope therefore the General Hospital Committee will not withhold the figures asked for.

Such a Nursing Home, because to all intents and purposes a charitable organization, need not necessarily interfere with the General Hospital. At the same time it is reasonable to suppose that accommodation would be provided for paying as well as for charity patients, and no doubt many would avail themselves of a Home where they could be certain of receiving every care and attention at the hands of experienced foreign nurses.

Yours truly,

INTERESTED.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir,—It seems a pity to allow any elements of discord to be brought into the Foreign Nurse question, and I am sure that nothing is further from the wish or intentions of the ladies than a legal fight with Dr. Mécère, such as is suggested in some quarters. The ladies started with the modest idea of augmenting the Nursing Staff and thereby improving the internal working of the General Hospital, and had Dr. Mécère, met their overtures as they hoped he would, their object might have been attained with the least trouble and a minimum of expense to all concerned. Dr. Mécère's refusal to admit a Foreign Nurse, for that is what his objection to sign their fair and reasonable contract, or any contract put forward by the ladies, practically amounts to, compels them to adopt some other plan but there is no reason to suppose that any attack on Dr. Mécère's citadel is, or ever has been, contemplated. He is in possession of the General Hospital under an agreement that was considered by the Committee who made it an eminently favourable one to the community, releasing them as it did of the responsibility for its up-keep, and taking the whole liability upon himself, and his position being therefore a recognised one beyond dispute he must remain in possession for better or for worse, to the end of his tenancy. But it is injudicious on the part of his friends like "X.Y.Z." in last night's *Gazette* to say that the internal working of the General Hospital and the efficiency of the staff are all that can be desired, when, as I said in my previous letter, it is recognised by the Committee and admitted by Dr. Mécère that the nursing staff is deficient. Such advocacy is calculated to provoke rejoinders that would be very unpalatable to Dr. Mécère, and indeed if things were as "X.Y.Z." describes them to be, there would be no reason for the ladies' movement at all. The ladies feel that Yokohama requires more and better nursing accommodation than it possesses at present and they have made up their minds that Yokohama shall have it. The question is how best to obtain it, and on that point it would be interesting and useful to have other ideas than my own on the Nursing Home suggestion. It seems to me that such an idea is feasible and with the assistance and co-operation of the General Hospital Committee, possibly also in conjunction with the Colonial Nursing Association—whose three nurses I understand are henceforward to reside in Yokohama—and finally with the cordial support of the Community, I cannot but think that such a scheme is alike practical and practicable, and moreover would attain the object that the ladies have so much at heart.

Your truly,

INTERESTED.

THE GREEK CHURCH IN TOKYO.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir,—In thanking you heartily for your very kind words in your note: "The Greek Church in Tokio" in to-day's *Japan Daily Mail*, I take the liberty to explain the matter in a few words. Some of our Christians of the Kojimachi Church, not having sufficient reasons for their act, asked me to change their two priests: Père Paul Sawabe, the first amongst our Christians and priests (having been baptized in 1868, and ordained in 1875), much esteemed by all our

Church, and his son Rev. Alexis Sawabe. After close investigation, I found that the greater number of the Christians are devoted to their pastors and have not the slightest desire to change them. I therefore gave this decision: "The minority of the Christians must follow the majority, and continue in peace and love towards their present pastors. But if they do not consent to that, they may choose for themselves another priest, but in this case they must support him fully and at their own expense." That did not please the peace-violators, and they now ventilate their feelings in the *Niroku Shinpo*.

Yours very faithfully,

BISHOP NICOLAI.

Russian Eccles. Mission,

Tokyo, October 8th, 1902.

THE KATEI GAKKO.

Many of the readers of the *Japan Mail* will remember Mr. Kosuke Tomeoka, for a time Chaplain at the Sugamo Prison in the suburbs of Tokyo. Great opposition was aroused against him by the Buddhists some four years ago. Possibly in part as a result of this opposition, attention was drawn to him and his methods which were found to be in full accord with the views of the best penologists of Great Britain and the United States, and he was appointed an instructor in the school for prison officials, which was established in Tokyo some three years ago.

Mr. Tomeoka had previously served with credit in the Hokkaido prisons and had been encouraged by prominent men interested in prison reforms to visit the United States for study and observation. He carried with him letters of introduction to well known penologists at whose suggestion the Prison Commissioners of Massachusetts kindly permitted him to spend fourteen months in the Concord Reformatory, with the privilege of the closest intimacy with the officials. He subsequently spent a month with Mr. Brockaway at the Elmira Reformatory in New York, and later inspected some sixty or seventy of the best prisons, reformatories, and child-saving institutions in different parts of the United States. He also spent six months in the office of W. F. M. Rounds, Esq., Secretary of the Prison Association of New York.

While he has never visited Great Britain, he has been in correspondence with some of the more noted authorities on the subject of prison methods and of child-saving. His appointment as instructor in the school for prison officials gave him the opportunity to carry out a plan which he had cherished for many years, namely, the establishment of a school for the care of wayward children. Friends rallied about him and three years ago he laid the foundation of the "Katei Gakko," or Home School, for wayward children.

His plan was a most cautious one. He determined to provide at first accommodations for only twelve or fifteen boys, and to add cottages from time to time for similar companies, as the experience of the teachers and the interest of the public in the enterprise should warrant.

Accordingly some three acres of land were purchased near the Sugamo Prison and the school was started in a modest way. A dozen boys were almost immediately placed in the school, many of them by their parents or friends, who in some cases paid their expenses, in whole or in part. Since it is a private institution, there is no authority to detain the boys, except with the consent of their parents or guardians, but no serious difficulty is experienced in this regard and no bolts or bars are necessary to keep them within bounds, for they soon become interested in the school and loyal to it and its manager. Less than

a year ago a new building was put up and the number of boys increased to twenty-five.

In the meantime, owing chiefly we may suppose to the purpose of the Government to establish reformatories for criminal children in all, or nearly all, of the prefectures, there came a demand for young men trained to deal with such children. Accordingly, Mr. Tomeoka opened a training school for this class of officials, in which instruction is given in the theory of child-saving institutions and the history of the movement which they represent, while opportunity is afforded to the students to share in the care of the boys of the "Katei Gakko." The association of these two institutions has worked well and is full of promise. The location is excellent and the grounds, formerly occupied by the villa of a well-to-do Tokyo resident, are tastefully laid out.

Some six weeks ago, the first building, containing the chapel, rooms for a dozen boys, etc., was destroyed by fire. Fortunately most of the boys had been taken to the sea-shore and were able to remain there for a time, so the immediate inconvenience was reduced to a minimum. It is now proposed to raise at once *yen* 2,500, to replace the lost building and to add somewhat to the accommodations of the school. An appeal is, therefore, made to both Japanese and foreigners for contributions.

Immediately after the fire a few friends got together to make plans for rebuilding and among their own number *yen* 1,000 was immediately raised. Not long after, an unknown French gentleman, whether from interest awakened by the news of the fire is not clear, sent in *yen* 500 to be set aside as the beginning of an endowment fund.

There are few philanthropic enterprises in Japan more intelligently planned or which promise better success. The relations of the Director to his wards are most admirable and he has succeeded in securing assistants of a similar spirit. It is too early to give statistics which would be impressive, but it may be said that out of the small number of boys who have been received, several have already been sent back to their parents apparently reformed and with good prospect of their becoming useful members of society.

Mr. Tomeoka will always be glad to receive visitors and explain to them his plans. None can hear these plans and see the boys without acknowledging that the institution is, what its name declares it to be, a "Home School." It is worthy of the support of all who are interested in the philanthropic movement so conspicuous in the life of New Japan.

Mr. Tomeoka refers by permission to the following gentlemen:—N. W. McIvor, Esq.; Capt. F. Brinkley, R.A.; the Rev. J. D. Davis, D.D.; and the Rev. Henry Loomis.

Contributions may be sent directly to Mr. Kosuke Tomeoka, Katei Gakko, Sugamomura, Kita Toyoshima-gori, Tokyo, to the Rev. Henry Loomis, Bible House, 60 Settlement, Yokohama, or to myself, 22 Nakanocho, Ichigaya, Tokyo.

D. CROSBY GREENE.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

JAPANESE BONDS IN LONDON.

12 MILLIONS STERLING APPLIED FOR.

London, October 9, 4.45 p.m.

The subscription list to the new Japanese loan has closed. It has been a great success,

upwards of twelve millions sterling being applied for.

THE KAISER AND THE BOER GENERALS.

London, Oct. 10.

It is stated that the Kaiser on the 18th September intimated to the Boer Generals that he was prepared to receive them, provided that they refrained from any anti-British agitation in Germany. The Generals agreed to this but on the 6th of October changed their minds. They objected to asking for an audience but desired to be summoned by the Kaiser. The Emperor thereupon decided not to receive them.

MURDER OF MR. KENSIT.

Mr. Kensit, the notorious anti-ritualist, was severely stabbed in Birkenhead on the 25th of September and died on the 9th of October.

THE BOER GENERALS.

Later.

The newspapers approved of the correct decision of the Kaiser regarding the Boer Generals.

THE OPIUM TRADE.

At a meeting of the Society for the Suppression of the Opium Trade, held at Lambeth Palace, the Archbishop of Canterbury presiding, the trade was stigmatized as a blot on the English name and an injustice to China.

JAPANESE FIVE PER CENTS.

The Japanese loan is largely applied for and it is understood that it is well covered.

THE AMERICAN COAL-STRIKE.

Later.

Mitchell, the leader of the striking coal-miners in America, has refused President Roosevelt's offer to appoint a commission. He said that 50 mass meetings have adopted resolutions declaring that the whole Federal army could not compel them to return to work.

THE BOER GENERALS IN BERLIN.

The Berlin press is disgusted with the Boer Generals.

THE SALE OF JAPANESE BONDS.

The Japanese loan has closed. It was covered about three times.

THE EDUCATION BILL.

London, Oct. 11.

At the Unionists' Conference on the Education Bill, held at Birmingham, Mr. Joseph Chamberlain, the Colonial Secretary, said that the Bill would not be withdrawn. If the Bill were defeated, which he did not think possible, the Government would resign.

MACEDONIA.

The Turks have dispersed the Bulgarian bands in Macedonia.

DISTURBED IRELAND.

Mr. Kilbride, an ex-M.P., has been committed for trial at Athlone, Ireland, for inciting to murder.

BRITISH RESIDENT MURDERED.

Later.

Captain Maloney, the British Resident in Northern Nigeria, was murdered on the 4th inst.

FRENCH COAL STRIKE.

The French coal-strike is becoming more serious. Strong forces of troops have been requisitioned.

THE AMERICAN STRIKERS.

The American strike conferences continue futile. Mr. J. Pierpont Morgan has been begged to intervene but has refused.

THE BRITISH CABINET.

London, Oct. 12.

The first meeting of the reconstructed Cabinet was held on the 11th instant. The principal subject of discussion was the Education Bill.

THE FRENCH STRIKES.

Movements of troops are observable in all directions in the north of France. They are converging on the strike districts.

There is much talk of a monstre march of strikers on Paris.

ROBERTS AND KITCHENER.

Roberts and Kitchener have received the freedom of Liverpool.

THE COAL STRIKES.

Later.

With the advent of the cold weather the dearness of fuel is causing great suffering among the poor of Montreal and a marked increase of mortality among children. Numerous shipments are being made of English coal to France owing to the strike there.

IRISH AFFAIRS.

Mr. Jas P. Farrell, M.P. for North Longford, has been sentenced to two months' imprisonment with hard labour at Lardford (? Longford) for intimidation.

TRANS-ATLANTIC POSTAL SERVICE.

London, Oct. 13.

The Canadian and British Governments have decided on the establishment of a postal service between Liverpool and Canada, with a subsidy of $1\frac{1}{8}$ million dollars annually for ten years.

THE COLOMBIAN PROTEST.

The result of the Colombian protest is that the United States Government has instructed Casey (Rear-Admiral Casey, whose flagship is the *Wisconsin*) to avoid any infringement of sovereign rights and to permit the transport of troops and munitions of war unless they are likely to lead to hostilities on the railway.

ROSEBERY AND THE LIBERAL PARTY.

London, Oct. 14.

Mr. A. W. Black, M.P. for Banffshire, having sent a letter to Lord Rosebery asking whether the latter considered the difference between himself and Sir H. Campbell-Bannerman so vital as to prevent their eventual co-operation in forming a Liberal Cabinet, Lord Rosebery replied that he adhered to the policy he had announced at Chesterfield. He asked whether Sir H. Campbell-Bannerman has withdrawn his condemnation of that policy. If he has not, then, Lord Rosebery says, the situation is unchanged. Questions of office and leadership do not concern him.

BOER GENERALS IN PARIS.

London, Oct. 14.

The Boer Generals have reached Paris. The Nationalist leaders welcomed them, and M. Delcassé received them unofficially.

AN AIRSHIP TRAGEDY.

The Brazilian De Bradsky, with an assistant, navigated the De Bradsky airship across Paris, manœuvring easily, but in descending at St. Denis the steel ropes supporting the car broke and the occupants fell 350 feet and were killed.

BOER GENERALS IN PARIS.

London, October 15.

The Boer Generals were entertained at dinner at a restaurant last night. The cheering crowds were kept off by Municipal

Guards. The Generals made moderate speeches, dwelling upon their affection for France.

VENEZUELA.

The civil war in Venezuela seems approaching a decisive stage. An engagement has begun at La Victoria between President Castro, who has 4,100 men and 15 guns, and General Matos, who has 6,000 men and 22 guns.

KRUGER.

Later.

Mr. Kruger has left Utrecht for Mentone.

FOREIGN PARLIAMENTS.

The German and French Parliaments have reassembled. The French Budget provides for new taxation amounting to 207 millions of francs to meet the deficit.

THE FIGHT IN VENEZUELA.

The battle is still raging in Venezuela. President Castro has removed the capital to Los Tiques.

THE AMERICAN COAL STRIKE.

London, October 16.

At an important conference held at Washington, at which President Roosevelt, Mr. Root, Mr. J. P. Morgan and several leading mine-owners were present, it was agreed that President Roosevelt shall appoint a small commission to deal with all questions between owners and employes, and that the miners shall resume work as soon as the commission is constituted in case it should interfere with non-unionists.

John Mitchell, the leader of the strikers' Union, declares he is unable to accept the appointment of any commission until the proposal has been considered by the miners.

(RECEIVED AT THE LEGATION OF FRANCE.)

THE FRENCH STRIKES.

Saigon, October 12.

The strike continues in the Loire and the Pas de Calais. The "yellow syndicates" are resolved to continue the work. A collision has taken place in the Loire, and there have been some tumults in the Pas de Calais.

FRENCH NEWS.

Saigon, October 15.

Parliament has opened amid the greatest calm. The Minister of Finance has presented the Budget.

M. Delcassé has received the Boer Generals. The interview was brief.

(RECEIVED AT THE FOREIGN OFFICE IN TOKYO.)

MANCHURIA.

In accordance with the provisions of the Manchurian Convention, Russia withdrew her troops from the whole of the South and West of Shingking on the 8th of October, and returned the Shinghaikwan-Newchwang Railway.

(RECEIVED IN TOKYO.)

MAJOR-GENERAL FUKUSHIMA.

It is stated that a telegram has been received at the British Legation announcing that Major-General Fukushima is better, and that if his condition does not change, there will be no occasion to send any further telegrams.

FORGERY.

Four or five persons have been apprehended in Oita prefecture on a charge of uttering forged 10-yen notes in Chemulpo and Seoul.

SIR ERNEST SATOW.

Sir Ernest Satow, British Representative in Peking, will start for England via Suez

at the end of October, on leave of absence. He has informed the Japanese Representative, Mr. Uchida, that he expects to return to Peking within six months.

(FROM THE "JIJI SHIMPO.")

JAPANESE BONDS.

London, Oct. 9.

The subscription to the Japanese bonds closed in the forenoon to-day. Applications exceeded considerably the amount of the issue. The premium has risen 5/8ths.

COTTON CULTIVATION.

The British Colonial Office has proposed to render substantial aids to cotton cultivation in various colonies. Much satisfaction is expressed in Lancashire.

FRANCO-SIAMESE TREATY.

The Siamese are generally satisfied with the new treaty with France. A section of the French press thinks that the treaty has received a considerable impetus from British influence.

THE U.S. COAL STRIKE.

London, October 11.

Mr. Lyman Gage, ex-Secretary of State, in the course of a speech in Chicago, remarked that the coal strike is really a battle for freedom against the democracy. President Roosevelt declared that in suppressing the market disturbance in connection with the strike the price of coal in the United States will be badly affected in general.

STRIKE IN FRANCE.

The coal strike in France still continues. There are 85,000 persons who are unemployed.

SOUTH AMERICAN TROUBLES.

The rebels of Venezuela in the lowlands have joined the army under General Matos. President Castro is in a helpless condition.

A BALLOON ACCIDENT.

London, Oct. 13.

A balloon accident has taken place at St. Denis, four miles to the north of Paris, resulting in the death of M. De Bradsky and M. Bolin, his assistant.

MACEDONIA.

The Turkish Government, in communicating with the various Powers, expresses discontent with regard to the attitude of the Bulgarians, declaring that Bulgaria had not only neglected to guard her own boundaries, but has allowed sympathizers among her nationals to join the Macedonians.

HAYTI.

The Government troops in Hayti bombarded Monteuil on Saturday. The rebels defeated a landing party.

London, October 14.

M. Doumer ex-Governor-General of Indo-China, severely criticizes the new Franco-Siamese treaty signed by M. Delcassé.

SOUTH AMERICAN TROUBLES.

General Matos, with 6,000 troops and 22 guns, has attacked President Castro's army at La Victoria, forty miles distant from Caracas, the Government forces numbering 4,000 with 15 pieces. The battle is still going on. Reinforcements are arriving on the President's side.

(FROM THE "JAPAN HERALD.")

FRANCE AND CHINA.

London, October 9.

The *Novosti* states that France intends to play a more prominent part in China, making Indo-China a supporting base.

PUBLIC OPINION IN FRANCE.

London, Oct. 12.

French public opinion, which at first hailed the Convention of Siam as satisfactory, is now somewhat pessimistic.

The *Eclair* says that French interests required the possession of Battambang, and adds: "We have let slip the guarantees of 1893 and abandon-

ed our ancient right to have also opened a route for foreign commerce via Saigon. *Comme toujours*, all we get in return is sand."

It is stated that this utterance unquestionably represents a considerable portion of French educated opinion.

TROUBLE IN THE PHILIPPINES.

London, October 13.

A Manila dispatch received at New York states that the Sultan of Bacolod has written to General Summer requesting him to convey a declaration of war forthwith, as he wishes to maintain the Mahomedan religion and does not desire the friendship of America.

THE RUSSIAN MINISTER TO TOKYO.

S. E. M. Alexandre Isvolsky, the Russian Minister at Tokyo, has been transferred to Copenhagen.

THE COAL STRIKES IN AMERICA.

The settlement of the American coal strike is hourly expected.

RUSSIAN FAR EASTERN SQUADRON.

London, Oct. 15.

The Russian Naval detachment which is sailing from Cronstadt for the Far East in a few days comprises the battleships *Pobieda* and *Retvisan*, and the cruisers *Aurora*, *Diana* and *Pallas* [*Palladia*], with four torpedo boats.

Rear-Admiral Stackelberg, the new Commander-in-chief on the Pacific Station, commands the detachment.

(FROM THE "KOBE HERALD.")

AMERICA AND THE PHILIPPINES.

London, October 13.

The United States Government has received a defiant despatch from the Sultan of Bacolod, Island of Negros, stating that he desires war and spurns the idea of friendship.

(FROM THE "DEUTSCHE JAPAN-POST.")

GERMANY AND COLOMBIA.

Berlin, October 10.

The *Norddeutsche Allgemeine Zeitung* reports, that General Concha, the Colombian Minister of War, ordered, that, with the ultimate purpose of advancing against the Insurgents, the Government troops should employ the German river-steamer *Bremen*. The firm owning the steamer protested against the General's despotic order, and Dr. Lührsen, the German Minister to the Republic of Columbia, energetically backed up the protest. In consequence of this, the General cancelled his order.

THE BOER GENERALS IN GERMANY.

Berlin, Oct. 10.

The fact that the three Boer Generals will not be received by the Emperor is discussed in the German press in a quiet tone. Even the pro-Boer papers admit that Dewet, Delarey and Botha are wrong in refusing to be presented to the Kaiser by the English Ambassador.

THE U.S. COAL STRIKE.

Berlin, Oct. 10.

In New York conciliatory discussions between the coal mine owners and the miners are taking place. It is expected that they will result in a prompt settlement of the controversies.

STRIKE AT GENEVA.

London, Oct. 10.

In Geneva a general strike of labourers has broken out.

FINANCIAL PANIC IN MONTREAL.

The Montreal exchange has been seized with a panic by local events. The U.S. Secretary of the Treasury has secured, by taking suitable measures, a quiet state of the money market in New York.

THE FOREIGN TROOPS AT SHANGHAI.

London, October 12.

In the question concerning the evacuation of Shanghai by the foreign troops the Powers have not yet come to an agreement with China. It is rumoured that Germany will soon make known under what conditions she is willing to withdraw her troops.

THE FRANCO-SIAMESE TREATY.

Berlin, October 12.

The Franco-Siamese treaty is discussed by the German press in a quiet tone. It is not expected that the treaty will prejudice the German interests in Siam.

THE JAPANESE LOAN.

The French press discusses the 50 million loan of Japan as a means for preparing for war. The papers suppose that Japan will expend the money received from the loan on augmenting her land and

sea forces. The papers say that the emission must be regarded as a success.

THE AUSTRIAN REICHSRATH

The opening of the Austrian Reichsrath will take place on the 16th inst.

THE SPANISH CORTES.

The Spanish Cortes will meet on the 20th inst.

A GERMAN LEGATION AT HAVANA.

It is said that Germany intends to establish a legation in Havana.

THE STRIKE IN SWITZERLAND.

In Geneva numerous persons have been arrested on account of the strike; the Government was obliged to have recourse to the troops in order to prevent excesses.

THE SIBERIAN RAILWAY.

Beginning from next year the Siberian railway will run express-trains three times a week in both directions and these will connect with the trains to Port Arthur and to Peking.

DENMARK AND GERMANY.

Berlin, October 14.

In the Danish press a change has been brought about of late in favour of a reconciliation with Germany.

ROYAL AMENITIES.

The Tsar will return the King of Italy's visit before Emperor Wilhelm. It is officially denied that King Edward will pay a visit to Emperor Wilhelm at Potsdam at Christmas time.

GERMANY AND SIAM.

The *Weserzeitung* urges the Government to keep a sharp eye upon the present state affairs in the Indo-Chinese Peninsula to prevent the independence of Siam being encroached upon by one of her mighty neighbours.

KAISER HONOURS SVERDRUP.

The Kaiser has bestowed the First Class of the Order of the Crown on the Arctic explorer Sverdrup, who a few weeks ago returned home to Norway after an absence of four years in the Arctic regions.

STRIKE AT GENEVA.

At Geneva the labourer's strike still continues.

APPOINTMENT IN HANOVER.

To fill the office held by the late Count Stolberg, President Wentzel at Wiesbaden has been appointed Lord Lieutenant of Hanover.

STRIKE IN AMERICA.

In view of the great damage caused to the industry of the United States by the coal miners' strike, President Roosevelt is urgently pursuing the suppression of the coal duty.

GERMAN COLONIAL CONGRESS.

The German Colonial Congress has been proclaimed as a permanent institution.

(FROM THE "N.-C. DAILY NEWS.")

THE TIDAL WAVE IN SICILY.

London, September 28.

Three hundred lives were lost by the tidal wave at Modica, Sicily. The corpses still lie in the churches, the cemeteries being nothing but waves of mud, making interment impossible.

MARTINIQUE.

The volcanic disturbances at Martinique have ceased, but the northern region is declared to be unsafe.

THREATENED COAL FAMINE IN AMERICA.

A coal famine is threatened in America owing to the prolonged strike of the anthracite coal miners, which has lasted for twenty-one weeks. There are no signs of a settlement and the men on strike are confident of success. There have been twenty-one murders committed during the strike.

MILNER'S TOUR THROUGH WESTERN TRANSVAAL.

The recent tour made by Lord Milner, High Commissioner for South Africa, etc., through the Western Transvaal has had a highly beneficial result. It has removed many erroneous impressions on the part of the Dutch who are now generally resigned to British rule and anxious to do their best for the country.

THE CONFLAGRATION AT AMOY.

Amoy, October 5, 9.30 p.m.

The estimated loss of foreign property in the fire is about three hundred thousand dollars, and the native loss about five million dollars. The houses of many rich silk merchants were destroyed.

The fire is now extinguished.

Six Chinese were killed by falling walls.

Trade is at a standstill.

Hongkong, October 6.

The fire at Amoy started at ten a.m. on Friday in a baker's shop in Fourth Street, and spread rapidly toward the Bund. The whole of the native business portion of the port was destroyed, also the hong of Douglas Lapraik & Co., Jardine, Matheson & Co., and Danver & Co., and the Fokien Printing Office.

The other hong and the Custom-house escaped owing to the strenuous exertions of the Europeans, the shipping lending their assistance.

Captain Fife of the C.N.S. *Wenckow* was killed in the fire. His body was recovered and buried on Saturday.

About two thousand houses were burnt, involving a loss of many million dollars. Many native merchants have committed suicide.

The fire lasted until Saturday morning. Trade is at a standstill.

THE COAL DISPUTE IN THE STATES.

London, October 5.

President Roosevelt made a strenuous appeal to both parties in the coal strike to avert the threatened suffering from the coal famine, which would amount to a national calamity, in view of the advent of cold weather.

Though his intervention failed at the moment, it is believed that it will not be without result, as the public are becoming exasperated against the strikers and against Trusts generally.

A JOHANNESBURG LEAGUE.

London via Bombay, October 6.

A meeting of two thousand residents of Johannesburg has adopted a resolution to form a political association to voice the views of the population.

THE MAN FOR THE STRAITS.

Hongkong, Oct. 7.

Major-General Dorward, R.E., has been appointed to the command of the Singapore garrison.

NEUTRALISATION OF THE PANAMA RAILWAY.

London via Bombay, Oct. 7.

Admiral Casey, U.S.N., has refused to allow Colombian troops or war material to be transported across the isthmus by rail without special permission. Colombia has strongly protested against this prohibition as a violation of all principles of morality and rights of sovereignty.

OFFICIAL CIVILITIES AT TIENTSIN.

Tientsin, October 8.

There has been a grand exchange of costly banquets between the Viceroy Yuan Shih-kai and the Russian railway officials at Tientsin. General Basilevsky returns in the Viceroy's special train to-day.

THE AMERICA CUP.

London via Bombay, October 8.

Sir Thomas Lipton's challenge for the America Cup was signed at Belfast yesterday.

BRITISH TRADE WAKING UP.

British imports in September were 3½ millions and exports 1¼ millions above those in September 1901.

THE ONLY WAY.

London via Bombay, October 9.

A conference of representatives of European railways was held at Paris yesterday to consider arrangements for the service of the new overland route to China via the Siberian railway.

THE GERMAN PRESS AND THE BOERS.

London via Bombay, October 10.

The Berlin Press is disgusted with the attitude of the Boer Generals. The *Tageblatt* says that in the event of their visit being attended by anti-English demonstrations, the Government may eject the Generals from German territory.

THE MINERS STRIKE IN FRANCE.

Seventy thousand out of one hundred and twenty thousand French miners have obeyed the orders for a general strike.

TORNADO IN SICILY.

London, Sept. 26.

A dispatch from Rome to-day announces that a severe cyclone has swept over Catania, a city on the eastern coast of Sicily. Catania is flooded and many houses, including the Villa Bellani, are damaged. The roads have suffered seriously. The cyclone also wrought havoc at Modica, a town of Sicily, where several persons were killed. Mount Aetna shows further signs of activity and the volcano of Stromboli is still active.

A dispatch from Syracuse, Sicily, says that the stream flowing through Modica, swollen by the recent terrific storm, suddenly overflowed, inundating the town and that several houses collapsed and a number of families perished. The country in the vicinity of Modica is flooded and the Prefect, with a large force of troops, has started for that place in order to render assistance to the sufferers.

Syracuse (Sicily), Sept. 26.

For twenty-four hours before the cyclone burst over the island a violent storm raged on the eastern coast of Sicily. The path of the cyclone was 124 miles long, and everything in the line of the storm was destroyed. The sea swept inland for several kilometers, doing enormous damage. Along the

railroad from Catania to Palermo the force of the cyclone was such that rails were torn up and hurled to a great distance.

It is reported from Modica, thirty-two miles southwest of Syracuse, that 100 bodies have already been found, but that the sway by the torrent is unknown.

The newspaper *Frattista* expresses the belief that some 400 people have been killed.

The torrent destroyed everything on the ground floors in houses in the lower portions of Modica. Bridges have disappeared, the damage amounting to many million lire. (A lire is worth about 20 cents.)

The survivors of the catastrophe have taken refuge in the hills. A relief committee and search parties have been organized at Modica. The disaster is supposed to have been due to a marine waterspout. The German steamer *Caprera* was wrecked at Catania after a terrible struggle with the waves.

A large portion of the low-lying part of Modica has been destroyed.

Two torrents, the St. France and St. Marie, which descend through the town, rose suddenly and brought with them masses of mud and heavy stones and invaded the buildings of Modica. They carried away everything in their course. Many houses were utterly wrecked and others were seriously damaged. Numerous animals perished.

The number of victims is still unknown, but eighty corpses have been deposited in a single church. At Soicli twelve persons were killed. Tagearo was destroyed. Enormous damage was done at Palazzo, Acreide, Farla and Geratana.

LATEST COMMERCIAL.

IMPORTS.

Some small enquiries for gassed yarns are reported. Prices are steady, but are still below those ruling at home. Business is dull in shirtings and no improvement can be noted in fancy cottons or woollens.

COTTON PIECE GOODS.

Grey Shirting—8½ lb, 38½ yds, 39 inches	Y. 2.85 to 3.60
Grey Shirting—9 lb, 38½ yds, 45 inches	28.0 to 4.00
Indigo Shirtings—24 yards, 14 inches	2.50 to 3.35
Prints—Assorted, 24 yards, 30 inches	3.00 to 5.00
Cotton—Italians and Satteens, Black, 32 inches	0.20 to 0.30

WOOLLENS.

Flannels	Y. 0.35 to 0.50
Italian Cloth, 32 in.	0.30 to 0.45
Mousseline de Laine,—Crape, 24 yards, 30 inches	0.16 to 0.33
Cloths—Pilots, 54 @ 56 inches	0.50 to 0.95
Cloths—Presidents, 51 @ 65 inches	0.90 to 1.00
Cloths—Union, 54 @ 56 inches	0.60 to 1.00
Blankets—Scarlet and Green, 3 to 5 lb per lb	0.60 to 0.66
Velvets—Black, 35 yards, 22 inches	9.50 to 12.00
Victoria Lawns, 12 yards, 42-3 inches	0.90 to 1.80
Turkey Reds—2.8 to 3.0 lb 24-25 yards, 30 inches	1.90 to 2.25
Turkey Reds—3.8 to 5 lb, 24-25 yards, 32 inches	2.50 to 3.50

COTTON YARN.

Nos. 2/60, Plain	Nominal
Nos. 2/80, Plain	Nominal
Nos. 2/100, Plain	Nominal
Nos. 2/60, Gassed	2.28.00 to 2.55.00
Nos. 2/80, Gassed	2.78.00 to 3.05.00
Nos. 2/100, Gassed	4.00.00 to 4.20.00

RAW COTTONS.

American Middling	29.00 to 30.00
Indian Broach	24.00 to 25.00
Chinese	24.50

METALS.

A fair quantity of business has been put through during the interval, but at the close of the week the market is quiet again.

Round and square ½ inch and upward	Y. 4.30 to 4.60
Iron Plates, assorted	4.60 to 4.80
Sheet Iron	4.80 to 7.10
Galvanised Iron sheets	10.25 to 11.00
Wire Nails, assorted	6.00 to 6.60
Tin Plates, per box	7.80 to 8.30
Pig Iron, No. 3	2.00 to 2.50
Hoop Iron (¾ to 1½ inch)	5.10 to 6.05

KEROSENE.

A steady volume of trade continues to flow along, and prices are very firm.

American	\$2.62
Russian	2.42
Langkat	2.40

SUGAR.

Small sales of Hongkong refined at advancing prices. The market generally shows an upward tendency.

Brown Takao	Y. 4.70 to 5.25
Brown Manila	5.25 to 6.45
Brown Daitong	4.30 to 6.50
Brown Canton	6.00 to 6.60
White Java and Penang	6.20 to 7.00
White Refined	8.20 to 10.20

EXPORTS.

RAW SILK.

The unsettled state of affairs in America, consequent upon the coal strike, is beginning to tell on this market and business has still further fallen away. Holders continue firm however, despite all. The demand for Europe is steady though there is a lack of suitable stock.

TRUE HAIR GROWER

When I was bald I came into possession
of the secret of a genuine
hairgrower. My hair grew
to its present length
in about 40 days.
Hundreds of other
similar cases. I am
selling the marvel-
lous preparation. To
introduce it I will
post you a trial box
in sealed plain parcel
for only 4 stamps.
Try it, as I did, and
convince yourself. Address:—
JOHN CRAVEN-BURLEIGH,
110, St. Martin's Lane, London, W.C.

September 27th, 1902.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, OCTOBER 25TH, 1902.

BIRTH.

On the 22nd Oct., at 266, Bluff, Yokohama, the wife of V. BLAD, Esq., of a Son.

DEATHS.

At Boston, U.S. of America, on October 15th, Rear Admiral THOS. O. SELFIDGE, U.S.N., in his 98th year.

On the 19th inst., at 244-C, Bluff, Yokohama, JONAS MENDELSON, aged 58 years.

On the 20th inst., at the International Hospital, Kobe, of dysentery, JOHN FOYSTER SHOWLER, aged 3 years and nine months, the beloved son of Mr. and Mrs. W. Y. Showler.

On the 23rd inst., at the General Hospital, No. 82 Bluff, Yokohama, FELIX WESTRALLET, aged 24 years.

SUMMARY OF NEWS.

THE torpedo boat destroyer *Asashio* arrived at Singapore on the 16th inst.

MR. FOSTER, the newly appointed acting British Consul at Hakodate, arrived at that port on the 22nd inst.

MR. UCHIDA, Japanese Minister to China, will leave for Japan by the steamer *Tategami Maru* on the 2nd prox.

MR. JOHN LATEY, editor of the *Sketch* and of

the *Penny Illustrated Paper*, died in London on September 26 after a long illness. He was born in 1842.

OVER 5,000 members of the Red Cross Society were shown over the men-of-war at Yokosuka on the 22nd inst.

SNOW fell near Sapporo on the morning of the 22nd inst. and ice formed on standing water outside the houses.

FRIDAY, Oct. 17th, being the national holiday known as Kan-name-sai (thanksgiving for harvest) the occasion was duly celebrated in the Palace.

AN engine-driver named Kawakubo Kotaro, while working in Shimbashi station on the night of the 21st inst., was knocked down by an engine and killed.

THE torpedo-boats Nos. 51 and 52, stationed at Kagoshima for some days, left the bay on Oct. 16th to search for the steamer *Yoshino Maru*, which, after having caught fire off Kagoshima a few days ago, is now derelict, her crew having been saved.

A GOLD chain with a gold coin and ring which were lost in Yokohama, by Mr. F. M. Harris, an American gentleman staying at the Central Hotel, were picked up by Mr. L. Mottu and brought to the Police Station whence they were restored to the owner.

A NAVAL court of inquiry which sat at the British Consulate, Nagasaki, last week, has exonerated Alfred Cyrus Broadbridge, Master of the *Yoshino Maru*, of all blame for the loss of his vessel, which was burnt at sea on the 10th October.

THE launch of the steamer *Tamashima Maru* took place successfully at the Osaka Iron Works on Oct. 16th. The vessel has been built to the order of the Sanyo Railway Company, which intends to employ her between Moji and Shimonoseki for the conveyance of passengers and goods.

AMONG the passengers arriving by the *Doric* on October 16th was Miss Kara G. Smart, sent to Japan by the World's W. C. T. Union as the successor of Mrs. E. Spencer Large. Miss Smart becomes the Corresponding Secretary of the Foreign Auxiliary of the Union in Japan, and will reside temporarily at No. 14 Tsukiji, Tokyo.

MR. JOHN O'DONNELL, M.P. for Mayo, who crossed the floor of the House of Commons and shouted the tail-end of his speech into Mr. Balfour's face the other day after the closure had been moved, was suspended from the usages of the House by a vote of 341 to 51. He retired quietly.

PROF. FAIRCHILD, an American botanist, has been sent by the United States Government to Japan for the purpose of studying the flora of this country. The Japanese Department of Agriculture has offered him every facility for pursuing his researches. Prof. Fairchild will devote his attention especially to the method of grafting plants as practiced in this country.

THE report of the North China Insurance Co., Ltd., for the year to the 30th of June last shows a net divisible balance for 1901 of Tls. 180,731. It is proposed to pay a final dividend of 4 per cent., making 8 per cent. for the year, and a bonus of 10 per cent. to contributors, the balance to be retained to meet further liabilities. The balance at credit of the 1902 working account to the 30th of June is Tls. 200,964.

It is the fixed belief of a large body of share-

holders in China of the Chinese Engineering and Mining Co., Ltd., that the company in question ought to be and might be a great deal more successful than it is, says the *N.C. Daily News*. It is with this conviction that they urge that the direction of the company should be in China, not in London. There is no dissatisfaction, we apprehend, with the new General Manager, whose ability and fitness for the post are fully recognised; but the shareholders are justified in feeling that Shanghai is emphatically where the Board of Directors should be.

AN interesting point has been raised in a despatch from H.B.M.'s Consulat Lourenço Marques to the Foreign Office. He put forward the complaints of consignees of English goods destroyed by fire while at the Custom House in that port. The Customs officials insist that duty must be paid on the goods destroyed, on the ground that the Customs had passed them and that failure to remove them was wholly the fault of the consignees, the Customs having become entitled to duty by the acts of Examination and appraisement. Many of the goods had been forwarded on consignment, and should the Customs claim be upheld English consignors may be expected by Portugal to pay the duties.

SEVERAL days ago, says a Japanese paper, judgment was delivered by the court-martial at Yokosuka with regard to the stranding of the war-ships *Musashi* and *Yaeyama* which were blown on the rocks off Nemuro, Hokkaido, several months ago during a storm. The result of the finding was that Captain J. Yoko o, the Commander of the *Musashi*, was sentenced to one month's imprisonment, Lieutenant S. Sakamoto, who was on watch on the *Musashi* at the time when she stranded, to eleven days' imprisonment, Lieutenant Y. Wada, who was on duty on the *Yaeyama* during the gale, to five days' imprisonment, while Captain S. Taguchi, Commander of the *Yaeyama*, was acquitted on the ground that he was ashore when the vessel stranded.

A TRAGEDY involving the death of three and injury to two persons is reported from Sakai, a town near Osaka. On the night of Oct 17th Keana Shozaburo, a street scavenger living at No. 59, Itchome, Kitahatagocho, and his son Inosuke, aged 19 years, armed with drawn swords entered the house of Yamakami Tomekichi, a neighbour, and badly cut the latter and his wife. Upon receipt of the news, two policemen of the Sakai Police Station were at once on the scene and fighting took place between them and the assailants with the result that both officers were killed. Afterwards Shozaburo turned upon his son, killing him instantly, and then he himself committed suicide on the spot. The tragedy is the outcome of a love affair.

THE coming birthday of the Emperor, (the 3rd of November), will be celebrated in a more brilliant fashion this year than formerly, Japan's ally, Great Britain, being expected to take part in the fete. Tokyo papers say that Admiral Sir Cyprian Bridge, Commander-in-Chief of the British fleet in the Far East, will celebrate the occasion at Yokohama, where his squadron will shortly arrive for the purpose. In view of the specially warm relations between the two countries the British Authorities will also have war-ships at Kobe, Nagasaki and Moji to celebrate the event. The Japanese Government has therefore decided to station the *Naniwa* in Yokohama, the *Kasagi* in Kobe, the *Akashi* in Moji and the *Iwate* in Nagasaki. It is further stated that Admiral Bridge will celebrate in Yokohama the Coronation of King Edward on Nov. 8th.

CHINESE NOTES.

Saturday, Oct. 18.

The Chengting-Taiyuen railway is to be undertaken by a Russian syndicate, according to telegrams received in Tokyo. The Russo-Chinese Bank will lend 40 million francs at 5 per cent. for purposes of construction. We may explain that at Chengting the great trunk line from Peking to Canton via Hankow is to be joined by a branch passing westward to Taiyuen and thence southward to Hsian. This Peking-Canton road and its branches will be the backbone of the Chinese railway system, but the work of construction is still in its initiatory stage.

The Japanese and British Governments are said to have preferred four demands to Russia in connexion with the rendition of Manchuria. The first is that complete freedom of travel must be enjoyed by Japanese subjects in Shingking. During the Russian occupation inexplicable obstacles were encountered by travellers. It seemed almost as though Russia had laid aside her morally tactful policy, and was disposed to call needless attention to her presence in Manchuria. The Japanese endured these difficulties quietly, but they are evidently determined that no system of restrictions shall be tolerated after the resumption of administrative authority by China.

The second condition is that the Chinese military authorities must treat officials and civilians of all nationalities alike. The purpose of this demand is evidently to prevent any discrimination in favour of Russian subjects—discrimination which would otherwise be an almost certain outcome of the situation existing in Manchuria during the past two years.

In the third place, Japan and England ask—we are quoting from a telegram sent to the *Asahi Shimbun* by its Tientsin correspondent—that the markets of Manchuria shall be open to the trade of all nations. Apparently the proposal is all-embracing. Special places are not indicated: the whole of Manchuria is included in the scheme. If such a demand has really been presented it is, of course, very significant. There has been talk of something of the kind for some time, and it is obvious that China's best hope of preserving her integrity is to make its preservation a matter of material interest to as many of the Western Powers as possible, which can best be accomplished by throwing open the whole of her territories to foreign trade. The neutrality of foreign settlements may be said to have been established in principle ever since the Taiping rebellion. Naturally, however, the privilege must be limited in some degree. Extraterritoriality and customs duties constitute evident barriers.

The fourth demand is that an administrative system similar to that adopted in the southern regions of the empire shall be employed for the preservation of foreign life and property.

The *Daikichi Maru*, a small steamer belonging to the Osaka Shosen Kaisha, seems to have been caught by the fall of the river at Lungkau. She has hitherto been plying between Hangkow and Ichang, and on the forenoon of the 11th instant, when she had landed all her cargo, she was found to be so fast aground that the *Daigen Maru* failed to haul her off. The water was falling at the rate of 3 inches daily, so there was

every prospect of the steamer's remaining aground for some time.

Monday, Oct. 20.

It is now alleged that the Empress Dowager of China has conceived a prejudice against the despatch of students to foreign countries. The Peking correspondent of the *Jiji Shimpō* gives currency to the statement. He says that diplomatic reports from Japan influenced Her Majesty by creating an apprehension that the students in this country would imbibe republican doctrines. She therefore intimated a desire that Japan alone should not be the field of education but that Europe and America should also be included. This, however, is regarded as an astute manner of checking the despatch of students altogether. Of course the *Jiji Shimpō's* correspondent may have wired a purely baseless conjecture of his own. But that is not likely. There is no difficulty in understanding that, viewed from a distance, the events which have occurred in Japan with reference to Chinese students have produced a damaging impression. If the Empress Dowager has really assumed such an attitude, the death of Liu Kun-yi must be said to have occurred at a particularly inopportune time.

Tuesday, Oct. 21.

A telegram to the *Jiji Shimpō* says that Viceroy Chang Chih-tung, on being ordered to proceed to Nanking for the purpose of discharging the duties of Viceroy of the Two Kiang, tendered his resignation, his reason being that he was unwilling to accept such a post temporarily. The Throne, however, refused to sanction his resignation and it thus became necessary for him to obey. It was always foreseeable, of course, that Chang would strongly object to becoming a *locum tenens* in any position. He is much too great a personage for such purposes.

Wednesday, Oct. 22.

Both the *Jiji Shimpō* and the *Asahi* have telegrams to the effect that a prominent Chinese merchant of Shanghai is in difficulties and that his affairs will probably have to be wound up. He is a man of very extensive dealings, and the banks as well as the local cotton-spinning industries would be seriously affected by his insolvency.

Thursday, Oct. 23.

The explanation of Sir Ernest Satow's refusal to have any social relations with the Court in Peking, must be sought apparently, in the Chinese Government's refusal to punish the officials responsible for the Hunan assassinations. In connexion with the same affair four British war-ships, the *Phoenix*, the *Rosario*, the *Mutine* and the *Britomast* have been ordered to Hangkow, and will probably be accompanied by the Admiral. We can well understand that the Hunan trouble presents some perplexing features. The murder of the two missionaries was the result of sudden access of mob madness under the influence of terror caused by an epidemic of cholera, and it may be very difficult to convince the Chinese Authorities that any responsibility for such an incident can justly be laid on the shoulders of local officials. We can be sure, however, that Sir Ernest Satow has obtained evidence fully satisfying him of the propriety of the course he is adopting.

It is stated that the Boxers in Kwangsi have seized a French missionary and are holding him for ransom. Such incidents are not unlikely to end in the payment of a

ransom by the wrong side. France will not show much reluctance about sending an expedition across the border, and that its expenses would ultimately have to be paid by China, goes without saying. Perhaps it is unjust to blame the publicists who see in missionary labours a main cause of Chinese agitation against foreigners. The missionaries figure so frequently in the beginnings of these troubles that their share in them is apt to be misconstrued. But it really does seem as though history would have to say in the end that the seeds of aggression were sowed in China by missionary propagandism.

Friday, Oct. 24.

The Specie Bank has opened a branch in the Chinese city of Tientsin and is about to issue notes to the extent of a hundred thousand yen.

Mr. Fukuda, one of the Chinese Government's advisers, is reported to have advised the organization of an official bank with a subscribed capital of two million yen, and authority to issue exchangeable notes to that amount.

The Chinese officers who are to attend the autumn manœuvres in Kiushiu left Tientsin by the *Sagami Maru* on the 21st inst. Their number is not stated. Last year such a numerous body came that they made quite a feature of the final day's review.

Viceroy Yuan's return to his native place in connexion with the death of his mother is suggesting sundry rumours. There has been much delay in his obtaining leave to absent himself from his post for the purpose of performing the usual mourning rites. His Excellency entertained 118 foreigners at his Yamèn on the 21st instant.

Stories are now circulated that Russia has concluded a secret treaty with China providing for the construction of a railway from Ili to Shingking. Russian diplomatists must be very busy devising and negotiating secret treaties in the East. Nevertheless, it is a highly suggestive idea that Russia should now be contemplating approach by railway to the north-western gate of the Chinese empire. Her Trans-Asian road and its branches have given her free access to the north-east of the moribund empire. Is she now coming to knock at the north-western door also?

It is stated that the alleged despatch of British men-of-war to Hankow may be a mistake. The *Hochi Shimbun's* inquiries in official quarters lead it to publish a contradiction, its belief being that the Hunan trouble has been virtually settled.

ACTION AGAINST MESSRS MURAI BROTHERS.

Two Greek subjects have instituted proceedings in the Kyoto local court for the recovery of a total sum of 64,347 yen, which they claim partly on account of past earnings of certain cigarette-making machines of their invention, and partly on account of anticipated earnings during the remainder of a period of 10 years dating from April, 1895. They allege that Messrs. Murai Brothers agreed to employ them during that period, giving them a share of the profits, but that no steps have been taken to implement the compact since the destruction of the factory by fire last May.

THE IRON FOUNDRY.

Saturday, Oct. 18.

The committee appointed some time ago to investigate the question of the Wakamatsu Iron Foundry, are said to have completed and presented their report. They recommend that the foundry should be worked by a company, and they have embodied their plan in a document of some twenty clauses. Briefly stated, the programme may be said to be based on the system pursued with regard to the Bank of Japan. The Government is advised to leave as fixed capital the 20 million *yen* spent by it in constructing and equipping the foundry, handing it over to be worked by a company. The public's part in establishing the factory on its new basis would be to subscribe a sum of 750,000 *yen* in 100-*yen* shares, this money being employed as working capital. Out of the net profits $\frac{8}{100}$ would have to be set aside for depreciation and $\frac{2}{100}$ as a reserve for equalizing dividends. It is not proposed, however, that the total amount of 750,000 *yen* should be paid up at once. One quarter only of the sum would be required immediately, the remainder being called up if necessary. The profits, up to 8 per cent. of the money subscribed by the shareholders, would be paid to the latter and should there be any surplus, it would be divided equally between the Treasury and the Company. Further the Government would guarantee interest at the rate of 6 per cent. on the paid-up capital during a period of 15 years, and would also, if necessary, lend a sum of five million *yen* to the Company without interest, this money to remain unpaid for 10 years, and thereafter to be rapid in 20 yearly installments. Moreover, the Government would pledge itself to purchase from the factory, for the public service, all materials producible there. The last privilege is that, during a period of 15 years, the Company need not pay any business tax. It has always been the opinion of experts, we believe, that no demand exists, or can be expected to exist in the near future, for the products of a foundry organized on such an extensive basis as that of the Wakamatsu works. If, therefore, it be insisted that the works must be kept going at anything like their capacity, the company or the Government must shoulder a considerable deficit.

Monday, Oct. 20.

Major-General Nakamura, who succeeded Mr. Wada as director of the Wakamatsu Foundry, has presented a scheme differing radically from that suggested by the Investigation Committee and summarized in our last issue. The Major-General's idea is that a further sum of six million *yen* should be disbursed by the Treasury, during 3 years, by which means the works can be completed. Thereafter for three years an annual loss of from half a million to a million *yen* must be anticipated, which loss, also, the Treasury would have to make good. Then, in the fourth year, the profits and losses would balance, after which a net gain of a million *yen* annually might be anticipated. It will thus be seen that the Major-General's programme involves a further disbursement of about 9½ million *yen* by the State, thus bringing the total public expenditure on account of the foundry to about 29 million *yen*, on which outlay he anticipates a return of 3½ per cent. approximately. That is certainly a very poor investment; but, on the other hand, no one expected the iron foundry to be a profitable

concern, in the ordinary sense. From the outset it was understood that the country had reconciled itself to purchase for a heavy sum its manufacturing independence in this branch. With the incomplete data in our possession it is impossible to pronounce any opinion between the merits of the two programmes. The statement of outlays made above under Major-General Nakamura's plan does not include a sum of 1½ million *yen* already spent in excess of the estimates. If that be included, it would follow that the State would not begin to derive any actual profit until the sixth year after the completion of the works. The Committee's scheme, however, may be said to contemplate complete abandonment of the 20 million *yen* already expended by the State. It is a question of very great difficulty. Some big sacrifice has to be made, and we are inclined to think that if any of the great capitalists of Japan can be induced to take over the works, even on the very lenient terms proposed by the Committee, no better exit can be found from the dilemma.

We were mistaken in saying that the sum to be subscribed by the company to which it is advised that the Foundry should be handed over is 750,000 *yen*. The sum is 7½ million *yen*. But of that amount the company would not be required to put up more than one-fourth at the outset, namely, 1,875,000 *yen*. Hence the calculation stands thus, so far as we can ascertain. Over twenty millions have been spent upon the Foundry up to the present and there is a debt of two millions—this point is somewhat obscure—which must, of course, be repaid, so that the Treasury may be said to have sunk 22½ million *yen* approximately. Now it is estimated that the Foundry will not begin to be a paying concern until 1906, and that from 1903 to 1906 the total loss will aggregate 4 millions. Moreover, in order to complete the works, the Treasury will have to disburse a further amount of 7½ millions. Hence the final result is that, if the Government retains the foundry in its own hands, it will have sunk a sum of 34 millions by 1906, from which time profits will begin to accue, and the State will be in possession of works that have actually cost 27½ millions.

On the other hand, let us see how the figures will stand if the plan of a company be carried out. As to the total outlay up to the present time, namely 22½ millions, there would be no change. But instead of the Treasury's having to pay out a further sum of 7½ million *yen* for completing the works, it would lend a sum of 5 millions without interest for 10 years, after which the money would have to be repaid in 20 years. We may mention, in parenthesis, that the source of repayment is not indicated, but probably the idea is that the Company's capital of 7½ millions would be gradually called up for the purpose. Evidently if 7½ millions are required to complete the works while in Government possession, 5 millions (lent by the Treasury) would not suffice if expended by a private company for the same purpose. We must therefore assume that the company's capital would be called up to that extent. In other words, though the first call would be only one-fourth of 7½ millions, subsequent calls, the whole aggregating 2½ millions, would be made by the end of 1906. Now upon the Company's paid-up capital the Treasury would have to guarantee interest at the rate of 6 per cent.; in other words, having paid the yearly losses, it would also

have to pay interest on the capital called up. The hypothesis is, however, that from 1906 the works will become a paying concern. Hence it is plain that whereas under the plan of State working, the Treasury would be found to have sunk 34 millions in 1906, under the plan of company working the State's disbursements would be only 31½ million *yen*, and it would further have a prospect of recovering 5 millions of that total, so that, in 1933, the sum actually sunk by it in the works would be only 26½ millions. But to attain that result it would have surrendered to a private company all the profits realized between 1907 and 1932, inclusive, with the exception of a moiety of whatever is realized over and above 8 per cent. The estimated profits after 1906 are one million *yen* annually. Let us assume that only one half of that amount will be actually realized. Then it follows that at the end of 1932, the Treasury would have sacrificed 12 million *yen*, together with all subsequent profits, for the sake of recovering 7½ millions, the net loss being 5 millions. But if the estimate of a million *yen* of annual profit prove correct, the Treasury's loss would be 17½ millions. So, at least, it would appear from the programmes as now published. We therefore find difficulty in crediting their accuracy.

Tuesday, Oct. 21.

The *Jiji Shimpō* is in favour of selling the Iron Foundry to private individuals, but, at the same time, seems to be persuaded that no one will be found to take it over. The country would not consent to place it in foreign hands, and Japan has no capitalists likely to shoulder such a burden. But we gather from the *Jiji's* writing that it has not yet arrived at a very clear opinion on the subject. It justly says that fuller information is needed, for though the public has a general impression that things are not well with the Foundry, the nature and degree of the malady are not fully known.

The *Asahi Shimbun* also favours the project of handing over the Foundry to private enterprise with a measure of State aid. But our contemporary suggests that, under the clouds of failure, the Government takes, perhaps, too gloomy a view of the situation, and is consequently disposed to grant over-favourable terms to any capitalists willing to step into the breach. The *Asahi* then suggests certain points. One of them is that foreigners should not be allowed to become shareholders, on the principle that they are excluded from all enterprises having State assistance. Another is that the shares of the projected company should be offered for public tender, instead of being handed over to certain individuals.

A CHINESE VIEW OF THE NEW BRITISH TREATY.

We print elsewhere in this issue a very interesting letter from Mr. Ku Hung-ming, which gives the views of a prominent and exceptionally able Chinese Official about the new Commercial Treaty just concluded by Sir James McKay on behalf of Great Britain with the Chinese Government. Our correspondent, it will be seen, joins issue with Mr. Cecil Holliday, who recently addressed the *North China Daily News* upon the same subject. Mr. Ku Hung-ming has sent his letter to us so as to ensure its publication, as possibly his plain-speaking might not be welcome to our Shanghai contemporary.

THE WASEDA CELEBRATION.

The celebration at Waseda in connexion with the opening of the university and the twentieth anniversary of the establishment of the Technical College, was a marked success. Count and Countess Okuma received the guests, among whom were Marquis Ito, Baron Kikuchi, Marquises Mayeda, Kuroda and Nabeshima, Viscounts Enomoto and Torio, Count Matsuura, the Representatives of Great Britain, Germany and Italy, Mr. Kato Takaaki, Baron Kato Hiroyuki, the Governor of Tokyo, Professor Hozumi, Mr. Yamamoto, Mr. Soga, Viscount Tani, Dr. Hatoyama and many other distinguished personages, the whole, inclusive of students, numbering about five thousand. Dr. Hatoyama acted as Chairman. The formal part of the proceedings consisted of speeches by Count Okuma, Marquis Ito, Baron Kato, Mr. Yamamoto and Baron Kikuchi, after which a garden party was given in Count Okuma's park, and the celebration concluded with a students' torch-light procession, in which about three thousand took part. The procession started at half-past five in six bodies and marched to Shimbashi, thence proceeding along Ginza, and returning *via* the Palace, where three cheers were given for the Emperor. Fortunately splendid weather assisted the rejoicings, and the beauty of the park at Waseda, where the autumnal tints are just commencing, supplemented by the lavish hospitality of Count Okuma and the interest attaching to the great educational institution at Waseda, where now for the first time the college that has turned out so many distinguished graduates, is elevated to the rank of an university, constituted a remarkable *ensemble*.

Count Okuma recalled the fact that twenty years ago, when the Waseda Technical College was established in a place which might then be called rustic, the only flourishing educational institutions were those of the Government, and private enterprise stood much in need of encouragement in this field. Moreover, at that time there were occasions when the policy of the Cabinet ran counter to the wishes of the people, and when justice was trampled under foot by the arbitrary action of a single statesman. It was necessary, therefore, that the principle of educational liberty should be practically asserted in opposition to the abuses of favoritism and force. Independence of education, being the basis of national independence, is of vital importance to the existence of the State. But, twenty years ago, what were the educational conditions in Government Schools? In one branch, French was the language compulsorily studied; in another, German; in another English; with the natural result that students instructed in French held everything French sacred; students instructed in German had a similar prejudice, and the same was true of those belonging to the English division. Each regarded the other with feelings of hostility, and scientific progress, instead of being smooth and uniform, was interrupted by disputes and differences. A nation must have one language. Japan has a language handed down through thirty centuries. If, indeed, it be contended, or can be shown, that Occidental science and philosophy can not be studied or taught in the language of Japan, there is nothing more to be said. But who shall pretend to make any such assertion? The Waseda Technical College was established twenty years ago in deference to the truth of these convictions, and

at this stage of its career the names of those to whom it owed so much in its infancy must not be forgotten, Doctors Takata Sanaye, Amano Tameyuki and Tsubouchi Yujo; nor must they fail to recall the memory of one no longer, alas! in their midst, Mr. Ono Azusa. The object of the Waseda College might be summed up in the brief formula, liberty of education, its secondary aim being to satisfy wants left unprovided for by the State schools.

Marquis Ito said that it gave him great pleasure to attend this celebration at a college established by his respected friend, Count Okuma; a college where the principles of good organization and economic management had been so successfully applied. It could not be forgotten, however, that the College had suffered many vicissitudes. At one period of its career it had been erroneously described as a political manufactory, and that epithet had so injured it in the eyes of the public that no little loss of popularity resulted. Close observers, however, saw clearly that no such reproach attached to the institution, and the speaker himself had no hesitation in declaring that the Waseda Semmon-gakko was always independent of politics, a purely educational machine. Its purpose had been technical instruction; the teaching of practical science which would serve a man when he went out into the world. Thus there had been no partiality or bias, science being ignorant of race or country. The best that foreign countries had to give had been taken, a course essential to Japan's progress, and the last remnants of the Oriental spirit had been destroyed. Such a retrospect justified the speaker in regarding this occasion as one of profound congratulation.

Baron Kato Hiroyuki remarked that with the establishment of the Waseda University, Japan could boast the possession of four universities—the Imperial in Tokyo, the Kyoto, the Keiogijiku and the Waseda. It was still an imperfect equipment compared with that of foreign countries, but nevertheless some cause for congratulation existed. The learned speaker then entered into an analysis of foreign educational systems, and subsequently passed to consider those of Japan, his conclusion being that the present system closely resembled that of the Ocho era—the pre-Kamakura time—and greatly excelled that of the Tokugawa. The Ocho system had happily combined practical and theoretical instruction, whereas the Tokugawa system had been virtually limited to the study of books. It was now to be sincerely hoped that the still obviously incomplete educational equipment of the country would be supplemented, and that machinery for training practical men would be quickly constructed.

Mr. Yamamoto, President of the Bank of Japan, observed that at one time practical men in Japan had despised students of books, and the latter, in their turn, had looked down on the former. But the practical man now knew that he must have learning. Among six hundred persons forming the staff of the Bank of Japan, two hundred were graduates of schools. He also dwelt upon the vital importance of forming character as well as imparting knowledge, for without character the most erudite scholar could not be of much use in the world.

Baron Kikuchi limited himself to a few words, explaining that Count Okuma, recognising from the first the incompleteness of education conducted entirely by the State, had lent his influence and employed his

resources to promote private enterprise in this line. During twenty years of effort the great institution founded and largely supported by him, had sent out hundreds of men well equipped for the useful part they had acted in the career of their country. It was a matter of the sincerest congratulation that the Waseda College had now attained the status of a university.

In a highly congratulatory article referring to the above event the *Yomiuri Shimbun* observes that whereas Great Britain has 67 universities, France 58, Germany 21, and the United States 300, including "the stones and the jewels," Japan had only three, up to the time of the establishment of a fourth at Waseda. Our contemporary mentions the Doshisha of Kyoto in this context, but seems indisposed to accede to it as yet the rank of a generally recognised university. The hope of the public now is that Waseda and the Keio Gijuku may become the Yale and Harvard of Japan.

THE "SHIMBI DAIKWAN."

The seventh volume of the *Shimbi Daikan* has appeared. Contrary to many predictions the editors are steadily persevering with their great work, and there are now reasonable grounds to hope that it will be carried to completion. We confess to some surprise that sufficient support has been obtained from the Japanese public for an undertaking requiring such a large outlay of money and such a great expenditure of time; but probably much assistance has been given by foreign lovers of Japanese art. Whatever the explanation be, we count it an inestimable gain that the *Shimbi Daikwan* has prospered thus far, and we venture to extend hearty congratulations and thanks to the members of the *Nippon Shimbi Kyokai* and to the editor, Mr. Tajima.

This seventh volume may perhaps be criticized as containing an excessive number of reproductions of antiquities. Several of the plates show the effacements caused in their originals by the lapse of many centuries. But that will not be counted a fault by persons interested in the history of Japanese artistic development. The first plate in the volume shows the celebrated bronze image to which is assigned the distinction of being the oldest art casting in Japan. It is hard to place implicit faith in these verdicts. The distinctive features of the Suiko and the Tenchi eras have not been recognised so clearly as to constitute an infallible basis of identification. But, in truth, the question whether an image was cast in the year 660 a.d. or in the year 666 a.d. can not be considered of vital importance. Among the specimens of sculpture lithographed in this volume, the most interesting, in our opinion, are the likeness effigies, especially those of the prelate Shunjo and of the celebrated sculptors Unkei and Tankei. The two latter are supposed to have been chiselled by the artists themselves, and they offer evidence of the truth of the hypothesis. There are also some reproductions of Chinese pictures which cannot fail to attract the close attention of every student, and there are several pictures by renowned Japanese painters. Thus on the whole the volume does not fall below the level of its predecessors. But neither does it rise above that level. What may be confidently asserted, however, is that when the whole series of books is complete they will constitute a splendidly illustrative record of Far-eastern art.

THE RED CROSS CELEBRATION.

Uyeno park was literally packed with members of the Red Cross Society on the 21st instant, and doubtless the crowd received large additions from the holiday seekers of Tokyo, for a grand autumnal day—a day of “Little Spring”—and an event can always draw a multitude of fête-loving Japanese into the open air. The pavilion erected for the performance of the ceremony measured 41 *tsubo*, but it became ultimately a mere speck in the seething crowd of spectators, the vast majority of whom found that their sight-seeing was limited to an inspection of one another's backs. The Empress arrived on the scene at half past eleven, and found in the pavilion a brilliant company of Princes, Princesses, Foreign Representatives, Ministers of State, Admirals and Generals—in fact the whole of Tokyo's upper hundred. Her Majesty made a speech characterized by the brevity invariably observed by the Japanese Court on such occasions—a brief expression of satisfaction that the Society had reached its eleventh general meeting and an equally brief hope for its future development. His Imperial Highness Prince Komatsu, President of the Society, replied on behalf of the Society, using the stereotyped formula of gratitude for Imperial patronage enjoyed by the Society uninterruptedly during twenty-five years; attributing to that patronage whatever success the institution had attained, and praying for a continuance of the favour. Viscount Hanabusa, Vice-Chairman, then read a report, and proposed that Count Matsukata and Surgeon-General Ishiza should be appointed to the vacancies on the Standing Committee, which proposal was accepted by acclaim. The next part of the ceremony was productive of an incident. Prince Komatsu proceeded to deliver medals to thirty-seven persons who had behaved with conspicuous munificence to the Society. Among them was a Mr. Mikami Masukichi, formerly a merchant of Yokohama, much of whose wealth had become a vanishing quantity under the manipulation of his chief clerk. In the resulting law-suit, the clerk got the better of the master, and from that time the latter became subject to occasional fits of hallucination. Apparently the excitement of the scene during the celebration on the 21st and the proximity of the highest functionaries in the empire suggested to him the advisability of airing his grievances. Shortly after receiving his medal, he advanced to the vicinity of Prince Komatsu and began to make a statement. Surgeon-General Baron Ishikuro at once took his hand and drew him back, handing him over to the police. It was a very trivial occurrence, occupying scarcely two minutes, but of course the facts had become enormously magnified before they reached the outer ranks of the huge crowd, and there was a semblance of commotion. The ceremony of presentation, however, can scarcely be said to have been interrupted. Thereafter Viscount Hanabusa handed a list of the special members of a previously indicated unit of that body, and acting in the absence of Count Sano—read expressions of the Society's thanks to the Emperor, the Empress and Prince Komatsu; whereupon the Empress again pronounced a very brief sentence of congratulation. Several addresses followed; one by Count Sano, chairman of the Society, being read by a proxy; another by Viscount Katsura, returning thanks

for the guests, and a third by Baron Senge, Governor of Tokyo, performing the same office on behalf of the members of the Society. The Empress then left the Park, having previously caused gifts of flower vases and lacquered boxes to be handed to their Imperial Highnesses Prince and Princess Komatsu, and documents of thanks to other leading members who had laboured conspicuously for the welfare of the Society.

In Count Sano's address there were some interesting figures relating to the Society's condition. Thus the public learned that the number of members at present is 790,110, whose yearly contributions amount to 2,157,155 *yen*; that among the members are 25,000 women; that the Imperial Court has subscribed a total of 380,405 *yen*; that the total contributions hitherto received by the Society have been 12,846,677 *yen*; and the total outlays, 7,291,726 *yen*, so that there remains a sum of 5,554,951 *yen*, which is safely invested as a capital fund.

THE LIFE-STORY OF A SUCCESSFUL MAN.

The story of the rapid rise of M. Cornelius de Witte from obscurity to the position of Minister of Finance is a very remarkable one. This man, now the financial brain of Russia, began life with a fair education, as a clerk in one of the departments of the Odessa Railway with headquarters at that port. Within a short time it was noted that he was the most competent man on the whole force. Accordingly he was given more important work. Again, he did his work better than anybody else had done it before. And so, steadily and rapidly, he rose to the management of the road. A greater line, the Kiev Railway, then claimed his services. He was made a director and the head administrator of this line, and then was formally nominated to the government by the directors as managing director. The Government said, “Who is de Witte?” and rejected him. Again the directors unanimously nominated him to the government, and again the Government said, “Who is de Witte?” and rejected him. A third time, as the story runs, the directors presented him, and the Government concluded that a man thus insistently urged must have decided merit, and ratified his nomination. As the managing director of this line, he made it the best road, during his administration, in the Empire. He became an expert on railway tariffs; he improved the permanent way; he improved the rolling stock; he introduced a rigid system; he so economised that he turned channels of expenditure into channels of revenue. The Government and all the people of Russia, and indeed the railway world of Europe, could not but be impressed, and were impressed. And so Vyshnegradsky, then Finance Minister, offered him the head of the Railway Department of the Ministry of Finance because of his unrivalled knowledge and resource in the matter of railway tariffs. He accepted, and for a few months conducted this department with the same notable ability that had formerly marked his railway management. Then the position of Minister of Ways and Communications became vacant, and the Tsar appointed de Witte, who had made himself, by effort and ability—and nothing else—the chief railway man of the Empire, to this Cabinet position. He held it for a year with brilliancy and distinction. Then fate yielded at last her entire favours to this man who would not be denied. The position of Minister of Finance became vacant, and the Tsar looked over the heads of bankers, over theoretical financiers—over

all—to the practical man of affairs who knew how to create sources of revenue and how to spend that revenue economically after it had been collected. Thus de Witte mounted to the high place at the right hand of the Tsar. Such is the story of this patient, sleepless, ceaseless, active, stern and silent man.

READERS.

It is curious to observe the conflict now declaring itself between the naturalism of old Japan and the prudery of the new civilization. The former found expression in the language, of course, and even to this day many a refined Japanese lady speaks innocently of things which some of her Western sisters—some but not all—would deem it misprison of virginal innocence to utter even in an audible whisper. It is for ethnologists to determine which system produces more abundant fruits of practical purity, but a journal like the *Jiji Shimpō* evidently entertains no doubt upon the subject, for it denounces the use of all language calculated to render vice tolerable by familiarity. Probably many of our readers remember a seething hubbub created about a year ago by the discovery that in a reader compiled for use at a female high school and duly franked by the Department of Education, there was found a copy of an advertisement of Tokugawa times wherein certain “pills of longevity” were recommended to the public. The shrewd advertiser had employed some eminent scholar to compile the notice, and its beauty of language was such that it commended itself to the equally eminent compiler of a girls' reader in the late years of the *Meiji* epoch. *Cognoscentes* who understood what was really meant by *chōmen-gan* raised a shout of horror, and when the compiler attempted to shelter himself behind simulated ignorance, they demolished his plea by pointing to a dictionary edited by himself in which this term was fully defined. Of course the commotion did incomparably more harm to public morality in a week than the reader could have done in a dozen years. But such accidents are inevitable. The reader was suppressed at all events. And now we find the *Jiji* pointing to other passages in readers where certain historical characters are adduced as exemplars of some special virtues though these were practised side by side with immorality which the new Japan seeks to eradicate. In truth, if one goes to pre-*Meiji* annals for social or political heroes or heroines, there is much difficulty in being at once truthful and exhaustive without verifying the old Chinese proverb that every jewel has a blemish. Are we then to consign to oblivion nine out of every ten among the notables of olden time because their biographies included the bitter as well as the sweet; or are we to do as has been done in the Occident, present them to later generations in an untruthful garb, their virtues alone remembered, their vices forgotten? Which of us, emerging from school, knew anything about the private lives of the historical characters we had been taught to admire? Is such knowledge necessary? Probably not. But in our case there has been time to hide it gradually, whereas Japan's new existence is so close to her old, that the facts of the latter remain inconveniently salient in the recollections of the former.

KOREA.

M. Waeber arrived at Chemulpo on the morning of the 16th instant. It does not appear to be quite clear in what capacity he appears upon the Korean scene, but the Koreans are treating him as a national guest. Prince Cyril reached Chemulpo in the same man-of-war. His Imperial Highness is to spend some days in the Korean capital.

There is a rumour that Mr. Pablov will succeed Mr. Iswolsky as Russian Representative at the Court of Japan.

The first section of the Söul-Fusan railway has been opened to traffic. It is but a little bit—a distance of one mile, from Fusan to Chhonyang,

Further arrests are reported in connexion with the importation of nickels from Japan. On this occasion Yuensan is the scene of the arrests, but whether the persons apprehended are Japanese subjects the telegram does not say.

Another plot to assassinate the chief of the Korean refugees, Mr. Pak Yonghyo, is said to have been discovered. The story is complicated and scarcely worth publishing in detail. Its gist is that a body of some twenty Koreans, having their head-quarters in Osaka, are living on funds supplied by high dignitaries of Söul for the explicit purpose of killing Mr. Pak and two other refugees. Of course the Korean Government pleads entire ignorance of these doings, but the time will come when Japan must take some strong steps to prevent her territory from becoming a basis of operations for foreign assassins.

The explanation of the above tale is connected with a school called the *Nishin Gijiku*, established by the refugees in Kobe. Want of funds having necessitated the closing of the school, its original projectors felt bound to devise some pretext other than impecuniosity, and they accordingly invented the assassins' canard as a likely and sufficient explanation. Such is the assertion now made by more than one Tokyo journal. It is qualified by a rider that Mr. Pak himself seems to be ignorant of his followers' manoeuvre and is a *bona fide* believer in the truth of the assassination plot.

A telegram to the *Kokumin Shimbun* from Seoul reports that the Korean Government has issued an ordinance and created an office for the reform of weights and measures. The abuses prevailing in various localities are to be abolished and uniformity of system is to be established everywhere. Most interesting in connexion with this step is the fact—so at least we read it—that the Japanese system is to be introduced. Certainly that would greatly facilitate the trade of the two countries.

A further piece of intelligence from Korea is that the Court has decided to create five ranks of nobility after the Japanese model, namely, *Koko-haku-shidan*, or prince (more correctly "duke,") marquis, count, viscount and baron. We speak of the Japanese model because it is the fashion to do so. But in reality these five orders were the creation of the Chinese. Apparently the particular monarch by whom they were created and the exact date of their creation are not known, but they had their origin under the Chow dynasty (1122—255 B.C.), and they are mentioned by Confucius in his "Spring and Autumn Annals." It has been well said that in the Occident we have nothing of which the prototype may not be found in China.

Mr. Waeber being now in Seoul, where his arrival has something of a Frankenstein character, all kinds of rumours fill the air. He is about to demand from Korea a lease of land at Fusan, or at Masampo, or at Chinghai, or at all these places simultaneously, which shall serve as a naval basis for Russia. He is about to insist that Korea shall emerge from her immediate financial embarrassment by becoming a debtor to the Russo-Chinese Bank in a large amount. He is about to require that he himself, or some other important Russian personage, shall be employed by the Korean Government in the capacity of adviser. These and other achievements are busily assigned by rumour to the Russian diplomatist. But everything rests on hearsay of the flimsiest nature. Nothing is certain except that Mr. Waeber has gone to Seoul for some purpose or other. We opine that it is to relieve Mr. Pablov, but the newsmongers will have a "high old time" until the sober truth is definitely known.

PRINCE CYRIL.

There are several telegrams about Prince Cyril's doings in Korea. His Highness seems to have spent only one day in Seoul, and to have discharged solely the essential functions of an official visit. On the 17th instant he landed at Chemulpo, proceeding direct to Seoul, and on the 18th he returned to the former place, whence he embarked at once for Port Arthur. It had been expected that the Prince, in his private capacity, would spend a few days in the peninsula empire seeing the sights, but for reasons which we are left to divine he limited his sojourn to a day. The only consequence of his coming was that Cho Pyong-sik, whose name is well known in Japan on account of his brief residence in Tokyo as Korean Representative, was appointed—temporarily it is supposed—to the post of Minister of Foreign Affairs for the purpose of receiving the Prince.

Although the extensive ceremony originally planned in connexion with the celebration of the fortieth anniversary of the Emperor's coronation has been postponed, the 18th instant did not pass without some official recognition in Seoul. Calls were made at Court by the Foreign Representatives, and in the evening a party was given at the Foreign Office.

Korea is sending two military officers to attend the Japanese autumn manoeuvres in Kiushu.

THE KEIHIN ELECTRIC RAILWAY.

"Keihin" is another manner of pronouncing the ideographs which represent the *kyo* of "Tokyo" and the *hama* of "Yokohama." It will be perceived, therefore, that the Keihin Electric Railway is a line intended ultimately to run between Tokyo and Yokohama. Originally the scheme did not take that complete form. Two companies were in the field, one working to secure the line of communications between Kawasaki and Tokyo; the other, the line between Kawasaki and Yokohama. Ultimately, however, the two were combined. Work commenced on the little section, a mile in length, from Kawasaki to the celebrated temple of Daishi, the capital of the Company being 98,000 *yen*. This section was completed in 1899. Then the capital was increased to 859,000 *yen*, and in September, 1900, another section, measuring 4 miles 73 chains, from the Rokugo to Omori, was commenced, this

being completed and opened to traffic in January 1901. In the meanwhile the Company had obtained permission to build a branch line from Kawasaki to Haneda, which has just been finished. The work occupied 5 months. This branch was opened to traffic on the 17th instant. It will thus be seen that the central portion of the road is finished—namely the portion between Omori and Kawasaki with branches to Daishi and Haneda. There remain now the two long sections, one from Kawasaki to Kanagawa, the other from Omori to Shinagawa. When these will be finished we have no information. Thus far the results of the enterprise are said to have been good but no figures are published, so far as we know. The ceremony of opening the Kawasaki-Haneda section on the 17th instant is reported by vernacular journals in glowing terms, though the deluges of rain that fell at the time were enough to have damped the ardour of many enthusiasts. It is curious that Tokyo's suburbs should have electric railways long before the city itself possesses a mile of such essentials.

THE COMET.

The comet is said to be now very plainly visible after sunset in the West. Those who are anxious to see it have only to study the Western firmament intently shortly after sunset. At this moment the following extract has interest:—

"The shape, extent, and precise form and position of the comet's tail," says *Knowledge*, "are better observed by the naked eye than with the telescope: since the eye can embrace a far wider field, and is the fitter instrument for dealing with great extensions of faint light. To map out, night by night, the precise position of the tail or tails with reference to the neighbouring stars, to trace its limit and to determine its exact form, are by no means unimportant tasks. It was very early noticed that the tails of comets are in general directed away from the sun, and the instance of certain comets, which passed at perihelion very close to the solar surface, was sufficient to prove that we must not regard a comet's tail as forming a body coherent with the head. Thus the great comet of 1843 swept around some 180° of longitude at perihelion in something like eighteen hours of time. The tail which had been seen before perihelion, pointing away from the sun in one direction, could not possibly have been composed of the same material as made up the tail, lying in the opposite direction after perihelion. But if it were supposed that the sun were capable of exercising a repulsive force upon some portion of the substance of the comet, driving it off in a continuous stream, then the general behavior of cometary tails would be accounted for. The tail seen at any particular time, would be the summation of particles which had left the comet at different successive instants, just as the trail of smoke from the funnel of a locomotive, as seen at any particular moment, is composed of particles that came off from it at successive instants, and is not a body coherent with the engine. . . . Professor Brédikine found that several of the great comets of the past century were distinguished by the possession of long straight tails which must have been composed of particles moving under an influence some twelve or fourteen times that of gravity."

THE ODAWARA CATASTROPHE.

Madame Sufu requests us to add the following donations to the list of donors to the relief fund for those who suffered by the Odawara tidal waves:—

	Yen.
"Nemo"	60
Messrs. Andrews & George	100
The Standard Oil Co.	100
"A. I."	5
Mrs. Townsend	10
Mrs. Patton	10
Admiral, Captain, Officers and crew of U.S.S. <i>New York</i>	257

JAPANESE DOCKYARDS.

Whether the country would not be well-advised did it strain a point to develop its ship-building capacity, is a question ably discussed by the *Nichi Nichi Shimbun*. Our contemporary quotes figures showing that Japan constructed in her own dockyards during the year 1900, seventy-seven steamers aggregating 12,828 tons, and forty-eight sailing ships, with an aggregate tonnage of 3,415; so that her totals were 125 vessels constructed, with an aggregate tonnage of 16,243. On the other hand, her purchases abroad were:—

Steamers	227	with a tonnage of	102,157
and Sailing Ships.	119	31,509
Total.....	346		133,666

Thus, not only did she buy three vessels abroad for every one she built at home, but also whereas the average tonnage of the steamers constructed in her own dockyards was only 130 tons, approximately, that of the steamers purchased abroad was 386 tons. Compared with the statistics of European countries Japan's figures undoubtedly make a poor showing. If the number of vessels over a hundred tons be alone considered, the returns are:—

	Number of ships built in 1900.	Total tonnage
England	639	1,524,739
America	286	433,235
Germany	101	217,593
France	92	177,543
Italy	35	60,526

No one can deny that a country possessing such incentives to maritime activity as Japan does ought to be more self-supplying in the matter of ship-building. But it is also certain that Japan is getting on fast in this matter—as fast, perhaps, as is prudent. The remarkable courage of the Mitsu Bishi Company and their open-handed outlays have materially raised the country's status in this respect, and it is only a few days since the opening of new docks at Uraga was celebrated. We are inclined to think that private enterprise may be safely left to carry out the work.

A RAILWAY INCIDENT.

The *Jimmin* publishes a very strong paragraph about five German military men—of what rank we do not know—who are said to have behaved with great violence when travelling from Kyoto to Yokohama by train on their return journey from Tientsin. The five men occupied a second-class carriage, and to such indignities did they subject any Japanese who attempted to enter the carriage, that they remained in sole possession, the other travellers preferring to crowd into adjacent compartments whatever discomfort was thereby entailed. Various circumstances are mentioned by our contemporary, among them being the use of cruel roughness towards a woman with a baby in her arms, but we refrain from publishing these details in default of more convincing information. The *Jimmin* severely condemns the railway officials and the police for allowing the Germans to behave so disgracefully all the way from Kyoto to Yokohama, in spite of complaints made by passengers; and observes that the men probably imagined that they could treat the Japanese as they had been in the habit of treating the Chinese in Chili. It is desirable that this matter should be investigated, with the object of either punishing the offenders, whose names must be known to the German

authorities, or contradicting the *Jimmin's* story.

EMPHATIC CONTRADICTION.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—As the German soldiers alluded to in an article translated from the *Jimmin Shimbun*, which appeared in your paper of 20th inst., are convalescents at the German Military Hospital at Honmoku under my charge, I have made an investigation of the matter and ask you to be so good as to publish this contradiction of the statements made.

According to the statements made by the men who travelled from Kobe to Yokohama on the 13th inst., together with information kindly given me by Mr. Richter (care of Langfeldt, & Co.), a well-known Yokohama resident, who travelled with them, I gather that the accusations brought against the soldiers of bad behaviour are quite unfounded.

The only difficulty which occurred during the journey was with a drunken Japanese, who broke a bottle of beer over the feet of Mr. Richter and used insulting language about the foreigners.

The charge of rudeness towards a woman with her child is also absolutely contradicted, and to show the terms on which the soldiers were with their fellow travellers, they tell me that the sausages and bread which they offered to their neighbours, were accepted and eaten by the Japanese with much friendliness.

Yours truly,
DR. MANSFELD.
Staff-Surgeon in charge of the Military Hospital, Honmoku.
Yokohama, Wednesday Oct. 22nd, 1902.

NAVAL INCREMENT.

In connexion with this question, which is naturally exciting much interest, Tokyo journals have published interesting comparative statistics, showing the number of effective ships in the navies of the world, and the number actually under construction. The figures are these:—

NAVIES OF THE WORLD.		
Country.	Ships.	Tonnage.
England.....	578	1,583,005
France	385	634,870
Russia.....	277	462,315
Germany	242	359,135
America	107	303,825
Italy	210	279,815
Japan	152	251,100

SHIPS UNDER CONSTRUCTION.		
Country.	Ships.	Tonnage.
England.....	105	433,020
America	59	264,015
France	90	181,130
Russia	74	136,220
Germany	20	117,250

MR. DE WITTE.

His Excellency the Russian Minister of Finance, seems to have reached Vladivostock. One imagines that an event so important should have been duly telegraphed, but the only information we have is that the Minister has been welcomed, and that he has told the citizens of Vladivostock that the customs duties imposed last year in Russian interests will not be given up.

The *Asahi Shimbun's* Vladivostock correspondent states, on the alleged authority of officials at that place, that the recently reported removal of duties on articles of import from China, may be regarded as a first step towards making Vladivostock a free port. That would certainly be a most wise move on Russia's part. To promote the commercial success of her Trans-Asian Railway nothing could be more serviceable than to convert both Dalny and Vladivostock into free ports. But how are we to reconcile this programme with the statement attributed above to the Russian Minister of Finance?

SHIRANE-SAN.

The renewed activity of Shirane-san, after a twelve-year period of quiescence, has naturally created much alarm among the people living in the immediate vicinity of the mountain, especially those at the well-known spa of Yumoto. They are reported to be preparing for an immediate exodus, and several have already taken their departure. In the case of many of those people, to be driven from their homes by such an incident means utter ruin, and since the event takes place on the verge of winter, their sufferings will be greatly accentuated. We have no record as to the time when the Yumoto hamlet was established, but it must be many years ago—long before 1889 when the last eruption of the volcano took place. Hence the inference to be drawn from the present alarm of its inhabitants is that the renewal of the mountain's activity is of a violent character. The police despatched constables and experts to make a report, but no news had been received from them at the date of latest advices.

THE HOUSE TAX.

Mr. H. W. Denison and Mr. Miyaoka of the Foreign Office have been appointed to conduct the investigations necessary for compiling Japan's case in the matter of the house-tax arbitration. They have been relieved of other duties for that purpose. The Minister of Foreign Affairs has made a good choice in this instance, and may reckon on an able presentation of his case. British subjects would be much interested in learning the names of the experts by whom their case is to be prepared. It is evidently necessary that one statement should be compiled embodying the conjoint arguments of the three Powers, Germany, France and England, who constitute the second party to the discussion. Each Power can not prepare its case independently and present it independently. Thus it is practically advisable that they should agree to entrust the task to one expert or body of experts. There may be some perplexity about the choice of such expert or body of experts, as there evidently is perplexity about the selection of an arbiter. Indeed the whole matter can not fail to be very troublesome.

There is a rumour which, if well founded, merits attention. It is to the effect that a certain association in Yokohama has suggested the appointment of a professional gentleman to "watch" the case in foreign interests. That is a finely vague proposition. The recipients of the suggestion are understood to be still painfully endeavouring to conceive how the "watching" could be done. The function of the arbitral tribunal will be limited, of course, to examining documents submitted to it and delivering a documentary opinion. No one except the arbitrators themselves will be present. It can scarcely be proposed, therefore, that the "watcher" should watch the tribunal, unless provision be made for him to peep through the keyhole during the proceedings. Thus the only use he could serve would be to see that France, Germany and England prepare their case advisedly. He must be a tolerably self-confident person if he offers himself for that purpose, and the association must have tolerable confidence in his competence when they suggest him.

A MINING CASE.

The preliminary examination into the charge of fraud brought by Mr. J. Johnstone against Nakamura Sadao has ended in the committal of the latter for trial. This is a case of mine salting. Nakamura, in 1900, bought a tract of land in Fukuoka prefecture for 17,500 *yen*. The land measured 304,260 *tsubo* (253 acres) and was supposed to be auriferous. But after some attempts to obtain paying ore, Nakamura concluded that the mine was valueless. Hearing, however, that some Yokohama foreigners were interested in this class of property, he approached Mr. Johnstone, and the latter despatched a foreign expert and a Japanese to examine the property. They procured a specimen of ore from the mine and carried it to Yokohama for purposes of analysis. But *en route*—so it is alleged—Nakamura managed to exchange this specimen for another which had been highly and ingeniously doctored, and thus the result of the Yokohama analysis proved so attractive that Mr. Johnstone, or rather the syndicate for which he was acting, agreed to purchase the property for 800,000 *yen*, of which total 12,541 *yen* was paid at once. The mine, of course, proved valueless, and Mr. Johnstone consequently instituted criminal proceedings for fraud, to be followed by a civil action for the recovery of the sum of 12,541 *yen*. The preliminary hearing in the criminal case ended on the 22nd instant.

NOTES ON CURRENT EVENTS.

The charge preferred against the *Miyako Shimbun* is that it erroneously published a statement announcing the arrest of a prominent foreign merchant of Yokohama together with four members of his firm, in connexion with the alleged embezzlement of 300,000 *yen* by a foreigner belonging to another firm. The damages are laid at ten thousand *yen*, which has startled some readers of Japanese journals. What is curious in the matter is that the Tokyo newspaper's error was due to there being two firms in Yokohama of nearly the same name. That is a valid plea in rebuttal of *mala fides*, but, on the other hand, respectable merchants may justly object to being publicly proclaimed as the objects of arrest on criminal charges. We should have thought that the ends of justice might have been satisfied by requiring the offending journal to publish advertisements in correction of its error, but it is not stated whether that demand preceded the institution of legal proceedings.

Baron Shibusawa is expected to reach Kobe on the 29th instant. He seems to have hastened his return, as much important business awaits his management.

The *Niroku Shimbun* alleges that Japan has appointed, as her representative on the arbitral tribunal, Mr. Motono, now Minister in Paris, and that the other three Powers who are parties to the dispute have chosen Sir Edward Fry. We have no confirmation of this rumour and we therefore give it for what it may be worth. So far as Japan is concerned, the choice has always lain between Mr. H. D. Denison and Mr. Motono, and for obvious reasons the latter would be preferred, though unquestionably no man in the world is so well posted on the whole subject as Mr. Denison, nor is there any one, we imagine, who takes a broader and more liberal view. It is alleged that France objected to the appointment of Sir Edward

Fry, but as the whole of this statement rests on the authority of the *Niroku*, we reproduce it with all reserve.

The wedding celebration at Count Okuma's residence at Waseda was celebrated on the 16th instant, the new building, erected since the fire of last year, being used on the occasion. There was a large attendance of distinguished personages, but unfortunately the weather proved very inclement.

A telegram from Vladivostock says that, from the 14th instant, duties were abolished in the case of all goods coming from China with the exception of tea and rice.

The autumn manœuvres this year are to take place during the early part of November, Field Marshal Marquis Oyama being in supreme command. Two Divisions will be engaged, that of Kumamoto and that of Kokura. Nothing is yet stated as to the plan of campaign. The Emperor will leave Tokyo on the 6th instant for Kumamoto, resting one night each at Nagoya, Kyoto, Hiroshima and Bakan. His Majesty will inspect the manœuvres during four days, the 10th, 11th, 12th and 13th.

The plan of campaign for the autumn manœuvres is now announced. It is briefly stated that the Sixth Division will represent a foreign invading force, which, having effected a landing at Yatsushiro Bay, has pushed inland to the neighbourhood of Kumamoto, where its further advance will be checked by the Twelfth Division. More than that is never published about manœuvres, and it is about all that the general public cares to hear. The Emperor himself is to be in supreme command, and the acting command in chief will devolve upon Field-Marshal Marquis Oyama, the umpires being Lieut.-Generals Kuroki and Uyeda, assisted by a large staff of distinguished officers. General Viscount Katsura will accompany the Emperor. Probably the Prime Minister will find the manœuvres an agreeable respite from the cares and worries of civil administration.

It turns out that the statement recently published by the *Niroku Shimbun* and reproduced in these columns as to the personnel of the arbitral tribunal, is at least premature. There had not been, up to yesterday, any nomination on the side of Germany, France and England. Less than a week now remains for the parties to the dispute to make their choice, but we presume that a prolongation of the time is always possible. It would have been far preferable, we venture to think, could both sides have agreed to submit the case to a single arbiter—some publicist or jurisconsult of world-wide reputation. Rumour alleges that such a course would not have been impossible, so far as Japan is concerned.

The Red Cross Society of Japan has now a membership of 828,080, of whom 110,000 are supposed to have attended the great meeting on the 21st instant. The Empress was present at the opening of the festivities. Silver cups were presented to seven persons whose labours on behalf of the Society have been conspicuous, namely, Surgeon-General Baron Ishiguro, Marquis Nabeshima, Baron Ozawa, Baron Hanabusa, Viscount Mutsudaira, Mr. Hirayama and Mr. Kasawara. The yearly income of the Society at present is 2,138,487 *yen*, a very remarkable figure for this country. Among the amusements provided for those attending the meeting are admission to various

places of amusement in Tokyo and permission to visit several men-of-war at Yokosuka as well as to inspect the barracks and schools of the Tokyo garrison. It is estimated that the money spent by the Society on this celebration will amount to 300,000 *yen*. If we add to this the expenditures of those visiting the celebration, calculating the sum at even 10 *yen* each, there results a total outlay of nearly 1½ million *yen*.

The *Jiji Shimpō* has a leading article on the subject of the Red Cross Society. It quotes some of the figures relating to similar societies in the Occident, and reminds its countrymen that although they have done well in this matter, there is still much to do. The Russian Red Cross Society has a capital fund of 13 million roubles and its outlays on account of the North-China campaign were 1,393,126 roubles against an expenditure of 388,575 *yen* on Japan's part.

The news telegraphed to *The Times* from Odessa as to negotiations being in progress between Russia and Japan for important commercial concessions on either side, is, of course baseless. It has been officially contradicted, as our readers are aware. The only conceivable grain of truth in the story is connected with the question of the Saghalien fisheries. Russia has agreed that the privilege hitherto enjoyed by Japanese fishermen in Saghalien waters shall be continued for one year. This privilege has been exercised ever since it was created by the treaty of 1875, but as that document does not fix any time, Russia has the right at any moment to close the fisheries. She intimated her resolve to do so three years ago, if we remember aright, but was induced to postpone the operation of the restriction for a time, and now another year's law has been granted by her. Possibly some intelligence of this fact, reaching Vladivostock, may have given rise to the above rumour.

It is frequently said that in view of her occupation of the Liaotung Peninsula and consequent access to southern seas, Russia contemplates the abandonment of further constructive operations at Vladivostock. Her Budget for 1901 does not confirm that idea. In the total item of £11,500,000 for naval purposes, there are included two sums for far-Eastern works of construction, namely, £451,550 for Port Arthur and £350,000 for Vladivostock. Evidently no money is to be spared upon the fortifications of the two places. The above figures are from a London telegram to the *Asahi Shimbun*.

On the 18th inst. there was inaugurated in Kyoto a school called the *Kôtô Kôgei Gakko* (High Art School). The ceremony was largely attended. His Excellency Baron Kikuchi, in an opening address, said that Kyoto had been from ancient times the art centre of Japan and that the object of the new school was to preserve and extend that reputation. Art, however, like everything else, must be progressive, and nothing is now more essential to the vitality of Japanese art than that it should be adapted to the spirit and intelligently applied to the uses of modern civilization. No reports have been published of any other speeches delivered on the occasion.

The appointments are announced of Messrs. Matsukata and Funakoshi to be Secretaries of the Foreign Department. Mr. Matsukata returned recently from service in Germany and Mr. Funakoshi from service in the United States. The former is a son of Count Matsukata, and the latter is a son-

in-law of Marquis Yamagata. Mr. Miyaoka, of the same Department—one of its most prominent and promising officials—has been relieved of his duties as secretary and is now merely a Minister *en disponibilité*.

The *Literary Digest*, summarizing an article in the *Quarterly Review*, arrives at the conclusion that “the result of the general election in Japan has been, on the whole, a victory for Marquis Ito, which means that the building of a powerful navy will be continued.” It may interest Marquis Ito and the Seiyukai to know that their policy is thus interpreted abroad. Not quite the same view is taken of it in Japan.

There are various rumours about M. Lessar's health. One telegram says that leave of absence has been granted to him on account of indisposition; another that his condition is actually dangerous. We trust that the latter news may prove to be a great exaggeration.

Dr. Ritter, Consul-General for Switzerland in Yokohama, writes to us under date of Oct. 23rd:—I have just received by telegram the sad news of the death, at 7.50 o'clock this morning, of Mr. Walther Hauser, Federal Councillor, at the age of 65 years. Since the year 1888 he had been a member of the Federal Council and in that capacity had occupied twice the honourable position of President of the Swiss Confederation. The flag at the Swiss Consulate-General will be hoisted half-mast during three days from date.

A Washington telegram under date of September 28th says that President Roosevelt has granted a full and unconditional pardon to William Dinkella, convicted in 1880 at Kobe of the murder of Charles H. Abbott, mate of the American ship *Centennial*. Dinkella has been in prison for 22 years, most of which were spent in Albany.

YOKOHAMA LITERARY SOCIETY.

The Yokohama Literary Society held its first social meeting for the season 1902-03 in Van Schaick Hall on Friday evening and despite the now proverbial “Literary” weather passed off most successfully, the attendance being larger than could have been reasonably expected after such a blustery, rainy day. The new President, Mr. A. Bellamy Brown, in taking the Chair, thanked the Society for the honour the members had conferred upon him. He appreciated it very highly and he trusted that he would be able to maintain worthily the traditions which now clustered round the office. It was with no little inward trepidation that he assumed the position for he was following such men as Mr. Geo. Sale, Mr. A. J. Wilkin, Mr. Jas. Troup, Mr. John Griffin, Mr. McIvor, Dr. Dearing—all grave and reverend seigneurs, wise in council, discreet in address, possessors of the saving grace of tact, and above all carriers of a greater weight of years than he could yet lay claim to. But with the cordial help of the various committees—and stronger committees had not been elected, he thought, in the history of the institution—and the hearty co-operation of the Society, he trusted that the season they were just entering upon would prove as successful as any of its predecessors. The committee had already arranged for several papers, as noted on the programme, but there were many more dates to fill and he hoped that an effort would be made by individual members of the Society to supply these blanks. Surely among their large list of members there must be some “mute inglorious Miltons,” who were only waiting an opportunity to be heard. He, as President of the Society, would heartily welcome any offers of essays or addresses from members who had not so far been personally

solicited, and he trusted that the offer would be speedily taken up. And going outside the bounds of the Society, it seemed a pity that so many of the older residents of Yokohama declined to put their reminiscences of their early days here down upon paper. What was it they dreaded? Did they fear that their tales of those now long past early-days would not be appreciated, would fall on deaf ears? He could assure them that was far from being the case. A keen interest was displayed by the rising generation in the doings of the pioneers of this settlement and the pity was that so few of the old hands had committed the early history of the place to writing. Their little band was growing gradually smaller year by year and as one by one they passed into “the greater silence,” so the recollections of which they were the repositories passed into the limbo of forgotten things. He hoped that ere the winter passed some one among the older residents would listen to this appeal and give the Society a paper, along the lines, perhaps, of an essay given many years ago by the late Mr. A. J. Wilkin, which dealt with his first appearance in Yokohama in the early sixties. Turning to another matter, the President said that the question of altering the date of the Society's Meetings from Friday to Thursday had been put forward by some old members, but the Committee, after considering the question in all its bearings, regretted that they could not adopt it: they would therefore continue to meet every Friday fortnight at the Van Schaick Hall. The Chairman then explained that owing to Mrs. Bellows finding it impossible to undertake the office of Vice-President of the Society, the Committee had approached Mr. G. G. Brady, and that gentleman having kindly consented to step into the breach, he (the President) asked that the provisional appointment of Mr. Brady to the vacant post be confirmed. The motion was at once agreed to.

The following programme was afterwards discussed and thoroughly enjoyed:—

PART I.

Lantern Views...

“Scenes from Many Climes”...Mr. C. Griffin.

PART II.

1. Piano Duet...

“Hungarian Dances” 1 and 2.....F. Behr.

Mrs. A. Bellamy Brown and Mr. W. Karl Vincent.

2. Recitation...“The Raven” (illustrated)...E. A. Poe.

Mr. H. J. Sharp.

3. Song.....“Winter's Gone”...Sterndale Bennett.

Miss Vincent.

4. Piano Solo.....“Minuet”.....Paderewski.

Mr. W. Karl Vincent.

5. Song.....“Old and New”...Theo. Bonheur.

Mr. S. H. Somerton.

The provisional programme, subject to alteration, has so far been arranged:—

Oct. 31—“Sea Customs, Sea Words, and Sea Songs,” Mr. A. Bellamy Brown.

Nov. 14—“Through Norway” (illustrated), Mr. W. Karl Vincent.

Nov. 28—“Alpine Ascents and Adventures” (illustrated), Rev. W. Weston.

Dec. 12—“A Trip to Turkey,” Mrs. W. Kirkland Wilson.

Dec. 29—“A Christmas Programme,” Various.

Jan. 9—“The Sunny Island of Hawaii,” Rev. Geo. Wallace.

Jan. 23—“Scenes from Shakespeare,” Mr. N. G. Maitland.

THE BOERS' APPEAL.

THE appeal made by the Boers to the civilized world does not become more respectable by familiarity. Their defence was very fine and they will always have the credit of having offered a novel demonstration of the capabilities of untrained soldiers armed with modern weapons of precision which they know how to utilize. But, having commenced a war with the object of driving the British out of Africa and replacing their dominion by a big Boer republic, and having been fairly defeated in that attempt, the Boer leaders seem to be setting a very strange example when they come before the world as suppliants for means to mitigate the consequences of their own suicidal ambition. Had Great Britain acted the part of a tyrannous ruler in South Africa; had her sway been intolerant, her exactions onerous and her policy exclusive, then indeed we should all sympathise with an endeavour to escape from the hardships of her government. But the very opposite of these things was the truth. The Boers residing in her territories enjoyed exactly the same privileges as her own subjects, and wherever her flag flew there existed for every one living under its shadow liberty such as belongs to the subjects or citizens of no other country in the world, with the doubtful exception of the United States. Not the most infinitesimally small complaint could be justly preferred by the Boers on that score, whereas the whole cause of friction between them and the English was that British subjects residing in Boer territory were injuriously discriminated against, and that, while contributing the great bulk of the State's revenue, they were denied the elementary right of a voice in the disposal of the taxes paid by themselves, or in the management of the public funds by a Government notoriously corrupt. Under such circumstances the campaign planned by the Boers, their armed irruption into British territory, and their purpose of exterminating British sway throughout the whole of South Africa, will surely be declared by impartial historians a war of deliberately ambitious conquest. It is of no avail to say that the Boers were driven to arms by the imminence of attack, and that they adopted the offensive as the most efficacious means of protecting their hearths and homes against invasion. No thinking person can pretend to imagine that any scheme of invasion animated Great Britain's procedure; still less that her warlike preparations, glaringly insufficient even for purposes of defence, were devised on a scale of aggressive conquest. So little did she think of fighting that she was taken unprepared, and the warmest partisan of the Boers does not now venture to deny that to take her unprepared was their main object; that they had laid all their plans for an invasion of Cape Colony as well as of Natal, and that they would never have gone into the field had they

not been fully persuaded of the feasibility of establishing their own sway throughout the whole of the wide regions ruled by Great Britain in South Africa. They failed in the attempt. Very near indeed did they come to success, but nevertheless they ultimately failed. One of their first steps was to drive from the Transvaal and the Free State the British subjects who happened to be living there. It is still fresh in the memory of us all how streams of these refugees, suffering privations and hardships, journeyed down into Cape Colony, where for two years they had to subsist as best they could, having lost their whole means of livelihood. It is also fresh in the memory of all of us how the Boers destroyed British property wholesale in every part of Cape Colony where they succeeded in temporarily establishing themselves—destroyed it, not because it supported their enemies, but merely because it belonged to their enemies—and how they employed means often of a brutal nature to compel British subjects to serve in their ranks. After all this they find themselves vanquished, and they now implore the world's charity to soften for them the consequences of their own mad ambition. We can well understand that the Boer leaders are oppressed by the weight of the responsibility they have shouldered. Through their erroneous estimates and demented political ambition tens of thousands of ignorant burghers were induced to band together for an aggressive campaign against a country to which they owed much gratitude and no grudge, and it must be an almost unendurably painful reflection that a great majority of those ignorant burghers now find themselves reduced from a state of happy prosperity to one of miserable destitution. Perhaps it would be charitable to assume that in the face of such a disastrous result the Boer leaders have cast all thought of dignity to the winds of heaven, and are animated solely by an engrossing desire to alleviate the sufferings of the people they have ruined. None the less, however, it is necessary to observe that the annals of nations contain no precedent for the spectacle now witnessed—the spectacle of politicians and captains who, having undertaken a wantonly aggressive campaign of territorial conquest, and having continued to wage it for more than a year after the smallest hope of success had disappeared, now supplicate the donations of charitable persons in all countries to restore the prosperity they have legitimately forfeited. Were they a band of destitute refugees, driven from their homesteads as they, in their hour of temporary victory, drove the British, we should all recognise the cogency of their appeal no less than our own obligation to help them. No such excuse can be advanced. On the contrary, by British generosity they are to be re-instated in their lands, and by British generosity they are to be furnished with funds for laying the basis of a future era of prosperity. It is not congenial to make public reference

to the magnanimity of our own countrymen, but we can scarcely be accused of vanity if we recall the facts not only that England has refrained from imposing on her ambitious aggressors any part of the immense outlays in which their invasion involved her, but also that, instead of confiscating their property, she has restored it to them together with a large sum of ready money. Nevertheless they come before the nations cap in hand. What, we are tempted to ask by way of contrast, what would have been the fate of the British settlers in Natal, in Cape Colony, in Griqualand and elsewhere had the Boer arms finally triumphed? Would their homesteads have been restored to them by the victors, would they have been supplied with money to restock their farms, and would they have appealed to the world's charity for some pecuniary alleviation of sufferings which, in their case at all events, would not have been the penalty of aggressive ambition? If, on the other hand, this appeal made by the Boer leaders be a subtle device for perpetuating the sympathy of nations hostile to England, it will prove, we are convinced, a clumsy conception. The public may be, and often is, carried away from the path of justice by a sudden vertigo, but its feet always return to the happily well-worn track, and the ultimate verdict in this instance will surely be that those whose sense of dignity could not reconcile them to suffer the deserts of their own rashness are not worthy objects of active pity.

DALNY.

THERE has appeared in our advertisement columns since the 17th instant a notice to the effect that, on November the 14th, certain parcels of land will be sold in the European district of Dalny to Russian subjects or to foreigners. The advertisement speaks of sales only, but it is to be understood that in this term is included the selling not only of titles of ownership but also of leases. We have received a pamphlet entitled "Extract from the Law concerning the Government of Dalny and Rules for buying and Leasing Land-parcels." In these Rules it might be expected that some explicit information would be furnished as to the nature of the title of ownership offered for sale and the maximum term of lease. Obvious interest attaches to such matters, for since Russia, in whose name the sales will be made, is herself a tenant of Dalny for a limited term fixed by Convention, it is difficult to perceive how she can undertake to grant to foreigners or to Russian subjects titles of ownership or leases for any period exceeding that of her own nominal tenancy. In that difficulty some persons may be disposed to discover a reason for the ambiguity shown by the drafters of the Rules, but since it is quite plain that neither can leases be granted without some definition of the term covered by them, nor lands sold without some explanation of the title acquired by

BOAT NO. 1.

Bow. C. H. Moss	140
Str. H. E. Irwine	143

It was a level start, but Irwine who was outside, soon assumed the lead and at the three-quarter mark was a good two lengths in front. This advantage he increased at the half mile to about ten lengths, both crews going about 29, and about the same distance separated the boats at the P. M. Wharf. Irwine won by about ten lengths. Time, 9.19.

Scratch Fours followed.

THE INTERPORT FESTIVAL.

THIRD DAY'S CRICKET.

Writing of the third day's play the *Kobe Herald* gave an account, which we abridge:—

The morning broke superbly and everything seemed to foretell a good day's sport. T. Ross Reid, who had carried his bat from Tuesday to Wednesday and again to-day, went in at the southern end and Hancock resumed his place at the other end, White starting the bowling for Yokohama. Both batsmen hit freely and at ten Kilby bowled Hancock with a ball which was very nearly a yorker. Four wickets down for 194. Hancock had added 21 to his score which brought his total up to 68. Edwards took the vacant place and was bowled first ball by H. Kilby. This was a great disappointment to Kobe as Edwards had been looked to to bring up the score very considerably. Murray took the vacant place at the wicket. In the second over Kilby got the better of the Kobe Captain with a full pitch ball—thus sending two of Kobe's strongest players back to the Pavilion with a duck's egg each. The score stood at 194 for six wickets. Braess went in. In the next over Reid knocked up a skyer which Firth caught easily at mid off. Reid had been in a long time and had added a very useful 42 to the score. Seven wickets for 198. Thompson went in and with his first two brought the total up to 200. Almost the next minute Braess hit up a ball from Kilby which was caught by Crawford at mid off. The retiring batsman had made 4 runs; 8 wickets for 200. Buckley joined Thompson at the wickets just after eleven o'clock.

The last four wickets has fallen for only 4 runs and things looked rather blue for Kobe. Five minutes after 210 was signalled (9.45). Thompson hit his first boundary, but was caught and bowled by White—a capital catch—a minute or so later, 218 for 9 wickets. Thompson had made 14. Allen was the last man to go out. With the fifth ball Fradgley, who relieved White, broke down Buckley's defence completely and this ended the Kobe innings. Buckley made 5 and the whole score reached a total of 221. The innings closed at 10.30.

At a quarter to eleven Yokohama went in, represented by H. Kilby and Wheeler. Murray started the bowling at the north and Edward at the other end. In Edward's second over the fourth ball bowled Wheeler after he had only been in ten minutes and scored 7. This brought the total to 9 runs for one wicket. E. W. Kilby joined his brother and Edwards sent down his first maiden over. Some quiet play was broken by Edwards sending down a beautiful ball that reached E. Kilby's wicket—two wickets for 22. E Kilby had made 10 runs. Kingdon joined H. Kilby and knocked up a good catch but no one except the Umpire was anywhere near. Kingdon continued to knock up catches and at last he was cleverly caught in the slips by Jack Lucas off Edwards. Three wickets down for 30 runs, Kingdon's share being a modest couple of singles. White joined Kilby. Kilby sent a cut to the boundary just before half past eleven, and Green failing to stop a ball that White hit, the score was increased by one more four. Edwards now succeeded in getting a maiden over just after the half hour. Just before twelve Green relieved Edwards of the bowling at the south end and was put away for a two by Kilby and 60 up was called. White knocked up a skyer just as the twelve o'clock gun boomed but no one was on the spot. At a quarter past twelve, seven maiden overs had been bowled in succession. 70 up was called shortly afterwards. At five to one, Hancock bowling, Kilby was given out leg before wicket after compiling 68 runs. This made four wickets down for 97 and on the conclusion of the over an adjournment was made for tiffin.

Tiffin was again served in the Gymnasium. Before rising from the table Mr. Pakenham announced that Mr. Bottlewalla had sent down a choice Indian vase for the Kobe man who had, in the opinion of the majority, contributed most toward the local cause.

The match was resumed at a quarter past two with White and Crawford batting, Buckley taking the first over from the north and Edwards taking the other end. Edwards started bowling to Crawford and with his third ball bowled Crawford, the captain

of the visiting eleven, from whom so much had been expected. This put five wickets down for 99. Crawford had made a duck. Duff joined White. Duff was bowled by the second ball from Edwards and added another to the list of ducks. Five wickets had fallen for 99 runs. Allcock filled the vacant position and immediately brought the score up to a century. Allcock hit a beautiful four to leg and shortly afterwards Buckley bowled Allcock, who by this time had knocked up 11. This made 113 for 7 wickets. E. O. Fradgley followed Allcock and joined White who was playing a careful game, steadily bringing up his score. Both men were batting rather high and play was getting risky for them, but the score was going up well. At a quarter past three Fradgley knocked up a ball from Edwards and was caught at square leg by Braess—146 for 8 wickets, Fradgley's score being 10. Firth joined White. Edwards was bowling well and had made four maiden overs running, in which he had taken a wicket. 150 up was called at 3.25. White brought a good innings of 61 to a close by knocking up a ball from Edwards which Gillingham held, 9 wickets down for 150. The last man, Lammert, then went in. Edwards was bowling his sixth maiden when Firth gave a beautiful catch which Edwards took advantage of and the whole side went out, Lammert getting no better luck than in his first innings. Yokohama was out at twenty to four for 150 runs.

Kobe wanted 234 runs to win, so no time was lost in getting to the wicket. Kobe's second innings was opened by T. Ross Reid and Thompson, H. Kilby starting bowling to Thompson. Fradgley took the leather at the other end and started with some very swift balls, securing Thompson's wicket with the last ball in his over. Braess joined Reid and hit a ball to the boundary in the first over. Braess was clean bowled by Fradgley in his third over after making 9.2 wickets for 11 runs. This did not look very encouraging but hopes were still high when Gillingham went to the wicket to join Reid. Gillingham opened his score with a boundary hit. A full pitch from Fradgley lowered the hopes of Kobe by getting Gillingham's wicket; 22 runs for 3 wickets, of which Gillingham had contributed 12. Hancock went to the wicket and was nearly caught by Crawford who seemed to have the ball fairly in his hands and then dropped it. Hancock started hitting out well and evidently meant to raise the score quickly. E. Kilby relieved his brother at bowling and 40 up was called immediately afterward. White took the ball at the north end from Fradgley and started to bowl to Hancock who put away his third ball for three. Duff at the wicket missed a catch off Reid and this was followed by very quiet and careful play until at five o'clock 50 up was called, and stumps were drawn. T. Ross Reid carried his bat with 41 to his credit while Hancock had 14 to start another day's play with.

INTERPORT SMOKER.

A Smoker was given on Wednesday night at the Gymnasium in honour of the Cricket and Baseball visitors from the sister port. The teams and a large number of others were present. The usual gramaphonic attraction served to fill up the first few minutes when men were still arriving. Mr. Pakenham was in the chair and a very enjoyable programme was gone through, both visitors and residents contributing.

INTERPORT CRICKET.

The match was resumed on Friday morning, Hancock and Reid at the wicket. In his first over E. W. Kilby took Reid's wicket. Green who took his place was, after several changes of bowlers, sent back to the pavilion by Firth. Edwards joined Hancock and at 11.30 only a hundred had to be accounted for if the home team were to win. Hancock and Edwards continued to hit freely, each fresh hand at the ball failing to make any impression on them, and at noon Kobe only wanted 40. The play now became fast, both batsmen piling on the runs, a maiden bowled by Fradgley standing out conspicuously at this time. Great applause greeted a boundary hit by Hancock which brought his score up to the century. At twenty past twelve (said the *Kobe Herald*) Kobe only wanted 10 more to win: A beautiful boundary hit by Hancock left the home team with only six to win and a boundary to leg by Edwards followed by a two brought the required number of runs just before twenty-five past twelve. The last few strokes were made amid intense excitement. By this time a large number of spectators were on the ground and Kobe's victory was received with roars of applause. Both elevens cheered each other and then adjourned for well earned refreshments.

INTERPORT BASEBALL.

The baseball match between Yokohama and Kobe began at half-past two on Friday at Kobe and a large number of people gathered to watch the game. The Kobe team went in to bat first, Chalfant opening the game, facing the pitching of Thorn. Yokohama scored one in the first innings, and both made two in the second, Yokohama adding a similar number in the third—when the score stood 5-2. The fourth innings was a blank, but Kobe took five runs to Yokohama's four in the fifth. Another blank innings was followed by a two-run innings for Kobe which brought that team one ahead. In the eighth Yokohama failed to score but Kobe put on four runs and in the ninth the northern team made one run (by Vancleve) while Kobe scored six. This, the first game of the match, closed at 4.40.

The teams and scores were as follows:—

YOKOHAMA.			
	Times at Bat.	Runs.	
E. W. Kilby	C. 6	1	
W. L. Merriman	2 B. 5	1

SATURDAY'S GAME.

The *Kobe Herald* says that the weather on Saturday morning was all that could possibly be desired from the point of view of the looker-on, although the baseball players must have found the sun rather trying to their eyes. Unfortunately E. W. Kilby had strained his back in the previous play but Dyer, another Yokohama man, was up in Kyoto and came down on receipt of a wire requesting his presence.

As announced in our special telegrams, the game was closely contested, the score standing 19 all at the close of the ninth innings, and it was then decided to play a tenth. At this point E. W. Kilby entered the game again, Dyer retiring, but victory went to Kobe by one run.

The teams were as follow:—

YOKOHAMA.			
	Times at Bat.	Runs.	
W. L. Merriman	2 B. 8	4	
D. H. Blake	3 B. 8	5	
C. H. Thorn	C. 8	3

INTERPORT TENNIS.

The interport tennis championship was played off on Saturday afternoon, Yokohama being represented by H. W. Kilby and E. Buxton-Forman while G. C. Murray and Hancock played for Kobe. In the first set Kobe won, 8 games to 6. The second set was a victory to Yokohama, who secured 6 games to 2 from Kobe. The third and fourth sets went to the home pair by 6 games to

2 each. Dr. Thornicraft, the president of the Kobe Tennis Club, acted as umpire.

YACHTING.

Two yacht races took place on Saturday afternoon.

Mary and Maid Marion, who seem to have had all the racing to themselves in the 39-rater class, sailed for two prizes presented by the Club on arbitrary handicap. Maid took the lead in quite a surprising way and finished first easily, the time being:

	h.m.s.
Maid	4.48.55
Mary	5.08.50

Maid Marion thus wins two record points, and though no handicap was selected yet as she receives an allowance under any one of the four handicaps framed she necessarily wins the first prize also.

The 21-raters also went out but only Pele and Winsome finished, their times being:

	h.m.s.
Pele	5.48.10
Winsome	5.48.22

Pele therefore takes first prize and two record points, Winsome second and one point.

NOTES FROM CHICAGO.

(FROM A CORRESPONDENT).

The announcement of Fall books in the Sept. 16th issue of the *Dial* includes over 1,400 titles, which seem to argue considerable literary activity. It remains to be seen whether the sale and reading of these books will be correspondingly active. The above-mentioned list contains several books on Japan and the Japanese, as follows:—

"A Maker of the New Orient, Samuel Robbins Brown, pioneer educator in China, America and Japan," by William Elliot Griffis, LL.D., illus., 1.25 net. (F. H. Revell Co., Chicago).

"The Wooing of Wistaria," by Onoto Watanna, with frontispiece, \$1.50. (Harper and Bros., New York City).

"Kotto, some Japanese curios with sundry cobwebs," by Lafcadio Hearn, illus. (Macmillan Co., New York City).

"The Island of Formosa," a complete account of its condition, political and industrial, by James W. Davidson, illus. (Macmillan Co., New York City).

"Around the World through Japan, by William Del Mar (Macmillan Co., New York City).

"Japanese Girls and Women," by Alice M. Bacon, illus. in colour, etc., by a Japanese artist, \$4.00 (Houghton, Mifflin & Co., Boston).

"The American Diary of a Japanese Girl," by Miss Morning Glory, illus. in colour, etc., by Genjiro Yeto, \$1.40 net. F. A. Stokes Co. (New York City).

* * *

The following advertisement was actually posted in the window of a clothing store in New York City:—

"Pants, 99 cents per leg, seats free."

* * *

It is reported here, on apparently good authority, that the Rev. W. E. Griffis, D.D., the well-known writer on Japanese and Dutch topics, has retired from the ministry, in order to have more time to devote to literary work. He will not only write books and articles, but also enter the lecture-field with the following repertoire:—

Japan.—(1) Fun, Fact, and Fancy about the Japanese and their Country.
(2) Social, Literary, and Artistic Life of the Japanese.
(3) Street and Outdoor Life in the Mikado's Empire.

China.—Old and New China. John Chinaman as he sees himself and as others see him.

Korea.—The Pigmy Empire and the Story of its Civilization and People.

Holland.—(1) The Dutch at Home and their Grand Story.

(2) Social, Artistic, and Literary Holland.
America.—The Pilgrims in their Three Homes.
Our Fairy Tales and how they came to us.
Sullivan's Expedition against the Indians in 1779.

* * *

Among recent magazine articles on Japanese topics, we find the following:—

"Baron Veichi Shibusawa, the Creator of Industrial Japan," (with portrait), by Stanhope Laws, in September *Review of Reviews*.

Mr. Stanhope Laws, whoever he may be, is one of the editors of a monthly magazine, published in New York City, and called *Japan and America*, which seems post America on things Japanese.

"The Japanese Drama," illustrated, by Miss Onoto Watanna, in Sept. *Critic*. This is an instructive article, marred only by the misspelling of Japanese names and titles, and the common mistake of *hari-kari* for *harakiri*. The illustrations of Japanese actors and acting are excellent.

With all these books, articles and lectures, Japan is well exploited.

LITERARY GOSSIP.

The French National Library has just acquired a Greek papyrus believed to be unique. The *Presse* says that it is of the Græco-Alexandrine epoch, probably of the first century of our era. The papyrus is a fragment of a romance and the text is adorned with paintings, in short, an illustrated novel—possibly a cheap serial of 2,000 years ago. This is said to be the first illustrated literary papyrus ever discovered.

Mr. Frederic Villiers has written his reminiscences, as he ought, for few men can have more interesting things to tell than a war artist, and especially a war artist who has sketched under fire in three continents. Mr. Villiers had his first war experiences in 1876 when the "trouble in the Balkans" began between King Milan and the Sultan. A quarter of a century of travel and conflict will supply "Pictures of Many Wars." Messrs. Cassell are to publish the book.

One of the Anglo-Indian newspapers published the other day an obituary notice of a man still living. The editor humbled himself, on hearing of his mistake, but in so pretty a fashion that he is now quite a hero. This is how he did it:—"We are truly glad to learn that our dear old friend still lives, though it will be a disappointment to many of his friends in heaven that he has not yet been permitted to join them there." The "dead man" rose to the occasion.

Viscount St. Cyres has a paper on Martin Tupper in the *Cornhill*, in which occurs this passage:

Martin the man was a harmless, worthy creature, who could not willingly have hurt a fly; the very existence of Martin the poet was a daily outrage on human reason. No man of his time did more than he to bring both morality and literature into contempt. His exhortations and proverbs are as far from supplying sound rules of conduct as his artistic qualities are far from genuine art. Vulgar Philistine self-righteousness was his watchword, flunkeyism and sectarian hatred his stock-in-trade.

This is hard upon the author of "Proverbial Philosophy," although no doubt many will think it is deserved.

From Messrs. Constable we are shortly to have a book in exposition of the question raised by the shroud of Christ recently exhibited at Turin. It contains a careful analysis of the remarkable photographs taken of the shroud by M. Pia. The volume is written by Dr. Vignon, a Frenchman, who examines the matter from all points of view, historical, photographic, chemical, and the conclusion he reaches is that the portrait on the shroud is the work of no human hand, but was produced by chemical action while it covered the face of a crucified man. And Dr. Vignon is led by historical evidence to the conclusion that here we have the authentic image of the crucified Christ.

How surely books outlive their day is strikingly illustrated in the case of "Festus," the sole work by which Mr. P. J. Bailey, who has passed away at a ripe old age, is known even by name to the present generation of readers. When "Festus" was published in 1836 its author, then in his 23rd year, was acclaimed a poet of the first water, just as nowadays the critics have a way of placing many a modern writer of verse in a prospective niche of fame. Certainly Mr. Bailey

gained unanimous approval; England and America bought his work as fast as the publishers could produce the editions, and for many years afterwards "Festus" and the other poems which were gradually added to the volume found a ready sale. Few people would now support the contention that "Festus" was in any way a great poem. But as an instance of how contemporary report may interfere with judgment, Tennyson said that he was afraid to say what he thought of "Festus," lest his praise should sound extravagant. There are many similar instances. Sir Walter Scott, for example, was convinced that Mrs. Hemans was one of the great poetesses of the world; and the great men who admired Martin Tupper are unnumbered.

Mr. Mortimer Menpes and his clever daughter have produced through Messrs. A. & C. Black another interesting volume. It covers an immense amount of ground, ranging over England, Holland, France, Switzerland, Italy, Spain, Turkey, Greece, Morocco, Egypt, South Africa, Palestine, India, Burmah, China, Japan, and lastly, Mexico. There are 100 full-page drawings in black-and-white or in colour, and, in addition, there are (introduced into the letterpress) innumerable little "croquis"—sometimes two on a page. All the "pictures" are well chosen in subject, and eminently characteristic of the countries and peoples dealt with. On their admirable artistic quality it is unnecessary to dwell; the name of Mr. Menpes testifies to that. Miss Menpes has, on the whole, got through her difficult task successfully.

Mr. Frank Norris, the American novelist who first became really known in England by his "Shanghaied," is proceeding with the trilogy he has projected. The subject is the life of wheat in its relation to the life of man. Just about a year ago the first of the series, "The Octopus," appeared, dealing with the growing of the wheat in the Western States and the struggle to death between the railways and the farmers. The forthcoming volume, now completed, deals with the manipulation of wheat in Chicago, and the attempt of a millionaire to corner the market. "The Pit" is its title. Some time ago a prominent critic complained that novelists left aside all the other big interests of life and turned their plots solely on love. Mr. Norris takes as his subject a matter which is of anterior necessity to love, and if his account of wheat cornering is as engrossing as his story of the wheat-growing, "The Pit" should be among the very best of the autumn novels.

A very interesting little manual is that which, according to the *Publishers' Circular*, contains a daily record of the lessons in music, reading, writing, dictation, geography, grammar, natural history, ancient history, work, German, obedience, docility, &c., done by Queen Alexandra as a child. The booklet is inscribed on the old marble-paper wrapper, with "Alexandra, Danemark, 1856," and, we are told: The report is almost uniformly good, but apparently with severe discrimination, the foot of each page containing the word *contente*, with occasionally *très contente* and *parfaitement contente*. On one occasion we find the terrible words "*Moins contente de conduite et les leçons*," another date bears the words "*Mécontente, pendant les leçons*"; again, "*Cette semaine les leçons ont été négligées*." Once or twice the record bears the words "*Malade, point après de leçons*"; once only opposite the column *Docilité* we find the word *peu*. The pages sometimes bear the name "Mimi"; this, it is understood, refers to her Majesty's sister, the Empress of Russia, who, it would appear, occasionally shared her lessons with her.

The North German-Lloyd steamer *Kronprinz Wilhelm*, which has just made a record passage across the Atlantic, left Cherbourg at 9 p.m. on the night of Sept. 10th, and arrived at Sandy Hook on the morning of the 16th. The duration of her passage was 5 days 11 hours 57 min. The daily runs were 349, 574, 581, 573 and 396; average speed, 23.09 knots.

YOKOHAMA CHARITY ORGANIZATION.

The annual general meeting of subscribers to the Yokohama Charity Organization was held in the Chamber of Commerce Rooms, No. 14, Bund, on Wednesday afternoon. Mr. Jas. Dodds was in the chair and there were also present Messrs. J. Martin, C. V. Sale, R. D. Robison, J. C. Hartland, B. C. Howard, B. Gillett, and M. Surth.

The Chairman, in opening the proceedings, said he supposed they must take the paucity of attendance as indicating confidence in the Committee's administration of the funds to which subscribers so liberally responded when called upon. The report of the Committee and the accounts had already been published and he presumed they would not care to have the whole read over to them. *Apropos* of these matters he did not think he could do any better than read part of an address made by him some years ago with reference to the aims and scope of the Association. That was in August, 1895, and the extract was as follows:—

In the report published in the newspapers, and now submitted to the meeting, the Committee give an account of their stewardship, which they hope may be satisfactory to the subscribers. In dispensing the funds of the Society, it will be seen that the Committee have give prominence to the idea which primarily led to the formation of the Society, the relief of distressed Seamen of the mercantile marine whose cases could not be fully met by the Seamen's Mission; but, as will be observed, there have been many other cases of distress relieved by the Society. In dealing with the cases brought before them, the Committee have exercised what discrimination has been in their power; but they do not pretend to say that every case has been a deserving one. People in distress find themselves here in some way, and have to be helped away from the place or remain as a burden to the community. The funds, however, have been dispensed as carefully as circumstances would admit, and the Committee hope that subscribers will be satisfied with the results achieved. Seeing the good work done, I have no doubt the appeal that the new Committee will have to make as their first duty, will be as readily responded to as in previous years.

On the motion of Mr. Robison seconded by Mr. Surth, the report and accounts were adopted. The former Committee, Messrs. Dodds, Hartland, Howard, Martin and Sale were re-elected with the addition of the names of Rev. W. P. G. Field, and Mr. Surth, proposed by Mr. Gillett and seconded by Mr. Robison.

In subsequent remarks the Chairman, Mr. Gillett, and other speakers bore testimony to the improvement effected in Yokohama by the operations of the Salvation Army.

A vote of thanks to the Chairman and former Committee concluded the proceedings.

REPORT AND FINANCIAL STATEMENT.

For the period between June 1st, 1901, to August 30th, 1902.

The Committee beg to lay before the subscribers the following Report and Statement of finance.

During the fourteen months the Society have been able with the co-operation and assistance of the Salvation Army to extend relief to 165 destitute persons:—

- 125 Seamen.
- 5 Firemen.
- 3 Sealers.
- 3 Discharged Prisoners.
- 2 Miners.
- 5 Ship's Stewards and Cooks.
- 22 Various and unknown.

The nationalities were as follows:—

America	36
Austria	1
Chili	2
Finland	10
Germany	13
Great Britain	81
Hungary	8
Corea	3
Sweden	8
Unknown	3

The relief given consisted of approximately,

- 250 Night's Lodging
- 750 Meals
- 2 Assisted passages to the Pacific Coast
- 14 Assisted passages to other ports in China and Japan.

In addition, contributions have been made towards the maintenance of several old residents, and funeral

expenses have been defrayed in the case of one who died in the General Hospital.

Further, there have been several applications which upon investigation by the committee have been referred by them to other local benevolent funds available for their relief, such as the St. Andrew's Society, the Ladies Benevolent Society, the Société Française de Secours and the Unterstützungs Börse.

The Committee further desire to thank residents and visitors for many gifts of clothing in the distribution of which they have been very greatly assisted by Major Ellis. They have also to express their obligation to the proprietors of the local journals, *The Japan Herald*, *Japan Gazette*, *Japan Mail* and *Japan Advertiser*, for inserting without charge our advertisement calling attention to the needs of the society.

The Committee desire to reiterate their sense of the debt which they owe to Major Ellis and to Mrs. Ellis of the Salvation Army for their valuable coöperation and assistance, without which it would be impossible to make such effective use of the funds at their disposal.

The Committee in presenting this Report and Statement now beg to tender their resignation and to thank the community for the response as shown in the attached Subscription List.

SMART COALING IN JAPAN.

According to advices from Nagasaki, says the *Liverpool Journal of Commerce*, the Canadian Pacific Railroad Company's steamship *Empress of China* was, on her last trip, delayed in her departure from Vancouver, this necessitating the ship making up for lost time *en route*. The coaling agents at Nagasaki were therefore requested to make a special effort in the coaling in order to secure the quickest possible despatch. In response to this appeal some 1,210 tons of coal was taken into the bunkers in the space of 3 hours 15 minutes, or at the rate of about 372 tons per hour. As might be expected, this constitutes a record for the port of Nagasaki, and it is doubtful if any port can show a better. Every pound of the coal was passed by hand out of the lighters into the ship, no gear whatever besides small baskets being used, the work being done by coolies—men, women, and children. It is, of course, only by comparison that a fair idea of the importance of this performance can be obtained. Liverpool, since the provision of the splendid coaling appliances at the Heracleum Dock, has won laurels for the smartness of the coaling done by those costly tips, and we recorded some time since the phenomenal loading into bunkers of 1,035 tons of coal in 4 hours 55 minutes, or at the rate of 208 tons an hour. Port Said is noted for the despatch given in bunkering, and to those acquainted with the process, and who have witnessed a "hurry-up" job in that coaling station, will hardly credit the fact that the sturdy Arabs can be beaten in pouring coal into a ship. Yet in Port Said, amid a din as of ten thousand howling Dervishes, the coaling of ships is done at the average rate of, say, 120 tons an hour, whilst on occasion as much as perhaps a thousand tons could be bunkered in very little short of five hours—*i.e.*, at the rate of 200 tons an hour. When it is taken into consideration that the Arabs at Port Said are an exceedingly powerful body of men, and that they run the coal aboard in bags on their shoulders or back, and that in Liverpool the coaling is done by very costly hydraulic tips lifting the wagons with their load of ten tons and tipping them into or near the bunkers, and also remembering that the bags the Arabs carry run twenty-four to the ton against the Japanese little baskets of a few pounds each—the extraordinary performance of the Nagasaki coolies is all the more palpable, and reflects the greatest credit upon their system, organisation, and exertion.

REAR-ADMIRAL SELFRIDGE.

Rear-Admiral Thomas O. Selfridge, whose death is announced, was born in Massachusetts, on Jan. 1st, 1818. He was commissioned in the U.S. Navy as Lieutenant on March 3rd 1827; appointed to Exploring Expedition 1829; sloop *Natchez*, West India Squadron 1830; frigate *Delaware*, Mediterranean Squadron 1834; frigate *North Carolina* 1837; rendezvous Boston 1840. Commissioned as Commander April 11, 1844; Navy Yard Portsmouth, New Hampshire, 1845; frigate *Columbus*, East India Squadron, 1846; commanding sloop *Dale*, Pacific Squadron 1848; commanding rendezvous Boston 1851-2; Boston Navy Yard 1854-5. Commissioned as Captain Sept. 14, 1855; commanding steamer *Mississippi* 1861; commandant Mare Island Navy Yard, California, 1862-4. Commissioned as Commodore, July 16, 1862; commandant Navy Yard Philadelphia 1867-8; President Examining Board, 1869. Commissioned as Rear-Admiral, July, 1870.

LAW CASES.

INCENDIARISM.

Kimura Katsuzo, of No. 22, Nichome, Chitosecho, Yokohama, was sentenced to 12 years' imprisonment with hard labour by the Chiho Saibansho on Oct. 17 on a charge of incendiarism. The man set fire to the house of a neighbour on the night of June 5th this year for the purpose of obtaining insurance money but was subsequently detected.

CHINESE SENTENCED.

A Chinese, formerly an employe of Messrs. Butterfield and Swire, Yokohama, was sentenced to two years' major imprisonment and six months' police surveillance on Oct. 18th by the Saibansho on a charge of theft. He stole a quantity of sugar from the go-down of the firm in April this year.

MOGI v. ALLEN.

In the Yokohama Ku Saibansho on Monday morning, before Judge Tanuma, was heard an action brought by Mr. Y. Mogi, of the well known Mogi Shoten in Nichome, Benten-dori, Yokohama, against Mr. C. R. Allen, No. 31, in the former Settlement, claiming yen 75.90 with six per cent. interest from July this year until the execution of judgment, costs of the case to be borne by the defendant. Mr. Takahashi said that during the period from Nov. 1st to Dec. 6th, 1901, transactions in silk piece goods were made between the parties to the amount of yen 75.90. Of these, there were half a dozen *habutaye* handkerchiefs which the defendant agreed to purchase for yen 14.85 at the rate of 1 yen 35 sen per yard, Nov. 9th being the date of the transaction. The above articles were subsequently taken to the defendant's office, but the latter refused to receive the same on the ground that the plaintiff failed to act as the defendant had desired. In consequence the plaintiff carried the matter before the Court asking that the defendant be ordered to take delivery of the above articles, together with certain other goods. The defendant admitted through Mr. Matsuda, Court interpreter, that the transactions were certainly effected between the parties, but as to half a dozen *habutaye* handkerchiefs he would not take them. The fact was that when the transaction in the above handkerchiefs was effected at the plaintiff's store the defendant asked the plaintiff's employe to dye the articles a light blue colour; but the articles were rendered a dark-blue colour. It was for this reason that the defendant refused to accept them.

Mr. Takahashi urged that as the transactions were already concluded the defendant ought to take delivery of all the articles, the matter of dyeing having been arranged afterwards.

The defendant then asked the Court for permission to call as witnesses four persons, including three employees of the defendant's office and a person in the employment of the Nozawayaya store, who acted as interpreter in the transactions.

Mr. Takahashi said that no person in the Nozawayaya store could speak English and objected to the summoning of the above witnesses.

The defendant thereupon said that he would like to know how the transactions were made between the plaintiff and defendant, for the latter could not speak the Japanese language. In other words, the transactions were arranged through the medium of English. Owing to the application of the defendant, who promised to ascertain the name of interpreter above referred to, the proceedings were postponed *sine die*.

BECKER v. KAMIURA AND ENDO.

In the Yokohama Ku Saibansho on Monday morning, before Judge Hasegawa, an action was brought by Mr. Becker, No. 84, against Mr. Kamiura Yasutaro and Miss Endo Fuji, both residing at No. 160, in the former Settlement, Yokohama, claiming yen 15.925. Mr. Inouye appeared for the plaintiff but neither the defendants nor their Counsel were present.

Mr. Inouye said that a contract was made this year between the parties, whereby the defendants agreed to pay to the plaintiff yen 10 per month for a period of 30 months commencing in April this year. But the defendants did not pay him fully for the months of April and May, the plaintiff having received only five yen for the two months. Accordingly the plaintiff claimed the 15 yen and 925 sen, the fraction being the sum spent by the plaintiff in connection with the case.

Judgment by default was given in favour of the plaintiff.

COLLISION CASE.

In the Yokohama Ku Saibansho on Monday afternoon, before Judge Hasegawa, was brought up for trial Aoki Tatsugoro, conductor of a car on the Enoshima Electric Railway, who was charged with having caused the collision on the line on Sept. 1st this year. The accused having admitted all the evidence produced by the Judge and witnesses the Court gave judgment at once, ordering him to pay a fine of 30 yen.

As our readers know, on Sept. 1st when the Enoshima Electric Railway was opened to traffic there occurred a collision on the line shortly after noon. It seems a car from Katase (Enoshima), which was in charge of Aoki, stopped at a place called Kugenuma, awaiting the arrival of another car from Fujisawa. No car from the opposite direction being seen and Aoki, becoming impatient, he ordered his car to start. As a result, the collision took place, injuring three persons, all employees of the Company, who were summoned as witnesses on Monday afternoon.

TEGNER v. ALLISON.

Judgment was delivered in the Yokohama Chiho Saibansho, by Judge Kano, in the case of Mr. F. M. Tegner, legal representative of Vivanti Brothers, No. 168, against Mr. J. H. Allison, No. 28, Yokohama, claiming yen 105 as house rent for three months. The defendant was ordered to pay to the plaintiff the sum claimed. The hearing of this case took place on Oct. 15th.

HAYANO v. DEARING.

In the Yokohama Chiho Saibansho on Tuesday afternoon, before Judge Kato, the hearing was resumed of the suit, adjourned from Oct. 2nd, brought by Mr. Hayano Yonejiro, No. 75, Bluff, against Mr. J. L. Dearing No. 75-a, Bluff, Yokohama, claiming yen 474.70 damages. Neither plaintiff nor his Counsel were present, but the defendant was represented by Mr. Sato. Owing to the non-appearance of the plaintiff, judgment by default was given in favour of the defendant.

Particulars of the case appeared in the *Japan Mail* of Oct. 3rd.

FISHER v. WESTON.

In the Yokohama Chiho Saibansho on Tuesday afternoon, before Judge Kato, was heard an action brought by Mr. A. E. Fisher, No. 88,

against Mr. A. Weston, No. 41, Yokohama, claiming yen 1,457 alleged to be the proceeds of the sale of a piano and ten other articles sold by defendant for plaintiff, and interest at five per cent. from Jan. 1st, 1900, until the execution of judgment. Mr. Fujiwara appeared for the plaintiff and Mr. Sato for the defendant. Mr. Fujiwara stated that on Dec. 27th, 1898, an arrangement was made between the parties to the effect that the defendant should sell the articles for yen 1,457 at Nevany (?), Ontario, Canada, on behalf of the plaintiff, who accordingly forwarded the articles thither, through the medium of Mr. H. M. Dettler, from Hongkong via Yokohama. The contract provided that the articles should be sold by Christmas the same year. Christmas came and passed, but no reply was forthcoming from the defendant as to the business entrusted to him. In consequence the plaintiff was obliged to have recourse to legal proceedings against the defendant.

Mr. Sato denied all the statements made by the plaintiff's Counsel and said that his client was asked by Mr. H. M. Dettler and not by the plaintiff to dispose of the articles at the highest price as far as possible, the name of Mr. Dettler being entered on the bill of lading. Mr. Fujima asked the Court for permission to appoint an expert in order to estimate the value of the articles, but this application was not granted.

The Court announced that judgment would be given on Oct. 23rd. We may state, with regard to the above case, that judgment by default was given on June 2nd by the Court against Mr. A. E. Fischer owing to non-appearance of the latter on the occasion.

Judgment was delivered in the Yokohama Chiho Saibansho on Thursday afternoon, by Judge Kato, in the case of Mr. A. E. Fischer, No. 88, against Mr. A. Weston, No. 41, Yokohama, claiming yen 1,457 alleged to be the proceeds of the sale of a piano and ten other articles sold by defendant for plaintiff. The plaintiff's case was dismissed with costs.

CONTRAVENING QUARANTINE REGULATIONS.

Judgement was given in the Yokohama Ku Saibansho, by Judge Hasegawa, on Oct. 20th in the case of Mr. C. B. Clausen, No. 66, Yamashita-cho, Yokohama, charged with having violated the Infectious Diseases Prevention Regulations. The accused was sentenced to a fine of ten yen. The facts are that on July 27th this year when the sailing-vessel *Golden Hind*, belonging to a British subject named Mr. A. Owston, entered Enoura gulf in Shizuoka Prefecture a case of dysentery was found on board the vessel. Thereupon the Authorities at once issued instructions to her Captain and others, including the accused who was then aboard, ordering them to undergo five days' quarantine. On the 29th of the same month, however, the accused left the vessel and returned to Yokohama, thereby violating the regulations.

JOVANSEN v. HOPKINS.

The next hearing of the above case, which was expected to take place in the criminal section of the Yokohama Chiho Saibansho on Oct. 23rd, has been postponed until the 30th at 9 a.m., when several witnesses will be examined.

MIZUTANI v. SINGER MANUFACTURING COMPANY.

In the Yokohama Chiho Saibansho on Thursday afternoon, before Judge Kato, was resumed the hearing of the suit, adjourned from Oct. 7th, brought by Mr. Mizutani, of Yoshidamachi, Yokohama, against the Singer Manufacturing Company, No. 80, Yokohama, claiming recovery of bargain money amounting to yen 1,000. Mr. Ideura appeared for plaintiff and Mr. Akiyama for defendant.

As arranged at the previous sitting, Mr. Sugimoto Shoshichi was examined as a witness. In reply to the Judge's question, the witness said he remembered that a contract was made between the parties on Nov. 29th, 1901, in which the plaintiff agreed to purchase twenty sewing machines for yen 3,000. The articles arrived

the buyer, clear information as to these matters will doubtless be forthcoming in due time.

Dalny is a child of imperialism. Its erection was commanded by the T^SAR on July 30th, 1899, and the work of construction was entrusted to the Chinese Eastern Railway Company, which, we need scarcely say, is a Russian concern, its name being simply an example of the tact that inspires Russia's general attitude towards Asiatics. It can not be said that as yet the city exists. Indeed the plan reminds us somewhat of Mr. SCADDER'S map of Eden, for although there are many fine looking streets radiating from central esplanades; although there is a "commercial quarter" coloured yellow, a "civil quarter" coloured light pink, and a "high town" coloured green; although there are avenues, gardens, markets, and recreation grounds; these things are still *in posse*, not having yet materialized. The "administrative quarter," however, seems to be pretty fully built over, and so too are the workmen's quarter, and the district allotted for railway workshops and coal depots. Broadly speaking the city is divided by the railway into two unequal parts, that on the north of the line containing the official quarter, and that on the south the commercial quarter, the civil quarter and so forth. The whole is administered by a municipal bureau having the Governor for president and consisting of 7 members, one of whom is designated by the Railway Company, and the other six are elective, three of them being necessarily Russian subjects. There are certain adjustments of rights and privileges as between the Railway Company and the Municipality—very fair adjustments so far as we can judge, and not at all calculated to invest the Company with any dangerous power of interference in matters of private property. The same spirit of equity is observable in a rule entitling foreigners to buy and lease land-plots on the same terms as those accorded to Russian subjects. This rule is drafted in avowed conformity with the principle of international intercourse as guaranteed by treaty. Buyers of titles of ownership or lease are required to erect certain buildings and effect certain improvements within a term of three years, the object of this condition being to prevent purely speculative transactions in land, and to limit its acquisition to *bonâ fide* residents. As to the proceeds of the sales they do not go to the Russian authorities, with the exception of such amount as may be required to cover expenses: they go to the original proprietors, presumably Chinese subjects.

The upshot of the matter is that there will be a foreign settlement at Dalny just as there is at many places in China; a mixed settlement for all nationalities, not an area divided into several special settlements each limited to one nationality. There will, however, be this marked difference between Dalny and other foreign settlements in China, namely, that while the Chinese

Government retains the right of eminent domain in the case of the latter, the Russian Government exercises the right in the case of the former. So at least we gather from the apparent fact that the sales of titles of ownership or leases are to be made by the Russian Authorities, and that the deeds of assignment or documents of tenure will be drafted in the name of Russia.

THE CHINESE COMPLICATION.

NOTHING could be more unfortunate in its effects upon China's relations with the outer world than an incident such as that which now threatens to create serious trouble between her and Great Britain. From the Chinese point of view it must always seem exceedingly harsh and even unjust that local officials should be held responsible for outrages committed by an anti-foreign mob, unless clear proof be forthcoming that the incriminated officials were guilty of deliberate neglect to perform their duty of protection. The hardship of the matter lies chiefly in the fact that in no other part of the world is vicarious responsibility practically recognised under similar circumstances. If a mob in some Occidental land assassinates one or more foreigners and wrecks their property, the obligation devolving upon the authorities is held to be fully discharged if they succeed in bringing the ringleaders to justice. Even if they do not so succeed, the matter is regarded merely as one of internal police, and no one thinks of questioning the principle that in the Government alone is vested competence to decide what, if any, punishment shall be extended to the local officials for their failure whether in the premises or in the consequences of the riot. Then there is the further consideration that ever since social organization assumed a scientific character, the impossibility of preventing mob violence has been universally recognised. To foresee and forestal the causes that create a popular vertigo is as far beyond any ordinary exercise of human capacity as it is to restrain the immediate effects of those causes. In China, however, these canons of administration have ceased to be recognised by the Occident. The Powers of Europe require that, under circumstances of an altogether exceptional and specially riot-provoking nature, Chinese officials shall exercise a degree of control which has never been found within the competence of European officials. The Chinese are sensible of that discrepancy, and it can not but aggravate their sense of the treatment meted out to them in matters of foreign relations generally. On the other hand, it has become plain beyond all possibility of misconception—that the sole and only hope of obtaining security for foreign life and property in the interior of China lies in holding Chinese officials responsible to a degree not admitted in analogous cases abroad. The Chinese official must be compelled not only to organise means of lending succour at the briefest notice in any emer-

gency, but also to collect, with regard to all the probable moods of the people, information so accurate as to suggest effectually preventive measures. It is a very "large order," but nothing smaller will suffice. Foreign nations have forced themselves upon China, and have conducted their intercourse with her from the outset in a manner calculated to rouse the elementary passions of her populace. Most unhappily there is now no retreat. Ambitions have been excited and interests created which preclude all possibility of replacing China's foreign relations on a normal footing, or of withdrawing from positions which can not be maintained without continued recourse to the very methods that make for disturbance. Of course China will not go to war with England to save the button of any *Chi-hsien* or other comparatively minor official. The chain of responsibility in Hunan will be stretched to its last link. But the immediate outcome will be the creation of so many new centres of anti-foreign propagandism, and just as LI PING-HENG, after his degradation in Shantung at Germany's instance, became the most prominent and efficient leader of the Boxers, so the disgraced officials of Hunan will be added to the list of irreconcilable agitators. Foreign relations with China travel in an essentially vicious circle. The effort of preserving them engenders evils which constantly multiply the difficulty of their preservation.

THE PLAGUE.

Another genuine case of pest is reported from the isolated area. Toranosuke, the six year old son of a coolie living at No. 20, Gochome, Kaigan-dori, Yokohama, was found on Oct. 15th to be suffering from the malady. The patient was at once conveyed to the Manji Hospital. The proposed removal of the people and their furniture from the isolated area to Kanagawa fort commenced on the 15th, via Nagahama Quarantine Station, where they were thoroughly disinfected before being taken to the fort. About 600 persons still remain in Kaigan-dori and these will be transferred in a day or two. As may be imagined, the majority of the unfortunate people are being supported by means of official funds, 21 *sen* being allowed to adults and 15 *sen* to children per day. Contributions either in cash or articles are beginning to be sent in from various quarters in aid of the poor people, Mr. K. Otani and other leading citizens being among the contributors. From the 9th up to Oct. 16th, 11,498 rats were purchased by the City and Police authorities of this port.

The pest patient, Toranosuke, the six-year-old son of a coolie in the isolated area, who was found to be suffering from the malady on Oct. 15th, is now lying in the Manji hospital in a grave condition. No further cases had been reported up to the 19th, however. On the morning of Oct. 18th, Mr. Ishida, in charge of the sanitary section of the Kanagawa Police Headquarters, Yokohama, we regret to write, was attacked by dysentery and at once taken to the Manji Hospital for treatment. At a meeting of the Yokohama Aldermen's Council held on the 17th it was decided to burn down nearly all the houses in the pest affected area, for which purpose a sum of *yen* 53,289 was subsequently voted for disbursement in order to purchase the houses and other property therein. When the houses will be reduced to ashes still remains undecided, pending the negotiations between the Authorities and

owners of the property as to the buying prices. The buildings of the Toyo Kisen Kaisha, of the Horai-ya hotel and a few other large premises where no cases have occurred up to the present will not probably be burned down, although they are within the isolation inclosure. About 1,000 persons in Kaigan-dori have already been transferred to Kanagawa Fort and the remainder, over 200, were expected to be removed there during the course of the 19th. So far as we can learn, over 400, mostly coolies, out of the above number are being supported by means of official funds. As to the people conveyed to the fort they are much satisfied with the provision made by the authorities.

Apropos of the above, the Yokohama Customs decided on the 18th that the landing of raw cotton should henceforth be effected at Ryoshi-machi, near Kanagawa fort, where the goods will be stored for the time being.

DEATH OF MR. J. MENDELSON.

We announce with deep regret the death of Mr. J. Mendelson, an old and very highly respected member of the foreign community of Yokohama. Though not quite in the best of health, Mr. Mendelson was in his usual spirits when he started on Sunday morning to take part in a trip to Kamakura. At the railway station, however, he felt sufficiently indisposed to decide upon returning home instead of accompanying the rest of the party. During the day he was seen by Dr. Wheeler but at no time did his condition give rise to anxiety. When the family returned in the evening he had retired, but at his desire dinner was proceeded with. At its conclusion a visit was paid to him and this disclosed the fact that he had passed peacefully away.

Mr. J. Mendelson was fifty-eight years old at his death; consequently he must have been a mere youth when he arrived here in the *Great Republic* on Oct. 29th, 1868. Soon after he came to Japan he, in conjunction with his elder brother, who was established in San Francisco, opened the business which, now as then under the name of Mendelson Bros., commands at the present day so large a share of business. A few years ago his brother died, and the latter's family came to Japan, since when the firm has been carried on by Mr. Mendelson with the aid of his son and nephew.

The deceased gentleman rarely concerned himself in public affairs. He was a Freemason, having been initiated in the Star in the East Lodge in 1883, and he always took a warm interest in the craft. One of the most kind-hearted and charitable of men, he performed his acts of benevolence so unostentatiously that only his most intimate friends could presume to estimate the extent of his givings. In business he was essentially a "straight" man; and without venturing to intrude upon his private relations it may, we hope, be said without offence that he was a devoted husband and father and that none who ever came in contact with him socially failed to respect and esteem him. Mr. Mendelson is survived by a widow, a grown-up son and three daughters. The marriage of his eldest daughter had been fixed for Wednesday, Oct. 22nd, a circumstance which will doubtless in the minds of the community accentuate the distressing suddenness of the event, and intensify the sympathy which they will extend to the bereaved family.

The obsequies of the late Mr. J. Mendelson took place on Tuesday forenoon, the ceremonies by request of the deceased partaking of a Masonic character. At ten o'clock a Lodge of Sorrow was opened by the Star in the East Lodge, No. 640 S.C., at which Wor. Bro. W. S. Stone was Master, and Messrs. Thwaites and McMillan Junior and Senior Wardens respectively. The usual ritual was performed. Thereafter the brethren proceeded to the residence of their deceased friend, where many other mourners were awaiting.

Over the bier Mr. W. S. Stone, Worshipful Master of Star in the East Lodge, pronounced the usual formula, after which Wor. Bro. Griffin, P.M., Secretary of Star in the East Lodge, read the Oration, and added to it a few words of his own expressing the personal feelings which the

brethren felt with reference to their loss. Thereafter the assemblage dispersed. It may be added that numerous wreaths and other floral tributes surrounded the bier, which was, indeed, almost covered by these tokens of friendship and sympathy.

YOKOHAMA AMATEUR ROWING CLUB.

AUTUMN REGATTA.

The weather, which had been rainy and generally unsettled up to Friday afternoon, cleared up finely so that the Autumn Regatta of the Yokohama Amateur Rowing Club was held on Saturday afternoon in beautiful weather, with fairly smooth water. The events were witnessed by the usual crowd in the grounds of the Boat House, while the verandah was well filled with ladies, and much interest was taken in the rowing.

The Boat House was tastefully decorated with flags and pot plants, and the tea-table was presided over by Mrs. Litchfield, wife of the President of the Club.

Music was supplied by the Town Band during the afternoon, the programme of racing, however, being carried through with such commendable promptitude that the last event was rowed while the afternoon was yet young.

The prizes were afterwards presented by Mrs. H. E. Hayward, with a graceful word or two to each recipient.

As to the racing, though interesting in a sense, it did not furnish any close contests, the nearest to that description being perhaps the Senior Double Sculls, though even there it may be questioned whether Irwine and Moss were really hard pushed by their opponents. The programme opened with the Junior Double Sculls, as to the result of which opinion was somewhat divided. Caro and Serkis had walked away from another crew in the first heat, and as Steinmann had a doubtful arm the chances seemed open. But weather and water favoured the heavy men and they won easily. In the Open Fours, as later in the Senior Fours, Hayward's fine stroke was specially noticeable. He has rarely rowed in better form. In the former event he rowed a long steady stroke which gradually wore down the spasmodic action of the other crew, and won easily. The Junior Fours was a bit of an upset, Thompson's crew being quite the favourite. E. J. Moss, who had drawn the outside berth, started well and his men backing him up manfully he soon got away from his opponents and won easily amid deserved cheers. In the Senior Fours Hayward, again rowing in fine style, brought his men in ahead. In the Junior Pairs Abbey and Gorman did their best but weight would be served, so Nicoll and Steinmann came in easily first. The Senior Double Sculls was, as we have said, the closest finish and it closed the programme—excepting the Scratch Fours for which five crews went out, Jackson landing his boat first on the winning line.

Committee:—Mr. H. C. Litchfield, President, Mr. F. J. Hall, Captain, Messrs. E. Wheeler, M. Schellenberg, W. Goddard, H. A. Poole, C. Thwaites, F. Lammert, O. Strome, Hon. Treas., H. E. Hayward, Hon. Sec.

The events were as follow:—

JUNIOR DOUBLE SCULLS.— $\frac{3}{4}$ Mile.

"PEARL."		lbs.
Bow.	L. Thompson	136
Str.	H. Steinmann	170

"TERN."		
Bow.	A. E. Caro	114
Str.	L. Serkis	130

The two crews got away level and rowed so up the course, for a considerable distance, both steering remarkably well. Shortly before reaching the P. M. Wharf, however, Steinmann drew ahead, and gradually increasing his lead, won by about six lengths. Time, 6.36.

OPEN FOURS.—1 Mile.

"DARTER."		lbs.
Bow.	H. Y. Irwine	147
3.	H. A. Poole	168
2.	F. Pollard	165
Str.	H. E. Hayward	143
Cox.	J. Abbey	112

"PELICAN."		lbs.
Bow.	C. H. Moss	140
2.	C. A. S. Palmer	172
3.	B. J. Jackson	187
Str.	M. Schellenberg	172
Cox.	W. Goddard	130

This was another good start, both crews getting off together and going level till they approached the P. M. Wharf. Here Hayward, who had the inside berth and was rowing 28 to Schellenberg's 32, drew in front and at the Wharf he was quite two lengths ahead. This lead was gradually increased and the race was won by about five lengths. Time, 9.02.

JUNIOR FOURS.— $\frac{3}{4}$ Mile.

"SWAN."		lbs.
Bow.	P. Schwabacher	128
2.	G. Kenderdine	128
3.	P. E. Nicolle	148
Str.	E. J. Moss, Jr.	134
Cox.	D. MacLaren	135

"FLAMINGO."		
Bow.	A. E. Caro	114
2.	J. Kuhn	140
3.	O. T. Gillon	143
Str.	L. Thompson	136
Cox.	C. H. Abbey	111

"DARTER."		
Bow.	P. S. Moss	132
2.	J. F. Marques	134
3.	H. Steinmann	170
Str.	E. Powys, Jr.	144
Cox.	J. Abbey	112

"SEA-MEW."		
Bow.	A. V. C. Maher	125
2.	H. Hearne	143
3.	J. H. C. Goodban	145
Str.	H. Gorman	130
Cox.	W. Goddard	130

The Junior Fours brought out four crews of which, perhaps, it may be said that Thompson's was the favourite. They went off to a very level start and raced on even terms for some distance. Moss, who had the outside place, then drew away and soon got a lead of about three lengths from Thompson, the latter having a similar lead from the other two crews. At the P.M. Wharf Moss was six lengths in front of Thompson, the latter about the same distance ahead of Powys and Gorman. Inside the breakwater the race was pretty much of a procession, Moss crossing the line when the last boat was opposite the Grand Hotel. Thompson was a bad second and the remaining two boats came in almost together a long way astern of the second boat. Time, 6.10.

SENIOR FOURS.—1 Mile.

"DARTER."		lbs.
Bow.	C. H. Moss	140
2.	H. Temme	173
3.	O. Strome	191
Str.	H. E. Hayward	143
Cox.	J. Abbey	112

"PELICAN."		
Bow.	F. Pollard	165
2.	H. A. Poole	168
3.	B. J. Jackson	187
Str.	M. Schellenberg	172
Cox.	W. Goddard	130

The boats started together but Hayward, who was inside, at once drew ahead and at the three-quarter mark was about a length to the good, rowing 27 to Schellenberg's 32. At the P. M. Wharf he was still farther in front, and though Schellenberg spurted strongly inside the Breakwater Hayward won by about three lengths. Time, 9.11.

JUNIOR PAIRS.— $\frac{3}{4}$ Mile.

"MALLARD."		lbs.
Bow.	P. E. Nicolle	135
Str.	H. Steinmann	170
Cox.	W. Goddard	130

"WIDGEON."		
Bow.	C. H. Abbey	111
Str.	H. Gorman	130
Cox.	J. Abbey	112

Gorman (inside) took a slight lead after the start, but weight soon had its effect and at the P. M. Wharf Steinmann was about two lengths ahead, and, going fast all the time, won easily by about eight lengths. Time, 7.40.

SENIOR DOUBLE SCULLS.—1 MILE.

BOAT NO. 2.		lbs.
Bow.	E. J. Moss	134
Str.	H. Y. Irwine	147

at Yokohama about the beginning of March this year and a trial of the machines was made in the go-down of the Singer Manufacturing Company about a week later in the presence of the plaintiff, a Japanese employe of the Company, and the witness. The trial working was practically undertaken by the witness himself who drove the machines by foot, but it showed a very poor record, the machines being unable to develop a speed of more than 200 or 300 stitches per minute. Such being the case, a foreigner in the employment of the defendant's office, whose business was to repair machines, was at once called in to undertake the trial running. He tried, but the result was similarly bad as before. The witness finally stated that never before had he handled a sewing machine that could develop a speed of 1,200 stitches per minute. Mr. Ideura presented to the Court a few exhibits, saying that these would prove the result of the trial working of the machines and other important points in connection with the case.

Mr. Akiyama asked the witness whether or not Mr. Dean, formerly manager of the Manufacturing Company, was present on the occasion of the trial working. To this, the witness replied that Mr. Dean was not present on the occasion. Mr. Akiyama again asked the witness in what capacity he was present on the occasion. The witness said that he was asked by the plaintiff to accompany him to the Singer Manufacturing Company's and to undertake the trial business.

Mr. Akiyama, after some argument, said that the trial working did not actually take place in the defendant's go-down and produced to the Court an exhibit, stating that it would show how straightforwardly his client behaved in the transaction in dispute. The case was adjourned until Nov. 4th.

An application has been made to the Isezaki-cho Police by the manager of the Singer Manufacturing Company, No. 80, in the former Settlement, Yokohama, asking the authorities to search for a sewing machine on behalf of the company. It appears that on Oct. 4th this year a Japanese named Kaiwai Dentaro, inmate of the house of Mrs. Nakano Tome, No. 56, Nichome, Haboromochi, Yokohama, took to Mrs. Nakano's house a sewing machine worth 54 yen from the office of the Singer Manufacturing Company on condition that if the trial of the machine proved quite satisfactory he would purchase it for yen 54. Week after week passed but no information whatever was forthcoming from Kaiwai. On Oct. 20th a representative of the company was therefore dispatched to make inquiries into the matter but no machine was to be found in the house. Apparently the article had been pledged.

Mr. F. Herb, who was lately sentenced to six months' major imprisonment by the Yokohama Chiho Saibansho on a charge of fraudulent bankruptcy, is reported to be missing since Sept. 28th when he went to Nikko without notifying the fact to the proper authorities. Not satisfied with the decision of the lower tribunal he had appealed, and was out on bail of yen 1,000. He is supposed to have left Japan.

NEWS OF THE WEEK.

The divorce decree obtained on March 21, by Lord Francis Hope against May Yohe, was made absolute on Oct. 1st.

Two capital performances of The Forty-seven Ronin (*Chiu-shin-gura*), perhaps the best known to foreigners of all the Japanese dramas, took place on Friday and Saturday at the Public Hall. Three acts were given on Friday and the other three on Saturday, good audiences, chiefly composed of foreigners, being present to see what proved to be really good acting. The dresses were splendid and visitors to Japan appreciated the advantages of such a representation in a foreign building. The absence of those appliances which are to be found in a Japanese theatre, however, gave rise to some incidents which to the strangers must have seemed exceedingly curious. Yet on the whole the two performances were greatly enjoyed, and we do not doubt that if given again

at a reasonable interval a repetition would be welcomed.

The Yokohama Railway Station was the scene of great confusion on Wednesday afternoon owing to the upsetting of a goods train on the Kawasaki-Omori section between Yokohama and Tokyo, thus interrupting the traffic during the afternoon. From inquiries made at the Yokohama Station, we learn that the goods train which left Yamakita at 6 a.m. for Shimbashi, was about to pass off the Kawasaki Bridge shortly before noon, when the end of the train, about seven or eight carriages in number, became derailed and tumbled over the down line, with the result that the goods were either damaged or dropped into the stream below. There was fortunately no casualty to life or limb. By prompt management of the Railway Authorities connection was at once effected between Kawasaki and Omori by means of an electric car of the Keihin Electric Car Company.

With regard to the railway accident on the Aomori-Kawasaki line on Oct. 22nd it is stated that traffic was completely re-opened on the evening of that day, trains from either side being able to pass the down line which was uninjured. The repairs on the up line and the northern portion of the Kawasaki bridge will be finished in a week or so. The cause of the accident seems to be that the work of replacing sleepers is now going on at the bridge and this caused the carriages to be derailed.

EUROPEAN NOTES.

Advices from Brussels state that King Leopold has charged the Belgian Minister at Peking, M. Joostens, who left on Sept. 13th, on his return to his post, with an important mission connected with Chinese railway questions. M. Joostens will hand to the Dowager-Empress a letter from King and some presents of great value.

Lord Charles Beresford has now been brought to the head of the Rear-Admirals' list by the retirement of Vice-Admiral Rodney Lloyd. One of the first results of this will, of course, be the extension of Lord Charles's retirement age. It is 43 years since he joined the *Britannia*, at the age of 13. (Lord Charles Beresford's promotion to Vice-Admiral has since been reported).

Professor Delepine, speaking at the Sanitary Congress in England, said the discovery of large quantities of arsenic in coke and coal led him to suspect that the dust in houses heated by these kinds of fuel was charged with arsenic. In large towns the inhabitants must in foggy weather inhale a certain quantity of arsenic, small doses of which were, however, compatible with the existence of a strong race of people.

On the arrival of the Marquis of Montebello (formerly French Minister in St. Petersburg) in Paris, he was besieged by journalists, but only one had the good fortune to be granted an interview. The Ambassador stated that he was recalled because the French Government wanted to have a post at their disposal. "A vacancy was needed," he said, "young men are impatient, and good service now hardly goes for anything."

By the necessary majority the creditors of Lord Francis Hope, who met at the London Bankruptcy Court on Sept. 15, accepted a proposal for the payment of a composition of 10s. in the pound. It was stated that the mother of Lord Francis had power to appoint £200,000 among her children, and of this amount £50,000 remained unallotted. The ranking liabilities amount to £21,826, exclusive of a claim for £9,187 lodged by Lady Francis Hope (Miss May Yohé), which the debtor repudiates.

Rear-Admiral Sir Edward Chichester, Bart., C.B., C.M.G., will be surprised to find it suggested by the *Navy and Army Journal* of New York that he should collaborate with Admiral Dewey, U.S.N., and Admiral von Diederichs, lately chief of the German Naval General Staff, in writing the true history of the strenuous and momentous days

that followed the destruction of the Spanish fleet at Manila. Our contemporary's opinions is that, if the gallant officer would write an introduction to a joint volume by the other two, it would achieve "an immediate and vociferous success."

There was a wonderful "coming of age" celebration in London on the night of Sept. 19th said a London paper. Sixty guests sat down at the Trocadero Restaurant to a dinner that cost the giver of the feast close upon £1,000. Mr. E. A. Robinson, a younger son of the late Mr. Peter Robinson, of Oxford-street, was the bountiful host, and he was endeavouring to commemorate in a fit and worthy manner not only the fact that he was just 21 years of age, but the further and not less interesting fact that he was entitled to about £300,000, his share of the million sterling or more left by his father.

An eminent German scientist has discovered what he considers an infallible test for distinguishing between persons actually or only apparently dead. According to *Science Siftings* he uses a weak solution of fluorescin, a most powerful colouring matter, which, when sufficiently diluted, ceases to be poisonous. If this solution is injected under the skin of a living person in two minutes the skin, especially the mucous membrane, is strongly coloured, and the body has the appearance of suffering from an attack of acute jaundice. The eye looks as if it were a brilliant emerald set in the face. In two hours all the phenomena disappears. But, in the case of a dead man the solution produces no effect.

It is not generally known that the Queen-Mother of Spain is one of the most accomplished billiard players of her time. As a girl in her later teens, says the Madrid correspondent of the *Newcastle Chronicle*, she took to the game with enthusiasm, and studied it with methodical precision to such good purpose that, long before her marriage to the late King Alfonso, she was (as Archduchess Maria Christian) the champion of the Austrian Court, frequently challenging the Archdukes, of whom scarcely one could stand against her on equal terms. During the early anxiety of her widowed regency, billiards flagged a little, but as her son advanced in youth, interest in the game revived, and now, coached by his mother, the young King of Spain is probably a match for any amateur in Europe.

The result of first-class county cricket in England is that Yorkshire retains its position at the head of the list. The final record is as follows:—

	Pld.	Won.	Lost.	Dru.	Poinis.	Prentage.
Yorkshire	25	13	1	11	12	85.71
Sussex	24	7	3	14	4	40.00
Notts	20	6	3	11	3	33.33
Surrey	28	8	5	15	3	23.07
Lancashire	23	7	5	11	2	16.66
Warwickshire	18	6	5	7	1	9.09
Kent	22	8	8	6	—	—
Somersetshire	18	7	7	4	—	—
Worcestershire	22	5	6	11	—1	—9.09

It seems likely that there will be a third *Shamrock* after all. The rumours which have been floating to and fro across the Atlantic for the past few weeks have now crystallised into the circumstantial statement that a challenge from Sir Thomas Lipton has been handed to the secretary of the Royal Ulster Yacht Club for transmission to New York. Mr. Fife will design the boat, and Messrs. Denny will build her. *Shamrock III.* will be constructed of mild steel, made in Glasgow, and not of manganese bronze. She will be less costly than her predecessors. A Laffan's message from New York says that the New York Yacht Club has engaged Barr as captain of the new cup defender. The *New York Herald* says it learns that the syndicate which is to build the new boat does not include either Mr. Vanderbilt or Mr. Pierpont Morgan, who were on previous occasions conspicuous contributors.

Mr. Frank Holmes, on Sept. 12th, made his fourth attempt to swim the Channel, and again failed. When he entered the water at half-past six in the morning, off the Admiralty Pier, Dover, nothing could have looked more favourable to the enterprise. The sea was calm and the air still. But within two hours of the start the weather had become squally, with breaking seas and appearances indicating that worse was to come, and Mr. Holmes was advised to give up. The swimmer was then off the South Foreland, and going well. His preparations had been simple. He had been well oiled, but he wore no dress. For refreshment he took milk and fruit in the shape of pears and bananas. At the start he was making an average of 20 breast strokes to the minute. When the squall struck him he sought refuge under the lee of the lugger that accompanied him. But he found no advantage therefrom, and at times he was lost to view in the trough of the sea. Mr. Holmes will not renew his attempt this year.

The four "mighty" armoured cruisers of the *Drake* class have now completed their steam trials, and each ship has exceeded the stipulated speed of 23 knots. Two of them have at their hours' full-power trial averaged 23.05 knots, one has made 23.23, and one 23.46, and propeller trials are now to be carried out with the *Drake* to discover the possibility of raising the speed to approximately 24 knots. Not only do we now, says the *Naval and Military Record*, possess the fastest ships that can either lie in the line or scout and run, but we have four powerful ships that can steam continuously from Portsmouth to Melbourne, and which, in spite of a displacement of 14,000 tons, can go through the Suez Canal. Regrets are always too late, but it is certainly matter for reflection that when these ships were designed the 7.5 inch. gun had not reached its present stage of perfection, as the substitution of 12 of these weapons for the 16 6 in. guns carried by the class would have added enormously to the power of the type. A ship, armoured like a battleship, that can outrange the enemy's guns, and then by her speed get the weather gauge, can do as she likes in an action; but while the *Drakes* possess every other advantage they are in danger of being outclassed by the enemy's guns. Provided, however, they have highly-trained men behind the guns, their speed, armour, and coal endurance will give them an enormous advantage. They will, however, make heavy demands on the personnel of the Reserve, for each ship, requiring a crew of 900, will replace a cruiser with a crew of 400, and thus, without adding a pennant to the active service fleet, an additional 2,000 hands will be required. In the near future these four ships will be employed in the training service—two in the Channel Cruiser Squadron and two in the Mediterranean Squadron.

THE HEALTH OF THE JAPANESE NAVY.

A report as to the health of the Japanese Navy in 1899 has been presented to the Minister, Baron Yamamoto, by Baron Saneyoshi, F.R.C.S., Chief of the Bureau of Medical Affairs in the Navy Department. It is of course highly interesting to have these observations tabulated in an intelligible form and doubtless their collection and classification has occupied much time and labour. But we imagine most readers will feel that such a compilation ought not to engage the attention of a Government Bureau over something like two and a half years. We extract this paragraph, which shows that the weight of the Japanese man-of-war's man is steadily increasing:—

The average body-weight of 17,870 persons taken in March and 19,983 persons taken in September, of cadets, petty officers, and men was 15,582 *monme*, being an increase of 35 *monme*, as compared with the average body-weight 15,547 *monme*, of the preceding year and also being an increase of 406 *monme*, when compared with the average body-weight 15,176 *monme*, of the last fifteen years.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

In the *Nihonjin* appears a long history of the formation and development of political parties in Japan. The conclusion reached is that they have not been a success. The writer discourses at tedious length on the whole question. We shall content ourselves with reproducing a few of the salient points of the essay. Whatever may have happened elsewhere, it is certain that political parties in Japan did not originate with political principles nor even with policies, says the *Nihonjin*, but had their source in mere personal leanings and inclinations. The older men naturally wished to keep that to which they were accustomed and of which they had had experience. In order to bring themselves into notice, and having nothing to lose and a great deal to gain by adopting such a course, the younger men figured as the advocates of new ideas and radical changes of all sorts. The views adopted were largely the result of social position or of trade or other interests and would be more suitably called personal proclivities than political views. There was no reason whatever why the parties thus started should bear the name Seitō, political parties, as there were none of the distinctive marks of political parties about them. But having once been formed they commenced to look around for principles and policies, and having adopted these they began proclaiming them with a great flourish of trumpets. At the present time it is clearly recognised in political circles that a party without principles is not entitled to the name of a political party, and the terms 公黨, Kōtō, and 私黨, Shitō, have begun to be used; the former referring to a body that aims at promoting the interests of the public generally and the latter to a party that has the furthering of private interests as its chief object. Looking for the definite espousal of principles as a basis for the formation of a party, we find that at the time of the revolution there existed four parties which each rallied around a definite policy. These may be said to have formed the embryo of subsequently formed parties. (1) The 勤王黨, Kinnō-tō or Royalists were champions of the Imperial cause; (2) the 佐幕黨, Sabaku-tō fought for the Bakufu; (3) the 自由黨, Jōi-tō (the Barbarian-expelling party) rallied around a definite foreign policy; (4) the 開國黨, Kaikoku-tō had the opening of the country as their main object. The cabinets of the early years of the Meiji era were split up into sections according to the principles they adopted. Saigō was an advocate of military rule and of appealing to the sword when international difficulties arose, but Princes Sanjō and Iwakura were the champions of the civil cause and advocated reliance as far as possible on peaceful methods of settling disputes. Then the creation of a Diet, the time at which it should be opened and the powers with which it should be entrusted furnished rallying points for the politicians of that time. When Soejima, Gotō and Itagaki agitated in favour of the opening of a Diet it is said that they did it simply as a means of undermining the power of the Government, and that this was an interested motive, and so on. People who talk this way do not understand politics. The chief object of all politicians is of course to obtain power. It is true that for some time Itagaki was in doubt whether to throw in his lot with Saigō or not, and for a short time, in Tosa, he sat on the fence ready to descend on either side. It was only after it became plain that Saigō was not going to win that he determined to try and compass his ends by means of a political party. So it is seen that the Jiyūtō, one of Japan's greatest parties, did not originate with the enunciation of popular rights and the other principles and policies advocated in later days by this body, but in the personal feelings and aspirations of a man who was smarting under political defeat in the Cabinet of which he had been a member. At first his party was no other than a *Shitō* (private-party) founded to further his personal influence, but gradually it developed into a real champion of public interests. The history of Count Okuma's connection with the Kaishintō in many particulars was of the same

kind. The party was started as his organ and only later on equipped itself with a set of fixed principles. The Kaishintō followed in the wake of the English Liberals; the Jiyūtō made the French Radicals their model. It was after the dissolution of the Second Diet eleven years ago that both the great parties appealed to the country to support the fundamental principles which they had championed. Their action on this occasion excited considerable admiration throughout the country and people were heard predicting that party government was going to prove an immediate unqualified success in this country. But the China-Japan war seems to have demoralised the two parties altogether. Subsequent to that event, instead of adhering to principles, they simply followed the lead of prominent statesmen. The Jiyūtō went hand-in-hand with Marquis Itō, and the Kaishintō, or the Shimpotō, as it had then begun to be named, backed Count Matsukata. In 1898 Marquis Itō attempted to unite the two parties in a coalition cabinet, but the amalgamation was foredoomed to failure, and in less than six months the new structure fell to pieces. Subsequent to that, political parties steadily declined, fulfilling none of the great functions for the sake of which in other countries such bodies exist. They are at present mere tools of each successive Government—appliances for passing bills and granting funds. Though last August a new election law was put into practice, it made not the slightest difference in the situation or in the character of the men who offered themselves as candidates. These men are for the most part entirely without principles, whose only wish is to please their electors and attain to the position of a member of the Diet. It may be said with truth that during the last 10 years the character and influence of political parties have lost ground in the country and the political outlook as far as these parties are concerned is most discouraging.

* * *

"The Evil Tendency of despising Practical Knowledge in favour of Empty Theories," is the title of an article published in the *Taiyō* contributed by the energetic and popular Director of the High Industrial School, Mr. Tejima Seiichi, of which the following is an abstract. Though it is true that during the past ten years extensive preparations for increasing the products of the country have been made, and although the demand for labour has raised its price considerably, making it worth while for more people to engage in it, yet throughout the country there is still a very strong prejudice against work and business of every kind, specially among the educated classes, as is shown by the following statistics. At the two Universities there are 996 Law students as compared with 591 Science and Engineering students. The proportion of Science and Engineering students to the total number of undergraduates does not exceed $\frac{6}{100}$. In the 7 High Schools engaged in preparing students for the University there are 3,602 students as against only 1,610 in all the High Commercial, Industrial and Business Schools in the country. There are in the Middle Schools 78,878 students, but in various Business Schools whose standard of attainment is the same as that of the Middle Schools there are only 14,014 students. Thus it is seen that the majority of our promising young men turn their backs on productive pursuits. In America we find a wonderful contrast to what is going on in Japan. According to the latest statistics which give the figures for the past 10 years the proportion of graduates according to the principal subjects of study were as follows:—Divinity, $\frac{8.7}{100}$; Law, $\frac{29.4}{100}$; Medicine, $\frac{14.2}{100}$ and Engineering Industry, $\frac{51.6}{100}$. There is evidently much cause for concern in the existing state of things in the educational world of Japan.

* * *

Linguistic reform is a subject on which enough has been written to fill many volumes during the past 10 years. It is really of very little importance what one scholar or another happens to think on this subject. The question which alone

* These figures are a little out, as is not infrequently the case with statistics published in Japanese magazines.—(WRITER OF SUMMARY.)

is of interest is, are the authorities going to adopt a decided policy and see that it is scrupulously carried out? According to Dr. Katô Hiroyuki, the President of the Committee appointed by the Department of Education to investigate the whole question of proposed linguistic reform and report on it, the Department is likely to adopt the recommendations of the Committee with some modifications. In a recent number of the *Chûô Kôron* Dr. Katô writes as follows on the work of the Committee:—The Committee has met 9 times, and though they have still a good many details to go into and points to settle, the subjoined statement shows the particulars on which the Committee is agreed and the main lines of the policy they recommend. (1) They are of opinion that all written symbols should be strictly phonetic. In order to determine which is preferable for universal adoption, Roman letters or Japanese *Kana*, the two systems are being compared by a sub-committee. (2) For written composition what is known as the *gembun itchi* style is considered the most suitable and a special examination of this class of writing is being made. (3) The subject of spelling and the combinations of sounds is under examination. (4) Provincial dialects are being examined with the view of determining what dialect shall be made the standard for universal adoption. The question of whether the *Kana* or *Romaji* shall be adopted is extremely difficult to settle and the Committee don't pretend to have approached any way near a definite opinion on this subject. What they feel to be more urgent than the settlement of such a fundamental question as the above is the devising of some means of relieving the distress caused throughout the schools of the country by the extreme unwieldiness of the language in its present state. The Committee are endeavouring to deal in as thorough a manner as they can with the following questions:—(1) How best to lessen the Chinese characters in use. (2) How best to improve the style of writing now followed. (3) How to improve the method of writing letters. (4) What methods of *Kana* spelling should be adopted, and how foreign names should be transliterated. The main difficulty connected with this inquiry is the leanings and prejudices of those engaged in it, continues Dr. Katô. Those who have made a special study of foreign languages are mostly in favour of adopting the Roman letters. Japanese scholars, on the other hand, advocate the use of *Kana*. What is wanted is a set of open-minded and liberal-spirited men who are resolved to follow any course that promises to largely benefit the whole nation whether it meets with their entire approval or not.

Mr. Tokutomi Iichirô, who for many years has advocated the adoption of the *Rômaji*, writes in the same magazine in the following strain. The *Rômaji* could be rendered quite general in this country in one generation if the Government were to begin by publishing all its notices and having all class-books written with *Rômaji* and the characters side by side. Further, all Christian and Buddhist sacred books should be published in *Rômaji* forthwith.

In the *Kyôiku Jiron*, Dr. Otsuki Fumihiko expresses very strong objection to the idea of adopting the Tôkyô colloquial as a standard in the proposed linguistic reform. This is the gist of what he has to say. The idea of making the confused and singular speech of the metropolis a standard for the whole country is most absurd. The Tôkyô dialect is wanting in many of the finer elements of Japanese speech. Though many of the early residents of Tôkyô, or Edo, as it was then called, came from Kyôto, Fushimi, Sakaye and adjacent places, and spoke what is known as the Kamigata language, they were soon joined by a large number of Imagawa's Suruga retainers and by the followers of Takeda and other *daimyô*. These latter had more force of character, were more pushing and less refined than the Kamigata folks, and as business grew and the exigencies of life became more pressing, the amenities of speech were curtailed and the consequence was that in a few generations Edo language began to be considered slipshod and unrefined.

There is no doubt a good deal of truth in what Dr. Otsuki says, but it must be borne in mind that

it is the language of the upper classes in Tôkyô that is proposed as a standard, and this surely is refined enough for all ordinary purposes. People are beginning to despair of anything being effected by the Investigation Committee. Even Dr. Katô seems to us to write as though he were somewhat weary of the whole business. There is far too much useless discussion over all such subjects. No perfect system will be born in a day. If the Mombushô would only begin with something practical and effective and stick to it, we should see a change for the better at once. There is too much red-tapeism about the whole business and outsiders naturally ask whether the authorities are really in earnest. The appointment of a Committee of Inquiry is not infrequently an indication that a Government sees no necessity for immediate resolute action.

The *Kokumin Shimbum* publishes the views of Dr. Kinoshita, President of the Kyôto Imperial University on "The Future of Chinese Education." Dr. Kinoshita is represented as in substance expressing himself as follows:—It looks somewhat as though China were about to change her system of education and follow in the wake of Japan and Europe. But it is as yet far too early to attempt to predict anything certain as to the extent to which China will go in this matter. Many writers fail to realise how intensely conservative she is and how little real impression has been made on the nation by the representatives of Western civilisation in the past. Some advocate the spread of medical knowledge as a first step towards occidentalising China,* saying that Western civilisation entered Japan by means of Dutch medical science. But are the two cases parallel? We think not. Japan has always been susceptible to outside influences and China has always remained stolidly indifferent to them. Are there any people on the face of the earth so obdurate and unimpressionable as the Chinese? Christianity has been propagated in that country for a very long time, and having been greatly modified to suit the Chinese mind, once it seemed to have taken root among the people. Even among Princes and Ministers of State there were believers, but no sooner was it made plain that what the Chinese were accepting was essentially the religion followed in the West than there set in a violent reaction. Japan's respect for medicine had its origin in the fact that in the dark ages the Buddhist priests were doctors and were honoured in this capacity as well as in that of religious teachers. There were too among the early students of Dutch medicine some remarkable men. Is the general feeling in China in reference to doctors such as was entertained in Japan in pre-Meiji days? Do not the Chinese rather regard medical men in the way that we regard diviners? Prejudice, aversion to change, strong anti-foreign feeling—these are the most permanent and strongly marked characteristics of the Chinaman. His motto is, assimilate, but never be assimilated. Were not all China's emperors originally of a foreign stock, who when they took possession of the throne thought to mould the nation to their own ways, but found the old civilization and all its associations too strong for them and ended by becoming thoroughly sinicised or celestialized. Whatever learning may be introduced into China, the extent to which the Chinese will adopt it is a question which cannot be answered forthwith, but judging by the experience of centuries we should be inclined to say they will not go very far in anything Western. Japan, though an Oriental country, is unlike all other Oriental countries. Her national characteristics allowed of her adopting western civilisation, in fact predisposed her towards it. There is much that corresponds in European civilisation and old Japanese civilisation. Both in Europe and Japan feudalism was the creator of a system of civilisation. The chivalry of mediæval Europe was the exact counterpart of our Bushidô.

* The *Fiji Shimô* writes much on this subject. There exists a Medical Society in China called the 同仁會, Dôjinkai, supported by a number of well known medical men which has the renovation of China by means of medical knowledge as its main object.—(WRITER OF THE SUMMARY.)

In the dignity and distinguished ways of the real gentleman, Japanese or Occidental, there is great similarity. And it is this knightly character that actuates Japan's rulers to-day. The English gentleman of modern times is the descendant of the knight. Nations neither acquire nor lose strong tendencies and traits of character in a day. Hence it is that Germany clings to the barbaric practice of duelling and that the French, while professing to be intensely democratic, have a great liking for aristocrats. Their objecting to the repatriation of the Orleans family is not owing to their dislike of royalty, but rather because they all aspire to royalty. The spirit of feudalism—the worship of rank and position still remains throughout Europe. In the high regard in which they hold certain ideas Japan and the West are at one. But is this the case in China? Is there any common ground on which Chinese and Occidentals can meet? We know of none. (*Konnichi Shina ni kono kyôtsû* (共通) *no ten nashi*). Hence though China may make some advances towards the introduction of foreign learning, the final results of her action are not likely to be satisfactory. Japanese would-be reformers who go over to China expecting to see in that great conservative continent a repetition of what they have witnessed here in the Meiji era will most certainly be disappointed. Among the Chinese there are lacking those finer elements that form the basis of both Japan's ancient civilisation and European life and thought.

* * *

Under the title "Forgetfulness" the 史學界, *Shigakukai*, writes as follows:—The Japanese are certainly very fond of change, but still more prominent than fickleness of character is their forgetfulness. Things over which there is a great commotion at one time are allowed to pass out of memory in a few years, if not in a few months. Take a few illustrations. There is the anti-smoking law forbidding lads under age to smoke. It has become a dead letter,* owing to the alleged difficulty of enforcing it. At first the police fussed a good deal about it, but now they seem to have settled down to the conviction that in most cases it is best to ask no questions. To expect the people who agitated for the passing of the Anti-Smoking Bill to help the authorities to enforce it would show ignorance of our ways of regarding things. We talk about "public spirit," but do not practise it. Then there are the police regulations about the cleansing and disinfecting of the scissors, razors and other utensils of barbers, which for a time were very strictly observed. They too have been allowed to fall into disuse. It has been the same in most places with the prohibition of walking about the streets with bare feet.† It seems to us that from ancient times this tendency to make excellent laws only to allow them gradually to fall into disuse has prevailed among us. What could be finer on paper than the Odai Laws. But why were they not carried out? Our concern being principally with recording historical facts, we have called attention to the subject under the above heading.

In the magazine quoted above Dr. Riess' paper on Will Adam's grave is reproduced and commented on. The writer of the article on this subject tells us that he went in person to Hemi, examined the Anjin-zuka and made various inquiries of the priests belonging to the Jôdo-ji, but without obtaining any reliable information. The *Shigakukai* is of opinion that the means of solving the doubts expressed by Dr. Riess do not exist.

* * *

The 即興詩人 *Sokkyô Shijin* (The Improvisatore) consisting of 2 volumes published by

* The *Fiji Shimpo* predicted from the first that it would so become, knowing how such things go in Japan.—(WRITER OF SUMMARY.)

† Numbers of other instances will occur to readers, the law of the road, the regulations about not walking on the moats, &c. among them.—(WRITER OF SUMMARY.)

the Shunyôdô and selling at 60 *sen* per volume is the title of a very carefully executed piece of literary work on which the artist Mori Ogai has been engaged on and off for nine years. We are indebted to the *Kokumin Shimbun* for the following notice of the book. This work is a most careful translation of Hans Christian Andersen's *Improvisatore*. It has been coming out in the *Shigarami Sôshi* and the *Mezamashi Gusa* but is now republished in book form. The translation bears the marks of the exercise of care and taste in every part. The descriptions are most vivid. As we read the account of a great Flower Festival at Rome we felt as though we ourselves were among the spectators and were drunk with the intense excitement caused by the scene. It would be hard to find anything in our literature more perfectly done than these two volumes.

The *Bankoku Kôbô-shi* (History of the Rise and Fall of Countries) by Mr. Matsumura Kaiseki, published by the Keiseisha and selling at 1 *yen* 50 *sen* a copy, is written in vigorous language with a strong moral purpose revealing itself between the lines. Mr. Matsumura has carefully collected a large number of facts bearing on government, religion, education, learning, commerce and arts the world over.

The *Shina Bôyeki Jijô*, by Mr. Yoshida Torao, covers 500 pages and contains maps of China. It is being brought out by the *Kokumin Shimbun* Company. It includes accounts of the geography, commerce, government, coinage, postal and telegraph services, roads, weights and measures, foreign banks, &c. No less than ten chapters are devoted to the discussion of the present state of Chinese commerce and of what is required to develop it more fully. The information given has, it is said, been collected in China from thoroughly reliable sources.

* * *

In the *Keisei* appears an article from the pen of Mr. Shiga Chôkô entitled "A Bigoted Return to Ancient Ways." The title is a little misleading, as Mr. Shiga does not seem to hold that there is a general tendency all over Japan to revert to ancient customs, but only points out how in certain places very old customs are still faithfully followed and afterwards shows that in many things Japan has changed for the worse in the *Meiji* era and that she will do well to revive many old customs. We shall content ourselves with stating the facts marshalled by Mr. Shiga. (1) The intercourse of people who live on islands or who are shut in by high mountains is comparatively restricted, and consequently there is greater permanency with their customs than with those of the outside world. (2) The mode of arranging the hair known as *Shimada-mage* still prevails universally in Oshima, (Izu) Hachijôshima, Chichibu no Urayama (Musashi), in Aizu mountain districts, Soya (Awa) and in the mountainous parts of Kizu.* (3) The practice of binding the head known as *hajimaki*, practised by certain women, is very ancient. It is still followed in Oshima and in the mountainous districts of Kiso (Shinano.) (4) The habit of wearing garments with 5 badges on them (3 behind and 2 in front) is still observed in Oshima. (5) To wear trousers that had pieces of linen sewn crossways was a very ancient custom. In Kizu (Awa) and Oshima the women wear aprons pieced in the same way. (6) For women to carry weighty things on their heads is a very ancient custom. This practice is still observed in the mountainous districts of Ohara and in Yase. (7) The practice of women's wearing narrow belts that need no *obidome* is very ancient and is still kept up in the seven islands of Izu and in other mountainous districts. (8) For women to leave the eyebrows unshaven and the teeth unblackened, and for men to allow their beards to grow was the fashion followed in ancient times. The inhabitants of Oshima and of the Kiso mountainous districts still follow this

*Our information is that this method of doing the hair is most common everywhere, but we understand Mr. Shiga to say that in the districts mentioned no other mode of doing the hair is followed by ordinary people. The fashion is said to have been first set by a prostitute residing at Shimada (Tôkaidô). (WRITER OF SUMMARY.)

ancient custom.* (9) On account of the expense attached to elaborate hair-dressing, tying the hair up in a knot at the back of the head has been of late largely resorted to, but it is worthy of note that this mode was known in ancient Japan under the name of *Nage Shimada* and that in some cases the adoption of this method of arranging the hair is simply a reversion to old Japanese ways. (10) In the earlier years of the *Meiji* era one always saw small badges, either one or three, but in recent years the more ancient practice is followed of having five large badges, while at the same time etiquette as to dress-clothes has become more strict. (11) There is a strong movement in favour of women's wearing trousers or divided skirts, but this is only a reversion to an ancient practice. (12) The breadth of women's belts has constantly increased till the expense involved is almost unbearable. But it is to be noted that the agitation in favour of narrow belts has the most ancient practice to support it. (13) Japanese ancient customs as regards dress resembled Western customs to a very large extent. (14) The same may be said of modern Western thought. Its counterpart will be found in ancient Japan. (15) In recent times a certain amount of slovenliness of dress and a kind of unkempt look are considered by many to be the marks of a great mind, but in the pre-*Meiji* days it was not considered etiquette to appear before superiors with dishevelled and uncombed hair and with one's dress out of order. So here again the old Japanese custom corresponded to the modern Japanese custom. (16) In recent years one has become accustomed to hear a man praised for not returning money that he has borrowed—it being supposed that great men don't stoop to such trifles, but in pre-*Meiji* days it was customary on borrowing money to fix the date for its return and an I.O.U. was given to the lender which contained these words *kigen ni kayesaneba, ôku no hito no naka de on-warai kudasare taku*. "If I do not return the money at the proper time, I hope you will hold me up to scorn in the presence of a large number of people." Thus showing that the ideas entertained on this subject in Japan in old times precisely corresponded to those current in the West at the present day. (17) In pre-*Meiji* days a distinction was made between public and private property. The former was much more highly respected than the latter.† But in recent times it has become the fashion to regard the property of Government and of Companies as less worthy of consideration and protection than private property. Here again Old Japan was nearer Western ideas than is modern Japan. (18) In pre-*Meiji* days the greatest care was exercised so as not to damage another man's property in any way. There was a universal altruistic spirit abroad which does not exist today. In fact we may say that the modern motto is "every man for himself." (19) In old Japan men were generous even to their foes. A man might be an enemy, but his deeds were often praised. In modern times nothing is too bad for people to impute to their enemies. (20) Punctuality is not something that foreigners have taught us, but a habit that was scrupulously cultivated by pre-*Meiji* samurai. We have only to go back to the old in order to bring ourselves into line with the Western standard in this respect. (21) The ancient Chinese and Japanese motto was "first reform yourself and then reform others," a precept the force of which is recognised in the West, but in modern Japanese society the tendency is all in the direction of seeking for motives in the brother's eye while leaving the beam in one's own eye. All reform seems to me to consist of a revival of ancient ideals.

* * *

The *Chûô Kôron* contains a somewhat interest-

* Prior to the introduction of foreign ways teeth were blackened, eyebrows shaved and men's beards cut off. Mr. Shiga here refers to cases where there is no imitation of foreign ways, but only a reversion to very ancient practices.—(WRITER OF SUMMARY.)

† A robber caught stealing Government property was considered to have committed a far more heinous crime than if he had stolen goods of the same value from a private individual.—(WRITER OF SUMMARY.)

ing comparison between the inhabitants of Kyûshû and the Japanese living in the North-Eastern provinces. In order to avoid lengthy titles we shall use the terms Northerners and Southerners as near enough for our purpose.

I. There are those who represent the Northerners and Southerners to be as opposite to each other in nature as dogs and apes, but this is not so. The Northerner is unsophisticated and trustful. The Southerner is full of energy and enterprise and respects agreements.

II. In the Southerner feeling predominates; in the Northerner will. But each thinks of his own province only and cares not a straw for the interests of outsiders.

III. The following comparison with European races may be made.

NORTHERNERS.

(1) The Japanese Slavs.

(2) They resemble the

the Russian peasants in phlegm, stupidity and foolish honesty. They are impervious to reason. In their homes the greatest simplicity is observed.

(3) For the above reason the religion propagated by the Greek Church suits the Northerners and Bishop Nicolai's stronghold is in this part.

(4) Despotism seems to suit the people more than any other form of Government and the feeling of respect for the Emperor is stronger here than elsewhere.*

SOUTHERNERS.

(1) The Japanese Latin race.

(2) Though in character somewhat like the Latin race, they only appear to be unsophisticated. They are impressive, but not deep.

(3) On this account Roman Catholicism flourishes in this part of Japan.

(4) Political ideas are in an unsettled state and even revolutionary notions find ready advocates. The people are open to conviction on many points.

IV. If asked to state the component parts of the typical Northerners and Southerners we should state them thus: Take 5 parts of craft, 3 of stupidity, 2 of honesty, and mix well, and you have a Southerner. Take 6 parts of stupidity, 3 of obstinacy, 2 of honesty, and mix well and you have a Northerner.

V. Neither race is civilised. The Southerners are like the Formosans in many things, the Northerners like the Ainos.

VI. The Southerners are children of the sea and furnish Japan's sailors; the Northerners are sons of the mountains and furnish the country with soldiers.

VII. The most unintelligible dialects of Japan are the Aizu and Satsuma dialects. These represent the difference there is between the North-Eastern language and that spoken in Kyûshû.

VIII. The Northerners are quieter and less excitable in all their pursuits and amusements than the Southerners. Among the latter archery, fencing, and other arts and accomplishments are practised with great energy.

IX. The best specimens of Kyûshû Japanese are to be found in Kagoshima. Next to this place stand Miyazaki, Saga, Fukuoka and Oita. The inhabitants of Kumamoto rank lowest. The best type of Northerners is to be found at Fuku-shima, next rank the prefectures of Miyagi, Awamori and Akita. Lowest of all stands Tochigi. The military criticism on the comparative merits of the two races is all in favour of the Northerners, who are said to be obedient, enduring and painstaking. Whether on duty or off duty they are to be preferred to the Southerners. The latter are brave, but their valour is not free from foolhardiness.

CORRESPONDENCE.

A USEFUL HINT.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR:—I presume that several score of the readers of the *Japan Mail* are studying the Japanese language, and as a part of their work are using the *Kokugo Tokuhon*, of the Primary and Higher Primary grades, or some other edition of readers. It has occurred to me that many of these, especially newcomers, may not be acquainted with the fact that with every set of school readers is published a dictionary, *jibiki*, which, giving in *kana* the pronunciation of the Chinese characters and an explanation.

* We have omitted some parts of the comparison as they seem to us pointless.—(WRITER OF SUMMARY.)

also in *kana*, of the word, and sometimes of a whole phrase, very materially assists the student. Oftentimes more satisfaction can be gotten from this dictionary than from a teacher. One can study along nicely even on the days when the teacher does not come. The cost of the book is but a few *sen*. This hint may be a case of "*Shaka ni sekkyo*," and again it may not. The dictionary at least shows just what readings are at present actually taught the children in the schools, something of which often a teacher of advanced years is ignorant.

Yours very truly,

SOJOURNER.

Kagoshima, Oct. 9th, 1902.

COLONIAL NURSING ASSOCIATION.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Since you have referred editorially to the Colonial Nursing Association, introduced into Japan by the Honourable Mrs. Beethom Whitehead, it may be well to correct two inaccuracies that have crept into the leading article in your issue of this date.

In the first place, the question raised by the Yokohama Ladies' Committee is, as I understand it, not "the provision of foreign nurses" but "the provision of a foreign matron" for the General Hospital.

Into this question I have no desire to enter, as it appears to be not in opposition to, but quite outside the sphere of activity of the Colonial Nursing Association.

The other point upon which your article is misleading is contained in the last seven lines.

The Japan Branch of the Colonial Nursing Association embraces not only Tokyo and Yokohama, but the whole of Japan, and the number of nurses employed is limited only by the requirement of the foreign community in Japan and the funds at the disposal of the Committee.

The nurses may be employed either in an European hospital or elsewhere, and the only distinction made between subscribers to the funds of the Association and others, is a reduction of the fees payable by the former.

I am, etc., A. G. CHURCHILL, Colonel,
Treasurer.

Tokyo, October 16th, 1902.

A CHINESE VIEW OF THE NEW TREATY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In reply to Mr. Cecil Holliday's letters on the 16th inst. addressed to the *N.-C. Daily News* of Shanghai, will you allow me to say a few words on behalf of the Chinese Government?

First I would say that when one reads such letters as this of Mr. Holliday's, one would think that God Almighty created the Chinese people for no other purpose than for the British to trade upon: that the Chinese exist as a nation only for the benefit of British trade.

But whatever may be said of Mr. Holliday's peculiar opinions about the Chinese, there is no questioning the directness and vigour of his argument and Mr. Holliday's ingenious argument places the British Government in the following not very dignified position:—Either the British Government believes China has been guilty of defrauding, by *Lekin*, British merchants of their Treaty rights; or the British Government does not believe China guilty. If the British Government does not believe China to have been guilty, then there is no justification in taking all this trouble to get China to change her *Lekin* system. But if the British Government really believes that China is guilty, then what reason, what guarantee—asks Mr. Holliday with irrefragable logic—has the British Government now to show that China will not or cannot cheat British merchants out of their Treaty rights under the present consumption tax or excise system just as well as, if not better than, under the old *Lekin* system.

It must be admitted that there is no escape from Mr. Holliday's inexorable logic. But if Mr. Holliday's logic places the British Government in this not very dignified position, the position in which Mr. Holliday, by a statement of his own, places the British merchants, is even less respectable still than the position of the British Government in this Treaty. The statement of Mr. Holliday is this:—That all the exactions obtained from the Chinese Government and put into this new Treaty for removing abuses, and obstructions, giving new trade privileges, &c., all these cannot make any vital difference to trade as a whole. The position then is this. After Chambers of Commerce, etc., have been clamouring for years for the removal of certain alleged abuses and obstructions to trade, the British Government at last obtained their removal. But no sooner had the British Government done this than up stands the head of one of the oldest business houses in China and deliberately says: "These things, *i.e.* the removal of, etc., can hardly make any vital difference to trade as a whole."

From the above, as by Mr. Holliday's own showing, the inevitable inference to an outsider is that the British Government is a weak and, what the Chinese would call *pie wrong pae* 不明白, not clear-seeing Government, and that the British merchants are a set of petted, spoiled naughty children. The further inference is that the poor Chinese Government for these many years has, after all, been abused, vilified, threatened and badgered about for nothing at all!!

I can sympathise with British merchants in their present plight for having suddenly to pay an increased duty of 7½ per cent. The total of 12½ per cent. import duty British merchants cannot complain of as being high; but the sudden increase from 5 per cent. to 12½ per cent. is hard. But what then? Broken crockery must be paid for. Either British merchants must help the Chinese to pay for the crockery broken by the Boxers or the Chinese will have to pay for it all themselves. In the latter case the danger is that more crockery may be broken or the whole China crockery shop may go smash, when British trade too will go to smithereens and then Mr. Holliday's theory about God creating the Chinese for British trade will be finally disproved.

The British Government has therefore wisely decided to allow British trade to help to bear the burden of the Chinese people. The evident desire of the British Government in this Treaty is to give some relief to the Chinese Government and at the same time to satisfy the British merchants by getting the Chinese Government to grant all that the British merchants want in China; all with the exception of the total abolition of *Lekin*. Mr. Holliday is quite right in saying that all the concessions in the present Treaty are not vital to British trade. What is vital to British trade is—*Lekin*. *Lekin* does injure British trade and in the end perhaps will destroy it altogether. Therefore for the benefit of British trade, *Lekin* must be abolished.

But *Lekin* does not in the least injure British trade in the way Englishmen in China imagine it does, *i.e.* by fraudulently imposing a tax upon British imports against the Treaty or even by impeding the free circulation of British goods in China. I will not deny that there have been formerly, *not now*, casual cases of malpractices on the part of individual officers at the *Lekin* stations. But all such cases have invariably been immediately attended to, and if the justice of the case is proved, reparation made. But to say that the Imperial Chinese Government, or even the provincial authorities collectively and deliberately, set themselves to plan and commit fraud and sharp practices against British merchants, is a gross and indecent libel which a man of Mr. Holliday's standing in China ought to be ashamed of making against the Chinese Government. Mr. Holliday should leave such tricks and nonsense to the mob of broken down British merchants whose whole stock in trade for business in China is to raise the war cry of British trade and abuse the Chinese Government.

But if *Lekin* does not injure foreign trade in the way foreigners imagine, in what way does it injure it? Well, in this way. *Lekin* impoverishes the Chinese people and thus very much impairs their buying power. But for *Lekin*, which strangles and kills all native industry and enterprise in China, the people of China would be able to buy a great deal more of foreign goods. That is the real and serious way *Lekin* does injure trade.

Foreigners have spoken about the abuses, squeezes, &c., of *Lekin* and they think if they could get Sir Robert Hart to manage the *Lekin*, *Lekin* would not be such an evil. But with all respect to Sir Robert Hart, I take the occasion here to say that his rigid system of paying high salaries and making immaculate automatic tools of the men he makes use of to do his work for him, admirable though it be in its way, is not such a wonderful thing that China must adopt it or perish, as many foreigners imagine. Sir Robert Hart's system for one thing is very expensive, and, except for such routine work as collecting taxes and keeping accounts, would long ere this have broken down, for want of not of purity, but of ability in the service; for Sir Robert Hart's system tends to make mere tools of the men he uses and this tendency will make even able men lose their ability. Foreigners who have had to deal in business in any way out of the regulation track with Commissioners of Customs in China will bear me out in this.

But to return, *Lekin*, I say, is an evil not because of its abuses. The abuses, *i.e.* squeezes, really do not amount to very much. That it is so may be seen from this fact. From the public and private returns of *Lekin* stations where officials I personally know have notoriously made money, I have carefully calculated and found that the cost of collection including squeezes and all, amounts only to little more than one half of the cost of collection of the Maritime Customs.

But foreigners think the abuses, *i.e.* the squeezes, of *Lekin* are enormous because not one foreigner understands the real state and system of Chinese Finance. The evil or inconvenience of Chinese

Finance is the want of a system of exact and yearly variable budgets. The budget of every province is in Peking like an already printed book, made up, it is true, and sent by the province itself, and when it is sent up, it is not possible to get the Department of State Finance or Board of Revenue who has the keeping of all these provincial budgets, to alter it except by obtaining permission from the Throne. Now for large items of new expenditure the Viceroy and Governors of the present day constantly, by memorialising the Throne, get the Department of State to alter the budgets. But for small accounts in unexpected expenditure, deficits, loss, defalcations, &c., the provinces have no power to alter the budget. Now what are the provincial exchequers to do to meet the losses out of deficits in collection, &c. Well, the provincial exchequer simply squeezes. Now what the foreigners call the enormous squeezes of the mandarins which they calculate from the official returns in Peking, are not the squeezes of the individual mandarins really, but are the squeezes of the provincial exchequers to make their accounts of assets and liabilities balance with the accounts in the State Department in Peking. In China too this taxation is not elastic and there is no way of raising an open public loan.

Let me illustrate this by an example. When a magistrate in a district suddenly finds himself called upon to meet an unexpected expenditure; say, to provide so many carts to act as transports for a brigade of soldiers passing his district, for which, however, there are no available funds; the magistrate then has either to make himself liable to very heavy punishments—for delaying the march of the soldiers by flatly refusing to supply carts—or to pay for the carts out of his own resources. His resources are to take whatever available funds are in the Treasury of his *yamên*, pay out of his own pocket or negotiate a loan in his own name with the rich gentry or bankers of the place. After this, he writes and lays the hardship of his case before the provincial High Authorities. The provincial High Authorities cannot by law formally give him relief because the budget deposited with the State Department does not contain such items of expenditure. But, acting as human beings and not as legal automatons, the High Provincial authorities informally intimate to him to debit the debt to the funds of the Treasury of his *yamên*. When therefore the Magistrate leaves office, he takes away all the available funds in the Treasury of the *yamen* to pay for the debt. Then the new magistrate comes to take over seals and sees from the accounts that such and such funds are in the *yamên* Treasury, but as the incoming magistrate has to give to the outgoing magistrate, a bond certifying that the funds in the Treasury and the public accounts square, the new magistrate goes himself to the vaults of the Treasury,—Lo! and behold the vaults of the Treasury are empty—! "How is this?" The old magistrate smiles and hands him the informal intimation from the High Provincial authorities. "Oh! then I understand." Then the two discuss the matter together how best to cover the deficit.

Now the difficulty in making out a clear and exact balance sheet of Revenue and Expenditure in China now is that all the Provincial Exchequers at present are bankrupt and in debt. But foreigners will say, why not send some higher Functionaries with full powers, one to each province, to make a searching enquiry and present a true report of the exact state of things in each case. Well, some years ago when H.I.M. the Empress Dowager sent the late now notorious Kang-yi to Kiang-su and Canton to make such an enquiry and report, all the foreigners called him the Lord Extortioner.

But in saying that all the Provincial Exchequers in China are bankrupt, I am only saying that they are in the same state as the Exchequers of the nations of Europe with their Public and National debt. The only difference is that the Public Debts in Europe are openly acknowledged whereas the Public Debt of the provincial governments in China can not be acknowledged.

But to return to the subject of *Lekin*. I said that with all the abuses abolished, *Lekin* would still remain a great source of impoverishment for the people and, in consequence, an injury to the development of foreign trade. The reason is because *Lekin* fundamentally is a vicious and illegitimate tax. Confucius two thousand years ago laid down the first fundamental principle of all true taxation. The Confucius principle, however, is not the questionable modern English principle, which strangely in Shanghai, is quietly ignored, namely that all who pay the tax should have a vote; *i.e.* a say as to how the tax is to be spent. The Confucian principle is that in all true and legitimate taxation, the object must be for the benefit of the people who pay the tax and not for the sake of mere spending,—in Chinese 惠而不費 (Bk. XX. sec. 2).

Now the viciousness of *Lekin* as a tax is that the people who pay the *Lekin* get no benefit at all from the revenue derived from *Lekin*. In other words

Lekin is a non-productive tax. But who gets the benefit from *Lekin*? In order to answer this, it is necessary to ask the question who are responsible for *Lekin*? I answer without hesitation,—Foreigners. Let me explain.

When China was first asked by Great Britain to play the game of Foreign trade, China refused saying it would demoralise her people. But Great Britain insisted, and China being weak, was obliged to play. Now when China began to play this game of Foreign trade, she was entirely ignorant of the rules of the game. Then Great Britain, taking advantage of this ignorance, made China give up her best trump card in the game,—the trump card called tariff autonomy. It goes without saying that with her best trump card thrown away, China has been playing a losing game all along in this game of foreign trade.

Before long, however, the demoralisation of her people, which China feared from the beginning, came, and the result was the T'ai-ping Rebellion. In order to get money to pay for putting it down, *Lekin* was created. That was how *Lekin* came into the world.

When the T'ai-ping rebellion had been put down, *Lekin* could have been gradually abolished. But the foreign friends of the late Li Hung-chang decided to make the old man the Bismarck of China. Therefore in order to pay for entertaining the foreign friends of the late Li Hung-chang, who wanted him to become the Bismarck of China, *Lekin*, which could have been, was not abolished. At this time the missionaries too were beginning to be active in their mischief-making. That added to the difficulty of abolishing *Lekin*. That was how *Lekin* was kept alive.

Now the worst effect produced by the attempt of the foreign friends of Li Hung-chang to make him the Bismarck of China, was not only that the Chinese people had to continue to pay *Lekin* for the entertainment of Li Hung-chang's foreign friends; but it made Li Hung-chang awfully "cocky" and "cheeky,"—cocky and cheeky, to Japan. Now at the time the whole of the English press in Shanghai proclaimed that Japan deliberately wanted to pick a quarrel with China. But it is not true. Of course there were faults on both sides, but what made the China-Japan war inevitable, was the "cheekiness" of Li Hung-chang with his foreign friends at the back of him. At the last moment, Great Britain could have prevented the war, as General Grant had previously prevented war at the time of the Formosan trouble. But Britain did nothing or even worse than nothing, witness the *Kowshing* case. In short, the final result of the endeavour of the foreign friends of Li Hung-chang to make him the Bismarck of China, was the China-Japan war. The war brought the Indemnity. In order to pay for the Indemnity, *Lekin* had of course to be increased.—That is how *Lekin* came to be full grown.

After the Japanese war, there was of course a great deal of discontent in the country. Mr. Kang Yu Wei, taking advantage of the discontent of the country, tried to play one better upon Li Hung-chang and become even a greater Bismarck in China. In fact, Kang Yu Wei tried to reform China and the Empress Dowager. Foreign mischief-makers, instead of standing aloof from things they did not understand and have no business to meddle with, backed Mr. Kang Yu Wei and his followers. This of course produced excitement and the result of the excitement was that the whole China crockery shop toppled over with the cataclysm at Peking in A.D. 1900. Now the Chinese people have to pay for all this mess of broken crockery and the foreign mischief makers get no punishment, at all, but even compensation to enable some of them to take a trip to Europe by the Siberian railway.

That then is the reason why *Lekin* will grow to a monstrous size.

The above then is the history of *Lekin* in simple language, from which it is perfectly clear that foreigners are the cause of *Lekin*. If any one still doubts this, let me here make it still clearer. It is perfectly obvious that China is necessarily put to a great deal of extra expenditure on account of the presence and conduct of foreigners in China. In order to get money for this extra expenditure, China must either tax foreign trade or she must lay a tax of some kind upon her people. But as China has given away her best trump card in the game of foreign trade, China is not allowed to tax foreign trade as she likes. Therefore the only other alternative left to China, unless she chooses to declare herself bankrupt and cease to be a going concern,—is to pile on the tax,—*Lekin* or Consumption tax—without mercy upon her people.

In other words, as I have said, it is the conduct of foreigners that is responsible for extra expenditure to the Chinese Government and therefore for *Lekin*. I need not point out that it will depend upon foreigners themselves to increase or diminish the burden of *Lekin* upon the people of China and indirectly the injury to foreign trade.

Every cent taken unjustly or unnecessarily from the Chinese Government comes out of the Chinese people as *Lekin*, and every cent so taken impoverishes the Chinese people and impairs their buying power and, as long as the laws of arithmetic hold good, injures foreign trade to the extent of that one cent.

Every foreign merchant therefore who sells his name to Chinese to rob the Chinese revenue or to do things which will cause trouble and expense to the Chinese Government, is responsible for *Lekin* and for injuring the buying power of the Chinese and thus for injuring foreign trade. Every missionary who goes to Hunan to get himself killed, is a cause of expenditure to the Chinese Government, and is therefore responsible for *Lekin* and injury to foreign trade. Finally every high-faluting charlatan who now persuades "patriotic" Viceroy to build useless expensive schools and colleges, is responsible for *Lekin* and for injury to foreign trade.

But to sum up, *Lekin*, I say, is the vital question of foreign trade. *Lekin* is a vicious and unproductive tax which eats into the economic life of the Chinese people like a huge cancer and in this way impairs their buying power, thus making it impossible for foreign trade to grow and flourish in China. In one word, in the interests of the welfare of the Chinese people as well as in the interests of foreign trade, *Lekin* should be abolished. But *Lekin* can not be abolished, because *Lekin* is the outcome of the presence and conduct of foreigners. There are only two really effective ways of abolishing *Lekin*, namely:—

First: Either foreigners in China must behave in a way to cause the least expenditure to the Chinese Government so that the tax which China is allowed to collect from foreign trade will be sufficient to cover the extra expenditure incurred by China on account of foreigners.

Secondly: Or China must be given back her trump-card, Tariff Autonomy, so that she can tax foreign trade sufficiently to pay for whatever extra expenditure the presence and conduct of foreigners in China may make her incur.

In short, the two vital questions at the bottom of the Chinese problem are; extra-territoriality and Tariff Autonomy. In the present Treaty, Great Britain agrees to relinquish extra-territoriality when China shall have changed her laws to satisfy the British Government. The reason given for extra-territoriality in China, therefore, is because the laws in China are bad and unsuitable for foreigners. Whether the reason thus given is good or bad, there is at least a show of reason. But with regard to the question of withholding Tariff Autonomy from China there is not even a show of reason. The only excuse, as far as I can see, for withholding Tariff autonomy from China is the excuse of a thief or armed robber.

Mencius tells the story of a man who was in the habit of stealing chickens from his neighbours. Afterwards when remonstrated with and convinced that it was a wrong thing to steal, the man said:—"Well, I will tell you what I will do. I will from henceforth begin to reform by stealing only one chicken a day." The British Government in allowing China to increase her tariff now to 12½ per cent. is behaving like the chicken-stealer of Mencius story. In order to understand the point in the above illustration, the world should know the following fact:—

"A chest of opium containing an average of 125 pounds, pays \$125 to \$130 to the Indian farmer; about \$145 to the British Government; and about \$50 to the Chinese Revenue. In 1878-9 the total export from India was 91,200 chests, from which England derived an income of \$38,500,000, and upon which China was allowed to collect only \$4,560,000." (Mr. Chester Holcombe's book. "The real Chinese Question.") When General Grant came to China, he said it made his blood boil with indignation when he thought of this.

In the present Treaty, I see that the British Government has tried to give some relief to China by allowing her to raise the Tariff from 5 per cent. to 12½ per cent. In doing this, the British Government is doing the right thing in thus trying to repair the injustice to China. But the pity of it is that the British Government in giving relief to China should lessen the value of that relief by exacting a string of concessions for British merchants. According to Mr. Holliday himself these concessions are not vital to trade as a whole. But these concessions, although they are useless to British merchants, will mean a great deal of worry and extra expenditure to the Chinese Government. Extra expenditure to the Chinese Government means more *Lekin*, or consumption tax as *Lekin* is now called, and more *Lekin* means injury to foreign trade. Thus the British merchants in asking for this useless string of concessions are really injuring themselves,—injuring foreign trade.

In conclusion I would say that the two vital questions of the Chinese problem must be fairly and broadly taken up and faced by Englishmen. The question cannot be shirked—the question whether

Great Britain should be just and fair to China. Upon the way Englishmen will answer this question, will depend whether Great Britain will continue to be the predominant Power in China.

In a public school in England, it is generally found that the boy in the whole school who is most fair and kind in his treatment of even boys weaker than himself invariably becomes the leader of the boys in the school. What is true of rowdy school boys in a school is true also of rowdy nations. The nation who will be fair and just to China will be the leader of nations in the Far East.

KU HUNG-MING.

Wuchang, Sept. 29th, 1902.

THE COMET.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Having lately seen in your paper notices as to the position and size of the comet which has lately appeared, I should be glad if some of your readers who are more at home with astronomy than I am, could give some idea as to the period of its visibility. It is very clearly seen through ordinary opera-glasses, but it seems to be moving down towards the west so rapidly that I imagine it will be out of sight before it becomes very large. On the other hand, I suppose it might "go round the world" and become again visible before it enters the sun—as I believe it is supposed to be doing. Some information as to what one might expect would, I think, interest other readers of your paper besides myself.

I am, yours very faithfully, ANWYBODEB.

Okayama, October 21st, 1902.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—Having been shown the comet by the courteous officials of the Azabu Observatory, I will try to supplement the rather vague accounts that have appeared in your columns. It may be seen in the south-west, as soon as the sky become sufficiently dark after sunset, but it is at present a very dim object to the naked eye. With a glass of very moderate power, it should be easily distinguished from the neighbouring stars, which of course, if the glass is properly focussed, will appear as mere points of light. To define its exact position for the non-astronomical public is a rather difficult matter. Most people will know, or can easily make out, the three bright stars Jupiter, Altair and Vega, which are now in almost a straight line across the Milky Way. The comet lies below these, almost exactly on the line bisecting at right angles the line joining Jupiter and Vega. There are two branches of the Milky Way diverging towards the horizon. In the right hand branch, near its lower end, are three small stars arranged in a triangle. The comet is to-night (Oct. 22nd) just to the right of them, and just above a pair of rather brighter stars; to-morrow night it may be between this latter pair or even below them. It was first observed in the constellation Lyra, to which Vega belongs. It is now in Ophiours, its Right Ascension being about 17 hrs. 45 min., and its Declination about 6° North.

THE CHRISTIAN DAIMYO.

CHAPTER XI.

Hideyoshi transfers his residence to Kyoto.—The mission of Asano in Kiushiu.—Division of Higo between Kato Kiyomasa and Konishi Yukinaga.—Revolt and chastisement of John Amakusa.—Hideyoshi's expedition against Hojo, daimyo of Odawara.—Valignani returns to Japan with the four ambassadors. He is received in audience by Hideyoshi.—Eagerness of the daimyo to see the ambassadors. Conversion of So Yoshitomo. The ambassadors visit Matsura, Arima, Omura and Otomo. Alternative fear and hope.

The reader already knows that Hideyoshi had, after reaching supreme power, constructed the fortress of Osaka to serve him as a residence. However as his role of Kwampaku, otherwise Prime Minister of the Emperor, required his presence at Kyoto, he had built there a superb palace known under the name of "Yuraku," (1) a word which may be translated as paradise. It was in November 1587, a short time therefore after his return from Kiushiu, that he went to instal himself in this new abode. He even busied himself very much, from this moment, with his duties as Imperial Minister, for he increased the revenues of the Court, and bore the expenses of the coronation of Emperor Go-Yōzei, who as-

(1) Literally: reunion of pleasures.

cended the throne this year. Then in May 1588, he invited the Emperor and all the Court to the "Yuraku" where he lavishly presented, for five days, to his guests all the amusements known at this time. He obliged all the *daimyo* present to swear to obey the will of the Emperor and the orders of the Kwampaku in all things.

Although of very humble origin, Hideyoshi was very clever at organizing great displays, and like all upstarts he liked ostentation. It was to some extent with this intention that he gave these fêtes to the Court, followed by a magnificent procession in the streets of Kyoto. He knew that the greater part of the glory would be reflected on himself. It was also for the same reason that, in 1586, he had erected at Kyoto a wooden statue of Shaka, more than 140 feet high, according to the native historians (2). It would be puerile to attribute this act to the piety of Hideyoshi—piety he had never had; but he knew that by erecting this statue he would cause the devotees of Shaka, that is to say nearly all the people, to raise his name to the clouds.

While Hideyoshi gave these fêtes to the Imperial Court, Asano Nagamasa executed in Kiushu several orders of his master. After having taken away the port of Nagasaki from Omura, he went to Arima, then implicated in a rather delicate affair. When Hideyoshi had left Kiushu, Arima, without paying any regard to the partition made by the arbiter of Japan, had begun to fight with Riützōji about the castle of Kojiro, which formerly belonged to the domain of Arima, but then in possession of Riützōji. Arima had taken back Kojiro and placed there his nephew Isahaya. Asano informed Arima of how much this action had irritated Hideyoshi, and counselled him to give back Kojiro immediately, declaring that in case of resistance, he would compel him by force of arms. Arima surrendered, and when some time after he went with Omura to Kyoto, to present his respects to Hideyoshi, the latter confessed to these two *daimyo* that their prompt submission to his will, at the time of Asano's mission, had been agreeable to him.

Before leaving Kiushu, Asano went also to Higo to convey to Sasa Narimasa, *daimyo* of this province, the news of his disgrace and an order to commit *harakiri*. This, Sasa did forthwith, and Higo was divided between two favourites of Hideyoshi; Kato Kiyomasa got the north, with his residence at Kumamoto, and Konishi Yukinaga the south with his residence at Udo. Moreover the latter was still to exercise suzerainty over the Amakusa isles, (June, 1588). Kato, son of a blacksmith, was born in the village of Nakamura (Owari), the birthplace of Hideyoshi, of whom he was moreover cousin-germain. At the age of 15, he had left his village to follow the fortunes, already growing, of his relative. In the latter's house he encountered a great number of warriors who, like himself of very humble origin, were afterwards to become powerful *daimyo*. To instance only a few: Asano and Ishida were sons of peasants, Fukushima son of a cooper, Todo son of a blacksmith and Hachisuka a bandit. The reader is already aware that Konishi was the son of a druggist. There was a great deal of antipathy between Kato and Konishi, although fate had several times made them companions in arms. When Konishi became a fervent Christian, Kato showed himself to be a zealous Buddhist, and this divergence of religion only served to separate them further from one another.

On accepting the new fief, Konishi had to give up Yunoshima and other islands, which he had till then possessed. This compelled Takayama to quit his retreat and follow his friend into his new domains. He did not remain long, however, in Higo; Hideyoshi, warned of his presence in Konishi's household, sent him an order to leave with his family for Kanazawa and to place himself at the disposition of Maeda Toshiie. Maeda received Takayama into the number of his vassals, and assigned him a revenue of 30,000 *koku*. The *samurai* whom Takayama had formerly under his command at Akashi, followed him for the most part to Kanazawa.

(2) Nihon Gwaishi, and the Taikoki.

From the beginning Konishi had difficulties with John Amakusa, his vassal. The latter refused to contribute to the construction of the fortress of Udo, alleging, as his reason, that he was independent in his isle. Hideyoshi having been informed of this, invited Amakusa to come to explain himself at Kyoto, but as the latter was in no hurry to obey this order, Hideyoshi commanded Konishi and Kato to exterminate him together with all his *samurai*. Moreover the *daimyo* of Arima, of the Goto Islands and of Hirado were to lend their assistance in crushing the rebel. The first battle was fought under the walls of the Shiki castle, which place was taken after a desperate struggle. (December, 1589). Immediately the allies proceeded to Hondo, the principal fortress of those isles, and laid siege to it. Amakusa armed as many as 300 women, the wives of *samurai*, and made them fight at their husbands' sides. But despite this extraordinary courage, Amakusa was overwhelmed by numbers. After a struggle which lasted five days, he surrendered to Konishi. The latter reproached him severely for his disobedience to Hideyoshi, but left him his life, and even the castle of Hondo. In this connection Japanese history employs falsely its usual stereotyped story, which may be summed up in these terms: "Amakusa, seeing that all was lost, massacred his wife and his children and committed *harakiri* with his *kerai*." (3) Amakusa must then have recovered from his *harakiri*, for the reader will see him appear several times, in the sequel, as a vassal of Konishi. In the other castles of these isles, such as Shiki, Sumoto, Oyano and Kozura, Konishi also placed Christian governors, chosen by himself.

Thus, all bowed little by little before Hideyoshi, whom events had made the arbiter of Japan. Some *daimyo* in the north alone persisted in refusing him tribute. Among these was Hojo Ujimasa, *daimyo* of Odawara, and whose power extended over the eight provinces, designated under the name of Kwanto. As Hojo did not wish even to pay a visit to the ex-wood-cutter, the latter became angry, and in the month of April 1590, he conducted in person an expedition against Hojo. Nearly all the *daimyo* in Japan accompanied Hideyoshi in that war. Date Masamune, *daimyo* of Sendai, a little suspected of longing for independence, hastened also to pay homage to the master of Japan. Hideyoshi, understanding that Date had come, half as a spy, half because he was forced to come, conducted him to the heights of Hakone, whence they could see all the army camped in the plain of Odawara. Then striking him on the shoulder, he told him with a laugh that one day that immense army would invade his domain. Date was so frightened that, from that moment, he made all the concessions Hideyoshi required of him.

However, in spite of this unheard of deployment of troops, the siege of Odawara lasted three months. Among the warriors who most distinguished themselves during this time, must be mentioned Takayama Ukon. Having come in the train of Maeda, his master, Takayama, encouraged by the latter, tried to make the best of this chance of attracting Hideyoshi's attention and getting himself restored to favour. As Hideyoshi praised much the courageous conduct of Takayama and his *samurai*, it may have been believed for a moment that he would restore him to favour, but Hideyoshi's vanity was too great to allow him to go back on his words.

(TO BE CONTINUED.)

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE BOER GENERALS.

London, Oct. 16.

The Boer Generals have left Paris for Berlin. It is increasingly evident that they are being made catspaws by foreign politicians.

(3) Kiushu-ki, vol. 16.

(4) He did not in reality establish himself at Sendai until several years later.

BANQUET TO MR. BALFOUR.

London, Oct. 17.

The Lord Mayor has given a banquet to Mr. A. J. Balfour at the Mansion House to mark that statesman's accession to the Premiership. There was a distinguished gathering.

An eloquent panegyric on Mr. Balfour was pronounced by Mr. Chamberlain, indicating the latter's unqualified acceptance of Mr. Balfour's leadership.

Mr. Balfour reiterated his inflexible intention to carry the Education Bill.

THE AMERICAN STRIKE.

The American Coal strike is settled.

SCENE IN THE HOUSE OF COMMONS.

The House of Commons was crowded and animated (? at the opening of Parliament.) Mr. Balfour moved the precedence of Government business throughout the session.

After a long debate Mr. Balfour moved the closure, whereupon O'Donnell, who refused to cease speaking, shouted the conclusion of his speech in Mr. Balfour's face, amid tremendous Irish cheers.

ROOSEVELT AND THE STRIKE.

President Roosevelt has gained great political credit by his successful intervention in the coal strike.

BRITISH NAVAL PROMOTIONS.

London, October 18.

Vice-Admiral Seymour has been appointed Principal Naval Aide-de-Camp to the King. Lord Charles Beresford has been promoted Vice-Admiral, and Captain Sir Hedworth Lambton, late of H.M.S. *Powerful*, Rear-Admiral.

BRITISH PARLIAMENT.

Mr. A. J. Balfour's motion has been adopted by the House of Commons by 262 votes to 141.

The discussion on the Education Bill has begun.

THE BOER GENERALS.

The Boer Generals, while speaking in Berlin, emphasized the fact that they were British subjects and not politicians.

"ALL THINGS TO ALL MEN."

London, October 19.

It appears that the Boer Generals when in Holland claimed a hearing by reason of their Dutch affinities; when in France they dwelt upon their Huguenot extraction; they are now talking of the brotherhood of the German races.

BRITISH EDUCATION BILL.

The amendments to the Education Bill amount to 750 and progress is slow.

FRANCE AND THE RELIGIOUS ORDERS.

M. Combes has announced a new Congregations Bill, transferring the execution of the law of 1901 from the Government to the Judiciary.

RUSSIA AND JAPAN.

The *Times* Odessa correspondent learns that negotiations between Russia and Japan with a view to the establishing of extensive trading relations, are nearly concluded, each country making concessions in order to secure a favourable outcome.

M. DE WITTE.

London, October 20.

The Russian Minister of Finance has arrived at Dalny.

CHINA AND THE MURDERED MISSIONARIES.

STRONG STEP BY SIR E. SATOW.

On the 19th inst. the Chinese Emperor received all the diplomatists in Peking except

Sir Ernest Satow, the British Minister, who declines all social intercourse with the Chinese Court on account of the miscarriage of justice with regard to the murdered missionaries in Hunan.

VENEZUELA.

The Venezuelan rebels have been defeated, abandoning their positions, and leaving 1,400 killed and wounded behind them.

THE BOER GENERALS.

The Boer Generals have left Berlin. The officers and officials abstained, by order of the Kaiser, from feting them.

SOMALILAND.

Severe fighting continues in Somaliland.

UNLUCKY ST. VINCENT.

London, October 21.

Eruptions took place on the 15th and 16th inst. and further devastated St. Vincent. The roads and plantations were obliterated by hot sand.

SOMALILAND.

London, October 22.

Four hundred and sixty of the Bombay Grenadiers have been ordered to Somaliland to reinforce Colonel Swayne.

THE EVACUATION OF SHANGHAI.

Sir Ernest Satow is protesting against the German stipulations for the evacuation of Shanghai, which Prince Ching accepted without consulting the other Powers.

SOMALILAND.

London, October 23.

It is reported that Colonel Swayne has lost most of his camels. He is short of provisions, ammunition and water. Native levies of the Fighting Mullah captured two maxims on the 12th of September.

THE AMERICAN STRIKE.

The American Miners Convention has declared the strike ended.

SWAYNE'S EXPEDITION.

Later.

Further native troops are being sent from India to Somaliland, and more are probably going.

THE BOER GENERALS.

Later.

The Boer Generals have arrived in London. It is said that they do not intend to seek an interview with Mr. Chamberlain, who certainly on his part will not take the initiative in asking them.

Dewet sails for South Africa on November 1st.

(RECEIVED AT THE LEGATION OF FRANCE.)

FRENCH POLITICS.

Saigon, October 20.

The Chamber of Deputies has adopted, by 329 votes to 23, an order of the day approving the acts of the Government and expressing confidence.

THE BOER GENERALS.

Generals Botha, Dewet and Delarey have left Paris for Berlin to collect subscriptions.

HANOI EXHIBITION.

Saigon, October 22.

The opening of the Hanoi Exhibition is postponed until the 16th November.

FRENCH POLITICS.

Saigon, October 22.

The Government has handed to the Council of State as "anticoncordataire," a petition addressed to Parliament by the Bishops on the subject of the Congregations.

SOMALILAND.

The English expedition sent into Somali-

land against the Mullah has been obliged to retreat to the Red Sea, after losing two officers and fifty men killed and having about a hundred wounded.

(RECEIVED IN TOKYO.)

VLADIVOSTOCK.

The statement that Vladivostock is to be made a free port is baseless, nor has any intimation been received in official quarters, it is said, as to the abolition of import duties.

(This information disposes of the telegraphic news published by the *Asahi Shimbun* to the effect that goods imported from China were to be admitted without duty as a first step towards making Vladivostock a free port.)

In official quarters all knowledge is denied of any negotiations for a commercial treaty between Japan and Russia.

(This, in turn, disposes of the intelligence sent to *The Times* from Odessa and telegraphed to the East by Reuter.)

FIELD TELEGRAPHS.

The Russian field telegraph office in Newchwang has hitherto received telegrams for Japan, despatching them either by Port Arthur or by Vladivostock. The charges have not been uniform, the rate by Port Arthur being 2 roubles 3 kopeks a word and that by Vladivostock 94 kopeks. Since the 12th of October a uniform system has been introduced, the charge either way being 94 kopeks.

(FROM OUR OWN CORRESPONDENT.)

THE INTERPORT FESTIVAL.

BASEBALL.

Kobe, October 18, 3 p.m.

The second game in the Interport Baseball Match proved another win for Kobe. At the ninth innings, the score stood 19 runs all. A tenth innings was played; Yokohama made one run in it and Kobe two, making the score: Kobe 21, Yokohama, 20.

INTERPORT TENNIS.

Kobe, October 19, 9.50 p.m.

G. C. Murray and H. Hancock, representing Kobe, beat H. W. Kilby and E. Buxton-Forman at tennis this afternoon by 3 sets to 1.

(FROM THE "JIJI SHIMPO.")

SOUTH AMERICAN TROUBLE.

London, Oct. 15.

The seat of Government of Venezuela has been removed to Los Tiques. General Matos, commanding the rebels, has laid siege to President Castro's Camp.

LORD KITCHENER.

Lord Kitchener gave important evidence before a meeting of the South African War Investigation Committee held yesterday. The General will leave London shortly for India to take up the post of Commander-in-Chief.

MR. ZUMOTO.

Mr. Zumoto, editor of the *Japan Times*, delivered a speech relative to the Japanese press at a meeting of the Japan Society last night.

SIR FRANK SWETTENHAM.

Sir Frank Swettenham, Governor of the Straits Settlements, is reported to be again visiting the state of Kelantan in Siam.

THE BRITISH PARLIAMENT.

London, October 16.

Parliament was opened to-day.

JAPANESE BONDS.

Japanese five per cent. bonds are firm on the London market. The bonds recently floated continue to be at a premium.

THE U.S. COAL STRIKE.

The coal strike in America has ended. It has been decided to refer the dispute to arbitration.

SOUTH AMERICAN TROUBLES.

Fighting is still going on at La Victoria. Both sides have lost heavily.

THE RUSSIAN FLEET.

A report from St. Petersburg says that Rear-Admiral Stackelberg (?), in command of a squadron, will leave Kronstadt for the Pacific within this week. The Russian fleet consists of two battle-ships, three cruisers and eight torpedo-boats.

RUSSIA AND TURKEY.

The political attitude recently adopted by Russia towards Turkey is believed to be based on a desire to revive the old treaty of 1833. That treaty provides among other things that whenever the Sultan intends to shut up the Dardanelles from the incursion of other countries Russia agrees to supply Turkey with troops.

LORD BERESFORD.

Rear-Admiral Lord Beresford has been raised to the rank of Vice-Admiral.

SOUTH AMERICAN TROUBLE.

Fighting at La Victoria has re-commenced. reinforcements have arrived on both sides. The foreign war-ships have blockaded Tucacas and Ciudad Bolivar.

THE FRENCH NAVY.

London, October 18.

M. Pelletan, French Minister of Marine has postponed the construction of 15 submarine boats.

SOUTH AMERICAN TROUBLES.

The United States Representative in Caracas thinks that the army under President Castro has attacked the British and German war-ships. Provisions in Tucacas have been exhausted.

HAYTI AFFAIR.

The war in Hayti has ended. General Firmin, has fled.

RUSSIA AND TURKEY.

Russia is giving advice to Turkey with regard to the attitude of the Macedonians.

THE JAPANESE BONDS.

London, Oct. 20.

The new five per cent. Japanese bonds are at a premium of $\frac{7}{8}$ ths, showing an indication of still rising further.

RUSSIA AND CENTRAL ASIA.

The Turkistan *Official Gazette* states that Russia's attitude in prohibiting travellers in Kuskh, Amutharia and the neighbourhood was apparently intended to keep secret her actions on the boundaries of Afghanistan.

SOUTH AMERICAN TROUBLES.

In the battle fought at La Victoria the rebels are reported to have been defeated with a loss of 1,402 men. Another report says that the rebel army is still laying siege to President Castro's army which declines an engagement.

SOMALILAND.

London, Oct. 21.

The British expedition under Colonel Swayne having been defeated in Somaliland, a strong detachment is about to start thither from India to reinforce the Colonel's force. The British side lost 150 men and two Maxim guns. The scene of the engagement is in the mountainous region, 300 miles to the south-east of Berbera. To-day 500 troops were dispatched from Aden to Berbera. The Chief of the natives in Somaliland is said to have 30,000 men in command.

VISCOUNT CRANBONE.

Viscount Cranbone, Under Secretary of the Foreign Affairs, speaking in the House of Commons, said that England had rejected a proposal of Russia, which asked Great Britain for permission to open direct negotiations with Afghanistan.

(FROM THE "JAPAN HERALD.")

RUSSIA AND TURKEY.

London, Oct. 17.

The *Daily Mail* Bucharest correspondent positively states that Russia has offered to Turkey a revival of the Unkiar-Skelessi Treaty.

The correspondent adds that diplomatists attribute the recrudescence of Russian activity in the Near East to the Anglo-Japanese Treaty, which nullifies Russian expansion in the Far East.

GERMAN EXPANSION.
The German Colonial Congress at Berlin has attracted considerable attention in Russia.

The *Novoe Vremya*, discussing a speech at Congress made by Baron Richthofen, Secretary of State for Foreign Affairs, says that if Berlin statesmen begin to speak of sharing the economic mastery of the world they need reminding that German activity dares not extend itself to regions naturally and historically regarded as spheres of gravitation of the other Powers.

RUSSIAN NAVAL BUDGET.
London, October 18.
Russia's Naval Budget for 1903 totals £11,500,000. This includes £451,550 for the construction of Port Arthur; and £350,000 for enlarging Vladivostok Harbour.

AMERICAN COAL STRIKE.
Many thousand strikers in America are preparing to resume work to-morrow.

MURDER OF MISSIONARIES IN CHINA.
London, October 2.
The *Standard* comments approvingly on Sir Ernest Satow's vigorous defence of British interests in connection with the Chengchu-fu murders.

The London paper says that the vital principle involved is the punishment of the Chenchu-fu mandarins, and adds that though another quarrel with the Chinese Government would be regrettable, Sir Ernest Satow is bound to exact the fullest reparation for the crime and the insulting levity with which the crime has been treated.

(FROM THE "N.-C. DAILY NEWS.")
FATAL COLLISION IN THE ENGLISH CHANNEL.

London via Bombay, October 11.
In the English Channel on Wednesday last the Norddeutscher Lloyd liner *Kronprinz Wilhelm* sank an English steamer, two of whose crew were drowned.

PURSUIT OF THE MAD MULLAH.
London via Bombay, October 12.
Active operations have been resumed in Somaliland. Colonel Swayne has captured 5,000 camels and 10,000 sheep in the Haud country.

ACCIDENT TO GORDON'S STATUE.
London, October 13.
The steamer *Cedardene*, conveying the bronze statue of General Gordon to be erected at Khartoum, has been sunk by collision in the Thames. She has since been refloated, and the statue is to be transferred to the *Lesbian*.

MINING CONCESSIONS IN SZECHUAN.
London via Bombay, October 14.
Petroleum, coal, and iron concession covering sixteen countries in Szechuan have been granted to separate French and English companies.

THE CZAREWITCH.
London via Bombay, October 16.
The following is the result of the Czarewitch, run at Newmarket on the 15th inst:—

Mr. J. Buchanan's b.c. Black Stand by Melanion—Sanda.....	1
Mr. H. Lindemere's b.f. Congratulation by Matchmaker—Foto.....	2
Mr. ———'s ch. c. Rightful by Rightaway—Repletion	3

MORE TURKISH AMENITIES.
It is announced at Sofia that six hundred women, children, and old men have crossed the frontier to Dubnitsa fleeing from the Turks, who have burned four Christian villages and massacred the inhabitants of another.

LATEST SHIPPING.

Brown Canton	6.00 to 6.60
White Java and Penang	6.50 to 7.30
White Refined	8.40 to 10.40

EXPORTS.

RAW SILK.

After a quiet period sellers of Raw Silk reduced their quotations for some lines, and this has brought about a resumption of buying, especially for America, on the basis of our quotations, settlements during the last two days being particularly heavy. The market has naturally hardened under this influence, but probably there will be no farther rise at the moment.

QUOTATIONS.

Filatures—Extra Best, Coarse	Y. 1,080 to 1,100
Filatures—Extra, Fine	—
Filatures—Extra, Coarse	1,040 to 1,050
Filatures—No. 1, Fine	—

BUSINESS OPPORTUNITIES.

AN American Manufacturer of Sporting Goods, such as Sweaters, Bathing Suits, Golf Suits, Shooting Blouses, Turners' Suits, Tights, etc., which are finding a very large market all over the world, would like to engage sole representatives for the larger cities in Japan.

October 25th, 1902:

14ins.

BOVRIL ISN'T DEAR

in fact, value for value, it is one of the cheapest drinks, and one of the most economical foods that can be obtained. A cup of hot Bovril costs less than a drink of whisky, and while giving a more genuine and lasting warmth than the latter, contains, in addition, the nutritive principles of beef worth many times its cost.

Old fashioned beef teas and meet extracts, whether known as such, or disguised under more pretentious modern names contain none of the NUTRITIVE properties of beef. Baron Liebig himself admitted this fact; there is not a doctor to-day disputes it. Used as a nourishment Meat Extract is probably the most expensive article one can buy. Bovril one of the cheapest.

MELLIN'S FOOD

For INFANTS and INVALIDS.

When prepared is similar to Breast Milk.

MELLIN'S FOOD WORKS, PECKHAM, LONDON, ENGLAND.

TRUE HAIR GROWER

When I was bald I came into possession of the secret of a genuine hairgrower. My hair grew to its present length in about 40 days. Hundreds of other similar cases. I am selling the marvelous preparation. To introduce it I will post you a trial box in sealed plain parcel for only 4 stamps. Try it, as I did, and convince yourself. Address:—
JOHN CRAVEN-BURLEIGH,
110, St. Martin's Lane, London, W.C.

September 27th, 1902.

26ins.

Yokohama Charity Organization.

CLOTHING for the Poor is constantly in demand, and may be sent to the Hon. Secretary, to whom also all APPLICATIONS FOR RELIEF should be referred. The names of New Subscribers will be at all times gladly received by Messrs. JAS. DODDS, J. C. HARTLAND, B. C. HOWARD, JAS. MARTIN, or W. F. MITCHELL.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 1ST, 1902.

BIRTH.

On October 31st, at 172, Yamashitacho, Yokohama, the wife of ERNEST MILES HOBART-HAMPDEN, of a Son.

MARRIAGE.

At H.B.M.'s Consulate, Yokohama, at 11 a.m. on the 28th inst., before E. M. Hobart-Hampden Esq., Acting Consul, GERTRUDE, eldest daughter of the late J. Mendelson, Esq., of Yokohama, to BERTHAN ROBERT BERRICK, only son of L. Berrick, Esq., of London, England.

DEATHS.

At the General Hospital, Yokohama, on Oct. 26th, JOHN WERN, a Danish subject.

Died on September 14th 1902, at his residence No. 86 Rue de Lille, Paris, Count OLRV DE LABRY, aged 75.

SUMMARY OF NEWS.

A RECEPTION was given on board the cruiser *Akashi Kan* on Oct. 22nd to mark her undocking from the Kawasaki Dockyard.

It is announced that the Emperor will witness the usual review to take place at the Aoyama parade ground on Nov. 3rd, leaving the Palace at 8.30 a.m.

A CUP presented by Mr. F. J. Bardens to the K.C.C., to be awarded for the best fielding form shown during the season, has now been given to Mr. Walter Braess, who, in the opinion

of the majority of the interport eleven, has proved himself most worthy of the award.

THE Danish Landsting has rejected the treaty whereby the Danish possessions in the West Indies would be ceded to the United States of America.

A KOBE report says that on Oct. 27th the Kobe City Authorities redeemed Water-works loan bonds to the extent of yen 34,200 by means of a lottery.

TRAFFIC on the Zuso Jinsha Tetsudo between Odawara and Atami, was re-opened on Oct. 28th. The line suffered much damage in the recent Odawara catastrophe.

THE Japanese torpedo-boat destroyer *Asashio*, now on her way from England, arrived at Hongkong on Oct. 26th. She is expected to arrive at Yokosuka early next month.

CAPTAIN HOGG, of the *Hyson*, has been presented by the German Emperor with a telescope, in recognition of his success in taking horses from Australia to the north of China.

THE London correspondent of the *Calcutta Standard* makes the announcement that Dr. Leyds has been appointed a Judge in the Dutch East Indies, and leaves Europe immediately.

TRAFFIC at Fujisawa Station, on the Tokaido, was temporarily interrupted on the afternoon of Oct. 25th in consequence of damage to the locomotive attached to a goods train from Kobe.

MR. S. ISHII, editor of the *Seikyo Shimbum*, a paper published in Kanazawa, and one of the members of his staff are reported to have been arrested in that town on Oct. 27th on a charge of blackmailing.

MR. MURDOCH, the managing partner of a firm of Rangoon chemists, has been fined Rs. 1,000, or in default of payment, three months' rigorous imprisonment, for selling five tolas of morphia to a Chinaman.

In the Supreme Court at Hongkong on the 13th inst. the Colonial Treasurer obtained a judgment for \$74,760 and costs against a Chinese nuisance contractor who had abandoned his contract.

PERMISSION was given a few days ago by the Kanagawa Prefectural Authorities to three German residents of Yokohama, owners of the yacht *Wanderer*, to sail from Joga-shima to Suno-saki in Tokyo Bay for a week commencing Oct. 24th.

ABOUT yen 43,000 is required for re-building the Red Bridge at Nikko, destroyed during the storm of Sept. 28th. An association called the Hoko-hai, which is in charge of the undertaking, has applied to the Home Office for grants-in-aid.

ON Nov. 1st bicycle races for the benefit of sufferers from the recent Odawara catastrophe will take place on the training ground near Maganecho, Yokohama, under the auspices of the Yokohama Rinyu Doshi-kai, a cyclists club in this port.

MR. MIYAGI YASABURO, editor of the *Jitsugyo Jiho*, a weekly magazine published in Tokyo, and one of the members of his staff, were arrested on Oct. 25th on a warrant issued by the Tokyo Chihō Saibansho. They are accused of blackmailing.

A LIGHTER laden with about 400 bales of marine products capsized in Yokohama harbour on the afternoon of Oct. 26th when the boat was coming ashore from the steamer *Sakura Maru* of the

N.Y.K. As a result, the goods were all lost. They were valued at about yen 40,000. The *Sakura Maru* arrived in Yokohama early the same morning from Hokkaido.

A CHANGE has been made in the date for the opening performance of "Confusion." The Yokohama A.D.C. have found it to be more convenient to open their season on Wednesday the 12th November.

THE N. Y. K. steamer *Inaba Maru*, with General Baron Oku and party on board, left Moji on Oct. 24th for Colombo, whence the party will proceed to India to attend the coming Coronation festivities there.

TWENTY-FIVE *jinrikisha* coolies in the vicinity of the Yokohama Pier were taken to the Kagacho Police Station on Oct. 27th and ordered to pay fines of from 50 sen to 10 sen on account of having forced American sailors to ride in their vehicles.

THE Emperor will leave Shimbashi on Nov. 6th by the 7 a.m. special train for Kumamoto, via Nagoya, Maiko and Chofu, arriving at his destination on the 9th. The manoeuvres commence early next month in the northern part of Kyushu.

FORTY young Japanese who received their education in America have founded in Yokohama an association called the American Kyo-kwai. The inaugural dinner was given on Thursday week, when the guests of the Association were Mr. E. C. Bellows, U.S. Consul-General, and Mr. G. H. Scidmore. Mr. Bellows made a most interesting speech in the course of the evening.

MR. HERMAN HEYDRICH, the new professor of the piano at the Imperial Academy of Music in Tokyo, has, in accordance with the general desire of his friends, decided to give a Piano-Recital at the Public Hall on Saturday evening, November 22nd. Mr. Heydrich, who will stay in Japan only temporarily, comes from England, where he has won for himself a great reputation as a solo-player.

It is reported that the steamer *Indrapura* from Portland, Ore., on Saturday sighted and spoke a barque off Inuboye with only her mizzen-mast standing. The barque did not desire aid from the steamer but asked that assistance should be sent. Arrangements were initiated to despatch the N.Y.K. steamer *Yeiyo Maru*, but eventually a tug of the Dock Co. was sent.

WE learn that rewards have been given by the Nippon Yusen Kaisha to those concerned in the rescue of nine sendoes during the recent typhoon. To Mr. C. F. Garry yen 75 has been presented and to Messrs. Sekini and Takamatsu yen 50 each. The same party, it may be remembered, assisted the steamer *Khalif* on that occasion, which action will doubtless be taken notice of by the underwriters.

ON Oct. 25th, a meeting of tea merchants throughout the country was convened at Shizuoka for the purpose of discussing the future of the business. Among those present were Messrs. Otani Kahei, Yamamoto Kametaro, Aizawa Kihei and others. After a good deal of discussion it was resolved to appoint a committee, including Mr. K. Otani, to draw up regulations relative to a syndicate, which is to be organized with a view to expanding the business. The following establishments have already consented to join the proposed body:—The Nippon Seicha Kaisha, of Yokohama, the Nippon Seicha Yushitsu Kaisha, of Kobe, several tea refining companies of Shizuoka Prefecture, and various other concerns in western Japan.

THE YANGTSE QUESTION.

Monday, Oct. 27.

It appears from the telegrams that not only has the Chinese Government refrained from taking any action with regard to the high officials responsible for the Hunan murders, but also the Governor of the province, in a communication to the Throne on the subject, employed the familiar offensive epithet "barbarian" to designate foreigners. Sir Ernest Satow is naturally much incensed and has refused to hold any personal intercourse whatever with the Foreign Office in Peking until the matter is settled. Doubtless by this time the four men-of-war destined for Hankow are assembled at Wuchang, where they are to await the arrival of the Admiral, who was in Japan at the time of Sir Ernest Satow's request for naval assistance.

Of course this complication is not without effect on the general problem of the Yangtse Valley. A telegram to the *Asahi Shimbun* from Peking says that Germany has taken advantage of the occasion to formulate, with regard to the evacuation of Shanghai, conditions which would completely obliterate all traces of England's sphere of influence in the Yangtse Valley. The Tokyo paper's correspondent explains that Germany has induced France to join her in this manœuvre, and that she is primarily influenced by the resentment provoked in consequence of her failure to include Chili in her own sphere of influence; failure due to British interference. We may supplement this telegram by observing that the world now for the first time hears of Germany's alleged designs upon Chili, though it is possible they were entertained in the sequel of the prominent part acted by her troops under Count von Waldersee. There can be no doubt, however, that the conditions proposed by her for the evacuation of Shanghai represent a deliberate attempt to destroy Great Britain's nominally paramount influence in the Yangtse Valley. The *Asahi's* correspondent further says that South Africa being now off her hands, England shows no sign whatever of conceding anything to Germany, and that the evacuation of Shanghai is now indefinitely postponed.

Berlin journals, according to telegrams received by the *Asahi Shimbun* and the *Fiji Shimpō*, are endeavouring to prove that because England hesitates to subscribe the conditions formulated by Germany and France, the British Government is influenced by some design of obtaining for itself special privileges in the Yangtse Valley. Recent experiences have taught us that in the present mood of the German people towards Great Britain, it is idle to look for anything resembling judicial opinions in Berlin journals. But if the telegrams referred to above be accurate, we are in the presence of an almost farcical display of bias. No German journalist can labour under the smallest misapprehension in this matter. He must know quite well that what England objects to is not an arrangement guaranteeing the integrity of the Yangtse Valley and the preservation of the open door there, since these are the declared bases not only of England's general policy, but also of her compacts with Germany and Japan. He must know quite well that what she objects to is the undisguised hostility of Germany and France, which two Powers, having hitherto professed to work hand in hand with her for the settlement of the China problem, have now deliberately thrown her over and

attempted to conclude with the Peking Government an arrangement unequivocally ousting Great Britain from the position of acknowledged influence hitherto held by her in the Yangtse Valley. It is of no avail to pretend that Great Britain cavils at the Franco-German conditions themselves, except in so far as they apply to the Yangtse Valley alone. Reasoning so shallow can not deceive any one. All Englishmen want to live at peace with Germany whom they admire and in whose ambitions they recognise familiar sentiments. But the amicable desire of British subjects is receiving some rude shocks.

Tuesday, Oct. 28.

Doubtless owing to the fact that a holiday intervened, the press of Tokyo does not yet speak with any volume of sound about Franco-German procedure in the Yangtse Valley. The *Asahi Shimbun* alone discusses the matter. Naturally it bases its argument on the salient points that the four Powers garrisoned Shanghai conjointly for the purpose of protecting the place against a danger which threatened all alike, and that it is out of the question to agree that two of the four should make special conditions for the withdrawal of their garrison. Our contemporary writes strongly but not intemperately. It contends that Japan is just as much interested in this question as England. It charges both Powers with want of sufficient care in allowing such a crisis to arise, and it regrets the flagrantly mistaken policy pursued by China.

Certainly this Yangtse question does not improve by scrutiny. The action of France and Germany is plainly directed against England. There already exists a pledge given by China to Great Britain that no part of the Yangtse Valley shall be alienated. Why should Germany and France demand the repetition of such a pledge at their own dictation? Above all, why should they demand it independently of Japan and England and without the knowledge of either Power? Such procedure seems to promise two results. The first is a palpable access of international jealousy in the Far East. Germany and France, by this action, have made it plain that they attach no value to the coöperative policy pursued in 1900, and that they intend to work independently of, and even in opposition to, England and Japan whenever occasion offers. It can not be said that such an attitude makes for the cause of peace. The second result is that Shanghai will not be evacuated. Of course Great Britain and Japan can not for a moment consent to withdraw their troops in deference to a Franco-German arrangement made without consulting them. That would be a degree of self-effacement such as neither Power could seriously contemplate. It would also be farcical from the point of view of relative material interests. The Governments of Berlin and Paris must be perfectly cognisant that such a result is inevitable. They knew quite well when they submitted their proposal to Prince Ching that its acceptance would relegate to the Greek Kalends the withdrawal of Shanghai's foreign garrison. It is upon their shoulders primarily that the responsibility rests, and we can not insult their intelligence by supposing that their choice was not deliberately made. But what shall be said of Chinese statesmanship? Can anything more hopelessly incompetent be conceived?

The curious thing is that this Franco-German condition should be imposed at the very moment when England is sending ships of war up the Yangtse to exact reparation for the murder of two missionaries. Does

Germany apprehend a Kiaochow episode in the Yangtse Valley? Is it her object to prevent other Powers from following her own example? We very much wish that this *welt-politik* could be pursued by methods which did not invite so much criticism.

Thursday, Oct. 30.

Sir Ernest Satow was for a moment thought fortunate in having turned his face towards Peking before the house-tax question in Japan entered an acute phase—indeed, for the matter of that, it need never have entered an acute phase at all—but the complications that awaited him at his new post throw the house tax completely into the shade. The latest news is that he has conveyed a species of ultimatum to the Chinese Government, in the sense that unless immediate steps be taken to punish the officials charged with negligence in connexion with the Shinchou murders, Great Britain will take the matter into her own hands. It is further stated by the *Fiji Shimpō's* correspondent that Sir Ernest was to have given an entertainment to Chinese Princes and high officials on the 29th instant, but that, in consideration of the strained relations now existing between the two Powers, he has made a postponement.

Meanwhile Admiral Bridge has hastened to China. He touched at Nagasaki in the *Glory* on the 27th instant, and proceeded at once to Shanghai. The *Glory* was to have come to Yokohama for the King's Birthday it is said, but the Admiral is more likely to find himself at Hankow, according to present appearances. We entertain no doubt that the Chinese authorities will not push this matter to an open rupture. They can not afford to do so. Neither will England easily permit herself to employ force. The probable result would be a serious disturbance of the peace of the Yangtse Valley, and what the Yangtse Valley can be when mob mania takes possession of the inhabitants, 1891 demonstrated. Things have changed since 1891. A new method is employed by competitive foreign States in assessing the collateral value of a Chinese riot. Anything like a repetition of the 1891 drama would lead to momentous results.

LEGAL DELAYS.

The Tokyo Chamber of Commerce's proposed remedy for legal delays in mercantile matters is the organization of a special tribunal, to be called the *Shoji Saiban* (Commercial Affairs Court). There would be three judges, the qualifications of a judge being that he has served at least five years in that capacity, or as a barrister, and that he is over forty years of age. Associated with the judges would be two *baishin-in*, chosen from among the members of a Chamber of Commerce. They must have been engaged in trade for at least five years, and must be payers of direct national taxes to the amount of 50 *yen* annually in Tokyo and Osaka and 20 *yen* elsewhere. These associate judges would not be allowed to vote as to the final decision of the Court. They would merely express opinions for the guidance of the tribunal in practical matters. But where a case was to be arbitrated they would have an equal voice with the judges. It is not quite clear how the *baishin-in* would be appointed; apparently by election with the subsequent approval of the Minister of State for Justice. A right of appeal to higher tribunals would, of course, be enjoyed by litigants in this Court. With certain exceptions, however. Thus the

litigants might agree beforehand to abide by the Court's decision without carrying the case any further. Again, all suits where the plaintiff's claim did not exceed 300 *yen*, interest excluded, and all suits in which claim and counter-claim did not aggregate more than 500 *yen*, would be finally and conclusively dealt with by the *Shoji Saiban*. In localities where a Chamber of Commerce does not exist, there would devolve upon the Minister of State for Justice the duty of selecting suitable persons to discharge the functions of *baishin-in*. A limit of time would also be fixed; namely, that within three days from the lodging of a suit, notice must be served on the defendant; and that within two weeks of the serving of such notice, the case must be tried. Moreover every document bearing on the case, and an exhaustive statement of the evidence to be adduced must be presented to the Court by the day previous to the opening of the trial. This provision would materially shorten proceedings, for a chief cause of delay under the present system is that innumerable postponements take place for the purpose of presenting new evidence or fresh pleadings. In the event of either party's failure to appear, the costs to be borne by the defaulting side would be largely increased. At present the charge in such a case is 50 *sen* daily for each person actually attending the Court, together with incidental expenses. But the idea of the Tokyo Chamber of Commerce is that the sum paid to a man should be adapted to his station in life. Another proposed change is that instead of summoning all the witnesses in the forenoon and keeping them waiting until their time of examination, some should be summoned in the afternoon. Within a week after pronouncing judgment a written copy of it would have to be delivered to both parties—an important point because it is from the date of receipt of the written judgment that the period for lodging an appeal begins to count. Further, within two weeks—the present time is 30 days—from the receipt of the judgment, a decision as to appeal must be taken; and during the progress of the trial there must be no postponement exceeding two weeks, except in special cases. As to the arbitral functions assumable by this *Shoji Saiban*, they would naturally be exercised at the request of the parties. But the *baishin-in* would also be entitled to suggest that arbitration would suit the circumstances of a case better than judicial examination.

The draft of the above proposals is to be considered at an extraordinary meeting of the Tokyo Chamber to-day, 27th inst. It is expected that the projected tribunal will meet with the approval of the foreign Chamber in Yokohama.

THE STORY ABOUT GERMAN SOLDIERS IN JAPAN.

On the 20th instant we translated from the columns of the *Jimmin* a circumstantial statement professing to be an accurate account of riotous conduct on the part of five German soldiers travelling by train from Kobe to Yokohama. The men were said to have behaved with violent rudeness to Japanese passengers, driving them all out of the carriage and even going so far as to assault a woman. Of course the names of the soldiers who thus journeyed by rail to Yokohama were easily ascertainable by the German Authorities. Accordingly, on the 23rd instant, Dr. Mansfield, Staff-Surgeon in charge of the

Military Hospital at Honmoku, having investigated the matter, addressed to us a letter showing that the *Jimmin's* paragraph had been compiled from wholly false information, and that the German soldiers, so far from molesting Japanese fellow-travellers or expelling them from the carriage, had fraternised with them, given them a share of their provisions, and performed the journey under circumstances of the pleasantest amity. Since the publication of Dr. Mansfield's letter we have daily searched the columns of the *Jimmin* for some corresponding correction of its erroneous paragraph, but nothing in that sense has yet appeared. Doubtless the matter has escaped our contemporary's attention, for the *Jimmin* is certainly not a journal which would wittingly mislead its readers or cast an undeserved reproach upon the reputation of foreigners in Japan. We therefore suggest to our contemporary that it should re-produce Dr. Mansfield's letter, and we suggest to Dr. Mansfield that in exercise of the right belonging to him under Japanese law, he should ask for the publication of his contradiction. A paragraph like that which appeared in the *Jimmin* on the 18th instant, works much mischief if left uncorrected.

PRIVATE THEATRICALS AT THE UNITED STATES LEGATION.

The United States Legation in Tokyo has always been palpably out of proportion with the hospitality exercised by the present Minister and Mrs. Buck. America's policy of not owning real estate in any foreign country—a policy which now wears a farcical aspect—has resulted in rendering her conspicuous among the Great Powers for the shabby character of the building occupied by her Representative in the Japanese capital. It makes an Anglo-Saxon feel bad to see the Stars and Stripes float over such an edifice, above all when Powers like Russia, and even Austria-Hungary, which have no interests comparable with those of the United States in Japan, provide for their Ministers handsome and substantial structures. The defects of the American building were more than ever apparent on the evening of the 24th, when a performance of private theatricals took place there in the interests of the Tokyo Lending Library. It was found necessary to completely denude of furniture the principal reception room and the dining salon, so as to convert them both into a theatre, and although the hospitality of Colonel and Mrs. Buck did not shrink from this sacrifice, no ingenuity of arrangement could remove all the inherent defects and disadvantages. Accommodation was with difficulty provided for 200 persons, and it need scarcely be said that every available seat was occupied. Rachel Baker's two-act comedy of "Mr. Bob" was the choice made by the amateurs. It is a comedy of errors from first to last, the basis being a spinster infatuated about cats, whose maid-servant is attacked by a mania for the theatre and the ballet; while her niece's most intimate lady-friend goes by the name of "Bob." The niece's cousin, a medical student, much addicted to yachting, imagines "Bob" to be a man; and a solicitor's clerk who arrives, carrying a missing codicil, is mistaken successively for "Bob," for an architect engaged to build a cat's dormitory, and for a "pal" of the medical student. The whole series of incidents are wildly incredible but thoroughly funny, and considering the inevitably restricted dimensions of the stage and the general difficulties

under which the piece was produced, success may be said to have attended it. Miss Aoki, being the only one of the cast who had previously appeared on the Tokyo stage, may be mentioned first, and indeed we are not sure that the honour does not belong to her for dramatic reasons. She took the part of "Catherine Rogers," niece of the cat-loving spinster, and she brought to it all the sweet naturalness and pretty graces that we have learned to associate with her acting. Her friend "Bob," a comparatively unimportant role, found in Miss Evans a representative who would have invested any part with attractions, and Mrs. Marsh, as "Rebecca Luke," achieved the exceptional success of making the audience identify her absolutely with the character she personified. "Patty" (Miss Kimball), the stage-struck maid, has great dramatic power. Her rapid changes of mood, her exceptional mobility of feature and her gifts of elocution are qualities of a rare order, but it seemed at times as though they were concentrated to excess upon the role of "Miss Rebecca's Maid." Among the gentlemen, a sincerely appreciative tribute is due to Mr. Welbourn who acted "Robert Brown," the solicitor's clerk. Any suspicion of failure here would have wrecked the piece, but Mr. Welbourn's conception was artistically true, and without ever allowing himself to be betrayed into exaggeration, the besetting sin of amateur actors, he made humorous and amusing a rôle which might easily have been insipid and even tiresome. It is to be hoped that he may be induced to aid hereafter in the charitable performances at the Shorei-kai. Mr. Sperry did "Jenkins the butler," and did it really well, while the breezy medico, "Philip Royson" appeared to find a congenial representative in Dr. Mechlenburg. By way of prelude, Miss Parrish played a pianoforte piece with much skill, and between the acts the audience had the great pleasure of hearing Mrs. Cowen's fine voice. Refreshments were served at the close, and the party broke up at eleven o'clock after a highly enjoyable evening.

MR. DE WITTE.

The Russian Minister of Finance has written to Count Matsukata saying that it will be impossible for him to visit Japan on the present occasion as his presence is required in St. Petersburg by the Tsar at an early date. The Minister's chief object in coming east seems to have been to inspect Vladivostock and Dalny. The inhabitants of Vladivostock are said to have petitioned that the place should be made a commercial port, and that certain facilities should be given to importers. At Dalny it was pointed out to the Minister that since the construction of a break-water the port has become more liable to freeze in winter, and that an expenditure of several millions of roubles will be necessitated on that account. The breakwater in question stretches parallel to the shore. At its eastern extremity an opening is left for access to the harbour, and from the southern end of the opening a dam extends to the shore. Naturally the water inside these structures would freeze more easily than if the sea were at liberty to beat in without obstruction. It is not stated what answers Mr. de Witte gave to these representations either at Vladivostock or at Dalny.

RUSSIA IN THE FAR EAST.

Major Yamanashi, who has just returned from travelling in Siberia, says that Russia appears to be massing her troops in the eastern parts of that region but not in the western. He further states that, according to rumour, the forces withdrawn from Manchuria are stationed along the Siberian frontier or in places where they attract no attention. That is in accord with the news sent to London by the Peking correspondent of *The Times*. It is also in accord with the predictions of many publicists, who foretold that the evacuation would be more apparent than real. And, we may add, it is in accord with the nature of things. For no one can suppose that Russia has really loosened her grasp of Manchuria. What she has done is merely to refrain from provoking unnecessary resistance. Her whole history indicates unvarying pursuit of the same policy—never to waste strength on the destruction of obstacles which time may be trusted to remove without any exhibition of force. To have maintained in Manchuria the conspicuously prominent position won by her there in 1900 must have provoked trouble with Japan and England, to say nothing of China. She did not want trouble and she could afford to wait for Manchuria. So she retired, or rather made a show of retiring. It would be folly to expect on Russia's part a line of conduct which no other Power would adopt under the same circumstances. If she has relieved Manchuria from the immediate pressure of her hand, she will take very good care to keep the big region within reach of her outstretched arm.

There is said to be a rumour persistently current in Seoul that the Russian Representative has approached Mr. Cho Pyong-sik, now Minister of Foreign Affairs, with a proposal that Korea should give a guarantee against alienating any part of her territory, or granting exceptional privileges to any foreign Power—other than such privileges as have already been granted—, within an area of 80 leagues' radius around Fusan. The conditions of the proposed engagement are explicitly quoted, but their gist will suffice for our readers, pending confirmation, if, indeed, confirmation be forthcoming. It is distinctly stated in the document that anything like the establishment of a naval depot is to be included in the interdicted privileges.

Promises of this nature always remind us of Mr. Snodgrass' entreaty to Mr. Pickwick that the latter would keep himself from sinking in the pond, a feat which, as Dickens observes, Mr. Pickwick was not likely to perform for the sake of anyone else if he did not perform it for his own sake. The plain truth is that these promises of non-alienation of territory and so forth, mean exactly the opposite of what they profess to mean. The purpose of such a proposal as that now said to have been made about the Fusan district, would be, not to preserve the district to Korea, but to prepare the way for compelling her to strip herself of some other part of her territory in the event of failure to retain Fusan intact. Nothing could illustrate more forcibly the political blindness of a Far Eastern State than its consent to one of these propositions so ingenuously advanced by Western Powers. Suppose, for example, that the Peking Government agreed—as it is said to be willing to agree—that the Franco-German programme about the Yangtse Valley should become a matter of international pledge. Would the Yangtse Valley's integrity be

a whit more secure than it is without such a pledge? Not a whit. The sole result of China's promise would be that if she broke it in favour of any foreign Power, she would be compelled to compensate the other Powers, which held her promise. The States of the West do not want to fight with each other in the Far East. That is what they desire to avoid by all means. Therefore they are determined not to acknowledge any mutual responsibility for one another's aggressions. On the shoulders of China or Korea alone, as the case may be, the whole responsibility is to devolve. If China or Korea fail to repel aggression on the part of *A*, then *B*, *C* and *D* must be allowed to make corresponding aggression on their own account at the expense of Korea and China. They will not fight with *A*, or attempt to deprive *A* of his gains, legitimate or illegitimate. They will limit themselves to saying to China or Korea, "You have broken your pledge to us, and you must now make to us also concessions at least equivalent to those you have made to *A* in violation of your engagement." Yet it appears that the Governments of Peking and Seoul are sufficiently blind to run their heads deliberately into this halter.

Professor Tomizu was recently despatched officially to visit Manchuria and compile a report on the state of affairs there. News of his doings now comes to the *Hochi Shimbun* and the *Nichi Nichi Shimbun* from Shanghai and Peking. He speaks in very strong terms of the almost insuperable obstacles placed by the Russian Authorities in the path of any Japanese subject attempting to enter Manchuria, and he further declares that Japanese who have succeeded in entering are treated with the utmost severity, being haled before a penal tribunal on the most trivial pretexts, and altogether so oppressed that the transaction of business by them is practically impossible. It is plain, he says, that Russia is determined not to admit any Japanese to Manchuria until she has completed her various plans and preparations for the absorption of the region. In short, so far as Manchuria is concerned, she places herself above China's head, and usurps the power of closing to Japanese commerce and intercourse a country which has been explicitly opened to both by treaty with the Chinese empire. Referring to Russian soldiers, Professor Tomizu alleges that they will not speak a word of English, since they regard it as the language of their enemies, and that, contrary to what might be expected, they are quite ignorant of French, the language of their allies.

Something of what Professor Tomizu says must be discounted on account of his well known political views. He is one of the Japanese that regard an armed struggle with Russia as inevitable, and would begin it as soon as possible, since Japan could enter the lists at present under more favourable circumstances than she can anticipate a few years hence.

LAND SALES AT DALNY.

It appears that there has been some question as to allowing Japanese subjects to purchase land at Dalny. When the Russian Consul at Newchwang was asked about the matter originally, he is said to have replied that the permission could not be given, inasmuch as Japan does not reciprocate, foreigners not being allowed to own land within her dominion. But ultimately this

objection has been withdrawn. How it could have been maintained we do not see. For Dalny is not Russian territory. Russia has only leased the place from China. By what right the Russian Authorities now undertake to sell to foreigners the fee-simple of lands of which they themselves are only tenants under leases for a fixed term of years, we have not yet heard any explanation. But it would have been emphasizing somewhat too strongly Russia's title of eminent domain had she discriminated against Japanese subjects on the ground that Russians in Japan do not enjoy the privilege of owning real estate. For the rest, readers of the "Rules for Buying and Leasing Land-parcels" at Dalny probably had no conception of this difficulty seeing that the 9th article says:—

Not only Russian subjects, but also foreigners generally, are to have the right of buying and leasing land-parcels; the principle of international intercourse, in conformity with existing treaties, to be thus fully regarded.

In drafting this article the plain purpose of the Russian Authorities, a wise and tactful purpose, was to avoid creating grounds of complaint by depriving foreigners of privileges assured to them by existing treaties. The Japanese are among such foreigners.

MARQUIS ITO'S SIXTY-FIRST BIRTHDAY.

Marquis Ito celebrated his sixty-first birthday at the Sorokaku, his Oiso Villa, on the 25th instant in the afternoon. A large number of important personages assembled, among them being nearly all the Cabinet Ministers, Count and Countess Inouye, Marquis Saionji, Barons Kaneko, Suyematsu and Ito, Mr. Kato Takaaki, Mr. Hara and many others. Marquis Yamagata was prevented by illness from attending. As 4 o'clock a repast in genuine old Japanese style was served, and subsequently there was a lottery, among the prizes being one sent by Marquis Yamagata. In the evening there were private theatricals. The piece had been composed by "a certain nobleman," and among the actors were Mr. Ito, Baroness Suyematsu, Mrs. Komiya, Mrs. Nishi and Mr. Tokioka. Marquis Ito's mother, who is now nearly ninety, was present throughout the rejoicings. The occasion was marked for the school children of Oiso by a present of a box of cakes to each of the six hundred scholars. An interesting feature of the ceremony was the presentation to the Marquis of a bronze statue of himself. The principal promoters of this gift were Count Hijikata, Count Katsura, Viscount Yoshikawa, Baron Utsumi, Baron Sone, Baron Oki, Baron Iwasaki, General Terauchi, Mr. Samejima, Mr. Okura, Mr. Tanaka, Mr. Amenomiya, Mr. Sugita and Mr. Yokoyama. This habit of casting bronze statues of eminent statesmen is happily growing in Japan, and the artists are now tolerably skilled. One of the early attempts was the statue of Count Inouye, which stands in a shrine in the park of his Azabu residence.

In a very minute account of the celebration of Marquis Ito's sixty-first birthday on the 25th instant, the *Japan Times* says:—"The public has long since come to believe, and with reason, that there exists an unbridgeable gulf between the two Marquises (Ito and Yamagata) so far as their political views are concerned, and therefore to look upon them as enemies, politically at least." Is there in truth so much "reason" in this belief, supposing always that the belief exists in the accentuated form described by our

contemporary? Our own observation of the course of events has fully persuaded us that whereas the two Marquises themselves are sincere friends and could easily be persuaded to follow the same route if their country's advantage were in sight, their followers, especially the "small men," have gradually cultivated the habit of displaying hostile sentiments, and have fallen into the evil custom of applying contemptuous epithets to men whose achievements are in many cases beyond their comprehension.

AUTUMN EXHIBITION OF THE NIPPON BIJITSU-IN.

(COMMUNICATED.)

BEYOND Uyeno, and on your way through the suburb of Yanaka, you will find a certain narrow green-hedged lane, and here, beside bamboo groves and in sight of stretches of open country, are the low dark buildings of the Nippon Bijitsu-in. This is a society of Japanese artists formed some five years ago with the Art Critic and Scholar, OKAKAKUSA KAKUZO, at its head, and acclaiming as its master the painter HASHIMOTO GAHO.

The Society is now holding its annual Autumn Exhibition, and as we pass through the great flags at the gateway and reach the quiet threshold, it is well to pause a moment to seek again that child which is the inmost heart of all of us; whose presence is as the perfume of the rose, and the song of the nightingale, bartered but too often, for the savours of cooking pots and the triviality of mechanical toys.

It is to the poet, the child, the seer in us—these artists of modern Japan make appeal. We participate as it were in the creation of their works, their canvases breathe the most delicate homage, the subtlest flattery. They say to us, "My fellow artist, my brother poet, here indeed is a peony drenched with dew, the light of a cloudy evening filtering through its translucent corolla, here is a mountain path and nothing beside but the moon, and the mist, and the wind blowing the little white blossoms to your feet, and yet this is not all. We are the door, and open unto you an illimitable world, where, if you will, you may find the vision of all the peonies you have ever seen and admired for their beauty, all perfect moonlight nights, with their mystery, and fragrance of unseen flowers!"

We enter, our way turns through a narrow labyrinth bordered on either hand by pictures. In these lower rooms are the paintings of young members of the society, pupils of maturer artists, or outsiders exhibiting by favour, and their work with a few exceptions does not quite reach that representative standard by which the Nippon Bijitsu-In may rightly claim to be judged.

Yet even here what distinction of touch, what elegance! See these little pictures, a sparrow perched on a bending swathe of grain, a kingfisher in a clump of marigolds, some clusters of hydrangea, all by the same hand, and charming in composition, softly pure in colour.

There is something magical about these birds and insects; each has such a separate, distinct personality. You would not feel much surprised if they should suddenly fly towards you, out of the picture, so lightly poised, so free, so full of the joy of life are they. Some of the pictures of other animals may seem to us to lack *vraisemblance* and yet the tigers are wonderfully impressive. To the Japanese mind the tiger is a symbol

of something supernaturally wise and great, and thus we discern superadded to the remarkable technique shown in the colouring and handling of the hair, a certain ghostliness of expression informing the whole figure, a look profound, wistful, and sometimes impassionedly sad which thrills us with the sudden comprehension of the theory of soul transmigration. There is an eerie quality about Japanese Art which brings us into touch with invisible worlds, realms of faery and romance. The old, legendary myths of this country, its folk-lore, the mighty heroes, and lovely princesses of Ancient China and Japan, form an inexhaustible source from which its pictured subjects are drawn, and these appeal to that finer and more ethereal part of the imagination which vibrates to the poetry of the "Tempest," the wild legends of North Western Europe, to the tales of HANS CHRISTIAN ANDERSEN, certain Slavonian melodies, and the music of EDWARD GRIEG. The influence of Buddhism, more especially in its indirect form, is simply incalculable.

Just to mention a few pictures relating to folk lore. In one of the upstairs rooms is a delightful little Okame-san, goddess of luck, whose round face dimples merrily, as she lies asleep in her fairy palace, seeing in a dream the Treasure ship (Takarabune) come sailing, sailing toward her through the roof, and over the screen, on a misty, transparent river. Here again is the chuckling, enormous Hotei with his charming host of attendant children, and Fukurokujin, blandest of sages, out, with aimable trolls and demons, on a most delectable spree. Here are beautiful ladies in whom you must put no faith, for they will shortly turn into nine-tailed foxes, and old witches you wouldn't trust anyway. Here are wicked little badgers drumming on their fat, delusive little tummys, galloping warriors in splendid armour, flower pieces, genre pictures, historical scenes, and landscapes, which indicate by a certain method, an emancipation and depth and clarity of atmosphere, what we may find more perfectly developed in the work of the greater masters of this school.

In the greater part of these just considered there is a delicacy, a freshness and harmony of colour, and a delight in pure line, the use of the brush in and for itself, which makes each separate detail a joy to look upon. A certain writer, and marvellous seer would tell us that this mastery is owing to the accumulated power of myriads of souls, that it is in reality the dead who guide the brush, and invest it with an almost uncanny skill, and that this is the memory of the memory of unnumbered strivings after the perfect reproduction of complicated ideographs, the transcription of the irregular, illusive lines of flower, and branch, and tree.

Once upon a time, I was in the Imperial Museum at Ueno, looking at a rare collection of paintings from the hand of a certain Ancient Master, so venerated by the Japanese that at the mere mention of his name they involuntarily bow. Now I admit that these works belong to that portion of Japanese Art which needs especial study, and as I was devoting myself to this, I heard behind me a loud and cheerful voice. "Come along Lully!"—it said—"look-a-here at these embroideries!" Then in the tone of one miraculously enlightened, "Why-ee they ain't embroideries, they're paintin's—H-m-m-I reckon I could do as good as *that*!" Now he was a dear old gentleman, and I liked him very much, but I knew that in consequence of hereditary bias, and spatulate Saxon fingers, and some other things, it

would take him just exactly a thousand years to do as "good" as that.

In the rooms upstairs are the paintings of the members of the Bijitsu-In. These set forth in its process of natural and logical development, the immortal Art Spirit of Japan, and, with the exception of one or two glaring dissonances (awful examples of the havoc wrought by the foreigner to Japanese Art, even when merely chosen as a subject), collectively form a magnificent refutation of the misleading statement often met with, that Japan of the present day has no Art worthy of the name, presenting but on the one hand soulless replicas of the forms of an elder generation, or on the other, work excellent it may be, but not to be differentiated from that of Europeans.

The artists of the Bijitsu-In present above all an Art that is national. They are conserving, jealously, as the dragon his sacred jewel, the priceless inheritance transmitted to them through a long and noble line, and yet are assimilating, in most cases with unerring instinct, that portion of the foreign Art Ideal best fitted to further them in the expression of their original conceptions, conceptions profounder and more significant than those to be met within the limits of the aristocratic School of Kano. The paintings of Gaho, Kwanzan, Taikwan, Kogyo, Kogetsu, Chikuh, Reizen, Ozon, Buzon, and several others, the masters and leaders in this School; their figures, flower pieces, and landscapes with their truly marvellous atmospheres, sunrise, and moonlight effects, their mountain and evening mists, their snows, and summer showers are so convincing in their ideal reality, one feels as if one could breathe within the encompassing frames, could pass into these and walk on and on towards an ever receding horizon.

One remarkable thing about this art is, that however great its technique, however calculated, the perception of this is not present to the consciousness. We do not reason save by intention as to the apparatus used, nor as to the method by which the paintings are produced. We accept them as we should a flower. They do not seem mere copies of nature, they stand as an integral part of Nature herself. In the figures (those that are typical, I mean) we find glorious harmony of colour, rhythm and grace in all the long lines of the drapery, yes, and when we have lain aside, for the time being the Occidental ideal, and entered into the Oriental, have completely forgotten the "Gibson girl" and the "Christie girl" and the athletic young men who make love to them, what a gracious femininity is revealed to us by the slender, little princesses in their trailing robes, what aristocratic charm in the pale oval of their shy smiling faces, how exquisite the little hands with fingers curved like flower petals. The figures of the men are full of dignity and quiet majesty, there is a look, a poise which expresses well the ideal of hereditary chieftanship. Here is a Chinese poet straight and tranquil, in robes of ineffable blue, an Emperor at the prow of his warship chanting a war song as he goes forth to meet his foe. Then there is a painting by one MORI, of the General HANKWAI, a masterpiece in its virility and reserve force, there is TAIKWAN's group of the great religious teachers of the world, the CONFUCIUS and the LAO TSE being remarkably fine. There is one rarely beautiful figure of a hermit meditating in a cave, and a most impressive picture of the ancient gods, IZANAGI and IZANAMI; and, half hidden in a dark corner downstairs, a touching,

wonderfully expressive "MICHIZANE in exile." In all of these pictures the Japanese painters have shown how well they understand the secrets, the limitations of their Art. They represent flesh but by a single tone of pure colour, the features by a few masterly strokes, and are more convincing in their simplicity than the foreign artist, who exhausts the resources of his palette in the all but vain endeavour to reproduce the texture and quality of—let us say—a young girl's flesh.

In this collection nothing material, nothing merely sensual finds place. OZON's and BUYON's lotuses, white and shining like an embodiment of prayer; REIZEN's fire-flies, another artist's summer scenes, and splendid studies of Autumn, many of these pictures for their varied loveliness deserve separate study. The spirit absorbed by these is soothed, and bathes as it were in an emanation from ideal forms. Last and greatest of all, the pictures of Hwashimoto GAHO, the revered master, the beloved of the Japanese, whose paintings mark an epoch in the Art History of Japan. So pure are these paintings, so serene, so unearthly in their ideal beauty, they seem the work of some disembodied spirit who has visited the Islands of the Blessed.

He works by preference in black and white, or rather the finest, most softly graded of grays, and with these, whose use he understands as no other master, expresses the most varied and original conceptions.

He is well represented this time by a large figure of a venerable Sennin, masterly in its dignity and repose; some irises in colour, which are not irises, but souls; a little figure in a summer shower, lotus buds and a flying heron, and, most beautiful and characteristic of all, a moonlight scene, bathed in mist, and in the foreground a few scattered cherry petals. It is very daring, the work of a past master, one of the most beautiful moments of Eternity, fixed, and bequeathed to us for all Time.

Japan has a living Art. Young, vigorous, progressive, and essentially true to the genius of the Japanese race.

TORISHIMA.

Mr. Hineno, the Chamberlain sent by the Emperor to carry succour to the families of the persons who lost their lives in the Torishima eruption, has returned to Tokyo. After assembling the relatives in the school-house on Hachijo-jima, and handing them the Sovereign's bounty, Mr. Hineno procured a boat and visited Torishima. He found the conditions there little altered since the date of the previous report. The sea in the centre of the newly formed bay was still boiling, and at two places on the island volcanoes were in active eruption, though the intensity of their fires had visibly diminished. Much rain appeared to have recently fallen, with the result that the ashes had been considerably washed away, and movement from place to place, was thus facilitated. Search for traces of the unfortunate inhabitants was renewed, but entirely without success, and nothing remained but to erect a tablet over the site of the former village. Mr. Hineno relates that when passing the eastern side of the island on the return journey, he witnessed a great flock of albatross on the shore. He conjectures, therefore, that it will not be long before another band of adventurers settles on the island.

LABOUR IN SOUTH AFRICA.

It is very interesting to observe that the British in South Africa show the same dislike as the British in Australia to the introduction of an Asiatic element into the population. They are faced by a somewhat perplexing labour problem. Gold mines of enormous value invite development, but working hands can not be found in anything like sufficient numbers. Before the war, the owners of the various mines competed with each other to secure Kaffir labour, and by touting and offering high wages, they managed to secure nearly a hundred thousand men. But wasteful competition has now been replaced by an efficient central organization which fixes the Kaffir's wages at 35s. a month and which adopts an intelligent and systematic method of seeking recruits. Nevertheless, whereas prior to the war there were about a hundred thousand natives at work, there are now little more one third of that number, and it is estimated that employment for three hundred thousand could be found. The Kaffir, it appears, is essentially lazy. His ambition does not extend beyond living in ease and comfort. He will work for luxuries, if the need of them suggests itself to him, but after he has earned enough to procure them, he will lapse into his former condition of idleness. Just at present he appears to have plenty of money, having been paid by both sides, especially the British, during the war, and consequently there is no inducement for him to toil at a stamp. It has been suggested that to tax him would be a good way of rousing him from sluggishness. If he had to pay taxes, he would work to obtain the wherewithal. But this is a doubtful remedy. The immediately effective resource would be to import Chinese. Against that, however, strong objections are raised. The inevitable result, it is said, "would be to convert a splendid country, well-suited by nature to be the heritage of the white man, into a land of Asiatics and negroes, with a small white ruling class." *The Times* makes the following contribution to the solution of the problem:—

There is yet a third solution of the problem possible, a solution in some respects the most promising of all. It is that the white man himself should enter upon his heritage, and do much of the manual work hitherto done by the Kaffir. The reasons why he has not done it in the past are partly sentimental and partly economic. The climate does not forbid him to do hard labour, but, as in all lands which slavery has cursed, there is in South Africa a strong prejudice amongst free men against the kinds of labour formerly done by slaves. The comparatively high cost of white labour has also helped to exclude it from the mines. The white labourer costs nearly four times as much as the black, and on ordinary rough work he does only two or three times as much. It is said, however, that the superior intelligence of the white man makes it possible to organize and work a mine in which he is employed far more efficiently than a mine depending on raw Kaffir labour. The experiment is now being made on a very considerable scale, and the results, we are assured, have been distinctly satisfactory. Mr. Creswell, the manager of the Village Main Reef, has got the same amount of work done by 250 white men that was formerly done by 900 natives, and altogether there are now some 2,000 discharged Regulars and irregulars at work in the various mines. We need not dwell upon the advantage to South Africa of the change, if it can be maintained and extended. It would bring about, in the most natural and easy way, a great addition to the British working population of South Africa, directly by the influx of the labourers themselves, and indirectly by that of all the classes who minister to their wants. Mr. Chamberlain is fully sensible of its Imperial importance, and has declared that he "heartily wishes it success." Well he may, for it would make South Africa once for all a white man's country, and thus enable her to become what she cannot be until she is a white man's country—the sister and the peer of the other great self-governing States of the Empire.

KOREA.

The long agitation in favour of the elevation of Lady Om to the position of Empress of Korea has resulted successfully. The imperial favourite's ambition is achieved, a fact which reflects not unfavourably on her Sovereign's disposition. There is, of course, some talk about the possibility of the event's proving a source of political unrest, but, strange to say, no Japanese publicist seems much interested in considering the influence Her Majesty is likely to exercise in her new position. It is to be sincerely hoped that she will take for model the example of her lamented predecessor.

Many rumours are circulated about unrest in Sōul fanned by a new Russian *aura popularis* and supposed to be temporarily favourable to the dominance of Muscovite influence in the Korean capital. Every one is tired of this continuous stream of chatter about the see-saw game of Russo-Japanese parties in the little empire. Incidents of the paltriest description are refracted from their normal position of obscurity by an atmosphere of mystery and agitation.

SHINCHOU AND BLAGOVESTCHENSK.

Very vigorous and peremptory steps are being taken to call the Chinese authorities of Hunan to account because a mob in Shinchou, under the influence of a cholera scare, murdered two missionaries. It is suggestive to read in this context an account of what happened among the Russians at Blagovestchensk last August:—

August 2 being the anniversary of the raising of the siege of Blagovestchensk by the Chinese, a *Te Deum* was sung at the Cathedral. This brought a considerable number of people to the church. After the service was over the people dispersed, and many of the lower class went into the taverns, where they discussed the cholera which was raging at the time. Soon numerous parties of drunken men began to leave the taverns and to make their way to the cholera hospital, creating a great disturbance. The rioters began to assault the medical and sanitary officers, chasing them through the streets and trying to release the cholera patients, whom they were conveying to the hospital. They even went so far as to attempt to destroy the hospital itself, the staff of which took to flight in order to escape the violence of the rabble. The Deputy-Governor did his utmost to get the rioters to disperse, at the same time giving orders that when cholera patients were taken to the hospital they should be escorted by police. As soon as the Deputy-Governor had retired the rioting was renewed, and at last it became necessary to call out troops, and order was eventually restored by 11 o'clock in the evening.

On the following day a company of troops was encamped near the cholera hospital, the public were forbidden to assemble in the streets, and to carry arms, and orders were given for the closing of all taverns. At the same time the authorities furnished explanations regarding the measures taken against the epidemic, in order to dispel the prejudices of the people. No fresh disturbances have taken place.

THE EMPEROR'S BIRTHDAY.

With a view to celebrating the birthday of the Emperor in a brilliant fashion this year the Japanese Naval Authorities are reported to have commissioned the war-ships *Naniwa* and *Fuso*, now in Yokosuka, to come round to Yokohama to celebrate the event side-by-side with the British battleship *Goliath*, which entered this port on Oct. 29th. The *Goliath* will, unless the complications in China prevent, remain in harbour for over a week in order to take part in the celebration of King Edward's Birthday and Coronation on Nov. 8th. It is further stated that the Japanese war-ship *Kasagi* will be stationed in Kobe; the *Asahi* in Moji, and the *Iwate* in Nagasaki in connection with the celebration of the Emperor's birthday.

CHINESE NEWS.

Saturday, Oct. 25.

It is stated that the Shanghai Branch of the China Association held a meeting on the 22nd instant for the purpose of discussing the Mackay Treaty. The conclusion reached was that if the provisions of the Treaty could be carried out with exact good faith, it would be a desirable arrangement; but that if each of the other Powers undertook to modify the document in accordance with special interests, the implementing of the compact would become hopeless. Hence the meeting resolved that the best course to be pursued at present was to devise means for giving effect to the Treaty. But what are these means? We have never had any faith in their efficacy. Besides, as Mr. Ku Hung-Ming told the public in a letter recently published in these columns, the abolition of *likin* is only nominal: its place will be taken by the consumption tax. Some kind of additional taxation seems inevitable for the purpose of meeting contingencies, and local officialdom finds no easier way of getting money than by means of an impost upon articles in daily use.

Thursday, Oct. 30.

Another office has been conferred on Viceroy Yuan. He is appointed acting Minister of Public Works, and, together with Mr. Wu Ting-fong, now Chinese Representative in Washington, is instructed to proceed with the negotiations for the new commercial treaty. These statements are taken from the telegraphic correspondence of the *Fiji Shimpō* and the *Asahi Shimbun*. It is not uncommon in the Orient to defer summoning a skilled physician until the patient is in a parlous state. That seems to have been the course followed with regard to the treaty and Viceroy Yuan. The treaty is *in articulo*, and neither the Viceroy nor the adroit Minister can save its life.

It should be noted in this context that the Shanghai Branch of the China Association passed, on the 27th instant, a very guarded resolution about the Mackay treaty. By 53 votes to 45—not a very overwhelming majority—the meeting decided that if the Treaty could be faithfully carried out, and if ample guarantees could be obtained with reference to the consumption tax and the terminal tax, prior to ratification, the Association would approve the document. Is that an accurate rendering of the decision, we wonder. If so, the meeting showed a fine faculty for trimming.

The *Fiji Shimpō* has a telegram from Peking to the effect that the recent examinations for admission to the new Peking University were so severe that very few of the students from the provinces succeeded in passing, and it is thought probable that great difficulty will be experienced in inducing others to present themselves. The course adopted by the examiners is reported to be generally condemned.

There are now nearly eight hundred Chinese students in Tokyo and it is alleged that arrangements are being made for sending hither about 500 more from various parts of the country.

MR. UCHIDA.

The Japanese Representative in Peking is to leave Tientsin on the 2nd of November for a brief visit to Japan. During his absence from the Chinese capital Mr. Matsui, Secretary of Legation, will act as *Chargé d'Affaires*.

MR. HERB.

It would appear that no doubt can be entertained any longer of Mr. Herb's having absconded without waiting for the result of the appeal lodged by the public procurator against the sentence of six months' imprisonment pronounced on him by the Kana-gawa local court. Herb would apparently have been quite willing to undergo his punishment. In fact, his incarceration had already commenced. But the appeal of the public procurator, who considered the penalty too light for the offence, involved a delay during which Herb was released on bail. Several friends—notably among the Free Masons of Yokohama—are understood to have assisted in providing bail, and it is said that Herb gave a written engagement to the Swiss Consul, promising to remain and await the result of the appeal. Neither promises nor gratitude seems to have influenced him. A suspicion having been entertained that he had taken his departure, application was made to the police. They replied that he was sojourning at Nikko. But inquiries made some days later showed that the supposed Herb was a lady with four children. Of course the police were under no obligation to watch Herb during the period of his release on bail. He was perfectly free to remove himself to other climes if he chose to forfeit his recognisances and leave his friends in the lurch—which he did choose, apparently. It must be exceedingly painful to the man's Free-Mason assistants that their charity, the conspicuous virtue of the Craft, should have placed them in the unexpected position of seeming to connive at an evasion of justice. To such accidents, however, benevolence is always liable to expose those that practise it.

KELANTAN.

It was the Saigon correspondent of the Havas Agency that telegraphed, and re-telegraphed, a statement to the effect that 300 Sikhs had occupied Kelantan. The whole of the French press seem to have accepted the statement as unquestionably true, but to this moment its basis has not been discovered, unless it be the fact that the Sultan of Kelantan recently enlisted 30 Pun-jaubis to act as policemen in his capital. *The Times* says of the incident:—

The State on which attention has thus suddenly been concentrated must be a *terra ignota* to almost all Englishmen save those who administer the Federated Malay States upon its borders. Flanked by its sister States of Trengganu and Kedah, it marches with both the protected States of Perak and Pahang. * * * For more than a century Siam has claimed there an uncertain suzerainty. This claim the Sultans of Kelantan seem to have consistently denied and resented, but some ten years ago Siam had the satisfaction of seeing the flag of the White Elephant flying at the mouth of the Kelantan river, and of putting a nominee ruler on the Throne. It is not denied that the Siamese protectorate thus established is no more than "a Gilbertian travesty" of the British administration which, in the hands of a series of able and devoted officials, has brought the neighbouring Federated States out of chaos to order and prosperity. The unrest and confusion of Siamese Malay are a serious impediment to the peace and well-being of our protectorate. But France may rest assured that we have no intention of trying to end this state of things by such a leap in the dark as the Havas Agency describes. Our interests in the Malay Peninsula are, as the more thoughtful French journals realize, considerable, and we attach to them the importance they deserve. We do not, however, design to ensure them by sudden aggression upon debateable territory. It cannot be impossible for France and England, while securing their due rights in the spheres in which they respectively predominate, to co-operate peacefully in developing the great natural resources of Siam without taking steps of a menacing character.

JUDICIAL SALARIES.

Some interesting figures have been published in the *Journal of Comparative Legislation* with reference to judicial staffs and their emoluments in various countries. An impression had always prevailed that the number of judges in the United Kingdom was smaller than that in continental countries of Europe, but probably very few persons recognised how great the disparity is until the appearance of the article here referred to. It shows that for the whole United Kingdom there are only 464 salaried judges, or 0.86 per 100,000 inhabitants in the case of England. On the other hand, the figures for some of the countries of continental Europe are:—In Austria, 4,541, or 17.35 per 100,000; in Belgium, 546 or 8.03 per 100,000; in Denmark, 186, or 7.76; in France, 7,803, or 20.16; in Germany, 8,186, or 14.63; in Hungary, 2,658, or 13.79; in Italy, 3,645, or 11.37; in the Netherlands, 338, or 6.53; in Norway, 172, or 7.83; in Russia, 3,180; or 2.80; and in Sweden, 497, or 9.20. Some of the causes of the great discrepancy between the United Kingdom and other European countries are thus summed up by *The Times*:—

One of them is the fact that work, which is here delegated to minor officials or performed automatically, is elsewhere kept in the hands of the Judges. Another potent cause is that stated in the article—the belief in this country in the one Judge system, while elsewhere, as a rule, there is required a *minimum* of three Judges. Even such of our Judges as have been "afraid to go alone into the dark," to quote Lord Westbury's famous sneer, would be embarrassed to find themselves a member of a Court of which eleven formed a quorum. Here no one would think of departing from the "one man system" in Courts of first instance; and, strange as it may seem to English lawyers, there is no marked inclination in other countries to abandon a principle which would in practice lead, it might be thought, to an attenuation of responsibility and would encourage inefficiency.

In the matter of emoluments the disparity is still more marked. "A single English Puisne Judge," says *The Times*, "with a salary of £5,000 a year, not to mention circuit allowances, is paid almost as much as the whole Judicial Bench of some of the smaller European countries."

In Sweden for example, the remuneration of the Judges varies according to Dr. Georg Carlson, from a *minimum* of about £250 to a *maximum* of about £500; and that is liberal remuneration as compared with what is given in countries where Judges most abound. In Hungary the total remuneration for 2,658 "Royal Judges" was £490,600, or less than an average of about £150 for each. In Italy the Chief Presidents of the Corti di Cassazione receive £600, and the salaries of the minor Judges fall to £112. In France judicial officers corresponding more or less to our Lords of Appeal or Lords Justices receive salaries of £720, £1,000, and £1,200. In Norway and in Sweden the practice of remunerating Judges by means of fees is not wholly extinct; and, in the latter, some of them are required to pay their office expenses. It does not appear that this system, radically bad though it seems to be, is productive of the abuses which might be expected to flow from it. The author of the article is careful to point out that the figures are not conclusive as to the merits of the various systems described. But we cannot help observing that nothing in his survey is calculated to impair belief in the essential soundness of the English system. Certainly, to remunerate men who have in their hands the disposal of liberty and property only a little better than the village carpenter, to put great State officials in positions of poverty in comparison with that of merchants or bankers, is ill-advised economy, which will never, it is to be hoped, be imitated here.

Japan has 1,200 judges—the number varies slightly from year to year—or about 3 per 100,000 of population; and their salaries are considerably less than those of Italian judges.

THE UNION JACK.

What is the national flag of the British? The Royal Standard? Certainly not. The true, and only national flag would seem to be the Union Jack. So at any rate we gather from an article in *The Times* of Sept. 18th. There it is laid down that while the Red Ensign is prescribed by law as the symbol of the nationality of every British vessel at sea "not being a man-of-war or a vessel otherwise privileged to wear a different ensign," the national flag so-called is the Union Jack, which flies from the Victoria Tower while Parliament is sitting. As to the Royal Standard a letter is quoted from the Vicar of St. Michael's, Folkestone, to Lord Knollys stating that his congregation had spent £10 in buying such a flag, thinking that they would be able to fly it from the church tower as usual. The reply of His Majesty's Private Secretary was "that the Royal Standard, which is the King's personal flag, can only be hoisted at the Coronation. * * * I must remind you, however, that you can always fly the Union Jack."

The proper flag, then, for a British subject to fly in seasons of celebration is plainly the Union Jack. What is the Union Jack? It is a combination of the original flags of the three countries now consolidated into the United Kingdom. The original national flag of England was the Cross of St. George, a rectangular red cross on a white ground. The original national flag of Scotland was the Cross of St. Andrew, a diagonal white cross or saltire on a blue ground. The original national flag of Ireland, said to have been borrowed from the arms of the Geraldines, was a red saltire on a white ground. When James I. succeeded to the throne of England and thus united the two monarchies, the St. Andrew's Cross was adopted as the ground of the common national flag, the St. George's Cross being superposed upon it and the red cross having a uniform white margin to indicate the original ground of the English national flag. This, says *The Times*, was the original Union Jack which is thought by some to have been so called after the King, who frequently signed his name "Jacques." During the Commonwealth the Jack was retained, but an Irish harp was superposed at its centre. This was removed at the Restoration, as being for some reason or other, as Pepys records, "very offensive to the King." The Union Jack thereafter remained unchanged until 1801 when the Act of Union with Ireland brought the final change which gave us the present national flag. The Irish red saltire was then superposed on the Scottish white saltire. But, and this matter should be noted, the white margin of the Irish red cross was not made uniform throughout because that, on the analogy of the uniform margin of the English red cross would have indicated only the original white ground of the Irish saltire, and would thereby have obliterated the Scottish white saltire altogether, leaving only the blue ground in the angles to indicate the original national flag of Scotland. It was accordingly provided that in the two "cantons"—quarters of the flag nearest the staff—the upper white margin of the combined saltires should be much wider than the lower, this order being reversed in the two outer cantons. No Union Jack is properly constructed unless this arrangement is scrupulously respected, nor is any such flag properly proportioned, according to established usage and prescription unless the length or

"fly" of the flag is twice as great as its height or "hoist."

This being the historical evolution of the Union Jack, it is contended with great show of reason that the Union Jack is and must be the only national flag properly so-called. As to its proper or improper use or display, the national pride in the national flag should suffice to regulate those matters, and it should be a reproach to every loyal and patriotic citizen not to know what is the national flag, what are its proper form and construction, and what is the proper use and symbolism of the several forms of it. Indeed *The Times* thinks that the form, construction, history and proper usage of the national flag might well be made a definite subject of teaching in every school in the Kingdom. "You can always fly the Union Jack" said the King's Private Secretary. To this it may be added that whether it is the Red Ensign or any other ensign recognised by authority does not much matter, but as the Union Jack is the national flag then that flag should be flown.

THE ARBITRAL TRIBUNAL.

Thursday, Oct. 30.

The personnel of the arbitral tribunal in the house-tax dispute has now been determined. Japan is to be represented by Mr. Motono, and the other side—namely, France, Germany and England—by M. Louis Renault, who is a Minister Plenipotentiary, a Professor of the Faculty of Law in Paris and a Jurisconsult of the Department of Foreign Affairs. We can not doubt that M. Renault is an able man, thoroughly competent to discharge the duty now assigned to him. Nevertheless it is impossible to repress a feeling of disappointment that the foreign side in this affair should be represented by a citizen of the Power having conspicuously the smallest interests in Japan. There are 5,388 foreigners residing in Japan, exclusive of Chinese and Korean subjects whom this question does not affect. Among these are 2,247 British subjects, 586 Germans, 431 French, and 1,165 Americans—3,412 Anglo-Saxons against 431 French. Yet it is to a French member of The Hague Tribunal that the function of arbitrator is assigned. That is certainly not what might have been expected. Further, in the event of the arbitrators disagreeing, the King of Sweden is to be asked to appoint an umpire, and of course His Majesty will nominate M. d'Olivecrona, so that from first to last no Anglo-Saxon voice will be heard in the discussion. Effacements of that kind are not agreeable to either Americans or Englishmen, but we must console ourselves with the reflection that a sacrifice has been made on the altar of that great deity of diplomacy, the *entente cordiale*. It is at all events certain that justice will be done.

Friday, Oct. 31.

M. Louis Renault, who has been chosen to represent the European side on the arbitral tribunal of the house tax, is a jurisconsult of much eminence. His lectures on international law are said to be eagerly attended by students of that difficult subject, and to be marked by large research and great lucidity. His exceptional qualifications may therefore be regarded as a "set off" for the fact that he represents the country having the smallest material interests among the three Powers concerned. In another respect the choice of a French expert is fortunate; namely, that Mr. Motono, Japan's representative on the tribunal, is a finished French

scholar, and that the two arbitrators will therefore be able to discuss the problem freely without the intervention of an interpreter.

BALL AT THE UNITED STATES LEGATION.

The United States Minister and Mrs. Buck gave a reception and dance at the Legation in Tokyo on the 27th instant in honour of Admiral Rodgers and the officers of the U.S. Squadron. About five hundred guests were present, including the Prime Minister and several of his colleagues in the Cabinet, Count Matsukata, Count Inouye, Viscount Aoki, Baron Sannomiya, the Foreign Chiefs de Mission, the staffs of the Legations, and many officers of the American Navy. At about half-past nine His Imperial Highness Prince Komatsu arrived together with Prince Fushimi and Prince and Princess Nashimoto, and dancing commenced immediately afterwards, being kept up with spirit until a late hour. Supper was served at eleven o'clock in a spacious marquee specially erected for the purpose, and erected so skilfully that its brilliantly lighted interior, festooned with flags and decorated tastefully, produced a fine effect. The party was in every respect a signal success, the arrangements of every kind being perfect, and the presence of so many naval officers contributed not only to the brilliancy of the scene but also to the vigour of the dancing.

Admiral Rodgers left Japan for San Francisco on Wednesday, his flagship the *New York*, having a tremendous send-off as she steamed down the bay.

THE KAISER AND LADY MACDONALD.

The Emperor of Germany has given another example of his graceful thoughtfulness. His Majesty has sent the Medal of the Red Cross to Lady MacDonald in recognition of the brave and untiring helpfulness shown by her ladyship throughout the siege of Peking. On the 25th instant, His Excellency Count Arco Valley, Major von Etzel, Dr. Baelz and Dr. Ohrt proceeded to the British Legation and presented the Medal to Lady MacDonald, who received it with indications of lively satisfaction. This Medal was instituted by the Emperor of Germany on October 1st 1898. It is a handsome cross having four crowns attached, and the letters

W.R. (Wilhelm Rex).

A.V. (Auguste Victoria).

On the back is the inscription:—

Fuer Verdienste um das Rothe Kreuz (for services to the Red Cross).

The ribbon of the Cross is red, black and white. His Imperial Majesty sent also to Lady MacDonald a brooch to wear with the ribbon. It has the inscription "Peking." This, of course, is a special distinction. We may be permitted to append an extract from a despatch addressed by Lord Lansdowne to Sir Claude MacDonald and printed in the "Correspondence respecting Events at Peking," under date Feb., 10th, 1901:—

I can not conclude this despatch without asking you to convey to Lady MacDonald the thanks of H.M.'s Government for her unceasing and devoted attention to the comfort and welfare of the sick and wounded. Her work, and that of the ladies who assisted her, have earned the lasting gratitude not only of those who benefited by her ministrations, but also of their relations in Europe, who were kept for so many weeks in a condition of the most painful anxiety and suspense.

NOTES ON CURRENT EVENTS.

The Diet is to meet, says the *Nichi Nichi Shimbun*, on the 6th of December. There has not yet been any public proclamation of the fact, but our contemporary alleges that the Cabinet has already sought the Sovereign's sanction for that day.

Prince Konoye had a narrow escape on the 25th instant. As His Highness was driving home from the Gakushu-in to his official residence at Hibiya, the horses of his carriage, alarmed by a precipitate attempt on the part of the driver to avoid collision with a bicycle, became unmanageable and dashed the carriage against a gate. The driver and betto were somewhat seriously hurt, but the Prince escaped with only a shaking.

Mr. Arakawa, Japanese Consul-General in London, has sent a report which the *Fiji Shimpō* summarizes. It relates to the Yokohama Water-Works loan of 900,000 *yen*, undertaken by Messrs. Samuel Samuel & Company. The loan had been widely and skilfully advertized. It was placed on the London market on the 28th of July, the upset price of the six-per-cent. bonds being 98. Mr. Arakawa says that in two days the required amount was subscribed twice over, and that the average price obtained was about 102. Considering that the bonds were taken over by Messrs. Samuel Samuel and Company at 90, it is evident that a good profit has been realized. But of course the name of the house by which the bonds were offered counted for much in the public's estimate of the transaction.

The talk recently heard about Vladivostok being converted into a free port, seems to have no foundation whatever. Telegrams received from that place by Tokyo journals announce the publication of regulations which are to said to have received the sanction of the Minister of Finance on the occasion of his recent visit. The effect of these regulations is virtually to abolish the list of untaxed imports. Only a very few articles remain on the catalogue, and these must necessarily be articles destined for conveyance by railway into Manchuria. Russia might have made Vladivostok a commercial door to Manchuria, but evidently that is not her policy. Perhaps she intends that Dalny shall be the sole gate.

The recent tender for locomotives for the Imperial Government Railways, the result of which was mentioned in these columns at the time, derives additional interest from the fact that it was a species of international competition, five American firms and three German being among the tenderers. The contract—which amounts to over six hundred thousand *yen*—was secured by Messrs. Dubs and Company of Glasgow, through Messrs. Okura and Company of Tokyo.

Some journalistic incidents are amusing. Recently we published a short article about the four-and-sixpenny dollar of the Hongkong and Shanghai Bank's balance sheet. The article was copied, without acknowledgment, into the columns of the *Shanghai Daily Press*, and now we find it re-copied into the columns of the *Kobe Herald*, which duly credits it to the Shanghai journal!

The ancient city of Hamburg, on the Elbe, was the scene during the last week of September of the fifth conference of the International Maritime committee, which is labouring to secure uniform legislation in matters

relating to navigation. Under ordinary conditions, remarks *Bradstreets*, such a gathering attracts little notice, but its conclusions are of high interest to the maritime world and to those concerned in commerce, of which navigation is a most important means and agent. The first fruit of the conference has been the adoption of a draft of a treaty embodying a uniform law dealing with questions of collision and salvage. Under this treaty the principle is recognized that there can be no claim to compensation where the collision is due to inevitable accident, and it is extended even to cases in which one vessel is at anchor. Where the fault is common the responsibility of each vessel is made proportionate to the gravity of the fault. Losses are to be recompensed in full. Compulsory pilotage is not to be pleaded in defence, and ships which have been in collision are bound to afford mutual assistance as far as circumstances permit. Finally, the right of action is barred only after two years. Some of these regulations will require modifications of the existing maritime system of some nations, but they are in the direction of an advance, and it is worth while to endeavour to secure their enactment.

When the Russo-Japanese Society was organized, its members unanimously voted that the honorary presidency of the Society should be offered to the Russian Representative in Tokyo. M. Iswolsky did not immediately accept the offer. He considered it necessary to refer the matter to St. Petersburg, whence having now received authorization, he has agreed to fill the proposed position. Tokyo journals publish a translation of M. Iswolsky's letter of acceptance. It is addressed to Viscount Enomoto, President of the Society, and we need scarcely add that it is couched in very courteous terms. In so far as the efforts of the Russo-Japanese Society contribute to the removal of unreasoning prejudices on the part of the Japanese people against Russia and on the part of the Russian people against Japan, it has the good wishes of all thinking men.

Another accident occurred on the afternoon of the 25th instant at the scene of the recent Kawasaki disaster. The bridge over the Rokugo not having been yet fully repaired, only one train can pass at a time. Arrangements have therefore been made for shunting the trains on either side of the bridge. Owing to a mistake of the pointsmen the up train from the Tokaido, being sent along the wrong line, collided with a down train from Tokyo. Happily both were moving at a very low rate of speed, so that little injury was done, only seven or eight persons being slightly wounded.

The fact that the present Russian Representative has been appointed to Copenhagen was unofficially announced some time ago, and the official confirmation has now been received. M. Iswolsky, during his comparatively brief period of service in Tokyo, has maintained the best traditions of Russian diplomacy; the traditions so well represented by his predecessors M. Davidow, M. Hitrovo and Baron Rosen. He has undoubtedly helped greatly to prise Japan out of the rut of unreasoning antipathy to Russia, and has demonstrated to some, at any rate, of her publicists that the two empires have a community of material interests. The *Nichi-Ro Kyokai* may be adduced as an outcome of this improved intelligence. Perhaps the ultimate efficacy of such education is open to doubt, but as to the educational

duty of wise diplomatists there can be no manner of question, and M. Iswolsky has cleverly discharged that duty.

Following so soon after the example of courage and endurance offered by the heroes of the late mining disaster in the Forest of Dean, the death of Samuel Scott at Tyldesley, in Lancashire, says the *Globe*, will serve to emphasise the well-known pluck of the English miner. Twenty-four miners were being lowered down a coal-pit, when the engineer, Samuel Scott, was seized with an apoplectic fit. His whole thought was for the safety of his companions, and with a supreme effort he applied the brake and stopped the engines, thus saving the men from being dashed to pieces at the bottom of the shaft. Then he fell back, and in a few minutes was dead.

The accusations against Mr. Namura Shin, a public procurator, adopted son of Mr. Namura Taizo, formerly President of the Court of Cassation, have been definitely proved. He has therefore been removed from the public service, and his name has also been struck off the register of the Namura family, so that he is divorced at once from his profession and his wife. This affair has attracted a large share of public attention, and it is evident that great sympathy is felt with Mr. Namura Taizo. We think that still greater pity should be felt for the young wife of the disgraced procurator.

His Excellency M. Harmand arrived in Yokohama by the S.S. *Annam* on the 27th instant, and proceeded to Tokyo in the evening. M. Harmand will have a hearty welcome from Japanese and foreigners alike. He has had the good fortune to be absent from Japan during the time of the house-tax storm and stress, but he will doubtless be found in cordial accord with the wise and tactful course followed by Mr. Dubail. The latter leaves Tokyo on the 30th by the 6 p.m. train for Nagasaki *en route* for Peking, where we venture to predict for him signal success.

Lieut.-General Baron Hasegawa is to command the troops at the Birthday Review on the Aoyama parade ground on Monday next. It is to be hoped that the weather may be kinder than it has been of late years.

M. Dubail was received in farewell audience by the Emperor on the 22nd instant and by the Empress on the 23rd, in view of His Excellency's pending departure for Peking. The wisdom and tact that have marked M. Dubail's discharge of his diplomatic functions in Japan, cannot fail to insure for him solid success and for his country substantial advantages in the more complicated field of Peking politics.

Telegrams to the Shanghai papers give fuller particulars of the Somaliland affair than those that reached Japan by Reuter's cablegrams. A dispatch from Bombay under date of October 22nd said:—A sensation has been caused by the publication of letters from a member of Colonel Swayne's force written before the latest dispatches, stating that the force had had numerous fights, had lost most of its camels, was short of provisions, ammunition, and water, and altogether in a tight place. The native levies were funkling, and the Mullah had captured two Maxims on the 12th of September. On the 23rd of October it was announced that the *Pester Lloyd* had received a letter from Karl Inger (with whom the Mad Mullah was reported to be in com-

munication) showing that he was then in Budapest. On the following day Colonel Manning in addition to reporting the retirement of Colonel Swayne to Bohotle without being attacked said:—"The situation is consequently more satisfactory, but do not cancel orders for Punjab Regiment. All wounded doing excellently."

On the 25th October the *N.-C. Daily News* published the following despatch:—"The person who alleged that he had received letters from a member of Colonel Swayne's force, now avers that these letters were invented with the object of hoaxing the pro-Boer organs. The hoaxer is a London barrister, who says that he is heartily ashamed of himself."

No class of men are more appreciative of kindnesses shown to them or of work done on their behalf than are sailors. An instance of this was given on Thursday evening, when, at the close of a capital concert on board the U.S. Flagship *New York*, Mr. G. G. Brady was presented with a handsome smokers' set in solid silver, the service consisting of cigar box, cigarette box, match boxes, ash-trays etc., the whole being worth some five hundred dollars. The presentation was made by the Chief Boatswain on behalf of the officers and men of the *New York*, amid some of the heartiest cheers that have ever been heard on the warship. The cigar-box bears a suitable inscription.

No doubt we shall have, at some time or other, an accurate estimate of the numbers that actually took the field in support of the Boers. Meanwhile occasional statistics throw some light on the subject. Thus, with reference to rebels in Cape Colony alone, a recent return shows that 3,437 surrendered under the proclamation of June 11th; 3,554 were convicted under the Special Tribunals Act of 1900, and 2,434 are still awaiting trial. Here we have a total of 9,425, and it may be taken for granted that these were only a fraction of the number actually under arms in Cape Colony at the time when disaster after disaster overtook the British arms.

The *Italia Militare e Marina* records a singular accident which happened to some men of the 3rd Regiment of Italian Engineers who were engaged at Tivoli in inflating a balloon with hydrogen gas taken from cylinders. Lieut. E. Cianetti, who was in command, was holding the tube which connected one of the cylinders with the balloon when suddenly the gas ignited, and a tongue of flame some 30 feet long shot out from the cylinder, injuring several men with whom it came in contact. One of these has since died and another is not expected to recover. Lieut. Cianetti, fearing an explosion of the other gas cylinders, immediately ordered his men to withdraw, while he himself remained and threw some water over the cylinders in order to reduce their temperature and to extinguish the flame of burning gas, in both of which objects he was successful.

We have received from Messrs. Raphael Tuck and Sons a specimen of a "Royal Christmas Panel," specially prepared for Her Majesty Queen Alexandra. It very beautifully illustrates the achievements of modern collography and chromolithography. The design on the back is a cradle in a manger, containing the infant Jesus, upon whose head a sunbeam plays, while two doves of peace flutter in the path of the rays. On the front is a finely executed

chromolithograph of St. John playing with a lamb, the *Agnus Dei*. The intention of the whole is to combine the two ideas of the birth of Christ and the restoration of peace. Under that aspect the panel is a marked success, and the excellence of the technique deserves highest praise.

We learn that Mr. J. H. Gubbins has been appointed to the relative rank of Secretary of Legation while retaining his position of Japanese Secretary in Tokyo. Sir Ernest Satow, when he served as Japanese Secretary, had the relative rank of Second Secretary of Legation, he being the first, if we remember aright, to enjoy that special distinction. The honour conferred on Mr. Gubbins is therefore quite without precedent, and every one will agree that it is well deserved. We are also happy to be able to state that Mr. Gubbins' return to Japan is expected about February of next year.

The Prince Imperial, who is now at the Hayama Detached Palace, is suffering from gastric trouble which may prevent him from being present at the Birthday Celebrations on the 3rd proximo. Doctors Hashimoto and Baelz proceeded to Hayama on the 30th instant to determine whether it would be prudent for the Prince to take the journey to Tokyo.

The *Official Gazette* announces that from 1st January next the rates for telegrams to Formosa will be 40 *sen* for a group of 15 *katakana* syllables, and an additional 10 *sen* for every increase of 5 syllables. The rate for telegrams in a foreign language will be 50 *sen* up to five words and 10 *sen* for every additional word.

THE BOOKSHELF.

Japanese Girls and Women, by ALICE MABEL BACON. Boston and New York, Houghton, Mifflin and Company; Yokohama, Messrs. Kelly & Walsh. Illustrated holiday edition.

It is over ten years since this book was first offered to the public, as its gifted authoress reminds us in her preface, and its circle of readers has been ever on the increase. Such a book needs no commendation at our hands, for the high position it has won is its by right of eminent perfection in the particular line of sociology which Miss Bacon has pursued. But we cannot refrain from extending our congratulations to the authoress at having found such a charming illustrator for her book as Mr. Takenouchi. His colour schemes are very dainty, while his imaginative qualities in the more formal black-and-white half-tone plates place him in the first rank among the members of his craft. He has made of *Japanese Girls and Women* a charming gift-book, enhancing its value very greatly. We take the liberty of quoting part of Miss Bacon's new preface. She says:—

* * * The work, as published before, was always, to its author's mind, unfinished; partly because a chapter on household customs, which was necessary for the completion of the plan had to be omitted for the reason that it could not be written in America; and partly because the illustrations desired to fill out the reader's conceptions of the subject matter could not be obtained without a personal visit to Japan.

These two defects have now been remedied. The chapter "Within the Home" contains the supplementary matter necessary to complete the picture of a Japanese woman's life. * * * Besides the thorough revision of the whole book and the additions to each subject discussed of whatever was necessary to bring the discussion up to the times after ten years of change in a rapidly changing country, a final chapter has been added, in which

the effort has been made to analyze the present conditions. From its nature, this chapter can be only a rapid survey of the progress of ten years.

The coloured illustrations are twelve in number while black and white plates and vignettes in the letterpress number nearly fifty. The Riverside Press of Cambridge has reason to be proud of this edition.

Reuter's Agency is informed that Mr. Kruger's book, which will be published on November 15th, will be entitled "Kruger's Memoirs." The work will be published simultaneously in original Dutch by Nijhoff, of The Hague; the German edition by Lehmann, of Munich; and the English edition including the Colonies and America, by Fisher Unwin, of London. The book, which runs to about a hundred thousand words, is the story of Mr. Kruger's life, and extends to the conclusion of War, the Peace negotiations, and the ex-President's views on those events. The Raid is dealt with, and telegrams from Mr. Chamberlain, Mr. Rhodes, and Miss Flora Shaw are reproduced.

We have received by favour of the Canadian Pacific Railway Co.'s Royal Mail Steamship Line a copy of the fifteenth annual report of the Vancouver Board of Trade for the years 1901-1902. It is an instructive record of the advance of a city which only a few years ago was a mere congeries of cabins but which is now one of the most important points in the Canadian Dominion. The illustrations are also most interesting giving as they do views of the harbour, the pier frontage, and of the various industrial enterprises that have sprung up in Vancouver, with other scenes peculiar to the district and country.

YACHTING.

Two races should have closed the season on Saturday but the weather deterred the 21-raters from going out and the cruising class had a fine pull before they could finish the course. Indeed, *Mosquito* gave up without rounding the Widow Buoy. Four boats got away in a heavy rain squall from the N.E. and such heavy weather favouring *Asagao*, which had only one reef tied down, she passed out of the harbour entrance some distance ahead. *Virginia*, close-reefed, came next, then *Molly* with a single reef in, and lastly *Mosquito* double-reefed. So thick was the weather that they could not be distinguished rounding the Lightship and both wind and rain lasted down the Widow Buoy, though the beam sea did not oppress them much. The trip back was wet and dirty but *Asagao*, once round the harbour entrance, came home in a hurry and finished far ahead.

The following are the corrected times:—

	h.m.s.
<i>Molly</i>	4.47.28
<i>Mosquito</i>	—
<i>Asagao</i>	4.16.35
<i>Virginia</i>	4.20.33

Asagao thus wins the first prize and *Virginia* the second.

The racing season will close on Saturday, 1st November, with the following race:—

21 raters:—Postponed race. Course No. 3, 10 Miles:—Start from an imaginary line between two flagboats opposite the French Hatoba, through the Harbour Entrance, around Honmoku Lightship (S.), around the Honmoku Widow Buoy (S.), around the Honmoku Lightship (P.), and back through the Harbour Entrance. Finish across starting line. Start at 2.15 p.m. Finish by 7 p.m. First and Second Prizes by the Club on Club time.

THE SHANGHAI COMPLICATION.

A TELEGRAM to the *Asahi Shimbun* from Berlin throws some light on Germany's attitude towards the Shanghai question. The telegram quotes the *Algemeine Zeitung* as stating that France, Japan and England proposed the withdrawal of their garrisons on two conditions, first that all the Powers concerned should evacuate the place simultaneously; and, secondly, that if any Power subsequently sent troops, the others should be entitled to do so also. Germany, however, required a modification of the second of these conditions in the sense that China should pledge herself not to allow within the Yangtse Valley any operations of foreign troops or ships of war if such operations were opposed to the policy of the open door. It is added that the Chinese Government accepted Germany's modification.

Evidently Great Britain's avowed policy being the preservation of the open door, she could not consistently object to this alleged German modification. To be sure, it is somewhat incongruous that Germany, who is a declared exponent of the closed door policy in her own "sphere of interest," should assume the guardianship of the open-door principle in the sphere of other Powers. Still England would not cavil at Germany's assistance in maintaining the vital basis of her own Far-Eastern policy. The complications that have arisen are probably due altogether to China's diplomatic procedure. The German Government can not be taken to task for seeking to score off its own bat. It has certainly professed hitherto that in sending a garrison to Shanghai it was guided solely by coöperative purposes, and that in keeping a garrison there, it was merely following the example of France, Japan and England. One may therefore contend, without doing any violence to the strict rules of justice, that when Germany makes the withdrawal of her garrison the occasion for independent negotiations with the Chinese, she steps out of the union of Powers in a manner sufficiently sudden to surprise them. But that is a point not convertible into a foundation for diplomatic remonstrance. It is always within the competence of a great Power to take certain liberties with its own conscience, at the expense solely of becoming subsequently an object of doubt to its quondam associates. Germany is bidding for nothing less than the hegemony of the Far East, and we can not but admire the courage and directness of her methods though we frankly admit their unwelcome character from the point of view of rival nations. What is to be said of China, however? We judge that Prince CHING has in this instance repeated his old device of simulated ignorance pending accomplished facts. Just as he blandly professed to know nothing whatever about a Manchurian convention though he was on the point of signing one, or had just signed it, so it

would seem that he has now carefully concealed from England, France and Japan the arrangements he was making with Germany. If that be so, and we believe it to be so, the three Powers thus flouted have a most legitimate cause of grievance against China. She has no kind of right to make such discriminations. It is as though in every-day life one were to hold *A* in parley about a certain piece of business in which he had a legitimate interest, while negotiating secretly with *B* for its transaction. Governments can not be suffered to do such things. They place themselves thereby beyond the pale of civilized comity. And as for the diplomatic quality of the procedure, it belongs to the lowest grade, so far as we can see. China desires to attain a certain end. For its attainment the coöperation of four foreign Powers is necessary. She deliberately antagonizes three of those Powers for the sake of placating the fourth. Perhaps Prince CHING argued with himself thus:—"With France, Japan and England there is no real difficulty. They will withdraw their garrisons at any moment. It is with Germany that I have to devise a working arrangement. She proposes a condition which I know to be in consonance with the avowed policy of England and Japan. Therefore I shall be safe in allowing Germany to assume the honour of the *deus ex machinâ* since the practical result will not be irksome to any one." Prince CHING may have reasoned in that way, if his intelligence is sufficiently shallow. But truly we doubt it. Truly we doubt whether in deliberately transferring the guardianship of the Yangtse Valley from Great Britain to Germany, even Prince CHING can have supposed that his manoeuvres would be condoned. At any rate, if his Imperial Highness intends to plead moral and diplomatic obtuseness in extenuation of his strange procedure, he stands in need of some sharp medicine, which happily Sir ERNEST SATOW seems disposed to administer.

GERMANY IN SHANGHAI.

THE present development of the Shanghai question illustrates the value of assurance. Why should Germany be the Power to prescribe conditions for the evacuation of the settlement by its foreign garrisons? She is one of the latest figures on the Far Eastern stage. China can not be said to have known her, even by name, until some thirty years ago. In the days of VERBIEST and SCHAAL, two of the greatest men that ever visited this quarter of the world, Peking had a vague idea about the existence of a country called "Germania," but no Chinaman took any interest in it, nor did any one imagine that it would one day be found assuming the lead of all other Occidental Powers, not excluding England, which opened China by armed force to the world; France, which assisted in the later stages of the opening, and Russia whose geographical position gave her eminent importance. Prussia was among the "various

smaller states" which applied for permission to participate in the privileges secured by Anglo-French exertions in 1860, and during five years after the signature of her convention in 1861, she was not allowed to have an envoy in Peking. When she did at length succeed in sending one, he took what is usually termed "a back seat," residing in a small house that now belongs to the British Legation precincts, and shaping his course steadily by the English compasses. After 1870, however, the *Tê-i-chi* (*Deutsch*), as the newly risen empire was called, began to demand attention, and from time to time incidents occurred which, had they been attentively considered, might have proved suggestive. Yet so shallowly did the Chinese dip into the future that, in 1890, the Viceroy of Canton publicly described the Germans as more submissive than the English and therefore to be preferred as military teachers. And preferred they were. Mr. CHESTER HOLCOMBE has described the results of the preference, but Mr. CHESTER HOLCOMBE's descriptions often require a great deal of discounting. It seems a long time now since the days when Germans could be truly spoken of as "submissive." Kiaochou, the mailed fist, the campaign of 1900, the Anglo-German convention and certain minor incidents separate the present era very thoroughly from that comparatively recent past. Yet it is not by armed achievements that Germany has been able to assume a place of such eminence. Her tangible accomplishments in the Far East are small. Kiaochou stands easily at the head of the list, and it may fairly be doubted whether the average German regards Kiaochou with any satisfaction, or would be disposed to found upon it any claim for special consideration. Certainly we ourselves have never met a German who did not hold that the material gains accruing from the possession of Kiaochou are not outweighed by the injury that its seizure did to the reputation of his country's international morality. Yet the strong probability is that all the consequences, direct and indirect, of the step were fully weighed in Berlin before it was taken. Germany's foreign policy is nothing if not intelligent. She invariably pursues her purposes along the lines of least resistance, and if she sometimes uses means that invite criticism, the end generally justifies them. Her Far-Eastern diplomacy during the past few years has been remarkably clever. She appears to have gauged the situation exactly. It is a situation where certain forbearances may be confidently reckoned on—forbearances on England's part above all. England was at one time supreme in the Far East; *haud æquus aut secundus*. Whether at that time she would have allowed any other voice to be raised above her own in conference with China, is certainly questionable. But the comparative preponderance of her force has diminished. Her arm, it is true, has not grown feeble; it

is stronger than ever. Other Powers, however, have developed so much muscle that the disparity between their capacity and that of Great Britain is no longer conspicuous. In the meanwhile, too, England has deliberately and avowedly divested her strength of aggressive or selfishly exclusive potentialities. She has pledged herself to maintain equality of privileges for all nations alike, and she has taken care that her own practice shall be consonant with that pledge. There has thus been created for any self-asserting Power a splendid opportunity to range itself in the same rank with England. Everything is possible so long as no breach of treaty is involved. From the moment when England gave her assurance to the world that she eschewed every form of special advantage for herself, whether territorial or commercial or industrial, she ceased to have any "sphere of influence" in China. The term "sphere of influence" must have some significance. It is not a mere idle euphemism. French cartographers when they include Yunnan, Kwangsi and Kwangtung in their country's sphere; Mongolia and Manchuria in Russia's; Shantung in Germany's, and a petty area around Hongkong in England's, intend it to be clearly understood that within those areas the supremacy of France, Russia, Germany and England, respectively, is to be recognised in any emergency, and that there also each Power is to occupy the position of a residuary legatee in the event of the Chinese empire's demise. But England by her own professions is precluded from asserting any such claim to the Yangtse Valley, which was once universally recognised as her "sphere." Germany, therefore, appears to have deliberately mapped out for herself the policy of profiting by British self-effacement. In pursuance of that policy she interpreted the convention of 1899 as establishing her titles in the Yangtse Valley rather than as pledging her to assist in the preservation of China's integrity. In further pursuance of it she contrived that the British troops should serve under a German Field Marshal in 1900. And in final pursuance of it she now requires that in consideration of the withdrawal of her garrison from Shanghai, the Yangtse Valley shall be reckoned as her "sphere of influence." For it is obvious that to that and nothing less do the conditions she proposes amount. They represent the recognised diplomatic formula which constitutes a "sphere." Of course in all this there is not on Germany's part the smallest evidence of friendliness towards England. With whatever amiable eyes we view her doings, it is impossible to mistake her determination to subvert British influence in China. So far as immediately untoward consequences are concerned, her sagacity is unerring. Nothing in her acts furnishes a pretext for serious remonstrance on England's side. But is it altogether wise that she should thus estrange Great Britain? The gain is very problematical. For France also is determined to set up a similar claim in the Yangtze Valley, and thus the only result of

Germany's procedure will be to overthrow England's prescriptive titles without securing their reversion for herself.

MR. GRIFFIS IN THE "INDEPENDENT."

THE Rev. WILLIAM ELLIOT GRIFFIS has an article in the *Independent* of September 25th on the subject of the August Elections in Japan. He is taken to task by the *Kokumin Shimbun* for various erroneous statements. Some of these statements do not seem to be open to such severe criticism. For example, the *Kokumin* objects to Count ITAGAKI's being called the ROUSSEAU of Japan. Certainly the Japanese themselves do not apply that epithet to Count ITAGAKI; they use it of the late Mr. NAKAYE TOKUSUKE. Still many foreigners have been wont to speak thus of Count ITAGAKI. On the other hand, it is quite wrong to speak of Professor TAGUCHI as "one of the famous Kumamoto band first taught by Americans." Mr. TAGUCHI has nothing to do with Kumamoto, and Mr. GRIFFIS' allegation includes the additionally incorrect inference that the editor of the Japanese *Economist* is a Christian. He further says that Count ITAGAKI has "for years been a Christian Church Elder," which is news indeed; he adds that in the Count's mind "the only sure national stability is that broad-based upon the people's will," which is surely an incorrect analysis of the political views originally held by the Count; and he shows Mr. OOKA IKUZO—erroneously written Iooka, evidently a printer's error—as "leader of the *Seiyu-kai*." The *Kokumin* notes these mistakes and tells its readers that from such blunders the general character of Mr. GRIFFIS' article may be inferred. For our own part, however, we regard these points as quite insignificant compared with the following statements:—

Now that Ito leads a preponderating party will Katsura and his diligent comrades step out? While we wait for the answer and hope for better things in Japanese finance, education and progress that means more than materialism and very bad morals, and which has caused something like paralysis in literature and high thinking, and for education something better than rice and dollars, let us look at the leaders and some of those who may become such.

We must frankly admit that owing to the peculiar construction of the above paragraph we are unable clearly to discern what it is that "means materialism and very bad morals"; what it is that has "caused something like paralysis in literature and high thinking"; and how it is that education in Japan is nothing better than "rice and dollars." But we suppose that it will be correct to interpret Mr. GRIFFIS as generally condemning Japanese finance, education and progress, under existing conditions, and as diagnosing a literary and philosophic paralysis. Perhaps he could prove some part of his indictment, but that it is so sweeping as to be seriously unjust, may not be denied by any close observer.

General Katsura has no policy, and a strictly defined if not stalwart policy is what is needed for Japan if she is to hold her own in the fierce competition of the living nations that wish to dominate the dying ones and also the Pacific.

Does Mr. GRIFFIS know anything about Count KATSURA's policy? Has he had any opportunity of knowing? Our own observation forbids us to endorse the dictum that Count KATSURA has no policy. On the contrary, he seems to us to have a very clearly defined policy, and if Mr. GRIFFIS had paused to remember that the Anglo-Japanese Alliance was formed by the KATSURA Cabinet, he might have written differently.

Shimada Saburo * * assaulting by pen, lecture and legislation the social evil of Japan, one of the foulest blots on her good name.

In what respect is the social evil of Japan "one of the foulest blots on her good name"? Many worthy men of Mr. GRIFFIS' persuasion are accustomed to speak in the same strain, but the Japanese bid them look at home before they constitute themselves denouncers of things abroad. When a large subject has to be treated within the limits of a very brief article, the writer is tempted to become epigrammatic, and to sacrifice justice and truth on the altar of picturesqueness and pregnancy of diction. But we do not expect a man of Mr. GRIFFIS' reputation to yield to such temptations.

NAVAL INCREMENT.

THE programme of Japanese Naval expansion announced in *The Times* last summer appears to have been slightly modified by the Cabinet in preparing its final proposal for submission to the Diet next session. According to the news published by *The Times*, the total tonnage to be constructed was 150,000, and the period of construction was to be six years. But it has now been decided that the increment shall aggregate from 80,000 to 100,000 tons, and that the construction period shall be 10 years. Assuming the cost of a thousand tons to be one million *yen*, the sum allotted must be 100 millions approximately—105 millions is the total stated by the *Kokumin Shimbun*,—and if the work be spread over 10 years, the money required annually would be ten million *yen*. That sum will be furnished by the land tax if the Diet consents to continue the present rate unaltered. But the money will not become available until the fiscal year 1904-5, as the revenue derived from the tax in the last year of the quinquennial period is already appropriated for other purposes. Perhaps it should be here explained again that when the rate of the land tax was raised in 1899 from 2.5 per cent. of the assessed value of rural land to 3.3 per cent., the urban rate being at the same time raised to 5 per cent., the Diet imposed a limit of five years, ending on the 31st March, 1904, and the funds accruing from the increased impost were then and there assigned to a definite purpose. Hence it will not be until the year commencing April 1st, 1904, that the money—should the Diet consent to continue the tax as at present—can become available for purposes of naval increment. The Cabinet has cut its coat according to its cloth. This surplus revenue

accruing from the land tax will just suffice to cover the outlays on account of the third programme of increment. The vessels to be built, it is said, are three line-of-battleships of 15,000 tons each, three first-class armoured cruisers of 10,000 tons each, and two second-class cruisers of 5,000 tons each. That it will be observed, makes a total tonnage of 85,000, but presumably some smaller vessels are to be added. This scheme does not include anything on account of naval maintenance. But arrangements have already been made so that, from next year, a sum of 6½ million *yen* will be available annually as a maintenance fund, and consequently from 1904 Japan will spend 16½ millions yearly, in round figures, on the increase and maintenance of her fleet. It is not a large outlay, but it must be welcomed as an indication that she recognises the necessity of developing self-defensive strength commensurate, to some degree at all events, with the growth of foreign potentialities for attack. We may add that the Authorities are credited with the design of ordering the line-of-battle ships only abroad, and constructing the remainder in Japan.

The *Kokumin Shinbun* applauds the Cabinet's policy in this matter, but denies that the proposed construction can be properly called "naval increment;" it is rather of the nature of "naval maintenance." If all ships over 20 years of age, and all below the rank of unarmoured cruisers be deducted, the naval strength of the various Powers stands thus at present:—

Great Britain.....	709,900 tons.
France	281,524 "
Russia	226,626 "
Japan	145,077 "
U.S. of America	143,860 "
Germany	139,568 "
Italy	124,953 "

But nearly all the Powers enumerated in this list have laid down large programmes of expansion, so that, unless Japan follows their example, she will find herself occupying, a few years hence, not the fourth place on the list but the last. The following figures show what the fleets of the world will be in 1908, calculating them on the basis above indicated:—

NAVIES IN 1908.	
Great Britain.....	990,000 tons.
France	480,000 "
U.S. of America	300,000 "
Russia	300,000 "
Germany	220,000 "
Italy	200,000 "

Japan, if she remains with her present fleet of 145,077 tons, would then make a poor showing. Even though she adds 100,000 tons, she will scarcely keep abreast of the times if her construction period be 10 years. With good fortune, however, and good management, she may be able to divert a great part of her maintenance fund to purposes of building additional vessels.

The *Kokumin* and the *Asahi* applaud this programme, but the *Nippon*, true to its traditional views, holds that Japan can not afford such unproductive outlays, and that her business should be to develop her resources, not to augment her armaments. How comfortable it would be for Japan could she safely obey the *Nippon's* counsels?

SEA CUSTOMS, SEA WORDS, AND SEA SONGS.

A LECTURE DELIVERED BEFORE THE YOKOHAMA LITERARY SOCIETY AT VAN SCHAICK HALL, BY MR. A. BELLAMY BROWN, ON FRIDAY, OCTOBER 31ST, 1902.

Times change and we change with them. The saying is as immemorial as the sea, so it is not surprising that many of the old customs of the sailor-folk which I am about to describe have passed away as completely as have the famous line-o'-battle ships—the wooden walls of old England—with which Nelson won his glorious victories. Yet on the whole there is a very close connection between the seamen of the present day, who mostly pursue their calling in steel-built steamers, and the old sea-dogs who knew of nothing finer on the face of the heaving waters than a full-rigged ship, homeward bound, with every stitch of canvas set. This connection is maintained by the traditions of the sea, those customs, superstitions, prejudices, songs and catch-phrases which one generation passes on as a sacred heritage to the next. To me, the descendant of a race of sailors with family traditions running back to the spacious days of good Queen Bess, it is little matter for wonder that many of the old customs of the sea die hard, while others are still surviving in all their pristine vigour. But to my subject. Sailors, though still among the most credulous of mortals, no longer object to going to sea on a Friday, as they did in my father's younger days, though many an aged mariner now snugly moored in the safe harbour of "Blanket Alley," still quotes the couplet,

Friday's sail
Always fail.

Do not the lordly P. and O. mail steamers leave Tilbury on their outward voyages on Friday? while other big lines have also pitched upon this day as a regular sailing date. Less than a hundred years ago the sailor always considered Sunday a lucky day on which to start a voyage; nowadays the practical owners of small coasting craft prefer to see their vessels leaving by the first tide on Sundays, for the simple reason that to do so saves them losing a day in loading or unloading, and so Jack has lost his faith in that day too, and any day of the week suits his convenience and serves his prejudices.

One of the oldest customs of the sea, but one which survives in a very attenuated form to-day, —and that principally on passenger ships—is that of welcoming Father Neptune when a ship crosses "the line." When fine old Sir Henry Keppel, the Father of the British Fleet—who, though ninety-three years of age can still come out and spend the winter at Singapore amid the scenes of his triumphs of sixty years back—when Keppel was a lad Father Neptune's Court was in the prime of its glory and we can read in the old seaman's racy story of his long career, "A Sailor's Life under Four Sovereigns," of how, as a little fellow, he was initiated into the mysteries of an equatorial shave. Yet his experiences were gentle fun compared with the custom of making a crew "free of the Tropics" on crossing the line as described in some verses written by J. Kirkpatrick, M.D., in 1750:—

"Why should the Muse the Tropic part omit,
Or Sailor's custom of observing it;
Where travellers, when first arrived, advance
To buy their freedom, sugar, rum, and nantz;
But if pale poverty the wight surround,
Or surly he refuse his quart and pound,
If he assert the hardship of his cause,
And rave of British rights and English laws;
With little form his slender plea they try,
Who must be moistened if his jury's dry.
Straight on a well poised pole is culprit swung,
His arms embrace the rope by which it's slung.
Aloft! they cry, and lo, aloft he's soar'd,
The highest mortal we survey on board;
But let his future fate inform us all,
The highest have the greatest height to fall.
Amain! they cry, and downward swift he slides,
Cuts the thin air, and wondering flood divides;
Again aloft, he does not long remain,
Alas! he rises but to fall again;
Thrice the blithe crew the diving miser see,
And the third plunge completely sets him free.
Joyous I yield my mulct, with this remark,
'I'll treat ten crews, ere I'll invite a shark'"

The present Prince of Wales, when touring the world recently in that gorgeous pleasure-ship the *Ophir*, received a visit from Father Neptune and his motley court as he crossed the line on the way to Australia. The heir to the British Throne was duly summoned to appear before His Majesty and was ducked ere he could escape. But, as I just now remarked, the sailor-man pure and simple, has dropped the practice entirely. Another old custom which may be said to have fallen into complete desuetude is the "burning of the dead horse." It flourished of course on sailing ships more than on steamers, and was unknown to the Navy. "The dead horse" typifies the one month's pay advanced to a seaman when he "signs articles" for a new voyage, and which, after twenty-eight days at sea, has been worked off. The *modus operandi* was somewhat as follows. An old cask was begged of the carpenter or the person in charge of the stores. This was covered with old tarred canvas and a tail and mane were manufactured out of swabs of oakum, while to make the thing complete a couple of bottles were stuck on either side to represent eyes. Then a procession was formed which perambulated the deck, generally in the second dog watch, to the sound of a dirge-like chanty. After the procession the horse was put up to auction, when the sailors indulged in an opportunity to exercise all the wit at their disposal. Finally a rope was passed round the horse and to the rude melody of a long-drawn-out chorus, it was pulled slowly to the foreyardarm. The chorus ran somewhat like this:—

Now, old horse, your time has come,
And we say so, for we know so!
Altho' many a race you've won,
Oh, poor old man!
You're going now to say goodbye
And we say so, for we know so,
Poor old horse, you're going to die.

This was repeated, with variations, as many times as possible until the "horse" reached the yardarm, where a hand was waiting to cut it adrift. As it plunged into the sea there can be no doubt that many a heart among the crew felt lighter knowing that at last pay had begun.

A hoary custom among seafaring men which will survive as long as men "go down to the sea in ships and do business in great waters" is that which governs the approach to the bridge or poop. The officer of the watch, whether of man-of-war, or merchantman, on steamer or sailing-ship, on the bridge of one or the poop of the other, keeps to the weather side where he can feel the wind or weather upon his cheek, can sniff the land, or sight the coming squall. When the captain or senior officer comes on deck the officer of the watch walks to leeward, thus silently resigning the command to his superior, for the weather side is the side of honour. Any seaman who has been to sea a week always goes to the poop or bridge by the lee ladder, and woe betide the luckless youngster who does not quickly get into his head that invariable rule of the sea, that the weather gangways are for his superiors. Another usance of the sea which has changed with the changing years was associated with the honours paid to, or claimed by, various personages as a mark of respect to themselves or to the country they represented. King Alfred, and later King Edgar, is said to have made the ships of other countries strike or lower their sails when passing the English war-vessels in the narrow seas around their island kingdom. King John enacted that

If the governor or commander of the King's Navie, in his naval expedition shall meet any ship whatsoever by sea, either laden or empty that shall refuse to strike their sails at the command of the King's governor or admiral or his lieutenant, but make resistance against them which belong to his fleet, that then they are to be reputed enemies, and they may be taken, yea, and their ships and goods be confiscated as the goods of enemies.

This custom was vigorously enforced till about the Trafalgar period, when His Majesty's ships were enjoined by a new regulation not to strike their topsails, or take in their flags, "unless the foreigners have done so already, or do so at the same time." To-day "dipping the flag" is an act of courtesy; men-of-war do not do it to one

another, but if merchant ships "dip" their ensigns to them they reply in a similar manner.

On board His Majesty's ships a quaint custom prevails which calls for a remark here, and that is the salute to the quarter-deck when coming up from below or from over the side. This dates back to the time when on every ship was carried a small shrine of Our Lady of the Sea, and as the quarter deck was the holy of holies, the place of supreme authority, the shrine was always erected there. It was incumbent therefore for every one to salute Our Lady's shrine when he stepped upon that portion of the deck—and so strong is the force of inherited custom that it survives to this day though not one man in a thousand can tell you the real reason for it. The ceremony of relieving the wheel in a merchant ship is exactly what it has been for much longer than a hundred years, and it is of too practical utility, even with modern gear, to ever disappear. The new helmsman goes by the lee ladder to the bridge (or quarter-deck) then steps across to the weather side on to the wheel grating behind the steersman; as he takes the spokes of the wheel the man he is about to relieve states the course, "Sou'-West a half West." "Sou'-West a half West," the new man repeats, and the officer of the watch, who is standing near, thus ascertains that the course is correctly given and repeated. In a sailing ship, close-hauled, the words will be, "By the wind," or "Full and by," the first explains itself, the second means to keep the sails full and the ship as near as possible to her course. In steamers the course is now given in degrees as, "South four degrees East," and so forth. An old law of the sea which, I suppose, has greatly fallen into disuse nowadays, forbade the carrying of a knife to the wheel, as it interfered with the magnetic quality of the sensitive compass needles; while no old-time sailor would think of carrying a marlin-spike aloft without a hitch on the end of its lanyard, for a marlin-spike falling on deck would be a terrible weapon to encounter.

The order of precedence for Naval officers going aboard or departing from a ship, and the practice of hailing boats after night-fall date from the eighteenth century. The junior always goes into a boat before his senior, but always leaves it after him. The starboard gangway and the starboard side of the quarter-deck are always used by commissioned officers, while the starboard side of the poop (a word we derived from the Spanish navigators) is sacred to the Admiral should he be aboard. After dark all boats approaching one of His Majesty's ships are hailed, "Boat ahoy!" When a flag-officer is in the boat the reply is "Flag;" when it contains the captain of a ship, the name of the ship is given in response. Commissioned officers, if they are coming aboard, answer, "Aye, aye," but in every other case the reply is "No, no," and this whether the boat is bound for the ship or merely passing.

One of the oldest articles of use at sea is the boatswain's whistle. It was worn by distinguished naval officers in the reign of Henry the Eighth, but has long since fallen from that high estate; but it will disappear, I suppose, only on the day which Kipling sings of in "The last Chantey," when there shall be "no more sea." In the British Navy when the boatswain's mates are piping "all hands" every morning, they generally accompany their whistles with the verselet

All hands, heave out,
Heave out, heave out,
Lash up and stow away.

While a variation runs:—

Come, show a leg,
Show a leg
And not a Purser's stocking.

I wish I had the time to describe many another strange custom—strange that is to the landsman's way of thinking—but I must pass on to the next division of my subject: the queer words and expressions which proceed from the lips of sailors. Every calling, every profession, every trade, have their own peculiar words, but the words which belong to the sea are, to my way of thinking, the raciest of them all. You have often heard, I daresay, the expression "son of a sea-cook." It is invariably used with a most con-

temptuous inflection in the voice. But a hundred years ago the ship's cook in the Royal Navy was a most important personage indeed. Mr. Walter Jeffrey (to whom I am indebted for many of the facts set forth in this paper) has run across the following incident which occurred in 1815:—

"According to an established custom in the Navy when a ship is paid off no officer must quit the port or consider himself discharged until the pennant is struck, which can only be done by the cook as the last officer, at sunset, and should he be absent, no other person can perform the office however desirous the officers may be of taking their departure and although there may not be a single seaman or marine on board. A curious instance of this took place on the *Caledonia's* being paid off. When the time arrived for hauling down the pennant no cook could be found, from which cause the officers were under the necessity of waiting a day or two until he made his appearance."

A person for whom Jack has the greatest contempt is the man who shirks his fair share of work when hauling on a rope, and the bitterest word of derision he can use towards him is to call that man "a blooming sodjer." Jack rises to a high level of sarcastic wit at such an opportunity, as witness: "Pull, pull you blooming sodjer; pull! you couldn't pull weevils off a wet tarpaulin." A dead calm is often dubbed "a soldier's wind." On a wet night, when he has to turn out to take his watch, Jack often growls out, "Who'd sell a farm and go to sea?"—and although perhaps he is about to face a hurricane, he will let fly a whole gale of blasphemy at the head of the ship's boy who had inadvertently capsized water on to the place in the fo'c'stle where he desires to sit down when pulling on his sea boots. For then, says he, to be wet thus is to be wet all over. Talking of sarcasm reminds me of a retort reported of an able seaman who had been ordered to do something in a particularly dangerous part of the ship. A companion happened to suggest that he was glad it wasn't his job, whereupon Jack turned round and stayed any further discussion on the point by singing out, "Ah, I see you want my clothes." A fore-castle definition of a drunken man is "two sheets in the wind and the other shivering;" another neat picture of slowness and indecision is conveyed to a nautical mind by the remark "that fellow is backing and filling like a billy-goat in stays"; while for defining what intense cold may mean it would be hard to beat "as cold as the top hank of a Greenlander's jib;" or for describing a badly fitting garment, "like a purser's shirt on a hand-spike, all over and touching nowhere." A coasting sailor I have heard spoken of as one whose deck promenade only affords space for "two turns round the galley and one round the long boat with a pull at the scuttle butt." "You call that water fresh," said the mate to a boy who had brought him some brackish water, "That fresh, why it is as salt as Lot's wife." Which calls to memory another saying connected with salt, "Why, he'd burn salt water." This is said by Jack of an incompetent cook, and a lower depth of contempt for a fellow mortal could not be plumbed. Talking of sailors' repartee, Kipling once overheard a stout corporal of marines shut off a conversation with a Yeoman of Signals with the remark:—"Here, you get up on to yer 'igh and 'aughty bridge and persecute yer perfession." But to return to the words which are redolent of the briny deep. Who has not heard of the "Handy-man" in South Africa who once found himself in charge of a working party of soldiers. They were hauling at something and Jack wanted them to slacken their pace a bit. Using a phrase of the sea, he sang out, "Handsomely, handsomely." But, alas! he was speaking Greek, so far as his hearers were concerned. The soldiers continued to pull as hard as ever, and so the command rang forth, "Belay there;" but that was no good, so he said, "Vast heaving;" still he was misunderstood. "Oh easy all, your blooming idiots" cried the Petty Officer in despair; but Tommy still continued to haul for dear life. "Oh, what does yer mother say when she wants yer to stop," said the bewildered sailor at last, and the soldiers only then comprehended what was required of them. "Aye, aye sir," is still the seamanlike way of answering an officer and only the other day I heard on board one of the ships of His Majesty's Navy,

a phrase Nelson would have understood. A lieutenant said, "Belay the steam cutter," and then, "Carry on the whaler," meaning that he had finished with the one but still required the other.

I said in my opening sentences that the sailor was still superstitious, despite the great changes that have come over his calling in these latter years. I wonder if the superstition is still prevalent among them, as it was in my father's days, that when old sailors die their spirits take on the likeness of an albatross? The men holding this strange belief had never heard of Coleridge's "Rhyme of the Ancient Mariner," but whenever anyone had the temerity to question them regarding it, they clung to their notion with all the tenacity of their calling and refused to have anything to do with catching or killing the beautiful bird which exercised such a baleful influence upon the hero of that wondrous poem. It is a beautiful idea anyway and characteristic of Jack's occasional intrusion into the realm of poesy.

The average sailor-man is sentimental at the core, and likes a rhyme and a song with the best of us, but he has a thorough-going contempt for the sailor songs which the landsmen sing. Even in the days when Dibdin was turning out a song a-week for the sailors of Portsmouth and the Three Towns it was but one in twenty, nay one in a hundred, which Jack would adopt and make free of the sea. "Tom Bowling," the "Arethusa," the "Battle of the Baltic"—they liked these and condescended to sing them, but "Ye Mariners of England," one of the most heroic poems in the English language, they condemned as "rot." Thomas Campbell wrote this fine piece of verse and I quote the first and last stanzas to emphasize Jack's choice of songs:

Ye mariners of England!
That guard our native seas;
Whose flag has braved a thousand years
The battle and the breeze!
Your glorious standard launch again
To match another foe!
And sweep through the deep,
While the stormy winds do blow;
While the battle rages loud and long,
And the stormy winds do blow.

The meteor flag of England
Shall yet terrific burn;
Till danger's troubled night depart,
And the star of peace return.
Then, then, ye ocean warriors!
Our song and feast shall flow
To the fame of your name,
When the storm has ceased to blow;
When the fierce fight is heard no more,
And the storm has ceased to blow.

Campbell was a landsman; perhaps that explains why Jack has such a contempt for this famous ballad. Now Captain Marryat was a man after Jack's own heart and he wrote a song of the sea which was at once adopted by the sailors both in and out of the royal service. I can well remember hearing it sung on my father's ship by a very old man amid the admiring approval of the whole fo'c'stle. Marryat's song ran thus:—

The captain stood on the carronade: "First Luff,"
then says he,
"Send all my merry men aft here, for they must list
to me;
I haven't the gift of the gab, my sons, because I'm
bred to the sea;
But that ship there's a Frenchy who means to fight
with we.
And odds bobs, hammer and tongs, long as I've
been to sea,
I've fought 'gainst every odds—but I've gained the
victory!"

"That ship there's a Frenchy, and if we don't take
she,
'Tis a thousand bullets to one, that she will capture
we;
I haven't the gift of the gab, my boys, so each man
to his gun;
If she's not mine in half an hour, I'll flog each
mother's son.
For odds bobs, hammer and tongs, long as I've been
to sea,
I've fought 'gainst every odds—and I've gained the
victory!"

We fought for twenty minutes, when the Frenchman
had enough;
"I little thought," said he, "that your men were of
such stuff;"

Our captain took the Frenchman's sword, a low bow made him to *lie*;
 "I haven't the gift of the gab, mouseer, but polite I wish to be.
 And odds bobs, hammer and tongs, long as I've been to sea,
 I've fought 'gainst every odds and I've gained the victory!"
 Our captain sent for all of us: "My merry men," said he,
 "I haven't the gift of the gab, my lads, but yet I thankful be!
 You've done your duty handsomely; each man stood to his gun;
 If you hadn't, you villains, as sure as day, I'd have flogged each mother's son.
 For odds bobs, hammer and tongs, as long as I'm at sea,
 I'll fight 'gainst every odds—and I'll gain the victory!"

But the songs which are purely typical of the sea are those which go by the name of chanties. They are choruses which sprang up among the sailors themselves, being the outcome of their immediate wants in the way of melody. Usefulness to the matter in hand is their predominating virtue; beauty of music or literary form they can lay little claim to. They are peculiar to the merchant service, and while some of them go back to the time of the French wars, others sprang up after the civil war in America, the niggers in the New Orleans cotton trade teaching the lads of the sea how to make many a rattling good chorus lighten the burden of their work. One of the most famous chanties that I know begins:—

Ranzo was no sailor,
 Ranzo, boys, Ranzo.
 Ranzo was a tailor;
 Ranzo, boys, Ranzo.
 Ranzo joined the "Beauty"
 Ranzo, boys, Ranzo,
 And did not know his duty
 Ranzo, boys, Ranzo.

And so on and so forth. The story runs to scores of verses, for it tells of the miseries of poor Ranzo in learning the way of the sea—a very hard way indeed for a luckless land-lubber to traverse on a deep-water ship—until he became "skipper of a China clipper." A chanty which evidently had a nigger for composer begins:—

I wish I was in Mobile Bay
 Screwing cotton all the day.

And another has for chorus:—

Fare you well my bonny young gal
 We're bound for the Rio Grand.

A favourite with old-timers of a generation back began:—

In the Blackball line I served my time;
 Hurrah for the Blackball line!
 O! rise and shine in the Blackball line.
 Hurrah for the Blackball line!

A fine chanty hailing from American waters runs thus:—

Oh, Polly Brown, I love your daughter,
 A way my rolling river:
 Oh, Polly Brown, I long to hear you,
 Across the wild Missouri.
 Oh, Polly Brown, I love you dearly,
 Away my rolling river!
 My heart is yours or very nearly,
 Ah, ah, we're bound away
 'Cross the wide Missouri.

And who that has lived in sight of blue water has not heard of "Shanandore"? The usefulness of these songs, as Mr. Jeffrey observes, is in getting a long pull and a short pull, a strong pull, and a pull altogether. For instance, even land-men can understand how at the word *haul* in this verse, every man puts his weight on the rope:—

Haul on the bowline, the fore and main-top bowline,
 Haul on the bowline, the bowline, haul!
 Haul on the bowline, oh bully for the bowline,
 Haul on the bowline, the bowline, haul.

Here is a chanty that used to be always sung when the anchor was weighed for the homeward voyage:—

We are homeward bound to Liverpool town,
 Good-bye, fare ye well,
 Good-bye, fare ye well,
 Get up, Jack, and let John sit down.
 Good-bye, fare ye well,
 We are homeward bound, good-bye, fare ye well.

A great favourite among the sailors of a past generation was

Old Stormy's dead and gone to rest;
 To my ay ay, ay, Mister Storm Along,
 When Stormy died I dug his grave
 A-a-way, you Storm Along,
 I dug his grave with a silver spade;
 To my ay, ay, ay, Mister Storm Along!
 And I lowered him down with a golden chain,
 A a-way you Storm Along.

Into his grave so deep and wide
 To my ay, ay, ay Mister Storm Along!

In quite another vein is the old North Country chanty:—

And its home, dearie home!
 Oh, its home I want to be,
 My topsails are hoisted
 And I'm bound to sea;
 For the oak and the ash
 And the bonny birch tree
 They are all growing green
 In the North Countree

When last century was still in the prime of its middle-age, a chanty which arose during the Napoleonic wars was a special favourite on English clippers. It began:—

Boney was a warrior,
 Away, a yah!
 O Boney was a warrior
 John Franzo swore
 Boney went to Moscow,
 Away, ah yah!

And so on for a mile or so with all the incidents that Jack could remember in the career of the "little Corporal." Sometimes the fo'c'stle hands used their chanty to convey a message to the "after guard," in this fashion:—

I thought I heard our Old Man say
 He'd give us grog this very day,
 So pull boys, pull.

If, however, it was apparent that the appeal was being made in vain, the chorus changed to:—

Then we'll hang the steward,
 Hang boys, hang.

Then, in very much softer tones, would come:—

Then we'll hang the Old Man,
 Hang boys, hang.

And finally at the top of their voices:—

Then we'll all hang together,
 Hang boys, hang.

The Japanese have chanties which they use when warping out of port, or hoisting their heavy lumbering yard. I have not been able to secure any of these songs, however, though I have come across a fine fisherman's song in one of Mr. Lafcadio Hearn's recent books. In this country, too, sailors also have the custom of vowing to present a yard, a mast, or a rudder to a particular deity if preserved through a storm; and at a seaport the sailors may be seen, dressed in their best, taking their offering to the temple, when they either redeem it from the priest; or leave it with him. In many sea-side temples, too, may be seen models of Japanese ships hanging from the roof, as in Brittany, Italy, and in some of the remote coasting villages of my own dear East Anglia—the votive offerings of sailors to the Power who rules the waves.

I have given you the chanties sung on leaving home, on starting the return voyage, and now I give one that used to be sung when the men were pumping out the ship, their last duty after making fast to the wharf, before being paid off. There is a considerable amount of humour in the verse, and as you will see Jack takes the opportunity of expressing his opinion of his officers in very plain language:—

Leave her, Johnny, leave her,
 For the food is poor and the wages low,
 And its time to leave her Johnny.

A hungry ship and a hungry crew,
 Leave her, Johnny, leave her.

A hard captain and chief mate too,
 Its time for us to leave her.

A chanty which contains more in it than meets the eye is one sung when furling a big sail. It runs

Way, hey, hey, Yah!
 To pay Paddy Doyle for his boots
 We'll tauten the bunt, and we'll furl, aye,
 And pay Paddy Doyle for his boots.

Paddy Doyle, it should be explained, was a famous boarding-house master who invariably gave Jack

out of an advance note a pair of sea-boots and nothing more. When the sailor was in bitter mood he remembered the transaction and longed for a day of reckoning. This same Paddy Doyle had a way of preparing men for the sea which was unique, if gossip may be trusted. The qualifications for an A.B. are, shortly, that he should be able to "hand, reef, and steer." Now Paddy was in the habit of finding waifs in the street and shipping them on outward bounders for a commission and the advance note. He prepared them thus:—He had a room in which they were taught the art of reefing and furling a sail by means of a blanket rigged across two sticks; they were taught to steer with a cart-wheel and their education was completed by making them walk three times round a table on which was placed a ram's horn. Paddy would then go before the shipping-master with a clear conscience and swear that the man had learnt to steer and furl—"had taken his trick at the wheel" as the sailors say—and had been three times round the Horn! My last chanty is a fine old English chorus which is known as "Blow the man down."

Oh, blow the man down, bullies,
 Blow the man down;
 Give us some time to blow the man down;
 Blow the man down, you darling lie down,
 Blow the man down for fair London town,
 Give us some time to blow the man down.

To those who love the sea what a picture the twenty and odd verses of this chanty conjure up: the sea still heaving with the after effects of a heavy gale, the waves still running high, and the reefs just being shaken out of the bellying canvas as the good ship staggers along, and all hands hoisting topsails. Then a quick transition to a dead calm and the crew settle down to fishing. They secure a shark, a whale, a mackerel and a herring, all of which the Captain takes for his own use,—and is cursed accordingly—ere the breeze comes again to their aid.

One more sea-picture and I have done. Rudyard Kipling in "His Fleet in Being" has given a series of impressions of life on one of His Majesty's ships at the present day, which for accuracy and sharp-bitten precision cannot be beaten. He had dined one night at the Admiral's table and now proceeds to partake of a dinner in the Gunroom. His cicerone is a young Sub-Lieutenant and the yarn runneth:—

DINNER IN A GUNROOM.

"Well, now you've done that," said Twenty-one, "suppose you come and dine in a gunroom. I'll chaperone you to the best disciplined Gunroom in the Fleet. We'll show you." So we went, Twenty-one and me, to another huge battleship, precisely like the Admiral's; but this time Captains, Commanders, and Lieutenants were invisible, or showed only as superior luminaries far along the decks. We dealt with nothing above the rank of Sub-Lieutenant, and the greetings of that grade are cordial and warm. Down below—it was twice the size of our Wardroom—we found their Gunroom, which differs in appointments and fittings from everything Marryat conceived, but I think the old unquenchable spirit persists. Of the twenty odd inhabitants, a dozen at least were midshipman, and therefore, as Twenty-one explained, "didn't count." They talked among themselves in subdued, eager whispers, dropping into the meal as they came off duty. The senior Sub-Lieutenant (quite 19 years old) was responsible for the justly vaunted discipline, and it is no small thing to reduce to silence boys of 16 to 18, all full of natural and acquired devilry. But it was done according to the custom of the Navy and the etiquette of the Gunroom, whose laws change not. Here the young Nelson learns to obey, in silence and at a run. He has been broken in on the *Britannia*, but the Gunroom gives him enduring polish. The Admiral knows a midshipman rather as the Almighty knows a blackbeetle; the Captain knows him as the Head of Harrow might know a babe in a perambulator; the First Lieutenant knows him as the Head of Games knows a fag in the Lower Third: but the Senior Sub-Lieutenant knows him as a brand to be snatched from the burning; and works him accordingly. In return, the midshipman patronises the Admiral, at a safe distance; is blandly superior to his Captain, also at a safe distance: sings time honoured lampoons about the First Lieutenant, at a very safe distance; but most strictly obeys the senior Sub-Lieutenant. For seven years, counting his time in the *Britannia*, he dresses at a chest and sleeps in a hammock, getting to know himself and his associates with that deadly stark intimacy that only

flourishes in the Navy. There are no excuses in his service. He must not answer back; and he must do as he is told—not immediately, but sooner—much sooner. These are the years that weed out those that have mistaken their calling. The incompetents go home, and curse the Navy evermore. The virtuous stay on and learn to steal brass boiler-tubes for their boats: learn to smoke secretly in the fighting tops (they are forbidden tobacco till eighteen); fall into and out of all manner of tight places that require dexterity and a cheek of cold-drawn brass: pick up more than they learn under the Instructor from the talk of the warrant officers and men and the carefully watched mistakes of their elders; and when they reach commissioned rank impart their lore to their successors with a dirk scabbard. If "White Jacket" had not served before the mast, what a picture he might have given us of the Gunroom! It is at once a Republic and a Despotism. The Extreme Left and the unswerving Centre of old tradition. Individually it is always in hot water; collectively it can and does criticise with point and freedom anything and everything on its horizon, from Fleet manœuvres to the fit of an Instructor's collar. Pungent, merciless, indomitable is the Gunroom, but it preserves discipline. The Senior Sub-Lieutenant (one could not help thinking of O'Brien when he cured Peter of the sea sickness) stuck a fork into the equivalent for a beam overhead. Ere it ceased vibrating the midshipmen had gone, flitting like bats; had flung themselves backwards from their seats, and were through the door. "That's when we think the conversation might hurt their little morals," said my host. "But they can move much quicker than that. Make 'em do it again" said Twenty-one—a midshipman three years ago. "You're getting awfully slack, I think. What do you do when?"—he presented a contingency. "Oh! then we"—The sub-lieutenant described the course of action with minute particularity, adding, "Wouldn't you like to see it done?" Set it to my account that I saved somebody's darling from being butchered to make a gunroom's holiday. But the midshipmen have an asylum of their own in the schoolroom, where, I was assured, they were worked within an inch of their lives. The remnant seemed unusually healthy, for when we went out to visit a big smoking concert on the Flagship I caught glimpses of limber youths racketing in dumb show round their hammocks. Not being privileged to have speech with them, I asked Twenty-one what the "protective diplomacy" of Midshipmen might be. He gave me to understand that stirring a hornet's nest with the bare toe is as tame and pale beside too thoroughly irritating the junior members of the Gunroom. Had himself been concerned in such revolutions. "We get licked, of course" he concluded cheerfully, "but the seniors let us alone after that. Wasn't it a beautifully disciplined Mess, though."

I hope I have not wearied your patience with my yarns of the sea. The subject is so fascinating, so vast that the trouble is to keep a paper based upon it within reasonable limits. I have dwelt to-night principally upon the customs and songs of the sailor-men; you may permit me to return on another occasion and tell of some of the heroes, both of the Navy and the merchant service, who came to their fame by the sea. For

We have fed our sea for a thousand years,
And she calls us, still unfed,
Though there's never a wave of all her waves
But marks our English dead.
We have straved our best to the weeds' unrest,
To the shark and the sheering gull.
If blood be the price of admiralty,
Lord God, we ha' paid in full!

THE CHRISTIAN DAIMYO.

CHAPTER XI.

(CONTINUED FROM LAST ISSUE.)

On the fall of Odawara, Hojo Ujimasa had to open his bowels, and his estates passed to Tokugawa Ieyasu, who, from this moment, became, after Hideyoshi, the most influential and powerful personage in Japan. Leo Gamo Ujisato, *daimyo* of Matsuzaki (Ise), received in reward for his exploits, at the siege of Odawara, the daimyate of Wakamatsu (Aizu), which Hideyoshi had just taken from Date, and which brought in a million *koku* of revenue. Thus Gamo took his place as one of the five greatest *daimyo* of Japan.(5)

Ota Nobuo, accused, rightly or wrongly, of having plotted with Hojo, was dispossessed of his

dominions, and received in exchange a petty revenue of 20,000 *koku* only. In other words, he lost the provinces of Owari, Ise and Iga, which brought in 800,000 *koku*. At first he was entrusted to Gamo, then, after some time, he became attached to the household of Hideyoshi, where he passed henceforth his existence in enlivening his master's leisure, in executing martial dances, or in serving him with tea, arts, in which it appears that he excelled.

While these things happened in Japan, Father Valignani meditated in the Indies on obtaining the revocation of the edict of Hideyoshi. Remaining at Goa in 1582, while the four ambassadors took the road to Europe, he followed with anxiety both the progress of the latter, and the political and religious evolution of Japan. The news of Hideyoshi's edict had struck him like a thunderbolt, and he resolved to go in person to seek the powerful Kwampaku, and explain to him how greatly he had been mistaken with regard to the intentions of the Christian preachers. The return of the ambassadors ought to give him an opportunity of carrying out this project. As in his capacity of Jesuit, Japan was shut to him, he wished to land there in an official character. Edward de Menesez, Viceroy of the Indies, was ready to second him in this enterprise, and conferred on him the title of special envoy of the Government of the Indies. He deputed him to thank Hideyoshi for the favours he had accorded to the Portuguese in general and the Religious in particular, and to beg a continuance of his high protection. The admission of a Religious into Hideyoshi's presence ought, according to the Japanese custom, to be equivalent to a return to favour, and the edict of banishment would be by the same fact revoked. This plan, cleverly conceived, was to succeed, at least in part.

On the first of April, 1588, Father Valignani left Goa, accompanied by the four ambassadors. On reaching Macao, he wrote to Hideyoshi to inform him of the mission with which he was charged, and to ask his permission to land in Japan. This humble manner of asking an audience flattered the vanity of Hideyoshi, who at once answered the Religious that his demand was granted. Upon this favourable answer, Valignani and his companions again continued their journey, and reached Nagasaki in July, 1590. All the town was in a state of excitement that day. The *daimyo* of Arima and Omura, the relatives of the ambassadors, and the Christians of the neighbourhood had gone thither, all eager to see the ambassadors, and to hear them tell of the marvels of the West. Great above all was the joy of the mothers to see again their sons, who had left them eight years before, at a time when they were little more than children, and who came back to them full-grown men.

While the ambassadors and their relatives gave themselves up to the joy they experienced at seeing one another again, after a long absence, Valignani addressed a new letter to Hideyoshi to notify him of his arrival at Nagasaki. As it had been arranged that the Christian *daimyo* should have nothing to do with this business, lest the suspicions of Hideyoshi might be aroused, it was Asano Nagamasa who was requested to conduct the negotiations between Hideyoshi and Valignani. Asano, a great friend of the Jesuits, and at the same time very much esteemed by Hideyoshi, of whom he was also the brother-in-law(6), in presenting this second missive to Hideyoshi, knew how to give so favourable a turn to this delicate affair, that Hideyoshi declared that he would not only receive in audience the envoy of the Viceroy of the Indies, but also the four ambassadors, who had returned from Europe. In spite of his great desire to attain the object of his voyage as speedily as possible, Valignani had still to wait for many long months before being able to present himself before Hideyoshi. The expedition against Hojo hardly allowed the latter time to occupy himself about this affair. Finally, when Hideyoshi had returned to Kyoto, Valignani fell dangerously ill. It was not till towards the middle of January, 1591, that he was able to leave

Nagasaki. The four ambassadors and twelve of the leading Portuguese of Nagasaki, preceded by sea to their destination, whilst Valignani, accompanied by the two Religious, Organtino and Mesquita and some Portuguese, made the voyage by land, as far as the straits of Shimonoseki.

Christians and Pagans showed the greatest desire to fête Father Valignani, during his voyage across Kiushu. Otomo Yoshimune, feeling the influence of this enthusiasm, sent him a long letter in which he avowed his errors, and asked pardon for his conduct towards the Christians. Father Valignani answered that, in memory of his father Sorin, he would forget the past. Nabeshima Katsushige, son of the *daimyo* of Saga, went a league to meet the Religious, guarded them for two days in his own residence, and, when they parted, he lent them his own horses as far as Kokura.(7)

Mori Yoshinari, the *daimyo* of this locality, was no less obliging: after having treated the travellers with all respect at his own expense, he had them sent to Shimonoseki, where the four ambassadors were already awaiting them.

From Shimonoseki the travellers went by sea to Murotsu, a port of the province of Harima. Ryusa, Konishi's father, and then governor of Sakai, had given orders to the governor of Murotsu to receive the ambassadors with all possible honour. As it was then near the new year, the *daimyo* passing through Murotsu, on their way to Kyoto, to pay their respects to Hideyoshi, all wished to see and hear the ambassadors. The most eager were Mori Terumoto, So Yoshitomo of Tsushima, and Kuroda Nagamasa. The latter, who was 23 years old, had just succeeded his father, Simon Yoshitaka, in the daimyate of Nakatsu. Baptized in haste and continually in arms ever after, the religious instruction of Nagamasa was of the most summary kind. It was only while listening to the accounts of the ambassadors, and above all on seeing their ardent faith, that he understood why his father had undertaken to convert him. Otomo Yoshimune, encouraged by the kindly answer of Valignani, also came to see the travellers. The exhortations of his cousin, Mancio Ito, made such an impression on him, that he promised to reconcile himself with God.

At Kyoto, however, where Hideyoshi had resolved to receive the ambassadors, the situation seemed to become complicated. The extreme susceptibility of the Kwampaku had been awakened by the great devotedness the different *daimyo* had shown towards Valignani and his companions. Nabeshima and Mori, who, in their capacity of Governors of Nagasaki, had flattered themselves that they would have the honour of introducing the embassy into Hideyoshi's presence, were immediately sent back to their domains. Asano, who could have occupied himself with this affair, without awakening suspicion, was then absent. Therefore Kuroda Yoshitaka dared to sound Hideyoshi, but the latter became infuriated, and declared to Kuroda that his intervention would spoil everything. And to give a reason for this declaration, Hideyoshi added that he disliked Kuroda on account of his religion, and that already, at the division of Kiushu, he would have given him a large portion, if he had not been a Christian.(8)

All was already thought to be lost, when, at Kuroda's request, Masuda Nagamori, *daimyo* of Koriyama (Yamato), undertook this difficult mission. He discharged it so well that Hideyoshi at length fixed the day on which he would receive the embassy. Thus, after waiting about two months in the port of Murotsu, the travellers set sail towards Osaka, where a crowd of Christians, among them Takayama Ukon, awaited the arrival of Father Valignani and his suite.

After staying three days at Osaka, the ambassadors got into the junks that Hidenaga, Hideyoshi's brother, had sent before them; and ascending the Yodogawa, they reached Toba, one league distant from Kyoto. There, horses and litters awaited them, and the next morning they made their solemn entry into the capital of Japan.

(5) They were: Tokugawa, Maeda, Mori, Uesugi, Gamo.

(6) Asano had married the younger sister of Mandokoro, Hideyoshi's wife.

(7) Hay, p. 124.

(8) Hay, p. 130.

The Governor had the streets covered with sand and a double row of *samurai* kept back the curious crowd. It is sufficient to remember to what degree the Portuguese generally pushed the taste for luxury to get an idea of the splendour of the procession. At the head of it marched two Indians leading an Arab horse harnessed in European style: it was one of the numerous presents the Viceroy of the Indies had destined for Hideyoshi. Then came on foot several Portuguese and Japanese, the four ambassadors clad in their black velvet costumes, of which Pope Gregory XIII. had made them a present; Fathers Valignani, Organtino and Mesquita in litters; then the rest of the Portuguese, who brought up the rear. They had at first to stop at the palace, where Hideyoshi had lived before the building of the Juraku, and it was not until several days after that Hideyoshi received them at the Juraku itself.

On his side, the Kampaku had also displayed as much luxury as possible. Seated on his estrade and surrounded by all that Japan regarded as greatest, he received both the presents (9) of the Viceroy and Father Valignani's credentials. He also offered presents to all the members of the embassy and had a refection served for them. The embassy had visibly flattered Hideyoshi, he could not conceal the fact, and the rather stiff formalities of the ceremonial once at an end, he began to converse familiarly with Father Valignani and his companions. He especially questioned the Japanese on what they had seen in Europe. His questions were principally addressed to Mancio Ito, whom he never tired of interrogating about Europe, the Indies, and China. He even disclosed to Ito his intention of also seeing these two latter countries, which, he said, he would conquer, passing through Korea. He then declared that the foreign preachers had broken the authority of the bonzes in Japan, and that this was why they hated them so much. Finally, he informed Father Valignani that he could remain where he liked, while awaiting an opportunity to return to the Indies.

It was first at Kyoto that Valignani and his companions fixed their residence. For several days, visitors, eager to hear about the marvels of Europe, flowed in in great numbers. Maps of the world, terrestrial globes, clocks with bells and other curiosities from the West brought cries of admiration from all. The *daimyo*, encouraged by the absence of Hideyoshi, who, along with his cousin Kato Kiyomasa, had gone to visit his natal village of Nakamura, showed no less eagerness to visit the ambassadors. What struck them most of all, were the accounts the travellers gave on the subject of the Christian religion. It must be confessed that the four ambassadors spoke with so much conviction that they inflamed their auditors. Maeda Toshiie, *daimyo* of Kanazawa, already spoke of becoming a Christian, and So Yoshitomo, *daimyo* of Tsushima, still more convinced, wished to receive baptism before returning to his island. It is true that So had already, before this interview, some slight desire of embracing Christianity: he had been led up to this point by Konishi whose daughter he had married. The baptism of So took place in the strictest secrecy, lest Hideyoshi should be irritated, but, in his enthusiasm, So promised to make the whole island of Tsushima Christian, as soon as he had gone home (10).

When Hideyoshi had returned to Kyoto, Valignani communicated to him his intention of going to Nagasaki, to await there his orders. Hideyoshi acquiesced in this demand, but he insisted that Father Mesquita should remain at Kyoto, in order that he, Hideyoshi, might be able to send his answer through this Religious, when that answer would be ready. Valignani and the ambassadors embarked at once and sailed towards Nagasaki, passing by Hirado. Having reached this port, they went at first to Isabella, the widow of Anthony Kotoda, and remained there three days. Thanks to Isabella, Valignani succeeded in having an interview with Mencia, daughter of Omura Sumitada, and wife of

Matsura Hisanobu. Married at the age of 16 years into this family hostile to her religion, Mencia had severe trials to endure. Above all, since the death of her father, the situation had become so difficult, that she wrote to her brother, Yoshisaki, begging him to come and take her away. This extreme measure had put an end to her troubles, and Hisanobu, the husband of Mencia, permitted her to have her three children baptized and even promised that he would embrace her religion, once his father was dead. It was, then, a great consolation for this unfortunate woman to be able to receive in her house a priest, a pleasure of which she had been completely deprived for four years. As soon as she found herself in presence of Father Valignani, she burst into sobs and, as if transported by the ardent faith she had inherited from her father, she declared that she was ready to suffer even death itself rather than abandon her religion.

From Hirado, Valignani and the ambassadors went to Arima, where the *daimyo* Protasius Harunobu, although seriously ill, received them himself with great pomp. The letter as well as the presents of the Pope, consisting of a sword, a helmet and a relic of the Holy Cross, were with due solemnity placed in his hands. Thence the ambassadors directed their steps to Omura, where the same ceremony took place for the *daimyo* Sanchez Yoshisaki. Finally, they visited Otomo Yoshimune, and confided to him the presents, which the Pope had destined for his father Sorin.

After having acquitted themselves of their different missions, the ambassadors put into execution a resolution taken during their sojourn in Europe: to the great astonishment of all, they renounced the world and asked leave to enter the company of Jesus. Mancio Ito even induced his brother Justus, then 18 years of age, to follow his example (11). Thus, Father Valignani had formerly been mistaken in their regard: the honours that had been showered on them in Europe, had not turned their heads: on the contrary, they had been perfectly aware that these honours had been rendered them rather in their quality of new-converts, than in their quality of Japanese.

All these events had raised the courage of the Christians and, in view of the success of the embassy, they imagined that the edict of proscription was, if not revoked, at least forgotten. But, Nabeshima and Mori, the two Governors of Nagasaki, took upon themselves the task of dispelling this erroneous impression. Deeply wounded at the precipitate fashion in which Hideyoshi had obliged them to leave Kyoto, when they counted on being called upon to introduce the ambassadors to the Kwampaku, irritated also that Father Valignani as well as the four ambassadors should have forgotten them in the distribution of presents, they vented all their ill-feeling on the Jesuits and the Portuguese. First they spread the rumour that the mission of Valignani, as ambassador of the Indies, had been invented entirely, with the sole object of prolonging the stay of the Religious in Japan. They also added that since the arrival of Valignani, the Jesuits had taken on airs of liberty, and that the Christians assembled in the churches as before the edict of Hideyoshi. These rumours reached the ears of the Kwampaku who, in his anger, threatened to put all the Jesuits to death. It was then that Valignani wished to make all the Religious leave Japan, and go to one of the islands on the coast of China, until better times. But the *daimyo* of Arima, Omura and Amakusa, as well as the sons of Kotoda, formally opposed this resolution, and offered the Jesuits retreats in their domains. On the advice of Konishi, Amakusa received the greater number of them, and it was from this moment that these isles became, as it were, the centre of Christian life in Japan. Besides the Nobles' College and the noviciate of the Company, the Jesuits transported thither the printing-press of the Society. From this Press came a number of works: a Latin Grammar with the rules in Japanese, a Latin-Portuguese-Japanese dictionary, the lives of the Saints, a catechism in the form of dialogues.

After having dealt this blow to the Jesuits,

(11) Hay, p. 156.

Nabeshima and Mori turned their attention to the Portuguese. Without the least pretext they seized upon a Portuguese ship, which had just entered the port of Nagasaki, and declared that the Kwampaku would retain all the gold in it and at the price it would please him to fix. Surprised at this strange proceeding, the Portuguese immediately sent one of their officers to Kyoto to complain directly to Hideyoshi. One can well imagine the fury of the latter, when he learned from this foreigner's mouth that two *daimyo* had, in his name, acted in so dishonest a manner. He immediately sent Asano to depose the two guilty men from their position of Governors, and to name in their place two citizens of the town of Nagasaki. As these latter were both Christians, the storm, ready to burst during a certain moment, seemed anew to be warded off. So much the more was this the case as, towards the same period, Maeda, the Governor of Kyoto, put the matter before Hideyoshi in so favourable a light, that the latter, after having made an enquiry into Valignani's mission, finally consented to answer the Viceroy of the Indies, and to send him presents. But in view of the small number of ships, which then left Japan, it was not until the month of October, 1592, that Valignani was able to return to the Indies. His departure was, so to say, unnoticed, for at this moment all Japan had its eyes turned towards Korea.

THE PEST IN YOKOHAMA.

Success has not crowned the courageous and drastic measures adopted by the local authorities in transferring to another quarter the whole of the inhabitants of the region where the pest had made its appearance. A fresh case is reported to have occurred in the newly settled district, and precautions of segregation and disinfection have been again adopted. It is not likely, we imagine, that any further migration of this section of the population will be considered necessary. Evidently the disease can not be left behind.

The following appeal has been issued from the Mayor's office in Yokohama:—More than 1,000 people now living in the isolated houses on the former Kanagawa fort are placed in a most unenviable situation. In consequence of their having come from the neighbourhood where cases of plague made their appearance they have been cut off from outside communication and are living in sheds barely sufficient to protect them from the elements. Moreover, their former houses will be burnt down in a few days and when they are discharged from their temporary shelter they will practically be deprived of means of subsistence. They are sacrificing their safety and interests for the sake of the 300,000 inhabitants of Yokohama, which owes its safety to these unfortunate people. It devolves on charitably-inclined residents to afford relief to these people. Any subscriptions, from 10 sen upward, will be received. Subscriptions should be sent to the Mayor's office (Shiyakusho). The Subscription list closes on the 15th November.

A sum of *yen* 50 has been collected among the officials of the Yokohama City Office on behalf of the unfortunate people at Kanagawa fort.

The City Authorities desire to acknowledge receipt of the following sums contributed in aid of the poor people evicted in connection with the outbreak of plague in Yokohama:—

	Yen.
F. Schroeder, Esq.	5
Imperial German Vice-Consul W. Hagen... ..	5
E. H. Hobart-Hampden, British Pro-Consul ..	15
China and Japan Trading Co.	100
H. Klingen, Esq., Netherlands Consul.....	25

It appears that the proposed burning-down of the houses in the isolated area at Kaigan-dori, Yokohama, can not be carried out, pending negotiations between the Authorities and the owners of the property. The buying prices fixed by the commissioners appointed for the purpose range from 28 to 8 *yen* for two-storied

(9) An Arab horse, two swords, two arquebuses of recent invention, two tents of tapestry bordered with gold, a dagger and a field tent.

(10) Hay, p. 120.

houses per *tsubo*, and 15 to 3 *yen* for bungalows, according to the condition of the buildings. The premises of the Toyo Kisen Kaisha, the Horaiya hotel, and a few other large structures are excluded from this estimate.

The number of rats purchased by the Authorities up to Oct. 26th reached 28,028 altogether.

The second drawing of the rats lottery took place in the Yokohama Assembly Hall on the 27th with the following results:—First prize, 30 *yen*, for No. 9,931; second prizes, 10 *yen* each, by No. 2,981 and 4,521; third prizes, 5 *yen*, by four persons; fourth prizes, one *yen*, by ten persons; and fifth prizes, 50 *sen*, by 40 persons.

Having nearly concluded negotiations for buying the houses in the isolated area, the Yokohama City Authorities practically commenced on Oct. 29th the business of pulling down the buildings in Kaigan-dori and it is expected that the proposed burning will be carried out in the course of to-day. By way of precaution, a high wall of zinc plates will be erected between the isolated area and other portions of the city.

Mr. Homma Bunzo and the proprietor of the Horai-ya hotel in Kaigan-dori are the only persons who refused consent to the buying price proposed by the Authorities. On Oct. 28th a dead rat containing pest bacilli was discovered in the house of Mr. Homma.

The third drawing of the rats lottery will take place in the Assembly Hall this afternoon.

It may be added that the unfortunate people quarantined on Kanagawa fort were allowed outside on the 28th.

Having purchased over 10,000 rats in connexion with the outbreak of the pest, the Yokohama City Authorities held a drawing for prizes by means of a lottery in the City Assembly Hall on the afternoon of Oct. 23rd. One hundred ticket holders, representing citizens who had obtained tickets from the authorities in exchange for rats, were allowed to be present and watch the proceedings. The results of the drawing were as follows:—First prize, 30 *yen*, No. 2,513, the holder of which ticket is a man named Mr. Nitta Yozayemon, of No. 192, in the former Settlement; second prizes, ten *yen* each, 3,335 and 5,834. In addition to the above, third prizes of five *yen* were won by four persons; fourth prizes, one *yen*, by ten persons; and fifth prizes, 50 *sen*, by 40 persons. It may be added that the second drawing of the rats lottery will take place in the same place in a week or so.

As stated by us on Thursday, the proposed burning-down of the houses in the isolated area at Kaigan-dori was partly carried out on the afternoon of Oct. 30th under the direction of the Isezaki Police authorities, within whose jurisdiction the pest-affected district lies. At a quarter to 3 p.m., several houses, already pulled down, in the western portion of the isolated area were set on fire and continued burning until about half-past 3 o'clock, during which time the fire brigade attached to the Isezaki Police was on the scene, ready to prevent the spread of the flames. Fortunately nothing serious occurred. The neighbourhood of Kaigan-dori was for a time the scene of great excitement, large crowds of people having assembled thither from far and near to watch the fire. The business of reducing to ashes nearly all the houses in the area will be concluded by Nov. 2nd. Meanwhile a proposal has been made in official circles to rent free of charge houses on Kanagawa fort to the poor people for some time to come, in view of their means of sustenance having been taken from them through burning of their houses in Kaigan-dori. It is understood that the building of the Toyo Kisen Kaisha and the Horai-ya hotel will be saved from destruction.

The Harbour Master of Kobe, Captain Fujii, invited a number of shipping men to his office a few days ago, said the *Kobe Herald* of Oct. 24th, and consulted with them as to the possibility of exterminating the rats on board their vessels. He pointed out to them that such work would materially assist the measures being taken on shore as a safeguard against the introduction of bubonic plague. Captain Fujii, also drew atten-

tion to the steam whistle nuisance. The steam whistle on some craft is used with unnecessary frequency and the duration of the blast is often unduly prolonged. He desired to see these things remedied. It was agreed that the practices referred to should be discontinued as much as possible. Captain Fujii told those present at the meeting that he might have to draw up a regulation on the subject shortly.

FOOTBALL.

The football season began in Yokohama on Saturday afternoon in most depressing weather, rain falling throughout the whole time of play, alternating between a drenching down-pour and a drizzle. But this did not dampen the spirits of the players one little bit. The first half was fairly even, and the home eleven managed to score one goal only. On change of ends a change came over the character of the encounter, the Naval men falling to pieces while the Y.C. and A.C., tumbling to each other's play, improved their combination and secured goal after goal, six in all, of which three were made by Strome. This is a promising beginning, but time will be needed to show how the new penalty rule will work, as well as to develop the individual qualities of the home players. Mr. J. H. Bathgate was umpire and the following were the teams:—

H.M.S. *Rambler*:—Artificer London, Goal; Assistant Engineer Paton, W. Smith, Backs; Lieutenant Ford, Writer A. Endacott, A.B. Gentles, Half-Backs; Paymaster Roe, Lieutenant Mackenzie, Ship's Steward A. Andrews, A.B. W. Blackman, Carpenter R. Cornish, Forwards.

Y. C. & A. C.:—J. Waddilove, Goal; G. C. Allcock, W. S. Moss, Backs; A. R. Firth, E. G. Fradgley, W. J. White, Half-Backs; K. Van R. Smith, H. W. Kilby, O. Strome, J. E. Moss, A. Hills, Forwards.

Referee:—Mr. J. H. Bathgate.

After the game a Captain and Vice-Captains of Football were elected. Mr. E. G. Fradgley was re-elected unanimously to the position he filled so well last year, while his *aides* will be Messrs. A. R. Firth and H. W. Kilby.

In view of the opening of the football season local players would do well to study the recent alterations in the Rules, of which we reproduce the following with reference to the infliction of the penalty:—

It is to the penalty kick that these alterations in the main relate, the new rules in connection with which make it necessary to rearrange the field in the vicinity of the goals.

Hitherto, the area within which the goal-keeper might not be charged, unless he was holding the ball or obstructing an opponent, was bounded by semi-circles defining six yards from the goal posts. In future these will disappear, and, instead of them, lines will be drawn six yards from each goal post at right angles to the goal lines, extending six yards into the field of play, and being joined together by a line drawn parallel to the goal line. The space thus bounded will be known as the "goal area."

It will be seen that it is somewhat larger than the space which it replaces, so that the goal-keeper's immunity from attack is slightly increased.

Then, instead of the line which used to be drawn right across the ground parallel to the goal line, and at a distance of 12 yards from it, and within which certain offences by the defending side were punished by the award of a penalty kick to their opponents, there will be a "penalty area," bounded by lines drawn 18 yards from each goal post at right angles to the goal lines, extending 18 yards into the field of play, and being joined together by a line drawn parallel with the goal-line.

Only when committed within this "penalty area" will a penalty kick be awarded for the offences of intentionally handling the ball, intentionally tripping, holding, pushing, or jumping at a player, or intentionally charging a player from behind. It will thus be seen that the penalty area is reduced in the direction of the touch lines, but extended in front of the goal, inside and centre players getting more protection, while those on the wings are left unprotected, except by the minor penalty of a free kick.

It is here that the new scheme may prove unsatisfactory; for a goal may be lost quite as much through the unfair tackling of a wing player as through a similar offence committed in midfield. Experience alone can show whether this objection is only theoretical or is a really serious one; and it will

not be until players and referees have got thoroughly used to the new conditions that it will be possible to form a sound opinion as to their merits.

When a penalty kick has been awarded for an offence within the "penalty area" it will not be taken as at present. The laws of the game now provide that "a suitable mark shall be made opposite the centre of each goal, twelve yards from the goal line."

This shall be the penalty kick mark. Then, when a kick is taken from the "penalty kick mark," all players, with the exception of the player taking the kick and the opposing goalkeeper, must be outside the "penalty area," while the opposing goalkeeper must keep within the "goal area."

It will be noticed that the old rule that players must be at least six yards behind the ball when the penalty kick is taken has been dropped; and that now, so long as they keep outside the "penalty area," they may be anywhere in front of the ball.

TOMMY ON THE VACANT SITUATION.

'Ow they cheered us at the station! 'Ow they photographed the train!
'Ow they whistled to the music of the band!
'Ow they wasted of their wishes that we'd *orl* come back again

To the blessing of Old England's 'appy land!

Ah! they'd given us a tickler; for our eager little lot
Of some thirty thousand wasn't nothink great:
Still we didn't fall to grumblin'—though them first few months was 'ot—

'Cos the Government was 'ardly up-ter-date.

But they fed us then, at *orl* events, and clothed us when they cood;

Lor! it seems a rummy go, but there it are,
Now we're 'ome again in England we've more trouble findin' food

Than when 'ard at work a-seeing froo the war!

Yet I think I twig a way of gettin' 'elp 'fore winter sets,

Which, in course, I may be wrong; but this I know:
If you want the State to heed yer, why the method of proceedyer,

Is to call and 'ave a conference wiv Joe!

Lor! it seems but only yesterday the orders come along

For to chuck our jobs and 'urry to the front;
Folkes was *orl* a-torkin' "Tommy"—he perwaded every song,—

An was kind enough to say 'e "bore the brunt."

Was it but for the sake o'rhymin'g? Was it simply theatre kid

As indooced them author coves to sing our praise?
Was the managers a-makin' of a sorter bid
In the boodle as was lying in the craze?

Well, I knows a noble poit as worked 'ard to git us out,

And 'e blowed "the call" full nigh across the world;
But 'is pen 'ave rested idle since the transports put about—

Since the good old British battle-flag was furled.

Now we're 'ome agin and 'ungry though we've got no cause to blush.

Ah! the patriotic wave 'as 'ad its flow;

An alarm about our tippling's put the stop on Master Kipling,

And the only thing's a conference wiv Joe!

Oh, it makes yer 'art so 'appy when yer sees a ragin' crowd

What's a-cheerin' them as you was sent to beat!

And to feel as 'ow yer ruined for yer country does yer proud,

When yer badly wants a bit o' grub to eat!

Course, if Parlyment 'ave thanked yer in a reser-lootion act,

It's a proof as 'ow yer work was done ter rights;

And you might grow fat upon it—live like fighting cocks, in fact—

If it wasn't quite so playege cold o' nights.

When you've tramped froo 'arf a county beggin' but a simple job,

Wiv employers *orl* a whinin' "Trade forbids,"

And the poit wot I mentioned, 'it one nail on the nob—

Yus; 'e got it pat enough—there *is* the kids!

Still, I feel we've done wiv poits; they be useful at the start;

But the finish wants a MAN or two—what 'o'!

For our desolation's lorst in such as Mister Elfrid Horstin,

And we'll 'AVE to 'ave a conference wiv Joe!

Public Opinion.

THE ASCENT OF KAIGANE SAN.

By WALTER WESTON, M.A., F.R.G.S., ENGLISH ALPINE CLUB.

The completion of the railway from Tokyo via Hachioji to Kofu, the capital of the Province of Koshu, in the spring of next year, will open up one of the most interesting and beautiful regions in the whole of Japan. A reference to the indispensable "Murray" readily shows that whether for the industrial and agricultural progress of its people, or for the varied and striking attractions of its scenery, this province, coterminous with Yamanashi Ken, exhibits a combination of characteristics hardly found in any other, excepting perhaps that of Shinshu, in the whole of the country. Silk, grapes, paper, are amongst the chief products of this region, and busy and flourishing as it already is, the progress and prosperity of its trade are bound to increase still more when the mountain-girt plain of Kofu and the radiating valleys around it are brought into closer communication with Tokyo and the sea. This will no doubt be still more the case when the proposed branch line between Hachioji and Yokohama becomes an accomplished fact.

It is, however, with the second and less material attractiveness of Koshu that the present paper proposes to deal. In half-a-day or so from Tokyo and Yokohama, the railway will land the traveller in search of the picturesque at the centre of things, and from Kofu he can in another day descend the rapids of the Fujikawa by boat and get back to Yokohama the same night. The romantic route to Mitake to the north, or that to the stately groves and temples of Minobu to the south, each has its own claim on time and attention. Whilst, far beyond the bounds of comparative civilisation, and rising dark and massive westwards, to a height of 10,000 feet and over, the great mountains of the Shirane San* range, and the bold granite cliffs culminating in the Komagatake of Koshu, offer experiences, to an energetic mountaineer, of unusual and romantic character. In size and grandeur these lofty peaks are second only to the granite giants of the Hida range, the "Alps of Japan."

It was with the hope of penetrating the innermost fastnesses of the secluded valleys, and climbing the highest summit of the Shirane San range, that the present writer took advantage of the improved weather at the end of August this year, and set out on the attainment of a hope long deferred. Leaving Yokohama at 10.50 a.m. on August 18th, and changing at Shinagawa and Shinjuku, the Hachioji line was joined at the last named station. Innovations and improvements of various kinds readily strike one after an absence of seven years, and of these the automatic telephones at stations here and there remind one that enterprise in Japan is by no means standing still. Perhaps a contradiction to this view, however, may be seen in the absolute refusal of some of the railway porters to take a tip! The fact, however explained, deserves to be recorded. At Hachioji, through a time table's treachery, I had a wait of 2 hours, which I spent in an interesting chat with a polite post-office shop-keeper, whilst his small child howled incessantly at the unusual sight of a foreign customer. Probably the writer who stated that in Japan "babies never cry," that flowers never smell, and birds have no song was a deaf person without a nose or ears. At any rate he—or she—was more epigrammatic than exact. From Hachioji the line traverses a tract of country of increasing interest and beauty. A few miles out, the valley of the Banyugawa is reached, and in the green hills through which it winds its way the engineers have found some of their hardest work cut out. Indeed the passage of the numerous tunnels near and under the Kobotoke-toge was like sliding through a gigantic flute. My first night's halt was made at Saruhashi, to reach which from Torizawa, the present terminus of the line from Hachioji to Kofu, involved a break-neck drive of 2½ miles in a *basha*, the most complimentary description of which is

neatly furnished by "Murray" as a "carriage of the usual springless kind." The recent rains of many weeks had rendered the condition of the road worse than ever, and only the most reckless disregard of boulders washed bare of soil, and ruts worn half-a-wheel deep, enabled our sporting driver to accomplish his task. Here and there fires in the middle of the road lighted gangs of labourers at work, and then we had to descend and put our shoulders to the wheel, to haul and heave our crazy vehicle along. At Saruhashi the old picturesque "monkey bridge" has been replaced by one of more modern construction, crossing a picturesque ravine at the bottom of whose dark depths flow the green waters of the Katsuragawa. After a night disturbed as usual by the activity of the ubiquitous *pulex irritans*, I left at four on the following morning in a steady drizzle and another *basha*, foolishly imagining that this for myself and my baggage would be the quickest as well as cheapest means of progress. As a matter of fact it took 3½ hours to traverse the 9¼ miles to the foot of the Sasago-toge, and it was a relief whenever excuse offered to get down and walk.

For some miles the road, or what the rains had left of it, struggles up the valley of the Katsuragawa, as the Banyugawa is known in this neighbourhood, through a beautiful valley, passing on its left bank a picturesque wooded hill once crowned by the castle of Oyamada Bitchiu no Kami, whose master was the mighty warrior Takeda Shingen, lord of Koshu in the second half of the 16th century. Here and there, further on, a backward glance reveals a striking view of Fuji, whose summit is seen over the encircling hills to the south-west. The great mountain itself can be reached from Odzaki, four miles beyond Saruhashi, by following up the valley of the Katsuragawa for 15 miles towards its source. Here we take leave of that beautiful river, and join company with its tributary the Hanesakigawa. Frequent traces of the railway line are in evidence on one hand or the other, and by the time the line is open for traffic it will afford one of the most beautiful routes of travel within reasonable reach of the capital. Great was our relief when the *basha* pulled up at Kuronota at 10.15, and we took a glad farewell of the crazy turn-out. The whole concern, like most of its class, was of the most makeshift kind—the horse a bag of bones, almost held together by its hide, the harness a mere web of odds and ends of ropes, straps, and strings—in fact, it may fairly be said that nothing was stable about it at all, except the smell. After half an hour's halt for food and obtaining a coolie to carry my baggage over the Sasago-toge I left at 10.45, together with a Japanese Inland Revenue officer with whom I had made friends in the *basha*, and who proved an interesting and agreeable companion. He however damped my hopes considerably by stating that though he lived near Kofu he knew of no one who had ever ascended Kaigane San, and that he was quite sure the summit was unattainable. Indeed, it is surprising how little seems to be known about this great mountain, either by Japanese or foreigners. In the papers dealing with travel and exploration by Naumann, Rein, etc., no information, beyond mere passing reference to distant views, is given. The only source at all serviceable that I could find is the statement in "Murray" that it is "said to be" accessible from a secluded valley two days' journey from Kofu, but no precise notice indicating an actual ascent by foreigners is recorded. This uncertainty therefore lent an additional flavour of interest to the expedition, and none the less so from delightful memories of past experiences on summer holidays in the wild solitudes of Hida and Etchu.

From Kuronota (2,200 ft.) to the top of the Sasago pass (3,500 ft.) proved a stiff walk of 1¼ hours, nearly all prospect of the romantic surroundings being, unhappily, shut out by persistent mist and drizzling rain. Just outside the village we passed the mouth of the great tunnel opened last July, the longest of the kind in Japan. It is a fine piece of engineering and its more than 3 miles of hard work reflects great credit on the native staff responsible for its execution. A cool

breeze greeted us as we rose into the narrow cleft that marks the top of the pass, and soon the clouds began to disperse, the sun came out genially, and in the distance the dark mountain masses that wall in the fertile plain of Kofu rose imposingly. Half an hour brought us to the village of Komakai, but we had to wait longer than that before we could get a *basha* to take us to Katsunuma, the terminus of the Kofu tramway line. Of the speed of this new conveyance however we had no cause to complain: it was a good road, downhill, the driver in good spirits, the horse, oddly enough, in as good condition as the road, and a wild rush of 30 minutes covered the intervening 4 miles. Up a lateral valley on the right we saw the works of the line where it issues from the Kofu end of the Sasago tunnel, and already the enterprise seems to be bringing increased custom to the hamlets by the way. At Katsunuma we came into the grape-growing district, for which industry the province of Koshu has gained a considerable reputation, and wine is said to be now made in increasing quantity. A quaint and agreeable sweetmeat is made at Kofu called *tsuki no shizuku*, ("moon drops"), consisting of ripe grapes covered with an icing of sugar. A dainty box of these was made for me on the spot, the inside packing being a sort of coarse meal, without which the summer heat readily melts the sugar into an oozy shapeless mass. The early crop of grapes, in August, is of an acid sort, quite cheap, while the best and sweetest come on in late September.

The ten miles of tramway took us in an hour and forty minutes across the eastern half of the great amphitheatre of the Kofu plain to the town itself, which is watered by the stream whose broad white beds of smooth granite boulders spread a vast network in every direction. The volume of water, in the summer time, is inconsiderable, and the wide channels are curiously disproportionate to the narrowness of the currents they inclose, and only after heavy rains, or the melting of winter's snows, is there any depth of water to be found. Still as "all roads lead to Rome" so the drainage of this region ultimately concentrates in the great Fujikawa, by which at present most of the traffic between this plain and the cities of the coast is carried down. An interesting question for the near future will be the effect on this carrying trade of the opening of the new railway lines by which much of it is bound to be diverted. The boat fares, at any rate from Kajikawa, are likely to be reduced, though the present regulation charge of 5 *yen* is not excessive, considering the time and labour involved in the return journey. Just before reaching Kofu at 4.15 p.m. some excitement was caused amongst our tightly packed mass of passengers by the disappearance of two mild looking individuals in plain clothes who proved to be detectives on the track of a fugitive gambler, and enquiry revealed that an hour before we got to Katsunuma that person had murdered a constable in the act of arresting him.

At Kofu I left the tram, which, by the way, runs on beyond for 11 miles to Kajikazawa, and put up for the night at the Yonekura inn in Yanagimachi. A lovely prospect of far-off Fuji to the S.E. and of Shiranesan, and Komagatake to the west, greeted me from my bedroom balcony. In view of a week in the wilds, I sought out the "European style" restaurant which once I visited as the "Choyotei," but which is now known as "Kairotei" and was pleased to find that the change of name had not altered the character of its cooking, and I was able to fortify myself, as once I did 8 years ago, with the best of "Chikkin Katsuretsu" and jam omelettes delicious to a degree. The landlord of my inn was agreeable and polite, a marked contrast to a number of his guests in the persons of a quartette of Chinese silk merchants, whose insolent boorishness evidently rendered them unusually unwelcome visitors. My host added to his civility the important advantage of useful information on the object of my journey, for I learned from him not only the route to my base of operations, but also the name of the headman of that village, from whom, said he, "you can surely get the help you will need for your expedition."

* Not to be confounded with the two much lower, but more familiar, peaks at Ikao and Nikko, respectively, the latter of which has been showing recent signs of fresh activity.

By way of gaining time next morning I left in a *jirikisha* with two men for the first stage of my journey towards Kaiganesan, and crossed the western half of the plain to the village of Arino, 9 miles away. Apart from the carriage of baggage the ride had no advantage in point of speed, as it took 3 hours, though the road was on the whole good and nearly level all the way. The men, however, were poor goers and natural disinclination was accentuated by a warm morning and little shade. A lovely view of Fuji, looking at us over the southern mountain barrier of the sunlit plain, arrested attention as we crossed the broad bed of the Arakawa by a wooden bridge on the outskirts of the town. Further on, the still longer structure spanning the Kamanashi-gawa showed signs of damage from the recent rains, and it quaked considerably as we rattled slowly across. Arino was at length reached at 11.30, and the coolies, duly paid off, settled down to a 2 hours snore. The existence of such a charming inn as the Taigakuro at Arino was a complete surprise, and for a resting place after roughing it in the adjoining mountains, its cool quiet with excellent food and civil attention would render it almost perfection. It lies almost under the shadow of the outposts of Shiranesan and Komagatake, westwards, whilst eastwards rise the shoulders of Fuji beyond the intervening hills. Meat, chicken, eggs, and fish are to be had, and as a special treat I was offered a curious compound called "coffee," consisting of a sort of dried coffee dregs enclosed in a casing of sugar. Good roads lead north and south, the former joining the Koshu-kaido near Nirasaki, and the latter, in 10 miles, reaching Kajikazawa, for the Fujikawa voyage. A willing coolie soon appeared and at 2.15 we set off for Ashiyasu-mura, 4 miles away, the hamlet from which I had at length decided to attempt my climb. Half an hour's trudge westwards across the sun-scorched margin of the plain brought us to a curious natural gateway in the hills, where the wide mountain stream has burst the intervening barrier to join the Kamanashigawa on its way to the Pacific. Though marked Midai-gawa on the maps, it is known locally as the Chokushigawa and there are even other variations from that. The hillsides here are starred with lilies, white or orange, and pinks abound. Close to the little village of Komaba, just inside the great mountain gateway on the river's right bank, stands a small isolated fever-hospital, showing that progressive ideas are marching even further afield in Japan than one had suspected. Happily at present this is closed for want of patients. Lofty tree-clad hills rose dark on either hand above the broad pebbly river bed, and closed the prospect before us as we advanced, until at length the valley narrowed, and a turn to the right brought us in view of the three or four scattered hamlets of Ashiyasu-mura, collectively known until some years ago as Ashikura. These are perched high above the left bank of the torrent, some of the dark cottages clinging only with difficulty to rocky ledges, half hidden in forest shade. It was distance, however, that lent much of its enchantment to their view, for their most striking features can neither be photographed nor adequately described—their squalor and their smells.

Wending our way to the little group of cottages known as Kozori, where the Soncho or headman of Ashiyasu-mura lives, we were soon directed to his house, the biggest, best, and cleanest in the valley, near which stands his newly built *yakuba*, or office for the transaction of local business. Mr. Natori Unyichi, the Soncho, himself was out, but I was courteously received by his son, who with many apologies for the "filthy accommodation" of the house, and their entire ignorance of foreign ways, since, he explained, "we have never entertained a foreigner before," begged me to come in, and assured me that if I would overlook their deficiencies they would do their best to entertain and help me. All this was done with a dignified courtesy that was in itself worth coming far to find. By and by his father arrived and on hearing of my quest, promised to find me some hunters to act as porters, and as far as possible, to guide me on the climb. No foreigner, he said, had ever made the ascent of Kaigane,

though two parties had reached the second and lower peak of Shirane-san, called Ai-no-take, from Narada, the next village in the valley of the Hayakawa, some 12 miles lower down. As the way, he added, to the foot of Kaigane, was unusually long and rough, and the upper part of the peak could only be climbed if we could find our own way, the men would have to go slowly, for all of which he hoped I would be indulgent, a suggestion to which I readily consented. Later on my hostess came to attend to my wants, and produced some eggs, a muscular chicken, rice, etc., and then I felt I was "in clover" indeed. Finally one by one the three hunters appeared to pay their respects, and as I lay down that night it was with intense satisfaction that at any rate I had at last before me a fair chance of a trial of strength with the finest peak between Fuji and the "Japanese Alps."

In spite of those perfumes with which a night in the best rooms of an ordinary Japanese dwelling are usually associated, together with a heavy downpour of rain, I managed to sleep better than usual under such circumstances. My Jaeger sleeping-bag, assisted by copious libations of "Keating," effectually baffled my greatest *bête noir*, nor did the entry of a hungry dog, whose footmarks were pointed out by my astonished hostess when she woke me up at daylight, disturb me. Probably the animal was unaccustomed to foreign food for none of my stores were touched.

By 6.30 a.m. I had repacked my baggage and distributed it between my trio of hunters, who carried it on the wooden frames known as *yaseuma*, (lit: "scraggy horses"), identical in form with those so familiar in the Alps. A pleasant little company they were, good-tempered, cheerful, and willing always. I made their acquaintance with interest, and parted from them with real regret. The youngest, Masao, was a keen fisherman, only 19, but astonishingly strong for his years. Shimidzu, the next, a bright active fellow of 44, with the agility of a cat and with muscles of steel; and lastly the Ojisan, a cheery old fellow of 61, whose quaint dialect and dry humour turned out a continual source of amusement. All worked their hardest and more than deserved the *yen* a day each which the Soncho had himself suggested as their pay.

The thunderstorm overnight had cleared the air and a brilliant morning greeted us as we walked up the valley, westwards, on the left bank of the river, through the dirty straggling cottages that dot its steeply shelving slopes. From a cloudless sky above, the sun's rays made us feel forcibly the disadvantages of starting a climb with one's back towards the east, and the absence of shade soon begot a fervent wish that the earth for the present would take to turning in the other direction. Mists rising from the valley were soon dispelled, and every feature in the landscape, stood out in the clearest outline imaginable. Our track soon left the main path, which leads over the river bed to the Narada-toge (5,120 ft.) a picturesque pass through a romantic gorge in the upper valley of the Hayakawa, to Narada. From all accounts the expedition must be unusually interesting, and more practicable now than when years ago it was first made known in the encyclopaedic pages of "Murray." The track is said to have been improved, and the resources, in food and accommodation, are now considerably less scanty than in the days when such "luxuries" as rice, etc. were almost unknown. At 7 o'clock we had to halt for Shimidzu, who had gone to forage for an extra supply of eggs, and while admiring a fine torrent across the valley leaping in a few bounds down a depth of nearly 1000 feet, I became the centre of a gaping crowd of filthy, curious-eyed, halfclad or naked children who had never seen a foreigner before, truly by them well-called *gwaikokujin* "an outside countries man." With all their squalor and ignorance—though education is improving even in these remote parts—these rustics are well mannered and honest, and I can quite believe the practice, which a well known Japanese scholar tells me of, is, or was, frequently in vogue in some of the country districts. *Waraji* (straw sandals) he said, are frequently made by individuals who instead of exposing them in an open shop window,

simply hang them up outside their "front-door," with a little section of bamboo to receive the farthing or so that any chance wayfarer may care to pay, as he takes a pair and passes on.

At Kutsuzawa, at 7.30, my men asked me to wait while they went to pray for protection and guidance on our expedition at a little wayside shrine they called "Myo-cho-ji." The guardian of this, a pale delicate looking person, who lived close by, proved very civil, and brought me out cakes and tea and chatted pleasantly about my climb. But it was with the greatest difficulty I could induce him to receive the smallest trifle as *chadai* (tea money), for his surprise at the offer was as great as it was sincere. Crossing the little headland on which Kutsuzawa is perched, we dropped down into the torrent bed of the Kanayamazawa, known also, locally, as the Midzukuchi-gawa, and then rounded the foot of the opposite spur into a deep valley that thrusts itself right up into the heart of a great mass of densely wooded hills forming the supporting buttresses of the eastern wall of Yakushi-dake, a peak some 8,000 feet high to the south of Ho-ozan and Jizo-dake, of which great ridge it forms a part. This valley is called Sone-daira, or in the local dialect, Shone-daira, and our track, after traversing the thinly cultivated floor at its lower end, gradually rose on its left slopes until it entered the forest that clothes them to their highest ridges. Clouds had now begun to gather and shut out a prospect that must at other times be very fine, over the plain of Kofu with its network of broad river beds whose now attenuated streams converge into the Fujikawa far to the south, and beyond and above all towards the splendid purple cone of Fuji streaked here and there with long gullies filled with snow. At 10.30 we halted for half an hour at a height of 5,700 feet (3,300 feet above Ashiyasu) at a tiny spring called by my men Shimidzu Yokote, where we had "second breakfast," and gathered large quantities of wild raspberries of enormous size, as well as of a small red berry called *gumi*. Beyond this the track became extremely rough, being little more than a precipitous timber slide, and we had a stiff pull till the crest of the ridge was gained at 6,500 feet, and a fine view greeted us of the lower slopes of Shiranesan, densely wooded, rising beyond the deep valley of the Norokawa far below. Unfortunately clouds hid the actual summits of Nodori and Ai-no-taki, the central and southern peaks of the range, and Kaigane, for which we are making, the northerly and loftiest of the three, is from this point invisible. Once on the ridge the angle eased off, and the narrow track climbed through bamboo grass and firs, along the crest for an hour, until at a height of 7,200 feet the top of the Tsuyetake—or Tsuyutatetoge, was gained, where three tiny wooden shrines stand on a bank in a little clearing in the forest.

Here we halted for an hour, as the men, especially the oji-san, were a good deal tired with the rough five hours' scramble in the heat. The view of Kaigane from here, they said, is very fine, but clouds entirely hid it from our view. Leaving the pass at 1.15 p.m. we descended the north western angle of the junction of our ridge with a buttress that supports its western side, and in half an hour found ourselves at a rough woodcutters' shed called Kiri-yake. Half way down to it a rough track diverges northwards and rejoins the main ridge, ultimately reaching the summit of Ho-o-zan after a scramble of nearly 3 *ri*—a matter of some 4 or 5 hours. The descent from here to the bed of Norokawa was unusually steep, and took 3 hours, a fair share of which, however, was spent in rests largely for the sake of our cheerful patriarch. Sometimes it was down a slope of such an angle that one wondered how the trees could maintain their footing in security, for that was much more than hob-nailed boots could do with comfort, on slippery rocks and still more slippery roots. Occasionally we had to take to the rocky bed of a dried-up mountain torrent, which was still worse. Further on the slope was scarred by a huge landslide, where, as one of the negro conductors on the C.P.R. once said to a friend of mine "a good deal of the scenery had come down," and where one had a singular disposition to do so oneself more often

than was agreeable. Indeed the inferiority of nailed boots, for work in these regions, to the native straw sandals, was impressed upon me in frequent and painful ways, and though I tried some improvised ones tied under my climbing boots, the nails so quickly knocked them to pieces, that the advantage was of a very temporary kind. Eventually, however, by scrambling, slipping, and glissading we emerged from the forest, so tantalizing dense that very little view is gained, and took to the rocks on the left bank of the Norokawa, at 4.45 p.m. and at a height of 4,100 feet, or 3,100 feet below the pass.

Mindful of the fact that in these deep valleys daylight dies young, and that the hardest work was yet before us, we lost no time in applying ourselves to the ascent of the torrent, either by the broken rocks on its bank, or over the huge smooth boulders washed by the deep clear waters whose roar had reached us 3,000 feet above. Here and there some really excellent climbing was afforded, when we were compelled to cross the face of steep smooth rocks at an angle of 60° and more. Convenient cracks offered good hold, however, and we progressed much after the manner of the "crack-climbers" in the Badminton classic on "Mountaineering." Occasionally the nature of the rocks drove us out of the torrent bed into the forest above, where we had to hew or push our way through the dense undergrowth and trees, a disagreeable reminder of a characteristic feature of the lower slopes of most of the peaks in the Canadian Rockies. In this way the time passed quickly, and twilight came down suddenly as at 7 o'clock we gained more open ground on the left bank, and found a small rough shelter in the forest where the men suggested we should halt for the night. Wishing to make our start, however, from as near as possible to the base of our peak, I felt this would be unwise, and as the shelter was so inferior, I decided to make a push for the further hut, about three quarters of a mile beyond. With difficulty therefore we struggled on, until by 7.30 it was quite dark and no light was ours but the stars that spangled the narrow strip of sky overhead. Further progress under the circumstances was impossible, and we had come to a standstill in despair, when I luckily remembered that in my rucksack I had my folding Alpine lantern, the faithful friend of many climbs. To the great delight of the hunters this was produced and lighted, and by its aid we managed to negotiate in safety the last half mile of our way. But even with its aid I can still scarcely understand how the huge boulders and broken rocks, the deep pools and the swirling torrent that had to be forded from side to side were passed. At any rate, by 8.30 p.m. we reached our goal, and pushing our way through the dense tangle of undergrowth and thorny shrubs we found ourselves in a circular clearing some dozen yards in diameter, and the same distance from the torrent bed. The Hirokawa Koya, as the shelter is called, from its position in an unusually wide part of the Norokawa, was by no means the cabin my imagination had constructed. It simply consisted of a rough shelter of cryptomeria bark, about 20 feet long, 12 feet wide and 7 feet high. The front was quite open, and in the middle was hung a tough creeper for suspending the iron cooking pots used by the hunters or woodcutters who are the only tenants of the spot from one year's end to another. These latter come to fell pine trees (*hinoki*) out of which are made the *shaku* or wooden ladles commonly used in Japanese houses. The trees, when laid low, being too bulky for transport in such difficult country, are sliced into strips about two feet long, half a foot wide, and a quarter of an inch thick, and left to season before being tied up in bundles and carried off for manufacture. The hut on our arrival was apparently tenantless but the saws, knives, and whet-stones stowed away and in good condition showed it had not been long deserted. A piece of coarse matting, a chamois skin, and a bit of pine bark served as a bed, and with some straw and my rucksack for a pillow, and my sleeping-bag for bed clothes, the prospect of a bivouac far from smells and fleas was by no means disagreeable. While the men were making a fire, which they always did with astonishing

ease and quickness, I had a "tub" at a tiny spring in the middle of the clearing, and by the time I had made my cocoa (and kicked it over) and made my toast, they had broiled half a score of trout which I had bought from some passing fishermen at the beginning of our struggle up the stream 4 hours before. How delightful that dinner was, after the 13 hours and more of really hard work, as we lay by the fire, thankful for its cheerful blaze and warmth, and talked over the incidents of the day's scramble, and the prospects of that on the morrow. The result of our talk was that as the latter was likely to prove just as long and a great deal more difficult, I decided to give the men a rest, and postpone our start to the following day, an arrangement they accepted with considerable satisfaction; so we put out the lantern, heaped more spluttering pine branches on the glowing embers of our dying fire and went to bed. This last operation merely consisted of turning over just where one lay. A few moments' repose, however, effectually showed that my description of the hut as tenantless on our arrival was disagreeably inaccurate. Cheered by the warmth of the fire no less than ourselves, numerous fleas awoke to an unwelcome activity, and we were quickly compelled to follow their example. Why these creatures are so ubiquitous I cannot understand, but in shelters even as high up as 9,000 feet and over in these mountains they abound, and one of their chief joys is a home in the heaps of shavings inseparable from the wood cutters' huts. By spreading a large sheet of oiled paper under my sleeping bag, however, and surrounding myself with a cordon of Keating's insect powder I managed for once to keep them fairly well at bay, and few if any that managed to hop into the magic circle lived to hop out and tell the tale. My men, however, from their accounts next day seemed to have been less fortunate, and their experience suggested a reversed rendering of a well known proverb, since their strange bed fellows made them acquainted with misery indeed.

The night was not very cold, in spite of our height (5,200 feet) and our secluded shade, the thermometer outside only going down to 56° F., and except when some one stirred either to feed the fire, or after feeding the fleas, nothing was heard but the ceaseless roaring of the torrent through the trees, and a comfortable night with plenty of sleep was our reward for the toils of the day. The next day was one of delightful laziness, two of the men going off to fish whilst the oji-san kept me company at the hut. While I mended tattered garments, read, wrote, or bathed, he made *shaku*, or with improvised weapons practised archery with considerable dexterity and delight. Close at hand we found the great wild raspberries in plenty, and these with fresh trout formed an agreeable addition to our larder. From the men I found that besides the ascent of Kaigane two other interesting expeditions are practicable from this hut. Southwards the Norokawa valley can be descended to Narada, where the torrent's name has changed to Hayakawa—"the rushing river": northwards one may ascend it to a saddle between Senjōgadake on the west, and Komagatake on the east, from which a rough track leads to a cluster of huts called "Sangen-yade" on the way to Takato in Shinshu. Either route will involve hard work, and the latter, which is the longer and steeper will take a good day to accomplish. I was glad to get this news, as for a good many years past it has been commonly supposed that former passes across this range have become impracticable and the one or two attempts made seem to have failed. Had I been able to spare the time Shimidzu, who was very keen about it, would himself have led me over into Shinshu, so there seems no doubt as to the practicability of his route.

We were early to bed on Friday night, thoroughly rested, and by way of ensuring an early start I gave Shimidzu my watch overnight with instructions to call me at 4 o'clock for a start as soon as daylight had dawned. It was still pitch dark when an apologetic voice roused me and I looked up and saw his cheerful boyish face beaming in the firelight with a consciousness

of duty faithfully fulfilled. My appreciation was a little cooled however when I took my watch and found the hour was a quarter to three! But time passed quickly with preparations for breakfast and for getting off, and the first paling of the dark strip of sky above us was no sooner seen than we were on the move. As the oji-san, from the frequency and duration of the rests he always seemed to need, was hardly equal to such a severe and continuous climb of uncertain length as we had in store, I decided to leave him to his archery and *shaku* making, and with the other two, as lightly laden as possible, at 4.40 a.m. my long anticipated climb began. Heavy dews came down in showers from every leaf disturbed as we pushed our way from the clearing to the river-bed and turned, northwards, up the stream for some 200 yards until we found it possible to cross it by fording at its shallowest but widest point. It was from this spot on the eastern (or true left) bank that we got our first clear view of our peak and the general direction of our way of approach to it. Due west, as we look across the valley, a deep ravine, called Okamba, runs up from the bed of the Norokawa clear into the heart of Kaigane-san. The lower half of this ravine forms the channel of a wild torrent born in the snows that fill an enormous gully which higher up loses itself in the great precipices, 2,000 feet high or more, forming the eastern face of the mountain. These precipices culminate in the grey triangular summit for which we were aiming. The view was very grand, of glittering snowslopes and heavy cliffs vignettied in a foreground of the densely wooded slopes, that form the eastern buttresses of this the loftiest peak in the range of Shirane-san, and nearly the highest, apart from Fuji, of all the summits of this land of mountains. In answer to my query as to the practicability of ascending by this ravine, with its snows and cliffs, Shimidzu and Masao both laughed an unqualified negative. It would be hard enough to get up the way that had been found before, they said, but this would be impossible without wings. We little realized then what necessity can accomplish when put to the test.

After crossing the Norokawa we took to the steep slopes on the left bank of the Okamba ravine, and began a rough scramble through the dense vegetation so characteristic of this region. At one time we had to haul ourselves up a slippery staircase of tangled tree-roots, and at another to climb or leap from boulder to boulder, more slippery still, in the precipitous bed of one of the various torrents that seam the hillside. This went on for nearly an hour until at length we reached the scattered remains of a little ruined shrine built some 30 years ago by a former *Soncho* of Ashiyasu-mura to facilitate the ascent of Kaigane San, and induce climbers to give it their attention. Such hopes were never realized, few but an occasional hunter ever making the attempt, and the erection soon fell into disuse and decay. Its altitude is nearly 6,500 feet, or 1,300 above the river bed. Near this we came across some beautiful white anemones and a rich scarlet *Lychnis* the men called *gampi*. Half an hour higher up, at 7,200 feet, through an opening of the forest, on the left, a fine view was framed in the snow slopes further up the ravine and of the rugged precipices that rise above them to the summit of Kaigane. The slopes again steepened, all signs of a track disappeared, and for over two hours the work was of the hardest character.

At one time we had to fight and hew our way for an hour or more through a dense tangle of shrubs and creepers, over the decaying remains of a fallen forest, chiefly of silver birch trees, overgrown with slippery moss, a task which demanded unusual perseverance and strength. At nine o'clock we quitted the upper limit of the forest, and with relief found ourselves emerging into a fresher, freer air. But the hard work was not over until we had surmounted the final obstacle of a belt of *haimatsu* (creeping pine) of enormous size, and so dense that we had literally to climb from branch to branch over it before landing on the bare rock ridge of the northern arête. Here we left behind us the buttress by which we had been ascending for the past 4 hours, and turned southwards for the final climb to the summit, that

now rose over 2,500 feet above us on our left. The view to the northwest towards the great peaks of the Hida-Shinshu range, the "Japanese Alps," was unfortunately obscured by clouds, but Komagatake, due north, and Ho-o-zan, northeast, raised their dazzling granite cliffs like great walls of snow, above the extraordinarily densely wooded slopes on the opposite side of the Norokawa valley. The actual top of Ho-o-zan is formed by two gigantic blocks of granite, the highest point of which, Shimidzu said, had never been reached. Once on the main arête the work became both easier and more interesting, and after 20 minutes halt for lunch, we faced the finish of our task. This involved the ascent of a narrow ridge descending in broken rocky slopes, on the right, of moderate gradient, but falling down, on the left, in the great cliffs which had so frequently won our admiration from below.

In sheltered nooks and crevices I found a great variety of Alpine plants, but unfortunately the collection I made was lost before I could get it home for identification. The last 1,000 feet of the climb was very interesting, and though not difficult when judged by Alpine standards afforded some excellent practice in surmounting or traversing an occasional "gendarme," or rock tower 50 feet or so in height. To our great disappointment we became enveloped in mist before the top could be gained, and when, exactly at 11 o'clock, we reached the highest point, no view was to be had: once more, with my usual ill-fortune on these Japanese peaks, I "viewed the mist, but missed the view."

In our exposed position at this altitude, 10,337 feet, with no prospect to detain us, we only spent half an hour before turning to descend. Here I photographed my two companions by the little shattered wooden shrine enclosed in a cairn, in which I left a record of our ascent, and brought away a specimen of the highest rock, and a stray votive offering in the form of a miniature wooden sword inscribed with the donor's name. At 11.30, filled with satisfaction at our success, we began to retrace our steps and for half an hour descended quickly along the north arête. Then Shimidzu, a true sportsman to the bone, espied a ptarmigan away on the left and at once began to stalk the bird, which forthwith disappeared. Seeing it pop up still further off, I borrowed his gun, and in a few minutes my first "bag" on a Japanese hill side numbered three of the "thunder-birds" (*raicho*) I had often seen but never gone after. Working back towards the ridge alone, I waited some time before the men rejoined me, but before long the clouds once more enveloped us. Not recognizing the ground I called a council of war, and finally both had to confess they didn't know where they were. From time to time we went on a little and then sat down for the clouds to lift and give us our bearings. From my compass I gained a general idea of our position, but our experiences in the forest on the ascent made us hesitate to make for it until we could see our proper line of descent. As a matter of fact we must have gone too far down the west side of the north arête before we discovered our mistake, and in retracing our steps ascended too near the summit before turning down eastwards, on the side of the Okamba ravine. The discovery of the error, without in the least knowing how to set it right, took the steam completely out of the men, who, though as strong and willing as could be wished as long as a way could be seen, were completely at a loss when it had to be worked out afresh. It was a disagreeably pertinent illustration of the Japanese proverb that *shika wo ou ryoshi wa yama wo mizu*—"the hunter who is chasing the deer doesn't look at the mountain"—certainly, as I think Sam Weller says, we found that the "point of the moral lies in its application," and the recognition of the fact that we were undeniably in a fix found expression in prolonged and painful silence, more particularly as there was clearly not the slightest prospect of the clouds lifting to release us from it. After a while, as both my men seemed incapable of suggesting any feasible route, I determined to attempt the descent of the cliffs, the edge of which in our wanderings we found we had approached, though in what part we could not tell, for the mist blotted out all our surroundings excepting for a

few yards ahead. In spite of the emphatic negative to my morning's question as to their practicability, I believed, from what I had observed, that they were not impossible, and if only the snow could be reached, the rest would be comparatively easy. To gain this, however, we had to find our way down 2,000 feet of a great rock wall, shaped like an inverted fan, and divided into a number of gullies separated from each other by rocky ribs, but all converging into a common centre at the head of the Okamba ravine. At the highest point this wall is quite vertical but we managed to traverse, from a point somewhere below the actual summit, diagonally to a lower point where it was more broken and less steep. For the next four hours the work was the hardest I have experienced in any of my Japanese scrambles, and I should have been very sorry to have to face it with companions of less pluck and endurance than Shimidzu and Masao proved to possess. For the purposes of comparison, I should consider it about equal to the descent of the Matterhorn from the "shoulder" to the lower Swiss hut, and distinctly harder than that of the Eiger to the Rothstock. Our route simply involved a series of zigzags down the various intervening ribs, direct descent being practicable for a certain distance until cut off (*abgeschnitten*, as Swiss climbers say) by a vertical pitch of smooth rock which forced us on to the rib, right or left, or to cross over it into the gully parallel on the chance of being able to turn the obstruction. Great care was needed on account of the looseness of the rocks. Moving, however, with every caution, we made steady progress, and I could not help being struck with the cat-like agility and sure-footedness of my companions, whose *waraji* were exactly suited for the work. At about 4.30 o'clock after 3½ hours of extremely hard work the slope eased off, and as we were now clearing the lower level of the clouds, we saw gleaming far below us the long slopes of snow that filled the narrowing ravine. A cry of relief came from Shimidzu at the welcome prospect, *go anshin de gozarimasu*, "be at your august ease"—whereat we promptly sat down and made a hearty meal, for we had touched no food for five hours or more, and the strain had been unusually severe. Down the broken rocks we then hurried to the snow slopes, and for once—the only occasion in the whole of the expedition—in the matter of foot-gear I had, so to speak, the "upper hand." Down the first slope I had the most delightful of glissades, while my hunters picked their way less rapidly by the rocks at the side of the gully. On the second occasion, after they rejoined me, I cut steps with my ice-axe and we went on together. The snowslopes were succeeded by a tedious descent down the huge boulders of the torrent bed, the only alternative to which was an occasional struggle through the undergrowth of thorny bushes and thickly interlacing creepers on either hand, with frequent tumbles into the hidden channels of small torrents feeding the main stream. At length dusk drew on, and again mindful of the short twilight before us, we strained every nerve to reach the bottom of the ravine, where only the bed of the Norokawa separated us from our headquarters, by nightfall. Our race against time however, proved a losing one, and as I now began to have difficulty in seeing my footholds on the slippery, water-worn rocks I felt it would be incurring too great a risk to go on. Accordingly I decided to halt for the night in the most likely spot, which luckily turned out to be not half a dozen yards from where we stood. As the men both knew the way down and had not my difficulty of defective vision, I let Masao, the younger, go on to the hut, which he hoped to reach in about an hour, while Shimidzu volunteered to keep me company. The place I had chosen turned out an admirable one for a bivouac. At an altitude of about 7,000 feet a wedge of rock some 15 feet high, with a curious crack in its base, gave excellent shelter from possible rain, while water unlimited flowed a dozen feet away. The cool night breeze blowing down the valley was warded off by a screen of alder branches which Shimidzu cleverly arranged for me, and a warm fire of pine branches was burning cheerily within five minutes of striking the match. A sweater and an alpine

cape for wraps, and my rucksack over my feet, gave all the extra warmth needed during the night, and a tolerable mattress was made from a liberal supply of leaves. Fortunately I had followed my usual plan of starting out with a good deal more food than I expected to eat, so there was no danger of starvation. Water was easily boiled in a small biscuit tin, and with fragments of chocolate I concocted a soul-satisfying drink before retiring to rest. As we were in the middle of the evening meal, we were pleasantly surprised by the reappearance of Masao, bringing with him the oji-san and my alpine lantern. The good old man had grown alarmed at our non-arrival, and insisted on coming up to see how I was. But so agreeable was the situation that I had no desire to descend the torrent by lantern light, and declined their invitation to conduct me safely back to the hut. They therefore borrowed the lantern for their own downward journey and with many polite greetings turned and retraced their steps. Shimidzu and I made ourselves snug for the night and in a very few minutes were fast asleep. Slumber was only broken by the onset of cold as the fire died down and had to be fed afresh. Drowsy as one was, the beauty of the night and the interest of our situation could not but impress themselves on one's imagination at such moments. The blazing fire lighted up Shimidzu's honest, kindly face as he sat against a dark background all the gloomier for the light. Above the ceaseless roaring of the torrent rose the steep wooded hills that hem in the Okamba ravine, and one by one the stars came out with a splendour unknown to our northern latitudes at home. Presently rose a brilliant moon from behind the serrated ridge in front of us, in itself almost a sufficient light had we cared to make our way homewards with its aid. The whole scene brought back vividly Bret Harte's lines on "Dickens in Camp:"

"Above the pines the moon was slowly drifting,
The river sang below:
The dim Sierras, far beyond, uplifting
Their minarets of snow.
The roaring camp fire, with rude humour,
Painted
The ruddy tints of health
On...face and form."

Soon after breakfast the next morning Masao once more appeared, and at 7 o'clock we left bivouac and plunged into the horrid forest tangle on the left bank of the torrent. Half an hour of hard struggling with the usual obstacles enabled us to traverse the near side of the buttress by which we had previously ascended, and to reach the apology for a track then employed. By 8 o'clock we were down at the bed of the Norokawa which we forded close to the hut, and at 8.30 we were enjoying its shelter once more. Bathing, sleeping, fishing, and reading, filled the rest of that day, and the following morning, brilliantly fine, saw us on the march shortly after 5 o'clock. The journey down the river was done in about 2½ hours, the distance being called by my men "about 3 *ri*." I had now a better chance of observing the details of the valley, and noticed several good camping places on the way. The best of these, called Ishimido, we met with just half-way between Hirokawa and the point where the Norokawa valley is left behind, and consists of a fine rock cave well situated in a level opening in the forest about a hundred yards from the stream. Near by the hunters pointed out a great rock rising above the water, on the top of which grows a quantity of *iwatake* ("rock-mushroom"), a kind of fungus much esteemed by many Japanese. We left the river bed at 8 o'clock and a steady ascent of 3 hours took us up to the wood cutters' sheds at Kiriya where we halted for half an hour for lunch, the flea infested shavings not inviting a longer stay. The top of the Tsuyutate-toge was reached at 12.15, from which a steady trudge of 3½ hours took us to Ashiyasu-mura again. The descent of the steep, slippery timber slides was more trying even than the ascent, while the distant prospect was more overclouded than ever. The smells as we drew near the cultivated valley were appalling to a degree. Just before reaching the Soncho's house I met Mrs. Natori herself with her youngest

little boy, evidently off to pay an afternoon call, but she insisted on turning back to see my wants attended to. Masao and I got in shortly before 4 p.m., 11 hours after the start, or nearly 3 hours quicker than the journey out. The ojisan who was quite tired out, and Shimidzu, arrived an hour later. Every one gave us the kindest of welcomes, and seemed genuinely interested in our success. News of the attempt, they said, had got into the Kofu papers, but whether any account of the climb followed I have not heard. After a night somewhat disturbed by the usual combination of smells, heat, and fleas, I took my leave, amidst a chorus of kindly greetings, first photographing a family group, the father, mother, and five children, at the main entrance to the house. Masao I sent on to execute a commission at Kofu, whilst Shimidzu came with me to carry my baggage on to Kajikazawa, a walk of about 14 miles. The day was heavy and close, and as we passed through Arino and across the flat sun-smitten Kofu plain, the heat was almost overpowering, and one longed for the cooling springs and snows of Shiranesan again. After many halts for rest we entered the busy, picturesquely placed village exactly at noon and repaired to the Konaya inn, to whose host Mr. Natori had spontaneously written a letter on my behalf. An excellent Japanese dinner was given me, including the most delicious carp imaginable, and I early retired in anticipation of a start at daylight on my journey down the Fujikawa to the sea. To the normal infliction of heat, smells, fleas and mosquitoes, was now added the crowning misery of noisy neighbours, quarrelling over a bargain, in which the chief part was taken by a middle-aged woman of repulsive appearance and astonishingly raucous voice. The dispute was sustained until nearly midnight and resumed at about 3 o'clock the following morning. At 4.15 a.m. I was up, went down to the landing stage on the right bank of the Fujikawa, where at the office of the boat company I paid my 5 yen for a *kai-kiri* (private boat), as far as Iwabuchi on the Tokaido Railway, a distance of some 50 miles. I was conducted to the starting point by Masao and Shimidzu, and the anxiety of the latter for my comfort was quite touching, as he begged the boatmen to take especial care on the journey down. I was genuinely sorry to part with the good fellows, who had served me with a faithfulness and care that could not have been excelled. As my crew of three men and a boy, small but very strong, pushed off at 5.30 a.m. amidst a duet of farewells, I was surprised at the sudden appearance of a fifth individual who sprinted down to the bank and leaped in just as we got under way. Thinking he was an additional boatman for the sake of speed, for I was anxious to get to Iwabuchi as soon after midday as possible, I said nothing, but it transpired that he was a relative of the captain of the craft, and had begged from him a passage four-fifths of the way at my expense. However he helped to serve as ballast, and kept quiet, sleeping nearly the whole of the voyage, and I raised no objection to his presence. The dull, grey morning, after threatening rain, changed its mind and turned out hot and fine, and I succeeded in getting some "snap-shots" of passing craft, and other objects of interest by the way. A great addition to the comfort of the journey was one of Silver's light folding camp chairs which I was now using for the first time, and which in bivouac or native inns had proved a perfect boon. Folding up about the size and shape of a Japanese umbrella, and very little heavier, it affords constant relief and rest. Having started without my breakfast at the inn, the omission was made good at leisure in the most agreeable surroundings. At the junction of the Hayakawa with our river, where a wide tongue of granite boulders bends its course into a semicircular bow, a halt was made to take on board extra ballast in the shape of a dozen big stones. Beyond Tsuribashi, where once the track of the boats passed under a curious bridge, a course now forbidden on account of the dangerous rapid there, we passed by some very remarkable hexagonal columns of andesite, one of the most curious objects of the whole trip. As the steersman remarked, they resembled nothing so much as a great pile of railway sleepers,

laid on end on the river's right bank. As we drew near Iwabuchi the current widened and flowed with slackened speed, a fact for which I had presently good reason to be thankful; for as we were passing from the river along a sort of canal to the landing stage I happened to be engaged in folding up my chair, when a crash was heard and amidst excited shouts from the boatmen I found myself in turn folded up in the midst of the fragments of the frame supporting the awning spread over the boat. A long punting pole behind me had been carelessly allowed to project in such a way as to catch the first bridge we had to pass under, and as it was swept back it crashed through the frame, with which I immediately became involved. With a particularly sharp spar stabbing me in the back, the situation was awkward and painful, as I could not get free without help, which the men were at first too excited to give.

Eventually I was extricated and exactly at noon, 6½ hours from the start, I stepped ashore, received a rude demand in attempted English for "Canal-money," and I knew I was on the track of "civilisation" once more! An hour's rest at Iwabuchi ended with the arrival of the uptrain to Tokyo, and my expedition to Shirane-san was at an end.

"Jucundi acti labores."

"The mountains seem to have been built for the human race, as at once their schools and cathedrals: full of treasures of illuminated manuscript for the scholar, kindly in simple lessons for the worker, quiet in pale cloisters for the thinker, glorious in holiness for the worshipper."—JOHN RUSKIN. ("Modern Painters," Vol. IV.).

LAW CASES.

SHIMADA v. FINDLAY, RICHARDSON & CO.

In the Yokohama Chiho Saibansho on Friday morning, before Judge Kano, was heard an action brought by Mr. Shimada Chujiro, of No. 16 Nichome, Onoyecho, Yokohama, against Messrs. Findlay, Richardson & Co., No. 6, Yokohama, claiming recovery of a cheque amounting to yen 163.80 and payment of yen 418.50 damages. Mr. Fujiwara appeared for the plaintiff and Mr. Seki for the defendants.

Mr. Fujiwara said that on March 14th this year his client made a contract with the defendants for the purchase of 31 boxes of Madras indigo at the rate of yen 105 per 100 *kin* of Japanese weight, on condition that the articles should be handed over to the plaintiff within 15 days from the date of the contract, namely by March 29th. On the 24th of the same month the plaintiff sent a *barto* of the Hara-tetsu Unso-ten, a forwarding agency in Yokohama, to the defendants' office and asked for delivery of one box out of the 31, the cheque above referred to being presented to the defendants for the purpose. The defendants, however, refused to accede to this demand and accordingly the plaintiff broke the contract at once. Counsel further stated that no sooner had the above contract for 31 boxes been effected than the plaintiff made an arrangement with Mr. Tsubaki Hyozo, of Osaka, for the sale of 31 boxes of Madras indigo at the rate of yen 115 per 100 *kin*, to be delivered to Osaka not later than March 31st this year. Owing to the breach of contract on the part of the defendants the plaintiff failed to fulfill the agreement with Mr. Tsubaki, thus incurring damages to the extent of yen 418.50.

Mr. Seki denied the statements made by plaintiff's Counsel, with the exception of those with regard to the cheque and the signing of the contract, and said that the cheque received from the plaintiff had been dishonoured. He added that the cheque was given to the defendants as bargain money and that in accordance with Art. 549 of the Commercial Law the plaintiff's action against the defendants was illegal.

Mr. Fujiwara then applied to the Court for permission to examine as witnesses Mr. Kikukawa Tomogoro, manager of the Hara-tetsu Unso-ten, of Yokohama, and Mr. Tsubaki Hyozo, of Osaka, asking that the examination of the latter should be made by the Osaka Authorities and that the result

should be sent to the Yokohama Chiho Saibansho. The Court granted the application, though Mr. Seki entered a protest.

The case was adjourned *sine die*.

An action brought by Mr. M. Pors, representative of Messrs. Otto Reimers & Co., No. 8, Kobe, against the Shimpo Kan Company, of Kanazawa, Ishikawa Prefecture, came on for hearing on Oct. 23rd in the Kobe Chiho Saibansho. The claim was for recovery of yen 50,000 which had been advanced, together with damages to the amount of yen 6,397.55 for breach of contract. It appeared from the petition that the money was advanced on condition that defendants should deliver 200 tons of copper to be produced from his mine during and after August at yen 3 below the market price. Defendants broke this contract, hence the action. The case was not defended and judgment was given in default, execution to be given on the deposit of yen 10,000.

BRETEL v. JOVANSSEN.

In the Yokohama Chiho Saibansho on Monday afternoon, before Judge Naruse, was heard an action brought by Mrs. Rachel Bretel against Mr. Adophe Jovanssen, formerly manager of the Club Hotel, Yokohama, asking that the latter be made to recognize that their marriage was illegal.

Messrs. Ohashi and Otsuka appeared for the plaintiff and Mr. Ideura for defendant.

Mr. Ohashi said that the marriage of plaintiff and defendant was illegal from the law's point of view. It was true that the marriage ceremony was conducted at a church in Stockholm, but all the other important steps attending a marriage were neglected to be taken by the defendant.

Mr. Ideura said that he should like to know for what reason the plaintiff insisted that the marriage was illegal.

Mr. Ohashi replied that as the parties failed to take the necessary steps their marriage could not be recognized as legal.

Mr. Ideura said it was very strange that the plaintiff had filed the present suit against the defendant in her maiden name of Rachel Bretel, instead of entering it as Mrs. Jovanssen. Apparently she was an independent lady and in view of this fact the suit filed by her could not be recognized. In other words, she had no proper right to sue the defendant. He further stated that it was unnecessary for plaintiff to bring such a claim against the defendant if she herself regarded the marriage as illegal.

Mr. Ohashi said that defendant held that the marriage was legal and that was the reason why his client carried the matter before the Court.

Mr. Ideura said that defendant would like to present to the Court their marriage certificate as evidence but it was in the hands of plaintiff. In consequence, he asked the Court that the plaintiff be ordered to produce the certificate.

Mr. Ohashi said that no such certificate was in the possession of his client.

Mr. Ideura stated that he believed that the certificate was in the custody of Mr. Litchfield, a British barrister of Yokohama.

Mr. Ohashi applied to the Court to examine Mr. Gielen, formerly Vice-Consul of Denmark at Yokohama, to ascertain whether or not the marriage of the parties was illegal. This was granted, although Mr. Ideura entered a protest.

The case was adjourned until Oct. 31st at 1 p.m.

JONES v. BENNEY.

In the Yokohama Ku Saibansho on Monday morning, before Judge Hasegawa, was heard an action brought by Mr. E. B. Jones, No. 179, House and Estate Agent, against Mr. C. T. Benney, manager of Cobb & Co., No. 37, Yokohama. Plaintiff claimed yen 20 damages alleged to have been occasioned through a carriage accident, which occurred on June 28th this year in front of No. 61, Main Street.

Mr. Ideura appeared for the plaintiff and defendant appeared in person.

Mr. Ideura stated that on the day mentioned a collision took place between a *jinrikisha* in which plaintiff was riding and a carriage belonging to defendant, resulting in the destruction of the *jinrikisha*. The plaintiff was thrown to the ground. Counsel consented that the driver of the carriage was to blame for the occurrence.

Defendant, through the Court interpreter, said that Matsuda Tatsunosuke, the *betto*, who was in charge of the carriage, was employed by Mrs. Hall and not by the defendant at that time. He further stated that on or about April or May this year he discharged the *betto*, who had thereafter remained in the service of Mrs. Hall. The carriage was owned by the latter at the time of the collision. Under the circumstances, he was not responsible or the consequences of the accident.

Mr. Ideura applied to the Court for permission to examine as witness Mrs. Hall. This was granted.

The proceedings were adjourned until Nov. 5th.

THE NAIGAI BOYEKI KAISHA v. EYTON & PRATT.

In the Yokohama Ku Saibansho on Monday morning, an action brought by Mr. Yagi Shimbei, the representative of the Naigai Boyeki Kaisha, No. 89, Gochome, Ota-machi, Yokohama, against Mr. J. L. O. Eyton, of Messrs. Eyton and Pratt, No. 77, Yokohama came up for hearing before Judge Hasegawa. Mr. Sato appeared for the plaintiffs and Mr. Yano for the defendants.

The plaintiffs claim the delivery of 13,350 cartridges in exchange for *yen* 52.

Mr. Sato stated that on May 15th this year when an auction took place in the auction room of the plaintiff the articles above referred to were purchased by a Mr. Ikeda on behalf of the plaintiffs for *yen* 52. Subsequently the plaintiffs demanded of the defendants for the delivery of the articles, but the latter refused to accede to the demand on the plea that the articles were purchased by Mr. Ikeda and not by Mr. Yagi.

Mr. Ikeda was then examined as a witness. In reply to the Judge's questions, the witness said that he purchased the articles on behalf of Mr. Yagi, who dispatched the witness to the defendants' auction room for the purpose.

Mr. Yano contended that the articles were purchased in the name of Mr. Ikeda, the witness, and therefore the defendants would not acquiesce in the claim of the plaintiffs.

The case was adjourned until Nov. 5th.

A PILOT CASE.

Judgment in default was given in the criminal section of the Yokohama Chiho Saibansho, by Judge Yasuda, on Oct. 27th in the case of Mr. J. Feichney, an American subject, living in Moto-machi Nichome Yokohama, who had lodged an appeal against a decision rendered by the Yokohama Ku Saibansho on Sept. 20th this year when he was ordered to pay a fine of *yen* 50 on a charge of having piloted without a license the Austrian steamer *Zoir*. The Court rejected the appeal and the decision of the lower tribunal is upheld.

MOGI v. ALLEN.

In the Yokohama Ku Saibansho on Wednesday morning, before Judge Tanuma, the hearing was resumed of the suit brought by Mr. Y. Mogi, of the Mogi Shoten, Nichome, Bentendori, Yokohama, against Mr. C. R. Allen, No. 31, in the former Settlement, claiming 75.90 with six per cent. interest from July this year until the execution of judgment.

It was arranged, however, to settle the matter privately.

SUMI v. VANTINE & CO.

In the Yokohama Chiho Saibansho at noon on Wednesday, before Judge Kano, the hearing was resumed of the suit brought by Mr. Sumi Rikichi, of Osaka, against Messrs. Vantine & Co., No. 268, Yokohama, claiming *yen* 8,550.050 damages for non-delivery of certain bicycles.

Mr. Hioki appeared for the plaintiff and Mr. Masujima for the defendants.

Mr. Ikegami, dealer in bicycles, of No. 3, Ichome, Tokiwacho, Yokohama, was examined as a witness. In response to the Judge's ques-

tions, he said that the price of a Peeress bicycle in May, 1901, was about *yen* 75 on the wholesale market of Yokohama, while the retail price ranged from 80 to 85 *yen*.

Mr. Masujima asked witness at what establishment he purchased the Peeress bicycles.

Witness replied that he purchased two bicycles of that type from Messrs. Vantine & Co.

Mr. Hioki said it was the defendants who first disregarded the contract, and he repeated his former statement that his client made a contract with defendants in 1900 for the supply of 400 Peeress bicycles at the rate of *yen* 45.50 per machine, with a proviso that the plaintiff might take delivery of the articles in lots to suit himself, payment being made in cash whenever delivery was effected. The contract further provided that plaintiff should take delivery of the whole shipment by the end of September last year. Out of the 400, the plaintiff received 100 bicycles up to March 26th last year and paid *yen* 4,595.50 for them. On May 28th, 1901, plaintiff asked defendants for the delivery of 10 more bicycles, but his request was rejected on the ground that plaintiff had failed to make payment in due time as provided in the contract. But plaintiff had paid in cash without delay whenever he received the bicycles from the defendants, it being arranged in the contract that the payment must be made within a certain time after the delivery of each lot. It was true that there was ten days' delay on the part of the plaintiff in effecting payment for the last lot received on May 16th. This was the only instance of delay throughout the transactions but it was not remarkably behind time in view of the fact that plaintiff resided in Osaka. Continuing, Counsel for plaintiff stated that quite apart from the transactions in Peeress bicycles there was another transaction between plaintiff and defendants. The refusal on the part of the defendants to deliver ten more bicycles as above stated was apparently the outcome of the last affair. By referring to Art. 541 of the Commercial Code, Mr. Hioki said that the breach of a portion of the contract was held to be a violation of the whole and in view of this, plaintiff claimed from defendants payment of *yen* 8,550.050 damages for the remaining 300 machines.

Mr. Masujima said that it was scarcely necessary for him to state that plaintiff broke the contract. The contract provided that payment should be made in cash promptly according to the usage of defendants. It was noticeable that plaintiff went on gradually to neglect making prompt payments; for instance, there was a delay of seven days on one occasion, nine days on another, and 18 days on a third. Under the circumstances, the defendants refused to supply further bicycles in accordance with the contract.

The Court announced that judgment would be given on Oct. 31st.

JOVANSSEN v. HOPKINS.

This case (involving a charge of adultery) which it was expected would be resumed in the criminal section of the Yokohama Chiho Saibansho on Thursday morning has been postponed owing to the non-appearance of Reginald George Hopkins, who was prevented by illness from attending the Court. The next hearing will take place about Nov. 7th.

SARDA v. BOISREGON.

In the Yokohama Chiho Saibansho on Thursday afternoon, before Judge Kato, the hearing was resumed of the suit, adjourned from Oct. 7th, brought by Mr. P. Sarda, No. 84, against Mr. A. Boisregon, legal representative of Messrs. R. Chauvin & Co., No. 250, Yokohama, claiming *yen* 368.465 with five per cent. interest from March 28th, 1901, until the execution of judgment. Mr. Ishiwara appeared for the plaintiff and Mr. Akiyama for the defendant.

Mr. Ishiwara said that the building on lot No. 179, which the defendant left on July 31st, 1901, was rented to defendant by the predecessor of plaintiff. This was about 12 years ago.

The Judge asked Mr. Ishimura whether he knew the name of the predecessor.

Mr. Ishiwara replied that he did not know who the person was. At any rate, continued Counsel,

plaintiff has been the owner of the building since 1901. He then applied to the Court for permission to appoint an expert to make an examination of the building in order to see whether the work done by defendant was proper or not. He further mentioned several persons including carpenters and others, who might be examined as witnesses.

The Judge suggested, at this stage, that Counsel might settle the matter privately.

Mr. Akiyama, while thanking the Judge for his advice, said that there was no hope of the case being arraigned out of Court, Mr. Sarda not being a man to accede to such a proposal. He asked the Court to summon as witnesses Mr. Bieber, of Messrs. Bieber & Co., and also a Japanese carpenter named Tsuda Urakichi, both of whom were connected with the affair.

The Court, after a short consultation, announced that the witnesses named by Mr. Akiyama should first be examined.

The case was adjourned until Nov. 20th at 10 a.m.

NEWS OF THE WEEK.

The Japanese Coronation Squadron, the *Asama* and *Takasago*, arrived at Singapore from England, on Oct. 28th.

The Pacific Mail steamer *Korea*, hence on the 18th instant for San Francisco direct, arrived at that port on the 28th, making the passage in 10 days and 15 hours.

According to recent statements made by the British Government in the House of Commons the Russo-British negotiations about Afghanistan are very unfavourable.

Captain J. Rattenbury, of the China and Manila S. S. Co., and formerly of the Empress line, died in hospital at Hongkong on the 16th inst., leaving a widow and two children.

The launch of the torpedo-boat destroyer *Harusame* (Spring Rain), built at the Yokosuka Shipbuilding Yard, was expected to take place there on the afternoon of Oct. 30th.

The N.Y.K. steamer *Idzumi Maru*, Capt. Yagi, which left here on Oct. 25th for Bombay, is reported ashore in the Inland Sea some six miles from Onomichi. Assistance has been sent to her from Kobe.

The *Bangkok Times* understands that Mr. Ralph Paget is coming to Bangkok as H.B.M. *Chargé d'Affaires*, and is expected to arrive next month. Mr. Paget has had far Eastern experience, having been in Tokyo for over five years from 1893 to 1899.

The sailing-vessel *No. 1 Chishima Maru* (70 tons), belonging to Mr. Aoki Ko, M.P. representing Tochigi Prefecture, is reported to be missing. Having returned lately from the seas off Korea, where she had engaged in fishing, the vessel left Hagino-hama for Yokohama on Oct. 4th but has never been heard of since. Mr. Aoki applied to the Naval Authorities on the 27th to institute a search for the missing vessel.

About 9 p.m. on Oct. 28th a fight took place in a saloon at No. 187, in the former Settlement, Yokohama, between the master of the house and three visitors. As a result, the master was injured on his left ear while one of the visitors had his head injured more or less seriously. They were all taken to the Kagacho Police Station the following day for examination as to the cause of the struggle. It appears that the visitors called at the saloon for the purpose of seeing a certain Russian. Not finding him there they became angry and "went for" the saloon-keeper.

Mrs. Wilson, an American citizen, died at the Oriental Hotel, Kobe, on Tuesday evening after a short illness. The deceased lady was with her son, who has been travelling around the world for his health. Mrs. Wilson, says the *Kobe Herald*, was the grandmother of the Secretary of the United States Legation in Tokyo, now on his way to America on leave of absence. The de-

ceased lady's maiden name was Sarah Ann Mairs. She was born at Steuben-ville, Ohio, about the year 1827 and was the wife of the late Mr. John Wilson, of Pittsburg, Pa, formerly medical inspector and surgeon in the U. S. A. and for many years U.S. Consul at Brussels and Antwerp, Belgium. The body is to be embalmed and taken to the United States.

We acknowledge receipt from the Imperial Chinese Maritime Customs of a copy of the Statistical Returns of Trade for the various ports of China for the second quarter of 1902. It contains the usual tables and particulars as movements in the Customs service, which of course must be of interest to the very great number of persons now involved directly and indirectly in this vast institution. These returns give the total receipts as Haekwan Taels 7,992,394. In the corresponding quarter of 1901, the total was Hk. Taels 6,440,160, and in 1900 Hk. Taels 6,325,595. The collection at Shanghai amounted to Hk. Taels 3,086,964 as compared with Hk. 2,046,209 last year; at Canton Hk. Taels 699,844 compared with Hk. Taels 529,871 in the corresponding quarter last year. The statistics show improvement in North China, and a falling off in the Yangtse Valley and Southern Coast Ports.

The *Kobe Herald* says Mr. Walter Pietzcker, son of the late Mr. Frederick Pietzcker of Hamburg, was married on Wednesday morning to Miss Cecilia Esdale, daughter of Mrs. Esdale, of Kobe. The civil ceremony took place at 10 o'clock at the German Consulate where Mr. Krien, the Consul, officiated. Count Bernstoff and Mr. John Schaumann signed the marriage certificate as witnesses. The religious ceremony was held in All Saints' Church at 11 o'clock and a number of people were present. The Rev. G. H. Davis officiated and Count Bernstoff acted as best man. Mr. and Mrs. Pietzcker left by the midday train for Kyoto, carrying with them the good wishes of all their friends. At the German Legation in Tokyo, Dr. Fuehr, assistant German Consul in Kobe, was married on Saturday last to Miss Helen Marion Smart of Savannah, U.S.A. Dr. and Mrs. Fuehr are spending their honeymoon at Kyoto.

Among the exports from Yokohama is *momen-chijimi* (a kind of cotton crepe) which is chiefly sent to Hongkong, China, India, America, Hawaii, Korea, and the Philippines. The value of the export amounts to a little over yen 300,000 a year. It is a pity, says the *Yokohama Shimpo*, that the figures are so low and the business makes no remarkable progress, in spite of there being many markets for it. This discouraging condition is apparently due to the fact that the trade is at present in the hands of Chinese merchants. Below is a table showing the quantity and value of the article exported during late years:—

	tan	yen.
1897.....	373,181	377,103
1898.....	313,566	315,925
1899.....	395,159	388,748
1900.....	381,143	370,774
1901.....	405,061	380,395

It is with much regret we (*Kobe Herald*) announce the death of Mr. J. R. Elliott, a very old resident of the port. Mr. Elliott has been in a weak state of health for some years but not until a comparatively recent date did his condition occasion anxiety. He succumbed on Monday night at 11.30 o'clock, the cause of death being diabetes. The deceased gentleman came out to Japan in 1872, to join Messrs. Alt and Co., of Nagasaki, and subsequently on the firm opening at this port in the name of Hunt, Hellyer and Co., he came to Kobe. Mr. Hunt, head of the firm of Hunt & Co., is a cousin of Mr. Elliott. After serving the old firm of Hunt, Hellyer & Co. for some years Mr. Elliott joined Messrs. Hellyer & Co., with whom he remained until he retired from business life entirely, which was in 1898, we believe.

According to the annual shipping report of the Marine Department of Canada, the Dominion stands eighth in point of ownership of vessel

tonnage among the nations of the earth, leading Spain, Sweden, Holland, Denmark, Greece, Japan, Turkey and other countries. Britain heads the list, with United States second, then Germany, Norway, France, Italy, Russia and Canada. Following are the comparative figures in net tonnage:—

*British	10,304,338	Canadian ...	664,413
American ...	2,318,876	Swedish	607,862
German	2,106,885	Spanish	561,661
Norwegian...	1,393,096	Japanese	510,175
French	961,250	Dutch	451,940
Italian	947,079	Danish	387,727
Russian	850,695	Grecian	320,705

*Including Canada and the colonies.

The report shows that the total number of vessels remaining on the register books of the Dominion on December 31st, 1901, including old and new vessels, sailing vessels, steamers and barges, was 6,792, measuring 664,483 tons register tonnage, being a gain of fifty-seven vessels and an increase of 4,949 tons register as compared with 1900. The number of steamers on the registry books on the same date was 2,177, with a gross tonnage of 297,421 tons. Assuming the average value to be \$30 per ton, the value of the registered tonnage of Canada on December 31st would be \$19,934,490. The number of new vessels built and registered in the Dominion of Canada during the last year was 335, measuring 34,481 tons register tonnage. Estimating the value of the new tonnage at \$15 per ton, it gives a total value of \$1,551,645 for new vessels.

The semi-annual dividend of the Bank of England was declared on the 18th September, and this fact calls to mind that the annual rate of 10 per cent. has been maintained since 1896. This ratio is within 2 per cent. of the highest rate paid by the bank during the nineteenth century. The highest rate was the 12 per cent. paid from 1804 to 1806 inclusive, during the unsettlement of the Napoleonic wars. The next highest was the 10 per cent. maintained during the later Napoleonic unsettlement—the rate then holding from 1807 to 1822; the 10 per cent. rate adopted during the panic period of 1857-58; 10 per cent. declared in the year when the American Civil War broke out in 1861, a later rise to 11 per cent. in 1864 and to 11¾ per cent. in 1866, the year of the Overend-Gurney panic; 10 per cent. in 1873 and 1874; 10½ per cent. in 1879, the year of the English harvest failure, and 11 per cent. the year following the "Baring panic" of 1890. Except for these years and the years nearest to them, the dividend rate has rather uniformly ruled around 9 per cent. or lower. The continuance of the 10 per cent. dividend during the last few years has been due to the profits consequent on the active money market of the Boer war period. Thus it would seem that the bank's best years for profits have been periods of war, crop failures, or "panics." Perhaps it is not generally known that the bank's dividends in recent years have been above the average paid in the eighteenth century, despite the fact that in 1719 19 per cent. was paid; in 1709 16 per cent., and in 1706 18¾ per cent. Between 1719 and the end of the century the highest annual dividend was 7½ per cent., and for the ten years 1753-63 4½ per cent. It has never paid as small a dividend as that since 1763, the lowest rate of the past century being 7 per cent. The record dividend was 27½ per cent., in 1697, the second year of its existence. But the next year it paid only 7 per cent.

CORRESPONDENCE.

CHINESE AND OCCIDENTALS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In the very interesting resumé in your issue of 27th of Dr. Kinoshita's paper in the *Kokumin Shimbun* on "The Future of Chinese Education," it is said that there is no single point of contact between China and the West. "No common ground on which Chinese and Occidentals can meet, we know of none" are the words employed. I believe it is to be found—if we go high enough. I have noticed with great interest, in attempting to translate Confucius' works into modern style English that the principal word in the

"analects" (Koshis Rongo)—namely "virtue"—is in essence the same as the central idea in the word "Christian." The word "virtue" which in Chinese 德, in Japanese *toku*, seems to have in it meanings "kindness" (or gentleness) and "uprightness" (or honesty). The early Christians were supposed to be followers of Christos, sometimes written Chrestos (the word has the same pronunciation in Greek (χριστός and χρηστός): and the meaning of Chrestos is exactly the same, namely kind, upright. If we search we may therefore find the common ground for East and West at this point; at least, so it seems to me.

Yours truly,
Tokyo, October 27th, 1902.

HOWARD SWAN.

THE ORIENTAL HOTEL, LIMITED.

The following is the report for presentation to the shareholders of the Oriental Hotel, Ltd., at the Eleventh Annual Ordinary General Meeting, to be held at the Oriental Hotel on Thursday, 30th October, 1902:—

The Directors now have the pleasure to lay before the Shareholders a Statement of the Company's Accounts for the year ending 31st August, 1902.

The total net earnings in Working Account amount to yen 68,889.98, showing a gross profit of yen 40,011.57. After writing off yen 17,000.00 for depreciation, and deducting yen 3,560.00, Interim Dividend paid on 15th May, 1902, there remains for distribution a balance of yen 19,451.57 which it is proposed to apply as follows:—

Final Dividend : yen 3.50 on 1424 Ordinary Shares	Yen. 4,984.00
Dividend : yen 8 % on Preference Shares	5,472.00
Dividend yen 37.50 each on 80 Founders' Shares	2,960.00
To Reserve Account	6,035.57
	19,451.57

The Company's property has been maintained in an efficient manner, and eight additional rooms have been added to the accommodation of the Hotel.

At the last Annual General Meeting, a resolution was passed confirming the Directors in their proposal to abandon the scheme of the construction of a branch Hotel at Kyoto. At an Extraordinary General Meeting, held on the 24th January, 1902, it was resolved, in consequence of the foregoing resolution, to reduce the Capital of the Company. By reason of certain legal formalities to be performed in Hongkong, the reduction of Capital cannot be carried out until an order from the Supreme Court has been obtained.

AMERICAN ASIATIC ASSOCIATION.

The annual meeting of the American Asiatic Association was held at the United States Consulate General on Friday, when the following officers and committee were elected for the ensuing year:—

N. F. Smith, President; B. C. Howard, Vice-President; G. H. Scidmore, Secretary; W. L. Merriman, Treasurer. Executive Committee; J. W. Copmann, E. S. Booth, G. W. Bramhall, F. H. Ziegfeld, D. H. Blake, E. W. Frazar, J. H. Jewett.

The following resolution was also passed:—

Resolved, that in the death of Jonas Mendelson, the American Asiatic Association in Japan, and also the foreign community of Yokohama, have met with an irreparable loss.

His modest and retiring nature; his domestic tastes and devotion; his integrity and uprightness as a man of business; his conservatism and sound judgment as a counsellor in public affairs, won for him the highest respect of both neighbours and colleagues; his kindness and charitable disposition made him a valued friend to all who had an intimate acquaintance with him.

In the work of the Executive Committee of this Association he was active, earnest and intelligent—his judgment always sound and reliable.

While we deeply mourn our great loss in no longer having the benefit of his wise counsel, and genial presence with us, we do not forget the greater loss his family has sustained, and we reverently commend them to that One, who alone can give consolation in the hour of sorrow.

Resolved:—That the foregoing be entered in the minutes of this meeting and a copy be sent to the family of the deceased.

THE CLUB HOTEL, LIMITED.

The following accounts for the half-year ending September 30th have been printed and circulated for the information of shareholders:—

During the period included in these accounts, the former Y. U. C. buildings have been renovated and furnished, adding 27 fine rooms to the Company's establishment.

The cost of new furniture, amounting to yen 10,000 has been added to Furniture Account, and appears as an asset; but sums of yen 3,500 and yen 1,500, disbursed for Repairs and Improvements, and new linen, etc. have been debited to Working Account. Yen 1,000 has been paid to Mr. Josiah Conder for his services in preparing plans and specifications for the proposed new buildings. In addition to above mentioned items, yen 3,506.17 has been written off various accounts, particulars of which appear in Profit and Loss Account. From the balance remaining, yen 13,307.16, it has been decided to declare an interim dividend of Four yen per share, which will absorb yen 7,400, and to carry forward yen 5,907.16 to credit of new account.

Dividend warrants will be issued on the 1st Nov.

HENRY C. LITCHFIELD, Chairman.

J. COX EDWARDS, Auditor.

Yokohama, October 24th, 1902.

AUTUMN MEETING OF THE NIPPON RACE CLUB.

ENTRIES.

FIRST DAY.—MONDAY, 17TH NOVEMBER.

1.—The COSMOPOLITAN PLATE, for Australian Subscription Horses of 1900-1901; weight for age; winners of 3 races at date of entry 5lb. extra, of more than 3 races 10lb. extra; Entrance, yen 5. winner yen 250, Second Horse 50 yen. One Mile.

Tenryu, Eleve I, Fourree, The Orb, Faule Grete, Ojiasma, Madge, Tasmanian.

2.—The SHIMOSA CUP, for Subscription Country Breds of Autumn, 1902; weight for age; Entrance, yen 5; winner yen 250, second horse yen 50. Half a Mile.

Kiyokawa, Le Gone, Nicup, Tsukigase, Komatsu, Shitaka, Alster, Ping-pong, Miss May.

3.—The AUSTRALIAN GRIFFIN RACE, for Australian Subscription Horses of Autumn, 1902; weight for age; Entrance, yen 5; winner yen 250, second horse yen 50, third horse yen 25. Five Furlongs.

Trust Not, Kachikawa, Ma Mie, Azuma, Melbourne, Sydney, Sakura, Tonegawa, Bambina, Sanyo, Cameo, Margherita, Uhlenhorst, Elbe, Peking, Cloudy, Mantis, Lady May, Thistle, Shamrock, Suzon.

4.—The ALL-AGED STAKES, for all Horses; weight for Age; Subscription Horses of 1899-1902 Spring that have not won more than 5 races allowed 7lb.; Entrance, yen 5; winner yen 250. One Mile.

Arakawa (late Hawfinch), Saikio, Lady, The Coronet, Imperial Mistral II, May Crown.

5.—The SYDNEY CUP, for Australian Subscription Horses of 1900-1901 and Spring, 1902; weight for age; winners of 3 races at date of entry 5lb. extra, of more than 3 races 10lb. extra; an allowance of 3lb. for Spring Horses of 1902 that have not won a race; winner of race No. 1 excluded; Entrance, yen 5; winner yen 250, second horse yen 50, third horse yen 25. Three-quarters of a Mile.

Temper, Try Again (late Kirin), Tenryu, Eleve I, Fourree, Tamagawa, The Orb, Fujikawa, Desdemona, Figaro (late Hayabusa), Tokai, Faule Grete, Madge, Ojosama, The Beetle, Firefly, Patsie, Hope, Yamato, Tasmanian.

6.—The MANDARIN CUP, for all China Ponies, to be ridden by Full Members of the Club, or Visitors, whose names must be sent in to the committee before the meeting and approved by them; weight as per scale; Entrance, yen 5; winner yen 200, second pony yen 50. Three-quarters of a Mile.

Hayakawa, Etourdi, Standard Rose (late Hayakoma), Oicada (late May-be), Sunrise, Max William (late Coronation), McMorse.

7.—The NARITA STAKES, for Subscription Country Breds of Autumn, 1902; weight for age; winner of race No. 2 excluded; Entrance, yen 5; winner yen 200, second horse yen 50. Five Furlongs.

Kiyokawa, Le Gone, Nicup, Tsukigase, Komatsu, Shitaka, Alster, Ping-pong, Miss May, Leek.

8.—The NEW SOUTH WALES STAKES, for Australian Subscription Horses of Autumn, 1902; winner of race No. 3 excluded; weight for age; Entrance, yen 5; winner yen 250, second horse yen 50, third horse yen 25. One Mile and a Furlong.

Trust Not, Kachikawa, Ma Mie, Azuma, Melbourne, Sydney, Sakura, Tonegawa, Bambina, Sanyo, Cameo, Margherita, Elbe, Uhlenhorst, Peking, Cloudy, Mantis, Lady May, Rose, Suzon.

9.—The BRISBANE CUP, for Australian Subscription Horses of Spring, 1902; weight for age; winners at date of entry 5lb. extra for 1 race, for 2 races or more 7lb. extra; Entrance, yen 5; winner yen 250, second horse yen 50. One Mile.

Temper, Try Again, Tamagawa, Fujikawa, Figaro, The Beetle, Firefly, Patsie, I.O.U., Hope, Yamato, Amazon (late Sans Espoir).

SECOND DAY.—TUESDAY, 18TH NOVEMBER.

1.—The CHAMPAGNE CHALLENGE CUP, (Presented by Messrs. G. H. Mumm & Company) for Australian Subscription Horses of 1901 and thereafter, that have not run at more than two meetings; to be won three times in all by horses the *bona fide* property of same owner or owners, with yen 300 added by the Club until the Cup is finally won, when the Second Horse will receive the added money; weight 145lb.; winners 7lb. extra; Entrance, yen 10. One Mile.

Temper, Tenryu, Eleve I, Figaro.

2.—The MIRA STAKES, for Australian Subscription Horses of Spring, 1902; weight for age; winner of race No. 9 First day excluded, winners at date of entry 5lb. extra for 1 race, 7lb. extra for 2 or more; Entrance, yen 5; winner yen 250, second horse yen 50, third horse yen 25. Three-quarters of a Mile.

Temper, Try Again, Tamagawa, Fujikawa, Desdemona, Figaro, Tokai, The Beetle, Firefly, Patsie, I. O. U., Hope, Yamato, Amazon.

3.—The COLONIAL STAKES, for Australian Subscription Horses of Autumn, 1902; weight for age; winners at the meeting 5lb. extra; Entrance, yen 5; winner yen 300, second horse yen 50, third horse yen 25. Mile and a Quarter.

Trust Not, Kachikawa, Ma Mie, Azuma, Melbourne, Sydney, Sakura, Tonegawa, Sanyo, Cameo, Margherita, Uhlenhorst, Elbe, Peking, Cloudy, Mantis, Lady May, Rose, Suzon.

4.—The NIPPON DERBY, for Subscription Country Breds of Autumn, 1902; weight for age; winners at meeting 3lb. extra; Entrance, yen 5; winner yen 200, second horse yen 50. Five Furlongs.

Kiyokawa, Le Gone, Nicup, Tsukigase, Komatsu, Shita, Alster, Ping-pong, Miss May, Leek.

5.—The TIENSIN CUP, Handicap, for China Ponies, to be ridden by Full Members of the Club or Visitors, whose names must be sent in to the committee before the meeting, and approved by them; Entrance, yen 5. One Mile.

Hayakawa, Etouri, Standard Rose, Cicada, Sunrise, Max Willem, McMorse.

6.—The TOKIO STAKES, Handicap, for All-Comers. Entrance, yen 5; winner yen 300, second horse yen 50. Mile and a Quarter.

Arakawa, Fourree, Saikio, Faule Grete, Madge, Lady, The Coronet, The Beetle, Imperial Mistral II, May Crown.

7.—The YOKOHAMA PLATE, for Australian Subscription Horses of Spring, 1902; weight for age; winners at date of entry 5lb. extra for 2 races, 7lb. extra for more than 2; winners at meeting 3lb. extra. Entrance yen 5; winner yen 300, second horse yen 50. Mile and a Furlong.

Temper, Try Again, Tamagawa, Fujikawa, Desdemona, Figaro, Tokai, The Beetle, Firefly, Patsie, I.O.U., Hope.

8.—The NEGISHI CUP, for Australian Subscription Horses of 1900-1901; weight for age; winners of 3 races, at date of entry 5lb. extra; of more than 3 races, 10lb. extra; winners at meeting to carry an additional 5lb.; winner yen 250. Mile and a Half.

Fourree, The Orb, Faule Grete, Ojosama, Madge, Tasmanian.

9.—The MELBOURNE STAKES, for Australian Subscription Horses of Autumn, 1902; weight for age; winners of 1 race at meeting 5lb. extra, of 2 or more races 7lb. extra. Entrance yen 5; winner yen 300, second horse yen 50, third horse yen 25. Three-quarters of a Mile.

Trust Not, Kachikawa, Ma Mie, Azuma, Melbourne, Sydney, Sakura, Tonegawa, Bambina, Sanyo, Cameo, Margherita, Uhlenhorst, Elbe, Peking, Cloudy, Mantis, Lady May, Thistle, Shamrock, Suzon.

THIRD DAY.—WEDNESDAY, 19TH NOVEMBER.

1.—The PRIX DES HARAS, Handicap, for all Subscription Horses entered at the Meeting, Australian and Country Breds, (1902 Subscription Country Breds excluded), a forced entry of 10 yen—non-starters half forfeit, Handicap weights to be published at close of second day. Winner yen 300, Second Horse yen 100. Third Horse yen 50. One Mile.

Temper, Try Again, Tenryu, Trust Not, Kachikawa, Eleve I, Fourree, Ma Mie, Saikio, Azuma, Melbourne, Sydney, Tamagawa, Sakura, The Orb, Fujikawa, Tonegawa, Desdemona, Bambina, Figaro, Tokai, Sanyo, Cameo, Faule Grete, Margherita, Uhlenhorst, Elbe, Peking, Ojosama, Madge, The Coronet, Cloudy, The Beetle, Firefly, Mantis, Patsie, Lady May, I.O.U., Rose, Thistle, Shamrock, Hope, Suzon, Tasmanian, Yamato, Amazon.

2.—The QUEENSLAND PLATE, for Australian Subscription Horses of Spring, 1902, and Autumn, 1902; weight for age; winners at date of entry 5lb. extra for one race, 7lb. extra for 2 or more! winners at meeting of one race 5lb. extra, of 2 races excluded; an additional 3lb. allowance for Autumn Subscription Horses that have not won 2 Races; Entrance, yen 5. Winner yen 250, Second Horse yen 50, Third Horse yen 25. One Mile.

Try Again, Temper, Trust Not, Ma Mie, Azuma, Melbourne, Sydney, Tamagawa, Sakura, Fujikawa, Desdemona, Bambina, Figaro, Tokai, Sanyo, Margherita, Uhlenhorst, Elbe, Cloudy, The Beetle, Firefly, Patsie Lady May, I. O. U., Hope, Suzon, Yamato, Amazon.

3.—The PEKING CUP, Handicap, for all China ponies, to be ridden by Full Members of the Club or Visitors, whose names must be sent in to the Committee before the meeting and approved by them; Entrance yen 5. Winner yen 200, Second Pony yen 50. Mile and a Quarter.

Hayakawa, Etourdi, Standard Rose, Cicada, Sunrise, Max Willem, McMorse.

4.—The OLD SUBSCRIPTION CHAMPIONS for Australian Subscription Horses of 1900 and 1901; weight for age; a forced entry for winners at the meeting of 1 race yen 10, of 2 races yen 20, and of more than 2 races yen 40. Optional to beaten horses at an entrance of yen 25. Winner yen 500. Mile and a Quarter.

5.—The "All 1902" CHAMPIONS, for Australian Subscription Horses of 1902; weight for age; a forced entry for winners at the meeting of yen 10 for 1 race; yen 20 for 2 races; yen 40 for more than 2 races; optional to beaten horses at an Entrance fee of yen 25. Winner yen 500. Mile and a Quarter.

6.—The ATL-COMERS HANDICAP, for all Horses; Entrance yen 5; Weights to be published at conclusion of second day's racing, winner yen 300, Second Horse yen 100. Mile and a Half.

Arakawa, Saikio, Madge, Lady, The Coronet, The Beetle, Imperial Mistral II, May Crown, Suzon, Tasmanian.

7.—The NIPPON SOLACE, for Subscription Country Breds of Autumn, 1902, that have started during the meeting and won a race; weight for Age. Entrance yen 5. Winner yen 200, Second Horse yen 50. Half a Mile.

Kiyokawa, La Gone, Niicup, Tsukigase, Komatsu, Shitaka, Alster, Ping-pong, Miss May, Leek.

8.—The CONSOLATION RACE, for Australian Subscription horses of Spring, 1902, that have started and not won a race during the meeting; weight for Age. Entrance yen 5. Winner yen 200, Second Horse yen 50. One Mile.

Temper, Try Again, Tamagawa, Fujikawa, Desdemona, Figaro, Tokai, The Beetle, Firefly, Patsie, I. O. U., Hope, Yamato, Amazon.

9.—The SUBSCRIPTION SOLACE, for Australian Subscription horses of Autumn, 1902, that have started and not won a race during the meeting; weight for age; Entrance yen 5; winner yen 200, second horse yen 50. One Mile.

Trust Not, Kachikawa, Ma Mie, Azuma, Melbourne, Sydney, Sakura, Toneyawa, Bambina, Sanyo, Cameo, Margherita, Uhlenhost, Elbe, Peking, Cloudy, Mantis, Lady May, Rose, Thistle, Shamrock, Suzon.

TRADE OF HAKODATE FOR 1901.

We extract the following from the report of Mr. A. E. Wileman on the trade of Hakodate:—The total value of the foreign trade of Hakodate for the year 1901 amounted to £484,597, and shows a decrease of £34,348 when compared with the figures for 1900, which were £518,945. The actual shrinkage in the total value of the foreign trade, however, is only £24,348, as the adoption of a lower rate of exchange for the conversion of Japanese currency into sterling is responsible for an apparent decrease of £10,000. The rate of exchange used for the year 1900 was 2s. 0½d., whilst that employed for the present report is 2s. The foreign export trade for the year has expanded by £31,347, owing chiefly to increased exports of dried fish, sulphur and seaweeds. On the other hand the foreign import trade has decreased during the year by £65,695. The primary cause of the decrease in the annual foreign trade is due to the conspicuous falling-off in exports to, and imports from Russian Asia.

Work on the Hakodate dry dock is progressing steadily, and it will probably be ready for use in the month of November, 1902.

Muroran is rapidly assuming increased importance as a coaling port, especially for steamers on the Trans-Pacific route navigating between North America and Siberian and North China ports, Hongkong, Singapore and Manila. It is the custom now for many of these steamers to coal at Muroran instead of at Moji, and to pass through the Straits of Tsugaru and the Sea of Japan instead of by the Pacific Coast of Japan and the Inland Sea. The route via the Tsugaru Straits, to which Muroran lies in convenient proximity, is for such steamers the shortest and most direct, and by adopting it they avoid the intricate and dangerous navigation of the Inland Sea.

Muroran was opened for the first time as a special port of export in 1894. During that year only three foreign steamers, of a total tonnage of 3,332 tons, entered. During 1901 89 foreign steamers, of total tonnage of 190,921 tons, and one sailing ship of 63 tons, entered, so that rapid progress has been made by the port during the last eight years. Seven Japanese steamers of 6,005 ton are not included in the foregoing figures for 1901.

Muroran harbour is the third largest port in Japan, being easy of access. It affords first-class anchorage for large vessels, and is well fitted for large operations of trade. It is claimed to be capable of accommodating simultaneously 38 vessels of from 3,000 to 5,000 tons. Hakodate ranks as the first harbour of Japan and can accommodate 109 vessels of the same tonnage.

In the west harbour extensive works of land reclamation have been completed by the Hokkaido Colliery and Railway Company, and a large new pier is in course of construction.

Otaru does not show such satisfactory signs of progress in foreign shipping as Muroran, only 20 foreign steamers of a tonnage of 24,076 tons having entered and cleared in the course of the year. The total value of foreign trade has decreased 30 per cent. since 1900, owing mainly to a decrease in the import of marine produce from Saghalien, and in the export of railway sleepers to North China. A rescue station has been opened at Otaru by the Lifeboat Association

during the past year, and a Bill has been passed in the Imperial Diet providing for the improvement of the harbour, which is likely to become very important when the Russian system of Trans-Asian railways is completed. Extensive works of dredging, land reclamation and construction of docks and piers have been commenced and will be completed in four years. The construction of a breakwater has also been commenced, and will involve the outlay of £218,000, the payment of which will be extended over a period of 10 years. The harbour of Otaru ranks fourth in Japan, and is capable of accommodating simultaneously 28 vessels of from 3,000 to 5,000 tons.

PLACER MINING.—The Hokkaido placer mining output for the northern district for 1901 is estimated to be about 10,000 ozs., valued at £32,000; 10 to 15 oz. pieces have frequently been cleaned up, and the gold found in this section would average up very well for size with that obtained in California in the earlier periods. Diggers are now working in a systematic manner, and have more or less adopted the methods of American placer diggers introduced by several foreigners in 1900. Whereas in that year it was the rule for everyone to work for himself, last year they found it to be their advantage to combine into small companies and work sections thoroughly, with, it need hardly be said, better results. Several new districts have been opened during 1901, and the prospects look bright for a further development in this kind of mining.

The diggers complain of the restrictions placed upon their work by the authorities, by the Placer Mining Law—namely, in closing the lower reaches of the rivers after Aug. 30, for the protection of the fishing industry. Owing to this not more than three months in the year are available for work. The driest months are September, October, and November, during which period the law permits no mining to be done in the placer areas.

The upper parts of all rivers have paid to work, and the supposition is that, providing the law allowed the lower reaches to be worked all the year round, good results would be obtained therefrom. Of course, it should be understood that only Japanese subjects have the right to engage in mining for gold. Sand mines, as these places are termed, cannot be legally owned or worked by foreigners, and a special clause to this effect appears in the mining law.

QUARTZ.—The placer fields extend for some 20 square miles, and, as all the gold so far discovered is of a local origin, the inhabitants have great hopes of some day developing good paying quartz ledges in the surrounding hills in which the rivers have their sources. Lack of the necessary capital alone has prevented them from prospecting away from the rivers.

SEALING FLEET.—The sealing season off the Japan coast during the year 1901 was marked by a slight decrease in the average number of skins taken per ship, owing to an increase in the number of the sealing fleet, but the total catch for the year was larger than in 1900. The feature of the year's hunting was the catch of the schooner *Kaiwo-Maru*, of Tokyo. This vessel found seals off the coast of Korea and Siberia, and in the short space of 15 days succeeded in taking 642 skins of superior quality. Seals have been seen at various times in the Japan Sea, but this is the first time they have been hunted there. The new grounds are supposed to hold more seals, and practically the whole sealing fleet for this year (1902) has sailed for the purpose of hunting there.

RAILWAYS.—The present total length of the railways belonging to the Hokkaido Colliery and Railway Company open to traffic is 212 miles. This enterprising company contemplates the construction of two new lines with the object of opening up the coal mines of Mukawa and Rumoye, which have hitherto remained unworked. The Mukawa Railway will run from Momijiyama, on the Yubari line, to Kanayama, in Ishikari, a distance of 38 miles. It will connect at Kanayama with the Government line, and will have a branch line two miles in length.

The Rumoye Railway will run from Fukagawa, in Ishikari, situated on the Government railway, to the port of Rumoye, in Teshio, a distance of 29 miles. The cost of construction of the Rumoye Railway will be about £5,500 per mile.

There seems some prospect that the prosecution of the work on the Kanson Railway, which is to connect the ports of Otaru and Hakodate, via Oshoro, Oshamambe, and Mori, will be vigorously carried on now that the financial difficulties, which have for so long impeded its rapid progress, have at last been removed by the grant of a Government subsidy. The sum of £124,650, or £800 per mile, has been voted by the Diet in aid of the construction of this line, which is to be 155 miles 66 chains in length. Of this amount £14,740 is payable as subsidy for the financial year 1902-03, on condition that a distance of 18 miles 34 chains is completed during the year. The subsidy will be paid on each section as soon as it is in working condition. The whole railway will

probably be completed in three and a half years' time.

The total mileage of both Government and private railways combined is 366 miles, 212 miles of which are due to private enterprise. According to the present Government railway programme for the construction of a trunk line, 598 miles will be in operation in the Hokkaido within the next eight years.

The total amount of coal sold by the Hokkaido Colliery and Railway Company during 1901 was 803,599 tons, an increase of 250,630 tons on the previous year. The company proposes to increase its capital by £600,000, to be devoted to the increase of rolling stock, improvement of lines and stations, development of mines, the manufacture of coke and to other purposes. Funds being also still required for new enterprises, it contemplates issuing debentures to the amount of £730,000, which are to be employed in building the Mukawa and Rumoye Railways, in opening the mines situated in the districts through which the railways will run, and in constructing new steamers. The Board of Directors have decided to build two large steamers specially adapted for coal carrying purposes, which shall run from the Hokkaido to Hongkong and Singapore.

The latest report compiled by competent mining engineers estimates the workable quantity of coal in the company's mines, both opened and unopened, to be:—Opened, 252,349,000 tons; unopened, 122,408,200 tons; total, 374,757,200 tons.

POPULATION.—The total population of the Hokkaido during 1901 was 1,020,000. In 1869 it was 58,467; in 1879, 219,466; in 1889, 388,142; in 1899, 922,508. The foreign resident population of the Consular district for 1901 was 161.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE SOMALILAND AFFAIR.

London, October 24.

One hundred Soudanese and one hundred Sikhs are leaving Mombasa for Berbera (the chief town of the Somaliland protectorate).

GREAT BRITAIN AND CHINA.

The British Consul-General at Hankow has demanded the execution of the military official immediately responsible for the death of the missionaries in Hunan and the adequate punishment of other officials.

COLONEL SWAYNE'S FORCE.

Later.

Colonel Swayne's force arrived safely at Bothotle. Manning telegraphs from Berbera on the 22nd of October that the force retired unattacked. The situation is more satisfactory and the wounded are doing well.

GERMANY AND THE EVACUATION OF SHANGHAI.

London, Oct. 24.

The *Times* correspondent in Peking says that Germany's conditions for the evacuation of Shanghai intimate that Germany will participate in any reoccupation and stipulates that China must not grant any other Power preferential, political, military, maritime or economic advantages in the Yangtze valley nor the right to occupy any point commanding the river. The French Government has made similar conditions, omitting, however, the word "economic."

ENGLISH POLITICS.

London, October 25.

The Irishmen in the House of Commons appear to be following a scheme of studied obstructionism and disorder.

Later.

The bulk of both sittings on the 23rd was occupied by different devices.

The Government organs are increasingly exasperated and say that the state of affairs is a public nuisance which must be stopped.

THE FRENCH STRIKE.

The Committee of the French Miners in connexion with the Strike have informed M. Combes, Premier, that they will accept arbitration.

THE EVACUATION OF SHANGHAI.

Reuter understands that the British objection to the Franco-German condition as to the evacuation of Shanghai is based upon the fact that the stipulations based upon the forbidding of preferential advantages refer to the Yangtze and not to the whole of China.

THE KING AND QUEEN.

London, Oct. 26.

Their Majesties made a State Progress through London. The weather was fine. The Lord Mayor received them at Temple Bar. Luncheon was served at the Guild Hall.

Their Majesties traversed the main streets on the south of the Thames, returning to Buckingham Palace.

THANKSGIVING SERVICE.

London, October 27.

A Thanksgiving service was held at St. Paul's yesterday, when the ritual was specially arranged to suit the occasion, being though short, still of the most solemn and impressive character.

THE STRIKES IN FRANCE.

The strike riots and the losses therefrom are causing concern in France.

KING AND KAISER.

Their Majesties the King and Queen entertain the Kaiser and a number of other royalties at Windsor about November 8th.

MR. CHAMBERLAIN AND THE COLONIES.

London, Oct. 28.

It is officially stated that Mr. Chamberlain proceeds to South Africa towards the end of November in order to examine the problems presented by the termination of the War and the settlement of affairs in the new colonies. His visit is universally approved of. It is believed that this visit is the forerunner of visits to other colonies.

TURKISH AGGRESSION.

London, Oct. 29.

Sir Nicholas O'Connor, British Minister at Constantinople, has complained to the Porte with reference to violations of the Aden frontier by Turkish troops, and has added that if these are continued Indian troops will be requisitioned.

THE BOER GENERALS.

The Boer Generals only collected £32,000 sterling in Holland, Belgium, France and Germany.

JAPANESE OFFICERS DECORATED.

Later.

The *London Gazette* states that General Fukushima and Admiral Ijuin have been appointed Commanders, and Colonel Shiba a Companion of the Bath.

IRISH TROUBLES.

Owing to the importation of unusual quantities of arms and cartridges into Ireland the Chief Constable of Birmingham has issued a warning notice to local manufacturers.

THE IRISH LEADERS.

London, October 30.

The bulk of the Nationalist members of the House of Commons have suddenly returned to Ireland to note the progress of the land agitation, a few remaining for the purpose of watching events.

(RECEIVED AT THE LEGATION OF FRANCE.)

NEWS FROM FRANCE.

Saigon, Oct. 24.

A decree institutes the post of Secretary-General of the Government of Indo-China,

and M. Boulloche has been named to the new office.

The cable from Saigon to Pontianak has been contracted for.

There is a strike of coal-miners at Mar-seilles, Calais and Dunkerque.

A direct service has been organized by the Messageries Maritimes between Hong-kong and Haiphong. The cost of a return ticket is 75 dollars.

(RECEIVED IN TOKYO.)

CHINA.

The resignation of the Governor of Che-kiang having been accepted, he will be succeeded by Nieh, Governor of Anhui.

(FROM THE "JIJI SHIMPO.")

SOMALILAND.

London, Oct. 23.

The report that Maxim guns were captured from the British force by the Somali tribes is contradicted. The survivors of Colonel Swayne's troops have safely arrived at Bothotle.

RUSSIA AND JAPAN.

A despatch from St. Petersburg says that the *Svet* writes in congratulatory terms of the arrival at Port Arthur of the additional fleet in command of Rear-Admiral Stalkerberg. The same paper remarks that Japanese diplomats will be obliged to decide future questions as desired by Russia, now that the Russian squadron in the Far East has become stronger than the Japanese navy.

RUSSIA AND KOREA.

London, Oct. 24.

The *Novoye Vremya* publishes a telegram from Seoul to the effect that highwaymen, among whom are many Japanese, are plundering the people in the southern parts of Korea. The paper urges that this state of things should be made a pretext for Russia to interfere in Korean affairs.

SOUTH AMERICA.

The Captain of a British warship reports that the rebels in Venezuela have been victorious.

SOMALILAND.

Two battalions have left Bombay for Somaliland to reinforce Colonel Swayne's expedition.

RUSSIA AND MANCHURIA.

London, October 22.

The *Times* publishes a report from Dr. Morrison, its Peking correspondent, stating that Russia had accomplished her object of concentrating along the Manchurian railway her troops stationed in various parts of Manchuria and occupying important strategic positions, thereby disregarding her promise to withdraw from Manchuria.

THE SAMOA AFFAIR.

The King of Sweden, the arbitrator in the Samoa question, has decided in favour of Germany.

N.B.—England, Germany and the United States are concerned in this affair.

ANARCHISTS IN FRANCE.

Anarchists attempted to assassinate President Loubet, in the Elysee Palace, but their plot was discovered last night.

THE JAPANESE BONDS.

The demand for new five per cent. Japanese bonds still continues and the bonds are firm on the London market.

THE KING.

London, Oct. 27.

The King, who was seated on horseback, inspected the Guards and various other Regiments, who have just returned from South Africa, to-day. There was much popular rejoicing.

THE BRITISH NAVY.

The British Government contemplates constructing 27 war-ships. The number of men-of-war now under construction totals 75, including 11 battle-ships and 20 armoured cruisers.

MR. CHAMBERLAIN.

Mr. Chamberlain, Secretary of State for Colonial Affairs, proceeds to South Africa in November in order to examine on the spot various problems in the new colonies.

(FROM THE "JAPAN HERALD.")

RUSSIAN EXPANSION.

London, Oct. 23.

The *Times* asserts that Russia's evacuation of Manchuria simply means the concentration of the Russian army along the railway which commands every city and road of importance in Manchuria.

Russia acquired Manchuria by a judicious mixture of diplomacy and finance, and is rapidly acquiring North Persia by similar means. Moreover, she is apparently seeking to try the same means in Afghanistan.

THE FOREIGN TROOPS AT SHANGHAI.

London, Oct. 24.

M. Delcassé, the Minister of Foreign Affairs, speaking in the French Chamber, has stated that France will withdraw her troops from Shanghai if the other Powers will withdraw theirs, but reserves the right to land troops at the port if the other Powers subsequently see fit to do so.

THE TRADE OF THE YANGTSE.

The *Berlin Post* says that Germany considers the Yangtze now, as formerly, must be open to the trade of all nations, no Power being endowed with special advantages.

M. DE WITTE'S TOUR.

The Russian papers state that the tour of M. de Witte, the Russian Minister of Finance, is for the purpose of inspecting Vladivostok and Dalny.

Vladivostok wants a modification of the Customs duties, and even million roubles is needed by Dalny, as since the breakwater was built the port is not free from ice.

THE PACIFIC CABLE.

London, Oct. 28.

It is expected that the cable from the island of Fanning in the North Pacific to the Fiji Islands will be completed by November 1st.

The British and American cable-ships will then co-operate to lay the American cable to the Philippines, which, it is expected, will be finished before July 4th next year.

UNITED STATES POLITICS.

The *New York Herald's* poll states that the election prospects give 200 Republicans and 171 Democrats, 15 being doubtful.

SHIPPING ACCIDENT.

London, Oct. 29.

Lloyd's representative at Auckland (New Zealand) reports that the steamship *Ventnor*, from Wellington for Hongkong, with coal, has struck a rock and foundered. Her crew was saved.

[The *Ventnor* was a steel screw steamer of 3,961 registered tonnage, built at Glasgow in 1901 and owned by the Ventnor Steamship Co. (Gow, Harrison & Co.). She was under the command of Captain H. G. Ferry.]

(FROM THE "N.-C. DAILY NEWS.")

BRITISH EDUCATION BILL.

London via Bombay, Oct. 19.

Mr. Balfour yesterday accepted an amendment giving the local educational authorities absolute control of the public monies appropriated to educational purposes, thus securing popular control of secular education in the voluntary schools.

BRITISH BONDHOLDERS AND THE CHINESE RAILWAY.

Tientsin, Oct. 20.

Mr. Ed. Cousins, agent of Messrs. Jardine, Matheson and Co., has been officially appointed to represent the bondholders on the Board of Administration of the Chinese Imperial Railway.

MILITARY NEWS.

London via Bombay, Oct. 20.

General Oliphant succeeds General Trotter on the 1st of January next in the command of the Home district.

THE REPRESSION OF THE MAD MULLAH.

London via Bombay, Oct. 21.

Colonel Swayne's dispatch with reference to the recent fighting mentions that the Mad Mullah is in communication with a certain Austrian ex-officer named Karl Inger.

In the House of Commons, Lord Cranborne, Under-Secretary of State for Foreign Affairs, said that the Government deeply regretted the loss of life in Somaliland and the possible consequences of the retirement of the British force, but had every confidence in Colonel Swayne. It is possible that the campaign will be longer and more difficult than was anticipated.

White Refined	8.40 to 10.40

EXPORTS.

RAW SILK.

There has been rather less doing this week. The market closes quiet. It is reported that about half of the heavy settlements of last week are not yet inspected and passed. Some lines show a slight

advance in quotations, but with a quiet market dealers would probably be current, in view of the considerable stock still on hand.

BUSINESS OPPORTUNITIES.

AN American Manufacturer of Sporting Goods, such as Sweaters, Bathing Suits, Golf Suits, Shooting Blouses, Turners' Suits, Tights, etc., which are finding a very large market all over the world, would like to engage sole representatives for the larger cities in Japan.

October 25th, 1902. 14ins.

BOVRIL AT THE FRONT.

Bovril has played such a conspicuous part in South Africa that it forms no inconsiderable feature of the story. The *Lancet* has had frequent references to Bovril in the reports of the officers of the Royal Army Medical Corps. Nearly every newspaper correspondent has had to refer to Bovril to make his story complete. Rudyard Kipling and Baden-Powell have written their Bovril stories. Over 500 British hospitals and similar public institutions use and prescribe Bovril, not beef tea, but Bovril.

The reason is not far to seek. Bovril is a nourisher as well as a stimulant. It contains the albumen and fibrine, the sustaining properties of the beef. It is this fact, together with its absolute purity, that commends Bovril to physicians and scientists, and proves in practice what it demonstrates in analysis.

SAVE YOUR SKIN

How to Preserve Purify and Beautify the Skin and Complexion.

To preserve, purify, and beautify the skin, and prevent pimples, blotches, blackheads, redness, roughness, yellow, oily, mothy skin, chapping, and many other forms of skin blemishes, no other skin or complexion soap is for a moment to be compared with CUTICURA SOAP, because no other soap reaches the cause, viz., the clogged, irritated, or inflamed condition of the PORES

SAVE YOUR HAIR

How to Prevent Falling Hair Scalp Humours and Dandruff.

Cleanse the scalp and hair thoroughly with a warm shampoo of CUTICURA SOAP, rinse with warm water, dry carefully, and apply a light dressing of CUTICURA, purest of emollients, gently rubbed into the scalp. This simple, refreshing, and inexpensive treatment will clear the scalp and hair of crusts, scales, and dandruff, soothe irritated, itching surfaces, stimulate the hair follicles, supply the roots with energy and nourishment, and make the hair grow upon a sweet, wholesome, and healthy scalp, when all else fails.

SAVE YOUR HANDS

How to Make the Hands Soft and White in a Single Night.

Bathe and soak the hands on retiring in a strong, hot lather of CUTICURA SOAP. Dry thoroughly and anoint freely with CUTICURA Ointment, the great skin cure and purest of emollients. Wear during the night old, loose kid gloves with the finger ends cut off. For red, rough, chapped hands, dry, fissured, itching, feverish palms, shapeless nails, with painful finger ends, this one night treatment is simply wonderful and a blessing to all afflicted with sore, chapped, rough, or tender hands.

Cuticura Complete External and Internal Treatment for Every Humour, The Set

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, CUTICURA Ointment, to instantly allay itching, inflammation, and irritation, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure the most violent skin diseases, and humiliate skin, scalp, and blood humours, with loss of hair, when all else fails. Sold throughout the world. Aust. Depot: R. Towns & Co., Sydney, N. S. W. So. African Depot: L. S. O. Ltd., Cape Town. All about the Skin, Scalp, and Hair, post free. FORTER DRUG AND CHEM. CO., Sole Props., Boston, U. S. A.

TRUE HAIR GROWER

When I was bald I came into possession of the secret of a genuine hairgrower. My hair grew to its present length in about 40 days. Hundreds of other similar cases. I am selling the marvelous preparation. To introduce it I will post you a trial box in sealed plain parcel for only 4 stamps. Try it, as I did, and convince yourself. Address:—
JOHN GRAVEN-BURLEIGH,

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 8TH, 1902.

SUMMARY OF NEWS.

PLAGUE is increasing in Mysore. It is of a virulent type and prevails in the planting district of Kadur.

THE *Asama* and *Takasago* arrived at Bangkok on Nov. 2nd from England on their way to Yokosuka.

THE accouchement of the Princess of Wales is expected this month. She has already three sons and one daughter.

A CHILIAN Consulate-General will shortly be opened in Yokohama, the Consul-General, M. Anjel C. Espejo, having lately arrived from Chili.

A RAID was made the other evening by the Bluff Police authorities upon a gang of gamblers who had established themselves in the vacant premises of the former Maples Hotel. Of the ten present only two escaped.

THE launch of the third class cruiser *Nitaka*, which has been built at the Yokosuka Ship-

building Yard, will take place there about Nov. 15th. The Empress will, it is said, honour the occasion with her presence.

FIRE took place at Nagai-mura, Miura district, Sagami province, early on the morning of Oct. 31st, resulting in the destruction of 93 houses. No lives were lost. The fire originated in live ashes thrown outside a fisherman's house.

A JAPANESE paper says that the Government is about to raise a domestic loan to the extent of about two millions in the next fiscal year. The sum will be applied to various undertakings. The paper adds that the Formosan Bank and the Treasury will in all probability be asked to take up the loan.

WITH reference to the recent railway accident at Kawasaki Bridge, a Tokyo journal states that the Railway Authorities have agreed to pay compensation of yen 4,978 to consignors and others whose interests were affected. The greater portion of the freight destroyed on that occasion was rice, and there were also quantities of *sake*, cotton cloth and miscellaneous goods.

A GOLD vein was lately discovered in Tsukuidistrict, Kanagawa Prefecture. Messrs. Nakajima Zennosuke of Sanchome, Irifuncho, Kyobashi, and Takahashi Toro, of Tsukishimacho, Tokyo, are also reported to have applied to the Kanagawa Authorities for permission to work a gold mine in Aikawa-mura, Aiko district, Kanagawa Prefecture, the area of which extends over 461,018 *tsubo*. The latter was also discovered quite recently.

THE Indian merchants, 17 in number, in Yokohama, have under contemplation the organization of an Indo-Japanese Club in Tokyo. They are reported to have already obtained a sum of over yen 1,000 for the scheme, including yen 625 subscribed by Indians and yen 500 by a Japanese. Their main object is, while affording accommodation to Indian students and tourists, to promote closer relations between the two peoples.

THE second conference of tea merchants throughout the country will take place in Shizuoka on or about Nov. 15th when draft regulations relating to a proposed syndicate, compiled by a committee appointed for the purpose, will be presented for discussion. A Japanese journal reports that though the nature of the regulations is still quite unknown to outsiders, the committee seems to have decided that the export of tea should hereafter be made under only one trade mark.

It is reported from Tanashi, a village in Kita Toshima district, Tokyo-fu, that shortly after 1 a.m. on Nov. 1st Kaneko Totaro, a lad 18 years old, armed with a dagger, entered the house occupied by Kawashima Tsuru, a woman, and attacked two women, one aged 21 and the other 47 years, inflicting severe injuries on their heads, faces and breasts. The assailant then cut his own throat, but not mortally. He was at once arrested by the local police. The affair is the outcome of some love troubles.

THE Emperor of Germany has been pleased to present a decoration of the Order of the Red Cross to Mr. Seki Michitaka, a Japanese in the service of the German Legation in Tokyo, in recognition of thirty years' service in the Legation. The ceremony of presenting the decoration took place in the Legation on Nov. 1st in the presence of a large number of personages, including Dr. Baelz, officials of the Foreign Office, German residents in Tokyo and others. During the proceedings, His Excellency Count Arco-Valley

spoke in most flattering terms of Mr. Seki, who responded suitably. A few years ago Mr. Seki received a similar honour from the present Tzar. It is stated that he has served seven Ministers during thirty years.

THE *Asahi* reports that the Niigata Custom House will shortly be abolished and thenceforward the port will have only a branch. In consequence of this change, the provinces of Echigo, Uzen and Sado which have hitherto been under the jurisdiction of the Niigata Customs, are to be transferred to the Yokohama Customs; the provinces of Wakasa, Echizen, Noto, Kaga and Etchu are to be transferred to the Osaka Customs, and the province of Ugo to the Hakodate Customs.

THE promoters of the Yokohama Electric Car Company sent in a petition to the Kanagawa Prefectural Office on Oct. 31st, asking the authorities for permission to lay rails on the small gauge system and that the instructions of the Home Minister issued to the company in connection with the undertaking should not apply for the period of five years after the construction of the line on that system. The official instructions provide that in case the company contemplates laying a single line its width must be six feet and in case of a double line eight feet.

IN view of the commencement of the manoeuvres in Kyushu, Field-Marshal Prince Komatsu will leave Shimbashi on Nov. 6th for the scene. Field-Marshal Marquis Oyama, Chief of the General Staff Office, Baron Kiyoura, Minister of Justice, and others started for Kyushu on the 4th. General Count Katsura, Prime Minister, and Colonel Muraki, Chief aide-de-camp to the Crown Prince, left Tokyo on the 5th. Traffic on the Tokaido Railway is at present very brisk in connection with the manoeuvres, especially in respect to the transportation of horses, etc., to the scene of the operations.

MAJOR ISHII TADATOSHI, Commander of the Tenth Regiment of Artillery, Himeji, attempted to commit suicide by cutting himself with his sword on Oct. 30th in the precincts of the Angyo-ji temple, in Innumi district, where his troops had arrived the previous day in connection with route marching. The officer was taken to the military hospital attached to the Tenth Army Division for treatment, but is not expected to recover. The rash act is believed to be due to severe criticisms by his superiors with regard to his methods of drill.

ONE of the undertakings the Japanese Government is bent on bringing to a successful issue is the glass industry, of which there is no large factory in the country. The Department of Agriculture and Commerce has under contemplation a scheme to grant a State subsidy of yen 500,000, spread over four successive years, for the encouragement of the industry and has obtained the consent of the Treasury. A bill to the above effect will therefore be submitted to the forthcoming session of the Diet for approval. According to Tokyo papers, the sums assigned for the purpose will be defrayed as follows:—yen 60,000 in the 36th fiscal year (1903-4), yen 138,000 in the 37th fiscal year, yen 138,000 in the 38th fiscal year and yen 164,000 in the 39th fiscal year. There is a scheme on foot for establishing a glass factory in Osaka with a capital of one million yen. Among the promoters are Baron Shibusawa, Messrs. Okura, Asano, and others. It is stated that the projectors do not expect that any dividend will be declared by the concern for at least four years.

POLITICAL GOSSIP.

Monday, Nov. 3.

Rumour has something to say about the political situation. Marquis Ito returned to Tokyo on the 31st of October and paid long visits to Count Katsura and Marquis Yamagata. It is stated that the Prime Minister had signified his desire to meet the Marquis and his intention of proceeding to Oiso for the purpose. But Marquis Ito replied that as he himself contemplated an immediate return to Tokyo, he should call on Count Katsura. Both the *Asahi Shimbun* and the *Nichi Nichi* allege that the object of this meeting was to discuss the question of naval increment and the land tax. The former journal, however, informs its readers that Count Katsura has now made his first communication to Marquis Ito on this subject. In other words, instead of consulting the Marquis beforehand, the Cabinet adopted a certain line of important policy, and thereafter announced its intention to the Marquis. The latter is thus placed in a very difficult situation, being "scissored" between, on the one hand, his desire to assist the Cabinet and on the other the difficulty of controlling the *Seiyu-kai*, a majority of whom are virtually pledged to vote for restoring the land tax to its former rate. Indeed the *Asahi* affirms that this course has been adopted by the Cabinet expressly to embarrass Marquis Ito. How extremely shallow the *Asahi* must think its readers! As if any ordinarily intelligent observer of Count Katsura's eminently tactful methods could suspect him of such blundering and wasteful recklessness.

Meanwhile an important decision has been taken by the preparations committee of the Tokyo branch of the Progressists. On the 31st ultimo the Committee met at the Progressists' office, and passed the following resolutions, as guides to the Party's action in the Diet:—

1. That party cabinets must be established and due effect given to the mandates of public opinion.
2. That administrative reorganization and financial reform must be carried out.
3. That the continuance of the increased rate of land tax must be strenuously opposed.
4. That naval increment not consistent with the country's financial resources must be condemned.
5. That steps must be taken to develop Japan's commerce in Eastern Asia.

These resolutions indicate an attitude of frank opposition to the Cabinet. At the same time, there is said to be agitation among the *Seiyu-kai* politicians, who think that the time has come for them also to adopt a definite line; but whether their ideas tend towards opposing or supporting the Cabinet, there are as yet no means of ascertaining. They will be influenced, however, by the resolutions of the Progressists. A certain line of action is not rendered more attractive by the approval of politicians towards whom one is habitually inimical.

At the same time, conferences are taking place between the Prime Minister and representatives of the House of Peers at the latter's request. Count Katsura is said to have disclosed to the representatives as much of the Cabinet's policy as etiquette permitted, and they, in turn, have submitted this information to the various sections of the Peers. Subsequently another interview with the Premier will be sought.

Wednesday, Nov. 5.

It seems to be agreed by good authorities that the Prime Minister has communicated to Marquis Ito the Cabinet's resolution with reference to the land tax and naval increment.

The *Asahi Shimbun* speaks in detail of

this matter, and expresses the opinion that whereas Marquis Ito finds himself confronted by a dilemma having for horns his old friendship with the statesmen representing the Katsura Cabinet and his duty to his new political party, the Cabinet is similarly embarrassed between its relations with the House of Peers and its desire to placate Marquis Ito. Thus if, before deciding upon its programme, the Ministry had consulted Marquis Ito, it would have found the Peers in opposition; whereas by adopting a hard-and-fast line without seeking Marquis Ito's advice and approval, it antagonizes the *Seiyu-kai*. We do not attach so much importance as the *Asahi* does to these analyses. Unquestionably a very delicate situation exists in Japanese politics to-day, but those that have to manipulate it recognise its nature and are not likely to make any mistake. Marquis Ito most assuredly will not sacrifice national expediency to party considerations. Under his direction the *Seiyu-kai* will regard measures not men, and that, after all, is what the country wants. Neither can we readily accept the theory that the House of Peers is implacably hostile to Marquis Ito. The great statesman used to have his stronghold there, and things have not changed so radically that all his some-time friends and supporters are now to be counted enemies.

Thursday, Nov. 6.

Although the Progressists are understood to have fully determined in favour of adopting a policy of opposition to the Cabinet, they are evidently in some doubt as to the expediency of immediately announcing their resolve. At a meeting of the Standing Committee on the 4th instant they appointed a committee of investigation, and passed a resolution to defer any public statement until the assembly of a general meeting on the 4th of next month.

On the other hand the tongue of rumour continues to be very busy about the relations between the Cabinet and the Elder Statesmen. Even a journal like the *Jinmin* publishes stories of the wildest description. The sum of the matter is that nothing definite is known and foreign outlookers must possess their souls in patience.

Friday, Nov. 7.

All the sensational rumours recently put into circulation about the relations between Marquis Ito and the Cabinet, and between the latter and the political parties are dissipated by an interview with Count Katsura published in the columns of the *Nichi Nichi Shimbun*. Count Katsura, as might have been expected, ridicules the tales about his solicitations to sundry "Elder Statesmen" for their intervention with Marquis Ito, and about the latter's having thrown over the Cabinet. The sum of what has happened is that the Prime Minister explained clearly to Marquis Ito the Cabinet's views, and that the Marquis promised to give the matter his full consideration. It is not anticipated that any further step will be taken until after the Court returns from the manoeuvres, which, of course, will be attended by Count Katsura and the Minister of State for War. On the eve of every Diet's assembly the air is filled with fabricated stories and sensational predictions. At present the situation is sufficiently interesting to sharpen the inventive faculties of the newsmongers, for the Ministry has pledged itself to an important programme which it can not put into practice without the assistance of a political party that has no desire to keep the Cabinet in office. But although there have

been some indications that the *Seiyu-kai* is not inclined to pass the naval-increment bill so long as continuance of the increased land tax is an inevitable corollary, the truth seems to be that the Party has not yet reached any decision, and that its attitude will not be finally decided until some time shall have elapsed.

CHINESE NEWS.

Saturday, Nov. 1.

A telegram to the *Asahi* from Shanghai says that Great Britain seems to contemplate a very imposing naval demonstration in the Yangtse. Ships are leaving Wei-hai-wei to join in the display, and six have been ordered to proceed with all despatch from Hongkong. Admiral Bridge is at Shanghai, and so are the four vessels originally directed to go to Hankow. It would seem from all this that the demonstration points to more than the Shinchou trouble, and we need scarcely say that the air in full of rumours, one very confident assertion being that the removal of the British garrison from Shanghai has now been postponed indefinitely. Under the same circumstances a few years ago England would certainly have seized this occasion to offer to her rivals a practical demonstration that her influence in the Yangtse Valley altogether eclipses theirs. But she has tied her own hands with international declarations which furnish convenient weapons to Powers enjoying greater freedom of action and less hampered by public opinion.

Berlin, according to an *Asahi* cablegram, finds that the Mackay Treaty contains few articles capable of being carried into operation. Therefore the document does not seem worth supporting. That is precisely the attitude that we expected from Germany. In fact, the probable destiny of the Mackay Treaty will be to illustrate the impossibility of independent negotiations between China and any important European Power. Nothing more cumbrous and inconvenient can be conceived in the shape of an instrument of negotiation than a congeries of States such as that which dealt with Chinese affairs in 1901. But the most partial success is, after all, better than total failure. What becomes daily more evident is that the whole Chinese problem defies the wit of man unless a radical change of conditions be effected. If China is not to have a paramount voice in arranging her own destiny, the chorus of countries now dictating terms to her will ultimately harmonize into her death song.

The *Official Gazette* announces that the Japanese authorities have been invited by the Governor (or Mayor) of Dalny to inform subjects of this Empire that, at the approaching land auction in Dalny, ninety-nine-years leases will be sold to them in any part of the Settlement.

Monday, Nov. 3.

Mr. Kano Jingoro's opinion of China, where he recently spent some months, is that to know the Chinese is a matter of immense difficulty. The more carefully he inquired of men supposed to be versed in the country's affairs, the more perplexed he became. Even the information furnished by Sir Robert Hart, who is nominally a great authority, increased rather than diminished his confusion of mind. His ultimate conviction, however, seems to be that China must go slowly in the matter of

reform. The structure of society depends upon the preservation of methods and customs that have the sanction of antiquity and the *cachet* of long practice. To fill the people's heads with new ideas would be to incur a large risk of catastrophe. Certainly the deadlock of immovable conservatism must be removed. But it may not be replaced by the rushing radicalism of Japan. China must break away gradually and slowly from her past. It has bequeathed to her a great deal that is eminently useful from administrative and social points of view. If she throws away the old before getting in the new, there will be chaos. Education, as will naturally be expected, is the theme upon which Mr. Kano mainly dilates. He insists that general education is the great need of the ancient empire. Elementary schools, not middle schools or high schools, are what the nation wants. That is certainly a deliberate method of beginning. What we doubt is whether China, as a national entity, will find time to complete such a programme.

It is stated that a movement is on foot in Peking to procure the appointment of a Governor of Chili. Hitherto there has been no Governor but only a Viceroy, Chili being one of the very few single-province Viceroyalties of China. But now the idea is to have a Governor also, and to choose him from the ranks of the Manchu statesmen, for the sake of preserving the balance of power. Yung Lu is said to be the head and front of this movement. Very likely. Evidently its direct effect would be to greatly curtail the authority and capacity of Viceroy Yuan Shih-kai, who is probably proving himself a reformer too vigorous and earnest for the time-servers in Peking. Yuan is now absent from his post. He has received 40 days' leave to perform his mother's obsequies. In that interval his enemies are active. Unfortunate China!

Viceroy Chang desires that the negotiations for a revised commercial treaty should be temporarily suspended. He himself is fully occupied with the affairs of his new Viceroyalty at Nanking, and Mr. Wu Ting-fang, the newly appointed commissioner, is still in Washington. The Chinese commissioners have approached the Japanese in that sense.

Mr. Wang has been definitely appointed to discharge the duties of inspector of Chinese education in Japan. Our readers probably remember that Wang was a member of the staff of Prince Ching (junior) by whom the advisability of appointing an inspector was recommended to the Throne.

Mr. Uchida, Japanese Representative in Peking, arrived at Tientsin *en route* for Japan on the 31st ultimo. He was to leave Taku by the *Tategami Maru* on the 2nd instant.

Germany is said to be constructing several gunboats specially designed for service on China's inland waters.

It has been decided that there shall be no crossing of the Seoul-Fusan and Seoul-Chemulpo lines. This will involve a slight additional outlay which the company owning the former road will defray. Apparently the roads will run parallel for a distance of two miles. But the intelligence is somewhat confused.

Wednesday, Nov. 5.

A telegram to the *Jiji Shimpō* says that the complication between Great Britain and

China was settled on the 2nd instant by the Chinese Government's agreeing to punish the Chi-hsien and six other minor officials of Shin-chou. Every one anticipated this termination of the trouble. The story of the affair aptly illustrates some comments penned by the *Asahi Shimbun* on the difference between Russo-Chinese and Anglo-Chinese relations. Russia's intercourse with China is scarcely ever disturbed by petty sources of friction. She is happily enabled to discuss large issues only, and her achievements are proportionately striking. In England's case, her widely expanded commerce and her ubiquitous missionary enterprise create innumerable points of impact. She is a perpetual thorn in China's side, and although the latter may have, and probably has, entire confidence in the non-aggressive character of British policy, she unquestionably finds her relations with Russia far less embarrassing and troublesome. That is a prominent feature of the programme that fate seems to have devised for the Far East. Russia's vast shadow moves slowly and steadily southward with all the silence and smoothness of a shadow. England's attempted self-restraint is a noisy, truculent business, causing much more offence and giving far more annoyance than the fateful sweep of the big Northern Power's advance. It results that while Russia accomplishes great coups without seeming to antagonise China, England appears to be in a ceaseless fracas which produces nothing but bitter memories and fresh stores of umbrage.

News from China says that the German wharf at Kichou near Hankow, has been destroyed by a mob of men interested in the success of a neighbouring wharf. The telegram (*Asahi*) adds that this is supposed to have something to do with the question of the Yangtse Valley, but it is difficult to see how that theory can be maintained. The incident, as reported, appears to be simply an outcome of business rivalry.

Later news confirms the latter view. The rioters consisted entirely of rival workmen. No lives were lost, for though some of the Chinese labourers at the German wharf were driven into the river, their rescue was effected without disaster. The latest news is that the German authorities show a disposition to make political capital out of this affair, but it is plain that no reliance can be placed on such vague rumours. Certainly the greatest danger that threatens China is trouble of any kind with Germany, for the Kaiser and his statesmen are not troubled with any mood of toleration towards the decaying empire.

Thursday, Nov. 6.

A correspondent sends to *The Times* the following account of the damage recently suffered by the German railway in Shantung:—

"The recent rains have done considerable damage to the Shan-tung railway; the line has been completely interrupted for over a week, and is now working with difficulty on sideways and with interruptions, passengers having to dismount at several places and ferry across rivers where bridges have given way or are unsafe. The chief damage was done between Kiao-chau and Kaomi, and Kaomi and Wei-hsien. Many kilometres of the dam have been washed away there, altogether in some 20 places; bridges costing some £50,000, and supposed to last for ever, have been underwashed because of bad foundations, and, in consequence, some of the pillars have inclined considerably. The people also and their houses and crops have suffered severely. In the Hei-h, a low-lying district to the west of Kaomi, four villages have disappeared almost entirely, and a number of lives are reported to be lost, the water having risen to a height of about ten feet. The railway people gave it out that in the memory

of the oldest inhabitant no such downpour had occurred; that nothing could have withstood such a torrent and such a volume of water; that the railway dam had been a blessing and godsend to the poor people who were able to save their lives on the dam; newspaper articles were let off in the local papers magnifying the occurrence into a catastrophe of such exceptional violence and destruction that nothing had ever occurred like it before, &c., and a subscription list was circulated for the relief of the sufferers.

"The Chinese story is very different. Such downpours are of frequent occurrence, and the people are prepared for them. In the first year of the German occupation (1891) there was an equally heavy downpour, but it did little damage, because the water could run off and the villages were protected by high wall. Now the water cannot run off because the railway dam has not sufficient outlets. When the dam was built, three years ago, the people protested, and when their protests were not listened to they proceed to take it down. The railway then asked for help and the Kiao-chau Government sent an expedition which made short work. A number of people were killed, and as a punishment the people were forced to take down their village walls. The Chinese declare that if the railway company had built the outlets they asked for three years ago neither the people nor the railway would have suffered on this occasion; nor would there have been riot and bloodshed three years ago, and the German Government would have had no need to keep a battalion of troops there, and build barracks for them at Kiao-chau and Kaomi costing some £300,000 to £400,000. That the Chinese are in the right is proved by the fact that the railway company is now going to make the outlets, as soon as the weather permits. The Government, who have acted *bona fide* throughout, must feel very small."

If this account be trustworthy, it constitutes another instance of the many grievances that the Chinese people may justly urge against foreigners. We do not suggest that the Germans are to be blamed more than any other nationals. What we say is that if an impartial historian had to tell the tale of China's foreign relations, the faults would not be all on one side.

Professor Tomizu has concluded his travels in Mongolia, and, according to a telegram in the *Asahi Shimbun*, has obtained information which confirms his often expressed opinion that it will be necessary to expel Russia from Manchuria. Professor Tomizu, if we may judge from his communications to the *International Law Magazine* (*Kokusaiho Zasshi*) and to the *Sun* (*Taiyo*), is much too intelligent to have expressed such crude views. The public regards him as an unqualified "Jingo," and Jingo-like he does good rather than harm, for the open expression of extravagant doctrines is an excellent antidote to their general acceptance. We are confident, however, that the Professor does not propose to undertake the task of driving Russia from Manchuria until Russia herself supplies a pretext. Big wars are not commenced in that airy fashion. And the strength of Russia's position in Manchuria is precisely that it offers no pretext. She can gradually and quietly mass troops along the border, or along the railway lines, or in the Liaotung Peninsula, without allowing any step of the process to become alarmingly salient. That is the kind of patient game she knows well how to play. Who is going to take her by the throat and engage in a deadly struggle with her about undemonstrable wrongs?

Friday, Nov. 7.

We mentioned in a previous issue that the Treasury was said to have decided on asking the Diet to sanction the establishment of a Chino-Japanese Bank. Tokyo journals state that the project is now mature. Apparently the intention is to provide an instrument for rendering special assistance to this country's trade with Japan, but one exceptional feature of the programme is that the Bank would grant loans for a

long period on the security of real estate, for which branch of business there is supposed to be considerable opening. Our contemporaries observe that British merchants have the assistance of the Hongkong and Shanghai Bank and Russian merchants can apply to the Russo-Chinese Bank. But Japanese merchants have no such facility. The new institution would have a capital of 15 million *yen*, and the Treasury, in addition to guaranteeing interest on the paid up capital, would subscribe for a certain number of shares.

It is reported from Peking that the inhabitants of Shinchou are much excited about the imperial decree ordering the execution of two military officers at the instance of the British Government. The people are said to have organized a meeting and made arrangements for subscribing money with the view of getting the death penalty commuted for a fine. These facts having been telegraphed to Peking, the Foreign Office has communicated them to Sir Ernest Satow, who shows a disposition to sympathise with the Chinese officials in their dilemma, and has addressed his Government on the subject. Possibly the capital sentence will be modified, a result greatly to be desired, since for every Chinaman whom such proceedings might be expected to deter from outrages against foreigners, there would probably be a hundred whose anti-foreign feeling would be greatly embittered.

Manchuria is known in China as "the three Eastern Provinces," and for administrative purposes it is divided into three mutually independent parts. The Chinese Government is now said to entertain the intention of uniting two of the three provinces into one, leaving Mukden's case for subsequent consideration, since that city is the cradle of the Manchu dynasty and consequently deserves special treatment. The projected change is not to be effected until after the withdrawal of the Russian forces. Therefore it may still be a distant affair.

It is said that marked success has attended the operations of the printing office established in Shanghai last July by Mr. Yamada, a former member of the Diet, and other Japanese. The projectors were influenced by the considerations that although excellent arrangements exist already for doing printing in foreign style, no office has hitherto devoted itself mainly to ideographic printing. Whether that analysis be right or wrong, the new enterprise is reported to be flourishing. It is now about to issue a periodical called the *Dairiku Zasshi*.

Our readers are aware that Mr. Wu Ting-fong, Chinese Representative in Washington, has been nominated a commissioner for the revision of China's commercial treaties. Tokyo journals state that Mr. Wu will return from America by way of Japan, and that he will spend about a week in this country.

TOKYO FINANCE.

In our last issue we stated that the Tokyo City Assembly had sanctioned a proposal of the City Improvements Committee to substitute a regular finite system of works for the fortuitous method hitherto pursued, and that the new programme would take the form of twenty years' operations at a cost of a million *yen* annually. It now appears that this will require the raising of additional revenue. At present the City is spending six hundred thousand *yen* approximately on

improvements. The exact figures, as given by the *Asahi Shimbun*, are:—

	Yen.
Land Rate	269,747
Business Tax ($\frac{1}{10}$ of normal amount)	23,435
Miscellaneous Tax	126,195
House Tax	54,806
Rents of land	153,672
Total	627,855

In order to bring this sum to the requisite figure, it is proposed to raise additional taxes thus:—

Business Tax ($\frac{1}{10}$ of national rate)	366,544
Tax on communications (by rail)	54,133
Total	420,677

The *Nichi Nichi Shimbun* has approved this programme; other leading journals keep silence. The question has direct interest for very few foreigners, yet we may be permitted to observe that the temper of the citizens of Tokyo is not of the common description. They quietly submit to defray out of their yearly income the cost of improvements which can scarcely be completed during the lifetime of the present generation, and which will be enjoyed chiefly by succeeding generations. According to all the recognised principles of finance, some part—the greater part, indeed—of such a burden should be placed on the shoulders of posterity. In other words, the City should proceed by the method of loan, each generation taking its share in the duty of paying interest and gradually wiping out the debt. That is not Tokyo's idea, however. It raises a million *yen* annually in the form of taxes, and defrays all outlays completely as they arise. A hundred thousand pounds is a petty sum, it must be confessed, when the community contributing numbers a million and a half of persons. That is not the point, however. What seems wrong and unjust is that the whole weight of this outlay should be imposed on one generation. Besides, there is another aspect of the affair. Every candid observer must confess that no future generation of Tokyo citizens is at all likely to carry out its public works so badly as the present generation. There are some marvels to be witnessed in the streets. At the present moment the municipality's engineers are engaged laying an aqueduct which discharges into the Moat at Tameike and runs thence along Tanî-machi. About half a mile of this aqueduct has been constructed in a period of over a year. Was anything of the kind ever heard of previously? During a whole year the tradesmen living on either side of the street traversed by this aqueduct have been inhaling atmosphere tainted with foul smells from upturned mud; have been seriously injured in their business, and have seen the highway virtually blocked. We doubt whether any other city in the world can show a record of such magnificent tardiness, such splendid indifference to the comfort, hygiene and material interest of its citizens. Why should a generation capable of such blundering hasten to assume the function of planning and carrying out extensive city improvements? Why not wait until time, in its charity, may produce a race of men more cognizant of their public duties and more competent to discharge them?

THE CROWN PRINCE OF SIAM.

It is stated that the Crown Prince of Siam will arrive in Japan about the middle of December. His coming will be simultaneous with that of a special envoy from Siam to Japan, who will travel in Siam's largest man-of-war, a three thousand-ton

cruiser built in Scotland. The following particulars relating to the young Prince are taken from an essay by Mr. Hamilton King, American Minister at Bangkok, published in the *Independent* of Sept. 25th:—

His Royal Highness, Maha Vajiravudh, the Crown Prince of Siam, was born on January 1st, 1881, and on the death of his elder brother was proclaimed successor and Crown Prince on January 16th, 1895. He has been in England since 1894, and during his eight years has been engaged in study, at first under a private master, later at Sandhurst College and later still at Oxford University. During his stay at Sandhurst College, which he left at the breaking out of the South African War, he pursued his military studies with so good results that he now holds the rank of First Lieutenant in the army. He developed a decided taste for history during his stay at Oxford, and has written a little volume on "The War of the Polish Succession," which has been very favourably mentioned.

Since his twenty-first birthday His Royal Highness has been busy visiting the principal cities of England and the Continent, where he is receiving every attention, and at St. Petersburg he was met by the Czarowitch. He is a handsome, well-balanced, thoughtful young man, accepting these attentions with a dignity that becomes his station and with no attempt at display. Indeed, he is taking this entire journey quite as seriously as he did his years at college and the university, and pursues it as part of his preparation for life. He is an excellent English scholar, has a pretty manner in speaking and has been very happy of expression in the responses he has made before numerous boards of trade and other assemblies.

The Crown Prince will pass through America this Fall on his way to Siam, visiting the United States in October. The itinerary at this time of writing is not yet determined, but in all probability he will take in Washington and a number of the leading cities between New York and San Francisco. He will be accompanied by a small suite and undertakes the journey with the idea of adding to his knowledge of the world. In this young Prince there is nothing of the curious or the strange. He comes as a student of men and of institutions, and will return to his fatherland, it is said, to take up his round of daily duties in perhaps the busiest office connected with the Government. His progress has been followed with great pride by his father, who now wishes to have his son introduced to the practical workings of the machinery of the Home Government before the responsibilities of the sovereign are placed upon him.

The following review of "The War of the Polish Succession," by His Royal Highness, the Crown Prince of Siam (London, T. Fisher Unwin), may not be without interest in this connection as a side light upon the character of the author:

This little volume does not claim to be the result of independent research, or to add anything new to our knowledge of the historical episode with which it deals. But it testifies to a wide and intelligent study of recognized authorities; and it is a clear and helpful exposition of the successive phases of the incident—the election to the Polish Crown at the death of Augustus II. in 1733; the siege of Danzig; the Spanish conquest of the Kingdom of the Two Sicilies; and the Rhine campaign. The book is primarily intended for those of the author's fellow-students at Oxford, who are reading for the history "School," and to them it will doubtless prove serviceable. As a concise summary of events it may also be of profit to those who, for other purposes or other reasons, are interested in the affairs of Europe during the eighteenth century.

THE BUDGET.

The *Kokumin Shimbun* says that the Budget proper for next year, as approved by the Cabinet, shows a revenue of 253 million *yen* and an expenditure of 257 millions. There are supplementary budgets, however, dealing with a revenue of 3½ millions and an expenditure of 5 millions, so that, on the whole, a tolerably exact balance results.

From the same authority we learn that the new enterprises included in next year's Budget are, first, custom-house works at Kobe, involving a total outlay of 3½ million *yen*, spread over several years; secondly, various riverine works, requiring an expenditure of 800,000 *yen*, all in one year; thirdly, census expenses, 450,000 *yen*; fourthly, a subsidy of 500,000 *yen* to sheet-glass manufacture;

fifthly, extension of telephones, 1,450,000 yen; and, sixthly, various outlays on account of sugar refinery, the erection of an industrial school in Sendai, the organization of an industrial and commercial bureau, a subsidy for the St. Louis exhibition, &c., the whole amounting to 5½ millions. It is further stated that the Cabinet contemplates greater expedition in carrying out the various public works in Formosa, and that an additional appropriation will be sought on that account.

The Foreign Office's appropriation is said to amount to 6½ million yen and to include allowances for establishing four new consulates and nine honorary consulates, all in China and Korea. In the Judicial Department's section there is an appropriation of 108,000 yen for the purpose of increasing the salaries of judicial officials, and there is also a provision for adding eighty to the present number of registration offices; for improving jails (140,000 yen), and for building new jails in Akita, Yamanashi, Otsu and Mito.

Concerning the reductions of 9,900,000 yen said to have been effected in the budgetary expenditures, the *Yomiuri* gives the items thus:—

	Yen.
Postponement of Railway Construction ...	6,000,000
Postponement of Army and Navy Works ...	1,400,000
Sale of lands	1,200,000
Sale of Hiroshima mines	140,000
Amendment of the Tariff (<i>ad valorem</i>) ...	500,000
Changes in the Army and Navy Expansion ...	240,000
Reductions in expenses of Departments...	400,000

These reductions, however, are more nominal than real. In the matter of railways, for example, while a saving of six millions is effected by postponing works of the old programme, a new scheme involving outlays of 106 millions, spread over a number of years, is introduced.

Among the bills to be submitted the most important are, one relating to the Law of Bankruptcy, having for its object the better protection of creditors; one relating to the establishment of a Chino-Japanese bank; one relating to amendment of banking regulations, and, finally, several measures submitted to the last Diet but not passed.

THE UNITED STATES AND THE RUMANIAN JEWS.

The Washington Government is now being assailed by the organs of Clerical and Conservative opinion in Germany. America's idea is that the Powers which signed the Treaty of Berlin should take concerted action on behalf of the Jews, whose position in Rumania is such that they enjoy neither the rights of subjects nor the protection of aliens, and are discriminated against so that even to earn their bread by honest work is difficult. America, not being herself a signatory of the Berlin Treaty, laboured under some disqualification as an initiator of any movement in the above sense. She addressed a circular to the Powers, but failed to elicit any answer except from Great Britain, who responded earnestly, making the circular the basis of a note from herself to her Berlin co-signatories. Some of the leading German journals sympathise with the United States' movement. But others seek to throw the Monroe doctrine in Washington's face; an obviously inconsequential rejoinder, as the Berlin correspondent of *The Times* observes, since America merely asks the signatories of the Berlin Treaty to do what she would herself be ready to undertake at their instance in the case of any of the republics on her continent. The *Kreuz Zeitung* pub-

lishes correspondence bidding the Americans look at home before they air their charity abroad, and suggesting that their own treatment of the Filipinos and the negroes disqualifies them to champion the Jews. It is easy to see that dread exists of the extension of such interference. Its scope might easily be made to embrace the treatment of the Finns in Russia and of the Poles in Prussia. But the German Government is not likely to offer any opposition to the consummation of America's purpose. Whatever may be its sentiments towards Rumania, it will obey the dictates of justice and humanity. As to those sentiments, the Berlin correspondent of *The Times* analyses them thus:—

The Imperial Government undoubtedly takes a very friendly interest in the fortunes of Rumania. Not only is the ruler of that country, King Charles, like the heir presumptive, a scion of the Catholic Sigmaringen branch of the Hohenzollerns; there has also been for some years a well-founded belief that Rumania may be reckoned upon as a kind of satellite of the Triple Alliance in the event of serious complications in Eastern Europe. Among those who suspect that the interests of Germany in Constantinople and in Asia Minor have ceased to be purely commercial the opinion prevails that Rumania, its railway system, and its important new harbour of Kustendji, are regarded in Berlin as stages on the best and quickest route which is at present available in all eventualities for an express service between the German capital and Constantinople. The predilections of the German Government are thus strongly on the side of its actual or potential ally. Bismarckian traditions, moreover, are strongly opposed to German interference in the domestic affairs of other European States, especially where pleas of humanity are urged. The same traditions are, if not actually Anti-Semitic, at least far from being friendly towards the Jews as such.

LEGAL DELAYS.

The *Jiji Shimpō* and the *Nichi Nichi Shimbun* devote leading articles to the necessity of freeing judicial procedure from some of the impediments that disfigure it at present. Reference is specially made to the lower tribunals, where the process of instituting a case is so troublesome that people will suffer almost anything rather than become litigants. One of the complaints made is that the laws are variously interpreted; but evidently that is a matter remediable by time alone, for when different courts are required to interpret codified laws unillustrated by precedents, varieties of view are inevitable. As to the delays of the law, however, there are obviously valid reasons to complain, for out of 138,000 civil suits instituted in the year 1900, only 78,000 were settled within 10 days, the remainder requiring periods that sometimes reached 2 years. It would appear that something of the delay is due to insufficiency of judicial staff, for statistics show that during the same year (1900), there were 424,000 cases, civil and criminal, and since there are only 418 judges, it is evident that each judge must have disposed of an average of 3 cases daily in order to get through the work. However, the Government is said to have drafted a bill which will furnish some relief. It is called *Saibansho Kosei-ho Kaisen-an*, or "bill for amending the system of collegiate courts." The principal reforms embodied in the bill are:—(1) That whereas district courts—the lowest form of tribunal—are not now empowered to deal with civil suits involving a sum of over 100 yen, that limit will be increased to 300 yen. (2) That the number of judges forming a collegiate court will be diminished. Thus whereas 5 now constitute a bench in an appeal court, the future quorum will be 3, and in the case of the Court of Cassation the number will be reduced from 7 to 5. (3) In the third place, the method of appeal

will be simplified, so that a local court will be the appeal tribunal for a district court, and all other appeals will be carried to the Court of Cassation, appeal courts being abolished altogether. (4) Finally, whereas the courts have hitherto taken a recess from the 11th of July to the 10th of September, there will be no recess at all hereafter.

The *Jiji Shimpō* enters with much minuteness into the various delays that occur owing to superfluities of procedure. It is well known to every reader of Japanese history that formalism is one of the nation's most salient characteristics, and doubtless in view of that fact smoothness and rapidity in the transaction of business are difficult to attain.

A FACTORIES BILL.

The Government is said to have completed the draft of a bill for the better regulation of the employment of labour. Many things have indicated the necessity of such legislation, especially the recent affair in Saitama prefecture where the managers of a cotton-spinning mill had to be severely punished by a law court for their brutality to factory girls. It is stated, however, that the authorities recognise the necessity of proceeding deliberately in this matter, so as not to interfere too abruptly with national customs. They are said to hold that a period of about ten years will be required before completely satisfactory laws can be enacted.

Among the principal provisions of the proposed bill, the following are the most important:—(1) The law shall be applicable to factories where at least 30 hands are employed. (2) Children under eleven years of age shall not serve as apprentices. (3) Females, whatever their age, and males of less than sixteen, shall not be employed between the hours of 10 p.m. and 5 a.m. (4) Females of whatever age and males of less than sixteen shall not be required to work for more than 14 hours daily in a first-class factory and more than 15 in a second-class. This distinction between first-class and second-class factories is to be subsequently determined. As to the great length of working hours sanctioned by the bill, the point to be noted is that in these matters traditional custom must be respected. After five years it is contemplated to amend the law in the sense of reducing the hours in first-class factories to 13 and those in second-class to 14, which times will again be reduced to 12 and 13 hours respectively at the end of 10 years. There are also various provisions relating to the relief of workpeople. Thus, employers are required to provide medical treatment for sick apprentices and to allow them at least one half of their wages in the event of illness lasting longer than 5 days; should an apprentice be disabled or crippled in the discharge of his duties, two years' pay must be given to him, with a total limit of 250 yen. If death results from injuries, 20 yen must be paid for funeral expenses, and a sum representing 1½ years' wages, with a limit of 200 yen, must be paid to the family.

These provisions will convey an idea of the nature of the bill without entering into further details. The drafters of the measure are said to be sensible that it is very far from being a completely satisfactory law, but they recognise the advisability of avoiding haste.

THE SALVATION ARMY'S SELF-DENIAL WEEK.

The Salvation Army announces a self-denial week from November 1st to November 8th, and the funds thus obtained will be applied to the maintenance and extension of missionary and social operations. For the information of readers who take an interest in philanthropic enterprises, we append an extract from the Army's last report:—

The following figures give an idea, though an imperfect one, of our present operations.

Field Operations.

No. Corps and Outposts	33
" Officers (wholly employed)	82
" Open air meetings during year..	2,930
" Attendance at indoor meetings during year	82,000
" "Toki-no-Koye" fortnightly circulation	10,500

Ex-prisoners Home.—During the year a very satisfactory work has been accomplished.

No. Inmates at beginning of year ...	38
" New Inmates admitted	67
" Passed out satisfactory	53
" Passed out unsatisfactory	17
" Now in Home	35

Rescue Work.—Two years ago in connection with the opening of our Rescue Home in Tokyo a special number of the "Toki-no-Koye" was published that began the "Free Cessation" agitation resulting in the issue of the Imperial Ordinance making it possible for any girl to leave the licensed quarter and give up this life when she chose to do so.

Licensed Prostitutes.—The decrease in the number of licensed women since the issue of this Ordinance has reached the remarkable number of 12,000 or 25 per cent.

Unlicensed Prostitutes.—It is very satisfactory to find that there has been a corresponding decrease in this direction, the number of convictions for illegal prostitution having decreased 20 per cent.

The takings and the number of visitors to the licensed quarters have tremendously decreased. In Tokyo and Nagoya, the number of guests decreased 20 per cent. while in Kyoto and other parts the decrease was much greater.

Our Rescue Home.—A great deal of our work has been in assisting girls to secure their liberty and restoring them to their friends but steady helpful work has also been done in connection with the Home.

No. Received in the Home	64
" Sent to situations and friends ...	19
" Married	24
" Unsatisfactory	4
" Doubtful	7
" Present Inmates	10

Naval and Mercantile Home Yokohama.—The following figures will give, though inadequately, what has been accomplished in connection with the Home during the year:—

No. of meals supplied	20,774
" of Beds supplied	4,780
Persons for whom we found employment	80
Sent out of Port for the Consular authorities and the Charity Organization Society	138
Services conducted at the Home, on board ship, Teas, etc.	174
Attendances at these	7,250

MUNICIPAL FACTS.

There appeared in the columns of *The Times* during September a series of remarkable essays on "Municipal Socialism." Eleven of them had been published up to the date of our most recent advices. One fact indisputably established by them is that money-making enterprises carried on by municipalities do not make money. There is mismanagement, there is indifference to economy and there is want of efficient supervision. Another fact demonstrated is the apathy of rate-payers: they pay big taxes and give themselves little if any concern about the manner of their contributions' expenditure. One would not have expected that of Englishmen, but it is evidently true.

In the tenth of these essays the affairs of the metropolitan borough of Poplar are discussed. Poplar has a population of some 170,000. It contains the East and West India Docks, the Millwall Docks and some

of the largest and most important industrial undertakings in London. Yet its mayor is one "Will Crooks," a cooper by trade, who occupies a house rated at £11 a year. Among the members of the borough council over which "Will Crooks" presides are a labourer at an iron foundry who earns £1 a week; a labourer at a chemical works; a gas stoker; a bricklayer and so on. Thus thoroughly have the influences of Labour established their control in Poplar. These are the kind of men to whom is entrusted the expenditure of hundreds of thousands of municipal money. Naturally they make a conspicuous bungle of the whole business.

The story of the borough under this sort of management contains many interesting particulars. Two years ago, an electric lighting installation was laid down at a cost of two hundred thousand pounds, with borrowed money. It is a comparative failure. Very few people patronise it, and apparently the light has the same tendency as that formerly observed in Tokyo and Yokohama—it goes out suddenly at inconvenient moments. Then there is a newly constructed public bath which cost eleven thousand pounds. But the people will not use it. The boys prefer to bathe in the Thames in summer and to abstain from bathing in the winter, and the grown-ups "go to bed dirty year in and year out." The same borough has a second bath-house, erected at a cost of £11,285, and a third which required an initial expenditure of £42,000 and now involves an outlay of £3,000 annually. Baths and electric lights do not appeal to the people of Poplar.

But the provision for the poor is the most remarkable feature of Poplar municipal administration. New schools for the children of the lower orders are being erected at a cost of £200,000. "They will have swimming baths, gymnasium, farm, and other attractions of which even an ordinary first-class boarding school could not boast, so that the children of the poor will be far better off than the children of most of the rate-payers who will bear the cost." Expenditures on account of relief are even more extravagant. They absorb one half of the total revenue, their annual burden to the rate-payers being £118,046. That figure deserves to be contemplated by Tokyo taxpayers, who groan at the idea of expending a hundred thousand pounds annually on the improvement of a city of a million and a half of inhabitants. Poplar, with its 170,000 persons, lavishes a greater sum upon the relief of its poor alone. But Poplar is an example of reckless wastefulness. It shows something of the abuses resulting from the regimen of Socialism directed by Labour.

BARON SHIBUSAWA.

Baron Shibusawa has been required to follow the custom now prevalent in his country. He has submitted to be interviewed and to have publicity given to his views about the nations visited by him during his six months' tour. Half a year is a brief period for forming an estimate of several peoples, but the opinions of a man like Shibusawa are always worthy of attention. He seems to have found America's prosperity very striking. Everything was booming. The sources of such vigour are to be sought, he thinks, first in the extraordinary natural resources of the country and in the series of plentiful harvests furnished by recent years; secondly, in the dash and enterprise of the people, who know how to press good fortune to the utmost limits of its capacity. Yet the

whole vast affair appears to have suggested to Mr. Shibusawa something of the inflated-bubble character. Where the pace is so tremendous a collision with adversity must have shattering effects. All the system of trusts and speculative transactions were an overdone aspect, and he carried away from the splendid country a latent sense of instability. Passing to England, he saw conservatism and caution that contrasted palpably with the feverish radicalism beyond the Atlantic. London docks were still equipped with old-fashioned appliances, and Sheffield was working with carefully tended, semi-obsolete machines. There was palpable lagging behind the times in the field of manufacturing industry. But in the making of arms and munitions of war England ranged far ahead of the United States. There could not be any comparison between the two. On the whole, Baron Shibusawa would rather see his country adopt the British model as the less perilous. Concerning Germany he has words of praise only. We infer that he found there the happy mean between the breathless rush of America and the conservative deliberation of England. Above all, the difference of mercantile manners in Germany and England forced itself on his attention. The German was all politeness and anxiety to oblige; the Englishman was reserved and indifferent. As for France, the Baron appears to have been received there with very scant courtesy. He has not described his Paris experiences in detail, but he says significantly that nothing else could have been reasonably expected of a nation which regards the Anglo-Japanese alliance as directed against a Power with which the French are closely associated. An almost uniformly unpleasant experience of the Baron's was in connexion with his country's financial credit in Europe. French banks which have large connexions with the Far East were emphatically skeptical as to Japan's credit, and German economists betrayed a similar mood. This distrust was less marked in England, though even there few persons ventured to speak with unqualified confidence of Japanese finance.

The Baron arrived in Tokyo at 10.48 a.m. on the 31st ultimo. Several hundreds of prominent men had assembled at Shimbashi to meet him. He was greeted first by Count Inouye, and he subsequently spent some time with the latter statesman at a restaurant before proceeding to his own home.

KOREA.

It is now denied that the Lady Wong (or Om) has been made Empress of Korea, as was reported by recent telegrams. The time, it is said, has not arrived for the step. She has merely received an additional title—one more ideograph prefixed to her former title,—the ideograph for "honourable." That is different, decidedly.

Mr. Cho Pyong-sik has been definitely appointed Minister of Foreign Affairs in Seoul. It will be remembered that his temporary nomination to that post for the purpose of receiving Mr. Waeyer and Prince Cyril was recently announced. Cho is a very old man. It was he that came to Japan last year on a special mission of a somewhat extravagant nature. His policy is said to be markedly pro-Russian.

A serious fire occurred in the Japanese settlement at Fusan on the night of the 4th instant at 10 o'clock. From 300 to 400 houses were destroyed and the total loss is estimated at a million yen.

"THE TEMPLES OF THE ORIENT AND THEIR MESSAGE."

In "Clear Round" Mr. E. A. Gordon familiarized his readers with an essentially analytical method of book-craft. He set down a multitude of pretty, suggestive and often recondite thoughts, but he made no attempt to synthesise them. The same habit of mind is displayed in his latest work "The Temples of the Orient." It is a congeries of fragmentary conceptions. They display remarkably wide research and extensive knowledge of the eschatology of various peoples in ancient times, but one lays down the book with a feeling of regret that the author did not add a summary indicating the general conclusions deducible from such a mass of particulars. There is indeed a historical summary, and it has immense interest. Within the space of ten pages the author catalogues the salient events in the history of the Sumerian Nipur, from the seventh millennium before Christ until the twentieth century of our own era when the "cradle of the great primitive faith" was disinterred by an American expedition under Peters, Hilprecht and Haynes. The world has yet to learn much about the results of that disinterment. Among the objects unearthed is the library of the College of E-Kur, consisting of twenty-five thousand volumes written on unbaked bricks. Much time will be needed to decipher the contents of the cuniform records, which are supposed to cover the whole "theological, astronomical, scientific, linguistic and mathematical knowledge of the days prior to Abraham." But enough has been read to show how vain is the current belief about the date of the creation and about ancient history in general. Mr. Gordon gives a short and valuable synopsis of Nipur's story, but his book would have gained much from a synthesis of the miscellany of facts it embodies. Of course the broad purpose of his researches is plain enough. He seeks to show that from everlasting to everlasting there has been but one God in the creed of humanity, and that we bow the knee to-day before the throne where the Semites worshipped ten thousand years ago. It is a fascinatingly interesting study. In Sumér, Egypt and Palestine, as these modern researches show them to us, we make vivid acquaintance with "our fathers of old," learning at one moment about the university of An, where Moses and Herodotus studied; at another that when the Jews entered upon their exile in Babylon they were a "reckless, lawless, godless populace," but when they returned to Canaan they had been "transformed into a band of Puritans."

There are many passing allusions to Japan and her religion in this remarkable work. The author finds similarities between *Shinto* and the faith of Nipur, and he asks whether the Japanese creed may not have been derived from the primitive worship of Sin, upon whose mountain of Horeb the tables of the Law were given to Moses. The *torii* also has suggestions for him. Our theory of the *torii* is evidently incomplete. It is not enough to know that it represents the perch of the cocks collected by the deities in order that their crowing might deceive the Sun Goddess. There must be a great deal more to explain. Mr. Gordon notes that the Egyptian soul-emblem was a human-headed bird resting upon the temple gateways and that the cock is the "Bird of Resurrection." He thinks, also, that the Shamanism of the Turko-Tartar tribes, the Koreans, the Ainu and the Japanese connects them with the Ikkado-Sumerians—the "black-headed

race" of the hymns to Ia, Nardesk and Sin. That is a large inference—one among many. After all, the intelligence of the human race, however variously it may be affected by circumstances, can not always produce dissimilar offspring. Among its children, born at whatsoever remote epochs and under whatsoever different conditions, there must be some family likenesses. Accidental resemblances may become dangerous guides. Viewed by enthusiastic eyes they assume extravagant significance. Such a thought occurs to us occasionally when reading "The Temples of the Orient." Yet we should strongly advise others to read it. It forces one to think. Did the Egyptians carry their studies as far as bacteriology, for example? Their symbol of pestilence was a mouse, and one of the latest discoveries of modern savants is that the rat is the great transmitter of bacilli. Perhaps we are only getting back to where our forefathers stood, instead of leaving them in remote regions of uncivilized ignorance. Uneasy suggestions of that kind will force themselves upon the attention of every reader of "Temples of the Orient."

THE NAVAL INCREMENT QUESTION.

Our readers must have observed that a discrepancy of three million *yen* exists in the statements made by various newspapers about the sum to be devoted by the Treasury to purposes of naval increment, some journals putting the amount at 11¾ million *yen*, others estimating it at 8½ millions. The explanation of this difference is somewhat complicated. Count Matsukata's original scheme—submitted to the Diet in the 1899-1900 session—contemplated an increase of the land-tax rate from 2½ to 4 per cent. all round, that is to say, in urban and rural districts alike. But the Diet, unwilling to make a permanent change, modified the Minister's proposal in the sense that rural lands should pay 3½ per cent. and urban lands 5 per cent.; that the change should be limited to five years, and that, simultaneously, certain readjustments of taxable values should be made. The revenue derivable from the above two increments would have totalled 11¾ million *yen*. But the accompanying readjustment involved a loss of 3¼ millions, so that the net result to the Treasury was an additional income of 8½ millions for five years. This action on the part of the Diet provoked much criticism at the time. For it will be perceived that, by way of compensation for giving to the Government a quinquennial increase, the House of Representatives manœuvred so as to secure a permanent reduction of 3¼ millions for the tax-payer at the end of the five-years period, inasmuch as the re-adjustment of taxable valuation would be perpetual whereas the tax-rate would revert to its original figure. Now if the Government obtains the Diet's consent next session to continue the levy of the land tax on its present basis and to devote the proceeds to naval increment, the sum actually available for the latter purpose will be only 8½ million *yen*. It is here that the question comes in—will the Government ask the Diet to appropriate for the Navy the gross sum accruing from the increased land tax, or only the net sum remaining after the loss of 3¼ millions on account of re-assessment is deducted? That is what appears uncertain. If the gross sum be appropriated, it will obviously be necessary that the Treasury should find some other source for meeting the deficit of 3¼ millions resulting

from re-assessment. Or, to put the matter differently, the money devoted yearly to purposes of naval increment will include a special appropriation of 3¼ millions independently of the land-tax increment. We can not undertake to say what is the present idea of the Cabinet on this point.

TAX ON DOGS.

The Tokyo Municipality has proposed and obtained the City Assembly's consent to a tax of one *yen* per head annually on dogs. It is estimated that the tax will yield 3,000 *yen*. That is a remarkable assumption. It is based on the hypothesis that only one family in every thousand keeps a dog in Tokyo. We should have inferred from sound and appearance that one family in every ten nourishes a canine pet.

There are symptoms that the citizens are becoming weary of the present method of carrying on the scheme of "City Improvement." Hitherto the plan has been very extensive, but its accomplishment depended on accident. When a fire occurred, the streets in the devastated area were widened; but as fires do not occur with any regularity, it resulted that the process of improvement assumed a patchwork character, at once unsightly and inconvenient. The Improvements Committee has therefore resolved to change the system and to set about the work in a definite and orderly manner, devoting 19,998,226 *yen* to it, and completing it in a period of 20 years. Surely anything that will accelerate the present methods must be welcomed.

NOTES ON CURRENT EVENTS.

Russian newspapers are said (*Asahi* telegram) to be agreed in urging that the Afghanistan problem must be settled definitely. What is the matter with Afghanistan after all? Can not it be left alone? We have always wished that it could be erased from the map as an independent kingdom, and that the frontiers of England and Russia might be conterminous in Central Asia. But British statesmen, who certainly understand the motives of their own action, prefer the existence of a semi-civilized buffer State, capable of becoming at any moment a sharp thorn in the side of either of its neighbours. Russia apparently thinks the present moment opportune for opening the question. Otherwise her newspapers would not be suffered to speak so strongly.

General Sakuma's retirement is owing to ill-health. He has been ailing for a long time, and has been obliged to leave the duties of his office undischarged. He retires at his own request, and it is thought that his successor in the inspectorship of the central districts will be General Kuroki, now inspector of the western districts.

The Cabinet has promulgated certain changes which are believed to be a part of a general programme of administrative reform. It would be merely confusing to attempt any analysis of the measure at this stage. The only salient feature is a reduction of the official personnel—especially in the department of the tobacco monopoly—which results in an economy of 40,000 *yen* annually. The total saving effected is 9 million *yen*, but a large portion of this does not belong to the realm of administrative reform, being simply a result of postponement or adjustment of public works.

It is characteristic of the German people to-day that their energy of intellect and their confidence in their destiny thrust them into the van of many important enterprises. They are now taking the lead in matters relating to the establishment of an universal system of wireless telegraphy. The Marconi Company and Lloyds having concluded an arrangement which threatened to give them a monopoly of the system, Germany steps forward with a declaration that such a monopoly would be commercially and politically objectionable. She has invited England, France, Russia, Italy, Austria-Hungary and the United States to arrange for a meeting of delegates who shall prepare a programme for an international conference, in order to draft a convention settling conditions for the establishment of wireless telegraph stations. The invitation is said to have elicited a favourable response.

The Republic of Guatemala, in Central America, was established on March 21, 1847, and has an area of 48,290 English square miles. Of the 1,574,340 souls which form the population 60 per cent. are pure Indians. The soil in general is exceedingly fertile, the most important crop being coffee. The largest of these plantations were in the hands of Germans, and despite a heavy export duty the trade was continually growing. Santa Maria mentioned in our cablegram is, we presume, the railway junction of that name.

On the 2nd instant a religious ceremony of some importance took place in Tokyo. Portions of the bones of twenty thousand soldiers who had lost their lives in the war of 1894-5, were transported from Kyoto for special interment in a newly erected mortuary shrine, called the *Chiurei-do*, within the precincts of Gokoku Temple in the Koishikawa suburb of the capital. The car containing the relics was, of course, very magnificently decorated, and a large concourse of priests accompanied it, as well as the friends and relatives of the deceased together with about a hundred soldiers in uniform who had fought in the war. As the procession was passing the front of the French Legation, the carriage of His Excellency M. Harmand was about to issue from the gate, but the driver reined back his horses at the instance of the directors of the procession and awaited an opportunity to pass. Seeing, as he supposed, that the path was clear, he attempted to proceed. But this action being resented by the crowd, some disturbance occurred. As to its extent we can not speak with certainty. The accounts vary much. But no one seems to have suffered any injury, and M. Harmand appears to have treated the matter with good-humoured tolerance. Due apologies were tendered by the Authorities.

The fine new building of the Mitsui has been finished. The work of construction began in 1896, and the edifice now constitutes one of the most imposing structures in the capital. It stands in the neighbourhood of the Bank of Japan and covers an area of 770 *tsubo*, in a compound of 2,720 *tsubo*. There is an underground story and four above ground, so that the employment of a lift is necessary. All the operations—banking, mining, trade and general business—are to have their headquarters in this building. On the 10th instant there will be a grand opening ceremony and from the 17th the officers will commence business.

The Emperor has been pleased to confer the Third Class Order of the Rising Sun on

Mr. Okura Kihachiro, in consideration of his munificent services in the cause of education.

THE BIRTHDAY CELEBRATIONS IN TOKYO.

Owing to the inclement weather which prevailed on the 1st and 2nd instant, the Birthday review on the 3rd was abandoned as the state of the ground would have greatly impeded the evolutions of troops. This is exactly what happened last year.

The Imperial Levee took place at 11 a.m. and was largely attended. Subsequently three hundred and eighty persons had the honour of lunching with His Majesty in the Phoenix Hall. Unfortunately the Crown Prince was unable to be present owing to indisposition.

In the evening the Minister of State for Foreign Affairs, Baron Komura, entertained at dinner the Representatives of Foreign Powers and other distinguished personages. Subsequently His Excellency repaired to the Imperial Hotel where, assisted by Viscountess Tanaka, he did the honours at the Birthday Ball. The invitations issued this year numbered twenty-six hundred in all, namely, nineteen hundred to Japanese and seven hundred to foreigners. About twelve hundred of the *invités* attended. In view of this large assemblage the dimensions of the supper marquee were increased from the usual 130 *tsubo* to 160 *tsubo* (12,966 square feet), and even in its enlarged form it barely sufficed to accommodate the guests. Imperialism was represented by Prince and Princess Komatsu (junior), Prince and Princess Kacho, Prince and Princess Nashimoto, and Prince and Princess Kanin. Additional eclat was lent to the occasion by the presence of several foreign officers now visiting Japan for the purpose of attending the autumn manoeuvres. The decorations were exceptionally beautiful and of entirely novel conception, the main feature being huge bouquets in the form of *Kusu-dama*, suspended at regular intervals on the walls and corruscating with points of electric light. Some special method of organization seems to have been adopted with regard to refreshments, so that, this part of the entertainment being kept entirely independent of the ball room, the latter escaped the pressure of the crowds which on all previous occasions rendered dancing virtually impossible until after supper. Similar skill marked the arrangements in the matter of vehicles. A double entrance was contrived, so that the occupants of carriages and *jinrikisha* took different routes yet arrived simultaneously at the entrance to the reception salon. Moreover all the usual confusion and difficulty in procuring one's conveyance at the time of departure was completely obviated. In all these respects the ball was a model entertainment. The science of organization could not have been carried further, and Mr. Yoshida of the Foreign Office, who is chiefly responsible for such matters, must be congratulated on having reached the limits of good arrangement. The Imperial guests remained until supper at half-past eleven, and dancing subsequently continued until past one o'clock. On the whole no entertainment so successful in every feature had ever previously been witnessed in Tokyo. The only subject of regret was that indisposition prevented Baroness Komura from being present.

At the banquet given by the Minister of State for Foreign Affairs covers were laid for thirty-four persons. The health of the Emperor was proposed by His Excellency M. Harmand, who, on his return from Europe, becomes *Doyen* of the Corps Diplomatique.

His Majesty's speech at the Levee in the forenoon was, as usual, of the briefest description—a short expression of welcome to the Representatives of the Foreign Powers and of his own subjects. It was translated into French by Baron Sannomiya. The Prime Minister, Count Katsura, replied on behalf of the Cabinet in almost equally brief terms. His Excellency M. Harmand also confined himself to a very few words. As Dean of the Corps Diplomatic he expressed his own and his colleagues' profound appreciation of the gracious welcome given to them by the Emperor.

His Majesty remained with his guests until 12.40 p.m.

In the afternoon, at two o'clock, the Empress held a Drawing Room at which the Princess Imperial and the Princesses of the Blood were present.

YOKOHAMA.

In Yokohama the anniversary of the birth of His Majesty the Emperor was generally observed as a holiday. The banks were all closed and most houses of business put up their shutters and hung out their flags. Also it may safely be said that all Bluff residents owning a flag hoisted it. Many people had gone into the country on Friday and Saturday and many more followed on Sunday and Monday morning. Those who were fortunate enough to get away early were not favoured with very good weather for it rained more or less all the time till early on Monday morning. Afterwards, however, the skies cleared and nothing better could have been wished for—at any rate along the coast.

Governor Sufu received residents at the Prefectural Office between 9.30 and 10.30 a.m. on Monday.

At noon a salute of twenty-one guns was fired from the warships in port, the British battleship *Goliath*, the U.S. battleship *Kentucky*, and the Japanese cruiser *Naniwa*. Practically all the ships in harbour flew the contents of their flag lockers, and such of the yachts as own a set of signal bunting displayed it. The weather remained dry throughout the day. In the evening the warships were beautifully illuminated, their outlines being marked out with electric lights. The *Kentucky*, specially, made a fine show, having in addition, a couple of flags, one at her bow and the other at her stern, most effectively traced in the colours appropriate to the ensign and the jack.

YACHTING.

The twice-postponed race of the 21-raters was brought off on Monday and resulted in victory for *Winsome* which had a long lead coming up from the Widow Buoy, though *Pele* closed up considerably after they rounded the Lightship. The breeze was light from the eastward.

The corrected times were as follow:—

	h.m.s.
<i>Winsome</i>	4.22.05
<i>Pele</i>	4.24.12
<i>Stella</i>	4.25.05
<i>Vixen</i>	4.35.40

Winsome therefore takes first and *Pele* second prize.

FOOTBALL.

A game of football was played on Monday between a scratch team representing Yokohama and an eleven from the *Goliath*. In the first half the latter scored two goals and the former one; in the second half both sides pressed hard but failed to score. The visitors touched their opponents' cross-bar several times and ten minutes before time was called Kilby, on a centring kick by Firth, had an easy shot for goal which unfortunately rose over the bar, merely grazing it. The visitors therefore won.

The following was the local team:—

W. J. Waddilove	Goal.
A. W. S. Austen	} Backs.
N. G. Maitland	
A. R. Firth	
W. J. White	} Half Backs.
F. Pollard	
W. R. Ford	
A. W. Read	} Forwards.
H. W. Kilby	
F. Graham	
F. O. Stuart	

MAILS VIA SIBERIA.

With a view to the utilization of the Siberian Railway for the transport of mails from Japan to Europe, the Yokohama Foreign Chamber of Commerce has been in correspondence with the Department of Communications in Tokyo, and the information obtained is that, though the Department is making investigations into the facilities offered by the Siberian Railway for the transmission of mails from Japan to Europe, it is impossible at present to say when that route will be availed of for the purpose.

THE EMPEROR'S BIRTHDAY.

ON November 3rd the Japanese nation and foreigners in Japan joined in celebrating the fiftieth anniversary of the EMPEROR'S birthday. It is not likely that any foreign journals will emulate their Japanese contemporaries in penning eulogies of HIS MAJESTY'S wisdom and virtues. The Japanese habit in this matter is a little hyperbolic from an Occidental standpoint, but the etiquette that inspires it being fully understood, we have no occasion to be critical and need only offer an apology for speaking ourselves in a lower strain of applause. Unquestionably applause is well deserved. We do not pretend to estimate the moral qualities of HIS MAJESTY as compared with those of the world's renowned rulers in the past or in the present. Happily for Japan her polity is so ordered that few opportunities offer for a direct display of beneficent sagacity or injurious unwisdom on the part of her Sovereign. To the general onlooker, therefore, few indications are procurable for weighing the force of the Imperial ability as a factor of statecraft. There are two things, however, that thrust themselves upon the attention of every observer. They are HIS MAJESTY'S unfailing display of prudent confidence and his untiring exercise of tactful charity. In the former respect he closely resembles the great WILLIAM of Germany. Both rulers seem to have been endowed with the same instinctive appreciation of ability in others, and the same deeply sagacious capacity of self-effacement in the presence of competent instruments. The forger of that fine machine, the modern German empire, showed his imperial aptitude most conspicuously in his choice of agents and in the fullness of the trust he reposed in them. During the thirty-six years of his reign the EMPEROR MUTSUHITO has shown the same faculties of insight and faith. It was HIS MAJESTY'S great good fortune, and the great good fortune of his country, that he succeeded to the throne at the very dawn of the "era of enlightenment." Had it been necessary for his father KÔMEI to cross the bridge between the old and the new, the effort of breaking away from the traditions of the past, which had received the sanction of HIS MAJESTY'S own practice, might have proved too great and would certainly have shocked the sense of congruity in some sections of his subjects. But KÔMEI passed away from the scene of storm, struggle and confusion just as the country had to choose between remaining in the shadow of the old or passing into the light of the new, and it was comparatively easy for his successor, then (1866) in his fourteenth year, to identify himself intimately with the changes of the time, and to enter unreservedly the path indicated by the singularly daring and brilliant band of youthful *samurai* who undertook to wield their country's destiny in the years of *Gwanji* and *Kei-wo*. Since then the EMPEROR has never

made a mistake in his choice of instruments. Perhaps we should in justice attribute something of his eclectic penetration to the educating influence of that same band of *samurai*. But the faculty to receive instruction is a not less important element of moral greatness than the capacity to utilize it. If HIS MAJESTY'S judgment had ever been obscured by favoritism or swayed by prejudice, Japan's unswerving progress must have suffered a check. But he has never erred. He has always had the courage of his confidence. That is saying a great deal when we remember through what a welter of changes Japan has passed during the *Meiji* era, and how variously the shifting elements of the scene must have presented themselves to the eyes of men responsible for the evolution of ultimate order. Side by side with this fine sagacity of perception and courage of trustfulness HIS MAJESTY and his gracious Consort have strengthened their hold upon the people's hearts and deepened the admiration of on-looking nations by the exercise of a very beautiful and thoughtful charity. The career of the EMPRESS, indeed, has been one long round of benevolence. HER MAJESTY'S sole occupation is to discharge her Imperial duties and to practise mercy. We know of no life that has shed from a high place a brighter light of kindly sympathy with the sorrows and sufferings of others. The EMPEROR'S avocations of statecraft necessarily limit the time he may devote to the exercise of active charity, but none of the temptations of autocracy has ever interfered with his munificent ministrations to the needs of his people, great and small alike. That is a very fair and admirable record, and we speak in the best interests not of Japan alone but of humanity in general when we express a hope that many years may yet remain of such a reign.

OSAKA AND ITS GAS WORKS.

WE have received from the Mayor of Osaka a lengthy statement of the position taken by him with regard to the question of the gas works. Perhaps the fairest way to deal with this presentation of the case for the Osaka citizens, is to set down the cardinal points of the Mayor's contention—or, at least, the points which seem to us to be cardinal.

1. The instructions issued by the Governor of Osaka to the Gas Company did not constitute anything in the nature of a concession. On the 18th of February, 1896, the promoters of the Gas Company addressed a petition to the Governor of Osaka of which the gist was that, as the Company would have to lay iron pipes in the streets and other places in Osaka city for the purposes of a gas supply, permission to do so was requested. On the 1st of July of the same year the Governor of Osaka replied favourably to this application, and prescribing certain conditions which must be observed by the Company. The

first was that permission to carry out the work must be duly sought; that plans, specifications and drawings must be furnished, and that, prior to seeking such permission, the views of the Mayor of Osaka must be consulted. The fourteenth of the conditions was couched in the following terms:—"After the laying of gas-pipes, it shall be competent for the City authorities to order pipes to be moved to a different place, or to be removed altogether, at the Company's charges, should such a course appear necessary in the public interests.

Evidently the above did not amount to more than recognition by the Administration. It merely guaranteed the Gas Company against official opposition to its enterprise as a whole (*gas-jigyo sono mono ni tsuite zettai ni kobamaru osore naki ni todomaru nari.*)

2. The Governor of Osaka has no power to grant a concession for gas works. There are no rules enabling him to do anything of the kind. Neither is there any necessity for a company to obtain official permission for an enterprise which any Japanese subject is free to undertake. However, even though permission were obtained from the Governor, it would not confer any right to use the streets of the city. The duty of repairing and preserving the streets devolves almost wholly upon the Municipality, the Governor's function being merely that of superintendence. A departmental ordinance issued by the Home Office on the 22nd of May, 1891, and numbered 462, makes this point quite clear. It shows that streets, embankments, and rows of trees, being constructed or planted at the charges of the local commune, fall under its control, subject only to the Governor's sanction. This ordinance is the basis of a city's competence with regard to such objects.

3. The Company consequently having no acquired rights nor having obtained any special privilege, is at any moment liable to have the Governor's sanction revoked should such sanction be held to operate injuriously to the public interests.

4. Since without using the streets the Company can not carry out its enterprise, it follows that the practicability of the enterprise depends upon obtaining permission to use the streets, and, consequently, that competence to permit the enterprise being vested in the City, the City has the right to demand compensation. This right is quite independent of the Governor's instructions given to the Company. When the Company, as a result of the Governor's instructions, approaches the Municipality for purposes of consultation, it is within the power of the Municipality to require that leave shall be sought for using the streets, and to demand some consideration for granting such leave.

5. The Company seeks to maintain that inasmuch as it obtained, at the close of last year, permission from the Municipality to use a part of the streets, it has therefore the right to use all. Such a contention is an

attempt to make a partial privilege the basis of a complete usurpation.

6. What the Municipality demands is:—

1. That the Municipality's sanction must be obtained before fixing or changing the scale of charges for gas.

2. That gas required for public purposes shall be supplied at reduced rates.

3. That at the end of a fixed term of years the city shall have the right to buy up the works.

4. That a portion of the gross earnings shall be paid to the city.

5. That a portion of the net earnings shall be paid to the city.

It has been objected that these last two conditions should not be simultaneously imposed. The Municipality's reply is that it demands a portion of the gross earnings by way of tax for laying pipes in the streets—the charge being quite independent of the Company's profit or loss—; and that it demands a portion of the net profits in consideration of granting to the Company a monopoly of the gas supply.

The above are the main arguments advanced by the Osaka Municipality in defence of the position taken by it. They amount to claiming that the Gas Company must of necessity obtain the Municipality's consent; that it has not yet obtained it, and that the Municipality is entitled to compensation for granting consent.

THE YANGTSE VALLEY.

OF course the idea of evacuating Shanghai has passed from the range of immediate probabilities. Germany, who was for a time the hesitating Power, is now understood to allege that since she has secured what she wants with regard to the open door in the Yangtze Valley, she will readily withdraw her garrison—when the other Powers do so. Germany does not perpetrate international jests or we should be tempted to suspect her of practical joking in this matter. For, in the first place, what need was there, what conceivable need, of seeking or obtaining from China any guarantee as to the open door in the Yangtze Valley? By what Power was the permanence of the open door threatened? Within what Power's "sphere of influence" did the Yangtze Valley fall? Within England's sphere, of course. What follows then? Here we have Germany who, ever since the opening of China by British arms, has carried on trade with that empire under the British ægis; Germany whose subjects have enjoyed in British colonies or British settlements exactly the same degree of liberty and the same measure of privilege as British subjects themselves, here we have this very Germany virtually avowing the necessity of obtaining from China a pledge that no part of the Yangtze Valley shall be closed at England's dictation! A pledge from China, be it observed. How is China to implement any such promise? Germany with Kiaochow in her possession ought to be able to answer the question. Those doings of hers in November, 1897, should teach her clearly what competence China possesses to resist

the seizure of her territory or the partial closing of it to the outside world, as the Berlin Government has sought to close the *hinterland* of Kiaochow. Germany knows that many years must pass before she can menace China by any display of force comparable with that which England could now array in the Far East. Yet Germany, having achieved Kiaochow with her own small strength, now requires China to guarantee that no similar achievement shall be permitted to England's immensely greater strength! Can it be called anything but a huge jest? We delight in Germany's assurance. It is magnificent, and we do not grudge it any of the successes it accomplishes. But we do wish that it could be exercised in a manner less wantonly costly to England's *amour propre*. Does Germany care a row of pins about England's friendship? We think she does, and we know that her friendship is a matter of much moment to England. But Berlin's manoeuvres are a terrible strain on the kindest sentiments.

As for China in this matter, the latest telegrams indicate that she did exactly what we suggested some time ago as not improbable. Prince CHING deliberately threw dust in Sir ERNEST SATOW's eyes. In answer to Sir ERNEST the PRINCE declared that Germany was not asking for anything inimical to British interests. Then, on the afternoon of the same day, the Prince formally acceded to Germany's propositions. Perhaps His Highness did not intend to practise any deceit. Perhaps his intelligence did not suffice to penetrate the true import of such doings. But whether it was his folly or his crime, he ceases to be a possible *vis-à-vis* for any responsible British diplomatist.

THE ARBITRATION TRIBUNAL.

WE observe that our comments on the composition of the arbitral tribunal in the matter of the house tax have been curiously misconstrued by our local contemporaries. One newspaper charges us with racial prejudice because we expressed disappointment that no Anglo-Saxon representative would take part in the proceedings, and another seeks to suggest that we had in our mind some jurisconsult who would have been unlikely to render judgment in favour of the anti-tax side. Such imputation of motives and prejudices is so hackneyed as to be wearisome. Our own choice in the matter would have been, in the first place, SIR EDWARD FRY. We should have liked to see him chosen for two reasons. The first is that we entertain a traditional predilection for seeing England represented on a tribunal which has the function of dealing with a question that concerns British interests. It is emphatically unusual, if not unprecedented, that in a matter where British subjects have so much more at stake than the subjects or citizens of any other Power, Great Britain should be judicially effaced. The second reason is that,

whether owing to racial prejudice or impartial observation, we have come to regard British and American judges as the only judges in the world who adjudicate in absolute independence of executive influences. The principle of completely segregating the judiciary and the executive is admitted by all nations, but whether it receives genuinely practical recognition outside England and the United States of America, is open to great question. Sir EDWARD FRY might have been depended on to arrive at a conclusion based solely on the merits of the case, without the slightest concession to favour, affection, or official relation. We have nothing to say against M. RENAULT. Indeed, in an article which our critics, with characteristic ingenuousness, ignore, we have paid a tribute to the distinguished Frenchman's high qualities and acknowledged his aptitude for the task now to be discharged by him. Yet we confess to an old-fashioned preference for Anglo-Saxon judges, and to a prejudice, which happily has not yet become old-fashioned, for the presence of British representatives on tribunals to which decisions about British interests are entrusted. If it be claimed that Sir EDWARD FRY could not have been trusted to render a decision entirely unbiassed or entirely in accord with the merits of the case, or if it be claimed that to prefer him is to show a desire for Japan's success, then we freely admit our own prejudice and partiality. Apart from these questions of personnel we venture to think that the whole arrangement is ill-advised. A much more satisfactory course, in our opinion, would have been the selection of a single arbitrator, such as the Chief Justice of the United States Supreme Court, who would have approached the question with an absolutely independent mind, and who would have brought to its solution the highest juridical qualifications. That Japan would have agreed to such an arrangement there can not be the least doubt. Her representative on the arbitral tribunal has now nominated as his first choice for the position of umpire, Mr. JUSTICE FULLER, of the Supreme Court of the United States. That alone is sufficient to show the good will entertained by Japan and her desire for justice, nothing more and nothing less.

THE SHINCHOU AFFAIR.

FULLER information about the Shinchou complications shows that in deference to the uncompromising attitude taken by England through her Representative, Sir ERNEST SATOW, the Chinese Government has issued a decree condemning two of the principal local military officers to death, and permanently depriving several civil officials of their posts. This drastic measure will terminate the incident. England's demands have been fully satisfied.

Evidently without full knowledge of the information in the possession of Sir ERNEST SATOW, it is impossible to criticise this incident intelligently. The local troops in

China are proverbially inefficient. Virtually the only function they are expected to discharge is that of assisting the civil officials to preserve order. But, so far as experience goes, they never do assist until assistance comes too late to be of any value. There is, however, one aspect of this matter that can not fail to present itself to any thoughtful person. If the foreign public is ignorant of the exact reasons that have led to the execution of two high Chinese officers, the Chinese public also must be ignorant. That signifies a great deal. It signifies that men holding important military positions are to be decapitated in deference to a foreign demand without any form of public trial. It may be assumed, with reasonable probability, that such an incident does not shock the sense of justice in China as sharply as it would shock it in an Anglo-Saxon country. But some sense of hardship and arbitrariness must be produced. Most profoundly is it to be desired that foreign relations with China could be turned into a more civilized groove. The most that could possibly be demanded by one European Power of another, or of Japan, in connexion with an incident like that of Shinchou, would be that the officers charged with criminal negligence should be duly tried and punished in accordance with the judgment of a native tribunal. But in China Foreign Governments constitute themselves at once accusers and judges. Be the Chinese people ever so careless about the course of justice—and we have no right to suppose them careless—they can not fail to perceive this difference and to resent it. Possibly we are adopting the most efficient method of securing the lives and properties of British subjects when we demand, *via* naval demonstrations, the execution of Chinese officials who are suspected of failure to utilize fully their resources of protection. Nothing of the kind is done anywhere else, however, and there can be mistake about the resentment it must create among the Chinese. Is there no possibility of organizing some kind of mixed tribunal for the trial of such cases?

THE GERMAN MANOEUVRES.

IT has been a matter of the most lively interest to military men in England to observe how far, if at all, the experiences gained in South Africa would be taken as suggesting the expediency of tactical changes in France and Germany. British Generals learned in Natal, in the Transvaal and in the Free State that in the face of modern weapons of precision troops fighting under topographical and climatic conditions such as those existing in South Africa, must refrain from front attacks and must approach an enemy's position in order so loose that, without extraordinary discipline and intelligence on the part of the men, their cohesion disappears altogether. Not until these lessons had been mastered and carried into practice did success attend the attacks of the British. Therefore the recent German

manoeuvres were watched with great curiosity. We alluded to this subject more than once in previous issues, noting the criticism of some American experts, who pointed out that no troops, advancing to the attack in the formation still maintained by the Germans, could hope to cross the "zone of shambles;" and noting also the somewhat fantastic retort of Mr. POULTENY BIGELOW, who maintained that what foreign onlookers are allowed to see in Germany is not the genuine manoeuvres, but a kind of theatrical display, specially designed to delight the crowd and deceive the critic. *The Times* special correspondent treats the matter very differently. He puts forward a point which is very apt to be ignored, namely:—

All the great Continental nations can afford to lose men; yet the losses in a single big engagement in the war of 1870 would have crippled the then existing British Army practically out of all reckoning as an armed force; consequently the Continental expert does not look upon the economics of war from quite the same standpoint as we do ourselves. When the military expert, strategist or tactician, has millions of men at his disposal in Germany—over four millions—it can be readily understood that he faces the problem of war in a spirit far removed from that of the man who has not 50,000 men to lose. And this I think is the point which we in our criticisms are rather inclined to forget. The gaining of any given object at a sacrifice of 25,000 men in a single engagement is an end no British general would ever contemplate. Consequently, when we see in mimic war a manoeuvre attempted which would, if successful, cripple us to the end of the campaign, and perhaps plunge us on the morrow into disaster, we shudder and say "this not war." For us it would not be war, but for others it may be the best expedient that they could employ. We know that big turning movements like Lord Roberts's battle at Diamond Hill in June, 1900, when carried out upon the humane system, take two to three days to be brought to a satisfactory issue. In Europe, with its network of railways and telegraphs and its giant supports and reserves within reach, it will not be often that a general will have sufficient time to follow the procedure which I have called the "humane system." His first consideration then will be the "glory and honour of his arms," and his second, true to the Napoleonic maxim, "the safety and preservation of his men."

It may be gathered from the above that German tacticians have not thought it necessary to modify their methods in deference to South Africa, and that the correspondent offers an intelligent explanation of their conservatism. But such an inference would be too sweeping. The Germans have made some changes, though only of a partial nature. No account could be more lucid than that given in the columns of the great journal:—

How far the formation of attack in which at present the Continental armies are trained will be possible when adequately covered by scientific fire support is, of course, still problematical. We have little in the loose formations of the South African war to give us a satisfactory parallel. Paardeberg and Modder River failed as attacks pressed home; Elandslaagte, Talana, Pieters Hill, and Vaalkranz, on the other hand, were successful. Pieters Hill would perhaps give the nearest parallel, as the artillery support was terrific and of the nature which the Continental soldier believes to be necessary, while the defence was the most stubborn offered by the Boers. Yet it was an attack carried through by lines of extended men. Personally I am of the opinion that there is a limit to the extent of shambles that men can be induced to cross; therefore I confidently condemn the system of infantry attack practised in the French army at the present movement. But the German infantry attack formation is looser and more adaptable than that of the French to the conditions we believe to be the only formations possible in view of the modern development of arms of precision. When a German company prepares for attack, one section only is extended, unless special orders are received to extend more, and the remaining sections, formed in line of column, follow as support at a distance varying according to circumstances, the principle being that the support must be close enough to

reinforce the firing line in proper time. The German company consists on a war footing of 250 men. I have made this explanatory foreword lest any one may have been led to believe from a perusal of the previous articles that a complete metamorphosis has taken place in the field training of the German Army as a result of the lessons taught by the South African war. This, of course, is not the case, but the Germans, who are a progressive race, have qualified their existing theories by adapting to some degree certain obvious lessons to which other of the Continental armies still shut their eyes.

I find on turning to some existing records of past German manoeuvres that a distinguished British officer wrote in 1897:—

"It was impossible for onlookers to have had better opportunities of studying the German system of attack than were presented to us at this most interesting mimic battle. The preliminary stages of the attack, like our own, are carried out by the firing and supporting lines of infantry in single rank at intervals varying according to circumstances; the reserves were, however, retained in close order, and even in company columns. The German regulations are framed upon the rule that 'close order is the basis of all things, and that the principle always in view is to keep the men in close formation as long as possible, preferring to lose a few men rather than to let their commands get out of hand a moment sooner than necessary.' This principle is carried to such an extent that on many occasions it was observed that companies were kept in company columns at effective artillery, and even at decisive infantry, ranges. The idea is consistently observed that everything should be sacrificed, even human life, to the steady cohesive discipline upon the field of battle."

Now if this was true in 1897, when the British observer had not his present knowledge of the effective and decisive ranges of artillery and infantry fire, it may also be said that to a great extent it was true of the manoeuvres in 1902. There is, however, a considerable difference between the German and the French training; while the former have realized that much that takes place at their manoeuvres would be impracticable in war, the latter steadfastly refuse to believe in the "stopping power" of any fire at the ranges which have effectually stopped British troops. The German methods throughout passess that elasticity which will enable them readily to conform to the dictates of bullet and shell, while this cannot be said of the French. After the use to which I have seen German infantry put existing ground cover when moving to the attack I should be loth to condemn the practicability of their training simply because I have also seen reserves in mass pushed up to within easy rifle range of the enemy and columns marching undeployed under heavy artillery fire. Similar sights have been witnessed this year upon our own manoeuvre grounds. And I still maintain, as I have tried to show earlier in this article, that the question of the right tactics to be employed in Europe is still an open one. What proved absolutely impossible under the abnormal conditions of open, featureless country and marvellous atmosphere in South Africa may be suited to the nature of the conditions when armies are called upon to meet in hostile operation in Europe.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

The serious troubles and complications in the ranks of the most powerful Buddhist sect in Japan have been frequently referred to in a casual manner in these columns, but no connected history of the whole of the Higashi Hongwanji affair has been given. Such a history we find ready to hand in the columns of the *Nichi Nichi Shinbun*, which we shall now proceed to reproduce in an abbreviated form. It was in the year 1872 that the heads of the Shin sect decided that it would be well to call into existence a body of councillors and to give them the exclusive control of all the temples belonging to the sect and all business arrangements. Among the men chosen to be members of this Buddhist Cabinet were two very strong-minded and resourceful men, Atsumi Keiyei and Ishikawa Shuntai. It was not long before the relations of these men to each other became strained, ending in the bitterest enmity. Most of the after-troubles of the sect have originated with one or other of these men, who in the desire to outdo each other have sacrificed all the higher interests of the body over whom in an evil hour they were called upon to preside. When the Council was first-formed the debts of the 本山, *honzan*, or head-temple of the sect, amounted to 800,000 yen, but in the course of seven or eight years the liabilities of the

temple had increased to about 1,200,000 yen, and, moreover, few people knew what had become of all this money. In order to make his position more unassailable Ishikawa was taking steps to get himself appointed sub-abbot and was conferring with his supporters about this when Atsumi, who had got wind of the affair, appeared on the scene and accused Ishikawa of treachery. This led to a fight. Ishikawa being the assailant, was tried and condemned to imprisonment. This involved a severance of his connection with the sect. Shinohara, who was the business manager (*shitsuji*) at the time, finding the finances of the sect in a hopeless mess, threw up his post. This was early in the year 1882. At that time the control of the affairs of the sect was in the hands of Atsumi Keiyen and Chō Yenritsu; but, as the result of plotting on the part of Ishikawa's faction, these two men fell out. Atsumi resigned and shortly after Chō did the same, and joined hands with Ishikawa in stirring up an agitation against the opposite faction, on which agitation they spent 80,000 yen. When the sect had, through the roguery and corruption of the managers of its business, run itself into debt to the amount of 2,500,000 yen, in the year 1883, Prince Iwakura interfered and requested Count Inoue to take steps to reform the existing abuses.

Count Inoue assembled the heads of the rival factions before the Chief-Abbot and made them solemnly swear that they would cease their ungodly strife and labour for the good of the sect. Atsumi and Chō were placed at the head of affairs again. But they had not been in office long before it was discovered that they had run the temple in for a new debt of 80,000 yen in an unscrupulous manner. They were turned out of office. Count Inoue now created an auditing bureau in the sect, but it seems to have effected little good, for in 1885 the debts of the temple had reached no less than 3,300,000 yen. It was in this year, however, that the tide turned and the fortunes of the sect began to improve. Atsumi, through the help of Count Matsukata, succeeded in borrowing money from the Mitsui Bank, by means of which the temple's debts were considerably reduced, so that a few years later, in 1893, they stood at 1,800,000 yen. Atsumi seems to have won the confidence of the whole sect during the 4 or 5 years that preceded that date. He established a number of schools and built the great Hongwanji temple afresh. To Atsumi belonged the credit of restoring the sect to financial prosperity and of largely reinstating it in the people's favour at that time. Then came the China-Japan war, which affected the Shin Shū in many ways. A large number of priests acted as chaplains to the troops and their expenses had to be paid by the sect. Then the contributions from the temples at this time fell off considerably, so that in the year 1896 we find the sect had run itself into debt again to the amount of 380,000 yen. Ishikawa welcomed this state of affairs as affording him an opportunity of regaining power. So his faction brought the following charges against Atsumi's administration: (1) That the priests had been converted into sceptics by over-education; (2) that the finances of the sect were in disorder; (3) that the Chief-Abbot's conduct (for which according to Japanese notions Atsumi was in a measure responsible) was a disgrace to the sect. On the first two charges Atsumi did more than hold his own against his opponents, but to the third accusation he could make no adequate reply, seeing that it stated a fact which he could not deny. So he resigned. In January 1898 Ōtani Shōyen (a relation of the Chief-Abbot) was created Head of the Business Bureau of the Sect, and he at once invited Ishikawa to sit at the Council Board as of old. This was the signal for Atsumi to retire. The policy of the sect at once changed. Ishikawa was as anxious to spend as Atsumi had been to retrench and husband resources, and he at once began launching out in a most reckless manner. He despatched priests to Korea and to China. He laid out a large amount of money over the conveyance of the Siamese relics to Japan; but he spent a still more prodigious sum on obstructing the Government's Religions' Bill in the Diet. He borrowed right and left until in 1900 the debts of the temple had again accumulated to the amount

of 2,000,000 yen. As a means of raising further sums in 1901 he began to go around to the branch temples armed with the Chief-Abbot's autograph, which commanded the adherents of the sect to subscribe. But by this time Ishikawa's dishonesty had become generally known and, instead of receiving money, at Nagoya, he was assaulted with angry questions, which failing to answer, he had to flee from the place. This led to his resignation. Atsumi at once resumed office, but he found the finances of the sect in a terrible state. The debts of the temple stood at 2,480,000 yen. Besides this sum 190,000 yen was missing, money that had been entrusted to the temple for a special purpose; debentures had been issued amounting to 220,000 yen, and there was a sum of 550,000 yen that could not be accounted for. (It is thought that this sum was expended on the agitation against the Religions' Bill). In order once again to replenish the empty coffers, Atsumi was empowered by the Chief-Abbot to collect money, but at the same time reports of the discovery of further debts were continually circulated and the mass of the adherents of the sect had lost all confidence in the men who had piloted the vessel on to the rocks so frequently. The only hope now lies in the carrying out of the proposal of Dr. Nanjō and others to the effect that on no consideration is either of the two great rivals, Atsumi and Ishikawa, to be allowed any power again. That through a series of years the most powerful religious sect in the country should have been kept in a constant state of ferment by the mad jealousy and unscrupulousness of two men is hardly credible, but such is the case. Perhaps there are few countries in the world where this would have been allowed to happen.

* * *

For the information of those who may be interested in the subject we may mention that in No. 9 of the *Shigaku Kai* (the Historical World) there is an article penned by Mr. Abe Hidesuke entitled "The Ōsaka war and Christianity." Under the heading of "The Christian Dainyō" so much has been written in these columns of late on the relations of Hideyoshi and Ieyasu to Christianity, that we refrain from reproducing even in an epitomized form what Mr. Abe has to say on this and kindred subjects. His view is that the policy of both Hideyoshi and Ieyasu, as well as of Nobunaga, towards Christianity was solely guided by political considerations of various kinds and by the desire to neutralize the enormous power wielded by the Buddhists priests at that time. Mr. Abe says that in 1577 the Christian converts numbered 300,000. He publishes a list of foreign and Japanese works which he has consulted on this subject. The Japanese list is as follows:—The *Nagasaki Sōsho* (叢書); Vol. II. of the *Sumpu* (駿府) *Seijiroku*; the 藩翰譜, *Hankanpu*; the *Dainihonshi* (History of Japan); the *Gwaiban Tsūsho*; the *Buhen* (武邊) *Sōho*; the *Yetsu, To, Ga, Sanshūshi* (三州志); the *Ishikawa Bunsho* and the *Dainihon Shiryō* (史料). The foreign list of books contains one written by a Chinaman, Chang, called 東西洋考 *Tōzaiyōkō*.

* * *

In the *Chūō Kōron* Dr. Katō Hiroyuki is stating his views on religion at great length. The essay is still unfinished, but we give the purport of what has already appeared under the headings of the learned philosopher. (1) *Is preaching (Buddhist) simply a means of increasing the number of the superstitious?*—It would seem so. There was a time when Buddhism was sincerely believed in by men of rank and character including ministers of state and even emperors, but during the Tokugawa era as far as the educated classes were concerned, Confucianism took its place and the priests found that there was nothing for them to do. They passed their time in idleness till the arrival of Christian missionaries aroused them at the beginning of the Meiji era. They have talked much about reform, but nobody sees much sign of its being carried into practice. They seem to have sunk to the level of mere religious traders, who by the temples they erect and the use of images and chanting of prayers obtain enough money to live on. (2) *Christianity*

and young people; Buddhism and old people.—Taken as a religion it has always seemed to me that Buddhism is deeper than Christianity, but as an influence over the lives of men there is no comparison between the two creeds. Though Christianity has lost ground in Europe and America in modern times, it still wields enormous power in the West and is of great use to society. But it is hard to see what useful function Japanese Buddhism fulfils here. While young Japanese are naturally attracted by Christianity, Buddhism, has to be content with ignorant old men and women who are willing to pay for guidance to a paradise in which they still believe. (3) *The evil of mixing up religion and learning.*—There are some people who in discussing these subjects do nothing but play fast and loose with the meaning of words. When I speak of religion being necessary or not necessary, I do not mean by religion philosophy nor religion as a mere subject of study taken up by a specialist for learned purposes, but I mean religion as a faith, a guide, and an authority. To me it seems that taken in this sense religion is not needed by the educated, but only by the uneducated (*Gu naru mono ni wa hitsuyō, dōri wo shirite oru mono ni wa muyō*). Taken as a branch of learning, like philosophy, which in many respects it resembles, religion may interest certain minds, but this fact is not to be adduced as a proof of the necessity of religion. Those who are only attracted to religion on account of its connection with philosophy may find what they want in Buddhism, but in the Christian Bible they will find religion only. (4) *To say that anything that a man believes in is his religion is a mistake.*—Since I am known to dislike religion, people often say to me, "Whatever you believe, that is your religion. It makes no difference whether the belief is scientific, philosophical, or what not." If the term religion be used in such a loose sense, then anything and everything in the world can be made out to be connected with religion. By religion I mean the recognised historical creeds like Buddhism, Christianity and Mohammedanism. (5) *The reform of Buddhism is not to be effected by any number of conferences.*—A whole lot of scholars come together and talk grandly about revising the Buddhist creed by substituting one doctrine for another, and the like. All this will do no good whatever. There is only one thing that can revive faith in Buddhism and that is the production of a worthy set of teachers and preachers. As for the doctrines, they had better be allowed to remain as they are.

* * *

Some of the Tōkyō newspapers, after their usual practice of turning mole-heaps into mountains, have attached far too much importance to the Greek Church Kōjimachi affair alluded to in these columns some little time ago. The *Seikyō Shimpō*, which being a Greek Church organ is no doubt in possession of the most reliable information on the subject, writes about it in the following terms: The Kōjimachi Church sent in a request to Bishop Nicolai for the removal of their pastor, alleging that he had misappropriated money and that he had shown himself unsuitable for the post he filled in other ways. Bishop Nicolai, on investigating the affair, found that there had been no misappropriation of money and informed the Christians that he could see no reason for changing the pastor. There were some, however, who persisted in agitating for his removal, stating that there were only seven households in favour of his retention and no less than 107 households who wished him to go. But on the matter being further investigated it was found that there were 98 households in favour of keeping him and 94 households who wished to get rid of him. Bishop Nicolai urged the minority to yield to the majority or to subscribe towards the support of another pastor for themselves. A most just decision. It was a very small affair, and was entirely misrepresented by the newspapers.

* * *

In the Tōkyō *Maishū Shinshi* Mr. Hachiman writes on "The Necessity of having rules for Christian Pastors." He says that all kinds of irregular and improper practices are carried on by certain Christian pastors and that no steps are

taken by churches to deal with these cases. Among pastors, says Mr. Hachiman, there are some who take up all kinds of secular work in order to make money. Some trade either directly or indirectly, and there have been cases of absolute dishonesty and even of adultery committed by pastors.* A case occurred in a certain church a short time ago in which a candidate for a pastor's place came forward and informed the church that the previous pastor had been guilty of adultery, and then asked to be appointed in his place, which was done. There was another case in which a pastor was unable to attend to his duties on account of drunkenness. Though it is true that most churches deal with serious cases of this kind, the practice of allowing pastors to take part in business of various sorts seems to be pretty general. And as regards dishonesty, not long ago a pastor who had resigned his office in order to engage in mining said to me, "If I fail in this enterprise, it will be owing to having become the dupe of a certain pastor of my acquaintance." Then mentioning the name of another pastor he said, "He has laid his hands on two or three thousand yen by deceiving those who were associated with him in a certain mining business." In 1900 there were more than five pastors engaged in secular business, and among them there was one who was guilty of fraud. These all belonged to the Nihon Kirisutokyōkai; but in other sects there are no doubt instances of the same kind of thing. The number of pastors occupied in teaching in schools is innumerable. And this private work (*naishoku*) of theirs is regarded by them as more important than their work as pastors. This is no doubt partly the result of the increased cost of living and the like, but at the same time it indicates a lack of whole-hearted devotion in the men who have entered the ministry of the church, and hence calls for attention from those who are responsible for order and discipline in the churches.

A leading article in the *Tōkyō Maishū Shinshi* discusses in the following terms the general state and the prospects of Christianity in this country. It seems to be a characteristic of all things mental that at first they should awaken great interest and even be received with enthusiasm, but that gradually zeal for them should be succeeded by indifference. Such is the history of Christianity in this country. Those who twenty-years ago were confident of its success are now cast down by observing how many unfavourable symptoms there are. What is the cause of the decline of religious fervour? It seems to me that one great reason of the change that has come over the Christian Church is the fact that in late years the attention of believers has been centred on methods and organisation rather than on the state of the heart. The erection of churches, the establishment of endowment funds for this or that charity, the opening up of new mission stations, the preparation of better reports of work done, and the like, are the subjects that absorb the attention of the churches. We do not say that these things are unimportant, but only that undue importance has been attached to them. They have been exalted into a substitute for Christian zeal and heart devotion. To show how the idea of reliance on money as the chief thing required to make Christianity a success prevails, we may mention that a little time ago a minister who resigned his office to go into business was asked why he left the ministry at such a busy time. He replied that he wished to make 20,000 yen, and that after he had done that he purposed resuming evangelistic work, showing how little of the spirit of Christ he had really imbibed; he was not prepared to forsake all things and follow Christ. The general movement in favour of building finer churches is not to our minds a healthy sign. The human heart needs setting in order to make it a suitable dwelling for the Divine presence: "Ye are the temple of God."

* Since in Japanese in many cases there is no distinction between the singular and plural, it is only right to say that Mr. Hachiman's words may be translated "A Case." But Mr. Hachiman's whole language conveys the impression that the evil he speaks of is not confined to single instances.—(WRITER OF SUMMARY.)

Commenting on the connection of the General Election held in August with Christianity the *Maishū Shinshi* says:—The retirement from the religious world of a man with such antecedents, such learning, such reputation, such popularity as Mr. Yokoi Tokio is like the setting of some great planet with whose perpetual brightness we have become familiar. The following eight professing Christians were chosen as members of the Diet:—Shimada Saburō, Takenokoshi Yosaburō, Ozaki Yukio, Tsuda Kitao, Ishikuro Kanichirō, Itō Shunsuke, Nemoto Sei, and Kataoka Kenkichi. The first three cannot be regarded as real Christians, though their names still stand on Church rolls. The names of the Christians in the First Diet were Kataoka Kenkichi, Nakajima Nobuyuki, Nakamura Eisuke, Katō Katsuya, Yuasa Jirō, Ebara Soroku and Tachi-ishi Ki. Then the *Maishū Shinshi*, after referring to the five last names on the list of elected Christians, says, *Shikashite kono go nin mo yoku sensaku seba, shin ni Kirisutokyō to taru mono wa tada ichi nin ni sugizu*: "On a thorough scrutiny of these five men, we find that only one of them is a real Christian."

It will be remembered that last year a great stir was caused by the publication and circulation by the Home Office of a translation of a Russian work entitled, "The Evils of Representative Government." It seems that a translation of this book has been appearing in the *Seikyō Shimpō*, and that sympathisers with the agitation against the action of the Home Office among the Greek Church converts have been condemning the magazine for giving publicity to views that are considered to be subversive of existing laws and institutions in Japan. To these fault-finders the *Seikyō Shimpō* says:—We are no politicians and have no connection with politics. Among our converts there are Imperialists, socialists, and what not. The fact that we have published a translation of a work that holds up to scorn the abuses attendant on representative government is not to be regarded as an indication that we endorse all that the author of the work asserts. It surely can do no harm to representative government to have its abuses exposed; we should say that nothing could be more desirable than to know the dangers which attend such a system of government. The fact is that we Japanese are far too easily excited over such matters. We are too apt to think that because certain parts of a man's teaching is admired that therefore everything he writes must be accepted as gospel truth. The same kind of agitation is taking place about Nietzsche's writings. It is a case with many thoughtless people of all Nietzsche or no Nietzsche, and many people denounce translators of his works as men who imperil the very foundations of morality. To infer that because we publish translations of the above-named book in this magazine that therefore we sympathize with those who wish to go back to the monarchical despotism which representative government has replaced and would feign see the constitution suspended, is quite absurd. We are not so foolish as to advocate any such course. In following in the wake of the Home Office our object is a very different one from that of this Department.*

The *Fukuin Shimpō* quotes from a speech made by Mr. Wu Ju-lung, the Chinese educationist, on the subject of the worship of the image of Confucius in various schools. Mr. Wu is represented as having said that the enforcement of this rule even in the case of foreigners has prevented many missionaries and others from accepting posts as teachers. Mr. Wu went on to say that unless this difficulty could be got over the enlightenment of China by educational means would be seriously hindered. The *Fukuin Shimpō* asks whether the

* We are not sure that it has been proved that the Home Department's action was rightly interpreted by the politicians who attacked it so fiercely. Many of the abuses of representative government dealt with in the work in question actually exist in Japan and it is reasonable to suppose that the correction of these simply was the object of the Department in circulating a translation of the book, and that they did not aim a blow at representative government.—(WRITER OF SUMMARY.)

same difficulty does not exist here, alluding evidently to the bowing to the Emperor's picture, which takes place occasionally in all government and in some private schools, and it goes on to inquire whether ancestor-worship such as is universally practised in this country is not out of keeping with the civilisation that Japan professes to have accepted. The reform of China, says the organ we are quoting, must begin with the mind of the ordinary Chinaman and must consist of an eradication of fundamental errors like that of the worship of such sages as Confucius and Mencius. Though in the case of the picture of the Emperor to which we bow, the Mombushō has been careful to explain that the act of bowing is in no sense religious worship, in China the image of Confucius is undoubtedly worshipped. The practice ought to be abolished forthwith. It will be remembered that, when at the beginning of the Meiji era the notion that the Shōguns had unjustly usurped Imperial power began to take possession of the minds of leading samurai, an ardent Royalist cut off the head of the statue erected in honour of Ashikaga Takauji, regarding him as the progenitor of the Tokugawa Shōguns, or as the originator of the dual form of government. If we could see in China sufficient zeal to culminate in the decapitation of the image of Confucius, we should begin to think that the awakening of the nation was near at hand. Confucius was, as it were, the incarnation of Chinese conservative thought and China will never escape from its thralldom till she ceases to worship the great sage.

The *Fukuin Shimpō*, under the heading "Divinity Students and Their Occupations," writes as follows:—According to a report issued by the Meiji Gakuin, called *Meiji Gakuin Shingakubu ichiran*, between the 11th and 35th year of Meiji the Divinity graduates numbered 155; 131 of these having graduated in a regular manner from the main school (正科), 8 being quasi-graduates of the same school, 13 being regular graduates of a separate department (別科); and 3 quasi-graduates of a separate department. Out of the above total of 155 those who became pastors or evangelists numbered 85; 11 died; and the other 59 entered various secular callings.

According to a report of the Dōshisha Dimity Students drawn up by Mr. Hachihama the total number of graduates in 24 years—from the 12th year of Meiji to the 35th year was 159. The following table shows the subsequent occupations of these students.

Occupations, &c.	Main School.	Proportions.	Separate Department.	Proportions.
Evangelists and pastors.	16	2.28	40	4.24
School-teachers	21	3.21	14	2.15
Officials	1	0.22	1	0.06
Journalists	1	0.32	1	0.06
Students	6	0.91	4	0.42
Business-men	12	1.54	19	2.20
Died	6	0.91	12	1.26
Subsequent careers unknown	2	0.32	3	0.30*
Totals	65	—	94	—

Thus it is seen, proceeds the *Fukuin Shimpō*, that out of 159 Divinity students no less than 85 went off to other occupations. Mr. Hachihama says that he considers that each student cost during 4 years of their college life 480 yen; so that 160 would cost 76,800 yen. If only those 56 who actually followed the profession for which they were educated be considered, then each of them cost 1,370 yen, and if to the money spent on the students that laid out on the teachers be added, a sum of some 140,000 yen, it turns out that every pastor or evangelist produced has cost about 3,870 yen *Kore, odorokubeki arisama nari*; is the *Fukuin Shimpō's* comment on the above figures.

Dr. Inoue Tetsujirō has just published a new book entitled *Rinri to Shūkyō to no Kwankei* (The Relation of Religion to Ethics.) It covers 164 pages and sells at 40 sen per copy. Dr. Inoue Tetsujirō's views on religion have been

* We have given the figures as they stand in the *Fukuin Shimpō*, but the decimals are all out. (WRITER OF SUMMARY.)

so frequently stated in various forms in these Summaries that a lengthy review of this new work is unnecessary. Though Dr. Inoue writes much on religion, judging from what we read in the various magazines on his views, we should say that among scholars there are few who approve of his theory. As a writer on philosophy, Dr. Inoue has been of immense service to his country, but as Dr. Katō Hiroyuki and others have repeatedly pointed out, on religious subjects he is on the wrong track. In his recent work, a copy of which he has been kind enough to send us, he elaborates the theory that it is possible in this twentieth century for scholars to construct a creed that shall satisfy all ordinary requirements and form a suitable basis for ethics, for he has always argued that ethics does need some kind of religious basis. He says that it is high time that such a creed was constructed in this country, and he tries to show how the thing should be set about. The work is divided into eight chapters, of which the following are the headings:—Chap. I. Introduction. II. Erroneous Views of Writers on Ethics. III. Erroneous Views of Writers on Religion. IV. The Basis of Ethics. V. The Basis of Religion. VI. Religion and Morality VII. A Religion founded on Ideas, that is an Ideal Religion. VIII. The conclusion reached. A supplement follows, entitled, "My Views on the Future of Religion." In Chapter VII. Dr. Inoue gives it as his opinion that Japanese are eminently qualified and furthermore appointed by Heaven to harmonize European and Asiatic thought. He thinks that Europeans have much to learn from Asiatics, specially in the ethical line. In the same chapter he prebonds the view that Buddhism and Christianity are reconcilable and that it lies with the Japanese to set about uniting them. In the supplement Dr. Inoue dwells much on the defects of all existing religions and advises the State to do all it can to prevent their propagation in schools, while he urges the necessity of finding a substitute for them. With Dr. Inoue all religion and all morality is subjective. He contends that the lives of all the great teachers of religion have shown this beyond a doubt, though in each case their doctrines have been perverted by later generations. On p. 164 he says *Seijin* (聖人) *no oshiye wa hikkyō shimpō* (心法) *nari, sunawachi kono kokoro no uchi ni kanzuru tokoro wo moto to shite, iatsuru mono nari. Dōtoku no kiso wa kono kokoro no uchi ni kanzuru tokoro ni aru nari.*

* * *

Under the title "The Religious World of the Future," the *Keisei* expresses itself as follow: Three things are specially needed to make religion a success at the present time. I. A number of broad-minded, sharp-witted men of character who are endowed with a philosophic spirit. II. Teachers who can apply the truths of religion to men's various needs and who can make religion intelligible to ordinary people. III. Men who can convert religion into a stimulus that shall further the progress of every good work. Under these headings Mr. Matsumura Kaiseki, for he is evidently the writer of the article, says 1. The old theology is of no use. The arbitrary assumption that Christianity has a monopoly of truth can no longer be entertained. In future it will prove highly important to the success of religion that its representatives should bring its doctrines into harmony with man's experience and general views of human life. I am a believer in Christianity, but in a Christianity that progresses with the progress of the world. In the possibility of constructing a new creed by blending elements derived from various sources I do not believe. A religion must have an historical past; but, though the same in name the Christianity of the twentieth century is not in many important particulars the same as the Christianity of the second century. Those theologians who do nothing but proclaim Church doctrines that are nearly 2,000 years old are to be regarded with pity and scorn. It is not to be supposed that Christ revealed all the truth that he knew to his ignorant and dull-witted disciples. Did he not tell them as much when he said:—"I have yet many things to say unto you, but ye cannot bear them now." Were not his disciples always misunderstanding him?

How was it possible that he could disclose to them the deeper truths of religion? To realise that there are fields of truth outside Christ's teaching, as Mr. Ebina Danjō seems to have done, is most essential in a teacher of religion. II. Theology is quite unintelligible to ordinary people. We want a number of men, like Messrs. Honda Yōichi and Miyagawa Tsuneteru, who are capable of making religion interesting to ordinary folks by the use of illustrations, comparisons and the like. Above all it is desirable that the running down of other creeds should be avoided. People who do this are supposed to be very zealous Christians, but this is a practice that has been carefully avoided by successful evangelists like Moody. III. Religion must not be confined to the cloister and the hermit's cell. It must figure in all the great reform movements of each successive age; as in the past it took a leading part in bringing about the abolition of the slave trade, the overthrow of various forms of unjust despotism and in the cleaning of the world's many Augean stables.

THE DOLL SHOW.

An exhibition of Dolls on such a scale as that devised and organized by Mrs. McWilliams and her assistants, Mrs. Mollison and Mrs. Baker, is quite a novel undertaking for Yokohama, yet the show which opened on Thursday and continued till Friday evening, with its adjuncts, side-shows, decorations, etc., was presented to the public complete in every respect—as if its promoters were accustomed to carry through that sort of undertaking every day of their lives. Apart of course from its attractions the affair owes much of its success to the fact that its object is of a charitable nature, the proceeds being intended to aid the orphan children in the Convent. Naturally the preparations for this event have been going on for some time, yet it seems marvellous that even months of ingenious designing and delicate handiwork could have produced such figures as many of those on view at the Public Hall. It is a pity, therefore that owing to the fact that prizes are to be given by vote we are unable to mention the names of those who dressed the most conspicuously effective creations, for, human nature being what it is even in the matter of dolls, such mention might influence votes. But there is this consoling reflection that those who win prizes may flatter themselves that they have won on their merits.

The show occupied both large hall and vestibule, the dolls being arranged on tables in the centre of the former. The vestibule, which is very tastefully decorated with evergreens, is given up to the uses of various stalls, which may without offence be styled side-shows. There is a Cushion Stall, presided over by Mrs. Read and Miss Ross, which are to be disposed of by a lottery in which every subscriber will get a prize. There are 175 cushions of all hues and shapes, and the stand along which they are ranged and heaped up in multicoloured variety makes a very brave show indeed. Confronting the cushions there is a Fish Pond in which people are supposed to fish—and do fish with more or less glittering results. Miss Mabel Sharp and Mr. S. Wheeler promote the efforts of those who would angle,—and collect the fees. A Boys' Bran Pie faces a Girls' Bran Pie, and both are under the auspices of Miss Waddilove and Mr. Lammert. It is a lucrative enterprise, the Bran Pie business. An Aunt Sally of sorts is engineered by Miss Frixie Sharp and Mr. Bathgate. These complete the list of industries carried on in the vestibule, and if any one should entertain the thought that his visit to, say, the Fish Pond has not resulted in such a catch as he might have expected, he may be advised to wait till he gets inside among the Palmists and Picture Galleries. If they do not satisfy him nothing will.

In the large hall between the entrance doors is the flower Stall of Mrs. Mollison which, apart altogether from its capacity of adding to the treasury, is a very charming and effective decorative adjunct of the show. In attending to those

who desire to patronise this fairy-like kiosk Mrs. Mollison is assisted by Mrs. Schmid, Misses Page, Miss Baker, Misses Strome, Mrs. Happer, Mrs. Whitney, Mrs. Wilson, Miss Mollison and Miss McWilliams. Turning from the Flower Stall the visitor is brought to the Lemonade and Punch Stall, a neatly decorated stand where Mrs. Hubbard dispenses lemonade and punch to thirsty sight-seers; and in the opposite corner Mrs. Baker and Mrs. Skrimshire preside over an irresistibly inviting Refreshment Stall. Passing up the hall and for the time ignoring the crowds of dolls clamouring for attention one reaches the stage, whence it is seen that the hall is most effectively if not lavishly decorated, chiefly with evergreens of which many festoons and chains depend from the roof. There are four stalls all handsomely and brightly fitted up; of these two have been noted. There remains the Candy Stall, at which Mrs. E. C. Davis, Miss Rogers, and Miss Poole dispense at a price to persons on their way to the adjacent "Cosmopolitan Museum of Art," where it is understood sweet things greatly alleviate the enjoyment with which the pictures, statuary, and portraits are viewed. This Museum, on its merits, seems to call for some comment, but perhaps the less said about it the better. In the opposite corner is a Fancy Stall which pilgrims to the Hindu Palmist (close by in a grotto off the stage) have to pass. Thus they are enabled (by the assistance of Miss Florence Bramhall, or Miss Sybil Howard, or Miss Leslie McWilliams) to invest in large quantities of fancy work at prices which compare very favourably (comparatively) with those of the Prognosticator to whose fancy work they are about to subject themselves. The Palmist's den is gaily fitted up in colours; a brass censer hanging above the door threatens the head of the visitor and a red electric lamp sheds a discouraging glare upon him. The furniture consists of a lounge with cushions for two and a weapon which might be described as a yataghan, but is more probably a kris, rests upon a stool turned upside down to show that it is not engaged. Of the Palmist and the fortunes which he tells the less said the better.

Of course the Dolls are the main feature of, indeed they *are*, the show, but really it is impossible to do more than mention a few of them. There are three hundred: groups of small dolls and crowds of larger dolls, with the quite big dolls standing in commanding places here and there. At the ends of tables dolls in variegated dresses smile sweetly and uncritically at one another, and all seem sublimely oblivious of the circumstance that the Queen of Holland (scale: about two inches to the foot) splendidly attired, promenades her particular table with much dignity and eight young ladies all dressed in various costumes to represent the different states of the Netherlands. It is neither bold nor hazardous to assert that Her Majesty of Holland will receive more than a few votes. Another lady who will doubtless attract more attention from the public than from her neighbours is the Countess of Exeter, a blonde lady of fine presence and a most beautiful garnet-ruby-claret robe which must have cost something. On her head she carries a coronet; behind her streams the purple glory of her train and a gauzy tulle veil; lace of the filmiest kind edges her, all made by the hand that costumed her,—and she is largely trimmed with white fur. With clothes such as she has on the Countess ought to be a warm favourite. This lady and the Queen of Holland will enjoy the sensation of being raffled for, as also will San Toy, a beautiful figure exactly representing the dress worn by Mrs. Mollison in the play of that name. To be raffled also is a battle scene in South Africa. There are other prominent dolls which can barely be mentioned—for instance Madame de Sevres; an Andalusian dancer, and a personage of somewhat large proportions very handsomely attired in a costume which we should hesitate to give a name to. But there are some of the smaller dolls which will doubtless claim attention especially from lady visitors. Many of them are most beautifully dressed, and these not in all cases the most gaudily covered figures. Had

it been possible to give the names of some at any rate doubtless more interest would attach to a description of them; as it is the chief feature of the show, the Dolls, have probably been accorded disproportionately scant notice.

It remains to be said that the show opened at 2.30 p.m. and that a capital business was done during the afternoon, the band of the *Kentucky* playing a number of selections.

A Promenade Concert was given, on Thursday evening which was largely attended. An additional attraction was the appearance of young ladies infancy dress.

The following was the programme:—

1. Overture..... "Martha"Flotow.
The Orchestra.
2. Song
Mr. Atkinson.
3. Selection..... "Florodora"L. Stuart.
The Orchestra.
4. Ballad..... "Sally in our Alley"Carey.
Mr. N. G. Maitland.
5. Intermezzo.... "Cavalleria Rusticana"Mascagni.
The Orchestra.
6. Scena..... "The Picanninies"from
"The Runaway Girl."
Messrs. McChesney and Thorn.
7. Mexican Serenade ... "La Paloma"C. Yeadrir.
The Orchestra.
8. Duet..... from "Lily of Killarney"Benedict.
Messrs. N. G. Maitland and Atkinson.
9. Comic Song
Mr. G. G. Brady.
10. Hungarian Dance.....Brahm.
The Orchestra.

FOOTBALL.

THE NAVY VERSUS Y. C. AND A. C.

The Rugby match between officers from H.M.S. *Goliath* and *Rambler* and a fifteen of the Y.C. and A.C., originally arranged for Saturday last, but postponed owing to rain, came off on Thursday afternoon in delightful autumnal weather. Yokohama began by pressing the visitors well into their territory, and keeping them there, the Navy three-quarters never getting a chance to break away. After fifteen minutes of play S. Wheeler—who played a splendid game all through—scored a try which F. O. Stuart failed to convert, the angle being awkward. Then the Navy woke up and tried to equalize but in this they were unsuccessful up to half-time, though once or twice Yokohama were hard pressed. The great fault on both sides was in passing, the men hanging on to the ball too long, but of course allowance must be made for the lack of practise of the players at the very beginning of the season. On change of ends, with the wind very slightly in their favour, the visitors made a vigorous attack on the home lines, McKinley getting away with the leather time and again, to be stopped at the critical moment by Mitchell or the three-quarters. At length McKinley got the chance to equalise, after a tricky little bit of play; Aldrich took the kick, but failed to make a goal. After this the pace grew warm, both sides doing their best to notch another point, and the leather travelled rapidly up and down and across the ground, while the passing on both sides noticeably improved. From a "scrum" in centre field, S. Wheeler secured the ball and dodging all his opponents in a capital run along the right wing he secured the second try for his side, amid loud applause. Time was getting short but this only seemed to rouse the energies of the players, the game getting more exciting as it drew to its close. A "scrum" right on the goal line almost resulted in another touch-down by Yokohama; but then the whistle blew, leaving the home side victors by two tries to one.

The game was very interesting to watch and Wheeler covered himself glory; Mitchell at back made a very favourable impression, while F. O. Stuart, K. F. Crawford and H. E. Hayward were active. Among the Naval men, McKinley and Aldrich did meritoriously.

Mr. J. H. Bathgate was referee.

NOTES FROM NEGISHI.

As we are now within measurable distance of the Race Meeting a few lines devoted to the condition and prospects of the probable competitors may be of interest to sporting readers.

I may preface my remarks by noting that the much-discussed "starting gate" is fixed up and now on view at the furlong post, though it will not be in evidence at this meeting. The Committee, I think, are acting wisely in postponing its use till the Spring as it will be necessary to include the practice of starting by this gate in the training curriculum if satisfactory results are to be looked for.

In the "All-comers" class we have two new importations Lady and Imperial Mistral II, though I do not think either will beat Hawfinch or May Crown. The other competitors are The Coronet and the veteran country-bred Saikio, both, I note, under new ownership.

May Crown is being given far too lenient a preparation to suit my fancy, but Arakawa, late Hawfinch, is doing well and though pessimists point to his weak back and predict a breakdown, I am of opinion that in the hands of his painstaking trainer he will beat all-comers on the first day, this race being scale weight whereas the remainder are handicaps.

The next class, Subscription Australians of 1900-1901, brings us to a lot of old favourites:—Faule Grete, Fourree, Madge, Ojosama, Tasmanian, The Orb, Tenryu, and Eleve I. With one exception all are completing a satisfactory preparation, the exception being Faule Grete who has been off colour recently but is well again now. I expect to see the best racing and closest finishes take place amongst this select crowd, and at present I incline to Faule Grete up to one mile and to Madge for longer distances.

Subscription Walers of Spring 1902.—Fujikawa is not showing anything like the form she exhibited in the Spring. She gallops short and seems to have lost all her old vim, and under her penalties for previous victories I expect her to be well beaten by several. Patsie has made rapid strides since May last and is sure to be returned a winner. Beetle and Desdemona will give their supporters a good run for their money and these complete the list of likely winners.

Amongst the new Subscription Walers are a number of useful animals and the majority have taken kindly to the game. With griffins, however, many changes may be expected during the next ten days and I shall at present leave them severely alone.

After a lapse of four years the Committee have secured another lot of country breds. There are ten in this class and they promise good racing, but like the new walers changes will occur, so I shall not waste time over them now. A peculiarity of these youngsters is that eight out of the ten are greys.

This brings us to the last class. China Pony racing has been gradually dying out, and now but seven animals are left. Three races only are given to them, one a $\frac{3}{4}$ mile scale weight and two handicaps—all for amateur riders. Under their old names most of them are well-known,—Aberdeen, Sunrise, MacMorse, May-be, Standard Rose, and MaxWillem, with the little known Etourdi. For the $\frac{3}{4}$ mile on the first day Sunrise looks a veritable snip, and if not too heavily weighted will make a bold bid for victory in the handicaps. Aberdeen is bound to receive special attention from the handicapper owing to his excellent performances in the Spring, but even then, given that he is fit and well, he will be a hard nut to crack. MacMorse is another popular Pony that is remarkably fresh and well, but his owner fears to commence the indispensable fast work owing to the pony having a weak leg. May-be is dead lame, and the remainder I have no liking for. Q.

Ishida Kokichi, a clerk in the service of the Osaka Post Office, was arrested on Nov. 5th on a charge of having stolen a cheque for yen 80, which he extracted from a registered letter posted at that office to be remitted to a point in Kyushu.

YOKOHAMA LITERARY SOCIETY.

Despite the counter attraction of the Bachelor's Ball, there was a crowded attendance at the fortnightly meeting of the Yokohama Literary Society at Van Schaick Hall on Friday evening. The paper by the President on "Sea Customs, Sea Words, and Sea Songs," was well received. The musical portion of the programme was particularly charming. Miss Orth's pianoforte solo won hearty applause, and Mons. P. Launay received a warm welcome on his reappearance on the public platform, from which he has been absent too long. His first song was of his own composition, to a setting by Gangloff, and it proved a most delightful *chanson*; his second was Gounod's pretty "Medje." Mr. Brady's recitation and Mr. Hayward's song both partook of a nautical character and were loudly applauded. Mrs. James Walter brought a delightful evening to a close with two very beautiful songs. She was in splendid voice and richly deserved the praise awarded. The full programme was as follows:—

Part I.

Paper.... "Sea Customs, Sea Words and Sea Songs,"
Mr. A. Bellamy Brown.

Part II.

- 1—Pianoforte Solo.... "La Truite"Schubert.
Miss Orth.
- 2—Songs.... "O mes Rêves d'Amour"Gangloff.
"Medje"Gounod.
Mons. P. Launay.
- 3—Recitations.... "The Lifeboat"G. R. Sims.
"Uncle Podger"J. K. Jerome.
Mr. G. G. Brady.
- 4—Songs... (1) "At Thy Casement" Meyer-Helmund.
(2) "Love is Spring"Herbert.
Mrs. James Walter.
- 5—Song..... "The Skipper's Flag"O. Barri.
Mr. H. E. Hayward.

THE PLAGUE.

The business of burning the houses in the isolated area at Yokohama was resumed on the afternoon of Oct. 31st when some 30 buildings in the central portion of the area were reduced to ashes. In contrast to the previous occasion, there was no excitement, nor was there a large crowd of spectators.

Another case of pest was reported on Oct. 30th on Kanagawa fort, the victim being a seaman named Saito Sankichi who formerly lived at No. 20, Gochome, Kaigan-dori. The patient was at once taken to the Manji hospital.

The burning of houses in the isolated area at Kaigan-dori, Yokohama, was resumed on the afternoon of Nov. 1st despite the downpour of rain. Great difficulty was experienced in the matter of setting fire to the debris, but by the use of kerosene oil the task was finally accomplished with success, resulting in the burning of thirty houses. So far as we can learn, nearly all the houses in the pest-affected district have been purchased by the Authorities for yen 27,061, at the rate of yen 11.60 per *tsubo*. The negotiations between the Authorities and the owners of the Horai-ya hotel and a few other premises are still dragging on owing to a difference in the prices proposed by either side, but the matter will be settled in some way or other in a few days. The proprietor of the Horai-ya has proposed to give up his premises for yen 9,500, and the Toyo Kisen Kaisha, originally demanded yen 18,000, (but reduced the amount to yen 9,000) for the destruction of its buildings, while the purchase price offered by the City Authorities is yen 3,415. The rats captured in the isolated area up to the end of October numbered 495, of which six were found to contain pest bacilli. From Oct. 9th to the 31st of the same month rats purchased by the Authorities outside the area numbered 51,081 and no bacilli were discovered in any of them. The fourth drawing of the rat lottery will take place in the Assembly Hall on the afternoon of Nov. 4th.

A case of pest is reported to have broken out in the harbour of Sakade Ayauta district, Kagawa Prefecture. It appears that the victim was a member of the crew of a vessel now lying in that

harbour and that he succumbed to the malady on Nov. 2nd on board the ship. The local authorities have adopted strict sanitary measures against the spread of the plague.

The business of burning houses in the isolated area, Yokohama, was resumed on Nov. 5th and continued throughout the day. On the previous day two coolies, while at work, were badly injured by falling debris and taken to the nearest hospital.

The burning of houses at Kaigan-dori, Yokohama, was resumed shortly after 9 a.m. on Nov. 4th and occupied the whole of the afternoon. The business will be concluded by Nov. 6th when all the buildings in the isolated area are expected to be reduced to ashes. No fresh case of pest has been reported.

The burning of houses in the isolated area at Yokohama was resumed on the morning of November 6th under the direction of the Isezaki Police. Nearly all the houses have been demolished and reduced to ashes, and only some 20 houses now remain untouched, including the building of the Toyo Kisen Kaisha, the Horai-ya, etc. On the 5th the unfortunate people at the Kanagawa fort were all released, after undergoing thorough disinfection, with the exception of about 60 persons who are still obliged to remain on the fort owing to the fact that a case of pest has recently appeared in premises occupied by them. With regard to a consignment of over 1,500 piculs of raw cotton stored in the godown at No. 20, Gochome, Kaigan-dori, it has been arranged between the Authorities and the Mitsui Bussan and several other consignees that the goods will be taken out and conveyed to the Nagahama Quarantine Station for disinfection, the expenses arising therefrom being borne by the consignees. Upward of yen 1,000 is said to be required for the purpose. About 500 piculs had been taken to Nagahama up to Nov. 6th. The fourth drawing of the rats lottery took place in the Assembly Hall on the 5th with the following results:—First prize, yen 30, by No. 1,268; second prizes, yen 10 each, by Nos. 9,760 and 1,009; third prizes, yen 5 each, by four persons, etc.

The City Authorities desire to acknowledge receipt of the following sums contributed in aid of the poor people evicted in connection with the outbreak of plague in Yokohama:—

	Yen.
F. Schroeder, Esq.	5
Imperial German Vice-Consul W. Hagen...	10
E. H. Hobart-Hampden, British Pro-Consul	15
China and Japan Trading Co.	100
H. Klingen, Esq., Netherlands Consul.....	25
Ferris Seminary	25
Marquis C. Nembrini de Gonzaga.....	10
Pierre Bure, Consul-General de Belgique...	10

SHIPPING CASUALTIES.

The British barque *Aberystwith Castle*, Capt. F. Nilsson, arrived at the Yokohama quarantine station late on Saturday night, being towed from Cape Sagami by the new tug belonging to the Yokohama Dock Company.

This vessel left Palelee, Celebes Island, on Sept. 21st en route to Humboldt Bay, California; but on Oct. 14th, when about 150 miles off the Japan coast she encountered a severe typhoon, during which storm the vessel lost her fore yard; all topmasts, yards, sails and rigging were carried away, leaving the vessel nearly a wreck. Captain Nilsson deserves much praise for bringing his ship to this port, while in her present condition.

The British steamer *James Brand* arrived in Hongkong on Oct. 22nd with the German steamer *Tai Lee* in tow, having picked that vessel up 500 miles from port. The *James Brand* left Shanghai on Oct. 12th for Samboe (Singapore), and on her way south experienced the customary north-east monsoon. When in lat. 14.22 N. long. 122.43 E. on Oct. 18th, she picked up the *Tai Lee* disabled, with over 600 Chinese passengers on board. The master of the German steamer stated that he wanted to be towed to Hongkong. Ropes were accordingly run away and towing

hawesers were connected. A fresh monsoon was blowing at the time. On Oct. 19th the towing hawesers parted and with much difficulty were re-connected after seven hours' work. Owing to the heavy sea that was running, while this operation was being carried out, lines had to be made fast to each ship to keep them in position. On the following day the *James Brand's* patent steering-gear gave out, and the engines had to be eased and the ship put under hand gear while the necessary repairs were carried out. This was successfully accomplished in the end, and both vessels arrived without further mishap in Hongkong after five days' towing, a distance of 500 miles.

News was received here this morning (said the *Kobe Herald* of Oct. 30th) of the stranding of the N.Y.K. steamer *Idzumi Maru* which left here for Bombay via ports yesterday. The accident happened at Sasajima near the entrance to Onomichi in the Northern Passage of the Inland Sea at 8 o'clock last night. Mr. Shimamura, a Vice-Manager of the company's local office, left for the scene by train early this afternoon. The *Idzumi Maru* with Mr. Paxton, Superintending Engineer, and salvage apparatus left here for the scene of the disaster at 4 o'clock. It is believed that the ship struck a submerged rock. Unfortunately the accident occurred at or near high water. It is however expected that the ship will be refloated soon. The vessel, we learn from Mr. Yatsui, Manager of the office at this port, is only slightly damaged. The cargo is reported to be uninjured.

The scene of the accident is not far from where the U.S. steamer *Morgan City* was wrecked.

THE LATE MR. R. T. HEAD.

There was a widespread feeling of regret in the Colony, says the *China Mail* of October 27, when it became known that Mr. Robert Trevelyan Head, of the firm of Messrs. Erich Georg and Co., had died at the Peak Hospital on Saturday night. Mr. Head was one of the best known young men in the Colony, and his urbanity and never-failing good spirits made him a general favourite in a wide circle of friends, civil, naval and military. The son of an Exeter solicitor, Mr. Head was educated at Rugby School, and came out to the East in 1888. After being with Messrs. Cornes and Co., Kobe, for four years, he joined the Kobe office of Messrs. Dodwell, Carlill and Co., and four years later became an assistant to Mr. W. H. Gill. In 1898, he came to Hongkong, and remained in the employ of Messrs. Douglas Lapraik and Co. until the early months of this year, when he became associated with Messrs. E. Georg and Co. as a share, shipping and general broker. In 1892, he went north with the Peking Legation Relief Expedition as one of Reuter's correspondents, and a bad attack of dysentery while in North China so undermined his constitution that he had never been in robust health since then. His geniality never deserted him, however, and his cheery hail as he affixed the Japanese term "san" to his friends' names was ever a welcome one. It is little more than a week since he was about the city, and few knew that he was seriously ill till a day or so before his death, which was due to liver complaint complicated with malaria.

LAW CASES.

NAKAMURA v. SINGLETON, BENDA & CO.

In the Yokohama Chiho Saibansho on Friday morning, before Judge Kano, was heard an action brought by Mr. Nakamura Shingoro, of Nichome, Masagocho, Yokohama, against Messrs. Singleton, Benda & Co., No. 96, Yokohama, claiming yen 120.

Mr. Sekijima appeared for plaintiff and Mr. Takahashi for defendants.

Mr. Sekijima said that the sum claimed by his client was for salary for August and September last year.

Mr. Takahashi said that on August 31st last year plaintiff was dismissed from the employment of defendants on condition that yen 60, the salary for the month of August, should be paid him. Defendants, however discovered that the plaintiff, while in their service had committed certain dishonest actions with the result that the business of defendants was considerably affected. Under the

circumstances, defendants filed a suit against plaintiff in the Yokohama Chiho Saibansho some time ago. The Court found Nakamura guilty. Not satisfied with this verdict Nakamura appealed and the matter is now before the Tokyo Appeal Court.

It was arranged to summon as witness Yamaguchi Rui, a Japanese woman, who knew the circumstances of the case. The proceedings were adjourned until Nov. 12th.

BRETEL v. JOVANSSEN.

In the Yokohama Chiho Saibansho on Friday afternoon, before Judge Kano, was resumed the hearing of the action, adjourned from Oct. 27th, brought by Mrs. Rachel Bretel (Mrs. Jovanssen) against Mr. Adolphe Jovanssen, formerly manager of the Club Hotel, Yokohama, asking that the latter be made to recognize the invalidity of their marriage.

Messrs. Onashi and Otsuka appeared for the plaintiff and Mr. Ideura for the defendant.

As arranged at the previous sitting Mr. H. Victor Gielen, formerly Vice-Consul of Denmark in Yokohama, was examined as a witness. In response to the Judge's questions, witness said he was formerly Danish Vice-Consul in Yokohama.

The Judge—Have you ever been asked by Mrs. Jovanssen and Mr. Jovanssen to ascertain whether their marriage was legal or not.—Yes, I have. But I could not gather sufficient evidence to enable me to pronounce their marriage legal.

The Judge—Which of the parties applied to you first?—Well, Mr. Jovanssen, the defendant, came to the Danish Consulate in April this year and asked me to have Mrs. Jovanssen registered as a Danish subject. I could not accede to this request owing to the lack of sufficient proofs.

The Judge—On what point did you reject his request?—Because of the absence of official documents necessary to prove a marriage. Mr. Jovanssen, the defendant, was registered as a Dane in the Danish Consulate, Yokohama.

The Judge—Have you ever been applied to by the plaintiff, Mrs. Jovanssen, to register her as a Danish subject? And when?—On the same day Mrs. Jovanssen applied for the registration; it was in the middle of April this year. But her application was rejected as stated above.

The Judge—According to the law of Denmark, what steps are necessary for a couple to establish the validity of their marriage?—Well, they are numerous. I can't tell exactly unless I refer to my books.

Mr. Ideura to witness—Was the marriage certificate between the parties ever shown to you?—Mrs. Jovanssen showed me a copy of the marriage certificate either at the end of May or the beginning of June. This was in connection with her application for registration.

The Judge—You have that copy yourself?—I only saw a copy of the certificate said to have been obtained at Stockholm, but the official process necessary to complete the marriage was neglected by the parties.

The Judge—Supposing that a lady was married to a Dane can she become a Danish subject in accordance with the law of Denmark?—Yes, if the marriage is properly conducted.

Mrs. Jovanssen was next examined. Replying to the Judge's questions, she said that she sought the opinion of Mr. Litchfield in regard to this case and her marriage certificate was the only document handed over to him. She had nothing else. She said that the certificate was afterwards lost.

Mr. Ideura said that if this was the case he should like to apply to the church in Copenhagen to obtain a copy of the marriage certificate and he asked for a postponement of the case for a few months.

It was, however, arranged to refer to a copy of the marriage certificate now in the hands of Judge Danno, who has charge of the other case in which the parties are concerned.

The Judge finally announced that the Court would make further investigations into the statements of plaintiff and defendant.

The proceedings were adjourned until Nov. 12th at 1 p.m.

CLAUSEN v. KOMOR.

In the same Court on Friday, before Judge Kano, the suit brought by Mr. Carl Briand Clausen, No. 66, in the former Settlement, against Mr. Seigfried Komor, No. 213, Bluff, Yokohama, was resumed. The plaintiff claims *yen* 1,231.71 said to be balance of a bill for repair of the building occupied by defendant.

Mr. Ohashi appeared for the plaintiff and Mr. Sato for the defendant.

Mr. Ohashi said the fact that the bill of costs was larger than the original contract provided for was due to an alteration being made in the first design, a new plan differing from the original having been adopted in compliance with defendant's request.

The Court announced that Judge Naruse would proceed to the scene and inspect the state of things in a day or two.

Mr. Sato said his client had made no such contract as stated by plaintiff and moreover the condition of the building was not in strict conformity with the second design.

The case was then adjourned *sine die*, after the Court had arranged to summon as witness Yamamoto Kanesaki, who had been concerned in the work.

THE HIOGO INTERNATIONAL HOSPITAL CASE.

In the Kobe Chiho Saibansho, on Oct. 30th before Judge Suyenaga, the hearing, adjourned from the 23rd Oct. was resumed of the action brought by Messrs. Hiramori and Takatsu against Mr. C. J. Hall, Chairman of the Board of Trustees of the Hiogo International Hospital, and the other trustees, for the surrender of the ground on which the Hospital building stands. Letters were put in showing that the attention of the trustees had been called to the necessity of renewing the lease at an increased rent and also correspondence to prove that the contract had really been renewed. Discussion arose as to whether the Hospital was a juridical person and the case was adjourned pending an interlocutory judgment on the point.

CLAIM FOR WASHING.

In the Kobe Chiho Saibansho on Oct. 30th a claim for *yen* 8875, for washing, brought by a Japanese against Mr. A. N. Hansell was tried. Plaintiff prayed the Court for an order for the amount claimed, with costs. He stated that he washed 315 articles for defendant up to the 23rd June last. The charge agreed to was 2.5 *sen* per piece. Defendant refused to pay the amount, alleging discrepancies in the count of articles and demanding return of a table-cloth, which plaintiff declared had been duly delivered. The case was adjourned for the evidence of plaintiff's amah.

"JAPAN DAILY ADVERTISER" v. ALLEN.

In the Yokohama Chiho Saibansho on Tuesday morning, before Judge Kato was heard an action brought by the *Japan Daily Advertiser*, No. 74, against Mr. George Allen, of the Oriental and Occidental Trading Company, No. 31, Yokohama, claiming *yen* 143 alleged to be an advertising charge. Mr. Ideura appeared for plaintiff and defendant attended in person.

The Judge asked the defendant why he had not engaged Counsel, intimating that the arguments in the Court must be in the Japanese language according to the requirements of Japanese law. Defendant replied that he should like to conduct the case through a Court interpreter. This, however, was not granted by the Judge, who said the interpreters of the Court were not at the disposal of either plaintiff or defendant. The proceedings were adjourned until Nov. 15th at 10 a.m.

JOVANSEN v. CLUB HOTEL.

In the Yokohama Chiho Saibansho on Tuesday morning, before Judge Kato, was resumed the hearing of the suit brought by Mr. Adolphe Jovansen, formerly manager of the Club Hotel, against the Club Hotel, Yokohama, claiming over *yen* 18,000 damages alleged to be due through his sudden dismissal from the post of manager. Mr. Ideura appeared for plaintiff and Mr. Sawada

for defendants. Mr. Hattori acted as interpreter.

Mrs. Rachel Bretel Jovansen was examined as a witness.

As soon as the witness was called before the Bench, Mr. Ideura raised a protest against her examination, contending that in view of her having filed a suit against the plaintiff to recognize the invalidity of their marriage her statements as a witness could not be admitted, in this case.

Mr. Sawada said that the plaintiff's Counsel had no right to raise any such protest.

The Judge announced that the examination of Mrs. R. B. Jovansen as a witness would be proceeded with.

In reply to questions from the Bench, the witness said—I am now a guest of the Club Hotel and have no occupation at present, having been disengaged from the post of matron of the Hotel last month. I am a French subject. I married Mr. A. Jovansen on March 20th, 1890, and have since lived with him. We stayed in England for 12 years.

The Judge—While in London, what profession did Mr. Jovansen pursue?—He was waiter at various hotels for many years and finally became the manager of the Hotel Metropole, London, in 1899. He served in that capacity for one year and five or six months. I always lived with him. He left the Hotel Metropole on Sept. 22nd, 1900.

The Judge—For what reason did he retire from that service?—He was not clever enough to manage a big hotel. He was forced to resign his post. I know the reason for it.

Having been asked by the Judge to speak more particularly, she said—He was dismissed because he was immoral. For instance, on one occasion a gentleman, with two daughters, was staying at the Hotel Metropole. He (Mr. Jovansen) insulted one of the daughter, aged 14 years, with the result that she was taken ill. Nor was this all. He had immoral relations with every female servant in the Hotel. The above facts were made known to me by others and I think they are true. He never kept a staff for more than a week or so. An intimation from the girls whom he insulted was subsequently received by the Board of Directors of the Hotel and I actually saw the letter myself.

Kirigaya Tetsu, a Japanese amah attached to Mrs. Clyde, was next examined as a witness. She stated that she was employed by Mrs. Clyde from Dec. 1st last year to May 31st this year. When she was first engaged by Mrs. Clyde the latter was staying in the Club Hotel. The foreign lady subsequently leased a house at No. 133, on the Bluff. Among the visitors to No. 133 were Hopkins, a gentleman named Smith, and a few others. Mrs. Jovansen was among the lady visitors.

The case was adjourned until Nov. 18th at 2 p.m.

MIZUTANI v. SINGER MANUFACTURING COMPANY.

In the same Court on Tuesday afternoon, the suit brought by Mr. Mizutani, of Yoshidamachi, Yokohama, against the Singer Manufacturing Company, No. 80, Yokohama, was resumed before Judge Kato. Plaintiff claims from defendants recovery of one thousand *yen*, paid as bargain money, with six per cent. interest from April 1st this year until execution of judgment.

Mr. Ideura appeared for plaintiff and Mr. Akiyama for defendants.

Mr. Ideura said that the dispute between the parties referred to the speed of machines driven by foot, and not by the application of either electricity or steam. Prior to the action being brought against the defendants the plaintiff approached them and expressed a desire to the effect that he would like to take delivery of the 20 sewing machines at a discount of 30 per cent., but the defendants proposed to make a discount of 1½ per cent. only. Under the circumstances, the matter could not be settled privately.

Mr. Akiyama contended that his clients had not made any such proposal in the affair. On the contrary, the plaintiff was the first to come and propose to take delivery of the articles at discount rates.

Mr. Ideura said Sugimoto Shokichi, formerly an employé of the defendants, was responsible for

the signing of the contract, for he told the plaintiff that the machine could develop a speed of 1,200 stitches per minute. The plaintiff broke the contract in accordance with Art. 543 of the Commercial Law.

Mr. Akiyama then brought a counterclaim against the plaintiff. He asked the Court that Mr. Mizutani be ordered to pay *yen* 2,800 with six per cent. interest from March 17th this year and also storage at the rate of three *yen* 24 *sen* per month. He said that the contract was not yet formally broken and in view of this it was unreasonable for Mr. Mizutani to claim recovery of *yen* 1,000, which was paid as bargain money to the Singer Manufacturing Company when the contract was signed. That the machine could develop a speed of 1,200 stitches was not entered in the contract, the matter being only mentioned in a supplementary note attached to the contract. This was apparently due to the fact that his clients had made an explanation as to the capacity of the machine and not paid much attention to enter it in the transaction.

Judgment was reserved until Nov. 8th at 1 p.m.

SUMI v. VANTINE & CO.

Judgment was delivered in the Yokohama Chiho Saibansho on Oct. 31st, by Judge Kano, in the case of Mr. Sumi Rikichi, of Osaka against Messrs. Vantine & Co., No. 268, Yokohama, claiming *yen* 8,550.050 being damages for non-delivery of 300 Peeress bicycles. Defendants were ordered to pay to plaintiff *yen* 3,000 of the 8,550.050 claimed, nine-tenths of the costs of the case to be borne by defendants and the remaining one-tenth by plaintiff.

Particulars of the above case appeared in the *Japan Mail* of Oct. 30th.

JONES v. BENNEY.

The hearing of the case in which Mr. E. B. Jones, No. 179, sued Mr. C. T. Benney, No. 37, Yokohama, claiming *yen* 20, which was expected to be resumed on Nov. 5th in the Yokohama Ku Saibansho, has been postponed indefinitely owing to the illness of Judge Hasegawa.

LITERARY GOSSIP.

There were hopes at the beginning of the year that the autumn would see the completion and publication of Mr. Morley's "Life of Gladstone." But Mr. Morley has found the sorting and arrangement of Mr. Gladstone's papers an even heavier task than he had anticipated. In Messrs. Macmillan's announcements for the autumn there is no mention of the Gladstone biography.

The latest of the new volumes of the "Encyclopædia Britannica" (A. and C. Black) covers the ground between "Glarus" and "Jutland." It is strong, like all its predecessors, in elaborate treatises. There is, for example, an account of Japan which extends to 93 double-columned pages. This is a most valuable contribution, the work of four authors chosen for their special erudition, among them being Capt. Brinkley.

Tolstoy celebrated during September the fiftieth anniversary of his public appearance as an author. In September 1852, the *Snowvremennik* (the *Contemporary*) printed the earliest of the vivid autobiographical sketches of his boyhood. His friends have made great efforts to secure a dramatic celebration of the "Tolstoy Literary Jubilee," as they name it, and have obtained leave for the performance of "The Fruits of Intelligence" at the St. Petersburg Court Theatre.

A writer in the *Saturday Review* claims to have discovered a "key to *Jane Eyre*." Some key was necessary, he considers, because *Jane Eyre* "had as its motive a consideration born of male experience regarding the difficulties of the marriage question where lunacy was concerned. The genius of Charlotte Brontë has been proved, on every side, to be constructive and not creative." This key the writer claims to have found in "a little work on Craven in 'six letters to a friend in India,' printed and published in 1838 from Skipton,

Yorkshire." The book in question was written by Frederic Montagu of Lincoln's Inn, a grandson of John Montagu, fourth Earl of Sandwich.

Book titles are gradually getting used up. A few years ago Mr. Percy White, with his "Passionate Pilgrim," unconsciously annexed the name of one of Mr. Henry James's best known short stories, and on apologising, received a kindly note of indemnity. Now Mr. Marion Crawford is to give us "Cecilia" as his autumn novel. This is a story of modern Rome. But barely five years ago Mr. Stanley V. Makower published a novel called "Cecilia," which was a story, if memory serves, of Emilienbad.

A correspondent of the *Dial* gives the very curious history of the barbarous word "sockdologer," which is an Americanism for the finishing stroke in a fist-fight. The word, it seems, is a ludicrous transposition of the vocal elements of the word *doxology*. Some wag noticed that the singing of the doxology dissolved the worshipping concourse, the purpose of the assembling being fulfilled; if the purpose was a fight, the finishing blow dissolved the ring of spectators and abettors. He avoided the possible irreverence of a direct comparison of the different meetings by a comical metathesis of the sounds of *d* and *s*, as the Yankee farmer invoked the use of a stout needle upon the object of his wrath instead of pronouncing an eternal doom. "Sockdologer" answered the purpose as well as the more solemn word.

Says Mrs. Campbell Praed in her latest book, "My Australian Girlhood":—

"Words fail for painting the loneliness of the Australian bush. Mile after mile of primeval forest; interminable vistas of melancholy gum-trees; ravines, along the sides of which the long-bladed grass grows rankly; level, untimbered plains alternating with undulating tracts of pasture, here and there broken by steep gully, stony ridge, or dried-up creek. All wild and utterly desolate; all the same monotonous grey colouring, except where the wattle, when in blossom, shows patches of feathery gold or a belt of scrub lies green, glossy, and impenetrable. I know nothing so strange in its way, as to travel for days through endless gum-forest. . . . Often, a laughing jackass, the kingfisher of Australia, is perched in the fork of a bough shrilling its devilish merriment, or an iguana will be dragging its unwieldy length up the trunk—a land crocodile which seems antediluvian too; as does a kangaroo which may be starting upon a series of eccentric boundings, its uneven legs and long tail flapping in the air, with, perhaps, a baby marsupial peeping from its pouch. And talking of antediluvian animals, is there anything more curious than a platypus, which has fur like a seal, a bill like a duck, and which lays eggs and nurses its young, when they are hatched, with the milk of its breasts? Naturalists say that the platypus represents a very early stage of mammalian evolution. Yes, indeed, the bush seems a kind of primeval survival, and like nothing else in the known world."

Mr. Greenwood has reprinted the articles on London Police Courts which he contributed during several years to the *Daily Telegraph*. Though dealing at times with scenes that leave one very sad, the book is relieved with many humorous episodes. For instance, some of the matrimonial tangles which the magistrate is called upon to untie relieve the tedium of the day considerably. "Your worship, I have married a wrong un!" says an applicant, and proceeds to explain in reply to the magistrate's questions:

"When we were courting and talking about getting married, we agreed, among other things, that she was always to get up first and make the kettle boil while I toasted the bacon."

"And does she now insist on toasting the bacon while you attend to the kettle?"

"No, your worship. She flatly refuses to do either the one or the other."

"What does she do, then?"

"She lies abed while I get my own breakfast, and, when I tell her to get up, she threatens to do all manner of things to me."

Inside of a minute the magistrate—it was Mr. D'Eyncourt—had given the solution and called the next applicant. Here is another glimpse, which relieves the long procession of battered wives who want protection but "do not want to hurt him." "Please, your worship, I want Jacob Zulinski bound over," began an applicant.

"Ah, but, my worship, it lays this 'ere way:—It's

Esther I'm sweet on, and Rachel—that's her sister—she says if I don't marry her I sha'n't marry anybody, and her brother takes her part and sez the same. He said it no longer ago than last night. 'If you want to marry into our family,' he sez, 'you've got to marry Rachel, and if you conterdick me, I'll knock your bloomin' head off.' And," added the young man dolefully, "he's a fighting man—that's the worst of it."

A late and interesting sidelight on the character of Edgar Allan Poe is afforded by an interview with Mr. Alexander T. Crane, who was for eighteen months Edgar Allan Poe's office boy. It was published recently in *The Sunday World Herald* of Omaha. Mr. Crane is in his seventy-third year, and lives in Harrison County, Iowa. He says that Poe was the "gentlest, truest, tenderest, and knightliest" man he ever knew, and he was his "boyish idol, just as his memory is the pride and glory" of his declining years. When Mr. Crane was sixteen years old he secured the place of office boy and mailing clerk of *The Broadway Journal*, of which Poe was editor. He says that "Poe was a quiet man about the office, but was uniformly kind and courteous to every one, and with congenial company he would grow cheerful and even playful." The poet came to the office at 9 in the morning and staid until 3 or 4 in the afternoon, working during that time steadily and methodically. Mr. Crane once wrote a poem while working for Poe which he submitted to him, and which the poet advised him to send to the editor of *The Youth's Cabinet*, who published it. The old man is very indignant when he recalls how biographers detracted and defamed his idol. He says that Poe was a gentleman in every sense of the word, that "he was honest, generous, kind, and true," and that, although he tried to drown his sorrows in the cup, "he could never have been anything but a gentle, tender, lovable man, a thousand times to be pitied, but never to be condemned." Mr. Crane does not agree with Poe's biographers that the poet sold the manuscript of his "Raven" for ten dollars to buy medicine and food for his wife, because Poe came into the office of the *Broadway Journal* one day in winter with the actor, Murdock, and called all the employés to his desk to hear the great elocutionist read his first poem, and in the next issue of the *Journal* the "Raven" was given the place of honour.

THE CHRISTIAN DAIMYO.

CHAPTER XII.

The expedition to Korea.—Hideyoshi resigns the office of Kwampaku and takes the title of Taiko.—Organization of Hideyoshi's army.—Konishi and Kato invade Korea. Konishi's success.—Kato's march. The Taiko goes to Nagoya.—Why he did not cross to Korea, and the consequences.—Spanish delegation.—Tsutsui's baptism.—Reverses in Korea.

The war, which Hideyoshi waged for seven years on the peaceful Koreans, ought to be considered as one of those unjust aggressions, sufficiently numerous in the history of nations, where brute force succeeds in crushing a little people, who only ask permission to live tranquilly at home. In following the details of this war, one observes with a certain satisfaction that the aggressor received in it, in homely English phrase, more kicks than half-pence, and that he was obliged to abandon the conflict, exhausted if not conquered.

To know well the alleged reasons which led to this expedition, one must go back for several years. Hideyoshi, who had for a long time past dreamt of a descent in Korea and thence upon China and even as far as the Indies, had, during his stay in Kiushu (1587), ordered So Yoshitomo, *daimyo* of Tsushima, to send one of his vassals to the Court of Seoul, to ask why the Koreans no longer sent any embassy to Japan, as was the case in the time of the Ashikaga Shogun. The Koreans had at first excused themselves, protesting that voyages by sea were dangerous for them, reputed to be indifferent seamen. This too naive modesty greatly irritated Hideyoshi, and in the succeeding spring, he ordered So to go himself to declare war on the King of Korea, if the embassy were not sent at once. This

threat had its effect, and in the month of April, 1590, the King of Korea sent a numerous embassy to Hideyoshi. Received with great pomp at Kyoto, the embassy returned to Korea loaded with presents, and at the same time convinced that the Japanese army would not delay in following its steps. In dismissing the embassy, Hideyoshi declared to it that he counted on the assistance of the Koreans to make war on China. As soon, therefore, as the ambassadors returned home, they pressed their countrymen to rebuild their fortresses, nearly all in a dilapidated condition, to manufacture arms, and to hold themselves in readiness for all eventualities.

Meanwhile, no one in Japan was ignorant of the hostile intentions Hideyoshi entertained towards the Koreans and the Chinese. For years he used to speak, to whoever cared to listen to him, of the conquest of these two nations. The Jesuits, even the Portuguese merchants themselves, had received his confidences on this subject, as well as the demand for European vessels to carry out this enterprise. The official declaration was not to take place, however, till the 13th of February, 1592. On this day, the *daimyo* met at Kyoto to congratulate the Kwampaku, on the occasion of the new year, (12) and the latter announced to them that he had decided to cross over to Korea, to invade thence China and to become Emperor of that country. To cut short all contradiction, he threatened with death anyone who would oppose his will. (13) He also gave orders to the *daimyo* to make their preparations, and to meet without delay at Nagoya, a little village to the north of the province of Hizen, the port of which was to serve as a rendezvous for the army destined for this expedition. Hideyoshi was himself to lead the expedition, and with this intention he abdicated the dignity of Kwampaku in favour of Hashiba Hidetsugu, his nephew, whom he had just adopted as his son. Then he took the title of Taiko, a title reserved for the Kwampaku who had resigned that charge. It is especially under this name of Taiko, or Taikosama, Lord Taiko, that Hideyoshi is known in the annals of the Religious, and that he will be henceforth designated in this study.

In spite, however, of the great enthusiasm that the Taiko had at first shown to put himself at the head of the Japanese army, nothing came of it: he named Ukita Hideie, *daimyo* of Okayama (Bizen), commander-in-chief. Masuda Nagamori, Ishida Mitsunari and Otani Yoshitaka formed his staff. The effective force of the army, divided into ten divisions, amounted to 130,000 men, a figure which some historians raise to 200,000, sometimes even to 500,000. The fleet, properly so-called, composed of simple junks, such as one still sees at present in the country, manned by 9,000 sailors, was confided to Kuki Yoshitaka, *daimyo* of Toba (Shima). Entirely null both as to its intrinsic value, and as to the services it rendered, during this expedition, this fleet was to sustain defeat after defeat.

It remained to choose, among the ten divisions, the van-guard, in all times considered as a post of honour, and consequently eagerly sought after. Two chiefs, equally intrepid and equally agreeable to the Taiko, disputed for this honour; Konishi Yukinaga and Kato Kiyomasa. In order to create no jealousy, the Taiko named both of them. There were then two van-guards, which were to lead by turns: while one rested for a day, the other marched. Konishi was to leave Nagoya first and to inform Kato when he had reached Korea.

In the first days of May, 1592, the division commanded by Konishi left Japan. It numbered 18,000 men, nearly all Christians. It was led by the *daimyo*, So, Arima, Omura, Goto, Amakusa and Matsuura Shigenobu, the only *daimyo* who was not a Christian. Naito Yukiyasu, the ex-*daimyo* of Kameyama, and his son Thomas, Lord of Umemi and vassal of Konishi, were also in this first-division. A thousand transport junks, furnished by all the *daimyo* whose domains were situated on the coast, transported them with their arms and baggage and a great number

(12) Old calendar.

(13) Hideyoshi-fu, vol. II.

of coolies to Korea. Thanks to So's men, who were accustomed to the sea and knew the course perfectly, Konishi arrived in two days at Fusan, the first Korean fortress. After an obstinate resistance, this place was taken. The Korean general and his soldiers were made prisoners, and the latter were placed as rowers on the junks, or employed as coolies. The cannons and the arquebuses of the Japanese so frightened the Koreans, unaccustomed to these new engines, that they abandoned to the enemy several other places, without even offering the least resistance. Besides, the Koreans, being wretched soldiers, and in no way prepared for war, could not face an enemy superior in numbers, in armament, and in courage. Moreover the Korean army existed on paper only: for the great majority of the soldiers were dispensed from answering the royal summons, under the pretext that they were sick, or in mourning. (14)

Kato, who had remained at Tsushima to await Konishi's message, began to lose patience. He was convinced that Konishi, in no wise desirous of sharing his first victories with a hated rival, designedly delayed to send him a courier. And, being unable to restrain his impatience any longer, he set sail. On account of contrary winds, he did not reach Fusan until four days after. He at once set off in pursuit of Konishi, who went ahead with the rapidity of a hurricane. When at length he overtook him, the two rivals frankly confessed to each other that any cooperative action between them was impossible, and resolved to gain Seoul each by a different road. From this moment there was a wild race between the two generals to decide which would reach the capital first. Although Konishi had left Kato to choose the road he would take, the latter, being completely ignorant of the topography of the country, progressed but slowly, and, when he arrived at Seoul, he learned with regret that his rival had already possessed himself of it. However, Konishi himself had arrived too late: the King and all his Court had just left the capital, and had gone to take refuge in China. Konishi pursued the fugitives, but when he reached Pyen-yang, the last Korean fortress, they had already crossed the Chinese frontier.

Korea was conquered, and it only remained for the Japanese army, who had followed without delay the two van-guards, to occupy it. Konishi, encamped at Pyen-yang, sent in great haste a message to Ukita, the general-in-chief, inviting the latter to join him without delay, in order to continue the victorious race to the very heart of China. Despite this urgent request of Konishi, for whom Ukita Hideie had more than friendship, the latter did not dare to accept his invitation: the Taiko had ordered him to first establish his head-quarters at Seoul, and there to await further instructions. It was also for this same reason that the other generals decided to establish their camps in the conquered provinces. Kuroda Nagamasa, general of the Third Division, camped with Otomo Yoshimune, in the nearest station to Konishi. He had 12,000 men under his orders, a contingent of which Otomo had furnished one half. Kato, to whom had fallen the occupation of Orankai, a province situated in the north of Korea, on the limits of Manchuria, had gone thither with Nabeshima and 20,000 men. Kato was certainly an intrepid warrior, but between that and attributing to him, as does Japanese history, innumerable brilliant victories and extraordinary deeds, there is a vast difference. Whilst the Korean annals scarcely mention the resistance, that the inhabitants of this province made to Kato, the Japanese accounts represent this latter as the great hero of the Korean expedition. In these accounts everything is of a marvellous character, from the taking of two sons of a concubine of the King, whom a traitor had delivered into the hands of Kato for money (15), to the surname of "Kishokwan" "demon general," which the Koreans are alleged to have given him. The latter, frightened at the horrible masks which the Japanese warriors generally wore, called them all demons. Kato was not the only one to get

this nickname although, according to tradition, his grinning mask caused real terror among the simple peasants of Orankai.

But, to be impartial, it must be confessed that none of the Japanese generals, not even Konishi, the conqueror of Fusan, of Seoul and of Pyen-yang had an opportunity to reap many laurels, in a war with so feeble an adversary:

"A vaincre sans peril on triomphe sans gloire." After a promenade in Orankai, Kato and his companion, Nabeshima, installed themselves comfortably close by the beautiful Broughton Bay, and there sojourned in peace, till danger made them fall back on Seoul.

While Konishi, and in his train the other generals, invaded Korea, the Taiko went to Nagoya. Setting out from Osaka, he made the journey by land, passing by Hiroshima, Shimonoseki, Kokura, and, on the sixth of May, he arrived at his destination. The greatest *daimyo* of Japan, Tokugawa, Mori, Maeda, Gamo and Uesugi accompanied him thither, followed by an army of about 60,000 men. Soon the little village of Nagoya was transformed into an immense town, in which the Taiko, the *daimyo* and the *samurai*, convinced that they would have to stay there for a long time, installed themselves comfortably as if they had been at home.

From the beginning the Taiko, wishing to direct himself the expedition, had enjoined on his generals to send him the most minute details of their marches and their successes; an order to which all scrupulously conformed. The capture of the greatest towns of Korea greatly gladdened him, and he sent a sword to Konishi, accompanying the gift by a most laudatory letter. He also showed his gratitude to the other generals. The rapid success of his army so excited him, that he spoke every moment of embarking and going to put himself at the head of the army, which was impatient to precipitate itself on China. This was, indeed, the true moment for making this attempt. Korea, prostrated, had not yet had time to recover from the blows which it had just received, and its King, being in flight, had not yet had a chance of warning the Court of Peking of the danger which menaced China. Judging by the rate at which the Japanese had marched up to this time, the capital of China would, carried by surprise, have been in their hands within a few weeks. But instead of striking the iron while it was hot, the Japanese, for want of a leader, saw themselves condemned to inaction, and hence to demoralization.

To tell the truth, all the fault lay with the Taiko, whose irresolution triumphed over his usual bravery. And, indeed, his perplexity was not without reason. He had several times soundly Tokugawa and the other powerful *daimyo*, and to his great dissatisfaction, he had to admit to himself, that they hardly appeared disposed to charge, head down, into an expedition as reckless as it was useless. Suspicious as he was, the Taiko resolved from this moment never to leave Japan: he understood that if once he put his foot outside the country, he would run great risk of never being able to come back again.

The almost sudden death of his mother furnished him with an excuse for postponing his passage to Korea. On receipt of this news, he at once returned to Kyoto where, like the devout son he was, he conformed for months to the strict etiquette imposed by mourning. The complete abstention from all administrative affairs, which this act of filial piety required, was to contribute still more to complicate the situation of the Japanese army, in Korea. Nearly 130,000 *samurai*, followed by a considerable number of coolies, had passed the straits, and the presence of that excessive number of warriors in such a poor country as Korea, was to have disastrous consequences. Already, from the commencement of the invasion, the natives had destroyed all that they could not carry away, or hide in a safe place. The Taiko, far from expecting such acts of ill-will on the part of the Koreans, whom he thought he had won to his side, had not provided sufficiently for the victualling of so many troops, and the want of food had already

made itself felt at the beginning of the campaign. The insufficient supply of provisions, that he afterwards sent from Japan, were for the most part intercepted either by the Korean fleet, or by native prowlers, always on the look-out for convoys of food. Hence a complete famine reigned in the Japanese camps. The *samurai*, already decimated by sickness, had to desert their posts and to seek in the field something wherewith to satisfy their hunger. It was in the midst of so many calamities that *daimyo* and *samurai* abandoned themselves to the thought that the Taiko had employed them on this expedition with the object of ridding himself of a surplus of turbulent warriors, whom the pacification of Japan had rendered henceforth unnecessary. The Christians, especially, seemed to have already lost all hope of ever being able to return to Japan. Konishi, placed in the van-guard, did all he could to put an end to this disheartening situation. After having vainly tried to induce the Japanese to continue their victorious march, he addressed himself to the Koreans, urging them to unite their forces to his, in order to fight the Chinese. Promises, threats, all were in vain: the Koreans, while feigning submission to the Japanese, injured them as much as they could. At the same time they communicated secretly with the Chinese, whose army was soon to come to their succour.

(TO BE CONTINUED.)

NEWS OF THE WEEK.

During the month of October gold bullion amounting to 1,070,461 *monme* was imported from Korea by the Osaka branch of the First Bank.

Field-Marshal Marquis Yamagata having recovered from his illness, left Kyoto on Nov. 5th for the scene of the autumn manoeuvres in Kyushu. Major-General Tamura, of the General Staff Office, accompanied him.

The Imperial yacht *Hatsukaze*, built by the Mitsu Bishi Shipbuilding Yard for the Crown Prince, arrived at Kobe on Nov. 5th from Nagasaki *en route* for Yokohama. The boat left Kobe for this port the following morning.

We learn from Messrs. Arthur and Bond that an attempt was made on Monday to break into their premises and steal the large Silver Dragon bowl (the Liscum Bowl) on view in one of their windows. The window had been smashed in and the large silver ladle was stolen. Probably the noise of the breaking glass frightened the thieves otherwise they might have taken the bowl also.

As usual every year, a fête is being held at the Yasukuni shrine, Kudan, Tokyo, dedicated to the souls of soldiers who lost their lives in the cause of their country. The festival began on the 5th and ends on Nov. 7th. There are various entertainments such as fireworks, wrestling, *No* dance, etc. On the first day, Princes of the Blood and various high dignitaries in civil and military circles paid their respects at the shrine.

The business of selecting a candidate for the vacant post of Mayor of Yokohama is still dragging. A meeting of the representatives of various public bodies in Yokohama was held in the Assembly Hall on Nov. 4th to discuss the subject, Messrs. Watatabe Fukusaburo, Nakamura Fusajiro and others being present. The meeting, however, broke up without arriving at any decision. A second meeting will take place about Nov. 10th.

We regret to announce the death of Mr. J. R. Best, who was well known to many residents. Mr. Best had been in ill-health for some years and his demise was not unexpected. The deceased gentleman had been an officer in the British army, after leaving which he engaged in business in Formosa, finally coming to Japan.

On Thursday afternoon the remains of the late Mr. J. R. Best were consigned to their last resting place in the General Cemetery, Rev. W. P. G. Field officiating. The two sons and two daughters

(14) Korean annals.

(15) Korean annals.

of the deceased were present as chief mourners, and there was a large attendance of Japanese.

A jinrikishaman trotting along on Wednesday afternoon from No. 26 to Main Street with a chit was run into and knocked down on the narrow sidewalk by an unskilful Chinese bicyclist. He spent no time in looking for a policeman or in arguing over his injuries, but seized the bicycle and—despite the struggles of the owner, who indeed got it away from him once—hoisted it on his shoulder and marched off with it to the Police Station, it may be presumed. The Chinaman disappeared, doubtless to wrestle with the question whether it would be better to go to the Station and claim his bicycle, or stay away and let the matter go by default. If any unusual delay has occurred in the delivery of a chit from the Water Street region perhaps this occurrence may serve to explain matters.

The *Kobe Herald* reports the death of Mr. J. S. Wilde, assistant in the Kobe office of the Pacific Mail, O. and O., and T. K. K. Steam Ship Companies. The sad event took place at 4 o'clock on Tuesday morning. Mr. Wilde was in the office as late as Tuesday week, but he was compelled to relinquish work on that date owing to a severe cold. Pneumonia set in subsequently, and other complications aggravating the case, his constitution proved unequal to the strain placed upon it and he succumbed, as already mentioned. The deceased gentleman has not been a resident of Kobe for long, having arrived from the San Francisco office in 1900, but during his brief residence he won numerous friends who esteemed him for his kindly disposition and uniform courtesy. Much sympathy is felt for Mrs. Wilde in her bereavement.

THE PIOUS FUND ARBITRATION.

DECISION OF THE COURT.

The Hague Arbitration Court on Oct. 14th rendered its decision in what is known as the Pious Fund Case, which involved a claim against Mexico by the United States on behalf of the Archbishop of San Francisco.

This brings to a settlement the dispute between the Government of Mexico and the Catholic Church of California, which began fifty years ago. It has been the first case heard by the arbitration tribunal at The Hague.

The pious fund was a gift made by charitable persons in Spain in 1697 for the support of Roman Catholic missions among the Indians of California, which was then a part of Mexico. In 1767 the Spanish crown expelled the Jesuits, who held the fund in trust, from Mexico and California, and the Spanish Government assumed control of the property and funds of the order.

When Mexico achieved independence she in turn took over the fund and applied the proceeds to the maintenance of missions, but when Upper California was ceded to the United States, Mexico ceased to pay to the Catholic Church in the United States' portion of California its share of its interest in the pious fund.

Prelates of the Catholic Church of California sued for their share of interest before the commission of 1868. It was decided by Sir Edward Thornton, the umpire, that the interest of the fund should be divided equally between the church in California and the church in Mexico, and that the Government of Mexico should annually set aside half of the annual interest amounting to \$43,080.99, which, accumulating until 1869, amounted to \$904,700.79, which was paid in full. No further payments were ever made.

At length the subject was referred to the Arbitration Court, which has now given a unanimous decision. The tribunal finds:

"First that the claim of the United States in behalf of the Archbishop of San Francisco is governed by the principle of *res judicata* in virtue of the arbitration decision pronounced by Sir Edward Thornton, November, 11, 1875, and amended by Sir Edward Thornton, October 24, 1876.

"Second, that in conformity with this decision the Government of the United States of Mexico should pay the Government of the United States \$1,420,682

in money of the legal currency of Mexico, within the period fixed by article ten of the protocol of Washington. This sum will cover the total payment of annuities due from and unpaid by the Government of the Mexican Republic, namely, the annual payment of \$43,050 in Mexican currency from February 2, 1869, to February 2, 1902.

"Third, the Government of the United States of Mexico will pay to the Government of the United States, February 2, 1903, and every following year, for the same date, forever, annual payment of \$43,050, of money of the legal currency of Mexico."

The decision of the tribunal was read by Secretary General Ruijsenaers in the presence of members of the Diplomatic Corps, their wives and the representatives of the litigants.

Dr. Matsen, president of the court, who declared that a revision of the sentence was only possible in the event of new facts coming to light, thanked the representatives of the United States and of Mexico for their assistance in enlightening the arbitrators. He added that while no single judge was infallible, the unanimity of the arbitrators who had so closely examined the whole question at issue was a guarantee that no mistake had been made.

President Matsen concluded with expressing the best wishes for the health of Queen Wilhelmina and the prosperity of her people, who had welcomed the members of the court so cordially.

Mr. Ralston, of Washington, one of the lawyers in the case, and Senor Pardo, in behalf of Mexico, thanked the court for the care it had given to the case. Senor Pardo said he was sure that so soon as his Government learned of the court's award it would accept it. He must, however, reserve for his Government the right to avail itself of the provisions of the protocol.

AMERICAN TOPICS.

U.S. Government receipts and expenditures for the month of September, 1902, were \$48,580,381, an increase of over \$4,000,000 as compared with September, 1901. The expenditures for September were \$37,554,798, leaving a surplus for the month of \$11,000,000. Receipts from the several sources follow: Customs, \$26,225,777; increase, \$7,000,000. Internal revenue, \$19,789,708; decrease, \$2,700,000. Miscellaneous, \$2,564,895; decrease, \$250,000. Expenditures on account of the War Department were about \$250,000 in excess of those for September, 1901, and on account of the navy there was an increase of about \$1,500,000.

Mr. Henry White, Secretary of the United States Embassy in London, is to be made Ambassador to Rome. The late President McKinley intended to thus reward Mr. White, but found no opportunity during his incumbency. President Roosevelt, who has formed the estimate of Mr. White's abilities that President McKinley had has decided to make him Ambassador to Rome. The appointment, however, is not to be made immediately. Mr. Meyer, the present Ambassador to Rome, has just returned to that post from a visit to his home in Massachusetts, and it is expected he will remain in Rome during the coming winter.

Professor Barrett Wendell, Professor of English at Harvard since 1898, has been appointed Clark lecturer in English literature at Trinity College, Cambridge, for a year. This honour to Professor Wendell is well deserved, as he has done excellent work in the field of English literature. Besides "A Literary History of America" he has written works on "English Composition," "Life of Cotton Mather," "Shakespeare, A Study in Elizabethan Literature" and several novels. Professor Wendell came out to the University of California last June to take charge of a summer school class in English and his caustic criticisms caused quite a sensation in his class. He also lectured on Elizabethan literature.

Possibly the oldest living baseball enthusiast in the United States is Noah Brooks, merchant, farmer, editor, correspondent and Naval Officer of a port. Everybody knew him from Maine to California. At 72 he is living in the town of his birth, Castine, Me., writing as hard as ever. He is now doing some magazine work and preparing an important book for the Appletons, says a writer in the *New York Press*. The world knew him as "Castine," Washington correspondent of the *Sacramento Union*. Baseball appealed to him as hay does to a hungry ox. Two of his most entertaining books are "The

Fairport Nine" and "Our Baseball Club." He was an expert pitcher, and glorified Cummings when the latter introduced the curved ball. The house he lives in Castine is called the Ark. Entirely appropriate—Noah's Ark.

The last U.S. census makes an interesting showing regarding the progress made by the negro race in the South in the tenancy and ownership of land. In South Carolina, Mississippi and Louisiana, more than half of the farms are managed by negroes, either as owners or tenants. In the entire South 150,027 negroes own the land tilled; 28,000 are part owners and 1336 both owners and tenants. Cash tenants and share tenants number 550,000. The Southern negroes have, in fact, one-quarter of the farms. Forty-nine per cent. of these are cotton plantations and 37 per cent. rice farms; and 14.8 per cent. of the remainder are sugar plantations. The negroes carry, however, a much smaller quantity of live stock on their property than the white farmers do. The average value of the live stock owned by negro farmers amounts to \$135, as against \$603 for each white agriculturist.

With the exception of last April, transactions in stocks on the New York Stock Exchange for the month of September were the heaviest of any like period since the culmination of the big boom in May, 1901. The sales amounted to 20,952,017 shares, which compares with 14,317,393 shares in August, 16,317,957 shares in July, 7,813,049 shares in June, 13,485,777 shares in May, 26,578,512 shares in April, 11,954,672 shares in March, 12,950,699 shares in February and 14,761,391 shares in January. In September, 1901, sales amounted to 14,030,000 shares. Bond dealings were on a heavy scale also, aggregating in par value \$93,896,950 of railroad, \$437,500 of state and \$289,500 of government bonds, making the total of all classes \$94,623,950, as against a total of \$53,587,300 in August, \$71,962,200 in July, \$64,152,800 in June, \$63,108,500 in May, \$114,879,900 in April, \$66,952,200 in March, \$84,192,550 in February and \$94,030,500 in January. Last year in September transactions amounted to \$44,684,100.

By an opinion rendered on October 9th by the Nebraska Supreme Court, the reading of the Bible and singing of sacred songs in public schools of that State are prohibited. The case is one appealed from the District Court of Gage county, and the decision of the lower court is reversed. The plaintiff in the original action is Daniel Freeman, who claims to be the first homesteader in the United States. He began proceedings four years ago against the directors of his home district school, but was beaten in every trial in the lower courts. The syllabus of the opinion says:—"The exercise by a teacher in school, in the school building, in school hours, and in the presence of the pupils, consisting of the reading of passages from the Bible and in singing of songs and hymns and offering prayer to the Deity, in accordance with the doctrines, beliefs, customs or usages of sectarian churches or religious organizations, is forbidden by the Constitution of the State." The decision of the three Judges is unanimous. They add that it is not in accordance with their personal wishes, but it is the law of the State. Continuing, the opinion says:—"To permit the use of the Bible would be to make a bid for the sectarian and parochial schools, and thereby aim a blow at the public school system."

In a recent editorial the San Francisco *Chronicle* pointed out that a recrudescence of the building of ships to be propelled by sail had set in not only in the United States, but in other maritime countries also. The multimasted schooner of big tonnage has become a favourite type of sailing vessel in the United States. These fore-and-aft-rigged craft have gradually increased the number of their spars from two to seven, the latter being the latest production of an eastern shipyard. There is a big fleet of six-masted schooners in eastern waters, and the seven-masted steel vessel, with a cargo-carrying capacity of 11,000 tons, which was recently launched in Maine, is to be followed by others of the same rig and tonnage. These vessels possess great speed, in addition to

their extraordinary cargo capacity, and they are endowed with the additional advantage of being immensely cheaper to operate than either steam vessels or square-rigged ships of one-half their tonnage. The seven-masted schooners which are being turned out of the eastern shipyards are primarily intended for the coal-carrying trade on the Atlantic seaboard, but their builders intend ultimately to employ them in the trade between the Pacific coast and the Orient. Pacific coast shipyards are turning out four and five-masted schooners for the lumber trade, in which they are able to compete successfully with the steam craft. Some of these vessels have also entered the Pacific trade as oil carriers. One four-masted schooner is now carrying fuel oil in bulk from the California coast to the Hawaiian Islands in competition with the oil-burning steam oil carriers employed in the trade. France is also encouraging a return to sailing ships by offering liberal bounties to their owners. The pioneer of a big fleet sailing under the tricolor is at present reported in Philadelphia, where she is loading refined oil for Japan. This new French fleet of sailing ships is intended for the Oriental trade, which is now almost wholly monopolized by steam craft.

Commenting on the report of the new Commissioner of Pensions of the United States, *Bradstreet's* says:—In earlier years the pension roll was a much lighter one. The pension disbursements from the beginning of the government to June 30, 1865, more than two months after the close of the Civil War, were less than those for a single year under the new order of things. The disbursements from July 1, 1790, to June 30, 1865, amounted to \$96,445,444, which is over \$41,000,000 less than those for the fiscal year ending June 30 last. The relative amounts expended in pensions on account of the wars in which the country has been engaged are set forth in the following table supplied by the Commissioner in his annual report, viz.:—

Revolutionary War (estimated).....	\$70,000,000
War of 1812 (on account of service, without regard to disability)	45,025,297
Indian wars, 1832-42 (on account of service, without regard to disability)	5,814,207
War with Mexico (on account of service, without regard to disability) ...	31,861,338
War of the Rebellion	2,744,878,276
War with Spain	3,275,184

Actual total disbursement in pensions

2,900,854,302
It will be seen from the above table that thus far the War with Spain has cost the country less in pensions than any other in which it was engaged in the past. The total was only \$3,275,184. The Indian wars, from 1832 to 1842, cost \$5,814,207 on account of service simply without regard to disability. The War with Mexico involved disbursements amounting to \$31,861,338 on the same basis, and the War of 1812 called for the expenditure of \$45,025,297 in service pensions. The cost of the Revolutionary War in pensions is estimated at \$70,000,000. All other records are, of course, dwarfed by that of the Civil War. This gigantic struggle left a pension bill which it has thus far cost \$2,744,878,276 to discharge. The total cost of the pensions for all the wars amounts, as will be seen, to not far from \$3,000,000,000. It has been said several times during the last decade or so that the pension roll had reached high-water mark, but the total number of names on the roll at the close of the last fiscal year is the largest yet recorded.

The report made by the special commission of the British Iron Trade Association attributes the success of the United States in the field of industrial economy "to the almost absolute freedom of labour. 'The men,' it says, 'have their futures so much in their own hands, and their wages are generally so good, that they have every encouragement to do the best they can for their employers and for themselves.' All of the observers who contributed to the report contend that the discouraging condition of affairs in Great Britain is due to the opposite cause, and predict that unless the unions adopt a fairer course in dealing with employers British industry will be ruined.

CORRESPONDENCE.

THE ODAWARA DISASTER FUND.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I am glad to tell you, with my best thanks, that the subscription list for the Odawara relief fund has reached the amount of yen 2,915 through your kind help.

The sympathies thus freely extended by many foreign residents must, I am convinced, be greatly appreciated by the people of Japan.

The above amount has been forwarded to the chief official (*Gunchō*) of the district, who promised me that the money should be distributed in the way he thinks most useful for the sufferers in relieving their miserable condition.

It is quite needless to add that these donations will be accepted with feelings of most profound gratitude by the unfortunate people.

Thanking you again, Yours sincerely,

SUFU SADAKO.

Yokohama, 4th Nov., 1902.

GAMBLING ON THE BLUFF.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In reference to your paragraph in this morning's issue regarding gambling on the vacant premises of the former Maples Hotel, No. 85 Bluff, in which you say you believe about fifty gamblers were present, allow me to say, by way of correction, that the premises which, although for Sale or To be Let, while vacant as a Hotel, are by no means empty, as I am in receipt of considerably more than a hundred dollars a month for rent. Then as to number of gamblers present, there were ten, of whom eight were very cleverly captured; a very good proportion.

The police only received information on Saturday at noon, and their arrangements were completed and the capture effected by ten o'clock p.m.

It is quite possible there may have been as many as fifty on the Club Books, kept by the late watchman, but they were not all there at that time.

Suspicion was aroused by the number of cigarette ends visible in the morning.

Yours faithfully,

November 6th, 1902.

C. D. MOSS,

Agent for 85, Bluff.

ORIENTAL HOTEL, LD.

At the annual general meeting of the shareholders of the Oriental Hotel, Ltd., at Kobe, the Chairman (Mr. T. W. Hellyer) said it would be seen by the report that the property stood in the Company's books at yen 120,800, and the Directors had recently had the buildings valued by Mr. Hansell who placed a value of yen 89,800 upon them; allowing 85 yen per *tsubo* for the land, which was a conservative estimate, there was yen 56,600, making a total for land and buildings of yen 146,400. This Property account stands in the Company's books at yen 120,800. Regarding the Furniture Account, a complete inventory had been made by Messrs. Whymark and Thompson and their valuation was yen 70,800, while the amount standing in the books was yen 58,644. The Electric Light plant and Steam Launch both stood in the books at figures considerably under the real value. Immediately after the last meeting an extraordinary general meeting of the Company had been held at which it had been resolved to reduce the capital. Owing to certain formalities that had to be complied with several other meetings had proved necessary. When the Directors resolved to recommend the shareholders to reduce the capital their legal advisers led them to believe that it would be a simple proceeding and not occupy much time. Since the report was made up word had been received that the Court at Hongkong had sanctioned the reduction of capital, so word had been sent to the shareholders informing them that the 50 yen per share would be returned and that new certificates would be issued in place of the old ones. Through the kind assistance of Governor Ohmori of Kyoto and Governor Hattori of Kobe the difficulty regarding the use of the road leading to the Company's land in Kyoto had been arranged, by payment of yen 2,000 to the Hokokukwai to offset any damage done to the road and by an agreement to pay annually a small sum towards the upkeep of the road. The Directors take a sanguine view of the value of the Kyoto land and it is their opinion that eventually the Kyoto Property account will not show a loss. He had much pleasure in stating that the management of the Hotel and the conduct of the employees had given full satisfaction to the Directors and their services had been duly recognised. In order to meet the increasing traffic at the port the Directors had secured the upper storey of No. 81 which had been tastefully fitted up and now formed a valuable addition to the accommodation of the Hotel. The

working for the two months since the Report was made up shewed a slight improvement on last year's figures for the same period, and there was reason to anticipate a large number of visitors next Spring on their way to and from the Osaka Exhibition. There was no doubt that the prominent reports that had appeared in the local foreign newspapers regarding visitations of cholera, etc. had given an excuse to the interested people at other ports to discourage foreign visitors from spending time in this part of Japan, thereby working great injustice to many branches of trade here.

The report and account were adopted.

Some discussion took place on the question whether the dividend was 12 per cent. on the shares or (as the Chairman pointed out), the sum of yen 8,544 which amounted to 12 per cent., in the course of which Mr. W. D. S. Edwards, auditor, mentioned that yen 50 had been returned on the shares and 7 per cent. interest paid on the money refunded.

A BOOK ON FORMOSA.

Mr. Jas. W. Davidson, who is United States Consul at Taichiku in Formosa, having indeed sole care of United States interests for the whole island, has put into book-form part of his immense stores of information and the result is a volume called "The Island of Formosa, Past and Present." Mr. Davidson has been an Arctic explorer; he was a war correspondent, and he is now probably the chief living authority on Things Formosan. His book therefore is an encyclopædia which will be indispensable alike to the historian, the trader, the traveller and the statesman. The resources of Formosa are of course dealt with fully but the chief place is given to Camphor.

Of all the products of Formosa, he says, none is of such interest as camphor. The fact that it is snatched from the jungle over which the wild savage roams, and that it is not produced to any extent in any other part of the world save Japan, accounts for this. It would be an inviting subject for the statistician, whose hobby is to study problems such as how many days' consumption of matches placed end on end it would require to encircle the world; to figure out how many lives are lost that some decrepit old gentleman may be cured of his rheumatic pains. The trees which produce this valuable article are unfortunately within the country of the aborigines or upon the immediate border of it. The methods of obtaining the drug, adopted by the Chinese, necessitates the destruction of the trees, which are never replaced; and while temporary permission is sometimes granted by individual savages, or their village headmen, to work certain border districts, the aboriginal population, as a whole, naturally views with deep concern the gradual encroachment on their native soil, and, as a consequence, the border districts have, since the earliest days, been in a chronic state of disturbance. Every opportunity has been seized for the perpetration of outrages, and, sad to say, these outrages have not been on the part of savages alone, for the Chinese, on their side, seem never to have let slip any chance which presented itself of wreaking their vengeance on the unfortunate aborigines. The lives that during the last twenty-five years have been lost directly in consequence of this would sum up a very large number, while indirectly, instances among soldiers sent into the savage districts to avenge the murder of some camphor worker, and *vice versa* among aborigines making a raid on Chinese peasants living near the border, there must have been a deplorable addition to the above-mentioned loss of life. Statistics are not sufficiently complete to afford exact information, but the historical notes which follow will give some idea of the "butcher's bill."

Camphor is mentioned as an article of trade in the early history of Formosa, but whether it refers to the crystallized product of the tree, or simply to the wood which is used for building purposes, etc., is not clear.

The early history of camphor is wrapped in mystery. While mention of the tree is found in several early records, there is not always evidence that the manufacture of the drug was practiced. The first indisputable reference to the trade in the drug is made by Klaproth ("Memoires Relatif a l'Asie," Paris, 1824), who refers to the manufacture of camphor as being one of the important industries of the island at the time of his visit in the early part of the present century. It is clear, however, that the crystallized product of the tree was known in very early days to the eastern nations, and that it was introduced into Europe by the Arabians. It has also been asserted that India was the first country to manufacture the drug, and 1,200 years ago a prince of that nation is said to have made a present of camphor to the Chinese Emperor. At all events the first intimate knowledge of the drug obtained by Europe seems to

have been got from India, and this land was the first customer for China's product, so that the known manufacture of camphor in China dates back many centuries. Koreans were also acquainted with the drug, and it was they who in later years introduced the manufacture to Japan. Satsuma was the first province of Japan to profit by the instruction tendered by their neighbours, and some 180 years ago sufficient camphor was produced to place regular supplies in Nagasaki, where the drug was known as a special product of the above province. Later Kyushu, Shikoku and other parts of Japan took up the manufacture. China, whether because she had exhausted the supply of available trees, or could not compete with Formosa and Japan, where trees were more plentiful, gradually withdrew from the industry, until at the present the export of Chinese camphor is practically nil.

In the sixteenth century the camphor forests extended down on the plains, and along some of the plateaux, even to the west coast. At as comparatively late a date as 1868 camphor trees were growing on the lower ranges of the hills north of Taipei in the north, which are now given over to the cultivation of tea and other staples. The main supply, however, is now, as it always has been, in that vast district covering the mountain region stretching through the heart of the island from north to south.

Chinese historians tell us that early in the eighteenth century the government declared a monopoly in Formosa over camphor and other products of the forest, the penalty for cutting down a single tree, in contravention of the regulations, being death. Under this rigorous law over two hundred people were decapitated in the one year 1720. This so enraged the colonists that two years later they broke out into a rebellion, during which many thousands lost their lives, and the capital of the island fell into the hands of Choo Yih-kwei, the rebel leader. Although the government did not relinquish its claims to a monopoly, the laws controlling the same were made more lenient, and by the payment of certain royalties work in the camphor forests was permitted.

A boundary line established by the Formosan authorities in 1738 was expected to separate the savage regions which the officials made no pretence of governing from the Chinese district, over which they nominally ruled. In 1788 a force of armed agriculturists, comprised of Pepohoans and other civilized aborigines, which had been formed by the authorities to aid in the subjection of Lim So-bun's rebel band, were given a large district of territory on the savage border, with permission to dispose of the camphor growing within their respective boundaries, and afterward to till the tree-denuded land so as to produce the necessary foodstuffs. For administrative purposes the concession was divided into six districts and a tax was imposed. For some years the Pepohoans profited by their position and led a contented life, but later on their prosperity attracted the attention of unscrupulous Chinese, who stepped in, and by cunning and treachery gradually deprived the unfortunate pioneers of their possessions. From this period (the beginning of the present century) the Chinese, Hakkas chiefly, succeeded in controlling the manufacture. The savages have shown no disposition to engage in the industry themselves, work being regarded by them as quite on a level with smallpox, famine and other plagues, while the more willing Pepohoans lost their opportunity from their own shiftlessness and general simplicity.

Upon the arrival of the first foreign traders, in the present century, the Chinese officials still claimed an exclusive monopoly of the camphor industry. In 1855 an American, W. M. Robinet, of Hongkong, the first foreigner in later days to engage in trade in Formosa, dispatched a vessel, the American bark *Louisiana*, commanded by Capt. Crosby, to Takow. The vessel returned with a profitable cargo, as did the *Santiago*, which closely followed her. The success of these two voyages becoming known, caused several other parties to take an interest in the trade.

After years of destruction without replanting, the forests in which the camphor trees are found are now limited to that vast tract of mountainous territory stretching from the far north to the south and extending to the east coast of the island. The savages, helpless without the friendly protection of the woods, have retired with the disappearing forests, but have tenaciously stuck close to the border, and in most districts disputed inch by inch the advance of the camphor workers. Although the trees are found throughout the mountainous district from north to south, they are most abundant in the north-central districts, and gradually decrease towards the south, few trees of commercial value being found south of the twenty-second parallel. The trees seem to grow best on moderate slopes at elevations not exceeding 4,000 feet, where the soil is well drained and consists of a rich vegetable mould, and where the sun's rays can reach them. Only glimpses have been caught of the vast interior districts, and but little is known as to the area of forests in which the camphor tree is found; but, according to an estimate made by a

Japanese expert, it is expected to reach over 1,500 square miles in extent.

Of the camphor stations now existing Tokoham (Taikokan), Lamshun (Namsho), Twao (Taiko), Tangssi-kak (Tosei kaku) are the most important in the north, and Chip Chip (Shushu), Polisha and Linkipo in the centre. Camphor exists and has been worked in other places, but owing either to the difficulties of transportation or the too powerful opposition of the savages, the stoves have been abandoned, and with the exception of some small and unimportant stations, the manufacture is limited to the above mentioned places. Teckcham (Shinchiku), Maili (Bioritsu) and Goche (Gosei) are important local markets, and much of the drug passes through these places to the ports of Tamsui and Kelung, whence the camphor is exported. Amping in the south, which at one time exported considerable camphor, has been practically out of the trade for the last two years. Takow, the other southern port, has shipped no camphor since 1889.

The camphor laurel does not monopolize the forests in which it appears. It is, in fact, only one of several different varieties of trees which are found growing together. Camphor trees of various sizes are fairly numerous, but big trees, such as the camphor worker most desires, are found only here and there, sometimes only a few rods, and again a third of a mile or more, apart. The camphor tree attains an enormous height and girth in Formosa, and is properly the king of the forest. Trees are frequently seen with a circumference at base of twenty-five feet, a few reach even to thirty-six feet, and some have been observed in the island which required at least a forty-foot line to reach around them. Nor are these measurements those of a knotted, irregular body, for the camphor tree is as straight and fine formed a tree as one meets with, and as handsome a one as exists.

Commercially the value of the material obtained from the felled tree places the camphor laurel among the most valuable of trees. A tree forty-seven feet in circumference would keep a single distilling stove supplied with material for several years, and would yield several thousand dollars' worth of camphor. Trees of average richness, measuring twenty feet around, which are often met with, would supply a stove for some two years, and, at the present price of camphor, yield nearly two thousand yen worth of the drug. One tree near Tokoham (Taikokan) on land in which foreigners were interested, furnished chips for twenty Chinese stoves, and yielded over \$3,000 worth of camphor, and that when the drug was bringing but \$27 per picul. The trees, however, from which most of the camphor is obtained, measure some twelve feet in circumference, and yield something over fifty piculs of crystallized camphor, at present valued at about 1,500 yen. Alarmist reports notwithstanding, the supply of camphor trees in Formosa, assuming that the depletion of the forests continues at the same pace as at present, is still sufficient for the needs of the whole world for the next century. This, however, should not be taken as any excuse for the present wholesale destruction.

The Government would be very shortsighted if it did not introduce some system of afforestation by which trees destroyed would be replaced, for the future welfare of the island should be as much a matter of concern to the authorities as its present well being. Furthermore, the difficulties of transportation increase as the camphor seekers advance toward the interior, and it is necessary to guard against the drug reaching too high a price, lest scientists should be tempted to find some substitute, or other lands be induced to enter on the cultivation of camphor. Many of the hills on which the tree is found are not suitable for ordinary agricultural purposes, and these should be planted with camphor. In other places it is a matter of doubt whether agricultural produce would not be of great value, for it must be taken into consideration that, so far as we now know, from forty to fifty years are required before the tree reaches a sufficient size and richness in the drug to be of value equal to the trees in the virgin forest, and that land devoted exclusively to camphor would yield no income for that period. A happy solution of this difficulty would be to plant in such situations as would permit of agricultural products being grown at the same place and time.

Apart from the drug the tree yields a valuable wood for general purposes, shipbuilding and cabinet work. Clothes boxes made of this wood are especially esteemed, owing to the camphor scent being obnoxious to insects. Furthermore, the shade afforded by this ever-green would be especially useful for certain cultures, e.g., coffee, cacao, vanilla, etc.

Mr. Davidson thus describes head hunting:

The wild man, from some hidden spot on the hilltop, patiently waited until the settlers left for the forest, and then speeding down with stealthy foot, he sought a friendly clump of underbrush near the pathway along which he knew his man would pass. Here, as quiet as death, he watched until the unsuspecting Chinese passed; then, crouching, he left

his retreat, followed for a few steps, and then upright, with the full strength of his sinewy arm, the spear was thrown. His victim falls to the ground, severely wounded. The savage promptly finishes the deed with a long knife, and, severing the head from the body, throws it in the bag, which he carries for the purpose, and disappears in the forest.

The book may be obtained from Messrs. Kelly and Walsh, Ltd.

SIAMESE MALAYA.

The telegram from *The Times* correspondent in Paris, headed "France, England, and Siam," which recently appeared must have furnished, it is safe to assert, reading of a somewhat bewildering character to the average Englishman. The opening paragraph stated that "A Havas Agency telegram announcing that Kelantan, in the Malay Peninsula, had been occupied by 300 Sikhs, was published here yesterday and created a general flutter of dismay in colonial circles." What this sudden irruption of natives of the Punjab into a place, the very name of which not one Englishman in a thousand had ever heard, might portend, how the Sikhs had got there from the other end of Asia, what they might be doing in Kelantan, and why their presence should cause a ferment of excitement in French colonial circles were all, I feel convinced, matters equally dark to the average reader of *The Times*. In these days it is becoming increasingly difficult for "the man in the street" to keep abreast of what is going forward in the more remote and less interesting quarters of the globe. This, to a singular degree, is the case with regard to the haze of international complications which has hung so persistently over the kingdom of Siam since the French fleet forced the passage of the Menam in 1893, for the questions, interesting though they be, which form it have been obscured by larger and more pressing issues, and have so escaped the observation, or at any rate have failed to awaken the imagination, of the British public. These matters, however, have been studied with far more closeness and care by the people of France, and as a proof of it the mere rumour of an occurrence in Kelantan is able to cause "a flutter of dismay" in French colonial circles, while it is safe to say that the same item of intelligence leaves even the members of our Colonial Institute comparatively calm.

To begin at the beginning, Kedah, Trengganu, Kelantan, and Petani (to give them all the letters that belong to them) are States in the Malay peninsula varying from some 10,000 to some 4,000 square miles in area. Ethnologically they are Malayan, and as such are part and parcel of our own protectorates in the peninsula; geographically, also, they are not an integral part of the kingdom of Siam, though politically they are considered as lying within her borders. The unrecorded history of the peninsula, enshrined for the most part in untrustworthy popular tradition, was, before the advent of the white men, and even for many years after the arrival of the Portuguese, one long record of Siamese invasion. A letter is still extant, addressed to Captain Light, the founder of Penang, by the then Sultan of Perak at the end of the 18th century, in which the writer likens his country to a beautiful woman in love with a desirable stranger, but wedded unhappily to a most jealous husband. The prepossessing stranger, of course, was Old John Company, the courtesy of whose agents Perak would willingly have reciprocated had circumstances been propitious, while Siam was the cross-grained spouse who forbade the tempting intimacy. At that time, and for several decades later, Siam laid claim to a suzerainty over a great part of the peninsula, and the customary tribute of flowers fashioned of silver and gold was despatched every three years to Bangkok from most of the Malayan Courts. Over Kedah and Petani Siam maintained her hold, but she slackened her grip upon Perak and Pahang, both of which States passed into the keeping of Great Britain, the one in 1874 the other in 1888, without protest from her. Petani, having been overrun and conquered by a Siamese army, was split up into four petty States, each governed by a native raja appointed by Bangkok, while the Siamese officials at Junk Ceylon had much to say in the management of the internal affairs of Kedah. Kelantan and Trengganu, however, were left practically undisturbed under the rule of their own princes until early in the "nineties," the golden flower—the outward and visible sign of vassalage, according to Siam, a token of the continuance of a friendly alliance, according to the Malay contention—alone bearing witness to former more active Siamese interference. In 1890 the King of Siam, ever keenly interested in the affairs of his kingdom, paid a visit to each of the States in Siamese Malaya, and thereafter a more aggressive policy was adopted by the Government at Bangkok. An attempt was first made to induce the Sultans of these States to adopt the Siamese stamp, for postage purposes, the object being to establish in

this simple fashion something that might be interpreted into an acknowledgment of their position as a part of the kingdom of Siam. To this proposal great opposition was raised by the rajas concerned. The Sultan of Kelantan averred that no one in his country (happy country!) ever sent or received letters, wherefore a postage stamp was obviously unnecessary, while the Sultan of Trengganu roundly stated it to be his opinion that if a stamp were to be introduced at all it must bear his own effigy, since he, and he alone, was the ruler of his country. A family dispute between numerous rival claimants to the throne of Kelantan helped, about this time, to facilitate the schemes of Siam, and presently she had the satisfaction of seeing the flag of the white elephant flying from the staff at the mouth of the Kelantan river, of placing in possession of the sultanate a man of her own choosing, and of triumphantly establishing a post office in a country which still continued to conduct its affairs without the aid of correspondence. This was the thin end of the wedge, and in less than a decade from this time the Siamese Government, in flattering imitation of the system adopted in the neighbouring British protectorate, had placed a "Resident" at Bandar Bharu in Kelantan with an armed escort of Siamese soldiers, for the purpose, so it was stated, of saving the land from the oppression of native rajas and the abuses of native rule.

That such oppression and such abuses were rife no one who is acquainted with a Malayan State under the management of its own chiefs will see the slightest reason to doubt, nor can there be any question but that great benefit would accrue to the natives of the country, were these things to be forcibly and summarily ended. The Siamese, however, are hardly cut out by nature, training, or tradition for any such task as this. Oppressive misrule is a thing not wholly unknown within 100 miles of Bangkok; abuses and official corruption find a natural home in Siam, as in most other independent Oriental kingdoms; and practices which to the European appear in the light of appalling barbarities are still popular in many districts, despite the thin veneer of civilization which the official world of Siam is at such pains to ape. The native idiom which speaks of a Pro-Consul being appointed, not to govern, but to *kin*, or "devour," a province, is still as appropriate as of old, and hitherto the "Resident" at Kota Bharu and his underlings have been chiefly concerned to line their pockets and to take their pleasure at the expense of the native rajas and their subjects. The British system, of which the Siamese policy in Kelantan is a Gilbertian travesty, aims at winning the confidence of the chiefs and the peasantry. The British Resident and his subordinates reorganize the financial affairs of the State; allot sufficient stipends to the chiefs in consideration of the various "squeezes" and barbarous baronial rights which they can no longer be permitted to enjoy; establish Courts in which redress of grievances is to be obtained even by the meanest; are scrupulously careful to treat the rajas and the leaders of the people with elaborate courtesy and consideration; and above all do everything that in them lies to avoid injuring the religious susceptibilities of the native. By these means they speedily overcome the prejudices with which they are regarded at their first coming, and very soon, though certain of the chiefs who have suffered loss of personal power and oppressive privileges may eye them with disfavour, the bulk of the population finds itself supremely contented with the new régime, and discovers that life under its auspices is far more endurable than it was in the unregenerate days of native rule. This is why the protection of the Malay States by Great Britain has been attended by so extraordinary a success. But the Siamese officials, while professing to follow in the footsteps of England, have persistently acted in a fashion which is diametrically opposed to the whole spirit of English policy. Without taking over the administration of the country, without attempting to curtail the powers of the chiefs, or to relieve the oppression under which the peasants groan, without, in fact, doing anything that might be calculated to win the support of a single section of the native community, they have seated themselves in the heart of the Sultan's capital, have caused expensive buildings to be demolished to make room for houses built for their accommodation by unpaid native labour, have lived as royally as circumstances would permit at the Sultan's charges, and with a quite wanton mischievousness and insolence, have gone out of their way to outrage the feelings of the Malays. Thus they have made great display of their phallic idols, and on at least one occasion have attempted to force the rajas of the place to do public obeisance to these abominations. Petty Siamese officers have insisted upon being furnished with chairs, while the Sultan of the country has been made to squat upon the floor of his own audience-hall at their very feet, while the soldiers and the other understrappers have committed excesses which cannot be more particularly described, but which have exacerbated the susceptibilities of a proud, sensitive, and self-respecting Mahomedan

people. As a consequence, the Siamese in the space of a very few months have earned, and have even more richly deserved, the fierce hatred of the Malays of this part of the Peninsula, and more than once strong external influence has alone succeeded in preventing an outbreak of hostilities.

Meanwhile, in Petani proper, and in Raman, the State in the interior which of old was the upper portion of the old kingdom of Petani, the Siamese have been equally busy. Their diplomacy has taken the form of inducing the rajas to set their seals to documents written in Siamese, the contents of which had been explained to them in a sense directly contrary to that which it really bore, and when, the fraud having been discovered, their dupes repudiated these treaties, first the Raja of Petani and then the Raja Muda of Raman were seized by a *coup de main* and carried off prisoners to Bangkok. All these events have occurred, unnoted, of course, by people in Great Britain, during the past 18 months, and at the present time the States of Kelantan and Petani are in a condition of ferment which make almost any sudden outbreak an imminent possibility.

But how, it will be asked, do all these petty politics affect Great Britain? How do they concern France? Great Britain is affected in this way. Her protectorate extends over the greater part of the Malay Peninsula, and her subjects there are connected with the natives of Siamese Malaya by race, by creed, and in many cases by ties of blood. Her officers on the spot are in close sympathy with the Malaya, and misrule and its consequent unrest just across her frontier cannot but tend to disturb the peace of her own territories. Siamese Malaya, in a word, is becoming a thorn in the side of the English Government in the peninsula. It is a secure refuge for malefactors; it has ere now been made the base of operations for little bands of raiders into British territory; it remains lawless and seething with active discontent; it is an ever-present source of anxiety to those who watch over the *Pax Britannica*; and these are considerations which easily induce the leaders of local public opinion to clamour for annexation as the only remedy of a harassing evil. Accordingly the Singapore newspapers, which are more Imperialist than Mr. Seddon himself, do their tiny best to spur the Government onward in this direction, and engage ceaselessly in a fiery fusillade with the inspired French Press of Indo-China. France, on the other hand, is not directly concerned; her interests are on the eastern side of the Menam Valley. But there can be no doubt that any forward movement by Great Britain in Siamese Malaya would be hailed with delight by the more far-seeing of her statesmen, for would it not afford justification for aggression by France on the western side of the Mekong? That forward movement in Siamese Malaya has not yet been made, for the legend of the 300 Sikhs can be traced to the fact that the Sultan of Kelantan, during a recent visit to Singapore, enlisted some thirty Punjabis to act as a police force in his capital, this step having been made necessary by the open lawlessness of the Siamese garrison, whose mission, be it remembered, was to establish good government in a benighted land. That forward movement never will be made, except, perhaps, in the form of practical assistance to Siam, such as the loan of experienced officers to aid in the administration of the little States, must be the devout hope of all who take the widest view of the situation in this part of the world.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

MR. CHAMBERLAIN AND THE COLONIES.

London, October 31.

Sir Henry Campbell-Bannerman welcomes Mr. Chamberlain's visit to the Colonies, as none has ever had a nobler opportunity of exhibiting the fame of the British nation as their governing Power.

THE SOMALILAND AFFAIR.

Colonel Swayne has arrived at Berbera leaving Cobbe in command. The Bohoble(?) garrison is safe; the guns have arrived. Further movement is improbable till a large force is mobilised.

TURKEY AND GREAT BRITAIN.

London, November 1.

The question of the Aden Hinterland has been satisfactorily settled.

TERRIBLE VOLCANIC ERUPTION.

The coffee zone in Guatemala has been

buried seven feet deep in sand and ashes in consequence of volcanic eruptions. The town of Santa Maria has sustained enormous losses.

PACIFIC CABLE COMPLETED.

Later.

The last link in the Pacific cable has been completed. The cable will be opened to traffic in December.

BOERS AND BRITONS.

A number of ex-Boer Commandants and several British officers stationed at Johannesburg have decided to offer their services in Somaliland with one thousand picked men, half Boer and half British.

THE RUSSIAN FLEET.

London, November 2.

Admiral Stakkelberg, with a powerful Russian Squadron, has sailed for the Far East. Though some warships at present on the station are returning home, the Russian Naval force in the Orient will be much strengthened.

BRITISH EDUCATION BILL.

Clause eight of the British Education Bill has passed.

THE ADEN AFFAIR.

London, Nov. 3.

The report announcing the settlement of the Aden boundary dispute was premature. The negotiations continue.

KITCHENER IN EGYPT.

Lord Kitchener and Sir R. Wingate, the Sirdar, inspected the Assouan Dam and subsequently proceeded to Wady Halfa.

THE PORTE COMPLIES.

Later.

The Porte having given categorical instructions for the withdrawal of its troops from the Aden hinterland, the incident is considered closed.

ITALY BOMBARDS AN ISLAND.

Italian gunboats have bombarded the island of Midi in the Red Sea owing to the failure of Turkey to punish Arab pirates.

THE BITTER CRY OF THE RESERVIST.

London, November 4.

A Demonstration of British Army Reservists, held at Hyde Park, passed a resolution demanding justice at the hands of the Government. The chairman of the meeting stated that unless the grievances of the reservists were redressed, the men would march to the recruiting centres in order to hinder recruiting.

MR. CHAMBERLAIN'S TOUR.

Later.

Mr. Chamberlain, Secretary of State for the Colonies, reaches Durban at the end of November. After a stay in Natal he goes to Pretoria.

GERMANY AND GREAT BRITAIN.

The Kaiser's visit to the British Court mainly aims at removing the strong anti-German feeling at present prevailing among government circles as well as among the general public.

GRAND DUKE PAUL DISMISSED.

The Grand Duke Paul of Russia, uncle of the Tsar, who was Commander of the Corps of Guards, has been dismissed from the Army.

SOMALILAND.

London, November 5.

Reuter's correspondent at Aden wires that Colonel Swayne has been recalled from Somaliland to act as adviser to the Foreign Office. Colonel Manning is now at Ber-

bera superintending preparations for an advance, which is to commence six weeks hence, by which time it is expected Colonel Swayne will have reached home.

GRAND DUKE PAUL.

Grand Duke Paul was dismissed from the Russian Army in consequence of his *mesalliance* with the Baroness Pistolhoff, the divorced wife of the adjutant to the Grand Duke Vladimir.

IRISH POLITICS.

Later.

Mr. William Redmond, M.P., landed at Kingston on the 4th of November and was immediately arrested, to undergo six months' imprisonment for intimidation, to which he was sentenced in September.

THE EDUCATION BILL.

The 9th and 10th clauses of the British Education Bill have been adopted.

VENEZUELA.

London, November 6.

The Venezuelan *Official Gazette* declares that the revolutionary army was annihilated in the battle near La Victoria, and the insurrection is crushed.

ANOTHER OFFER OF HELP.

Colonel Royston has offered to raise in Natal a contingent of 500 men to serve in Somaliland.

MR. CHAMBERLAIN.

Mr. Chamberlain sails for the Cape in the week beginning November 23rd.

LORD MAYOR'S SHOW.

Later.

The new Lord Mayor's show includes a car typifying the Anglo-Japanese alliance.

THE EDUCATION BILL.

The 11th and 12th clauses of the Education Bill have been adopted, the Government accepting amendments which increase secular control.

TROUBLED IRELAND.

Mr. Kilbride, formerly an M.P., has been arrested in Dublin. He will undergo four months' imprisonment for inciting to boycott.

(RECEIVED AT THE LEGATION OF FRANCE.)

NEWS FROM FRANCE.

Saigon November 1.

The deputy of Cochinchina, M. Francois Deloncle, has renewed to the Minister of Foreign Affairs his previous protests against the Franco-Siamese Treaty, which he criticises sharply, asking Parliament to reject it.

The Chamber of Deputies has elected the Budget Commission. It comprises 23 ministerialists and 10 of the Opposition.

The Chamber has accepted the broad outlines of the Budget.

THE FRENCH WEST INDIES.

Saigon, November 4.

A telegram from the Governor of the islands of St. Pierre and Guadeloupe, announces that an incendiary fire has destroyed the church, the parsonage, and the Courts of Justice in the town of St. Pierre. There were no victims.

ITALY IN THE RED SEA.

It is announced from Aden that the Italian Government considering the guarantees offered by Turkey against piracy to be insufficient, an Italian squadron has bombarded the town of Midi in the Red Sea.

FRENCH COLONIES.

A decree of the President of the Republic creates in each Colony a Council of Defence, charged with questions relating to military and defensive organisation. Another

decree constitutes in the Ministry of the Colonies a Bureau of Control of the defensive organisations and the technical supervision of artillery in the colonies.

(RECEIVED IN TOKYO.)

HANKOW.

The cholera which prevailed in Hankow during the past year and which caused the death of 6,000 to 7,000 persons, has almost disappeared and ships calling at the port will soon be relieved from medical respectation.

THE PACIFIC CABLE.

Preparations are now being made for laying a submarine cable between San Francisco and Manila. Three ships will be employed in laying the cable, two working from the Manila end and one from that of San Francisco. It is expected that the work will be completed by next July.

(FROM THE "JIJI SHIMPO.")

THE RUSSIAN FLEET.

London, October 29.

The new vessels for the Russian fleet, under command of Rear-Admiral Stackelberg, leave Cronstadt to-morrow for the Far East.

SOUTH AMERICAN TROUBLES.

London, October 31.

The bombardment of Ciudad Bolivar, Venezuela, is hourly expected to be resumed. Fears are entertained for the safety of the foreign residents.

SUBMARINE CABLE.

The submarine cable between Vancouver, New Zealand, Australia and Fiji has been completed.

OSAKA HARBOUR WORKS LOAN.

London, November 3.

The six per cent. Osaka Harbour Works loan bonds will be issued on the London market to-morrow, subscription to be closed on Thursday. The amount open for subscription is £357,000 and the issue price 99.

HOUSE TAX QUESTION.

Professor Louis Renault of the University of Paris, and Mr. Motono, Japanese Minister in Paris, have been appointed Judges of the Arbitration Court with regard to the question of the imposition of the house tax in the former Settlements in Japan.

LORD KITCHENER.

Lord Kitchener has inspected the Assouan Dam, the splendid condition of which work elicited his admiration.

(FROM THE "JAPAN HERALD.")

ASIATICS AND SOUTH AFRICA.

London, October 31.

Sir J. Gordon-Sprigg, Premier of Cape Colony, has declared in opposition to the immigration of Asiatics into the Colony.

It is announced that a Bill is being drafted to secure their exclusion.

A FLOATING DOCK FOR KIAOCHAU.

London, November 1.

A floating dock of 1,600 tons capacity is being completed at Kiel for Kiaochau.

THE MANCHURIAN QUESTION.

The *Saturday Review* argues that the resources of Manchuria have developed and the trade increased more under Russian than Chinese auspices.

British interests, continues the *Review*, will gain if differential duties are firmly opposed, but Japan is an uncertain factor in the case, for the reason that Russia in Manchuria menaces Korea, and therefore Japan will feel compelled to resist Russian ascendancy in Korea.

THE HOUSE-TAX ARBITRATION.

London, November 3.

The *Norddeutsche Zeitung* states that it was decided by lot that the French Professor M. Renault should be the representative of the European Powers in the arbitration on the house-tax question. England had proposed Sir Edward

Fry, the Lord Justice of Appeal, as the representative and Germany had proposed Herr Marlitz.

SOMALILAND.

Ben Viljoen has offered himself for service in Somaliland.

GREAT BRITAIN AND CHINA.

London, November 5.

Viscount Cranborne, speaking in the House of Commons, said the Government's general policy in the Yangtse region had undergone no change.

The Government proposed shortly to lay on the table the papers relating to the evacuation of Wei-hai-wei. These would contain the information as to Great Britain's position on the Yangtse.

THE HANKOW-CANTON RAILWAY.

A Brussels telegram states that the news is confirmed that King Leopold and the Franco-Belgian syndicate have acquired a large block of shares in the Hankow-Canton Railway Company.

The agreement stipulates that half the materials shall be bought in Belgium and half in the United States.

(FROM THE "N.-C. DAILY NEWS.")

THE COAL STRIKE IN FRANCE.

London, via Bombay, October 25.

The French miners' committee has informed M. Combes that it will accept arbitration.

LORD HOPETOUN'S REWARD.

Lord Hopetoun's title has been gazetted as Marquis of Linlithgow.

ROYAL PROGRESS THROUGH LONDON.

London via Bombay, October 26.

The State progress of the King and Queen through London was favoured with pleasant warm weather. Salutes were fired as their Majesties left Buckingham Palace at noon. They were received by the Lord Mayor at Temple Bar. At the luncheon at the Guildhall the Lord Mayor presented an address to which the King replied, thanking him.

The King said that he was deeply touched by the congratulations on his coronation and his restoration to health.

The procession traversed the principal streets south of the Thames, returning to Buckingham Palace at half-past three. The route was decorated and lined with troops.

DETAILS OF THE BATTLE IN SOMALILAND.

Describing the battle in Somaliland, Reuter's correspondent at Aden wires that the enemy suddenly charged the right flank of the British force, while it was advancing through dense jungle on the 6th instant. The Mad Mullah's troops met with such a severe fire from the African Rifles, that they swung round towards the centre and left, which the transport had overlapped owing to the density of the bush, throwing them into confusion.

The result was that the firing line was broken, a Maxim captured, and Philips shot. Gellatly was killed while attempting to rally the men, and Everett while attending him. The disorder spread to the centre. Angus was killed while resolutely serving the guns, and Cobbe continued serving them. A charge led by Colonel Swayne checked the enemy; the British forces then made a zebra. In the afternoon they sortied and chased the enemy, recapturing a number of camels with their loads, but the Maxim was not recovered. Sixty-two of the enemy's dead were counted, and we lost seventy killed.

THE BRITISH CONCESSION AT TIENSIN.

Tientsin, October 28.

The so-called American Settlement has been formally annexed to the British Concession, greatly increasing the river frontage.

BRITISH SQUADRON COMING NORTH.

Hongkong, October 29.

H.M.S. *Espiegle* left for Woosung on Tuesday and the *Amphitrite* to-day. The *Albion*, *Cressy*, and *Talbot* are to leave at the end of the week, and the *Blenheim* will follow after being docked.

THE KING HONOURS MR. CHAMBERLAIN.

London via Bombay, October 29.

It is officially announced that King Edward expressed a wish that Mr. Chamberlain should visit His Majesty's dominions over seas in one of His Majesty's ships. The Admiralty have accordingly selected H.M.S. *Good Hope* (which was given to the Navy by the Cape Government) to convey Mr. Chamberlain to South Africa.

AN UNAPPRECIATED SCEPTRE.

The celebrated filly Sceptre, winner of the St. Leger and many other races, was offered for sale at Newmarket with the reserve price of 24,000 guineas. There was no bid, and she was withdrawn.

THE CAMBRIDGESHIRE.

London via Bombay, October 30.

The following is the result of the Cambridgeshire Handicap, run on the 29th inst.:

Ballantrae, 3 years, 6st. 11lbs.....	1
St. Maclo, 4 years, 8st. 9lbs.....	2
Nabot, 3 years, 6st 12lbs.....	3

THE CHOICE OF ABERDEEN.

London via Bombay, October 31.

The Right Hon. C. T. Ritchie, M. P. (Conservative), has been elected Lord Rector of Aberdeen University by 360 votes against 332 votes cast for the Right Hon. H. H. Asquith, M. P. (Liberal).

SKIN TORTURES

And Every Distressing Irritation of the Skin and Scalp Instantly Relieved by a Bath with CUTICURA SOAP

And a single anointing with CUTICURA, the great skin cure and purest of emollients. This is the purest, swiftest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply skin and scalp humours with loss of hair, and has received the endorsement of physicians, chemists, and nurses throughout the world.

Millions of Women

USE CUTICURA SOAP, exclusively, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, in the form of baths for annoying irritations, inflammations, and chafings, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative antiseptic purposes which readily suggest themselves to women, and especially mothers, and for all the purposes of the toilet, bath, and nursery. No amount of persuasion can induce those who have once used it to use any other, especially for preserving and purifying the skin, scalp, and hair of infants and children. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and

beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, the BEST toilet soap and BEST baby soap in the world.

Complete External and Internal Treatment for Every Humour,

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales and soften the thickened cuticle, CUTICURA Ointment, to instantly allay itching, inflammation, and irritation, and soothe and heal, and CUTICURA RESOLVENT, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure the most torturing, disfiguring, and humiliating skin, scalp, and blood humours, with loss of hair, when all else fails. Sold throughout the world. Aust. Depot: R. Towns & Co., Sydney, N. S. W. So. African Depot: LENNON LTD., Cape Town. "All about the Skin, Scalp, and Hair," free. POTTER DRUG AND CHEM. CORP., Sole Props., Boston, U. S. A.

HOLLOWAY'S OINTMENT

IS A HOUSEHOLD NECESSITY

It cures Rheumatism, Sciatica,
Stiff Joints,

Glandular Swellings,
Sore Throat, Quinsy, Mumps,
Burns, Piles, Fistulas, &c.

**AND EVERY
FORM OF SKIN DISEASE.**

Manufactured only at 78, New Oxford St. (late 533, Oxford St.),
London. Sold by all Chemists and Medicine Vendors.

UNTOUCHED BY HAND.

MELLIN'S FOOD

For INFANTS and INVALIDS.

When prepared is similar to Breast Milk.

MELLIN'S FOOD WORKS, PECKHAM, LONDON, ENGLAND.

DINNEFORD'S

The Universal Remedy for Acidity of the
Stomach, Headache, Heartburn, Indigestion,
Sour Eructations, Bilious Affections.

MAGNESIA

The Physician's
Cure for Gout,
Rheumatic Gout
and Gravel.

Safest and most
Gentle Medicine for
Infants, Children,
Delicate Females,
and the
Sickness of Pregnancy.

TRUE HAIR GROWER

When I was bald I came into possession
of the secret of a genuine
hairgrower. My hair grew
to its present length
in about 40 days.
Hundreds of other
similar cases. I am
selling the marvel-
lous preparation. To
introduce it I will
post you a trial box
in sealed plain parcel
for only 4 stamps.
Try it, as I did, and
convince yourself.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 15TH, 1902.

MARRIAGE.

At the Union Church, Yokohama, by the Rev. E. S. Booth, D.D., and before the U.S. Consul-General, Dr. FREDERICK ALEXANDER ROBINSON, of Shanghai, to MARY EMMA, youngest daughter of George and Elizabeth Settle, of Philadelphia, U.S. of America.

DEATH.

At the Yokohama General Hospital at 5 p.m. on the 7th November, DUNCAN MCLAREN, a native of Scotland.

SUMMARY OF NEWS.

A WEEKLY paper called the *Sanuki Jitsugyo Shimbun* was published at Takamatsu on Nov. 7th.

A BRANCH office, belonging to the Yokohama Custom House was opened at Niiijima-mura, Izu Island, on the 1st inst.

FIRE broke out in a house at Shitotsubashi-dori, Kanda, Tokyo, at 2 p.m. on Nov. 10th. Six houses were destroyed and eight damaged.

The Japanese cruiser *Izumi* left Shanghai for Nanking on the 9th inst. She will attend the funeral of the late Viceroy Liu Kun-yi.

The new building of the Yokohama Orphanage Hospital at Kuboyama was opened on the after-

noon of the 10th inst. Mr. Rinoiye, Secretary of Kanagawa Ken, Mr. Watanabe Chief Judge of the Yokohama Chihō Saibansho, and over 200 persons were present.

ON Nov. 9th a collision took place at Yashiro Station on the Shinyetsu Railway between a passenger train and a goods train, resulting in injury to two passengers.

A THIEF armed with a pistol entered a box-maker's house at Kotobukicho Ichome, Yokohama, early on the morning of the 10th instant and having stolen *yen* 18.

Two Korean officers, while staying at a hotel in Moji, were robbed of *yen* 2,880 on the night of Nov. 7th. The thief has not yet been arrested. The officers came to Japan to witness the autumn manoeuvres in Kyushu.

TEA exported abroad from Yokohama during the month of October totalled 3,000,605 *kins*, including 373,742 to San Francisco, 503,089 to Canada, 17,133 to the Pacific coast, 977,516 to New York and 1,129,125 to Chicago.

MR. KIUCHI, Chief of the Commercial and Industrial Section in the Department of Agriculture and Commerce, will shortly leave Tokyo for the United States in connection with the St. Louis Purchase Exhibition to be opened in 1904.

THE *Tokyo Asahi* reports that the Japanese Government recently demanded of China a concession to lay a railway from Amoy to Hankow *via* Foochow and that the negotiations are now in progress between the representatives of the two countries.

THE Crown Prince of Siam, now touring the United States, will leave Vancouver on Dec. 1st by the *Empress of Japan* for Yokohama. His Highness is expected to arrive at this port on or about Dec. 13th. He will proceed from here to Siam in a Siamese warship.

THE third class cruiser *Nitaka*, which will be launched at Yokosuka on Nov. 15th, is of the following dimensions:—Tonnage, 3,400 tons; speed, 20 knots; horse power, 9,400; length, 334 feet 8 inches; beam, 44 feet; depth, 27 feet 3 inches and draught; 16 feet 1 inch.

THE floatation of the Oaka Harbour works loan on the London market does not seem to have been very successful. A telegram received from London by the Yokohama Specie Bank, says the *Asahi*, states that the loan had been poorly subscribed, transactions showing a discount of .2 per cent.

ON and after Nov. 20th the through trains from Uyeno to Aomori will be provided with steam-heaters. The task of installing the apparatus is now going on in the Omiya Station compound, where they are also constructing six sleeping cars. The latter will be attached to through trains in April next year.

A REPORT from Kobe dated Nov. 8th says that over 120 persons were arrested by the Yamazaki Police on a charge of having surreptitiously cut timber in the Government forests in Banshu. They are all villagers of Kamachi-mura and it appears they have been stealing timber since about 1895.

BISHOP JULIUS has created somewhat of a sensation at the Anglican Congress lately sitting in Adelaide, by boldly declaring himself in favour of cricket being permitted on Sundays where people

have no other time at their disposal for purposes of recreation, arguing that the concession will tend to promote morality and check indulgence in vicious courses.

SEVERAL days ago the Ministers of the Finance and the Home Department rejected an application sent in by the Yokohama City Authorities asking that permission be given for the raising of a loan to the extent of *yen* 1,250,700. The Yokohama authorities intended to apply the money, if raised, toward the work of reclaiming the foreshores at Honmoku and other undertakings. It is stated that the application will be submitted again next year.

THE autumn athletic sports meeting of the students of the Tokyo University took place in the grounds of the institution on the afternoon of Nov. 8th, the weather being all that could be wished for. The sports were witnessed by a large number of spectators, including the faculty of the University, ladies and gentlemen of high standing and others. There were 19 events altogether.

WITH a view to affording as much facilities as possible to passengers, especially cabin passengers, the Yokohama branch of the Nippon Yusen Kaisha has decided to engage a staff to carry passengers' effects to and from vessels, besides attending to other minor matters. These employees will wear nickel medals on their breasts to distinguish them from other employees. Mr. Iwasaki Rentaro is in charge of the new departure.

AN Osaka report says that the Canadian Government having obtained the sanction of the Japanese Authorities, has entered into a contract with a Mr. Obayashi for the construction of the Canadian Exhibition Hall in the compound of the Fifth Domestic Exhibition at Osaka. It is to be completed by January 15th next year. The area of the building is said to cover 208 *tsubo*. Mr. Matsuda, one of the Exhibition commissioners, has been appointed to superintend the work.

A PRESENT in the form of a *sake* cup has been given to Mr. Alan Owston, merchant and naturalist, of No. 179, Yokohama, by Governor Sufu of Kanagawa Prefecture in recognition of his contribution to the Tokyo University, which consisted of twelve volumes relating to natural history. The Rev. A. Lloyd, of Tsukiji, Tokyo, was also the recipient of a similar present on account of having contributed a musical instrument to a primary school in Hakone.

COMPLAINTS have been made by exhibitors interested in the coming Fifth Domestic Exhibition in Osaka on the ground that the buildings of the Exhibition are too limited to allow of exhibits being arranged in a proper manner according to the nature of the articles. The general idea, says a Tokyo paper, is that the complaints will become more acute when the time of opening the Exhibition approaches and that the Authorities many have to reject a number of exhibits for this cause.

AN establishment calling itself the Tohoku Tanko Tetsudo Kaisha (North eastern Coal-mining and Railway Company) will shortly be opened in Ota-machi, Yokohama, under the auspices of several citizens of this port. The projectors of the undertaking are now occupied in raising funds. The business of the proposed concern is to work a coal mine which was lately discovered in Iwaki, Fukushima Prefecture, and also to construct a railway between Shirakawa and Tanakura with a view to transporting the output.

THE ARBITRAL TRIBUNAL.

Saturday, Nov. 8.

Speaking of the Arbitral Tribunal appointed to adjudicate the question of the house tax, a local contemporary observes that in order to determine whether persons preferring Sir Edward Fry as arbitrator are influenced by "prejudice or partiality," it would be necessary to make "a minute enquiry into the personality of Sir Edward Fry, and might raise such questions as whether a courtly diplomat of rooted diplomatic principles would or would not be likely to be influenced, even unconsciously, by the diplomatic relations of Japan *vis-à-vis* Great Britain—a problematical situation from which the appointment of M. Louis Renault is entirely free." So Sir Edward Fry is "a courtly diplomat." When did he assume that character, we wonder. Apparently the journal making this statement is entirely ignorant about Sir Edward Fry's life. It imagines him to be a member of the diplomatic service, whereas his whole career has been legal, and until the time of his retirement from active duties, he served as a Justice of the Court of Appeal. The proposition advanced by the *Japan Gazette*, therefore, is that a distinguished English Judge could not be trusted to arbitrate with strict impartiality in a matter where international relations were remotely concerned. That is a view of which the journal advancing it may probably claim a monopoly.

We do not profess to understand what is meant by "rooted diplomatic principles." But the doctrine that they disqualify a man for arbitral purposes is dangerous to advance in this case, since both of the arbitrators actually appointed are diplomatists. We can only repeat that we regard the composition of the tribunal as decidedly unfortunate, not because we doubt the technical competence of either of the arbitrators or his desire to be fair, but precisely because each of them must necessarily approach the problem with a prejudice in favour of the views of the Foreign Office by which he is employed, Mr. Motono being Japan's Minister in Paris, and Mr. Renault being not only a French Minister Plenipotentiary but also Jurisconsult of the Foreign Office in Paris. If such a tribunal agrees, the result will be a remarkable tribute to the independence of one or the other of the arbitrators. They can scarcely be expected to agree, and it is for that reason, mainly, that we should have preferred a court composed of judicial officers—above all, English or American judges—who would examine the problem solely by the cold light of right and justice. It is amusing to find that even such an obviously reasonable preference offers an opportunity to a local journal to delve after unworthy motives, but of course the subjective origin of that kind of argument needs no comment.

Tuesday, Nov. 11.

It is stated by the *Niroku Shimpō*—which sometimes succeeds in obtaining information ahead of its contemporaries—that although the Japanese and the French members of the arbitral tribunal have had several meetings for the purpose of selecting an umpire, they can not come to an agreement. Mr. Motono, representing the views of his Government, claims that as incomparably the largest interests involved are Anglo-Saxon, and as the main part of the documents will be in English, an English-speaking judicial expert should be selected. He therefore advances the name of Mr. Justice Fuller, of the United States Supreme Court, as his first choice. M. Renault, however, is equally

insistent that a Russian or a German should be appointed. We are not aware what arguments M. Renault advances in support of his position, neither can we easily conceive them, unless, indeed, he holds that an expert belonging to the nationality having conspicuously the smallest interests at stake, would be most likely to arbitrate impartially—an intelligible contention. In the event of Mr. Motono and Mr. Renault failing to agree about Justice Fuller, our contemporary alleges that Mr. Motono will probably be instructed to propose Lord Alverstone, Lord Chief Justice of England. Japan's action in this matter may justly be applauded by English-speaking peoples. It seems to us that in common fairness the duties of umpire should be entrusted to an Anglo-Saxon judicial expert. According to present appearances, however, the choice will ultimately rest with the King of Sweden.

Wednesday, Nov. 12.

Journalistic controversy in this settlement often has one compensation, namely, that it affords food for merriment and also furnishes examples of quaintly tortuous morality. The slight discussion that has occurred with reference to the composition of the house-tax arbitral tribunal is a case in point. Of the two members nominated to compose the Court, one represents the Japanese Foreign Office, the other the French Foreign Office. It is plain that each must approach the question with more or less bias, and that a purely judicial decision can scarcely be expected from them. Those that desire to see the problem settled solely on its merits would naturally have preferred for arbitration men like Sir Edward Fry, an ex-justice of the British Court of Appeals and an expert of world-wide repute as a jurisconsult, or Mr. Justice Fuller of the United States Supreme Court. Of course in indicating Sir Edward Fry, there could be no idea of suggesting that other British judges would not be equally competent. But the range of choice is limited by the provision of the Protocol which says that the arbitrators must be members of The Hague Tribunal, and among those members Sir Edward Fry is the only British Judge. Hence, when the composition of the Court was announced, we expressed regret that the choice had fallen upon men who could not take their seats on the arbitral bench with absolutely unbiassed minds, and not upon a man like Sir Edward Fry who would bring to the subject the best traditions of the English Judiciary, total independence of executive influences and unqualified fidelity to the cause of strict justice. This expression of our views elicited distressed comments from the *Japan Gazette*. It applied itself to discover some secret and unworthy motive for our remarks, and it found what it sought in a strange hallucination of its own, namely, that Sir Edward Fry is a diplomat and that, consequently, the Anglo-Japanese alliance would sway him in favour of Japan. There was no possibility of mistaking the description applied to Sir Edward. Our contemporary spoke of him as "a courtly diplomat of rooted diplomatic principles," and queried whether he "would or would not be likely to be influenced, even unconsciously, by the diplomatic relations of Japan *vis-à-vis* Great Britain." That was obviously a blunder. The *Gazette* confounded Sir Edward Fry with some one else—a quaint blunder but not too serious to be frankly admitted. The *Japan Gazette*, however, does not think of admission. It seeks to defend itself by protesting that "many striking figures in contemporary history are diplomats in the truest

sense without having served an apprenticeship in the Foreign Office," and through this extraordinary loop-hole of escape from its palpable error, it proceeds to wriggle by suggesting that Sir Edward Fry is not "an official diplomat." So, then, it was in Sir Edward's character of a "private diplomat" that the *Gazette* spoke of him as being of such "rooted diplomatic principles" that his judgment in the house-tax question might be swayed by the diplomatic relations of England and Japan!

But it appears, after all, that though to be a private diplomat—which character the great English Judge possesses in the imagination of the *Japan Gazette* only—disqualifies him for the functions of arbitration, the fact that he is not an "official diplomat" equally disqualifies him, since then "he would have been a still poorer match for Mr. Motono who is an official diplomat." The *Gazette's* confusion of thought is really quite wonderful. It will not have an English Judge, because it suspects him of unofficial diplomatic leanings, and it will not have him because he has no official diplomatic leanings, so that it will not have him for two reasons one of which is flatly contradictory of the other! All this is in due accord with the amusingly bewildered-nature of the *Gazette's* general arguments about the house tax.

We spoke, however, of tortuous morality and we shall explain the grounds of that expression. Having affirmed that Sir Edward Fry, not being an official diplomat, "would have been a still poorer match for Mr. Motono, who is," the *Japan Gazette* proceeds thus:—

But that very inequality in Arbitrators, in favour of Japan and at the expense of foreigners, is evidently what the *Mail* hoped for, and embodies what it calls "a reasonable preference." It had already declared so when it said:—

"If it be claimed that Sir Edward Fry could not have been trusted to render a decision entirely unbiassed or entirely in accord with the merits of the case, or if it be claimed that to prefer him is to show a desire for Japan's success, then we freely admit our own prejudice and partiality."

"For Japan's success," which we italicise, must only mean also "foreigners' loss." Here, then, we have a perfectly plain explanation of the *Mail's* tortuous pendency. It favoured the appointment of Sir Edward Fry, because it believed him to be unequal to Mr. Motono and in the hope that Japan would, therefore, tend to win the decision in this arbitration and that foreigners would be defeated. For the first time it categorically confesses that it prefers Japanese to foreign success.

Thus we are charged with desiring Sir Edward Fry's appointment because he would not have been a match for Mr. Motono, and this "inequality in arbitrators" would have made for Japan's advantage! Sir Edward Fry not a match for Mr. Motono! Yes, indeed, we frankly confess that the obvious disparity of intellectual strength did not occur to us. The English Judge would have been quite outclassed by the Japanese diplomat. To be sure, since each arbitrator will render his judgment chiefly on the strength of the written documents submitted for his examination, it is not easy to see how Mr. Motono's commanding talents could have swayed Sir Edward's judicial acumen. But the *Japan Gazette* doubtless apprehends the method of that subtle process, and we have only to admit that the peril of pitting an English Justice of the Supreme Court and a renowned jurisconsult against a Japanese diplomat still unknown to fame, did not strike us with due force.

That, however, is not what we meant when we spoke of "tortuous morality." The tortuous morality is shown in our contemporary's pretence that we declared a preference for Japan's success over foreign because we avowed ourselves willing to be

charged with that choice as a corollary to Sir Edward Fry's incompetence. If, said we, Sir Edward Fry could not have been trusted to render a just and impartial decision, if to desire him as arbitrator is to desire Japan's success, "then we freely admit our own prejudice and partiality." That is what the *Japan Gazette* describes as a "categorical confession of preferring Japanese to foreign success." "If the world be not round, then I confess that I know nothing of geodesy"—such an avowal, according to the *Japan Gazette*, is a categorical confession of ignorance of geodesy! Can it be possible that our contemporary is so obtuse as to perpetrate these blunders unconsciously? We should like to take that charitable view, but the extreme paucity of persons so slenderly endowed with reasoning powers is a serious obstacle.

POLITICAL GOSSIP.

The *Kokumin Shimbun* publishes an article from the pen of Mr. Tō Taro, its Peking correspondent, on the subject of Japan's relations with Russia. He takes the line that the St. Petersburg Government has shown unequivocal signs of a desire to establish friendly relations with Japan. This statement rests on various grounds. The first is that the Russian troops are being withdrawn from Manchuria, although for their continued presence there sufficient pretexts are not wanting. The second is that the Russian authorities not only offer to dispose of parcels of land at Dalny to Japanese subjects, but have even taken steps to urge, through the Japanese consul at Newchwang, the desirability of such purchases. The third is that Mr. Branson, hitherto chief of the Japan section of the Asiatic Bureau in the St. Petersburg Foreign Office, has now been appointed director of foreign business in the Liaotung Peninsula. Mr. Branson is not only well acquainted with Japanese affairs, but also friendly to this country, and he will be serving under a chief, Admiral Alexieff, who desires nothing better than an *entente* with Japan. The fourth proof is the nomination of the present Governor-General of the Amur Region to be a Privy Councillor, which means that an official who has hitherto shown himself not at all friendly to the Japanese, is removed from the sphere where his displays of hostility have taken place. Mr. Tō deduces from all these facts a confident conviction that Russia is animated by a strong desire to cultivate Japan's friendship.

The *Fiji Shimpō* writes that Count Katsura, having caused the outlines of the Budget to be printed, and having distributed copies among the leading members of the House of Peers and the House of Representatives, made an explicit oral statement of his policy to delegates of both Houses. He explained that in the steps of administrative re-organization undertaken by the Ministry, the object had been, not merely to save money, but to produce greater efficiency and expedition in the discharge of official business. In obedience to that principle the financial economy resulting from the contemplated changes was comparatively small, but it was hoped that comparatively large results would ensue. Concerning naval expansion, the Minister declared it to be essentially necessary, and added that the easiest source from which funds could be obtained was the land tax. The Cabinet had therefore resolved to ask the Diet to rescind the five years' limit

of period for increased taxation, and to make the term indefinite.

There is nothing new in these statements. The information they convey has been public property for some time. But a direct declaration from the Prime Minister is now heard for the first time.

It is alleged in some quarters that should the naval-increment programme receive the endorsement of the Diet, the line-of-battle ships will be built at Lord Armstrong and Company's yard, and the cruisers will be constructed in Japan. The time required to build a line-of-battle ship in this country would be 5 years, and it is problematical whether the work could be done satisfactorily. But with smaller vessels the case is said to be different, and the authorities are credited with intending to utilize this occasion not merely for purposes of naval increment but also for developing the ship-building skill of the country. It will be interesting to observe whether such a programme can be carried out in the case of the first-class cruisers—9,500 tons. Under any circumstances nearly all the materials would have to be obtained from abroad, so that Japan's task would be considerably circumscribed. Still if she can perform it, she will deserve credit.

According to the *Nichi Nichi Shimbun* the General Committee of the *Seiyu-kai* decided, on the 7th instant, that the Party must assume an attitude of opposition to the two programmes of naval expansion and the continuance of the land tax at its present rate. The Committee's hands are said to have been more or less forced by the doings of individual members, who, on their own responsibility, declared themselves hostile to the Ministry's proposals, so that had the Committee postponed action, there would soon have been no action to take. On the 8th, the Committee waited upon Marquis Ito and informed him of its decision. The *Asahi* says that among 9 members of Committee present at the meeting, not one approved the Government's programme. Marquis Ito is reported not to have given any explicit answer, but to have intimated indirectly that his ultimate decision would not be opposed to that of the Party.

If this account be correct, we really fail to see that the *Seiyu-kai* any longer maintains even a semblance of obedience to its chief. It no longer follows Marquis Ito; it leads him. But we suspect that only a part of the truth has been told.

Representatives of the Agricultural Associations throughout the Empire held a general meeting in the Yayoikan on the 11th instant, when Baron Kikuchi, Minister of Education, delivered one of the eminently practical speeches for which he is becoming famous. He warned the people of the commons against the foolishness of establishing technical schools merely for the honour and glory of the thing, and he told them that their first consideration should be for the actual requirements and resources of their locality. Referring to a complaint now constantly heard, namely, that men who have just graduated from a technical college are of little use for practical work, the Minister acknowledged the justice of the criticism, but he said that such a state of affairs was almost inevitable. Colleges gave theoretical education, for the most part. Ability to apply the knowledge to practical affairs, must be acquired subsequently. Nevertheless, theoretical learning must not be despised. Of two men

entering the field of practice, one equipped with theoretical knowledge and one unequipped, the advantage would be ultimately on the side of the former in a marked degree.

Even the *Nichi Nichi Shimbun* acknowledges the extreme difficulty of the position in which Marquis Ito now finds himself. He has received from the Cabinet Ministers an explicit statement of their programme as to naval expansion and the land tax, but he has expressed no opinion on the subject, recognising that the fullest examination and reflection must precede decision. Not so, however, the General Committee of the *Seiyu-kai*. They have not hesitated to pledge themselves to an attitude of opposition to the Ministry, and they adopted a resolution in that sense before consulting the Marquis. In short, they informed him of their resolve after it was taken, instead of seeking his preliminary advice or sanction. That looks very like formal repudiation of his leadership. Certainly it must be regarded as disavowal of his authority, unless, indeed, the Committee already possessed unannounced information as to his views, a not unlikely hypothesis, seeing that among the members of the Committee are included Baron Suyematsu and Baron Kaneko. It will be evident, however, that even though the Committee knew themselves to be acting in accordance with Marquis Ito's ideas, they should certainly have awaited some expression of them before taking definite action, for the independence of the position actually assumed by them amounts almost to insubordination. Should Marquis Ito now consent to descend from the pedestal of dictator to the stool of dictation, he may remain nominal head of the *Seiyu-kai*. But if he declines to sign articles of self-effacement, the *Seiyu-kai* must be shattered. That is what the *Nichi Nichi* says, in effect. The corollary presenting itself to foreign on-lookers is that the *Seiyu-kai* deserves to be shattered. Its members have no conception of the discipline essential to the solidarity of a political party. But perhaps we know in part only, and fuller knowledge may unravel these perplexities.

CHINESE NEWS.

Saturday, Nov. 8.

Dalny is evidently to be the great centre of Russian enterprise in southern Manchuria. The works of the Railway Company are to be moved thither from Port Arthur, and the head office also of the Company is to be transferred from Harbin to the same place.

It is again stated that from the 7th of next January special trains will be despatched weekly from Dalny and Moscow, performing the journey with very few stoppages. Presumably these trains will cover the distance in 10 or 11 days, so that little more than a fortnight will suffice to reach London, Paris or Berlin from Tokyo. Undoubtedly mails for the Far East will take this route. It will bring us within very close reach of news from home. Meanwhile merchandise from Hankow is already beginning to travel westward *via* Dalny. The Russian authorities have decided to make a special reduction of import duty upon tea going to Europe by train from Dalny, and it is stated that Indian tea-growers see in this fact a new opportunity for competing with Chinese tea in the Russian markets. It will be a strange freak of fate if another blow is to be given to the semi-moribund tea trade of China owing to

Russia's acquisition of Liaotung. There will be some interesting developments, we expect, of the frontier-duties system which Russia affects, and which she is already seeking to carry out at Vladivostok in discrimination against Japan.

It may be mentioned in this context that the Russian Authorities are said to have granted special allowances for officers studying Chinese and Japanese at the Oriental College in Vladivostok. These allowances are calculated on the hypothesis that 8 officers attend the School from Siberia and 2 from Manchuria. An officer studying both the language and the literature of China or Japan will receive a yearly allowance of 1,000 roubles, and the grant for an officer studying language alone will be 500 roubles. Russia must have great need of men speaking these two languages. It would be well if England also gave similar assistance to special education.

Mr. Wu is to leave America on the 14th instant. Immediately on his arrival in China, the commercial treaty negotiations will be resumed.

Viceroy Chang arrived in Nanking on the morning of the 5th inst. It thus appears that the rumours about his having decided to decline the appointment of Viceroy of the Two Kiang were unfounded. At the same time there are good reasons for thinking that he will not hold the post permanently.

Reports from Kwangsi indicate a recrudescence of insurrectionary trouble in that province. The rebels are said to have attacked Kweichow, and to be causing much anxiety to the military authorities.

The Empress Dowager has gone to the Summer Palace. Her Majesty has been performing many acts of benevolence during the past few weeks, in view of the approach of winter.

It is stated that the emoluments of Mr. Wang, who has been appointed to the office of Chief Inspector of Chinese students in Japan, are to be twenty thousand taels.

Monday, Nov. 10.

The new commercial department in Peking is to have Mr. Ku Hung-ki for chief, and its Vice-Minister will be Mr. Wu Ting-fong, now Chinese Representative in Washington.

It is stated that the intention of the Chinese Government was to appoint Mr. Wu Ting-fong as chief commissioner for the revision of the commercial treaties, in place of Mr. Shêng I-fai, who has been obliged to retire temporarily owing to his mother's death. Shêng is the occupant of various posts, and his retirement for the purpose of mourning would cause such a dislocation of public business that an attempt was made to induce the Government to shorten the period from 3 years to 100 days. According to Chinese etiquette this abbreviation of the conventional period must be ordered by the Court, and is consequently regarded as an indirect tribute to the value set by the Government on the services of the official concerned. There is such a thing, however, as conveying a suggestion to the Court, and Shêng is said to have made an effort of that nature. But his enemies—of whom, being an important personage he has many—proved too strong for him, and he was condemned to 3 years' retirement. Concerning the appointment of a successor to his various posts, Yung Lu and Wang Wen-shao are said to have had a difference of opinion, but as to

that particulars are deficient. At any rate Wu Ting-fong, who is not Yung Lu's candidate, was nominated to the position of treaty-revision commissioner. He is said to have asked to be relieved from the post, however, as he has no knowledge of the course of the negotiations hitherto.

Yung Lu is credited with the design of adding thirty thousand men to the Imperial Guards. Ten thousand of them are to be taken from the Banner Corps, and all will be drilled and armed in foreign style.

It is stated in Peking, according to a telegram to the *Asahi Shimbun*, that Mr. de Witte was not favourably impressed by his inspection of the Liaotung positions and of Manchuria in general. Exactly what that signifies we do not know.

Wednesday, Nov. 12.

The *Official Gazette* announces that from the 20th of this month the claims of individuals in connexion with the Boxer outrages will be paid by the Treasury, applications being made by the claimants to the local authorities, or, if abroad, to Consuls or Ministers. During the period July 1st, 1900, to June 30th, 1901, interest at the rate of 7 per cent. per annum is to be allowed on claims of a commercial nature and 5 per cent. on ordinary claims. Thereafter the rate carried by Chinese Indemnity Bonds, namely, 4 per cent., will be given. The sums allowed will be paid with Japanese five-per-cent. bonds, fractional amounts being handed over in ready money. Those desiring Chinese Bonds can obtain them.

It is stated that in the sequel of Mr. de Witte's observations in Manchuria, the Russian Authorities have decided to postpone until next June the opening of the Manchurian branch of the Trans-Asian Railway to general traffic.

There is a rumour that an insurrection has broken out in the south-west of the province of Chili, and that the efforts made by the local troops to suppress it have been unsuccessful, thus far.

Owing to the machinations of Yung Lu, an attempt is being made to deprive Shêng I-fai of all his offices, in connexion with his retirement to mourn for his mother's death. Shêng, however, is said to have the support of Wang Wen-shao and Prince Ching.

The question of appointing a Governor of Chili, who should have his residence at Paoting, is alleged to have been decided affirmatively by the Chinese Ministry, but no appointment has yet been made. It seems inevitable that this step will curtail the power of Viceroy Yuan.

It is alleged that Russia proposed to lend to China, for the purpose of building a line from Peking to Jihol, the sum of a million taels, which China owes Russia on account of the extra-mural railway.

KOREA.

Stories of Korean assassins coming to Japan to attempt the lives of Pak Yong-hyo and other prominent Korean refugees, were recently circulated, but contradictions followed speedily, some involved tale about monetary defalcations being substituted. Now, however, Tokyo journals allege that two arrests have been made; one of a man named Li Song-pak, whom the police apprehended in Kobe; the other of a certain Li Do-sun, who was found at Hojo in Awa, where his attempts

to "shadow" some of his intended victims brought him into suspicion. Our Tokyo contemporaries express great satisfaction that both of these attempts were frustrated. They further note a rumour that certain Japanese subjects are acting in collusion with the assassins.

The two men apprehended on a charge of attempting to assassinate Korean refugees in Japan are said to have been among the batch of students that came from Seoul to Tokyo in 1898, and were educated at the Keio-gijuku. Poison was the means that they intended to employ. It is alleged that their instigator was a Colonel commanding at Pyong-yang, and that the family of the Lady Wong (Om) are deeply implicated in the nefarious design. The intended victims were Pak Yong-hyo, Li Chung-yong and Yu Kil-sung, the last of whom is now in the Bonin Islands. Tokyo newspapers allege that this is the third attempt made during the present year, and that no reliance can be placed on the rumours circulated some time ago that the essay said to have been made in Osaka was a fabrication intended to divert attention from a crime of another kind. Evidently if proof of all these allegations be forthcoming, the effect upon Korean politics may be marked. But it is hard to believe anything of what is stated on such subjects by vendors of news. Formerly the dagger was the weapon with which Korean assassins were supposed to be armed, but now they seem to work with the subtler and more difficult resource of poison. To administer poison successfully demands conditions which are very difficult to establish, and which these miscreants are not at all likely to establish now that their repeated failures have forewarned their intended victims. But the question arises, how long is Japan going to allow her territory to be made the arena for such exploits. Korea has a heavy score against Japan in connexion with the terrible tragedy of 1895. That, however, does not in any degree extenuate manœuvres like those of the two Li and their military and official instigators.

It was stated, some time ago, that the Korean Government had resolved to undertake a reform of the system of weights and measures by adopting Japanese standards in several respects. A report from the Japanese Consul in Seoul now says that an office has been organized for the purpose; that its functions will be to control the manufacture and examination of weights and measures; that a law relating to the subject was enacted and promulgated on the 21st of September, and that the new system will go into operation from the 1st of next July.

An ordinance—No. 256—has just been issued by the Japanese Government for the better prevention of the coining of Korean token money in Japan. The Ordinance forbids all making or counterfeiting of Korean nickels by Japanese subjects, as well as the export of such from Japan, their import into Korea, their use there or their receipt for purposes of use. The penalty for violating these vetoes is major imprisonment for a period not exceeding one year, and a fine not exceeding 200 yen. This Ordinance goes into operation from the 15th of November, 1902.

It appears that poison was not the weapon which the Korean assassin of Awa intended to use against his would-be victim, Li Chung-yong. He relied on a Japanese short sword, purchased in Tokyo a few days

previously to the attempt. Li Chung-yong was staying at the Yawata Club in the town of Hojo, when, on the 5th instant, a fellow-countryman calling himself Li Dosun, sought an interview. At first the request was refused, but when the visitor urged that he had come all the way from Tokyo on purpose for a meeting, Li Chung-yong consented to a brief interview. The man however, prolonged the conversation on one pretext or another, until his host, becoming impatient, bade him farewell and turned to leave the room. Then Li Dosun drew the short sword, which he had hitherto kept concealed, and sprang upon his host. But already the suspicions of Li Chun-yong's friends had been aroused. They were vigilantly watching events, and one of them managed to seize and restrain Li Dosun before he could accomplish any injury. Calls for help speedily brought the police to the spot, for they too had been warned that danger was in the air. The so-called Li Dosun was arrested, when it turned out that his name was not "Li" but "Kin"; that he had formerly visited Japan as a Government student and had passed seven years in the Military College; and that on his return to Korea he had served as instructor in the War Office there. It is strange that a man of such position and antecedents should engage in a nefarious design like that now recorded. Even though he had succeeded in assassinating Li Chun-yong, his own apprehension and severe punishment could not have failed to follow quickly. It is evident that eventualities connected with these refugees in Japan trouble the mind of official Korea more than is generally supposed.

It is alleged that Messrs. Ginsberg and Company are endeavouring to obtain a share in the Korean monopoly of ginseng, which is at present farmed to the Mitsui Bussan Kaisha. Rumour says that the Russian firm is backed in this matter by the Russo-Chinese Bank, and that if the desired concession be granted, it will constitute security for a loan to the Korean Government.

THE BUDGET.

The leading features of the Budget for next fiscal year are published by the *Nichi Nichi Shimbun*. They take the following form:—

	1903-4. Yen.	1902-3. Yen.
Ordinary Revenue	232,466,389	226,114,613
Extraordinary Revenue ...	20,941,067	56,318,351
Total	253,407,456	282,432,964
Ordinary Expenditures ...	181,177,672	177,596,965
Extraordinary Expenditures	70,299,478	104,156,228
Total	251,877,240	281,753,193
Excess of Revenue over Expenditure	1,930,216	679,771

The above figures represent the outlines of the General Budget. As usual, however, the matter is complicated by supplementary budgets, which seem to have become inseparable adjuncts of Japanese finance. The outlays included in these documents are said to be "necessitated by the operation of laws or by uncontrollable circumstances"; but it does not fall within the comprehension of ordinary persons to understand why items of income and expenditure known prior to the final compilation of the General Budget, should not be included in it, instead of finding a place in supplementary documents. Be that as it may, however, the Supplementary Budgets for next fiscal year show a total outlay of 5¼ million

yen against an income of 3¼ millions, so that the surplus of revenue indicated by the General Budget is virtually wiped out. The figures are these:—

SUPPLEMENTARY BUDGETS.	
Income—	
Sums accruing from the amendment of the Mining Law	Yen. 220,000
Sums accruing from the new law relating to designs	25,000
Sale of Hiroshima Mine	100,000
Carried over from the preceding year as capital fund for the Japan-China Bank	3,000,000
Total	3,385,000
Expenditures—	
Outlays in connection with the Designs Law, the Examination of Weights and Measures, and the Investigation of Diseases of Silk Worms	210,000
Subsidy to Industrial Experimental Stations	29,000
Purchase of shares of China-Japan Bank and expenses of establishment	3,000,000
Supplementary Fund for the Wakamatsu Foundry	2,000,000
Total	6,239,000

It must be explained that the above figures are not fractionally correct, sums smaller than a thousand *yen* being partially omitted.

The question of domestic loans is somewhat complicated. In the first place there is an item of 7,100,000 *yen*, on account of public works in Formosa, which ought to be obtained by the issue of bonds, but will probably have to be furnished by the Deposits Bureau of the Finance Department and by the Bank of Formosa; and there is a further sum of a million *yen* representing losses anticipated in working the Wakamatsu Foundry during the next fiscal year, the *provenance* of which sum seems to be still unfixed except that it will be obtained either in the form of a loan from the Bank of Japan or from general revenue.

With regard to revenue—21 million *yen*—derived from the scheme of increased taxation inaugurated in 1901, the Budget shows that 1½ millions will be absorbed by the cost of the Chili campaign; 350,000 *yen* will be needed to replace the torpedo-boat *Niji*—wrecked last spring—and the remainder will go to defray the cost of works which should be paid for by the proceeds of loan bonds.

Various reductions of expenditure and collections of special income are also to be effected. The principal of these are:—

	Yen.
Postponement of Railway Works	6,000,000
" " Military and Naval Works	1,500,000
Sale of Lands	1,200,000
Increased Customs Returns	500,000
Economies in the various Departments ...	400,000
Naval and Military Economies	240,000

These reductions are intended to obviate the necessity of floating public loan bonds.

With regard to the manner of employing the sum of 9,980,000 *yen*, obtained, as set forth in our last issue, by deferring certain railway-building and naval and military works, selling lands and mines and economizing departmental outlays, the following appropriations are shown:—

	Yen.
Increase of appropriations for riverine works	850,000
Outlays on account of the Census	450,000
Expenses on account of night opening of the Osaka Exhibition	69,000
Appropriation for the St. Louis Exhibition	500,000
Expenses for improving sugar refining ...	60,000
Cost of ceramic experimental stations ...	36,000
Cost of piscatorial experimental stations ..	50,000
Enterprises connected with artificial incubation of the ova of <i>sake</i> and <i>masu</i> ...	36,000
Subsidy to manufacture of plate-glass ...	5,900
Establishment of Schools	80,000
New range for the Army	1,260,000
Establishment of Kobe Customs House ...	330,000
Building of Yairaku Hospital	100,000

Increase of Consulates	73,000
Subsidy to South-China Navigation	25,000
Increase of Telephones	1,450,000
Total	5,374,900

Several of the above items are not final: they represent annual appropriations forming part of grants spread over a number of years.

Turning, now, to the most important details of the Government's programme, we find these:—

Expenditures for supplementing railway-building outlays and for improving lines already constructed—a ten years project involving a total outlay of 130 million <i>yen</i> , the funds to be obtained from the earnings of railways already in operation	13,000,000
Expenditure on account of naval expansion for the purpose of maintaining the balance of naval power in the Far East, the outlays to commence from 1904 and the funds to be obtained by continuing the increased rate of land tax	115,000,000
Expenditure on account of enterprises for developing the interests of Japan in China and Korea—the funds to be obtained from surplus revenue	3,500,000
Expenditure for expediting the work of railway construction in Formosa, for improving Kelung harbour, for carrying out a thorough land-survey, &c., projects involving a total outlay of 15,070,000 <i>yen</i> (to be included in the Formosa special account), of which the sum paid out next fiscal year will be	4,600,000
Expenditures on account of the development of Hokkaido (railway works, improving of harbours at Kushiro and Rumoi, &c.); an eight-years' project involving a total outlay of	15,870,000
N.B.—The funds for this purpose are to be obtained by modifying appropriations already made.	
Expenditures for enlarging the custom house at Kobe with a view to improving trade facilities—a project extending over 7 years and calling for a total outlay of	3,450,000
Expenditure for establishing in Kyushu and Sendai two industrial schools, this being part of the programme of educational reform, annually	80,000
Repayment of 11 million <i>yen</i> borrowed from the Bank of Japan on account of military outlays in North China, and on account of compensation to individuals for losses incurred at the hands of the Boxers	11,000,000
Repayments of sums borrowed during recent years from the Deposits Bureau of the Finance Department on account of domestic loan-bonds not subscribed by the public	50,000,000

The Cabinet further proposes a departure from the present hard-and-fast system adopted in the matter of continuing expenditures; a system which fixes irrevocably the outlays for each year, and leaves to the Government no discretion whatever, although, during the twelvemonth financial and economical conditions may alter so greatly as to render advisable some modification of the original programme.

Another project relates to amendments of the Law of Finance and of the banking system with the object of facilitating and expediting transactions; and there is finally a proposal to leave to each Department full discretion in the matter of security furnished by officials for their good conduct.

With regard to the item of 5,900 *yen* shown in the above statement for an appropriation for encouraging the manufacture of plate glass, we have followed the figures of the *Nichi Nichi Shimbun*, but we imagine that there is a mistake and that the item should be 50,900 *yen*, as the smaller sum would be obviously insufficient for the purpose contemplated, which includes the employment of European experts.

KING EDWARD VII.

The official celebration of the King's Coronation at the British Legation in Tokyo took the form of a reception by Sir Claude and Lady MacDonald, followed by a garden party. Ideal weather favoured the occasion, so that the spacious grounds presented a beautiful appearance, in their autumnal decoration. Passing under an arch of national colours, the guests proceeded, in the first place, to the main lawn, where they were welcomed by Sir Claude and Lady MacDonald and where they remained until the arrival of the Imperial Princes and Princesses—Their Highnesses Prince and Princess Nashimoto, Prince and Princess Kacho, Prince and Princess Komatsu (junior) and Princess Komatsu (senior). After a brief interval, during which those not engaged in conversation were entertained by juggling feats, some of the party repaired to the eastern lawn where refreshments were served, while others—the younger section—passed to the western lawn and entering the Legation building through a large marquee, found that preparations had been made for dancing. The new ball-room, now in course of construction, was not yet in condition to be used, and the dining salon had consequently to be employed for dancing. It was attractively draped with flags, and refreshments were served under the marquee. Many of the Cabinet Ministers being absent from Tokyo on account of the autumnal manoeuvres in Kiushiu, the Ministry could not be largely represented, but leading members of all the other branches of officialdom were present, as also were Count Okuma and Count Matsukata. It appeared that the large attendance and the unusual fact that so many Princes and Princesses responded to Sir Claude and Lady MacDonald's invitation, were due to the Anglo-Japanese Alliance. The celebration must be counted a signal success, every feature being excellent, from the decorations to the detailed arrangements. The band of H.M.S. *Goliath* supplied music, and each lady guest on leaving received a pretty souvenir in the form of a lacquer box filled with bonbons.

Sir Claude MacDonald entertained at dinner on the evening of the 10th instant some forty of the leading British residents of Tokyo and Yokohama, as well as the Captain, the Commander and other officers of H.B.M.S. *Goliath* and the staff of the Legation, to celebrate the Coronation of King Edward. The tables were laid in the new dining salon. Indeed a banquet of such magnitude would not have been possible in the Legation previously to the recent alterations, which have been so skilfully conceived that, with a minimum of disturbance, the dimensions of the principal reception room have been greatly increased, and a banquet hall of really fine proportions has been obtained. The latter room has not yet emerged completely from the decorator's hands, but it is sufficiently finished to give an idea of the handsome appearance it will ultimately present. The Captain of the *Goliath* sat on the Minister's right hand and Dr. Wheeler on his left, a place of honour which the latter worthily occupied in consideration of his great popularity and of his claims as "oldest resident." At the proper point in the repast Sir Claude proposed the toast of the King. In a short and pregnant speech His Excellency, prefacing his remarks with a proviso that this was to be the only toast of the evening, alluded to the conspicuous character of British loyalty, a plant sowed ages ago by

our stout forefathers, watered by the blood of many brave Britons in all parts of the earth, and brought to maturity under the beneficent and glorious sway of our late beloved Sovereign. It was impossible that any celebration of royal events should be without some sorrow for the memory of that great lady, but British subjects rejoiced to think that she had found a worthy successor, towards whom their sentiment of loyalty was not less powerful and sincere. He called upon them to drink to the "King, God bless him." It is needless to say that this speech was frequently applauded and that the toast was drunk with every sign of enthusiasm. Shortly before the conclusion of the banquet Mr. J. P. Mollison rose, and said that although Sir Claude MacDonald had set a limit of one to the toasts of the evening, they would certainly separate with a feeling of duty undischarged if they failed to drink the health of their host. Sir Claude had not been long among them, but his brief term of service had sufficed to win the confidence of all his nationals. They saw that he had their interests at heart, and that whatever made for the legitimate extension of British influence and the due protection of British subjects would have Sir Claude MacDonald's hearty and efficient support. He had also shown in many ways how largely he sympathised with the aims of the community and how strenuously he was prepared to work for the welfare of his nationals in Japan. It was right that the British representatives of Yokohama and Tokyo then assembled should join in expressing their appreciation of their able Minister and their genial host by drinking his health with all the honours. This having been done enthusiastically, Sir Claude replied in a few words, avowedly abbreviated in deference to the anxiety of his Yokohama guests to catch the half-past ten train. He thanked Mr. Mollison and the rest most cordially, and said that he hoped often to see them at his festive board. The party broke up shortly after ten o'clock.

YOKOHAMA.

In Yokohama the day was observed pretty generally as a holiday though the banks did not close and many business-houses kept open. The warships in port, *Goliath*, *Naniwa*, and *Kentucky*, dressed, and most of the merchant ships followed their example. At noon a salute was fired. King Edward's sixty-first birthday actually occurred on Sunday, and many British flags were hung out that day. May we be allowed to use Shakespeare's blessing in connection with our King:—

Ever beloved and loving may his rule be!
And when Old Time shall lead him to his end,
Goodness and he fill up one monument!

CELEBRATION AT NAGASAKI.

Nagasaki residents celebrated the birthday of the King on Saturday. From our Nagasaki contemporary we gather that the demonstration was highly successful. The arrangements were left to a Committee composed of Messrs. E. H. Holmes (Acting British Consul), A. L. Jones, A. E. Baker, and S. E. Lucas. The celebration began in the morning, when Mr. Holmes received callers at H.B.M.'s Consulate. It continued at noon, when the British members of the Nagasaki Club regaled their friends of other nationalities. The third stage was reached in the evening, when the reception took place. Practically the whole of the ground floor of the Nagasaki Hotel was given up to this. With the assistance of bluejackets from the Japanese cruiser *Iwate* the dancing room had been very tastefully decorated, and by the kindness of Vice-Admiral Maréchal the fine band of the French flagship *Redoutable* was present and

supplied the music. Fireworks were displayed and the *Iwate* was brilliantly illuminated for some time, after which Mr. Holmes on behalf of the British residents thanked people of other nationalities for taking part in the celebration.

On Sunday Bishop Ivington preached on appropriate sermon at a thanksgiving service held in the English Church, Nagasaki.

FIRE IN TOKYO.

Much sympathy is felt in Tokyo with Viscount Dejean, of the French Legation, whose house was destroyed by fire at 8 a.m. on the 7th instant. The house is within the Aoi-cho compound belonging to Mr. Okura Kihachiro. It had been previously occupied by Mr. and Mrs. Miller of the United States Legation, who moved into the compound of the Legation a few days ago. Viscount Dejean had just taken up his abode in the vacated dwelling, and had not yet insured his goods when the conflagration occurred. His loss is therefore very heavy. Aoi-cho has been signally unfortunate in the matter of fires during recent years, no less than four houses within the compound having been destroyed while in the occupation of foreign tenants.

The residence of Major and Mrs. Wood, which is next door to that of Viscount Dejean, was for a time in imminent danger of destruction. Nothing saved it except the absolute calm of the morning. But though they escaped the fire, Major and Mrs. Wood suffered scarcely less loss than that which would have resulted from being burned out, for their furniture and personal effects were removed with destructive roughness. In connexion with this subject it is necessary to comment strongly on the failure of the police to exercise due control. During a conflagration free access should not be permitted to a building threatened by the flames. A mob of unrestrained and undirected rescuers may work nearly as much havoc as the fire itself would do. That is what happened on the morning of the 7th. About a hundred lads from the Okura Commercial College, which stands in the same compound, rushed pe-le-me-le to the scene of danger, and, pouring into the house of Major and Mrs. Wood, carried out the goods and chattels with such phrensied precipitancy that wholesale smashing, tearing and soiling resulted. It was all done with the best possible intentions, but such berserker energy may be more mischievous than helpful to those on whose behalf it is employed. Twenty or thirty responsible and discriminating persons should be the greatest number allowed to take part in work of that nature. In Tokugawa times only the near relatives of a family could obtain access to a house on fire or threatened by fire. That was too stringent a rule, perhaps, but assuredly the present practice errs in the other direction.

A correspondent urges that our comments on events connected with the recent fire in Aoi-cho were somewhat harsh, inasmuch as the students who "salved" the furniture of Major and Mrs. Wood, acted with the best possible intentions, though their methods were a little rough. There is much justice in a protest of that nature, but we would point out that, for our own part, we did not fail to acknowledge the helpful purpose of the lads, and that, so far as the occupants of the dismantled house are concerned, their complaint is doubtless, not against the zeal shown in their behalf, but against the indiscretion with which it was exercised. Every-one must be ready to give fullest credit

to the students, who undoubtedly displayed vigour and directness of good purpose such as should, and do, command applause. But the point is that uncontrolled and undisciplined energy may prove much more destructive in practice than apathy and indifference. That is what happened on the occasion of the recent fire, and though no one pretends to think that school-boys should be subjected to a course of fire-drill, like soldiers or sailors, so as to prepare them for the orderly exercise of aid in a contingency most unlikely to occur, everybody will agree that when they do exercise aid it should be tempered with discretion, and that for the latter qualification responsible persons, whether belonging to the faculty of the school or under the orders of the police, are bound to make provision.

GARDEN PARTY AT COUNT OKUMA'S RESIDENCE.

Count Okuma's garden party in the chrysanthemum season has now come to be an event second in importance to the Imperial Chrysanthemum Party alone. It took place this year on the 10th inst., and the number of guests exceeded that on any previous occasion, at least eight hundred being present. Although he has not held Ministerial office for some years, and although his Party—the Progressists—can not be said to have any immediate prospect of political ascendancy, Count Okuma's influence never appears to suffer any diminution. He continues always to be a great and prominent figure in the fields of politics, society and education. This was evidenced by the composition of the party on the 10th instant, for although members of the Progressists were naturally most *en evidence*, the company included not only several Imperial Princes and Princesses, but also many prominent men—notably Count Inouye—whose presence had nothing to do with party ties. The interest of the occasion was heightened by the fact that the Count and Countess received their guests in the new residence, erected since the conflagration of last year. It is a dual building, one part being purely foreign, the other purely Japanese, and both may be described as presenting the best features of each style. That is specially true of the Japanese wing, where the very finest woods have been used and all the choice characteristics of Japanese architecture are preserved without any of the littlenesses or limitations. As usual the display of chrysanthemums was remarkable. Many hundreds of varieties were shown. In the matter of luxuriance of bloom the blossoms most prized by a Japanese connoisseur look insignificant to persons familiar with the magnificent dimensions to which individual flowers are developed by European horticulturists. But when graces and specialties of form and colour come to be considered, Japan easily carries off the palm. After some two hours devoted to viewing the chrysanthemums as well as the almost unique collection of dwarfed shrubs and plants for which Count Okuma's garden is celebrated, and to wandering about the beautiful grounds or visiting the orchid conservatories, the guests sat down to an al-fresco repast, and finally took their leave at a little before five o'clock. It may be added that a large number of foreigners were present, including nearly all the *Chiefs de Mission* and members of the Corps Diplomatique.

BARON SUYEMATSU AND MR. KATAOKA.

Baron Suyematsu is one of the most influential among the party politicians, if, indeed, he can be rightly called a "party politician." He is Marquis Ito's son-in-law; he occupies a leading place in the ranks of the *Seiyu-kai* and he has held a portfolio. When, therefore, he proclaims himself—as he is now alleged to have done through the columns of the *Chiuo Shimbun*—a resolute opponent of naval expansion, his attitude can not fail to affect public opinion in a considerable degree. His argument is that the Navy has already reached ample dimensions. Compared with its strength at the time of the war in 1894-5, it is a huge fighting machine, and no occasion whatever exists for augmenting its strength. Relatively and actually it is quite sufficiently powerful. Further, the financial condition of the nation does not warrant the contemplated outlay. There is commercial and industrial depression throughout the country and the people are complaining of the weight of their fiscal burdens. To add to the Navy would be like putting armour on a sick man.

Mr. Kataoka Kenkichi, president of the last House of Representatives, pronounces similar views. He speaks of the rapid increase of local expenditures during recent years, and alleges that the people are greatly in need of the relief that would be afforded by restoring the rate of the land tax to its former figure. The Navy, he considers, is already big enough for all reasonably conceivable purposes, and the nation had better take breath.

Mr. Hayashi Yuzo and Mr. Ozaki Yukio having already declared themselves emphatically opposed to increment, and Mr. Matsuda Masahisa being supposed to share their views, it is evident that the leaders of the *Seiyu-kai* may be said to have announced a policy hostile to the Cabinet. On the other hand, Marquis Ito has not yet opened his mouth, and so long as he keeps it closed no definite forecast can be made. It need scarcely be added that various and curious rumours are in circulation. One is that a secret understanding exists between Marquis Ito and the Committee of the *Seiyu-kai*, the effect of which is that the Marquis stands aside and the Committee does the fighting. A probable state of affairs, in truth! Among the quaint products of the situation is an appreciation, or rather a depreciation, of Marquis Ito by Viscount Miura. A Miura sitting in judgment upon an Ito—that is surely a topsy-turvy spectacle.

"THE TIMES" ON THE HOUSE TAX QUESTION.

The Times speaks editorially on the subject of the house tax as follows:—

"The differences which have so long caused unpleasantness and friction between the foreign residents and the Japanese authorities are thus definitely removed from the field of politics and left to the impartial decision of experts in public law. The step has been accompanied by a graceful and becoming concession on the part of the Japanese Government. They have voluntarily declared that, pending the arbitration, they will defer the further collection of tax, and they undertake that none of the foreigners who have already paid, without distraint, shall be prejudiced by their action. The announcement is in accordance with that high sense of what is befitting Japan as a Great Power which we have become accustomed to expect in the advisers of the Mikado. During the later stages of the dispute they thought it desirable, rightly or wrongly, to vindicate their view of the question by insisting upon payment of

the tax, and by distraining for the amount where payment was refused. Now that the whole matter has become the subject of judicial decision, they voluntarily waive the exercise of their alleged right until that decision has been given, and they promise that the foreigners who did not offer material resistance to their interpretation of the treaties shall not suffer by compliance with their demands.

"The controversy, it may be remembered, has gone on for three years. In October, 1899, the tax first became due, but when it was claimed from the foreign residents they protested that they were exempt from it by treaty. The governing clause on which they rely declares that no conditions whatsoever, other than those contained in existing leases, shall be imposed in respect of property held under such leases in the settlements. The leases are leases of land, and when they were made there were no buildings upon the land. The Japanese argue that the exemption from taxation they confer applies to the land only, and not to the buildings which were afterwards erected upon it. They contend, further, that the house tax is, in fact, a local rate imposed solely for local purposes, and that it is unjust that the foreign residents should be exempted, at the cost of their native neighbours, from a burden of which they share the benefits. The foreign residents urged that the language of the clause was conclusive, and that the exemption of the land necessarily implied the exemption of the building upon it. They took their stand upon their supposed rights under the revised treaties, and asked that the interpretation of the clause should be put to arbitration. After some demur the Japanese assented to this proposal, and it seemed as though the matter might be adjusted without further trouble. Unfortunately, the foreign residents assumed that the agreement of the Japanese to go to arbitration implied an agreement not to levy the tax in dispute until the question of right had been determined. The Japanese had not attempted to enforce payment until after they had agreed in principle to submit their claim to an international tribunal. They had, in fact, exercised a dispensing power in favour of the foreigner, which was, from their point of view, illegal. With what must be deemed less than their usual discretion, they chose the moment when they had acknowledged that their claim was not indisputable, by referring it to arbitration, to compel obedience to the law. Naturally the foreign residents resented this action, and as naturally, their opposition took a form which made it very hard for the Japanese to go back. The foreigners held meetings and proclaimed their determination not to pay the house tax until the interpretation of the treaties had been settled. The Japanese appear to have regarded this conduct as an unjustifiable resistance to the law of the land, and they proceeded to collect the tax. Some of the foreign residents, by the advice of the representatives of their Governments, refused to pay until their goods were distrained upon. The object of such advice is far from clear, for Japan had already agreed to put to arbitration the alleged right, which this formal resistance was presumably intended to assert. Luckily, both parties acted with great courtesy and good humour in maintaining their positions. The Japanese bailiffs did their duty in the pleasantest way imaginable, and the defaulting taxpayers saved them the trouble of seizing stock and furniture by leaving the amount of the claim in cash where the officers of the law could not help finding it. A certain amount of irritation was perhaps, inevitable; but, as each side respected the other and both recognized that the difference between them was an honest difference it was kept within the bounds of moderation. The principal controversy will now be determined, by the consent of both, in the best possible way. The subsidiary complications which arose from it cannot recur, after the wise and liberal promises of the Japanese Government."

It will be seen from the above that *The Times* is just as much perplexed as we were about the object of declining to pay until the process of distraint had been employed. No one has attempted to explain intelligibly what end was to be served by that strange display of officially advised obduracy, and we venture to doubt whether any one will ever be found able to furnish an explanation. As to the reasons that induced the Japanese Authorities to enforce payment, *The Times* does not refer to the main point, namely, that until all the foreign residents were placed on the same footing with regard to taxes already due, the Japanese Government could not choose but insist upon payment by the defaulters, the only alternative being to return to the non-defaulters the monies already paid by them.

JAPAN AND AUSTRALIA.

Tradal relations between Japan and Australia must grow with the lapse of years. Several lines of steamships now connect the two countries and travellers have an unequalled opportunity to choose between the various companies. The trend of affairs is to join the two countries more closely together, notwithstanding the present abnormal outbreak of the labour party with regard to alien labour, and all look with confidence to a very large increase in the shipping trade between Australia and Japan. On Tuesday last a very enjoyable tiffin was given on board the E. & A. steamer *Australian*, by Messrs. Cornes & Co., the local agents, which was largely attended by representatives of the leading shipping, mercantile and insurance firms in the post. After full justice had been done to the very sumptuous bill of fare, Mr. F. J. Abbott, Agent in Yokohama of the P. & O. Company, proposed the health of the E. & A. Company, coupled with the name of the commander of the *Australian*. He said that the prospects of increasing trade with Australia and New Zealand were very bright and residents in Japan hoped that the opportunities for expansion would increase in lustre as the years rolled on. Captain Helms responded in cordial terms; and then the Superintending Captain of the E. & A. Company, at present on a visit to Japan, proposed prosperity to the Empire of Japan. So far as his company were concerned he felt assured that so long as support was forthcoming the company's ships would visit Yokohama, instead of stopping at Kobe as heretofore. In fact said the speaker "if you will only give us sufficient cargo, our ships will come to Yokohama regularly; it only remains for the Yokohama merchants to give us the support we ask for, for us to make Yokohama our principal port of call in Japan."

THE CHEN-CHOU AFFAIR.

The publication of the following Imperial Decree on the 2nd instant in Peking must be assumed to have finally disposed of the Chên-chou affair:—

With reference to the massacre of the English missionaries, Bruce and Lewis, at Chên-chou, Hunan province, a short time ago, we have already in response to the memorial of the Governor given commands that Chên Hsi-nien, district magistrate of Yuanlinghsien; Liu Liangju, First-Captain of the Chên-chou garrison battalion; Chang Yao-k'uei, Lieut.-Colonel of the Yi battalion; the former district magistrate of Yuanlinghsien, Wao Chao-hsin; and Major-General Yen Wu-lin, Brigadier Commanding the Yi Brigade; should be first cashiered and reduced to the ranks for the purpose of undergoing trial. We have now received another memorial from the said Governor Yü Lien-san stating that when the riot first began, the late Mr. Lewis fled from the mission premises and in passing the yamên of the First-Captain, Liu Liang-ju, the latter shut his yamên gates, refusing to receive the said missionary, in consequence of which said missionary was beaten to death by the mob. With regard to the Major-General, Yen Wu-lin, when the mob was passing his yamên en route to the chapel he remained inactive as if ignorant of the purpose of the rioters and omitted to render the necessary protection to the missionaries and mission premises, while as to Wan Chao-hsin, the former Chihhsien of Yuanling-hsien, knowing that he was so soon to be superseded he purposely took no notice of the current rumours, omitting to use any efforts to put a stop to them. In consequence of this it brought about the said serious riot. With regard to the other officials of Chênchou their faults were of various degrees; such as either failure to give the proper protection or they did not beforehand take the necessary steps to give such protection. All were, however, deserving of punishment. We have again and again commanded our military and civil officials to give every protection to foreigners and missions, yet our orders have not been observed, as witness the recent

serious affair in Chênchou. Now in the case of the First-Captain Liu Liang-ju, his guilt was doubly serious above all others in that he did not give protection when he was able to do so, and we particularly execrate the man's conduct. We hereby command that he be summarily executed. The cashiered Major-General Yen Wu-lin of the Yi Brigade is sentenced to await decapitation in gaol; Chang Yao-k'uei, Lieutenant-Colonel of the Yi battalion, and Chao Yü-tien Lieutenant-Colonel of the Kueiyang battalion, are hereby cashiered and dismissed for ever from the army; Wu Chih-chun, prefect of Chênchou, is also cashiered and dismissed for ever from the public service; he is also to be exiled for five years. The cashiered ex-district magistrate Wan Chao-hsin is commanded to be banished to the utmost limits of the empire and is never to be liberated or allowed to return home. These punishments are awarded as a warning to all.

It will be seen that the Decree explicitly admits the charges preferred by the British authorities against the incriminated officials. Captain Liu's case is perhaps the worst. He deliberately closed his *Yamên* gates in the face of Mr. Lewis, thus refusing to the latter a refuge which, in all human probability, would have saved him from being beaten to death. Major-General Yen's sin was one of omission only. He remained inactive when the mob was passing his *Yamên*, and failed to render any protection. These two officers are sentenced to capital punishment. Assuredly from the point of view of protection for foreign life and property in China, we can not question the expediency of the sentence. But it is impossible to avoid the reflection that the situation created in China is one which demands measures not in accord with the judicial principles observed in Europe. Captains and Generals in the Occident are not decapitated for neglect of duty under such circumstances. More and more is China becoming a perplexing problem. More and more is the sword becoming the arbiter of all complications there.

THE JAPANESE EMPEROR'S BIRTHDAY IN SHANGHAI.

Tokyo journals are much pleased with the spirit shown by the Shanghai community on the occasion of the celebration of the Emperor of Japan's Birthday this year, and with the cordial utterances of the local English press, especially those of the *N.-C. Daily News*. We reproduce the latter's account:—

Loyal Japan, as represented in Shanghai, gave itself up yesterday to whole-hearted celebration of the 50th birthday of H.I.M. the Mikado. A sympathetic enthusiasm was kindled also among all the foreigners of the settlement, with the result that an air of unwonted festivity was manifest all day. Every immigrant from the land of the Rising Sun made a point of displaying the national flag, tradesmen suspended business during the afternoon, the Yokohama Specie Bank was handsomely decorated, the offices of the N. Y. K. were ablaze at night with strings of Japanese lanterns, as was the flagstaff at the Consulate, with a pretty effect as seen from the English Gardens; while all the men-of-war of all nationalities in harbour donned their full gala rig. With the Japanese community general holiday was observed; and the humblest of them appeared to think the anniversary could only be fitly kept from the standpoint of a carriage.

From half-past eight till half-past ten in the morning the Japanese Consul-General, Mr. Odagiri, held a reception at the Consulate, where calls of congratulation were paid by members of the Consular body and many prominent residents of the settlement, as well as the naval and military officers of the garrison now in occupation. At noon a large party of distinguished guests, including Admiral Sir Cyprian Bridge, were entertained by Mr. Odagiri to tiffin at the Astor House, while the members of the Japanese Association met at the Honganji Temple, Woochang Road, to pledge the Emperor's health in their own national way. In the afternoon a large and cosmopolitan body of visitors was entertained by the officers of the Japanese regiment at their camp on the Yangtsepoo Road. Nothing could have been more kindly and courteous

than the welcome extended to one and all, while the fête itself had a peculiar interest for westerners. "Jack's the lad for work, Jack's the lad for play" applied equally in Japan and Great Britain. Yesterday afternoon gave the soldiers and sailors of the Mikado an opportunity of displaying their ingenuity in the higher things of life, and a tour round the tableaux they had prepared as part of the entertainment afforded evidence at once of a sturdy patriotism and a desire to express it artistically. Representations, more or less life-like, were given of notable events in the present and past history of the Empire; ancient stories of heroism were pictorially revived and set side by side with such doings as an episode from General Fukushima's hunting adventures in India. The artificial flower garden appealed immediately to the ladies of whom a number were included among the visitors, and who gladly availed themselves of the invitation to pluck in these novel parterres, while all were ready with acclamations when a taut little model vessel suspended as a victim was struck amidships and in a few seconds reduced to ashes by a miniature torpedo. Wrestling bouts stoutly contested drew eager rings of spectators, while others found a passing interest in the theatrical and musical entertainments, especially the dancing by the 17 *geisha* of Shanghai, who had volunteered their services. A display of daylight fireworks continued throughout the afternoon, while side-shows, oddly reminiscent of an English fair, drew attention after their kind. Needless to say the guests were hospitably provided for in the way of refreshment, and ample opportunity was given, and taken, to "banzai." His Majesty in appropriate "sake." During the afternoon an interesting group of entertainers and visitors were photographed as a permanent memento of a memorable event.

THE AUTUMN MANŒUVRES.

There is the usual scrappy news about the autumn manœuvres. We read that the Emperor alighted at Matsushashi station on the Kiushiu Railway at 7.38 a.m. on the 12th instant, and proceeded to Toyofukumura and Tofuku-mura, the scene of the evolutions. Tokyo journals mention an incident which occurred at this stage of the proceedings. Viscount Inouye Masaru, the well known former chief of the Railway Department, was shooting in the neighbourhood of Toyo-fuku, never suspecting the Emperor's coming, and he suddenly found himself in the Imperial presence, to the great amusement of His Majesty and the Court.

The general plan of campaign was that a northern army had to repel the attack of a southern, which was supposed to have effected a landing in Kumamoto Bay. Victory rested with the invading force. The Emperor subsequently conferred posthumous titles of rank on Hosokawa Fujitaka, ancestor of the Hosokawa House; on Kikuchi Taketoshi, who fought on the Sovereign's side against Ashikaga Takauji, and on Kikuchi Takeshige and Kikuchi Takemitsu, sons of Taketoki. Various posthumous official ranks were also conferred on 159 personages who had distinguished themselves in the Imperial cause at the time of the Restoration. The Governor of Kumamoto, acting as Imperial Delegate, laid the patent of rank on the tomb of Kikuchi Taketoki, and the Governor of Fukuoka performed the same office in the cases of Takeshige and Takemitsu.

Some of the statements published in this country really tend to bring ridicule upon the institution of Imperialism which they are designed to exalt and glorify. A case in point is the following paragraph, which we copy from a Tokyo contemporary:—"During the manœuvres yesterday two privates were summoned to the presence of the Emperor. In reply to an inquiry by His Majesty how they felt towards a soldier's life, both courageously but very respectfully said that since the moment they entered the army they had always been prepared to die for His Majesty. The

Emperor was very much pleased with the reply of the privates." Every one understands that such incidents are cut and dried, and, for the rest, no soldier could say less under the circumstances. Besides, His Majesty has had ample assurance in the deeds of his soldiers that they are always ready to die for him. Protestations of that kind of willingness are unnecessary, and to be told that they are made "courageously but very respectfully" lends a farcical character to the incident. As an appeal to the emotional side of human nature the summoning of the privates to His Majesty's presence and their asseverations of loyalty to the death, may have some uses, but the less verbal embroidery employed in recounting the facts, the better.

COMPENSATION TO PRIVATE INDIVIDUALS.

The total sum now allotted to private individuals in Japan by way of compensation for losses incurred in connexion with the Boxer riots is 1,440,000 yen. Originally Japan's claims for indemnification amounted to 50,074,000 yen, in which was included a sum of 2½ millions on account of private losses. But of course the private demands assumed, in many cases, an extravagant character. That happens invariably on such occasions. People ask to be indemnified for all sorts of prospective gains which they honestly or knavishly pretend to have expected had not the normal course of events been disturbed. When, therefore, the United Powers decided that their aggregate demands, representing 460,296,243 taels, must be reduced to a maximum of 450 millions, Japan had no difficulty in cutting down the original claims of private persons to 1,440,000 yen, without altering her demand of 47,574,000 yen on account of public expenditures. It is alleged, indeed, that private claimants fare very well in this matter. We may add in this context a statement of the sums received by each Power from China by way of indemnification, premising that the figures are taken from the *Asahi Shimbun*, which is responsible for the above totals also:—

	Taels.
Germany	90,070,515
Austria-Hungary	4,003,920
Belgium	8,984,345
Spain	135,315
The United States	32,939,055
France	70,878,240
Great Britain and Portugal	50,712,795
Italy	26,717,005
Japan	34,793,100
Holland	782,100
Russia	130,371,120
Sweden, Norway, &c.	212,490
	450,000,000

MR. OKAKURA.

Mr. Okakura, principal of the Bijutsu-in (Art Association), seems to have become involved in some monetary trouble in India where he is now travelling. So far as we can gather from the obviously garbled accounts published by the *Niroku Shimpō* and the *Jimmin*, he was associated with the collecting of funds for a religious purpose which ultimately had to be abandoned. Such an incident lends itself readily to misconstruction, and most assuredly the public will hesitate to credit the slanderous statements made by the *Niroku*. Human nature will always have a side to which backbiting and evil-speaking can appeal successfully. The yellow journal is the organ of that phase of men's disposition.

JAPANESE IN AMERICA.

(COMMUNICATED.)

It is well known that within recent years the immigration to the Pacific Coast from Japan has advanced by leaps and bounds. The official report shows that nearly fifteen thousand Japanese came last year, and these for the most part stayed on the Western coast, California, Oregon and Washington. The reason for this heira to America is not far to seek. There is and has been for years past urgent demand for labour with good wages.

The numbers on this coast are approximately forty thousand. In California, perhaps half of the above number are located. Unskilled farm labourers largely predominate, but of skilled shoe-makers, tailors, etc., there are also not a few. There are in the shoemakers' guild of San Francisco and Oakland, 120 members and they conduct 80 shops. There are a dozen or more tailor shops. All over the coast these colonists are going into various lines of business. In every centre you will find restaurants, lodging houses, employment agencies, stores, etc. In the country, the Japanese lease fruit farms, sugar-beet lands and cultivate them. The daily wage furnishes a sure and liberal compensation, but it is too much of a treadmill and very irksome to most men of Japan. Indeed, their individual initiative involving courage and patience is surprising. Failures are frequent, but, undaunted by these, they try again and in the end usually win success.

The tireless industry of the men surprises Americans. In all seasons, whatever their employment, they are at work. In slack times, the farmers chop wood in the hills and mountains. They also migrate from place to place according to the harvests. When there are no fruits to pick, they can and do find work on the railways. Their self-denial in food and comforts is amazing. These laborers subsist on 25 cents a day for food and, with a blanket, sleep on a board, and all without complaint. During the harvest season—if they do piece work—they are at work as soon as it is daylight and continue until dark. In the raisin-grape harvests in Fresno, some of them make five dollars per day.

In all respects, I think the changes going on are for the better, the mortality has decreased of late, because of better medical attention and more personal care of the body. The employers, however, do but little for the comfort of labourers, at most furnishing a rude board house where the men may sleep. In case of sickness and death, they ordinarily show little concern.

At one time the student element predominated, but they are in the minority now; still they are here in great numbers and wonderfully industrious. Fortunately, for them, all schools public and private are open to them and they receive uniformly considerate treatment. In the Universities of Stanford and California there are now about forty, nearly all of whom are self-supporting, Stanford is very hospitable to Japanese pupils, President Jordan and Mrs. Stanford, since their visits to Japan, are noticeably friendly and they hope to do much for the youth of the "Sun-rise Land" through the University in the years to come.

The desire for betterment of their condition characterizes all classes. Recently the Southern Pacific had several hundred men of many European races working on the Shasta division of the road. Among these were a few hundred Japanese. The store-

keeper, an American, relates that the Japanese alone came to his store and after obtaining supplies of food, etc., they bought all his English readers, paper and ink and pencils—showing the ambition for improvement.

It may be surmised and it is true that relatively there is but little crime committed; in times of idleness there is the temptation to drink and gambling. The latter is the most destructive vice among them and many lose all their hard earnings in the Chinatown gambling dens of San Francisco.

Generally speaking, the relations with the Americans are friendly. During the revival of the Chinese exclusion debate there was much to complain of in the brutal attacks upon Japanese. That is now happily settled and all seems quiet.

The labour organizations are, of course, anti-Chinese and anti-Japanese—but at present, even in this Congressional election, they are saying nothing. While prosperity reigns all promises to be peaceful.

The Japanese Consulates in San Francisco, Seattle, and Vancouver, B.C., are ably manned and effective in the supervision and watchful care of all the interests of their compatriots. The good understanding existing between Japan and America is largely due to the official representatives of His Majesty's Government.

The presence here of such a large body of intelligent and effective labourers is a boon to the rapidly extending industries of the Pacific Coast for otherwise these must lag until labour be obtained from other sources. It is matter for congratulation that the present arrangement is proving mutually advantageous.

Many religious establishments have been opened in San Francisco and on the coast, notably by the Methodist Episcopal and Presbyterian Churches. These are in a prosperous state. The Nishi Hongwanji Mission, imitating the methods of the Christian establishments, is very active and affords consolation to the exiles, many of whom are devout members of the sect.

NOTES ON CURRENT EVENTS.

It has been decided to issue a medal to the officers of the various Powers concerned in the civil government of Tientsin. The work of making the medal has been entrusted to the well-known firm, Tenshodo, in Tokyo. There will be 194 recipients, and the total cost of the medals is stated to be 6,000 yen, the metals employed being gold, silver, and, copper. On the face of the medal is a group of 7 national flags, surrounded by the inscription "Gouvernement Provisoire du District de Tientsin"; and on the reverse, a garland of laurel leaves encloses the legend (in ideographic script) *Tientsin Toto-gamon*. The designs on the flags are rendered in *cloisonné* enamels, so that each ensign shows exactly its own colours.

The action taken by Messrs. Frazar and Company against the *Miyako Shimbun* has been abandoned. Its cause was an erroneous statement published in the Tokyo journal on the 14th of October, to the effect that the police had paid a visit to the premises of Messrs. Frazar and Company and had made a search there. The trouble with the *Miyako* was that it mixed up No. 200 in the Settlement with a different house. No one supposed that there had been any intention of uttering a libel. But since the result to the sufferer is the same

whether carelessness or intention be the origin of the offence, Messrs. Frazar and Company instituted a suit against the *Miyako*, putting the damages at ten thousand yen. Inasmuch, however, as the *Miyako* had almost immediately corrected its error, and inasmuch as it expressed itself willing to take any step which Messrs. Frazar and Company might consider essential in the interests of justice, the foreign firm agreed to suspend further proceedings. Mr. Sato Hakuai seems to have assisted materially in bringing about this amicable arrangement.

The *Yomiuri Shimbun* says that the Nippon Yusen Kaisha has now six steamers under construction, five of them having been ordered in Nagasaki and one in Kobe. The vessels to be built in Nagasaki are the *Aki Maru* (for the European Line), the *Nikko Maru* (for the European line), the *Chefoo Maru* (for the North-China line), the *Yingkow Maru* (for the North-China line), the *Niigata Maru* (a cargo boat) and the *Kushiro Maru* (for the Hokkaido line).

News has been received in Tokyo that Baron d'Anethan is to resume the duties of Belgian Representative at the Court of the Mikado. The Baron will arrive in Japan about the 7th of December. This will involve the loss to Tokyo Society—a very great loss—of Mr. and Mrs. de Man. We understand, however, that as it is their intention to return *via* Siberia, their departure will probably be deferred until April.

We heartily congratulate Mr. Consul John Carey Hall on the honour that he has received at the hands of King Edward. By all nationalities in Japan Mr. Hall has long been recognised as a gentleman of quite exceptional ability and attainments. His services in consular capacities commenced as far back as 1871, and his reputation for high Japanese scholarship and for remarkable powers of thought and judgment may be said to date almost from an equally early period. The opening years of his official career were passed under the orders of Sir Harry Parkes, an association which operated not a little for Mr. Hall's advantage and to which he doubtless now looks back with grateful recollections. It can not be said that British Sovereigns dispense honours lightly. Thirty-four years' service is a long record, but we may be permitted to hope that other and higher distinctions will now follow rapidly for Mr. Hall in the wake of this well merited and generally appreciated recognition of his approved competence.

The honour conferred upon Mr. E. F. Alford may come as somewhat of a surprise to many who were not aware of the important though unostentatious part taken by him in the matter of British commercial interests. Mr. Alford, who was a native of Manchester, being indeed a son of Bishop Alford, came out to the East in 1868 and spent most of his business life in Hongkong and Shanghai. He retired in 1899 but retained his interest in Far Eastern matters, being still an active member of the China Association. It is of course permissible to suppose that Mr. Alford is one of the persons whom the Foreign Office and the Board of Trade consulted with reference to commercial matters when the China Commercial Treaty was under discussion.

We gather from the *Official Gazette* that in the six places at Dalny designated as sites for renting land to Japanese subjects, on 99-years leases, the rent is to be fixed at

5 per cent. of the price obtained for the fee-simple adjacent land and when sold by public auction.

The torpedo-destroyer *Asashirwo* reached Saseho on the 12th instant. Her voyage from England was uneventful until after leaving Singapore, when she encountered somewhat rough weather. The *Asashirwo*, it will be remembered, took part in the Coronation Celebration.

FOREIGN CRIME IN JAPAN.

The *Jimmin* publishes a table showing the numbers of foreigners undergoing punishment or awaiting trial for criminal offences, all, with one exception of a trifling character. The table bears date Sept. 30th, 1902. No female appears on the list:—

Nationality.	In prison.	Under trial.	Children in penitentiary.	Under detention.	Totals.
Chinese	15	14	0	1	30
Koreans	2	2	0	0	4
British	0	3	0	1	4
American ...	2	2	0	0	4
Russian	1	1	0	0	2
French	0	1	0	0	1
German	0	1	0	0	1
Italian	0	0	1	0	1
Totals.....	20	24	1	2	47

THE MITSUI FAMILY.

Barou Mitsui Hachiroyemon, head of the well-known Mitsui family in Tokyo, gave a dinner on the afternoon of November 11th in celebration of the completion of the buildings of the Mitsui Bank, the Mitsui Busan Kaisha and the Mitsui Mining Department, all in one group, inviting thereto a large number of residents of Tokyo and Yokohama, amongst whom were some of the Ministers of State, high naval and military officers, prominent business men and so forth. So numerous were the *invités* that the streets about the building were blocked with carriages and *jinrikisha*. The function was in every respect a great success. After inspecting all the departments, which were tastefully decorated with evergreens and other ornaments, the guests were entertained with a cold collation in the upper floor of the edifice, to which they did ample justice. The party broke up shortly before six o'clock in the evening. The splendid structure, which is located in Surugacho, Nihonbashi, Tokyo, cost over a million yen, the building taking the form of a quadrangle facing the south. The central portion is occupied by the Banking Department, the right side by the Bussan Kaisha, and the left side by the Mining Department. The edifice is of four stories, namely three above the ground and one below the surface, and is composed of brick, stone and iron; the area extends over 770 *tsubo*. The entire extent of the grounds covers 2,720 *tsubo*. In the Banking Section, there are exhibited hundreds of old gold *koban* and silver coins; samples of stuffs for clothing, both foreign and Japanese, in the Bussan Kaisha Section; and a number of various minerals in the Mining Section, all of which articles the guests had the pleasure of inspecting. The building is second to none in all respects, in dimensions, outside appearance, fittings in the interior, etc., so far as the architectural business of modern Japan is concerned. We may add that the Mitsui family is to commence business in the new building on Nov. 17th and that the family has, through the Tokyo Municipality, made a donation of yen 100,000 toward a scheme of establishing a charity hospital in the metropolis.

The launch of two war-ships, built by the Uraga Dock Company for the United States Navy, will take place at Uraga in the course of this month. Other two vessels are now in course of construction in the same yard and these will be launched some time in December this year. The first gun-boat, which was launched recently, will be delivered to the Republic early next year.

FOOTBALL.

There were two games of Football on Saturday afternoon, the Y.C. & A.C. playing the men of H.M.S. *Goliath* first at Rugby and subsequently at Association. In both cases Yokohama proved victorious.

RUGBY.

Yokohama were without their full strength, F. O. Stuart being the only regular three-quarter. McClure turned out at full back and played an excellent game and we hope to see him resume his place in the three quarter line this season. The game was of a very scrumbly nature and little combined play was shown by either side. The navy were the heavier team but seemed unable to control the ball in the scrum. The navy men were the first to score, the forwards rushing the ball over the line. After some play in mid field Yokohama pressed and Stuart securing the ball carried it over the goal line and equalized. During the second half play was more open and Yokohama's forwards led by Crawford and Kingdon frequently broke away with a good dribble; and were well backed up by the $\frac{3}{4}$ line who were now combining more effectually. From a pass by Cartwright Stuart gave Yokohama the winning try, Moss' kick at goal from a difficult angle hitting the cross bar. The navy made desperate attempts to equalize, but McClure effectually saved time and again, and the whistle blew with the score 6 points to three in Yokohama's favor.

Mr. S. Wheeler who was unable to play owing to a sprained wrist officiated as referee.

ASSOCIATION.

Yokohama losing the toss kicked off against the sun, but the Navy were the first to make the running, the Club however retaliated in spirited fashion and were making headway when Drummond slipped and lost the ball. The play was of the fastest description, the players in their eagerness made several mistakes. The "Sollys" were most dangerous near goal, but clever tackling by Kilby and Moss broke up their forward combination. Neither side was resting and a hard ding-dong fight was the result. The first real shot came from the Navy's right wing but Waddilove saved, tipping the ball over the bar. Good work by Strome and H. W. Kilby led to Yokohama forcing the pace but the visiting backs broke up the attack in great style and with a rush their forwards were down on Waddilove. However that player displayed wonderful smartness and quickly kicked the ball clear of danger. This gave the home team a breathing space but it was not of long duration. Fradgley and Mason fed their forwards well and the ball going out to Smith that player put in a hot but ineffectual shot. At half time there was no score.

The play in the second half was of the same description as the first until from a beautifully placed corner kick from Fradgley H. W. Kilby cleverly headed it into the net. Nothing daunted, but playing in more determined fashion than ever, the Navy forwards rushed the ball down the ground and after several shots stopped by Waddilove, equalized. After play of a give and take character Yokohama were awarded a penalty kick from which Fradgley scored. Subsequently the navy pressed rigorously but could not break down the Club's defence and time came leaving Yokohama winners by the narrow margin of two goals to one.

It was hard luck on the Navy that the loss of a pair of sturdy backs and a good goal keeper, robbed them of the spoils their play deserved. It was clever play by H. W. Kilby that gave the Club its first goal. The passing and combination of the forwards generally was disappointing, Kilby and Strome being the pick of the front rank. The halves were a capable hard working trio of whom Fradgley was the best, his restless untiring working doing much to break up the *Goliath* attack. E. W. Kilby kicked and cleared well, while Waddilove was unbeatable and disposed of many tries that with a less capable custodian might have had a better fate. Mr. Bathgate refereed.

THE CABINET.

THE *Jimmin* and the *Chiuo*, two journals which may be supposed to represent the views of a considerable section of the *Seiyu-kai*, agree in alleging that the leading members of the big party are gradually marshalling themselves against the Government's projected principal measures, Mr. HAYASHI YUZO being the head and front of this opposition. As usual the objections raised will not be directed against the actual measures of the Cabinet. The old pretext will be employed, namely, that no fresh expenditures, nor any radical new measure, can be sanctioned pending the completion of administrative and financial reform. It has again to be noted that no one attempts to explain exactly what is meant by this now much hackneyed shibboleth. During many years party politicians have attempted to justify their anti-government attitude by demands for *gyosei sasshin* and *zaisei seiri*, but the public is not one whit nearer to an intelligent understanding of what is wanted than it was in 1892 when the formula began to be current. Never was there a more convenient formula. It has abundant sound and it may have equally abundant substance for all that the world knows to the contrary. But as unconcerned onlookers we are bound to say that the whole outcry assumed, long ago, an appearance of extreme insincerity. If this administrative reconstruction and this financial reform be capable of practical achievement without excessive and dangerous effort, it is certainly most strange that no Ministry during the past ten years has succeeded in elaborating any acceptable, or even any explicable programme. Either the steps demanded by the political parties would cost so much that no Cabinet dare take them, or the political parties are asking for things which they themselves know to be impossible—impossible, at any rate, in a sense so sweeping as the nature of the demand seems to imply. If the *Seiyu-kai* leaders resolve, on the present occasion, to adopt the attitude taken by the original Liberals in 1893, namely, that the work of naval expansion can not be entrusted to a Government which has forfeited public confidence by failing to carry out essential reforms, there will be nothing for it but a renewal of the old strife between the parties and the Ministry. The latter may now be said to have openly pledged itself to the continuance of the present rate of land tax and the addition of a considerable number of ships to the Navy. It can not lightly abandon that decision, and if neither side gives way, the newly elected House of Representatives will be dissolved. We may be quite certain that the members would not willingly invite sentence of dissolution. They are understood to be complaining bitterly of the heavy expenditure required to win their seats last July, and they would make large concessions to avoid a repetition of the outlay at

such short notice. The Government, therefore, has a powerful weapon in its hands. Compromise is what the history of Japanese politics would lead us to anticipate were any lines of intelligent compromise discernible.

As for the House of Peers, the latest analysis published shows that among the six sections, 97 members are opposed to the Government and 95 support it. But we place very little confidence in such analyses. And indeed we would warn our readers that all the talk now heard must be listened to with the utmost reserve. Nothing can yet be confidently predicted as to the ultimate attitude of the *Seiyu-kai*. The most that can be said is that the situation is very delicate.

THE WELCOME SOCIETY.

THIS Society has roused itself to a state of renewed vitality. On the whole its career up to the present can not be said to have been successful. A section of the foreign public has never consented to be persuaded that the unique aim of the Society is to provide facilities for travellers and to promote their comfort, thereby encouraging larger numbers of tourists to visit this country. Evidently if that result can be achieved, Japan is a gainer in two senses: first, pecuniarily, since foreign tourists spend no little money in the country; secondly, internationally, since the better she becomes known, the pleasanter her relations with foreign countries are likely to be. Animated by these views, several prominent Japanese, especially Marquis HACHISUKA, Baron SHIBUSAWA and Mr. K. MASUDA, determined, some years ago, to organize an association which should seek to render travelling in Japan as easy and as comfortable as possible. A few foreigners—very old residents, as Mr. T. B. GLOVER, Captain J. M. JAMES, Mr. J. CONDER and Captain BRINKLEY—co-operated willingly, and a sum of money was subscribed to defray necessary expenses. Marquis HACHISUKA was nominated president, and has retained that position ever since. It was appreciated from the outset that the Society should direct its efforts conspicuously to improving the guides' system, in the sense, not merely of providing efficient guides, but also, and chiefly, of protecting tourists against the impositions to which they are now exposed at the hands alike of innkeepers and tradesmen acting in collusion with the guides. To accomplish any radical reform in that direction proved, however, a most difficult task. Nothing less than complete control of the guides would have been essential, and no means of getting complete control seemed available. It was mainly owing to that difficulty that the Society did not achieve any signal success. It may be said, in fact, to have lapsed into a drifting condition, the public taking little interest in its well-being, and not at all persuaded that it should not be regarded as a device for putting money into the pockets

of its promoters, who, all the while, were paying out money for its support. Recently steps were taken to produce an access of vigour. The staff was completely re-organized, Mr. MASUDA TARO agreeing to assume the duties of Secretary, and several of the Foreign Representatives and the Japanese Ministers of State were invited to become honorary members, a proposition to which they all readily responded. Several meetings of the Society have been held within the past two months, and various measures are being taken in connexion with the Osaka Exhibition of next year. There is said to be some prospect of the Society's obtaining official assistance in the matter of the guides. Of course if that can be accomplished, much good can be done, but under any circumstances the present activity of the Society can not fail to be of assistance to tourists.

BRITISH ORDERS TO JAPANESE PERSONAGES.

ENGLAND has always been very reserved in distributing her Orders, not only to her own subjects but also to foreigners. In many countries these marks of distinction have fallen to the rank of mere international courtesies. One Government places so many of its stars and ribbons at the disposal of another, provided that the latter reciprocates with equal liberality. Neither cares anything about the ultimate destination of the Orders exchanged. An English Order is never thus treated. It does not, under any circumstances, become a mere object of barter. The result is that outside the ranks of British subjects, few British decorations are to be seen, and fewest of all in Oriental lands. This last discrimination sometimes assumes invidious proportions. We believe that we do not err when we say that up to the time of the recent *Birthday Gazette*, only two Japanese subjects—Marquis ITO and Prince KOMATSU—were in possession of English decorations, and it is evidently owing to the thoughtful tact of the present British Representative in Tokyo, that a state of affairs inviting such significant comparisons promises soon to become a thing of the past. Sir CLAUDE MACDONALD has shown on several occasions that he understands how to give to international relations those delicate touches which raise them from the common level to a high plane of artistic cordiality. This has been repeatedly evident in his treatment of matters connected directly or indirectly with the Anglo-Japanese alliance. He has striven to make it an alliance of hearts as well as hands, and, after all, hearts are the ultimately potent factors in the world's history. Prince ARISUGAWA, who now receives the Grand Cross of the Bath, has exceptional claims to that distinction. He has served in the British Navy; he represented Japan at the Queen's

Jubilee, and he is the premier Prince—the Prince IMPERIAL of course excepted—of a country allied with Great Britain. Nothing could be more appropriate than KING EDWARD'S recognition of him. In Count MATSUKATA'S case the presentation of the Grand Cross of St. MICHAEL and St. GEORGE is directly due, we may assume, to his having accompanied Prince KOMATSU for the purpose of being present at KING EDWARD'S Coronation, and indirectly to the solid services he has rendered his country in financial affairs. There can be no question that his title to the honour is well founded, and that the British Monarch's choice of him will be universally endorsed in Japan. Sir CLAUDE MACDONALD'S part in promoting these acts of courtesy deserves all praise. There is yet another, and a higher, direction in which his influence might be wisely exercised, but this part of the subject does not lend itself to discussion in newspaper columns.

THE IMPERIAL GARDEN PARTY.

THE Imperial Garden Party took place on the 12th instant and was exceptionally favoured by the weather, which resembled a soft spring day rather than mid-November. Neither the EMPEROR nor the CROWN PRINCE was present, His MAJESTY being absent in Kiushiu on account of the autumn manoeuvres, and His Imperial Highness being still indisposed. Otherwise the party lacked nothing of its usual brilliancy, though the quality of the chrysanthemums was by no means exceptionally good, the season having been unsuited for cultivating this somewhat capricious flower. The EMPRESS and the PRINCESS IMPERIAL did the honours, and it need scarcely be added that the elite of Tokyo, as well as the usual number of foreign tourists, were present.

These celebrations are always associated with some expressions of surprise as to the nature of the discrimination exercised by the Imperial Household Department. The chief qualification for the honour of an invitation is to be a passer-by; the chief disqualification, to be a resident. That is contrary to the natural order of things. The disposition of a host in every-day life is to extend his hospitality to those with whom he has long been acquainted, and to prefer them, if preference there must be, to strangers and casual sojourners. But in Japan to be a stranger is to be honoured: to be an old resident and a friend is to be neglected. Such is the criticism iterated and reiterated in connexion with Imperial celebrations. It looks like a legitimate criticism, at first sight. But it will not bear close inspection. There must be some rule. In the first place, merely to be a resident, however old in standing, does not constitute, and would not anywhere constitute, a title for admission to the Sovereign's Court. That is beyond query. It follows, then, that if the old resident has no ground of complaint on account of his residence,

his dissatisfaction must be solely due to the comparatively favoured treatment of the traveller. There, however, the Japanese Authorities do not exercise any discretion. Their rule is very simple, as we understand it. They send invitations to persons only on whose account formal application is made by their respective Representatives. Possibly some of the latter show themselves over-facile in granting introductions. That, however, if it be the case, is a mere abuse of the system, not an inherent defect. Tourists franked by foreign *Chefs de Mission* are, in effect, franked by the Heads of the States which the latter represent, and that constitutes a commendation such as the Japanese Court could scarcely ignore. Let it be once granted that to have lived a long time in the country, or to have taken a leading part in local commerce, qualifies for admission to Court celebrations, and there would immediately be created grounds of complaint and discontent much larger than anything existing now. We are well aware that this is a delicate matter to discuss at all, and that when the recipients of acts of courtesy reason about their right to them, they commit a solecism. It should be premised, therefore, that our words are addressed solely to Occidental readers though the Japanese also may be interested in hearing an echo of views not infrequently expressed by persons who fail to scrutinise the facts closely.

POLITICAL PARTIES IN JAPAN.

IT is currently rumoured that the ancient house of HOSOKAWA, whose head was formerly feudal chief of Higo, having his castle in Kumamoto, has suffered almost crippling losses owing to dishonesty on the part of a factor. And it is further rumoured that the mischievous factor's defalcations had their origin in political intrigues, which involved the expenditure of hundreds of thousands of *yên* on account of elections and cognate doings. This incident recalls the old query, what have the political parties done for Japan. What useful achievements stand to their credit? Reviewing the period of eleven years that separate the present from the time of the Diet's first meeting, the most salient fact suggesting itself in connection with the parties is that they have introduced an element of injurious instability into administration and legislation. It is no longer possible to foresee with certainty any issue from situations which, under the former oligarchical regimen, would have been dealt with as promptly as their public importance suggested. Projects of law, conceived in the best interests of commercial and industrial development, enactments designed to promote enterprise or improve public institutions, may be duly drafted by a Cabinet only to be rendered nugatory by the frivolous opposition of parties. Intelligent opposition is a very excellent and serviceable thing in its way. But unfortunately displays of intel-

ligent opposition are very rare in the field of Japanese politics. Of course this defect is common everywhere. A political association never sees any good in measures proposed by its rivals, and is consequently bound to thwart them in all conceivable conjunctures. The trouble is particularly prominent, however, in a case such as that of Japan, where the party system, not having yet developed any of its compensatory advantages, is merely a source of commotion and contention. Each session of the Diet the question arises, will the course of administration be interrupted by difficulties due to political jealousies and intrigues, or will the crisis be averted by some compromise showing that neither side has the full courage of its opinions. Then there is the matter of morality. None can honestly say that the tendency of constitutional institutions in Japan has been to improve political morality. On the contrary, the tendency appears to be in precisely the opposite direction. Of course only the rashest onlooker can pretend to speak with absolute assurance on such a subject, but so far as our observation goes the corruption of the present era has never been surpassed, perhaps never previously equalled, in this country. The case alluded to above illustrates a state of affairs which every patriotic and conscientious Japanese must regard with profound solicitude. There may be countries in the West where similar abuses prevail in an even greater degree, but we do not know of any country where prominent politicians so publicly and habitually charge their opponents with prosecuting their designs by corrupt methods. The oligarchical era was conspicuously better and more wholesome—better in the sense that national affairs were not so often sacrificed to private ambitions, and more wholesome in the sense that if corruption prevailed, its scope was more limited and its effects less palpable.

"THE HUMP."

Mr. Rudyard Kipling's new book is written for the children. It is called "Just So" and is a collection of very clever animal stories, each of which has an accompanying set of verses. To "How the Camel Got His Hump" the following wholesome jingle is appended:—

The Camel's hump is an ugly lump
Which well you may see at the Zoo;
But uglier yet is the hump we get
From having too little to do. . . .
We climb out of bed with a frouzly head
And a snarly-yarly voice.
We shiver and scowl and we grunt and we growl
At our bath, and our boots and our toys. . . .
The cure for this ill is not to sit still,
Or frowst with a book by the fire;
But to take a large hoe and a shovel also,
And dig till you gently perspire. . . .
I get it as well as you-oo-oo-
If I haven't enough to do-oo-oo!
We all get hump—
Cameelious hump—
Kiddies and grown-ups too!

Sir Ernest Satow, K.C.M.G., British Minister to China, is expected in Shanghai shortly on his way home on leave.

TO NORROWAY.

A PAPER READ BEFORE THE YOKOHAMA LITERARY SOCIETY BY MR. W. KARL VINCENT, ON FRIDAY, NOVEMBER 14TH, 1902.

One bright summer's day, early in July, I left the shores of Old England on a visit to that Northern land called Norway, known in the present day as the Land of the "Midnight Sun," and in olden times as the "Home of the Vikings." I can hardly express the feelings that surged within me when first I beheld the rugged outlines of the Norwegian coast, or later when I set foot on Norwegian soil. What I had so long desired was at last to be realized. As one sails along the coast one sees everywhere deep, narrow arms of the sea winding their way amidst masses of rock belonging to the oldest formations; these arms of the sea, I need hardly remark, are the world-famed fjords. These fjords reach miles into the land, running amidst magnificent scenery. Whilst standing on the steamer's deck, as it quietly threads its way in and out of the innumerable islands which cluster off the coast of Norway, one sees snowy, bold and imposing mountains, deep, narrow and well-wooded valleys, bleak plateaux and wild ravines; rivulets, waterfalls, and an occasional glacier. But the scenery is not all wild and rugged. There are many exquisite sylvan landscapes, so quiet and peaceful, that one feels inclined to remain there as a lotus-eater for the rest of his days. From Spring to Autumn is a long, long day in Norway. The sun is more or less always shining, yes, even at midnight, and for this reason the country is named the "Land of the Midnight Sun." Those who have seen the sun at night shining in all his glory can never forget the scene. This phenomenon takes place, as you all know, in the regions about the Arctic circle. How strange! midnight, and yet the sun shining; shedding the most beautiful tints imaginable over the heavens, the amber coloured sky streaked with orange, purple, pink and violet hues, which, being reflected in the shimmering waters beneath, give the whole scene a glory of peculiar magnificence. This, later, gives place to the, if possible, greater glory of the "Aurora Borealis." To describe the wonderful effects of this phenomena, ever shifting its colours and position, requires a pen, or the brush, of an artist *par excellence*. Count Harold Moltke, the Danish painter, has very nearly succeeded in portraying the unique colouring on canvas, and needless to say his works of art have created quite a sensation in Scandinavia. When spring returns the huge masses of accumulated snow, melting under the rays of a powerful sun, turn the mountain streams into great rivers, which, rushing across the high tablelands, precipitate themselves thousands of feet down the steep mountain side, forming lovely cascades and waterfalls. With spring also return the violets, buttercups, forget-me-nots and other wild flowers to lend additional charm to the quiet roadsides. And later on, in due season, those who are energetic, may gather on the mountain sides the wild strawberry, raspberry, cranberry, whortleberry and alpine currant, which are all plentiful. In early summer one hears the song of the mountain thrush and skylark, and even the monotonous call of the cuckoo sounds sweet in this strange land as it comes floating over dale and fjord. When the season is settled the farmers are all a-bustle collecting the cattle who, together with a number of farm hands, leave for "the saeters." These are small, primitive dairy farms situated far away in the heights of the mountains. Here the cattle graze, watched by the "saeter girls," who also make butter and cheese, which eventually find their way to the large seaport towns, and thence to the great world beyond. Many of the saeters are really difficult of access, high mountain ranges, and snow patches have to be crossed and rivers forded by man and beast. The saeter life is not an easy one, the pastures are far away from the huts, and during the whole day the girls have to follow the herd, rain or sunshine, and they return home in the evening very often cold and hungry. But those left in charge of the valley farms down by the fjord side, during the

summer, have a much pleasanter time. Many of them let the vacated rooms to visitors and attend to the occasional wants of the passing tourist, and so the months of June, July and August are a source of profit and pleasure to many a farmer. July is the best month in which to visit Norway, the weather being usually as perfect as can be, although the absence of night—that is, darkness—seems at first very strange. For instance, in the town of Bergen, the quays where the steamers lie, are all alive with traffic, vessels loading and unloading the greater part of the night. About 1 a.m. there are fewer promenaders in the streets, at 2 only a few stragglers are to be seen, and soon after this all the good folk are abed, having previously taken care to draw the blinds to exclude the light of the sun, leaving the town to the care of the police and night watchman. The latter still keep up the old time custom of calling from the towers of some of the Churches the hours of the night. And so the time passes, which in reality is equivalent to twilight in old England. But let me return to a brief description of the home life by the fjord side. The solitude of these Norwegian farms along the water's edge, standing often entirely alone, is very striking. They occupy in many cases only narrow tracts of land, having high mountains at the rear; the fjord is in front and small woodlands of birch, fir and other trees with a few patches of meadow land at either side surround the farm. You will readily perceive that their only means of communication with the outer world is by water. Small steamers carrying the mail plying in and out of the many crooks and crannies are eagerly watched for by the farmer and his family. Though many of the farms are practically isolated from the village or town-school, the education of the children is not neglected. Everything that tends to produce intellectual development receives attention according to the means of the family, and great sacrifices are often made in order that the children may have every possible opportunity for self-improvement so that they may be able to compete with the town lads and lasses; the parents even struggling to send them later to the University cities to pursue the higher courses of study. It is not uncommon to find a well-to-do farmer able to converse fairly well in three, and often four, languages. The girls are also taught to be good housewives and they become skilful in all kinds of needlework, embroidery, etc. The life is essentially a "home-life," rich in domestic comforts; solid culture is sought after, rather than superficial accomplishments, for the wife is often the only companion to cheer the lonely house in winter. The Norwegians are intensely musical, and when friends are able to pay a visit from other farms the time is spent in music and dancing. All through Norwegian music there runs a strong under-current of affecting, sad melancholy. The scenery and the feeling of the people have struck this chord, which rings out even in songs where one would expect a joyous flourish of trumpets. The Norwegian national dances, in their melodies and rhythm, have a natural and bold character, which gives them considerable musical worth. The principal are the *halling*, a solo dance with wild evolutions and vigorous kicks at the rafters of the room, and the *springar*, a dance for two but with considerably less vigorous evolutions. A large proportion of the Norwegian national music has arisen from the use of, or under the impression obtained from, the national instruments, especially the *langeleik* (an old kind of zither) and the *Hardanger violin*, both of which play an important part in the musical life of the country folk. Regarding the violin, beneath the four upper strings (which are tuned to suit the taste of the player), and under the finger board, there run several sympathetic strings of fine steel wire. By the aid of this instrument the country people invent their musical impressions of nature, interspersed with descriptive sketches of mid-summer, dawn, sunset, the thrush's trill, or the ringing of marriage-bells. Enough of music. The Church is often far away and quite inaccessible, except by water, so that families are able to attend Divine worship but rarely, and only when the weather is most propitious, or when a confirmation or wedding takes place. A Norwegian peasant wedding is extremely picturesque. It

was my good fortune to meet a bridal party (in Hardanger), crossing the fjord. The bride wore a silver tinsel crown (which, by the way, is usually handed down from mother to daughter and possibly grand-daughter); this glittered prettily in the sunlight; her garments were of many colours. By her side was seated the bridegroom, looking radiantly happy, also in his Sunday clothes, which were of mixed hues too. Their boat was followed by many others, all going to the marriage feast. Two men were making joyous and appropriate music on violins, joined occasionally by a clarinet. When the happy pair passed out of sight, and the last note of the music had died away over the waters, I felt the happier and better for having witnessed this truly picturesque, simple and happy bridal procession.

No people under the sun are more generous or hospitable than the natives of Norway, meanness seems foreign to the character of the Norwegian. They are a God-fearing, upright, honest and warm-hearted people, primitive, somewhat conservative, it may be, in many of their ways. The peasant costume of the country is quaint and pretty. It differs in detail according to the district. The men usually wear short trousers, woollen stockings, heavy shoes, and a vest ornamented with silver or gilt buttons, over a white, blue or red shirt. The women have skirts of rough homespun, the borders of which are adorned with bands of bright colours; stockings of various hues and sometimes gaiters, which are embroidered with flowers and fancy patterns. The dresses are trimmed with many silver ornaments; sometimes belts of copper of really fine workmanship are seen; and some bodices have ornamental straps over the shoulders, while others resemble the Swiss peasant bodice. Being *only a mere man*, my descriptive powers with regard to this sort of thing is limited, but let me say the *tout ensemble* of both the male and female peasants is most pleasing to the eye. Unmarried women in Summer usually go bareheaded, or with just a coloured handkerchief tied round the head, but the married ones adopt a white linen kind of poke-bonnet, called "skout," with flaps on either side.

I have briefly endeavoured to give you some idea of the rural customs of the Norwegians, it will now be wise to look for a little while into the history of this very interesting people. In the literature of other European nations, we find early mention of Norway as being inhabited. It is, however, from the era of the Vikings, from about the 8th to 11th century, that we have authentic historical records of the country and its people. The early inhabitants lived by the lake sides. The coast, mountains and fjords formed natural barriers around the different settlements, and so in each an independent spirit was developed, which would recognize no other authority than the chief of the clan. Unfortunately this spirit could not long remain quiet. The various clans would occasionally fit out an expedition and go marauding at the expense of the neighbouring clans. Later they united forces and drove the Lapps and Finns farther north. According to ancient Norse mythology only the brave warrior who died on the battlefield would be snatched up by the attendant Valkyries, and carried off to be admitted to Valhalla. To die on a bed of sickness was a disgrace and meant perdition in the life hereafter. And so the craving for deeds of fame and honour won by valour and hardy strength developed among them, and deeds of "derring-do" were among the chief aims of the Northern warrior. Besides, the poorness of the soil would not permit the owners the opulence and splendour with which they were inclined to surround themselves. Forests and mountains made communication difficult, while the sea afforded the easiest means of intercourse; therefore ships were built for hardy well-armed men, who were sent out to win fame and gold for the community at home. Thus we have the reason for the marauding expeditions of the Vikings. Bolder navigators than the Phœnicians of old, they sailed east, west, south and even north, into the arctic regions to indulge in their passion for fighting, to win fame, plunder and wealth. They left their homes in spring, returning in autumn to enjoy the fruit of their excursions during the winter months. At first their expedi-

tions were directed against the Shetlands, Orkneys and Hebrides, even to Ireland and finally to England. Later on they penetrated as far as France, Italy, Greece and right up to the walls of Constantinople; in fact they overran Europe and again crossing blue water sailed down the Nile and spread over Northern Africa. The Vikings discovered Iceland, Greenland and North America.

A Norwegian saga, written before *anno domini* 1000, contains accounts of a visit to America, but the most complete is that of "Leif Erikson," who, with 35 men, set out in 1003 to find more about the great new country. He reached the regions which now go by the names of Labrador, Maine, and Massachusetts, but which he then named *Vinland*. Norse remains and implements have been discovered in Newport, U.S., and elsewhere. All this corresponds with the *Icelandic* historians account of the various expeditions to *Vinland*. Therefore it is reasonable to assume that Columbus in 1477, before he set out on his great voyage of discovery, had visited Iceland and there learned of the finding of *Vinland* by the Norwegians, or else had conversation with men who had voyaged north and had heard the tradition.

The Vikings seldom buried their dead on shore. They usually placed the dead warriors on a ship, set it on fire, and sent the blazing mass down the fjord out to the Ocean, that they might rest in the great waters they had loved so well in life. The strong spirit of independence in the Norwegians, together with the extensive area of their country and the distances between the settlements, were the chief causes of Norway being for a considerable period divided into a number of petty principalities. It was some considerable time after the beginning of the Viking era that Norway was formed into one kingdom. In the 9th century there lived in Vestfold (on the west side of Christiania Fjord) a sturdy race of princes who distinguished themselves by wealth, bravery and wisdom. They gradually subjugated the whole country south of the Dovrefjeld, which, under Halfdan Svarte, was still further augmented towards the west by marriage. By wise measures he firmly established his dynasty, and his son Harold Fairhair continued the work of his father, and completed it by winning the great battle of Harfursfjord in A.D. 872, after which his supremacy over all Norway was secured. A few chieftains, however, would not submit to this new order of things, but kept up a long and stubborn resistance against the descendants of Harold Fairhair. At times the King won, at others the rebellious chieftains proved victorious. One of the former was Olaf Trygvasson who, in his youth, had been far and wide with the Vikings and had gained great fame and wealth. In England he had been converted to the Christian faith and he returned to Norway with a fixed determination to subdue the people and introduce Christianity. His methods were none of the gentlest, though perhaps only in accordance with the spirit of the times. Those days were days of violence and Olaf's Christianity partook more of the pagan's ferocity to make all men believe as he believed than it did of the ideal of the "White Christ." He died fighting, at the battle of Svolder. Longfellow describes Olaf's last days in an heroic Saga which he introduces in the "Tales of a Wayside Inn." The fight at the "Isle of Svald" is told in thrilling verse and then comes the last scene of all when Kolbiorn engages Olaf in single combat, after the manner of those days. They fight to the finish and being mortally wounded the two men throw themselves into the sea. The poet continues:—

"There is told a wonderful tale,
How the King stripped off his mail,
Like leaves of the brown sea-kale,
As he swam beneath the main;
But the young grew old and grey,
And never, by night or by day
In his Kingdom of Norrway
Was King Olaf seen again!

In 1319 Norway was brought into union with Sweden and later in 1380 with Denmark. For 400 years the country remained in a state of

stagnation and did not assert her independence till 1814.

Time will not permit us to go deeply into the history of Norway but it is enough to say that under King Charles, Oscar 1st, Charles the 15th, and the present monarch, King Oscar 2nd, Norway has rapidly come to the front, and all internal dissensions have been smoothed away. Norway with only two million inhabitants can never aspire to gain any considerable influence in European politics. But, although her honours among the nations belong to a bygone age, when distinction was gained by individual strength and courage, yet the Norwegians have not, like so many other nations with heroic traditions become decayed and effete. The ambition of the people has been turned towards the pursuits of peace, and they, happy in the possession of their independence, are arduously applying themselves to the development of commerce and shipping and the improvement of their industries. In general education, art and science, Norway ranks among the most enlightened nations of Europe. Attendance at school is compulsory from the age of 7 to 14, so everyone can consequently read and write. Besides the elementary public schools, the Government supports a number of free schools of a higher grade, and a University at Christiania, where are also the national galleries of painting and sculpture. The political and intellectual progress of Norway have gone hand in hand since the middle of this century.

The old Norse-Icelandic literature was very rich, and reached its culmination in the 13th century when the "Sagas" of the Norwegian Kings were written by Snorre Sturlason, and a number of other very interesting records were compiled by various historians. A prominent place is taken by the "Kongespeilet," written about the close of the 12th century. In this work we have an account, in conversational form, of the mode of life and customs of various social classes, and it gives evidence of a high degree of intellectual ability hardly equalled in the whole literature of Europe at that period. The country having gone back in every respect during the union with Denmark, intellectual culture was almost stifled and showed but few signs of life, until the Norwegian poet Ludvig Holberg (the Shakespeare of the North) appeared in 1684-1754. In a series of dramatic works this poet has given us a panorama of Denmark of that time; he raised the Danish language to a high literary level; and no author has exercised so great an influence in Norway and Denmark as he. Not long after the separation of these countries, new intellectual life began to germinate, and especially during the last century have the contributions to art, literature and science by Norway attracted the general attention of the whole world. In the works of the two poets Henrik Wergeland (1809-45) and Velhaven (1807-73) is found a reflection of Norway of that period—and the Norway of the future. A bitter literary contest was carried on between these two writers, which gradually communicated itself to the people, who were thereby roused to greater participation in the intellectual life of the nation, of which the results were visible in the politics of the day. By Velhaven's patriotic writings in prose and poetry, and his articles in the daily papers, he stimulated the people to guard their liberties, and promote education and culture. His name occupies a prominent niche in the history of Norwegian literature. Long before his death a stronger national movement was perceptible in all branches. The old popular ballads and national melodies were collected and arranged; while the literati drew on the treasures of the popular folk lore for the subject of their stories. Prominent among these were Asbjørnsen and Moe. Among the great artists belong Christian Dahl, Adof Tidemand and Gude, they also have taken for their well known pictures, scenes from the lives of the people. The sculptors were Skeibrok and Sinding. The most noted authors of to-day are Ibsen and Bjørnsen. Their works have been translated into most of the European languages, and have a marked influence upon the rising generation of all Germanic nations. With these authors, realism made its entry into the literature of the north,

and all modern writers are more or less influenced by it. In England and France is this especially perceptible. Other well known writers are Jonas Lie, Garborg Kjelland and the vernacularist Kristofer Jansen, the zealous champion of country dialect derived from the ancient Norse-Icelandic as the literary language of the nation. Among musicians stand out Ole Bull, the violinist, who died in 1880 and who was rightly called the "Paganini of the North." The composers are Kjerulf, Nordraak, Grieg, Nissen, Sinding, etc. The dramatic stage boasts the names of Johannes Brun, Laura Gundersen, and Lucie Wolf. In the scientific world several Norwegians have been prominent, suffice it here to mention Hausten the astronomer, Abel and Lie the mathematicians; Michael and Ossian Sars the zoologists; Unjer, Liehlim and Ernest Sars historians, the last named being the first to write a complete history of Norway. What Sven Hedin has done as an explorer you all no doubt well know; more especially is the name of Nansen familiar to you, who by dint of perseverance, good cheer and courage to a tremendous degree led a band of equally daring men into the wilds of Northern Iceland, returning after three years of great hardships to give the scientific world fresh truths concerning the Polar regions. The expedition of the *Fram* is known to all, young and old, and I think you'll agree that the good ship *Fram* was manned with a courage and zeal no less great than that possessed by the Vikings of old.

The following was the programme at Friday evening's meeting of the Yokohama Literary Society, held at Van Schaick Hall:—

PART I.

Pianoforte Duo... "Peer Gynt Suite," op. 46....Grieg.
(a) Dawn. (b) Anitra's Dance. (c) Peer Gynt's Flight.
Miss Elsie Blundell and Mr. W. K. Vincent.

"TO NORROWAY"

(From North Cape to Christiania); illustrated by
Stereopticon Views,
Mr. W. Karl Vincent.

PART II.

Pianoforte Duo... "Peer Gynt Suite," op. 55....Grieg.
(a) Ingrid's Lament. (b) Arabian Dance.

(c) The Storm.

Miss Elsie Blundell and Mr. W. K. Vincent.

Song..... "Last Eve".....Kjerulf.
Miss Vincent.

Violin Solo..... "Serenade".....Olsen.
Mrs. W. Scott Hunter.

Song..... "Solveig's Song" (Peer Gynt).....Grieg.
Mrs. E. C. Irwine.

Pianoforte Solo..(a) "A Finnish Song".....Engelberg.
(b) "Spring," op. 32, No. 3....Sinding.
Mrs. J. G. Doering.

Octette (Vocal)...

"Norwegian Peasant's Bridal March".....Söderman.
Mrs. Irwine, Mrs. W. K. Wilson, Miss E. B. Leach,
Miss Vincent, Messrs. E. T. Nicholas, S. F. Unite,
W. K. Wilson and S. H. Somerton.

MR. WIRGMAN'S PICTURES.

Mr. C. A. Wirgman opened an exhibition of his pictures on Thursday forenoon in the Masonic Hall, No. 78, Main Street. These are all water colours and like previous works from the same artist they demonstrate a high level of power. There are upwards of forty pictures, exhibiting great variety in choice of subject and treatment. It is difficult for the lay person to select particular studies, but it seems as if Mr. Wirgman is specially happy in his sea effects. Several scenes showing the rocky coast of Inuboye, with much water tumbling and tossing about, are very striking. His bamboos are also very attractive studies. Perhaps the best of the series on view is a delightful picture entitled "Azaleas and Shrine," being a large group of brightly flowering shrubs clustered on one side of the steps leading to a shrine from which an ancient priest is slowly and painfully descending. Other fine pieces of colouring are the two views of Naruto (Namikiri-Fudo) in Kadzusa, where foliage fringing a still pool is charmingly rendered. But the exhibition as a whole will well repay inspection.

Mr. Yenomoto also exhibits several water-colours, one of which, a study of maples, is a most attractive piece.

"CONFUSION" AT THE PUBLIC HALL.

The production of Joseph Derrick's amusing farcial comedy, "Confusion," at the Public Hall on Wednesday evening by the Yokohama A.D.C., sent one's thoughts roving back to the not so very distant days of last century when local amateurs first presented this trifling absurdity upon the Yokohama boards. To be exact, it was on Saturday, January 8, 1898, that "Confusion" was first presented here and on turning over the newspaper files of that year it will be found that three of the players who took part last evening were engaged in the original production. In 1898 the *caste* was:—

Miss Lucretia TicklebyMrs. C. F. McWilliams.
Rose (Mrs. Mumbleford).....Mrs. A. C. Read.
Violet.....Miss Thomas.
Maria.....Mrs. H. M. Bevis.
Mr. Mortimer Mumbleford.....Mr. W. G. Bayne.
Mr. Christopher Blizzard
 (uncle to *Rose*).....Mr. A. C. Read.
Mr. Rupert Sunberry.....Mr. E. C. Davis.
Dr. Jones.....Mr. A. M. Chalmers.
James.....Mr. W. Y. Showler.
Muzzle.....Mr. E. Eddison.

Reading down this list one is forcibly reminded of the transitory character of Far Eastern communities. The great majority of the players of 1898 have left Yokohama, some never to return; Shanghai, Kobe, as well as Old England, have become the places of their habitat. But were they to return to the scenes of their ancient triumphs we feel sure they would be the first to pay warm tribute to the very excellent manner in which "Confusion" was presented, staged and acted on Wednesday evening. The *dramatis personæ* on this occasion were as follow:—

Mortimer MumblefordMr. E. C. Davis.
Christopher BlizzardMr. G. G. Brady.
Rupert SunberryMr. N. G. Maitland.
Dr. Bartholomew JonesMr. E. Eddison.
James.....Mr. C. Aslet.
Muzzle.....Mr. W. S. Moss.
Rose MumblefordMrs. Davis.
Miss Lucretia Tickleby.....Mrs. McWilliams.
Violet.....Mrs. A. W. Read.
Maria.....Mrs. Whitney.

The story—for really, though "Confusion" is a farce, there is a well-defined thread of story running through its marvellous convolutions—the story which the actors and actresses have to tell concern a mis-placed baby, the mis-understood present of a pugdog, and the reading of private telegrams by people to whom they are not addressed and who therefore possess not the slightest clue to their meaning, and the awful consequences which follow such devious conduct: these are the ingredients which the playwright uses to drive a middle-class suburban family, temporarily sojourning at Jersey Lodge, Maidenhead, on the Thames, to the verge of madness ere things are straightened out all round. Half the fun consists of course in the audience being taken into the playwright's confidence from the outset so that the "lookers-on" at the play know more about the true inwardness of things than do the players, who move distractedly about till the very end is reached. So there is fun on this side of the footlights and hilarious laughter reigns supreme from a very early stage in the complications.

But, as the children say, to tell the tale from the beginning. *James* and *Maria* it seems are married, though to obtain their positions as servants to the *Mumbleford* family they had to pretend that they were still languishing in single blessedness, while their tiny offspring—still in "long clothes"—is sent out to nurse. The *Mumbleford*'s have been married just two months, and *Rose* is beginning to long for something else beside her husband's society, delightful as she declares this still to be, so *Blizzard*, her uncle, out of love for his niece, promises to get her a pug-dog. *Mortimer*, the husband, rather objects to the presence of such an animal, but uncle and niece resolve to secure the dog and spring it upon the family as a surprise. Meanwhile the baby

belonging to *Maria* and *James* falls ill and an urgent telegram is dispatched to the mother which impels her to seek for an afternoon off to visit her "offspring," which she in due course secures. *Christopher Blizzard*, who, by-the-by, has fallen in love with the old maiden Aunt *Lucretia*, (tempted thereto, we sadly fear, by rumours of her comfortable investments in the Funds and Japanese Bonds—for in Yokohama we are nothing if not up to date) is likewise summoned to town by telegram to take delivery of the pug, and this leads to the thickening of the plot. For both telegrams are accidentally dropped, as they always are dropped on the stage, only to be picked up and read by the wrong people, so that what with the reasons for secrecy on both sides, the simultaneous arrival of the baby and the pug, and the placing of both in equivocal positions, the fun waxes fast and furious. We leave to our readers' imaginations the situations that are created and the devices pursued by all and sundry until the complication is unravelled.

It would be a difficult and invidious task to allot the place of pre-eminence among the four principal players. Mrs. McWilliams in her old part as the simpering maiden aunt who succumbs to the flattery of Love's advances in the ripe autumn of her days, has seldom played with more vivacity and skill. Her kittenish advances when she discovers her "affinity"; her outraged, horror-struck cry for human sympathy and support when she reads *Christopher's* telegram; her joy at the close, when she realizes that it has been nothing but a terrible misunderstanding—her playing of it all was splendid. Mr. Brady surpassed himself as the "gay old dog" with a keen scent for the main chance where the surrendering of his bachelor privileges is concerned, but which can be forgiven him when one remembers the tender love and devotion he always shows for his charming niece. His make-up was capital, and none appreciated it more heartily than the worthy doctor whom he "took-off." It was a capital study and will go down on the tablets of memory as one of Mr. Brady's best hits in the portrayal of a character and a part. Mrs. E. C. Davis as *Rose* was simply charming: graceful in all her movements, sincere in all her work, she moved through the piece with a sweet womanliness which won all hearts. She has made great strides in her art and richly deserved the beautiful tributes awarded at the close. As her spouse *Mortimer*, Mr. E. C. Davis was very convincing. Here again we must express unqualified pleasure at the distinct signs of advance shown by this conscientious player. As *Rupert Sunberry* and *Violet*, Mr. N. G. Maitland and Mrs. A. W. Read played secondary parts very creditably. In Mrs. Read we welcome a clever recruit to the ranks of local players; her *début* has been made under most pleasant auspices, and we look forward with confidence to seeing her in more ambitious rôles. The *James* and *Maria* of Mr. Aslet and Mrs. Whitney were very funny and between them they kept the house in a roar whenever they had occasion to refer to "our offspring"; their "hoffspring," by the way, was a model infant, never emitting a squeal even when stowed away in the cheffionier and left entirely to its own resources. *Dr. Bartholomew Jones* (Mr. E. Eddison) and *Muzzle* (Mr. W. S. Moss) were both highly satisfactory, the players filling out bald, unenviable parts which with less careful handling would have proved dreadfully inane. Altogether the 11th performance of the "A.D.C." may be considered one of the most successful in its short history, and reflects the greatest credit upon the performers as well as upon those indispensable men "behind the scenes," Mr. E. Beart, stage manager, and Mr. C. F. McWilliams, who was responsible for the scenery and properties.

It only remains to add that the house was crowded, that the ripples of laughter which started almost at the very beginning of the play continued throughout in greater or lesser volume as the comicalities of the scenes developed; that the reseating and renumbering of the Hall gave general satisfaction; and that owing to the kind permission of Rear-Admiral R. D. Evans, U.S.N., the Captain and Officers of the U.S. flagship *Kentucky*, the orchestra of that ship, under the

direction of Mr. Adolf Hausser, performed the following introductory and incidental music during the evening:—

- 1.—Overture "Pique Dame" *Suppé*.
- 2.—Selection..... "Wang" *W. Morse*.
- 3.—Selection..... "Fiddle-de-dee" *J. Stromberg*.
- 4.—March..... "Under one flag" *Blühn*.

DESTRUCTIVE FIRE IN YOKOHAMA.

About 2.10 a.m. on Nov. 9th a fire occurred in a godown at No. 183 in the former Settlement, owned by Messrs. Siber, Wolf & Co., No. 90, Yokohama, resulting in the destruction of the godown. Thanks to the Satsumacho and Kagacho fire brigades, which turned out promptly, the flames were got under before they could spread to the adjacent buildings. The loss will, however, be very great, as the larger portion of the goods stored in the godown was raw silk. The silk was insured in various foreign insurance companies, one alone carrying a line of yen 100,000. The fire is thought to have originated from tobacco ashes carelessly thrown by coolies. The total loss will be about a million and a quarter yen.

Though comparatively few residents were aware of its occurrence, the fire on Sunday morning was one of the most destructive that has visited the settlement. It is supposed to have originated in the silk department which occupied the third story, probably by means of a lighted cigarette end. A lot of 500 bales of raw silk were packed ready for shipment and were destroyed with the other stock.

The following is the list of the co-insurers:—

	Yen.	Agents.
Aachen & Munich	106,000	Messrs. Bavier & Co.
Commercial Union	120,000	H. S. Playfair, Esq.
Hamburg, Bremen	100,000	Messrs. Carl Rhode & Co.
Hanseatische	20,000	Messrs. Simon, Evers & Co.
Helvetia Swiss	195,000	Messrs. Siber, Wolff & Co.
Hongkong	100,000	Jardine, Matheson & Co.
Lancashire	100,000	Messrs. Cornes & Co.
Law, Union & Crown	150,000	Vivanti Brothers.
London Assurance	30,000	Messrs. H. Ahrens & Co., Nachf.
Magdeburg	100,000	Siber, Wolff & Co.
National (Ireland)	40,000	The China and Japan Trading Co., Ltd.
Netherland	40,000	Messrs. Raspe & Co.
Norwich Union	90,000	Messrs. Bavier & Co.
North British and Mercantile	20,000	Messrs. Findlay Richardson & Co.
North German	50,000	R. Bleifus, Esq.
Northern	80,000	Messrs. W. M. Strachan & Co., Ltd.
Patriotic	20,000	Messrs. Pollak Bro's.
Prussian National	30,000	Simon, Evers & Co.
Queen	90,000	W. M. Strachan & Co., Ltd.
Royal	100,000	Otto Reimers & Co.
Salamander	20,000	H. Klingen & Co.
Scottish Union and National	40,000	M. Raspe & Co.
State	60,000	C. Weinberger & Co.
Transatlantic	75,000	C. Illies & Co.
Western	60,000	The China and Japan Trading Co., Ltd.
Total	1,790,000	

At a quarter to 5 a.m. on Nov. 12th a fire occurred in the house occupied by Mr. Kurozawa Ichitaro, No. 91, Sanchome, Fukutomi-cho, Yokohama, which resulted in the destruction of three houses, including the building in which the fire originated. The fire was accidental.

THE PLAGUE.

The business of burning houses in the isolated area at Kaigan-dori, Yokohama, was brought to a conclusion on the afternoon on Nov. 8th. The premises of the Toyo Kisen Kaisha, the Horai-ya Hotel and a few other houses have been saved. A thorough disinfection was carried out in these houses the same day. A sum of yen 2,262 has been given by the Authorities to the unfortunate people isolated on Kanagawa fort at the rate of two yen per person towards the expense of their

removal to other places. The number of rats purchased by the Authorities from the outbreak of the pest up to the present has reached about 70,000. Among them was a rat of considerable dimensions, its body measuring over eight inches in length with a tail of six inches. At first sight the rat is said to have looked like a puppy. It is now preserved in the sanitary section at the Head-quarters of the Yokohama Police. It was picked up in the water off the Bund on Nov. 5th by a Japanese who discovered the animal already dead, floating on the surface.

The City Authorities desire to acknowledge receipt of the following sums contributed in aid of the poor people evicted in connection with the outbreak of plague in Yokohama:—

	Yen.
F. Schroeder, Esq.	5
Imperial German Vice-Consul W. Hagen...	10
E. H. Hobart-Hampden, British Pro-Consul	15
China and Japan Trading Co.	100
H. Klingen, Esq., Netherlands Consul....	25
Ferris Seminary	25
Marquis C. Nembrini de Gonzaga.....	10
Pierre Bure, Consul-General de Belgique...	10
Count Arco Valley	10
Hauptmann Madlung	13.50
Mr. H. Richter	5
Mr. H. Ivison	5
Mr. R. Bleifus	5

YACHTING.

Races in celebration of King Edward's Birthday were arranged for on Saturday but the weather interfered. Of the 39-raters *Mary* and *Maid Marion* started but the easterly airs which had prevailed during the forenoon fell so light that though the *Maid* rounded the Widow Buoy she could not finish in the prescribed time.

So also with the cruisers, of which *Daimyo* had the leading place till the wind petered out and there was nothing for it but to come home. The first prize in this class, presented by Mr. Geo. D. Morgan, is a very fine vase which should be a very welcome addition to any yachtsman's sideboard. *Daimyo*, *Molly*, *Mosquito*, *Surprise*, *Asagao*, and *Virginia* started.

The 21-raters competed for an elegant prize, a tray presented by Mr. H. F. Arthur, but in this case also, although *Wettinge* seemed to stand a good chance of holding first place, the race could not be finished owing to lack of wind. For this prize quite a fleet started—*Winsome*, *Wettinge*, *Pele*, *Edna*, *Stella*, *Yugao*, and *Vixen*.

DEATH OF MR. DUNCAN MCLAREN.

Many will hear with regret that Mr. Duncan McLaren passed away at the Yokohama General Hospital about 5 o'clock on Friday afternoon. Last Monday evening he slipped while descending the Boat-house stairs and sustained a severe concussion of the brain from which, despite the care of Dr. Wheeler and another medical man, he never rallied. Mr. McLaren had been resident in Japan for over 20 years, and in the course of his career had served with Messrs. Strachan & Co., Messrs. Dodwell & Co., Messrs. Bethell Bros., and finally with Messrs. Mollison & Co. In years gone by he was an active member of the St. Andrew's Society, generally playing the reels at the annual balls, for he was a lover of the violin. He was also keenly interested in aquatics and steered many a boat to victory both here and in Kobe.

The funeral of Mr. D. McLaren took place from the General Hospital on Monday morning, the coffin being followed to the Cemetery by a large body of mourners. The pall bearers were Drs. Wheeler and N. G. Munro, and Messrs. J. W. Crowe, C. M. Duff, P. E. F. Stone, and S. H. Somerton; Mr. J. P. Mollison walking after the hearse as chief mourner. At the cemetery the bier, covered with beautiful wreaths, was borne to the graveside where the Rev. W. P. G. Field read the burial service of the Church of England.

The Cape newspapers resent Mr. Chamberlain's intention of going to Natal first on board the Cape Colony's cruiser *Good Hope*.

LAW CASES.

SATO v. THWAITES & CO.

In the Yokohama Chiho Saibansho on Friday morning, before Judge Kano, was heard an action brought by Mr. Sato Rennosuke, No. 3, Fukuro-machi, Ushigome, Tokyo, against Messrs. Chas. Thwaites & Co., No. 61, Yokohama, claiming yen 6,995.55 damages, alleged to have been caused through the breaking of a contract. Messrs. Yamanaka and Sasaki appeared for the plaintiff and Mr. Ideura for the defendants.

Mr. Yamanaka stated that on Sept. 17th this year a contract was signed between the parties, whereby defendants agreed to give a grand magical art exhibition in Tokyo for 30 days receiving yen 200 in advance daily from plaintiff during the performance, the building of the Kinki-kan in Kanda being selected subsequently for the purpose by plaintiff in accordance with the provisions of the agreement. The contract further provided that there should be a series of ten illusions performed every day, to be given twice a day namely in the afternoon and evening. The performance commenced on Oct. 5th this year under the direction of Mr. Davis and his company. Contrary to expectation, however, only six illusions were exhibited on the first day of the performance, the remaining four pieces not being given. Under the circumstances, whereas ten illusions were promised to the public every day the exhibition fell far short of that number, to the great dissatisfaction of the spectators. Practically speaking, plaintiff incurred direct damage. On the second day, namely, the 6th, defendants again failed to exhibit ten illusions. In consequence, plaintiff was obliged to discontinue the performance on the 7th and onward. Subsequently defendants gave a series of the magical performance at the Tokyo-za, a theatre in the same district. This was a breaking of the contract on the part of the performance, Mr. Ishii Black, the well-known story-teller, was engaged to explain each display. The total receipts estimated by plaintiff during 30 days were yen 13,340 on the basis of the following calculations: 25 persons in first class, 100 in second class, 200 in third class and 150 spectators in fourth class per day. The building of the Kinkikan is capable of containing about 2,000 persons. The daily expense of the performance was yen 1,319.50. The net profit of plaintiff was therefore put at yen 6,220.50 which plaintiff claims with yen 775.05, being damage incurred by him in consequence of the discontinuance of the performance, making a total of yen 6,995.55 as claimed above. Counsel added that his client had paid yen 300 to Mr. Ishii Black as remuneration for his trouble in acting as interpreter.

Mr. Ideura admitted that a contract was made on Sept. 17th this year to give the performance, with a proviso that his clients were to receive yen 200 in advance every day. Plaintiff, however, disregarded the contract, for he failed to pay to defendants yen 200 in advance on the first day of the performance. When hard pressed, plaintiff proposed to give to defendants yen 70, but the latter declined to accept it. According plaintiff gave defendants yen 100, saying that the remaining yen 100 would be given later on. Defendants therefore received only one hundred yen for the first day. On the second day of the performance plaintiff again failed to pay yen 200 in advance, and in view of this defendants broke the contract. While the dispute was thus going on between plaintiff and defendants, the latter applied to the Kanda Police asking that plaintiff should be ordered to pay to defendant's the sum in question. Despite the advice of the Police authorities plaintiff refused to accede to defendants' demand. It was for this reason that defendants broke the contract, the exhibition having been given on Oct. 5th and 6th only. With regard to Mr. Ishii Black, defendants made no arrangement whatever with plaintiff. Mr. I. Black took the trouble of explanation on the first day, but he refused to attend the following day owing apparently to the bad terms offered by plaintiff. As to ten illusions, the contract was entered into to the effect that the ten illusions should be displayed

during the 30 days' performance and not for one day. The building of the Kinkikan was too limited for an exhibition of the kind, a theatre being preferable for the purpose. Owing to the limited space of the Kinkikan building the display of ten illusions in one day was too much to be arranged. Defendants on the contrary should have brought a counterclaim against plaintiff so far as the circumstances of the affair were concerned.

Mr. Yamanaka urged that on the first day plaintiff handed to defendant yen 100 in cash and a cheque for yen 100, but owing to the request of defendants the cheque was afterwards cashed.

The Judge asked Mr. Yamanaka whether or not the money was paid to defendants on the following day of the performance. To this, Counsel replied that his client wanted to give yen 200 in advance to defendants in the presence of several police-men, but defendants would not receive it on the plea that he would not like to be held responsible for the full showing of ten illusions on the second day.

After further discussion,

Mr. Sasaki, one of the Counsel for plaintiff, asked the Court for permission to examine as witness Mr. Ishii Black, and two police-constables, Ono Jutoku and Nagoya Gakujiro and five other persons concerned in the matter. Mr. Ideura also applied to have Mr. C. H. Thorn, of Yokohama, and the Chief of the Kanda Police Station as witnesses on behalf of defendants. The Court, after a short consultation, announced that all the witnesses proposed by Mr. Ideura and Mr. Ishii Black and one of the police-constables applied for by plaintiff's Counsel would be summoned to the Court to give evidence. The proceedings were adjourned until Nov. 21st at 10 a.m.

MIZUTANI v. SINGER MANUFACTURING COMPANY.

Judgment was delivered in the Yokohama Chiho Saibansho last Saturday, by Judge Kato, in the case brought by Mr. Mizutani, Yoshidamachi, Yokohama, against the Singer Manufacturing Company, No. 80, Yokohama, claiming recovery of bargain money amounting to one thousand yen. The Court dismissed the plaintiff's claim and a counterclaim by the defendants against the plaintiff was dismissed, the costs of the case to be borne equally by plaintiff and defendants.

Particulars of the case appeared in the *Japan Mail* of Nov. 5th.

In the Yokohama Ku Saibansho on Tuesday morning, Mr. A. R. G. Clark, (of North and Rae, Ltd., No. 79, Yokohama,) was charged with having violated the regulations relating to lemonade and other refreshing waters for summer-use. The case was brought up for trial before Judge Iriye. In response to the Judge's questions, Mr. Clark said that he made six kinds of refreshing water such as lemonade, etc., in September. The Judge produced six bottles each containing different kinds of water and asked the accused whether they were made by him. The accused, after examining them, said that as they possessed no label he could not tell whether they were made by himself or not. He further stated that toward the end of September he was warned by Mr. Ikariyama, Chief of the Kagacho Police, not to mix salicylic acid in the beverages. The warning of the Police Superintendent was at once acquiesced in.

The Judge announced that the accused's action was a violation of the regulations relating to beverages issued on June 5th, 1900. The accused was therefore ordered to pay a fine of one yen 50 sen.

JONES v. BENNEY.

In the Yokohama Ku Saibansho on Wednesday morning, before Judge Hasegawa, the hearing was resumed of the suit, adjourned from Oct. 27th, brought by Mr. E. B. Jones, No. 179, against Mr. C. T. Benney, manager of Cobb & Co., No. 37, Yokohama, claiming yen 20. Mr. Ideura appeared for plaintiff and defendant appeared in person.

As arranged at the previous sitting, Mrs. C.

H. H. Hall was examined as a witness. In response to the Judge's questions, the witness said:—I am now residing at No. 87, Main Street, Yokohama, and am teaching the French language. About 12.30 p.m. on June 28th this year I was riding in a carriage through the main street of Yokohama. I was all alone at the time. The carriage was mine, but the pony and *betto* were hired from Mr. Benney by a monthly arrangement. I don't know the *betto's* name. Explaining the cause of the collision between her carriage and the *jinrikisha* occupied by Mr. Jones, the witness said:—My carriage when near the front of No. 81 met a *jinrikisha*, coming from the other side, and attempted to go in the same direction. As a result, the right hind wheel of my carriage struck the back of the *jinrikisha*, the occupant of which was thrown to the ground.

Defendant stated that in April this year he discharged the *betto*, Matsubara Tatsunosuke, who was in charge of Mrs. Hall's carriage at the time of the accident. He further said that he was not responsible for the accident, because the *betto* was hired by Mrs. Hall. As to his wages, he (defendant) first received the money from Mrs. Hall and then gave it to the *betto*.

Mr. Ideura said that there was no doubt of the *betto* being an employe of the defendant and the latter should be dealt with in accordance with the first clause of Art. 715 of the Civil Code.

Judgment was reserved until Nov. 14th at 9 a.m.

JOVANSEN v. HOPKINS.

In the criminal section of the Yokohama Chiho Saibansho on Wednesday afternoon, Rachel Bretel Jovansen (Mrs. Jovansen) and R. G. Hopkins charged with adultery were again brought up for trial before Judge Danno and associate Judges Mabuchi and Kobayashi.

Procurator Ohira conducted the prosecution. Mr. Hattori acted as interpreter. Messrs. Ohashi and Otsuka appeared for the defence.

Dr. N. Gordon Munro was examined as a witness. Asked by the Judge as to whether he had ever medically examined Rachel Bretel Jovansen, the witness said:—I first examined her about October last year. She was then suffering from diarrhoea. I treated the patient for four or five days. About May this year I also treated her and she was at that time suffering from a certain disease. The Judge, handing a note to witness, asked him whether or not it had been written by witness himself. Witness replied that it was written by himself.

The Judge asked witness what was the condition of Rachel Bretel's illness. To this, witness replied:—Her illness was rather serious. She was very ill. I attended her from May 15th to June 26th this year. She was in bed all the time.

The Judge asked what was her condition when witness treated her on the last day, namely June 26th.

Witness—She was much better, although not recovered entirely.

The Judge—Was she then able to walk?—I think she could walk, but I am not quite sure.

The Judge—Do you think her condition allowed her to do anything she liked?—She had not recovered remarkably well, but she was gradually improving. It was impossible for her to do anything she liked at that time.

The Judge asked witness whether he examined her in February this year.

Witness, after consulting a note-book, said that he attended her on February 22nd, when he found his patient in a very bad condition. She again fell ill in May this year from the effects of the disease. I did not give her medicine every day. I only wrote out a prescription and she obtained the medicine from a chemist. I treated her on May 15th, 17th, and 19th.

The Judge—At what place did you attend her?—I treated the patient at the Club Hotel. After May 26th I think she was able to walk a little.

The Judge asked whether her illness was such as to bring about a relapse, if she behaved imprudently.

Witness replied that his patient was sure to fall ill again, if she did not take care. His final examination was made at the Club Hotel. It was

on the afternoon of May 26th. She was then sitting in her room and not in bed.

Mr. Otsuka asked the witness whether he had ever treated Hopkins.

Witness said he examined him in November last year. He noticed that Rachel Bretel Jovansen was taking care of Hopkins.

After replying to questions of Counsel for the accused, witness retired from the Court room.

The Judge to Mrs. Bretel—Have you anything to say?—I was on my couch on May 26th when I was finally attended by Dr. Munro. Mrs. Clyde came to the Club Hotel on May 26th to see how I was and she remained with me until a late hour.

The Public Procurator at this stage made the following address:—In the first place, Rachel Bretel Jovansen and Adolphe Jovansen were legally married to each other, being husband and wife. The marriage between them took place in Stockholm, Sweden. Adolphe Jovansen was a Danish subject and Rachel a French citizen. As to the validity of their marriage it will be sufficient to investigate only whether the conditions and formalities of the marriage required by the laws of the countries to which the contracting parties belonged had been fulfilled or not. According to the law of Denmark, no male subject of that country is capable of contracting a marriage before he has attained the age of 20 years. After he has reached the full age of 25 years it is quite unnecessary for him to obtain the permission of his parents, the mutual consent of the parties is enough. Adolphe Jovansen was born in 1857 and married in 1890; so he was already more than 25 years of age at the time of his marriage with the accused. It was not therefore necessary for him to obtain the consent of his parents relative to the marriage. The facts are also clear that the marriage was contracted by mutual consent. Rachel Bretel was in her 22nd year when she married. Moreover, she admitted that she obtained the consent of her parents. The marriage was conducted at St. Engenes Church, and they received a marriage certificate from a clergyman who officiated at the ceremony. It should be said that both were married in a proper manner. Secondly it should be stated that Hopkins knew very well that Rachel Bretel was the wife of Adolphe Jovansen so far as his (Hopkins) former post of secretary in the Club Hotel was concerned. Adolphe became manager of the Hotel in October last year and both Adolphe and Rachel called each other husband and wife. From all these facts it is sufficient, to deduce from the evidence that both accused are guilty. Their offence falls within the scope of Art. 353 of the Criminal Code and they should be punished accordingly.

Mr. Ohashi next spoke at some length and went on to say that the statement made by Adolphe Jovansen to the effect that the latter saw both accused lying in the same bed was . . .

At this stage, the Judge announced that the further hearing would be conducted behind closed doors.

HALL v. WATANO.

In the Yokohama Chiho Saibansho on Thursday afternoon, before Judge Matsuba, was heard an action brought by Mr. John W. Hall, No. 61, Yokohama, against Mr. Watano Genji, No. 43, Sanchoe, Masagocho, Yokohama, claiming yen 550.

Mr. Sato, appeared for plaintiff, but neither defendant nor his Counsel were present.

Mr. Sato stated that on the 6th and 7th of June last year his client sold at auction some suits of armour and other articles to defendant for yen 1,077, of which plaintiff received from defendant yen 220 on June 10th and yen 307 on June 20th, leaving a balance of yen 550 which he now claimed.

Owing to the non-appearance of defendant, judgment by default was given at once in favour of plaintiff.

HIOKI v. SAMUEL SAMUEL & Co.

In the Yokohama Chiho Saibansho on Thursday morning, before Judge Matsuda, was heard

an action brought by Mr. R. Hioki, Bankruptcy Administrator in the estate of Messrs. Mourilyan, Heimann & Co., No. 35, against Mr. E. C. Davis, of Messrs. Samuel Samuel & Co., No. 27, Yokohama, claiming recovery of yen 226,250 with six per cent. interest from April 20th this year until the execution of judgment.

Defendant was represented by Messrs. G. Akiyama and Naito. Mr. R. Masujima was also present in the capacity of interpleader, as representing the Hongkong and Shanghai Bank.

Mr. Hioki stated that on March 24th, 1900, defendant made, under the name of Messrs. Samuel Samuel & Co., a contract with the Formosan Government for transactions in camphor, constituting a camphor monopoly, the term of the contract being fixed for three years. Having thus arranged the monopoly, defendant entered into a contract with the bankrupt firm, namely Messrs. Mourilyan, Heimann & Co., to the effect that the latter should supply funds to defendant at the rate of one-eighth, it being understood that profits accruing from the monopoly were to be divided between the parties, while losses would also be equally borne by them. In accordance with this arrangement, the bankrupt firm supplied to defendant yen 226,250 in three installments. In July the same year Messrs. Mourilyan, Heimann and Co., received profits in several installments from defendant. On April 18th this year, Messrs. Mourilyan, Heimann & Co. were declared bankrupt by the Yokohama Chiho Saibansho. As a result, the contract between Mourilyan, Heimann & Co. and Samuel Samuel & Co. became null and void. In view of this, the plaintiff claims the above sum from defendant.

Mr. Akiyama raised an objection technically and urged that Mr. Davis was not concerned in any way in the contract. Mr. W. F. Mitchell, who returned to England early this year, was in charge of Samuel Samuel & Co. at the time the contract was made. It was therefore unreasonable for plaintiff to bring the claim against Mr. Davis. The claim should have been brought against Messrs. Sir Marcus Samuel, Samuel Samuel and W. F. Mitchell, the three parties really concerned in the matter.

Mr. Hioki contended that by virtue of Art. 273 of the Civil Law he was justified in bringing the claim against Mr. Davis only, as he was now head of the firm of Samuel Samuel & Company in Japan. The sum above claimed was supplied to Samuel Samuel & Co. by the bankrupt firm who were then trading under the firm name of Mourilyan, Heimann & Company, in compliance with the contract.

It was arranged to examine the documents of the bankrupt firm in connection with the present case and the proceedings were adjourned until Dec. 4th.

CORONATION SPORTS.

The Children's Sports which but for the singularly unfortunate circumstances which rendered postponement necessary would have taken place on the day originally fixed for the Coronation of King Edward, were held on Thursday on the Recreation Ground. The programme of what was described as a fete included some items and diversions which doubtless would have pleased the youngsters, but unhappily the arrangements could not be sustained and the affair consisted almost entirely of sports. These, however, served the purpose of amusing and entertaining the bairns, each event being keenly contested and watched with interest. There were three prizes for each competition subscribed for by the ladies of Tokyo and Yokohama through the medium of Mrs. Dinsdale, and each British winner received in addition a Coronation Badge. The proceedings, which were favoured by fine weather, began about two o'clock with races for small children and continued at intervals of a quarter of an hour during the afternoon, the youngsters under ten being regaled with tea in the Pavilion early in the afternoon and the oldsters at a later hour.

In the girls' skipping competition the prizes were presented by Mrs. Crawford, who won the prize for this event in Jubilee year.

The Pavilion was decorated with flags, the Japanese and British ensigns being crossed over the centre and the Rugby goals were also draped with bunting. The foreign residents were present in large numbers and the balcony was well filled with ladies.

During the afternoon the Band of the *Kentucky* (present by permission of Rear-Admiral R. D. Evans and the Captain and officers of the flagship) played selections.

The tea tables were under the charge of Mrs. Dodds and Mrs. Flint Kilby.

Towards the close and just before the tug-of-war, three or four of the *Goliath's* ship's company gave a very diverting farce entitled "Rival Lovers," the verandah of the Pavilion being utilized as a stage.

Juggling and ball-playing were among the amusements provided during the afternoon; Uncle Tim and Annt Sally were on the ground and there was Bran Pie for non-winners.

The following were in charge of the arrangements:—Mr. Henry Bonar, President; Mr. J. P. Mollison, Vice-President; Mr. Flint Kilby, Hon. Treasurer, Mr. A. R. Owen, Hon. Secretary; Sub-committee:—Mr. J. Dodds, Chairman; Mr. J. H. Bathgate, Mr. G. G. Brady, Mr. P. B. Clarke, Mr. W. G. Doynce, R.N.; Mr. E. Eddison, Mr. E. Flint Kilby, Mr. F. O. Stuart.

Following were the events:—

BOYS UNDER 10.—50 YARDS FLAT.

- 1st M. Allison.
- 2nd C. I ailey.
- 3rd W. Russell.

GIRLS UNDER 10.—50 YARDS FLAT.

- 1st Doris Hill.
- 2nd Carmen da Silva.
- 3rd Sophy Cahusac.

GIRLS UNDER 15.—100 YARDS SKIPPING.

- 1st Elsie Esdale.
- 2nd Gladys Wilson.
- 3rd Dorothy Stone.

BOYS UNDER 10.—100 YARDS FLAT.

- 1st G. Moss.
- 2nd T. Woodruff.
- 3rd W. Bailey.

GIRLS UNDER 10.—100 YARDS FLAT.

- 1st Doris Hill.
- 2nd Nina Correa.
- 3rd Nora Tipple.

BOYS UNDER 7.—50 YARDS FLAT.

- 1st H. Esdale.
- 2nd Frank Kilby.
- 3rd Harvey Colton.

GIRLS UNDER 7.—50 YARDS FLAT.

- 1st Mary Hands.
- 2nd Lily Weaver.
- 3rd Grace Weaver.

3 LEGGED RACE, 100 YARDS, BOYS.

- 1st Johnny Gorman and Willie Scott.
- 2nd Philip Allison and W. Street.

BOYS UNDER 15.—50 YARDS FLAT.

- 1st R. Brinkmeir.
- 2nd G. Neville.
- 3rd } V. Worden.
D. Neville.

GIRLS UNDER 15.—50 YARDS FLAT.

- 1st George Tresize.
- 2nd Nora Stone.
- 3rd Flossie Eagling.

GIRLS SKIPPING COMPETITION.

- 1st May Cameron.
- 2nd Elsie Blundell.
- 3rd Maidie Cahusac.

BOYS UNDER 15.—100 YARDS FLAT.

- 1st James Esdale.
- 2nd C. Oberlein.
- 3rd V. Worden.

GIRLS UNDER 15.—100 YARDS FLAT.

- 1st George Tresize.
- 2nd Laura Stone.
- 3rd Nina Correa.

BOYS' HOPPING COMPETITION.

- 1st Gerald Irwine.
- 2nd Otto Pohl.

GIRLS HOPPING COMPETITION.

- 1st Georgie Tresize.
- 2nd Doris Hill.
- 3rd Nina Correa.

SACK RACE.

- 1st Martin Luther.
- 2nd Otto Binder.
- 3rd Jimmy Esdale.

THE DOLL SHOW.

The exhibition of dolls was continued on Friday afternoon though the fancy and candy stalls were by no means so heavily burdened with their wares as when business opened on the previous day. The evening session on Thursday was remarkably successful, everything going splendidly. The concert went off capitally, much applause greeting all the numbers especially that of Mr. Brady who after singing "Such a Nice Man Too" had to return and give another song. The prizes were arranged on a table in the centre of the hall and were generally admired. In most cases the winners will be very heartily envied.

Several raffles took place in the course of the evening. The Countess of Exeter, the very finely dressed doll which we have already described, was won by Mr. A. J. McClure; the elaborately executed South African battle-scene fell to Mr. H. F. Arthur, and the kitten raffle was won by Mrs. Komor. A large and splendid basket of flowers was won by Mr. E. C. Davis.

The proceedings on Friday opened at 9 p.m. when Mr. Brady dressed to resemble (and resembling closely) Mr. Jno. W. Hall, ascended the rostrum and read out the results of the voting for the dolls. The prizes were awarded as follows:—

CLASS A.				
No.	Winner.	Votes.	Donor.	Prize.
39	Miss Cameron	91	Mr. Shieno	First
46	Mrs. Mollison	81	Nozawaya	Second
1	Mdme. Bure	33	Mrs. Tanabe	Third
27	—	13	Mrs. Hegt	Fourth

CLASS B.				
66	Miss Baker	161	Kuhn & Komor	First
140	Mrs. Mollison	53	Mrs. G.W. George	Second
92	Miss F. Cameron	39	Mr. Tamamura	Third
72	Mrs. Baker	23	Mdme. Trigue	Fourth

CLASS C.				
104	—	111	Mr. Eppinger	First
139	Miss Gorman	63	Bisansha	Second
106	Miss Waters	14	Mr. Shobey	Third

CLASS D.				
132	Sailors of the Hospital	87	Mr. J. W. Hall	First
123	Mrs. Fraser	61	Lane Cra'd & Co.	Second
127	Miss V. Neville	31	Mr. Manzo	Third
128	Miss Ross	26	Mr. Tamamura	Fourth
135	Miss Strome	8	Mr. Konoike	Fifth

CLASS E.				
52	Miss M. Cameron	79	Dr. Harmon	First
58	Miss S. Howard	47	Mr. Omiya	Second
49	Miss F. Diack	43	Mde. Well	Third

CLASS F.				
122	Mrs. Greig	132	Arthur & Bond	First
121	Mrs. Mollison	102	Mr. Scidmore	Second

CLASS G.				
142	Mrs. Hubbard	85	Dr. Harmon	First

Afterwards Mr. Brady sold the dolls at public auction, and it may be said that there were bargains going. The Countess of Exeter brought *yen* 21, and San Toy *yen* 12.50 but these prices do not seem extravagant and the other dolls went at decidedly cheap figures.

REVIEW.

Shinshakai (The New Society), by Mr. Yano Ryô-kei (Fumio). Published by the Dai-nihon Zusho Kabushiki Kaisha, Tôkyô. Price 45 *sen*.

It was in the early years of the *Meiji* era that Mr. Yano Fumio realised a large sum of money by the sale of a work that is now seldom seen or read, the *Keikoku Bidan*. That book was in no sense original. Its subject-matter was taken wholesale from the history of Theban politics, and Epaminondas was the hero of the story. The secret of its success lay in its applicability to current Japanese politics. After a very long interval spent in serving his country in various capacities, towards the close of life Mr. Yano has again entered the world of literature, having published a work that, according to the *Taiyô*, has passed through no less than eight editions in one month. "The New Society" is controversial and theoretical rather than descriptive. In it Mr. Yano advocates the establishment in this country of a gigantic system of state socialism. The sagacious old man, with whom the two imaginary personages Kanô Tokutarô and Tamino Yetsuzô converse, and whose disciples they become, is a

staunch advocate of State socialism as the only means of averting the terrible evils attendant on free competition and its corollary the despotism of capitalists. To us it seems that the work is neither deep nor philosophical, and we shall be surprised if it influences in any serious manner public opinion on the question which it discusses. We are not of course astonished to find that certain Japanese thinkers are feeling alarmed as they watch some of the results of competition in the West and of their casting about them for some means of averting the distress incident to plutocracy. But it will seem to most persons who are competent to pronounce an opinion on the subject that the State socialism advocated by Mr. Yano has infinitely more disadvantages than the existing situation of affairs. Without further preface we proceed to give an account of the contents of the book. First as to its general plan. The old man at whose feet the two Japanese disciples sit—Karl Marx risen from the dead?—is supposed to have come from a country where free competition has been effectually stamped out by a gigantic state monopoly and where property and the profits accruing therefrom are all in the hands of a Government that makes it its chief object to equalise human lot. The "New Society" which he is made to describe is not that existing in Japan to-day, but an ideal state which the aged seer tells us would take some 50 years to thoroughly develop. The existing state of things in Japan is described under the title *Kyûshakai*, or the Old Society. The work is divided into 12 chapters—Chap. I. entitled "An unexpected meeting in a Public Garden" is unimportant, only introducing the persons whose subsequent conversation forms the subject-matter of the book.

Chaps. II. and III. deal with the leading characteristics of what is described as "the last days of the old Society," but which actually represents things as they now are in Japan. Most things, says Mr. Yano's Karl Marx, pass through three stages of existence. There is the primary state, the intermediate state and the final state. It is so with society. By many economists free competition has been represented as the final state of society. But this is a mistake. In free competition those who win are few, those who lose many. The tendency is to place wealth in the hands of a few and to create a large proletariat class. A state of free competition then is not one in which men can rest content. Three courses are open for adoption (a) Things may be allowed to work themselves out as they will, that is, free competition may be allowed to take its course unchecked; (b) the capital acquired by the many, on the plea that it is right to promote the welfare of the largest number of the human race, may be forcibly taken from them and distributed among the masses; or (c) society may be remodelled in a fashion that shall render existing inequalities impossible. It was fortunate, continues Mr. Yano's all-wise old man, that my country recognised so early the dangers of competition. It is only quite recently that advanced economists in Europe and America have denounced the system as internecine and anarchic. It has been thought by some, Mill among them, that co-operation among the labouring classes would save society from the evils of competition. The experiment has been tried both in England and Germany with similar results in both cases. In England the workmen who have given their support to the co-operative movement are in the proportion of 1/400 to the total number of men employed. The amount of support the idea received in Germany was not more encouraging. There are some who contend that all that is wanted to set matters straight is for the rich to take pity on the poor. But this must come voluntarily if it comes at all. No Government can enforce charity. My contention is that no state can afford to depend on the uncertain method of relieving existing pressure by private charity. Before competition has done its worst legislation must come to the rescue. It must purchase all the chief money-making concerns of the country and run them for the benefit of the whole community. This my country did 50 years ago with the resulting peace, contentment and prosperity that you see to-day.

Chap. IV. entitled "The rise of the New Society," opens with a brief account of the chief European and American writers on Socialism. Marx and Rodbertus and other lesser men are mentioned, but we miss the name of Friedrich Engels who, next to Marx, is universally recognised as the ablest and most influential of scientific and revolutionary socialists. Mr. Yano proceeds to make his advanced economist speak thus: In my country there was a strong feeling against resorting to any violent methods of adjusting matters. It was considered important that the rights of property should be respected. So wholesale purchasing by the State was the plan adopted. We began by purchasing land, cultivated and uncultivated. We then proceeded to buy up factories of all kinds, machinery, buildings and immovable property of various sorts. The money for these purchases was borrowed by the State. The bonds were made unredeemable and no foreigner was allowed to hold them. For these purchases the sum of 15,000 million *yen* was required.* Let nobody be astonished at the largeness of this amount. England has an actual public debt of 690 million pounds. Since this 15,000 *yen* is all used for productive purposes the 900 million *yen* interest paid on it is a mere bagatelle. After this interest has been paid and all the cost of production deducted, the balance of the State's profits are distributed among the labouring classes. Thus it has happened that the more a man works the more he is benefited by his labour. The profits instead of going to capitalists, who are not the real source of value, go to the men who have given to all saleable goods their market value.

We can do no more than dot down the headings of the next four chapters. Chap. V. is on the Industry and Commerce of the new Society; Cap. VI. on Agriculture and on "A Designs and Inventions Bureau;" Chap. VII. on the life led by the masses of the people who form the "New Society;" and Chap. VIII. on Education in the new State. The picture given is a bright one. Many of the existing evils appear only in an extremely modified form. With the decrease of poverty, crime decreases. Chap. IX. calls for fuller reproduction here on account of the statistics which it gives on a variety of interesting matters. Mr. Yano's obliging old economist is asked how the 15,000 million *yen* has been expended in the country of which he speaks and what he says in reply must be read as proposals advanced by Mr. Yano for adoption in this country. (1) In the first place we spent 5,000 million *yen* on cultivated land. We calculated this land as worth on an average 100 *yen* per *tan* (about $\frac{1}{4}$ of an acre). There are rice-fields that are worth from 2 to 300 *yen* per *tan*, but there is cultivated land that sells as low as 50 *yen* per *tan*. According to calculations made 4 years ago there were in this country in rice-fields 2,734,000 *chō* (a *chō* = 3,000 *tsubo* or 2.4507 acres); in arable uplands 2,257,000 *chō*, and in salt fields (*yenden*) 7,000 *chō*, making a total of 5 million *chō*. (2) We spent 1,600 million *yen* on uncultivated moors, mountains, hills, forests, lakes, &c., which we bought at 200 *yen* per *chō*. The forests and mountainous land measured 7,209,000 *chō*; the moors 1,077,000 *chō*; the rest 20,000 *chō*, making a total of 8,306,000 *chō*. (3) On building land we spent 600 million *yen*. The country has 380,000 *chō* of this land, which we reckoned at 5 *yen* a *tsubo*. (4) On the purchase, repair and re-erection of buildings, which included the dwelling-houses of 40 million people (approximately Japan's population) we spent 4,000 million *yen*. We did not buy up all the houses at once, but only about $\frac{1}{5}$ of them, leaving unpurchased the villas of the rich. Those we bought in cost us an average of 500 *yen* per building. But we only spent 2,000 million *yen* on actual purchases; the remaining 2,000 million was laid out in improvements and in rebuilding old houses. (5) On factories, works, railways, mines, ships and all property representing fixed

capital we spent 2,000 million *yen*. This may seem a small sum when compared with that paid for land, but according to investigations made 4 years ago the floating and fixed capital of existing companies amounted approximately to 930 million *yen*. Though the property of individuals is probably worth less than the above sum, I have reckoned it as worth about the same. (6) It cost us 80 million *yen* to buy up the goods, stores and saleable articles in the possession of firms, companies, and private individuals. (7) The sum of 1,000 million *yen* we kept as a reserve fund; 500 million *yen* was invested in property and 500 million *yen* kept in specie. Chap. X. treats of the money in circulation in the New Society and of imports and exports. In Chap. XI. Mr. Yano endeavours to show that the peace of the world will be guaranteed by the new state of things. The heading of the chapter is *Shinshakai no mirai, sekai heitwa no hoshō*. "The future of the New Society as a guarantee of the world's peace." He goes on thus:—Socialistic ideas are gaining ground in all the most civilised countries. There are two things in which all socialists are agreed, (1) That it is not right that the whole of society should become the tool of a few capitalists; that the profits of labour ought to be equally distributed; (2) it is only by resorting to state socialism that the evils resulting from free competition can be remedied. It is quite plain that the movement in favour of giving to the working man his rights may grow so strong in various countries that war will be universally condemned as wanton dissipation of the wealth produced by labour, which wealth will, under the new regime, be in the hands of the masses of the people, who will never consent to forgo their rights, comfort and state of affluence in order to gratify the ambition of a small minority of the community. The only hope of universal peace lies in the creation of a universal feeling that the benefits of peace are far too numerous and too solid to be sacrificed for any object that can be named or even conceived of. If this socialistic movement were only growing in one country the case might be different, but it is growing everywhere. The feeling that the world ought to be administered for the benefit of the majority increases in strength every day. Though competition and the survival of the fittest are undoubtedly laws that are in operation in the material universe and among all forms of vegetable and animal life, it is felt that for human beings to live under such laws is as unnecessary and undesirable as it is cruel. If it is contended that it is natural that all should compete and the weakest go to the wall, then we say that in this as in many other things man can improve on nature and devise means for rendering his life infinitely happier than it is as things are now situated.

Chap. XII., the heading of which is, "Things to be borne in mind in entering on the State of the New Society," opens with advice to the two young Japanese who have been listening to the counsels of the aged economist. It is pointed out to them that Japan is better situated than Europe and America for dealing with the problem of how to bestow on the largest number of people the highest kind of happiness they are capable of enjoying. The longer competition is allowed to go on the more difficult is the task of superseding it by State socialism. In former days socialism was regarded as a Utopia, but it is now recognised to be a science. Even John Stuart Mill, though he began his life by advocating free competition, in his last years inclined more and more to socialism, as may be seen by his later works. The state of things which I advocate cannot be entered on at a leap, but you Japanese should direct your steps hitherward at once. As a preparation for more radical and more thoroughly effective measures, the following reforms are to be recommended: the passing of a number of laws respecting the rights and privileges of workmen, insuring for them support in case of injury and the like. More specially (1) laws should be passed in favour of providing with food and medical attendance all sick persons whatsoever; (2) all land used for agriculture rented to others by landlords should be purchas-

ed by the State; that farmers should be supplied with manure, and implements; fishermen with nets, boats, &c., and other labourers with such appliances as are necessary for the carrying on of their callings; (4) that the State should superintend the labour market, establish labour stations and be ready with a supply of men wherever there is a demand; that an educational system at once easy and effective should be devised by means of which the kind of intelligence needed by the mass of the people could be developed.* There are precautions which it is important to take in seeking to usher in the new era. (1) The rights of individual property-holders must be respected as far as possible. (2) Hatred of individual capitalists should be discouraged. The existence of the world's millionaires is largely due to luck and chance. Such persons have done nothing that should excite hostility, their feats have been rendered possible by the state of the world. (3) The capitalists must not try to carry things with too high a hand. They must recognise that the men who produce the world's wealth have a right to a larger share in it than they have hitherto had.

The book closes as follows:—While I was listening to the two Japanese as they thanked the old man who had taught them so much, I seemed to be conscious of slipping on the stone steps outside the front door. With a sudden exclamation I awoke, only to hear the honest old time-keeper's "tick! tick!" to see the opening dawn and to be reminded by the notes of the cuckoo that I had come back to the world of reality. Ah!

*Inochi ni mo
Masarite oshaku
Aru mono wa,
Mihatenu yume no
Samuru narikeri.*

"What is to be regretted more than the loss of life even, is to awake before a dream is finished."

It cannot be said that as a literary production there is any special charm about the *Shinshakai*. The language is such as one meets with in magazines and newspapers every day. But the author writes with all the force of one who is thoroughly convinced that he has a message to deliver to his fellow-men. The great objection which many Japanese readers will feel to Mr. Yano's views will arise from the fact that by means of free competition Japan has been delivered from feudalism, clannism and many other states of thralldom. When it is proposed to give to the State infinitely more power than it has ever wielded without any adequate guarantee against its abusing that power, it will seem to the majority of politicians to be like going the wrong way. But, on the other hand, there is one consideration which is bound to make the *Shinshakai* a popular book, that is, the fact that the majority of Japanese have a fundamental aversion to all the rush and bustle which is involved in free competition and an inherent dread of creating an impassable gulf between the rich and the poor. The socialistic fundamental principle as elaborated by the greatest of all scientific socialists, Karl Marx, cannot be gainsaid. It is that labour being the source of value, the lion's share of the profits accruing from it should not be exclusively appropriated by the capitalist who exploits that labour. Marx accepted the views of Locke, Petty and other old writers on economics as to the rewards which labour ought to receive. Mr. Yano does not give the final goal of socialism as explained by Marx's successor, Engels, which is no other than the superseding of all separate states and the control of international society by a free commune. The state, say the Marx school of socialists, being merely an exploiting institution, an organization of the ruling classes for retaining the workers in economic subjection, will in a later stage of society's evolution, when the workers in the name of the whole society seize political power and take over the control of production, no longer have any function to perform and so will die away. "The rule of

* Three or four years ago several statisticians, after considerable investigation, fixed on these figures as representing Japan's total wealth. Mr. Yano consequently bases his calculations on the supposition that this estimate is approximately correct.

* This subject Mr. Yano informs us is treated fully in a book published by him in March last entitled *Yano Ryōkei Jiji* (時事) *iken*. "Yano Ryōkei's Views on Current Events," for sale at the Tokyōdō, Omote-jimbō-chō, Kanda.

classes, their conflicts and the excesses of the struggle for existence among them will cease. Instead of a government over persons we shall have an administration of things and the control of productive processes."

THE CHRISTIAN DAIMYO.

(CONTINUED FROM LAST ISSUE.)

Whilst the Japanese thus fought against despair in Korea, the Jesuits in Japan sustained new trials. At first the presence of the Taiko in Nagoya, whither that personage had returned, once his period of mourning was at an end, continually alarmed them. At any instant they might be seen by the numerous *samurai*, who traversed the neighbouring provinces, and the least information would have provoked anew the anger of the Taiko. And this is what really happened, before much time had elapsed. But the informants were not malevolent pagans, they were Christians, Spaniards.

In the preceding year (1591), the Taiko had sent a letter to the Governor of the Philippines, summoning him to recognize his suzerainty and send him tribute. Very much surprised at so arrogant a demand, the Governor sent Lope de Llanos accompanied by a Dominican friar, John Cobo, to demand an explanation.

On landing at Kagoshima, the two delegates met John de Solis, a Spanish merchant who, rightly or wrongly, accused the Portuguese of Nagasaki of having committed all kinds of injustice, in order to prevent him from trading with Japan. The rivalry, not to say the hatred, which existed at this time between Portuguese and Spaniards, led the two Spanish delegates to take up blindly the cause of Solis, and as the latter had included the Jesuits in his resentment, the two delegates resolved to denounce them to the Taiko, at the same time as they revealed to him the injustice of the Portuguese.

Accompanied by Solis, they took the road to Nagoya. Introduced to the Taiko, they communicated to him the cause of their visit. A man named Harada, an adventurer by profession, acted as interpreter. This same Harada it was who, having been banished formerly from the Philippines, had induced the Taiko to summon the Governor of these islands to pay tribute to Japan. One can understand in what manner Harada must have translated the words exchanged between the Taiko and the Spanish delegates: he knew too well that the Taiko would have his head cut off for having dragged him into an affair which was to end in a check. Thus, while the Spaniards expressed their astonishment on the subject of a letter so unreasonable, Harada translated to the Taiko, that the Governor of the Philippines would conform in all things to the least of his desires. Charmed at seeing himself feared, the Taiko had a letter, still more insolent than the first, written to the Governor. It is not known precisely what Harada answered to the Spaniards, however, the latter congratulated themselves on having acquitted themselves so well of their mission. Each party was convinced that it had acted with much energy. Before leaving, the Spaniards poured out their rancour against the Portuguese, accusing them of preventing the Spanish merchants from entering into relations with the Japanese, and of purposely leaving their Religious in the country, in spite of the prohibition of the Taiko.

No more was needed; the Taiko at once degraded the two Governors of Nagasaki, accused of acting in concert with the foreigners, and named in their place Terazawa Hirotaka. He ordered the latter to inaugurate his Governorship by having the residences and churches of the Jesuits pulled down, and by making an enquiry into the doings of the Portuguese merchants.

Henceforth the door was open to the calumnies, of which the European merchants of the different nations were in the sequel to make such great use, and to thus precipitate the ruin of the Christian religion in Japan.

After having given these orders, the Taiko returned to Kyoto. When he had left, Gamo Ujisato went to Nagasaki to console the Jesuits under the troubles, which the Taiko had just

inflicted on them. Then, desiring to encourage the Christians, he declared aloud that he also was one of them, and that neither the Taiko, nor anyone else in the world would be able to make him abandon his convictions. Finally, in bidding adieu to Father Valignani, then on the point of leaving Japan, he expressed to him how scandalized he had been by the calumnies of the Spaniards, and what a bad impression they had made on the Taiko and his followers. Returning to Nagoya, Gamo manifested his strong discontent on the subject of the recent measures of the Taiko; he even added that it was mocking at the Japanese to propose to them the worship of a crowd of divinities that had never existed.

Tsutsui Sadatsugu, *daimyo* of Ueno (Iga), had also gone to see Father Valignani to request baptism at his hands. Having been instructed in the truths of religion by Mancio Shirai, to whom he had given a hospitable reception, at the time of his fall and who was, even at that moment, in the number of his restrainers, Tsutsui mentioned the few doubts that had still remained with him, and was baptized in secret (16). Several days after, in the month of October 1592, Father Valignani returned to the Indies.

In Korea, however, the situation was becoming less and less reassuring. The misfortune, foreseen by Konishi, was at length about to arrive: fifty thousand Chinese were marching on Pyongyang. It was then in the heart of winter, a particularly rigorous winter this year. The Japanese, little accustomed to this excessive cold, visibly wasted away. What was to still more increase their distress, was the arrogant conduct of the Koreans, from the time the news of the Chinese approach had been communicated to them. Thousands of natives prowled around the camp of Konishi, and cut off the *samurai*, whom hunger had driven to seek for vegetables in the neighbouring fields.

A considerable sum was promised to whoever would bring in Konishi's head. Hence it was that, when Konishi asked a Korean what was the most precious thing in his country, the latter answered that it was the head of Konishi. In proportion as the danger approached, Konishi addressed urgent requests to Ukita and several other generals to come to his succor, but the Taiko having not spoken, no one moved. Kuroda Nagamasa was the only one to repair to Pyeongyang; Otomo was left to guard the fortress during his absence.

On awaking one morning, Konishi found himself surrounded by the Chinese army, which commenced the attack at early dawn. The shock was too violent for the feeble forces of Konishi who, after having lost two thousand of his men and a thousand Korean prisoners, had to evacuate the fortress and retire into the town. The Chinese, abstaining from following the Japanese into the different recesses, set the houses on fire with burning arrows. Soon the whole town was in flames, and it was with difficulty that Konishi and Kuroda succeeded in cutting a way through the ranks of the enemy. They then retired on Seoul. But what was their despair, when dying with cold and hunger, after a forced march of a whole day, they found the fort confided to Otomo deserted! The latter, warned of the approach of the Chinese, had decamped with his arms and baggage not leaving even the slightest stores. Konishi's men, completely demoralized, threw down their arms and dispersed themselves among the villages situated on their line of march, in order to seek there for something to satisfy their hunger. Finally, after they had marched thus, for three days and three nights, they reached the next post and were able to repose after their fatigues. When, several days later, they entered Seoul, they were no more than skeletons.

Meanwhile, Kato and the other generals lost no time in falling back on the capital, where Ukita summoned them to a council. They took into consideration the fact that it was no longer with a band of timid Koreans that they had to do, but with savage Manchus, and that consequently the war was going to change its aspect. Not knowing what to do, however, while awaiting the

(16) Hay, 197.

orders of the Taiko, they resolved to gain time by entering into negotiations with the Chinese. The latter accepted the proposition but, before speaking of peace, they laid down such a humiliating condition, that its acceptance by the Japanese was already a confession of defeat. Here are the orders of the Chinese: the Japanese should leave Seoul and retire to Fusan and some other places situated on the south littoral. This condition fulfilled, the Chinese would consent to send delegates who, under Konishi's guidance, would go to see the Taiko in order to conclude peace and to bestow on the Taiko the title of King of Japan (17). Hard as this condition was, the Japanese were obliged to submit to it. In retiring, say the Korean annals, they avenged themselves for their defeat by burning the temple dedicated to the ancestors of the royal family and by violating the tombs of the Kings.

In the Spring of 1593, all the Japanese troops were dispersed on the southern coast, where they entrenched themselves, each army apart, in hastily erected fortresses. Seoul had been occupied by the Chinese, immediately after the departure of the Japanese, and the King of Korea had returned thither with his Court.

AMERICAN TOPICS.

Mr. Henry L. Wilson of Washington State, now Minister to Chile, has been appointed U.S. Minister to Greece in place of Mr. Charles S. Francis of Troy, N.Y., who has resigned. Mr. John B. Jackson, now First Secretary of Embassy at Berlin, has been promoted to be Minister to Chile.

In his annual report to the Secretary of the U. S. Navy Rear Admiral P. M. Rixey, Surgeon-General, points out that a force of 150 additional medical officers will be necessary, but he asks for only half that number. He recommends also the establishment of a corps of women nurses in the navy.

Mr. William K. Vanderbilt, Jr., has purchased a plot 82.6x100.5 on the north side of 51st street, 115 feet west of Madison avenue, New York, where he will immediately begin the erection of a residence. For the last year Mr. Vanderbilt has been living at No. 25 East 57th street, having leased the premises. The new property is said to have cost about \$400,000.

Simplicity marked the marriage of Mrs. Elizabeth Scriven Clark, widow of Alfred Corning Clark, to the Right Rev. Henry Codrington Potter, D.D., Bishop of New York. The ceremony took place at noon on Oct. 4th in Christ Protestant Episcopal Church, Coopers town, N.Y. Less than 200 persons were present. After the wedding breakfast the couple left in a private car, their destination being kept secret.

Commander Robert E. Peary, the Arctic explorer, has been admitted to a private hospital in Philadelphia to undergo an operation. The operation has been made necessary by the repeated freezing of Commander Peary's feet during his dashes for the North Pole. Several toes have already been amputated, and it is possible that the surgeons may find it imperative to remove one or two more.

What is said to be the largest increase in postal receipts in the history of the U.S. Postal Service is recorded in the reports of the gross receipts of fifty of the largest post offices for the month of September. The comparison is made with the corresponding month of last year. The offices whose returns are embraced in the report furnish

(17) The Chinese, far from guessing the madness of the Taiko, were convinced that he only sought the honour of becoming the Emperor of China's vassal. In that they were guided by the steps that had been taken formerly by the Shogun Ashikaga Yoshimitsu (1368-1394). This ruler, desiring to enter into relations with China, had sent presents to the Chinese Emperor with a letter in which he entitled himself the latter's vassal. The Court of Peking, flattered by this submission, had authorized Yoshimitsu to take the title of King of Japan (Shogyoshi p. 231.)

approximately half of the entire postal revenue of the country. The returns indicate a net increase of 20 per cent. as compared with September, 1901. Some of the towns reporting showed an increase of 50 per cent, or a little under, while such large cities as New York and Chicago reported a gain of 22 per cent.

The Metropolitan Street Railway association, of New York city, according to the report of Mr. H. H. Vreeland, president of the roads, now has \$12,000 in cash on hand and \$15,000 invested in the bonds of the corporation which employs its members. The insurance system guarantees a policy for \$300. There is a pension system for old members and a membership of about 5,000. It is the only organization of its kind in the United States and has no affiliation with other labour aggregations. It pays no salaries to its officers. In its short life it has restored to its members in sick benefits and insurance \$85,000 cash collected in dues.

Great communities, say *Bradstreets*, are often perhaps generally, lacking in the spirit of self consciousness, and it is not inappropriate that the laying of the corner stone of the new Custom House in the city of New York should evoke from such an important national official as the Secretary of the Treasury a recognition of the importance of the port of New York in the commerce of the country. In his address Mr. Shaw declared that to the port of New York 80,000,000 people bring \$230,000,000 of the surplus product of their farms, \$6,000,000 of the surplus from their forestries, \$30,000,000 of the surplus from their mines and more than \$200,000,000 of the surplus of their manufactures. From that port the same people carry inland \$560,000,000 worth of imports, and to the collector of that port is paid \$165,000,000, or 65 per cent., of the customs duties of a nation. To the wharves surrounding that city 4,000 vessels engaged in foreign commerce annually are tied, from their decks descend more than a half million people, and out from their spacious holds are unloaded 9,000,000 tons of freights.

Census statistics show a steady increase in the longevity of the people of the United States. The median age of the population in 1900 was 22.4 years. The median age in 1890 was 21.9. The median age is established at such a point that the years of half of the population are under it and half over it. It is found that the median age of the white population exceeds that of the black, Indian, and Mongolian races, that of the whites in 1900 being 23.4 and of other races 19.7. Median white age in 1880, was 23.4 and of others 18.3. A retrospect extending back to 1810 shows an uplift in the median age of 7.4 years. The cause of this gradual rise in age is a matter of speculation, but is doubtless due to various causes. Among these may be included the clearing of the forests, drainage of malarial lands, improved processes of food preparation, the harnessing of machinery to the performance of hard labour, and generally a more intelligent observance of the laws of health. It is a source of congratulation that these helps to longevity have in 90 years lengthened the span of human life in America 7.4 years.

According to the New York *Sun* the forty-five states of the Union have, collectively, a bonded debt of \$200,000,000, and although other debts, municipal and county, have increasing largely of late years, state debts have, in most cases, fallen off. The state which has the largest debt—contracted through obligations entailed by the Civil War—is Virginia, which owes \$24,363,000 in bonded debt. Twelve years ago its debt was \$31,000,000, and it has reduced the amount by \$7,000,000. Massachusetts had \$28,000,000 in 1890, now \$12,400,000 a reduction of \$15,600,000. The debt of Tennessee is now \$16,200,000. Twelve years ago it was \$16,600,000, \$400,000 more. During this period the population of the state has increased 250,000. Louisiana has a state debt of \$10,800,000. Twelve years ago it was \$11,800,000, a reduction of \$1,000,000. New York's present debt, insignificant when compared with its manifold assets, is \$10,000,000, an increase of \$3,500,000 compared with what it was

twelve years ago. This increase is due almost exclusively to the canal debt, now \$8,500,000, authorized in 1865, and of what remains of the increase \$675,000 is for the acquisition of Adirondack park lands. The debt of Alabama is \$6,500,000; of Pennsylvania, \$7,000,000, a decrease of \$4,000,000 in twelve years; of South Carolina, \$6,800,000; of Georgia, \$7,600,000, a reduction since 1890 of \$2,400,000, and of Mississippi, \$2,800,000. Texas has reduced its state debt in the same period from \$4,200,000 to \$715,000; Arkansas, from \$2,000,000 to \$1,200,000; North Carolina, from \$7,700,000 to \$6,200,000 and Maryland, from \$10,000,000, to \$2,600,000, partly by disposing of its railroad investments. The debt of Kentucky has been increased 50 per cent. in twelve years. It is now \$1,100,000. Nebraska has no state debt; neither has West Virginia nor New Jersey, which owned \$1,250,000 twelve years ago. Illinois, Iowa and Oregon have no state debts which, having matured, are payable, but they have small outstanding obligations which have either not been presented for payment or have not matured. These obligations amount to \$18,000 in the case of Illinois, \$10,000 in that of Iowa and \$1,000 in that of Oregon. Wisconsin owes \$2,200,000; Michigan, \$400,000, an inconsiderable sum for so large a state; Indiana, \$3,800,000, against \$9,500,000 in 1890; Vermont, \$335,000; California, \$9,300,000; Connecticut, \$1,700,000; Kansas, \$580,000; Missouri, \$5,600,000, against \$8,600,000 twelve years ago; Montana, \$900,000; Ohio, \$450,000; Rhode Island, \$3,250,000, and Maine, \$2,500,000.

NEWS OF THE WEEK.

It is reported in semi-official circles at The Hague that Queen Wilhelmina expects an heir in March or April next.

The Imperial yacht *Hatsukaze*, built by the Mitsu Bishi Shipbuilding Yard, Nagasaki, is now anchored in Shinagawa Bay, where she arrived a few days ago.

Mr. Brailsford Youngfield, reputedly the oldest European resident in India, has died at Bangalore, at the age of 93. He came out as a recruit with the 13th Light Dragoons, arriving in Madras on 5th July, 1830.

The advantages of Japanese artesian wells instead of a waterworks system are being warmly advocated by certain officials in Peking. It is estimated that 20 wells costing about \$800 each will suffice for all Peking's needs.—*P. & T. Times*.

Mr. M. P. Evans, better known as "Pat Evans," formerly senior partner in the firm of Reid, Evans & Co., who left Shanghai in 1878, died suddenly in the lift of the Twopenny Tube at Mansion House Station, London, on the 1st ult.

The *Express* prints an account of rules of the Atlantic Club, one of the London ventures for Anglo-American social reunion, which, the paper says, will be opened in January. One rule is that members are not allowed to lose more than £1,000 a week at cards. Both winners and losers must place their card accounts in the cashier's box before leaving the room.

Mr. Hsing Ling, who will be remembered by many in Tokyo, being the son of Mr. Yu, the discreet Manchu diplomat who represented China in this country after the Japan-China war, has been married in Paris to Miss Genevieve Deneaux. Mr. Hsing's mother, it will be remembered, was an American lady.

A welcome meeting in honour of Mr. Ichihara Seiko, Chief of the Yokohama branch of the First Bank, will take place in the Chitose-ro restaurant, Sumiyoshicho, Yokohama, on Nov. 14th at 6 p.m. under the auspices of principal citizens who are keeping accounts with the bank. Mr. Ichihara recently returned from Europe, whither he had gone with Baron Shibusawa.

Kawashima Kunitaro, a member of the crew of the N.Y.K. steamer *Wakasa Maru*, was

arrested by the Yokohama Water Police a few days ago on a charge of theft and sent to the Yokohama Chiho Saibansho for trial. It appears that during the last voyage of the *Wakasa Maru* to London, he stole a gold ring from a trunk belonging to a Mrs. Graham, a British lady passenger on board.

A pretty wedding took place on Nov. 12th at the Union Church, Yokohama, the contracting parties being Miss Settle of Philadelphia, U.S.A., and Dr. Robinson of Shanghai. The church was effectively decorated for the occasion. Rev. E. S. Booth, in the presence of U. S. Consul-General E. C. Bellows, performed the ceremony, the bride being given away by Mr. J. S. Happer. The bridegroom was attended by Mr. Anderson, of the Hongkong & Shanghai Banking Corporation, as best man. Appropriate music on the organ was played by Mr. J. Griffin.

An Australian correspondent, writing to the *Times* on labour questions in Australia, points out that the stopping of the importation of Japanese divers for pearl shell was expected to open up all the trade to white men; instead of this it will probably have the effect of driving the whole pearling industry into the hands of the Dutch. It was foreshadowed in a previous letter that the pearlers might as a last resource betake themselves to Dutch New Guinea, and this possibility is now almost a certainty. It would be a weird result if legislation intended to benefit Australia ended in starting a Dutch industry. While diving apparatus is in its present crude state there is no hope of the white man's competing with the Japanese; and, if the pearlers can get Japanese divers by going to Dutch New Guinea, they will certainly go there rather than stop in Australia and employ white divers.

CORRESPONDENCE.

THE STEAM-WHISTLE NUISANCE.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—A late paragraph announces that Capt. Fujii, the Harbour Master of Kobe "has been obliged to take action in regard to the steam-whistle nuisance" as "the whistle on some craft is used with unnecessary frequency and the blast is unduly prolonged."

This step is in conformity with the general practice in seaboard cities, and nowhere is such action more urgently needed than in Tokyo at the mouth of the Sumida, where the turmoil from three to six a.m. from the whistles of passing craft is something incredible. The fact that the river here runs by a residential quarter and one of the largest hotels in the city makes the matter worse.

There was a time twenty years or so ago, before Japan became a great naval power, when a captain of a small Japanese steamer regarded the whistle as a boy regards a tin horn—as an amusing toy intended to make as much noise as possible. That time has long gone by. And how it happens that nowadays here in Tokio, one of the quietest and most orderly cities in the world, this particular nuisance has been allowed to survive is a mystery. All needful signals and warnings to steamers and fishermen could be given just as clearly as now with less than one-tenth of the noise.

Yours, etc.,

NAVALIS.

RELIGION AND PHILOSOPHY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I see in the *Japan Mail* an interesting report of an article by Dr. Kato Hiroyuki on the various religions of East and West. He is stated to be well-known to dislike religion, and he thinks that religion is for uneducated persons. He is not alone in these thoughts, but there is another side to the question, not yet, perhaps, sufficiently recognized. I am of the opinion that the religions in their popular form were started by extremely well-educated persons in the form of a picturesque allegory embodying, in carefully chosen words, the ripest philosophy of that age. To do this, they used a story, usually a kind of fairy tale, introducing extraordinary and beautiful characters, usually very brilliant or shining; and these went to a number of places teaching. Now the names of these places and the names of their pupils always are names of certain states of mind or abstract qualities, and it was evidently in order to make the teaching applicable to the multitude that these high matters were put into this form. Thus Confucius represents Space or Ether,

Buddha represents Intelligence or Wisdom, Christos (called in English Christ) represents Honesty or Uprightness (Justice) in the form of a man. Justice, of course, cannot really be a man only, but is a god (or spirit); but he can be represented as a man—meaning all humanity—and this is, to my mind, the great meaning of the narrative. We can thus find in the study of the various events, some great national characteristic. I will give one example. It is said that the first miracle of Christ was the turning of water into wine. But the miracle took place at a place called "Cana of Galilee." If we translate these words literally from the Hebrew into Greek or into English, we shall find that they mean "Reeds or Pens of the District." Now Pens of the District will mean the writers of the district; and seeing this we can easily understand the meaning of the saying—"turning water into wine." What was "wishy-washy stuff" (as we say in English), becomes good stimulating stuff, useful for a strenuous and noble life! This explanation of the old religious books possibly will give, for educated men, the best and truest interpretation. The events they narrate are abstract, i.e. mental and spiritual states—related under the form of a story. The object of them is to give more power to the individual by connecting him personally with the spirit of the past, and by directing him to a life of happiness and a life of love. Trusting these remarks may be of interest to some of your readers, I am,

Yours respectfully,

H. S.

Tokyo, November 10th, 1902.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—On reading the communication in this morning's *Mail* on Religion and Philosophy I am reminded of a saying of one of our modern humorists: "It is better not to know so much than to know so many things that are not so."

I am not a Chinese scholar nor am I expert in Buddhist lore, but if the writer's remarks on those topics are no more valuable than his exposition of the meaning of the name "Christ" his article would be a disgrace even to a schoolboy's waste basket.

Yours in the search for wisdom,

READER.

TOKYO FOLKS AND YOKOHAMA PLAYERS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—After the delightful time spent at the Public Hall last evening it seems rather ungracious to grumble, but I am one of the large number of Tokyo residents who were obliged to leave at the close of the 2nd Act to catch the last train home. We had to leave at a most interesting part of the play and great was the regret expressed at the inevitable snapping of the connection; for we sadly wanted to know whether Blizzard managed to secure the frisky old thing of a Lucrezia, with her snug little nest-egg in the Three Per Cents., whether Mortimer repented of his churlish behaviour to that sweetest of all sweet girls, his wife; whether the baby or the pug-dog survived to the end of the play—their chances of life were meagre when we left; and a host of other things we would have given our ears to know. But, alas, it was not possible.

Now, Sir, it seems to me that if the play had really started—the first word had been spoken on the stage—exactly on the stroke of nine; the intervals cut down to a couple of minutes each (for there was no scene-shifting required, no large company of players to make lightning-changes in costume and remuster at the wings), if things in fact had been expedited a bit we could have seen the whole play out. It has often struck me as very singular that public performances in Yokohama are always fixed for nine o'clock and yet never begin till a good twenty-five minutes later. Would it not be possible for such a popular institution as the A.D.C. to break with "old custom" and announce their performances for 8.30 *p.m. sharp*, and really begin them at that hour? Tokyo folks could then see the plays from start to finish and catch the last train home comfortably.

With apologies for trespassing so greatly on your space, I sign myself,

ONE OF THE TOKYO CONTINGENT.

Tokyo, Nov. 13.

IMPERIAL INVITATIONS.

TO THE EDITOR OF THE "JAPAN MAIL."

Please allow me a few lines in your paper. I respectfully beg to ask your kind information for:—Who is entitled to be invited to the "Imperial Garden parties."

Professors, as far as I know, do get an invitation only after a 3 years' stay in this country, but business-men, who are here for years, spending their money in this country, contributing their taxes, are never invited.

How comes it, then, that a gentleman from Tsukiji,

who by profession is a dyer, has received last year and to-day an invitation to the Imperial Chrysanthemum Garden Party.

Your kind answer through the medium of your esteemed paper, will very much oblige.

Yours very truly,

DR. MENGE.

Tokyo, Nov. 12, 1902.

[It so happens that this matter is partially discussed in our leading columns to-day. We may add here, however, that Dr. Menge's information about professors is not correct, so far as we know.—Ed. J. M.]

TEMPERANCE WORK IN JAPAN.

(COMMUNICATED.)

Miss Kara G. Smart, sent to Japan by the World's Women's Christian Temperance Union, arrived in Yokohama on the 16th of October. New York is her native state, her father being a Methodist minister, and from both father and mother the daughter imbibed a love for the cause to which she has devoted her life. Since her tenth year she has resided in the broad West, receiving a thorough seminary and business college education. While a city school teacher she was deeply impressed with the need of temperance and purity instruction for children.

In Sioux Falls, South Dakota, her recent home, she served for several years as district superintendent of the departments of Scientific Temperance and Loyal Temperance Legion, beginning her career by working with the teachers and by organizing the children into temperance bands.

In Sept., 1895, she succeeded her mother as Recording Secretary of the State Union, and two years later was made State Y. Secretary for the young women and succeeded in almost quadrupling the Y. membership. Four years later she was unanimously elected to the office of State Corresponding Secretary, holding this office until she left for Japan.

During all the time she has been engaged constantly in secular employment, but has found time to organize White Cross and White Shield branches and to assist the Anti-Saloon League. She served as local president of the Epworth League for five years and as a Sunday School teacher for fifteen years. To those who wonderingly inquire how she does so much, she laughingly replies, "By systematically using odd moments and by keeping everlastingly at it."

Mrs. Ramsey, President of South Dakota W. C. T. U., writes: "Miss Smart has been an ideal officer. She has the ability to bring things to pass. Good judgment, common sense, executive ability, along with rare gifts of mind and soul are her prominent characteristics. We of South Dakota find it hard to give her up to a foreign field, but there is no doubt it is God's call. Our love and prayers go with her, and may the service given to far away Japan bear a rich fruitage for the white-ribbon army helping humanity heavenward."

A reception was given Miss Smart at Tsuno Hazu Sanitarium on Saturday afternoon, November 1st. Owing to the very inclement weather, the attendance was not large, but an enthusiastic welcome was given by Mrs. Yajima, Miss Spencer, Mr. Ando, Mrs. Ushioda, and Dr. Soper. Miss Smart's response, interpreted by Rev. Ukai, showed a broad grasp of the situation and a true appreciation of the work to be done in Japan. Miss Smart has already received a number of invitations for addresses and the outlook for a busy sojourn among us is most promising.

RESPONSE GIVEN TO ADDRESSES OF WELCOME.

After a few words in grateful acknowledgement of the hearty welcome which had been accorded her, the following address in substance was given:—

I consider it a great privilege and honour to bring to you to-day greetings from the Temperance Host of my native land, America, and more especially to bring you greetings from that great sisterhood of Christian Temperance women who believe that "the mission of the White-Ribbon Army is to organize the motherhood of the world for the peace and purity, for the protection and exaltation of its home."

The leaders of our National society said to me as I was leaving them to come to you—"Tell them that we love them." Mrs. Parrish-Wright said, "Give them my love, and tell them that the great desire of my heart is to return to them."

It is an added pleasure to bring you greetings on behalf of the consecrated womanhood of fifty different nations and to remind you that "All round the world the ribbon white is twined." In the name of God, and home, and every land, I salute you.

Because my commission is primarily to the women of your empire, I am glad to be with you to-day as a representative from an organization of women—a society whose founder was a woman, Frances E. Willard, who gave a new ideal to American womanhood, and of whom it has been said that—"No woman of the century has left a greater impression for good upon the whole world, and whose name is as ointment poured forth in every corner of the hospitable globe

to-day." And all this—because she gave herself unreservedly to God and let Him use her at His will.

Through her beautiful life we learned that "Woman's highest mission on earth is to make the whole world homelike." Through her consecrated leadership, the temperance women of America, who believe in One who shall be crowned King of Nations, have been inspired to do and to die for him.

I am more pleased than I can tell you, to meet to-day, for the first time, so many representatives, tried and true, of your National Temperance League, of whose good work I heard so much before I came. Because of the valuable assistance and hearty support you have given us, your sisters, in the past, we know that you will in the future stand with us for the protection and purity of the home, and the overthrow of that home's greatest enemy, the Liquor traffic. We shall then have the best working force in the world—"Two heads in counsel."

From observations made and information gained since reaching your shores, I have become impressed with the thought that there is urgent need that the "two heads in counsel"—the National Temperance League and the Woman's Christian Temperance Union of Japan,—should hold frequent and earnest conferences, for the encroachments of the enemy are many and varied.

I presume you have already noticed, as have I, that for the past few days, there has been an extra sheet in the *Japan Times*, and that this sheet is devoted solely to—"The Best Night Cap"—a fine old whiskey. I have noted too, several other advertisements, for beer, for champagne, for wine, etc., in its columns.

I awoke suddenly to face the fact that you have the same old monster to fight over here that we have at home. It came as something as a shock to me. I do not know why, unless it was that I had been anticipating a little easier time here than there although I had heard that you were already favoured with the fluid extract of sixteen breweries for foreign beer planted on your soil, and I had also heard that your Government had appropriated \$150,000 to establish a model sake brewery, which should be something like a normal school for the training of brewers; a fine institution to ruin the bodies and souls of your boys and girls.

While going about your streets, it has seemed to me that that every man I have met has been smoking a vile cigarette. When I remembered that this is considered by noted specialists as one of the most dangerous and most harmful of habits, because it destroys not only the physical and intellectual life of man, but the moral as well, I felt I knew what Japan's future would be, unless she turned about at once.

I am glad that bold champion of right, Hon. Sho Nemoto has succeeded in securing an Anti-Cigarette Law, but the battle is only begun when any such law is secured. It will be a long hard road to victory.

I learn that you have a Free Cessation Ordinance, and that under its provisions over 12,000 girls and women were freed, last year, from one of the most awful of lives. Over and over again has come to me the questions—Where are these erring sisters now? Are they being helped to a better life? These have been followed by another—Where are their companions in vice? because, for every erring sister, or fallen woman, there is an erring brother, or fallen man.

As a nation, you are already learning that "No nation that spends its Sabbath in work and play has ever developed a safe and stable popular government." I was glad of the opportunity to attend the other day a meeting whose purpose was the formation of a society for the securing of a proper observance of the Christian Sabbath.

These are a few of the sunken reefs I have noted in the waters ahead of your Ship of State. The roar of the breakers can already be heard by the attentive ear. What your fate shall be, will be largely determined by the action of those who are now manning the ship, and by the beneficent influences that the strong moral characters of your reformers bring to bear upon them.

To-day Japan stands as one of the great countries in history that has not been conquered or defeated. The position she occupies is not the result of happy fortune, but has been attained by great labour and infinite patience. You have had to fight hard and to suffer much for everything that helps to make you the most advanced and enlightened country of the East. For this reason your friends feel that you will come off victorious in these great moral issues which now confront you. May you ever bear in mind that "the true greatness of any government, divine or human, depends upon the purity of the ideals that are jewels in its crown." Remember also that "There is no wealth but life—life, including all its power of love, of joy, and admiration, and that country is the richest which nourishes the greatest number of noble and happy human beings."

Someone asked that I tell you to-day of our future

plans, of what we mean to do as an organization of Christian Temperance women for Japan.

I have been with you for so short a time, I know so little of your country, and of its people, that I feel it would be presumption and most unwise for me to attempt to set forth on this occasion, any definite methods of action. Although I may have seen a few of your needs, I can only tell you that—

"We are marshalling the forces
Of an army true and strong;
We are going forth to battle
'Gainst a hydra-headed wrong.
Where the bugle calls to battle
We shall go, with fearless feet,
Tho' the proud may deem this service
Both for them and us unmeet.
With our hearts aglow with pity
For the wounded ones who fall,
And with arms outstretched to rescue
Tempted friend, or foe, and all,
We are pledged to do our utmost
To break down this tyrant's thrall."

As an organization, we are aware what everything is not in the temperance reform, but we think that the temperance reform should be in everything, for, we have learned that "Temperance is the moderate use of all things harmless, and Total Abstinence from all things harmful."

In America we have found, that I venture to say you will find to be no less true in Japan, that "As the rum power has intrenched itself in custom, we must follow it into society; because it shields itself behind false theories of science; we must follow it into the schools, because it is hedged about by the safe-guards of law, we must follow it into government."

As an organization, we firmly believe that the hope of the Temperance Reform is in the pre-emption of childhood and youth by the slow but sure processes of education to total abstinence for the individual, and prohibition for the state. For this reason, we shall endeavour to have physiology and hygiene so taught in your schools as to leave in the minds of your children and youth an adequate and proper knowledge of the effects of alcoholic drinks and narcotics on the human system.

Twenty years ago the Woman's Christian Temperance Union began agitating the question of a compulsory scientific temperance law for each state in the union. At that time not a state required the teaching of its children in the schools in regard to the nature of alcohol and narcotics and their evil effects upon the body. To-day one-third of the population, or twenty-six million school children, are learning these facts in all the states of the Union. For the past ten or fifteen years the children have been carrying from the schools to the homes of the people the story of the evil nature and bad effects of alcoholic drinks and narcotics.

As a result of the diffusion of this knowledge, almost all of the great railroad corporations now refuse to give employment to men who drink. A large percentage of the labour employers require total abstinence of their employees. Some of the colleges oblige each student entering the institution to sign a total abstinence pledge. And many other countries are discovering that this is largely the reason for the commercial supremacy of the United States.

Because we believe "There is no occupation for women that approaches in sacredness and value the vocation of motherhood," we shall aim to glorify this calling above all others, and shall try to help your women to become better mothers, better homemakers, and, best of all, to become "what God meant her to be, the companion and counsellor, not the incubance and toy of man."

You have already entered upon the higher education of girls through your newly established "Woman's University," and I learned the other day that you have not less than fifty thousand young men, from all parts of the Empire, attending the higher institutions of learning in this city alone.

Wonderful opportunities await us here! A great responsibility rests on us all, as reformers and individuals!

Can we choose a work which shall bring about greater and more beneficent results for the future of your nation, than to reach and to teach these young people that "there is but one standard of purity for men and women, and that they are equally capable of living up to it?"

Can we present to them a purpose more beautiful in thought and in reality than that of attaining the "White Life for Two?"

For the sake of coming generations, while these young men and young women are training their mental faculties, and indirectly their physical, should they not at the same time imbibe a pure and reverential knowledge of the dignity, the duty, and the responsibility of parenthood, a holy idea of the sanctity of fatherhood, and a beautiful thought of the sacredness of motherhood? It seems to me that these are questions which should receive our most earnest and prayerful consideration.

In all our future work for others, let us not forget that "We must never know when we are defeated. We must never know when there are lions in the way. We must keep evermore our eyes fixed upon 'the hills from whence cometh our help.'"

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

MR. CHAMBERLAIN'S MISSION.

London, Nov. 7.

Mr. Chamberlain, speaking in the House of Commons, said he wished to proceed on his mission with an open, unprejudiced mind, his sole desire being to bring together kindred people into one great African nation under the British flag. The results of the resettlement and repatriation had hitherto exceeded the most sanguine anticipations. The Government would liberally compensate the Natal and Cape loyalists apart from the two millions included in the present vote.

SOMALILAND.

Later.

The British Foreign Office regrets its inability to accept a Boer contingent for Somaliland.

THE AMERICAN ELECTIONS.

The next House of Representatives will be composed of 204 Republicans and 177 Democrats. The result is a personal victory for President Roosevelt.

Tammany Hall is stronger than ever in New York.

THE GERMAN EMPEROR.

Shanghai, Nov. 8.

The Kaiser has sailed from Kiel for England.

SOUTH AFRICA.

The House of Commons has passed the first reading of an Appropriation Bill providing eight millions sterling for the Transvaal and the Orange River Colony, to be taken out of the Consolidated Fund.

THE EVACUATION OF SHANGHAI.

Later.

Reuter's agent learns that the Powers have arranged to evacuate Shanghai at an early date leaving the details of the conditions for subsequent settlement.

THE EDUCATION BILL.

Mr. A. J. Balfour has given notice in the House of Commons that he will introduce a resolution on Tuesday to enable Parliament to finish the Education Bill before Christmas. It is understood that this means that Mr. Balfour will propose to closure the debates on amendments to the Bill by compartments.

SOMALILAND.

London, Nov. 9.

Reuter's correspondent at Berbera says Colonel Swayne is ill and has started for England. The Mullah's outposts are within a few miles of Bohotle. Scouts are reconnoitring daily. The garrison is entrenched in a stone fort.

The Mullah has 2,000 rifles and 15,000 spearmen. A large caravan with rifles, headed by a European, is traversing the Weblic country to join the Mullah.

SHIP ON FIRE.

The P. & O. steamer *Candia* is on fire in the Suez Canal.

THE KAISER.

Later.

The Kaiser has arrived at Port Victoria. He entrained at Shorncliffe. Lord Roberts, General Wood, General Ian Hamilton, and General Kelly Kenny received him. He reviewed his regiment of dragoons and

briefly addressed the regiment, congratulating them on their behaviour in South Africa. He afterwards congratulated the officers and lunched with them. He then took train to Sandringham.

THE "CANDIA."

The fire on the *Candia* has been extinguished.

BIRTHDAY HONOURS.

London, November 10.

The Birthday honours include Prince Arisugawa, who receives the Grand Cross of the Bath. Knighthoods are conferred upon Hon. W. M. Goodman, K.C., Chief Justice of Hongkong; Mr. F. E. Alford, for many years head of the house of Jardine, Matheson & Co., in Hongkong and Shanghai, for services in China; the Knight Grand Cross of St. Michael and St. George is conferred upon Sir James MacKay, the honorary Knighthood upon Count Matsukata, while the Honorary Companionship is conferred upon the Sultan of Pahang and the Civil Companionship is given to Mr. R. W. Mansfield, H.B.M. Consul at Amoy.

THE KAISER.

London, Nov. 11.

Before entering church on Sunday at Sandringham, King Edward conversed with Mr. Chamberlain. The Kaiser then had a conversation alone with Mr. Chamberlain lasting over fifteen minutes.

GORDON COLLEGE HALL.

Lord Kitchener has opened the Gordon College Hall.

CONSUL DECORATED.

H.B.M. Consul at Kobe has been appointed a Companion of the new Imperial Service Order.

MERCANTILE OFFICERS DECORATED.

Officers of the mercantile marine serving in transports during the China war receive a special medal.

CHINESE TROUBLES.

Later.

Seven hundred Chinese robbers seized the town of Bardun to the south west of Kharbin in the beginning of October. The Russians entered the town on the 23rd of October and executed the leaders. The Russians will leave a garrison there until the depredations have ceased.

THE PREMIER ON POLITICS.

London, November 12.

Mr. Balfour, speaking at the Guildhall, said he looked at the future of South Africa hopefully, but not in too sanguine a spirit. Despite the great difficulties he was confident in Lord Milner's long-trying genius and splendid administrative ability. He hoped for good results from Mr. Chamberlain's visit.

Mr. Balfour congratulated Lord Lansdowne on his successful diplomacy especially, in concluding the commercial treaty with China and the alliance with Japan. Baron Hayashi replied for the foreign Ministers.

THE EDUCATION BILL.

London, Nov. 13.

Mr. Balfour's motion to effect closure by compartments was adopted by 222 to 103. The discussion on the bill closes before the end of the month.

THE SOMALILAND AFFAIR.

Beale has left Mombasa to examine the Italian ports and Kismayu with a view to ascertaining the practicability of landing troops for Somaliland.

(RECEIVED AT THE LEGATION OF FRANCE.)

FRENCH COAL MINERS.

Saigon November 6.

The pourparlers for the arbitration of the pending difficulties are proceeding in a satisfactory manner in the various coal mines.

THE FRENCH MINING STRIKES.

Saigon, November 8.

The arbitrators for the operative companies of Pas-de-Calais and Nord have rendered a decision which maintains the present salaries. The mining companies have promised to increase the workmen's pensions.

FRENCH COAL MINERS.

Saigon, November 12.

The miners of Nord and Pas-de-Calais have rejected the arbitral award. Nevertheless important resumption of work are announced.

(RECEIVED AT THE FOREIGN OFFICE IN TOKYO.)

KOREA.

The Japanese Consul at Fusan telegraphs under date of the 6th instant that from the 10th of November medical inspection of ships coming from Japanese ports is abolished.

COMMERCIAL MATTERS.

London Nov. 12; from the Japanese Consul-General.

Silver fell on the 10th instant to 22 $\frac{5}{16}$ pence. The causes of this depreciation are said to be large sales of the white metal in America and the projected adoption of the gold standard by the Straits Settlements and Mexico.

The Japanese Consul in Lyons telegraphs that, according to a French newspaper, the commercial treaty between the United States and France which was concluded on the 24th of July, 1899, for the period ended on the 24th of October, 1902, has been continued by mutual agreement for twelve months longer from the latter date.

(FROM THE "JIJI SHIMPO.")

FIRE WORKS ACCIDENT.

London, Nov. 5.

A fire works accident has taken place in the Madison Square, Broadway, New York, resulting in the death of 12 and injury to 50 persons. The accident was due to the premature explosion of a set piece, the explosives having fallen among a crowd of people assembled in connection with the elections.

FRANCE AND SIAM.

The *Echo de Paris* states that Siam has violated the new Franco-Siamese treaty, thereby making it impossible to ratify the treaty.

JAPANESE BONDS.

Four per cent. Japanese bonds are quoted at £87 $\frac{1}{2}$ on the London market.

THE U.S. CONGRESS.

London, November 6.

According to the latest returns regarding the elections of members of Congress in the United States, 206 Republicans and 180 Democrats have been returned.

FIREWORKS ACCIDENT.

In connection with the fatal fireworks accident in New York, the director in charge of the display has been taken into custody.

THE GERMAN EMPEROR.

The Kaiser is expected to visit England on Saturday next (the 8th) on his yacht the *Hohenzollern* in order to offer congratulations for the celebration of King Edward's Birthday, the 9th of November. The German Emperor will visit Sandringham. Among His Majesty's suite are several Ministers of State and other high personages in Germany.

THE KAISER.

London, November 8.

The Kaiser has arrived at Port Victoria. His Majesty reviewed his regiment of dragoons and then took train to Sandringham.

COSSACKS AND MANCHURIA.

The Military Authorities in St. Petersburg are now urging the necessity of sending Cossack soldiers to Manchuria as emigrants.

ENGLAND AND JAPAN.

London, November 10.

The *Official Gazette* announces that the Grand Cross of the Bath has been conferred on Prince Arisugawa and the Grand Cross of St. Michael and St. George on Count Matsukata.

NEW LORD MAYOR OF LONDON.

In the procession on Lord Mayor's day in London was a triumphal car representing the Anglo-Japanese Alliance. The car was conspicuous in the procession and elicited general cheers. A banquet is to be given to-night at the Mansion House by the Lord Mayor, at which Viscount Hayashi, as *Doyen* of the Corps Diplomatique, will make a congratulatory address.

THE GERMAN EMPEROR.

The Kaiser's visit to England is attracting special attention so far as Germany's action on the Yangtze is concerned.

Mr. Pobetnoscheff, Chief Procurator of the Holy Synod, has resigned.

(FROM THE "JAPAN HERALD.")

GERMANY AND THE YANGTSE VALLEY.

London, Nov. 7.

The Berlin correspondent of the *Morning Post* reports that the Peking Government has formally yielded to Germany's demand for the neutralisation of the Yangtse Valley.

The *Post* in a vigorous article strongly deprecates any overtures or retreats before Germany.

The other papers comment on Viscount Cranborne's extreme reserve and demand a frank, explicit statement in Parliament.

GERMANY AND THE YANGTSE VALLEY.

London, November 7.

The Berlin correspondent of the *Morning Post* reports that the Peking Government has formally yielded to Germany's demand for the neutralisation of the Yangtse Valley.

The *Post* in a vigorous article strongly deprecates any overtures or retreats before Germany.

The other papers on comment on Viscount Cranborne's extreme reserve and demand a frank explicit statement in Parliament.

RIGHTS OF FOREIGN POSSESSION.

London, November 9.

It is officially confirmed from Brussels that China has granted the rights of foreign possession to King Leopold's territory on the right bank of the Yangtse.

RUSSIA'S FLEET IN THE FAR EAST.

Besides the battleship *Retvisan* and the first class cruisers *Diana* and *Pollada*, which are now proceeding to the Far East, the *Novosti* states that the Russian Government intends sending immediately another ironclad and two armoured cruisers.

GERMANY AND THE YANGTSE.

London, November 10.

The *Daily News* gives special prominence to a statement affirming that the object of the Kaiser's visit to England is to secure Great Britain's sanction to Germany's claim on the Yangtse as the price of Germany's quiescence while the Anglo-Portuguese negotiations are proceeding *re* Delagoa Bay.

The *Daily News* vigorously protests against this sanction being given, and says Great Britain is in imminent danger of a surrender compared wherewith Fashoda would have been trivial.

THE EVACUATION OF SHANGHAI.

London, November 12.

The *Daily Mail* learns that Shanghai will be evacuated unconditionally.

(FROM THE "N.-C. DAILY NEWS.")

LORD ROSEBERY ON ARMY REFORM.

London via Bombay, Nov. 2.

Lord Rosebery, speaking at Edinburgh, criticised the new army scheme, which he said was prepared in the absence of the best of our officers in South Africa.

Lord Kitchener, he said, should have been given full power to deal both with the War Office and with the reform of the army.

(FROM THE "OSTASIATISCHE LLOYD.")

NEWS FROM EUROPE.

Berlin, November 3.

H.M. the Emperor will arrive in England on the 8th instant to take part in the festivities to be held on the occasion of King Edward's birthday. The King of Portugal is expected in London on the 17th instant; a meeting of the Emperor and King Carlos in London is, therefore, most improbable.

The German Ambassador in Rome, Count Wedel, has been appointed to succeed the German Ambassador at Vienna, Prince Philipp von Eulenburg und Hertefeld.

The well-known parliamentarian, Heinrich Rickert, has died at the age of 69. He has represented the city of Danzig in the Prussian Diet since 1870, and in the Reichstag since 1874, and has been founder and leader of the *Freisinnige Vereinigung* (Liberal Association).

Privy Councillor Lewald of the Home Office, who was a member of the German Committee for the Expositions in Chicago and Paris, has been appointed the official German representative at the World's Exposition at St. Louis, Mo.

The repeated reports, according to which the German Government and a majority of the Reichstag have come to an understanding about the new tariff, in spite of the former resolutions which the Government would not accept, are premature. It seems, however, that it is not impossible that they will agree, provided the majority in the second reading will firmly hold out in their opposition against the obstructions of their opponents in the third reading.

White Java and Penang	6.70 to 7.50
White Refined	8.65 to 10.70

EXPORTS.

RAW SILK.

During the week we have had consumption of another kind to assist the market, about 1,000 piculs having been burned in an unfortunate fire which occurred on the 9th. This has hardened the market, sellers believing that the thousand piculs will have to be replaced. Prices have not risen but are strong at the quotations given below and there is a moderate amount of business doing both for Europe and America.

BOVRIL ISN'T DEAR

in fact, value for value, it is one of the cheapest drinks, and one of the most economical foods that can be obtained. A cup of hot Bovril costs less than a drink of whisky, and while giving a more genuine and lasting warmth than the latter, contains, in addition, the nutritive principles of beef worth many times its cost.

Old fashioned beef teas and meat extracts, whether known as such, or disguised under more pretentious modern names contain none of the NUTRITIVE properties of beef. Baron Liebig himself admitted this fact; there is not a doctor to-day disputes it. Used as a nourishment Meat Extract is probably the most expensive article one can buy. Bovril one of the cheapest.

Skin-Tortured Babies AND TIRED MOTHERS Find Comfort in Cuticura

INSTANT RELIEF and refreshing sleep for Skin-tortured Babies and rest for Tired Mothers in warm baths with CUTICURA SOAP, and gentle anointings with CUTICURA OINTMENT, the great skin cure and purest of emollients, to be followed in severe cases by mild doses of CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. This is the purest, sweetest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, scaly, crusted, and pimply humours, eczemas, rashes, irritations, and itchings, with loss of hair, of infants and children, yet compounded.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, and the BEST toilet and BEST baby soap in the world.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 60 doses.

CUTICURA REMEDIES are sold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 27-29, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. FORTRE DRUG AND CHEM COE., Sole Props., Boston, U. S. A.

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 22ND, 1902.

BIRTHS.

On November 14th, at Kobe, the wife of E. F. CROWE, of H.B.M. Consulate, Kobe, of a Son.

On the 20th instant, at No. 87 Bluff, the wife of H. KLINGEN, of a daughter.

SUMMARY OF NEWS.

MR. JOHN MORLEY, M.P., has presented Lord Acton's Library to Cambridge University.

THE *Asama* and *Takasago* arrived at Hongkong on Nov. 15th on their way back to Japan.

THE launch of the torpedo-boat destroyer *Murasame* will take place at Yokosuka on the afternoon of Nov. 29th.

THE hydrants on the Bluff were tested on Friday with satisfactory results, the water reaching a height of over 40 feet.

CARDIFF coal to the amount of 4,000 tons was brought to Yokohama on Nov. 16th by the E. and A steamer *Empire* from England.

FREEMASONS will be interested to hear that Lord Kitchener, on his arrival in India to take up the Commander-in-chief-ship of the Indian Army,

will probably succeed Sir Power Palmer as District Grand Master of the Punjab.

THE Tokyo Gas Company will shortly convene a special general meeting to consider the subject of introducing foreign capital. Baron E. Shibusawa will preside.

THE Empress made a donation of yen 500 to the Bluejackets' Club in Yokosuka on Nov. 15th when Her Majesty attended the launch of the cruiser *Niitaka*.

THE British steamer *Glamorganshire* has been sold to the Nippon Yusen Kaisha for £50,000. She has an aggregate tonnage of 4,300 tons and was built in England in 1900.

MANILA is to have an operatic season. Forty-one members of the *Compania de Opera Italiana*, of Genoa, are on their way to that city, and are expected to arrive early this month.

THE *Asama* and *Takasago* left Hongkong on Nov. 18th for Amoy. The torpedo-boat destroyer *Asashiro*, built in England for the Japanese navy, is expected to arrive at Yokosuka to-day.

ON morning on Nov. 18th a collision took place between two passenger trains at Michiba Station on the Hankoku Railway. As a result, over 20 persons were injured more or less severely.

THE Japanese battleship *Chinyen* came up the bay as far as the Lightship on Friday morning and saluted the American Admiral's flag, afterwards returning to Yokosuka. The *Kentucky* left in the forenoon.

THE marriage of Prince Yamashina to Lady Hisa-ko, sister of Prince Shimazu Tadashige, having been arranged, the civil ceremony will take place on November 26th at 10.30 a.m. in the Imperial Palace.

THE N. Y. K. steamer *Izumi Maru*, which ran aground off Bingo province (Inland Sea) several days ago, was successfully floated on the morning of Nov. 15th, no damage being sustained. She at once steamed to Kobe.

THE damage sustained by the N. Y. K. steamer *Izumi Maru* in consequence of the recent stranding is reported to be about yen 30,000. Her bottom, from bow to the middle of the hull, is dented considerably.

THE Emperor was pleased, says a Moji report dated Nov. 16th, to present yen 1,000 to the city of Moji and yen 500 to Dairi on the occasion of His Majesty's visit to those places en route for Tokyo from the scene of the autumn manœuvres.

AN explosion of fire-damp has taken place in the Hōshu coal mine, Fukuoka Prefecture, resulting in the death of eleven miners. It is stated that it will take at least one or two months before the fire can be extinguished. The mine belongs to the Hoshu Colliery Joint-stock Company.

EARLY on the morning of the 16th inst. a thief, or thieves, broke into the house of Lieut.-Commander Roussine, No. 72 Bluff, and stole a silver casket, presented to him by the Crown Prince, an overcoat and thirteen other valuable articles. No arrests have yet been made.

ON Nov. 15th the faculty and students of the Meiji Horitsu Gakko, a law school in Kanda, Tokyo, held a special meeting at the Seiyoken in Ueno Park in connection with the proposal to convert the institution into a university. Mr. Kishimoto, the principal, formally declared that the faculty had passed a resolution in favour of

the proposal, namely to promote the institution to the rank of a university. The new departure will be initiated in April next year.

THE Tokyo press reports that Mr. Lessar, Russian Representative to Peking, will leave Peking about Dec. 5th for Tokyo via Seoul, arriving at Shimbashi about the 20th of that month. His visit is of course connected with official business.

THE third class cruiser *Niitaka* having been launched at Yokosuka on Nov. 15th, the Yokosuka Admiralty will construct another third class cruiser, the keel of which will be laid at an early date. She will, it is said, be named the *Otowa* and is expected to be completed in 1904, her aggregate tonnage being 2,900 tons.

THE *Asahi* says that Osaka Harbour Works loan bonds amounting to yen 1,750,000, which are the remaining portion on transactions between the Third Bank of Osaka and Messrs. Samuel Samuel & Co. of Yokohama relative to the loan, will be forwarded to London by the *Empress of India*, which leaves Yokohama on Nov. 26th for Vancouver.

AMONG the candidates recommended by various public bodies for the vacant post of Mayor of Yokohama are Mr. Ichihara Seiko, chief of the Yokohama branch of the First Bank, Mr. Saito Matsuzo, Alderman of the Yokohama City Office, and Baron Kawaguchi Takesada. A meeting of the representatives of the public bodies will take place in a week or so to discuss the subject.

THE Empress made a donation of yen 200 to the Peeresses' School in Tokyo on the occasion of her visit to the institution to witness the autumn sports of the students on Nov. 17th. The Crown Prince also made a money present to the school the same day through his chamberlain. Among those present at the sports were Prince Tokugawa Keiki, the Chinese Minister in Tokyo, and others, about 600 in all.

ON Nov. 10th a telegram was received in Tokyo from Victoria, Canada, to the effect that a Japanese sailing-ship called the *Seifu Maru* entered that port on the 9th having on board 585 fur-skins. Her masts and rigging were badly damaged, but all the members of the crew were safe. The vessel left Hakodate on June 19th for Bering Sea for sealing purposes and had not been heard of since. Apparently she encountered storms during the expedition.

THE well-known Japanese actor, Mr. Kawakami Otojiro, who is now universally known in consequence of his specialities on the stage, will give a performance of a tragical drama at the Meiji theatre, Tokyo, in January next year, the play being based on "Othello." He left Shimbashi on Nov. 16th for Formosa and the Pescadores to institute investigations relative to the proposed performance. Apparently the action of the piece will be in those places.

THE Nippon Yusen Kaisha will add to its existing fleet six steamers in the near future. These vessels are all in course of building in the Kawasaki Shipbuilding Yard, Kobe, and will be completed next year. They are named the *Aki Maru* (over 6,000 tons) to be used for the European passage, the *Nikko Maru* (over 5,000 tons) to be placed on the Australian route, the *Kushiro Maru* (over 1,000 tons) to be used in Hokkai waters, the *Chefoo Maru* (2,000 tons) and the *Eiko Maru* (over 2,000 tons) each to be used for the North China service, and the *Niigata Maru* (over 2,000 tons) to be employed in carrying heavy goods.

CHINESE NEWS.

Saturday, Nov. 15.

Unfortunate China is in the position of shouldering obligations which grow heavier daily without any fault of her own. When she contracted her last debt of 450 million taels on account of an indemnity to the world, the gold price of the tael—as the *Asahi Shimbun* notes—was 1.407 yen. Today, its gold-price is only 1.093 yen, and thus the amount of the debt has grown to something like 600 million taels instead of 450 million. Meanwhile all her other foreign debts also have to be discharged in a rapidly appreciating currency. Mr. Morton Frewen, one of the most brilliant disciples of bimetalism, used to base very telling arguments on the hardships suffered by debtor nations, which were obliged to discharge their obligations with gold that cost them more and more from month to month. China offers a striking example of his thesis. It is necessary for her to make constantly increasing demands on her subjects for the sake of her foreign debts, and naturally her subjects become more and more exasperated against foreigners. Fate is as unkind to the Chinese as she is gracious to the Japanese. It is the old story, "heaven helps those that help themselves."

Monday, Nov. 17.

The *Asahi* constitutes itself the organ of persons discontented about the action of the Japanese Government with regard to private claims arising out of the Boxer outrages. Several complaints are formulated. The first is that the whole of the *pro-rata* reduction of the sums awarded to each Power was made to fall on the private claims. To that protest the Japanese Government is understood to answer that the private claims justly invited such reduction, inasmuch as they included many items of an extravagant character, and that the diminution effected left ample means of satisfying any reasonable demands. The second complaint refers to interest on the sums allotted. It appears that no independent provision is made for the payment of interest: principal and interest are lumped together and the total is made a charge upon the indemnity. We fail to see that any ground for remonstrance exists there. Such a method is invariably adopted. Finally the *Asahi* attacks the Government for paying the claims with five-per-cent. bonds at par, whereas the bonds are selling at less than 90 in the open market. That certainly sounds like a legitimate grievance. The Government's answer, we presume, will be that claimants have the option of receiving Chinese bonds—in other words, they may take the very medium in which the Indemnity is paid to Japan;—and that the Treasury is not under any obligation to be generous to the claimants at the expense of the nation. There never yet was a question of similar private claims that did not evoke expressions of discontent, and generally when the action of Governments in such matters is submitted to the search-light of strict justice, some defects become discernible.

It is stated that the Japanese contingent of the foreign garrison at Shanghai will leave that place by the *Saikyo Maru* on the 21st instant, and that orders have been issued for the withdrawal of the British troops on the 22nd. The French and German forces are expected to follow immediately. Nothing is said in this context of the special arrangement which

Germany and France sought to make, or did actually make, with China. If in the face of that arrangement Great Britain has consented to withdraw her garrison, a very remarkable concession will have been made to German and French good-will. The general expectation was that if the concurrent withdrawal of the garrisons was to be employed as an occasion for special concession to Germany and France—especially Germany—the least England could do was to decline to be a party to the evacuation. It is possible, therefore, that the German and French conditions have been abandoned or materially modified, but we find it surprising that a matter of such importance should not be mentioned in the telegrams.

It is stated that a project for the resuscitation of the Chinese navy is seriously entertained and that it has the vigorous support of Viceroy Yuan. Japanese journals publish an outline of the programme, which includes the despatch of students to Japan, the establishment of a dock-yard at Mamei and of naval stations at Chefoo and Foochow; and the organization of a naval college. But there is nothing said about buying ships. The project seems to indicate that China is to build vessels for herself. That is a curious example of fatuousness. If China imagines that she has leisure for such dilatory proceedings she must be still as somnolent as ever. One thing is certain, namely, that without a fleet she can not hope to protect herself against foreign invasion. A fleet, it is true, would not protect her against Russia advancing through Asia or France moving up from Indo-China. But a strong squadron of ships would make all the difference in any other situation.

Great Britain sends two gun-boats to take part in the funeral of the late Viceroy Liu. Japan sends the *Izumi*, and other Powers have already despatched vessels. Consuls and representatives of foreign communities are going.

M. Lessar and Sir Ernest Satow are about to start from Peking for Europe on leave of absence. M. Lessar's health is said to be impaired. The only Ministers left in Peking will be those of France, Italy and Belgium.

The sons of some distinguished Chinese publicists arrived at Moji on the 12th instant and proceeded at once to Tokyo. Among them were the sons of the Governor of Yunnan and the Taotai of Canton. The party numbered five, and all are to enter the *Seijo Gakko*, it is said; which means that they contemplate a military career.

By the same steamer there arrived a Mr. Hsien, who is to act as superintendent of private students in Japan. He is represented as saying that Mr. Wu Ja-lung has not yet proceeded to Peking, and that, when he does go thither, he will probably soon retire, since he is regarded with much suspicion by the Peking authorities.

Tuesday, Nov. 18.

Professor Tomizu returned to Peking on the 1st instant from his travels in Mongolia. He reports that Russian influence begins to be paramount three days' journey beyond Chankiakow, and that thenceforward the whole country is being rapidly Russianized. The route for the direct line from Russia's Trans-Asian Road to Peking has been actually surveyed, he alleges, and the work of construction will soon commence. He proclaims his intention of endeavouring to

arouse his countrymen to a sense of the danger that menaces the Far East.

There is no question about the bias of Professor Tomizu. The shadow of the Russian avalanche has touched him and produced a fit of permanent shivering. We are bound to confess, however, that although his accounts may be exaggerated—a point concerning which we have no title to pronounce any opinion—the broad facts of his narrative are confirmed by the reports of British travellers. Russia is effecting a peaceful conquest of Mongolia, and there is reason to believe that events will soon verify, and more than verify, the forecast of the French cartographer who assigned to her a sphere of influence bounded on the south by a line drawn along the Great Wall from Hing-hia to Ching-wan and thence across the Gulf of Liaotung along the whole northern frontier of Korea.

Wednesday, Nov. 19.

The Japanese Representative in Peking, Mr. Uchida, who is now on a visit to Tokyo, expresses, through the columns of the *Asahi Shimbun*, some hopeful views about reform in China. He does not at all agree with the pessimistic statements heard in some quarters, that reform has been again a failure and that the country has slipped back into the old grooves from which it had been raised momentarily by the stirring events of 1900. It is true, indeed, that some of the large ideas entertained by sanguine reformers at the moment of the Court's return have not been realized. They could not be realized, for the movement of such a huge body must of necessity be slow and gradual. But reform is in the air and its prospects are decidedly encouraging. The Empress Dowager has set an important example by entertaining the ladies of the Legations in a manner quite without precedent. She has shown that she wants to be their friend, not merely their official hostess. That example is being widely followed. Princes and high dignitaries of State are consenting to be the guests of foreigners and are inviting the latter to be their guests in turn. A social *rapprochement* is taking place which has much significance. There are other evidences of the disappearance of the old exclusive spirit. Men who, in former times, never set foot within a foreign legation or residence are radically changing that habit, and are adopting a system of informal and frank intercourse. It is nothing uncommon for Prince Chun, the Emperor's brother—who visited Berlin last year—to ride, accompanied by only one attendant, to the Japanese Legation and to converse freely with the Minister. Others display similar indifference to ceremonial restraints, and among the young Princes there are not a few who, like Prince Ching (Junior) and Yu Lung, have thoroughly imbibed the spirit of reform, and may be regarded as potent factors in their country's regeneration. It would be oversanguine, indeed, to look for any sweeping metamorphoses at once, but if things continue to progress for ten years as at present, there can be no doubt that China will be fairly *en route* for the new civilization.

The Customs Report on the Foreign Trade of China for 1901, gives an account of the state of railway enterprise in that country at the close of the year under review. "The Shantung Railway had 160 kilometres completed and trains were running between Tsingtao and Taoshan. This next spring it is expected to reach the Massu Coal Mines, and it should be completed

as far as Chi-nan-fu, the capital of the province, in three years. The Imperial railways of North China between Peking and Tientsin and Newchwang, with extensions to Chinwang-tao, and from Fêng-tai to the Lu-Han Railway, and extensions to Tsung-chou and Hsin-min-tun, have 901 kilometres completed. The short line between Shanghai and Woosung, 18 kilometres, is said to be paying its way now, but nothing has been done by way of commencing the projected railway from Shanghai to Soo-chou, Ningpo, &c., and it is understood that there is some difficulty in raising the necessary capital, owing to the terms of the concession not being considered satisfactory by investors. The great trunk line from Peking to Hankow makes steady progress, and the influence on trade should be felt immediately. During the year, the section between Lu-kou-chiao and Pao-ting-fu, destroyed by Boxers, was rebuilt, and the line has been carried down to Chêng-ting-fu, distant from Peking 262 kilometres. In 1902 it is hoped to complete the line as far south as Shun-tê-fu, a further distance of 125 kilometres. In the south, at the end of the year, 175 kilometres northward from Hankow were completed, and trains will be running as far as Hsin yang (220 kilometres) about the 1st of May next (1902). By the end of the year (1902), it is hoped that the track will be laid for another 100 kilometres north of Hsin-yang. It is intended to commence work shortly on the line from Wuchang to Canton. Experience has already shown that railways in China are eagerly availed of, and that business increases wherever they are built."

There appears to have been quite a large attendance of foreigners in Nanking at the funeral of the late Viceroy Liu Kun-yi—Admiral Bridge and the commanding officers of twelve foreign men-of-war, the British Consul at Shanghai and all his colleagues, making a total of seventy-nine persons. On Saturday the 15th instant they were entertained by the new Viceroy, Chang Chih-tung, and on Sunday the 16th they joined the funeral. The Viceroy's body was carried from his *yamen* and put on board a gun-boat for transport to his native province, Hunan. According to telegrams published by the *Asahi Shimbun* and the *Fiji Shimpō* the ceremony was most imposing. Doubtless we shall have a full account of it in the Shanghai journals.

It is stated in well-informed circles in Tokyo that when the evacuation of Tientsin was decided upon last August, the Japanese Government proposed to the Powers concerned that Shanghai also should be evacuated at once. The Powers took the same view and the matter was finally settled. Accordingly, the Japanese Government will withdraw the whole of its force by the *Saikyo Maru* on the 22nd instant. Concurrently with the announcement of the fact to China, Japan has notified the latter that, in the event of any Power sending soldiers again to Shanghai on any pretext whatsoever, she, Japan, reserves to herself the right to send troops thither also.

Thursday, Nov. 20.

Another piratical outrage has occurred between Canton and Hongkong. Particulars are not given by the telegraph, but it seems that an English ship was boarded, and that one of the crew—whether an officer or a seaman we can not tell—died subsequently from the effects of injuries received. The telegram adds that Great Britain will probably

adopt a strong policy for the suppression of piracy in China's southern waters. That sounds like a reversion to by-gone times. Old residents can recall the days when the principal occupation of H.B.M.'s ships on the China station was the pursuit and capture of pirates, and when the gambling dens in Hongkong had to be licensed to prevent them from being used as asylums by these ruffians.

The *Fiji Shimpō* has a telegram which says that the Empress-Dowager is becoming anxious to nominate a new heir apparent, and that the Imperial lady complains of having a desire for supreme power erroneously attributed to her by foreign observers. A great many things have been erroneously attributed to Her Majesty by foreign observers, we suspect. Each critic has endeavoured to show himself shrewder than his fellows by inventing some new accusation against Tsai An. In this matter of choosing an heir, the Imperial Family labours under the disadvantage of departing from the traditional policy of the Manchu, which is that the heir should not be definitely proclaimed until the time has actually come for him to succeed. That method is designed to prevent intrigues, and its wisdom has been illustrated during the present reign, for not a few complications have occurred in connexion with the question of the succession. It is impossible, however, to observe such a rule in the absence of direct heirs.

Prince Chin (junior) wants to have a department of agriculture and commerce established in Peking, but his suggestion meets with much opposition and is not likely to be carried out.

It is now alleged that the rumoured appointment of a Governor of Chili, who should reside in Paoting, has no basis of fact. Considering how often and how persistently the statement was circulated, its abrupt and summary denial will scarcely carry conviction to all minds. But at any rate the news that the project has been abandoned is welcome, since such an appointment must have weakened the authority of Viceroy Yuan, in whom China's hopes now centre.

The Russian Authorities have announced that special settlements may be formed in towns within the Amur region, for the convenience of Asiatics unacquainted with the principles of sanitation. The arrangement is supposed to refer solely to Chinese and Koreans, and to have been suggested by inconvenient experiences connected with permitting mixed residence to the Chinese in Vladivostock.

Friday, Nov. 21.

Telegrams from Tientsin say that the Taku Dock, which had been in Russian possession since 1900, has been restored to China.

The Tientsin branch of the Specie Bank succeeded in putting into circulation twenty-five thousand *yen* worth of its notes on the 17th instant. That does not sound like a very great feat, but it has decided interest in comparison with previous failures in the same direction.

There is some trouble about flags at the Kaiping mine. Confused telegrams have reached Tokyo. We gather that a dispute is in progress as to the supreme authority at the mine, the disputants being the Chinese Engineering and Mining Company, a Belgian Syndicate, the Detring Company and

the Chinese themselves. Apparently the first concrete evidence of the trouble was the hauling down of the British flag by the Chinese and its replacement by the Yellow Dragon. Thereafter the Belgians sought to run up their own colours, but they encountered military opposition and the Dragon still floats. All this is very vague, but we can only give the gist of the telegrams.

The Chinese Engineering and Mining Company is a concern which promises to have a history. Its affairs were recently the subject of a series of trenchant articles appearing in the columns of the *Peking and Tientsin Times*; articles which seemed to demonstrate that the accounts of the Company are by no means clear and that the manner of its flotation does not bear close scrutiny. Readers may remember that the company was formed as an international joint-stock industrial enterprise under English law for the purpose of working the Kaiping Coal Mine. It had a capital of a million sterling—all of which has been issued—and it promised at first to prove a most flourishing enterprise, the net profits being estimated at twenty-four per cent. The last accounts, however, appear to show that the profit is only eleven per cent., and further leave so much to be desired in point of explicitness that the exultation expressed at the time of the company's formation, is beginning to be replaced by a sentiment of doubt and chagrin.

Yung Lu's project of adding thirty thousand to the Imperial Guards is in process of realization. Three thousand men have been enlisted, and it is proposed to grant a yearly appropriation of $2\frac{1}{2}$ million taels. These troops are to be drilled and armed in foreign style.

A telegram says that there is no doubt of the fact of a certain German firm being engaged in the secret importation of arms. Of course. No reasonable person ever expected that the conventional veto on the importation of weapons of war could be enforced. It was one of the vainest provisions ever inserted in a treaty. For by whom was it to be enforced? By the Chinese themselves; that is to say by the very people whose freedom of trade it was intended to curtail. Most assuredly the Foreign Powers had no intention of organizing a preventive service simply for the purpose of enforcing such an interdict. China herself had to enforce it against herself. If the Peking Government had been asked to pledge its good faith that it would abstain from all importation, direct or indirect, of arms or munitions of war during a certain term of years, the veto might have had some practical significance. But as it stands it is comically unpractical.

The latest rumours about Mongolia are in direct contradiction of stories recently circulated, for they represent a complete absence of tangible Russian enterprises, and say that there is no foundation for the report of a railway across Mongolia to Peking.

The new commercial treaties with China are evidently ill-fated. A proposal from China's side that the further conduct of the negotiations should be suspended during the period of Taotai Shên's mourning, did not find favour with foreign Governments. Two years probably seemed to them rather a protracted postponement. But although that block has been nominally removed, rumour says that the negotiations are suspended, none the less,

KOREA.

Saturday, Nov. 15.

Mr. Waeber has had audience with the Emperor of Korea. That does not seem to us to be a very formidable item of news, yet it excites much interest among Japanese newspapers, and provokes many conjectures as to the cause of the meeting. Would it not have been more surprising had Mr. Waeber left Seoul without an audience? So it seems to us at any rate. One man stealing around with his finger on his lips is enough to throw a whole community into a fever of speculative expectation. The Seoul correspondents of Tokyo journals appear to be endeavouring to achieve that result. They have largely succeeded, for by investing every Russian doing with an atmosphere of mystery, they have taught the public to look for mysterious motives where, in fact, everything is simple and normal.

Tuesday, Nov. 18.

The Seoul correspondent of the *Jiji Shimpō* sends a telegraphic despatch to that journal announcing that Mr. Waeber, the special envoy from Russia, was received in audience by the Emperor on the 14th inst. It will be remembered that this audience was anticipated with some interest, an impression prevailing among the Japanese in Seoul that Mr. Waeber would take advantage of the occasion to make some important representations. According to the *Jiji Shimpō's* intelligence, he fully justified that forecast, for after informing the Sovereign that he intended to remain in Seoul until the time of the deferred court ceremonial, he proceeded to inform His Majesty that in the interval since his, Mr. Waeber's, former presence in Seoul as Russian Representative, the administration of the country had been distinctly retrogressive. All talk of reform had proved purely illusory and it was impossible to acquit the Ministers of the Crown of perfunctoriness and indifference in the discharge of their duties. Mr. Waeber went on to say that, so far as he could see, Li Yong-ik was the only really competent official available for high office in the Korean capital.

Li Yong-ik, we may remind our readers, is the person who has the credit of having been chiefly instrumental in contriving the flight of the King—not yet Emperor—to the Russian Legation in 1896. He was at that time serving in some capacity in the Legation, and had acquired a working knowledge of the Russian language.

The *Asahi Shimbun's* correspondent confirms the above, but the details given by him are less emphatic. It must be observed, however, that in all probability both correspondents obtained their news from the same source, and if that be the case the concurrence of the testimony has no more significance than that familiar event, the simultaneous publication of the same statement by several Japanese papers all of which have received it from one and the same news agency. One can scarcely credit such interference as that attributed to Mr. Waeber by the two correspondents. In reading their allegations, a choice must be made between three conclusions: either that Mr. Waeber has been grossly misrepresented; or that the views attributed to him were elicited by direct inquiries from the Sovereign; or that he took an unwarrantable liberty, and thrust himself into Korea's domestic affairs in a manner as unprecedented as it would be intolerable. Which of these three hypotheses is to be accepted the public will form its own judgment, but for our own

part we find insuperable difficulty in believing the last.

Mr. Hayashi, Japan's Representative in Korea, was to be received in audience on the 16th instant. We wonder whether his meeting with the Emperor has set correspondingly strange rumours afloat in Russian circles.

Meanwhile the much talked of reforms of the Korean military system are said to have been actually inaugurated. The various steps of the programme are, first, an increase of the forces forming the garrison of Pyongyang; secondly, the erection of an arsenal in Seoul, a project which is said to have been undertaken by the *Mitsui Bussan Kaisha* and the *Sharyo Kaisha* (Car Company) of Tokyo, at an expenditure of 300,000 yen; thirdly, the establishment of an officers' college in Seoul; fourthly, the partition of the country into four military districts, each with its own division of troops; fifthly, the organization of local military schools in Seoul, Pyongyang and Yuen-san; sixthly, the abolition of the present Generals' Council and its replacement by a head quarter staff; and seventhly, the establishment of a naval and military bureau. These details are published by several Tokyo journals.

Wednesday, Nov. 19.

Yesterday the public was informed by Seoul correspondents of leading Tokyo journals that Mr. Waeber, when received in audience by the Emperor of Korea, undertook to read His Majesty a lecture on the administration of Korea's domestic affairs, severely censuring the Ministers of State and declaring Li Yong-ik to be the only official really capable and trustworthy. We ventured to express a conviction that little credit could be placed in the story, and that if Mr. Waeber made any comments of the nature attributed to him, they took the form simply of replies to questions addressed to him by the Emperor. To-day the matter receives a new complexion from a telegram to the *Nichi Nichi Shimbun*. That journal's Seoul correspondent, describing Mr. Waeber's audience, says nothing of the gratuitous advice attributed to him by other correspondents, and represents him as having informed the Emperor—presumably in reply to a query—that Li Yong-ik is not a person to be trusted and that his employment in a high office of State can not be recommended. Thus the *Nichi Nichi's* correspondent attributes to Mr. Waeber language the very opposite of that he is alleged by other correspondents to have used. The upshot of it all is that the public must remain altogether in doubt as to what Mr. Waeber really did say. Very likely his conversation with the Emperor was of a purely conventional nature.

In connexion with the name of Li Yong-ik—who is now acting Minister of Finance and head of the railway bureau—it is stated that he is negotiating with the Seoul branch of the Russo-Chinese Bank for a loan of a million yen at 7 per cent. interest, the security to be mining concessions and the ginseng monopoly. There is no reason why Korea should not have the luxury of a national debt as other countries have, but in circulating rumours like the above it seems to be forgotten that such a thing exists as the Protocol of June, 1896. The second article of that document provides that:—"The Japanese and Russian Governments, with the object of remedying the financial embarrassment of Korea, will advise the Korean Government to suppress all useless expenditure and to establish equilibrium between the expenses and the

revenue. If, in the sequel of reforms recognised as indispensable, it should become necessary to have recourse to foreign loans, the two Governments, in common accord, will lend their assistance to Korea." It becomes very doubtful whether, in the face of such an article, a semi-official institution like the Russo-Chinese Bank would be entitled to lend money to Korea without previously consulting Japan.

Concerning protocols, we may recall attention to the fact that the Protocol of May, 1896, contains a clause which may account for Mr. Waeber's alleged remarks about Li Yong-ik:—"The two Representatives" (Russian and Japanese) "will always aim at recommending His Majesty to appoint liberal and moderate men as Ministers and to show clemency to his subjects." There would be nothing strange in Mr. Waeber's reported comments, if read by the light of that Protocol.

Details of the conflagration at Fusan show that 1,400 people were burned out and that the total loss was about one million yen. It was covered only very partially by insurance. The Meiji Insurance Company had given policies aggregating 22,400 yen; the *Shuzo* Company loses 48,000 yen, and the Nippon Insurance is hit to the extent of 36,000 yen. Agents from these companies proceeded at once to the place to make payments, but it appears that, in view of the frequency of such disasters in Fusan, the insurance companies have decided to decline issuing any more policies. That, of course, is a serious set back to the prosperity of the place. People hesitate to erect buildings of a substantial character if they can not obtain insurance. Of course the trade of the settlement is entirely dislocated by the disaster.

Thursday, Nov. 20.

It is now alleged that Messrs. Ginsberg & Co.'s project of a loan to the Korean Government has much larger dimensions than those originally reported, the amount being ten million yen, not one million. M. Ginsberg suggests as security a permanent monopoly of the ginseng trade, and a concession of all the mines in Kyongsando. Naturally doubts are entertained as to the prospects of the transaction. Meanwhile, improvident as the Korean Government seems to be, one is surprised that it does not take the obvious precaution of obtaining some trustworthy assessment of the value of its own property. What are mining privileges in the province of Kyongsando worth, for example? Apparently the Seoul Authorities have no definite idea. If may be taken for granted that Messrs. Ginsberg are much better informed, and so are all those that seek to exploit Korea's resources. If she will not herself develop her supplies of wealth, the best thing that can happen is to have them developed by others, but she should at least try to discover what there is to develop. The Japanese Authorities were not so short-sighted.

The question of the Seoul Electric Railway has not yet been settled, it would seem. The Korean Government will not pay the cost of construction, and the United States Representative is said to be urging the sale of the line in discharge of its liabilities.

The business of selecting candidates for the vacant post of Mayor of Yokohama is still dragging on. More than two months have elapsed since the death of Mr. Umeda, but no successor is forthcoming as yet. Undoubtedly there are difficulties in choosing a successor.

COUNT OKUMA ON THE LAND TAX.

Speaking before the Economical Society on the 15th instant, in the Fujimi-ken, Count Okuma recalled the celebrated experiment made by Mizuno Echizen no Kami sixty years ago. When this remarkable statesman became the Shōgunate's prime minister, he found a state of affairs opposed to all the principles of political economy as expounded by Chinese philosophers. The land had passed out of the hands of small farmers into those of large owners, and the power and opulence of the latter contrasted strongly with the impotence and indigence of the former. To remedy that state of affairs the system of *jinsen* (benevolent administration) was introduced. The authorities decided that each family should be estimated as consisting of five persons, and that for each person an allowance of one *cho* ($2\frac{1}{2}$ acres) should be considered the maximum holding. If a household held an area over and above that limit, the excess was to be farmed out to tenants rent free. Further, although the actual rate of land taxation at the time seemed to be very high, so many indulgences were granted and the farmer received so much assistance that his condition was in reality most favourable. In the event of a bad yield his liabilities were largely reduced or altogether remitted, and if any disaster overtook him, he could count on assistance from his feudal chief. There is a case on record of compensation paid to a farmer whose horse had perished. In fact, it may be truly said that the taxes levied in that era included a payment on account of insurance against disaster. On paper the sum levied from agriculturists seemed very large, but in fact it was comparatively small. This system of rent-free farming lasted for 10 years, by which time it was fully expected that tenant farmers would have grown rich. But no improvement having been effected in their condition, the system was extended for another decade. Still at the end of 20 years the desired end seemed as far as ever from attainment, and another extension of 10 years brought the nation to the second year of the *Meiji* epoch, when the total futility of Mizuno's methods having been recognised, it was determined to restore the land to its original holders. But when that came to be attempted, the secret of the failure stood exposed. Instead of farming the areas allotted to them rent free, tenants had sold the privilege to some one else, and the latter in turn had resold it, so that in the course of 30 years the land had changed hands so often that great hardships would have resulted from any resolute attempt to restore the original titles. Under these circumstances a compromise was effected, on the basis that the former landlords should lose one half of their property and the tenants a similar amount. Then Mr. Mutsu (afterwards Count Mutsu) suggested a complete alteration of the taxation system by assessing all the land for taxation purposes, granting it in fee simple to its holders, and levying a per-centage of the taxable value by way of State impost. The fiscal advantages of that system being fully appreciated, it was adopted. But much disturbance resulted, and finally Kido and Okubo, acting in cooperation with Okuma and Yamagata, advised a reduction of the national tax from 3 to $2\frac{1}{2}$ per cent. of the value of the land, together with a reduction of the local tax from a maximum of $\frac{1}{3}$ to $\frac{1}{4}$ of the national tax. Something very like rebellion was thus avert-

ed. At present the farmer's condition is generally said to be better than it was before the Restoration. But that is a mistake founded on mere figures. It is true that the amount of taxes nominally paid is smaller. But there is no longer included in the payment any insurance against lean years or other disasters, and, moreover, the farmer, side by side with a more expensive manner of life, has to bear responsibilities on account of military service, of education and of sanitation such as he never shouldered previously. It is a mistake to say, as some economists assert, that what he pays to the Government on account of his land is not a tax but a rent, since the land has been given to him in fee-simple. That was true at the time of the introduction of the *Meiji* system, but since then the land has changed hands again and again, and its present holders have paid heavily for it. Their burdens on account of it should be reduced, not increased, unless the country is resigned to seeing itself confronted by the old troubles of disappearance of small farmers, the supremacy of the large, and the gradual growth of the socialistic problem. Out of 35 million *cho* (100 million acres approximately) of arable land in Japan, only 5 millions are actually cultivated, and it is a fair assumption that if the taxes were smaller, a larger area would be brought under cultivation. That should be the aim of wise legislators.

Mr. Taguchi Ukichi, replying to Count Okuma, said that many points in the distinguished statesman's speech invited criticism, but that he should defer comment for the present. What he should like to hear the Count explain was his view as to the application of the present increased rate of land tax. Should it be applied to naval increment or to educational purposes?

Count Okuma declined to answer, on the ground that these questions involved a political discussion.

NAVAL INCREMENT.

Prince Konoye probably reflects the mental attitude of numerous Japanese—though not, we imagine, of the majority—when he declares himself undecided about the question of naval increment; that is to say, undecided in the sense of being unwilling to pronounce a decision. Many prominent men, seeing that other issues are connected with this matter, have deliberately taken their seats on the fence, with the apparent intention of remaining there until the result of the dispute becomes discernible. The Prince carefully avoids any definite pronouncement as to the wisdom or unwisdom, the necessity or the superfluity, of naval expansion. But he objects to being assailed with arithmetical arguments about displacements, armaments and complements. Apparently the only tangible point made by him in a discourse with a representative of the *Chiuo Shinbun*, is that without a competent personnel ships are of no use, which truism sounds very like an evasion.

Prince Konoye utters one notable opinion, however; namely, that it is a mistake to rely on the land tax only, and that the present method of collecting income tax in Japan is quite defective. The tax-payer is virtually left to declare the taxable amount of his income according to his own pleasure, for the only machinery provided by law to check his statement is never put into operation, and can not, in the nature of things, be really efficient. The yield of the income tax, under such circumstances, is glaringly out of proportion to the incomes on which it is levied.

POLITICAL GOSSIP.

It is alleged that the Committee of the *Seiyu-kai* showed recently some hesitation as to whether the Party's attitude should not be limited to opposing the continuance of the increased rate of land tax, instead of denouncing the scheme of naval increment also. Undoubtedly the association of the two things makes a difficulty for politicians desirous of ousting the Katsura Cabinet. Many Japanese, probably a majority of them, recognise that their country can not safely arrest its naval progress. If Japan halts where she is, and limits herself merely to maintaining her navy at its present strength, she will find herself outclassed by more than one Power, a few years hence, in her own waters. The premium for insuring one's national goods and chattels is enormously high now-a-days, since all the great States in the world are competing to raise it; but it has to be paid, whatever the cost. The Japanese probably recognise that necessity, and every far-seeing party politician shrinks from identifying himself with the cry of "hold, enough," heard in some quarters. Therefore the *Seiyu-kai's* Committee would like to oppose the land tax only, finding some other source of revenue for purposes of naval increment. That is the view attributed to Marquis Ito and Count Okuma. The *Nippon* goes so far as to publish what professes to be an exact copy of questions addressed by Marquis Ito to the Committee. They are based on the hypothesis that naval increment is inevitable, and that unless funds be obtained from the land tax, they will have to be obtained by postponing certain productive enterprises—notably railway building—and suspending many local improvements, which measures of retrenchment would probably render the *Seiyu-kai* much more unpopular than would the Party's endorsement of the Cabinet's land-tax proposal. It is not possible to place any reliance on this statement of Marquis Ito's views: there may not be the smallest truth in it. But any one can see that the strength of the Ministry's position lies in the unwillingness of its opponents to avow themselves hostile to naval increment.

There are naturally many rumours about Marquis Ito. Whatever treatment he may have apparently received at the hands of the *Seiyu-kai* Committee, the public obviously declines to believe that he has lost control of the big party, and insists on regarding him as the central figure in any political complication that may occur. Undoubtedly the public is right, for there can be no successor to Count Katsura except Marquis Ito. The Marquis, however, has been hitherto a supporter not an opponent of the Katsura Cabinet. On what pivot can he now turn his back upon his sometime *protégés*? The answer given is that he has applied himself to discover a scheme of adjustments and postponements in the field of Governmental undertakings such as will render naval increment possible without continuing the present rate of land tax. Should the Ministry decline to entertain his scheme, then they must count on his opposition.

That, of course, is an obvious line of compromise. But does any one believe that Count Katsura, having publicly pledged himself to a certain programme, could now consent to modify it radically at the dictation of Marquis Ito? We fear that no such exit from the dilemma may be seriously anticipated.

The resolution adopted by the great meeting of *Seiyu-kai* politicians in Yonezawa on the 16th instant was this:—

Administrative reconstruction and financial reform are the chief objects contemplated by our Party, and a public promise to achieve them was given by the present Ministry to the Diet. Therefore this Party is determined to aim at the achievement of these objects, and to curtail administrative expenditures. We consider that continuance of the present rate of land tax and increase of the navy are opposed to those projects. We shall insist upon the carrying out of the resolutions adopted at our previous meeting and not yet put into practice. This meeting is unanimously resolved upon giving effect to the above resolution.

This resolution may be regarded as typical of the resolutions adopted by the Shikoku meeting and the Niigata meeting.

There is talk of forming a big people's party—*Minto Daidomei*—to oppose the continuance of the land tax and any further increase of national burdens. Some people profess to believe that this idea is entertained seriously by the leaders of the *Seiyu-kai* and the Progressists. We venture to call it veritable moonshine. Count Goto's *Daido Danketsu* of bygone days had far more sense, and the *Kensei-to*, which ended in such a miserable fiasco, was a rock compared with this new nebulous conception. There is always some hysteria in Japan at times of political excitement.

The representatives of the agricultural societies, who met in Tokyo on the 11th instant, passed a resolution calling upon the Government to reduce the land tax from $3\frac{1}{3}$ per cent. to 2 per cent. at the expiration of the five years term originally fixed as the limit for imposing the higher rate. Subsequently, through the exertions of the chairman, Mr. Mayeda Masana, they were induced to alter this so that it merely expressed confidence in the Government's adherence to its engagement as to the five-year limit. But some sixty of the members, dissatisfied with such a jejeune declaration, subsequently met at the Maple Club, and passed a brief resolution of dissent from any increase of the land tax. This led to the resignation of Mr. Mayeda, who claimed that the meeting had exceeded its functions. He was ultimately persuaded to continue his duties as president, but the incident has greatly injured the solidarity of the *Noji-kai*.

The various provincial branches of the *Seiyu-kai* continue to pass resolutions indicating a resolve to oppose the Ministry. All place in the forefront of their indictment the alleged fact that the Cabinet has failed to keep its publicly given promise of administrative re-construction and financial reform. Thus politics seem destined to revert to their old grooves of obstruction by pretext.

MEETING OF THE COMMERCIAL SOCIETY.

Baron Shibusawa told the Commercial Society, at its last meeting, that nothing struck him more during his recent tour through the United States than the economy of labour. He saw large districts under cultivation in accordance with the most approved modern methods, and their whole management was effected by a small station scattered here and there. At the Carnegie Steel Works, he found a vast plant of machinery, but the office of those in charge and direction was tiny and insignificant. Visiting Niagara, what surprised him was not the magnificence of the falls but the skill displayed in utilizing their force for industrial purposes. One plant of machinery where a

power of 105,000 horses was developed, had only 24 hands to manage the whole concern, whereas in Japan 6 or 7 people are employed at an engine producing 900 horse-power.

Certainly Baron Shibusawa could not inculcate any more useful lesson. The waste of energy in Japan is enormous. In nearly every department of industry or business the employers are vastly too numerous.

Of course the Baron remarked that the relations between employers and employed are not very satisfactory, and that trouble; some strikes are numerous.

In England what Baron Shibusawa observed chiefly was the self-reliance and self-respect of the industrial and commercial classes, and the great value attaching to business probity. In those respects no other country, he thinks, can compare with England. One consequence is that all work undertaken by Englishmen is done in the most thorough and conscientious manner, and that they can be absolutely trusted to carry out their agreements. It is not without reason that they have stood first in the world of commerce for so many years. As to the question, which nation should the Japanese take for model, Baron Shibusawa urged that much might be learned from both. Japan needed nothing more urgently than to imitate the self-respect, self-reliance and integrity of the English. But she might also learn useful lessons from the enterprise and organizing capacity of the Americans, with the proviso that these qualities occasionally betray people into acts not altogether praiseworthy.

The Baron concluded an interesting speech by telling his audience that they must not forget the fields of enterprise lying near at hand. There is a strong temptation to visit countries like England and America, where so much that is novel may be seen, and whence a man carries home a certain prestige merely for the sake of his travels. But in Far-Eastern Asia many opportunities offer which claim the best attention of the Japanese.

Mr. Sato, Japanese Representative in Mexico, spoke at the same meeting. He dwelt on the remarkable progress made by Mexico during the past forty or fifty years—progress not unlike that recorded in Japan's case. Half a century ago the country had been crippled by debts, but owing to the skilful financial management of President after President, it had virtually shaken off its burden and was now in a condition of marked prosperity. With a population of 13 millions, it has 15,000 kilometres of railway, and it exports 130 million dollars' worth of products annually against 60 millions of imports. Immense sums of foreign capital had been invested in the development of the country—800 million dollars of United States' money and as much more from England, France and elsewhere. The Government made every possible effort to encourage foreign investors, granting them the privilege of land ownership and subsidizing railways built by them. Mr. Sato called attention to the fact that Japan sends only 150,000 *yen* worth of goods direct to Mexico, and that Mexico sends her virtually nothing in return. Of course some Japanese products find their way to Mexico *via* Europe and America, but the quantity is not large. There can be little doubt that this state of affairs is capable of remedy. Mexico is deficient in coal and has to import cloth, silk fabrics and many raw materials from Europe and America. Careful examination would probably show that a share in this trade offers to Japan.

THE AUTUMN MANŒUVRES.

The autumn manœuvres came to an end on the 13th instant. Victory rested with the army of invasion, it is said, but the decision of the umpires has not yet been publicly announced. The Emperor addressed a short rescript to the troops. He expressed himself satisfied with the proficiency they had shown, and urged that the utmost diligence should be employed in order to keep up with the rapid progress of the era. His Majesty conferred twenty Orders on the foreign military attachés, the Chinese receiving ten, from the Second to the Sixth; the Koreans, three, also from the Second to the Sixth; the French, two, a Third Class and a Fifth Class; the Italians two, of the Fifth Class; the Russians, one, a Fifth Class; and the Germans, two, a Fourth Class and a Fifth Class. On the 14th an entertainment was given at Kumamoto in the afternoon, the march-past having taken place in the forenoon. The Emperor left Kumamoto on the morning of the 15th instant, and was to spend the night at the residence of Prince Mori of Choshu, remaining there throughout the 19th and receiving from Field-Marshal Marquis Yamagata a detailed account of the Shimonoseki engagement in 1863. On the 17th, His Majesty is to proceed to Maiko and spend the night at the residence of Prince Arisugawa, going on to Shizuoka on the 18th, and re-entering Tokyo on the 19th at 3.15 p.m.

At the entertainment given in Kumamoto on the 14th instant after the conclusion of the Autumn Manœuvres, wine-cups were presented by the Emperor's order to 2571 persons. Each cup carried the inscription *shimbu* (to promote martial spirit). The Emperor seems to have taken cold during the manœuvres. His Majesty was suffering from slight fever at the time of the entertainment.

Posthumous rank was conferred on Nabeshima Naoshige, the former feudal chief of Saga, and on Kuroda Yoshitake, feudal chief of Chikuzen in the time of the *Taiko*.

PRIVATE CLAIMS IN CONNEXION WITH THE BOXER OUTRAGES.

The *Niroku Shimpō* gives a list of the principal claims preferred by Japanese subjects in connexion with the Boxer outrages:

	Yen.
Mitsui Motonosuke	240,000
Abe Hikotaro	184,000
The Specie Bank	190,000
The Murai Company	150,000
Takenouchi Saikichi	150,000
Ito Hikotaro	130,000
Higuchi Chuichi	63,000
Yamada Keisuke	53,000
The Tobu Bank	24,000
Tanaka Tanekichi	20,000
The Legation Officials	60,000

There were other minor claims, the whole aggregating $2\frac{1}{2}$ million *yen*, which total was reduced to 1,400,000 *yen*, in round numbers. But the reduction was not applied uniformly. Discrimination was exercised—an obvious necessity, seeing that some folks assessed at several hundreds of *yen* the old clothes they were wearing, and others charged thousands for the suffering inflicted by a spent bullet. There are always sundry Don Pacifico's pillow-cases in such a list of claims, but there is not always a fleet to enforce payment or a Palmerston to devise justification.

THE PROPOSED BANK OF CHINA & JAPAN.

From the outlines of next year's Budget recently published in these columns, our readers doubtless understood that the Cabinet proposes to establish a Bank of China and Japan with a capital of 10 million *yen*. Count Okuma, according to the *Chingai Shogyo Shimpō*, has made some critical remarks about this scheme. He says that before such a project is carried out, the story of the Specie Bank should be carefully considered. The Specie Bank has been doing business for twenty years, with a large measure of Government aid. It has branches or agencies in all the principal open ports of China, and it has endeavoured to secure any business offering there. Yet it has not succeeded in making the enterprise profitable, and if official assistance ceased and the Bank of Japan's connexion were withdrawn, the undertaking would be speedily abandoned. People say that the proposed Bank of China and Japan would give accommodation to enterprises which are not within the range of an ordinary bank's transactions. But what kinds of enterprise could a bank assist with a capital of only 10 millions? As to the anticipated probability of large sums being deposited by Chinese clients, it is, to say the least, extremely doubtful, and with regard to the idea of issuing paper-money the experience of other banks in China shows how little reliance can be placed on that project. There are folks who say that the proposed Bank of China and Japan is to be a rival of the Russo-Chinese Bank. But the Russo-Chinese Bank was established for the purpose of financing the Trans-Asian Railway, and it enjoyed the privilege of receiving a State deposit of 100 million taels. It is evidently absurd to suppose that a bank with a capital of only 10 million *yen* could make head against an institution like the Russo-Chinese Bank. Count Okuma admits that he too regards the establishment of a China-Japan Bank as necessary, and that his criticisms are directed solely against the method proposed.

THE "JIMMIN" AND THE GERMAN SOLDIERS.

Monday, Nov. 17.

If, as may fairly be presumed, the aim of a respectable newspaper is to publish correct intelligence and to avoid misleading its readers, the *Jimmin* certainly does not furnish a brilliant example to the journalistic world. About a month ago it published a detailed story in which turbulent conduct of the most reprehensible character was attributed to five German soldiers travelling by rail to Yokohama from Kobe, and the railway authorities were bitterly condemned for permitting such licence. Dr. Mansfeld, of the German Naval Hospital, under whose care the men were coming to be placed, took steps to investigate the matter, and was able to demonstrate conclusively that not only had the journey of the five soldiers been absolutely unmarked by any incidents of the nature related in the columns of the *Jimmin*, but also that, on the contrary, the relations of the soldiers with their fellow-passengers had been of the pleasantest character, even to sharing with the latter the provisions carried by the men. Dr. Mansfeld's letter of contradiction was published in this journal, and we naturally supposed that the *Jimmin* would lose no time in correcting the injurious slander which it had been the means of circulating. The *Jimmin*, however, took no

notice whatever of the contradiction. What is more, we have since ascertained that Dr. Mansfeld's letter was sent to the *Jimmin* also, but to this day it remains unpublished. The *Jimmin* is believed by the public to be the political organ of an important section of the *Seiyū-kai*. Whether that be the case or not, the journal undoubtedly ranks far above the level of a yellow gutter-sheet. Yet, judging by this recent occurrence, our Tokyo contemporary's canon appears to be that to disseminate a falsehood and to refuse correction even when clearly convicted of error, is less injurious to a journal's reputation than to frankly confess a mistake such as may easily be committed by any newspaper. The *Jimmin* was misled by an informant who had either invented a malicious slander, or—which is much more likely—had himself been the victim of misrepresentation or misconception. No journal is secure against accidents of that kind. Their frequent occurrence would certainly tend to impair a newspaper's reputation, but their cumulative effect must be very exceptionally large in order to equal that of even one act such as the *Jimmin* has now perpetrated. The Liberal organ must be said to have deliberately allied itself with slanderers and to have purposely lent its columns for the circulation of libels designed to create an anti-foreign feeling in the country. It may seem to our readers that we devote undue space to this affair. But if such falsehoods are suffered to be circulated with impunity by leading journals, the ultimate results may be distinctly mischievous. Besides, it seems to us that there is here a question of journalistic immorality so flagrant as to be worth detailed notice.

Friday, Nov. 21.

The *Jimmin* writes in a vehement strain about the matter of the German soldiers who were accused through its columns of behaving rudely and violently in the train during a journey from Kobe to Yokohama. It will be remembered that Dr. Mansfeld, of the German Naval Hospital in Yokohama, to whose care the men were consigned, made strict inquiry into the case when the *Jimmin's* original accusations were published, and finding that the soldiers, so far from behaving roughly, had been on the friendliest terms with their fellow-passengers with whom they shared their provisions, he wrote to this journal denying the charges. Subsequently he addressed the *Jimmin* also, but the latter refrained from publishing his letter. Surprised that our contemporary should adopt a course so manifestly unjust, we commented strongly on its deliberate suppression of Dr. Mansfeld's letter, and our comments have now elicited a rejoinder which is chiefly remarkable for its rudeness to Dr. Mansfeld. The *Jimmin* speaks of him as "a person called Mansfeld;" professes to be entirely ignorant who he is; wants to know what business he has to meddle at all in the matter, and declares that a hundred Mansfelds and a thousand *Japan Mails* can not shake the testimony on which its original criticisms were based. Of course we do not expect a journal like the *Jimmin* to be fully informed about the personality of each foreigner in Japan. It might have been excused at first for not knowing who Dr. Mansfeld is. But having received Dr. Mansfeld's letter and card, the *Jimmin's* ignorance ceases to be accidental and becomes intentional, and the rudeness of its present language towards that gentleman assumes the

complexion of a deliberate insult. For our own part, we do not, and did not, ask the *Jimmin* to abandon its beliefs in deference to evidence furnished by Dr. Mansfeld or to comments made by the *Japan Mail*. We fully recognise our contemporary's right to appraise the quality of any testimony available, and to form its ultimate opinions accordingly. But, as a matter of the most elementary journalistic etiquette, we expect it to give publicity to both sides of a case, and to refrain from vilipending a responsible officer because, in the due discharge of his manifest duty, he defends the soldiers under his charge against public accusations which he believes to be unfounded. It is a notable fact that whereas the *Jimmin's* original article commented very severely on the action of the railway authorities in tamely suffering Japanese passengers to be maltreated by foreigners, and in illegally allowing a few German soldiers to monopolise the whole of a compartment in the train, violently expelling any Japanese that attempted to enter—it is a notable fact that in the face of these flagrant proceedings, not the least complaint was preferred to the Railway Authorities by the sufferers, as has been established by subsequent inquiries. We can not profess to admire our Tokyo contemporary's heroic vituperation, or to think that, whatever unintentional effect its language may have in inflaming anti-foreign sentiment, the attitude it has taken in this matter will tend to enhance foreign appreciation of Japanese justice.

MINING IN WESTERN AUSTRALIA.

The Report of the Western Australia Department of Mines for 1901, which has just come to hand, shows no falling off in the mineral productiveness of that region. On the contrary, we are able to note a general increase in values, though in several instances the balance is the other way. While the total mineral output for the year 1899 had not previously been exceeded, that for the year 1900 showed a falling off in value of £167,906, while the value of the output for 1901 exceeds by £1,098,064 that of the year 1899. Though the value of the gold output shows the largest increase, the value of the output of all other minerals but lead and tin has substantially increased.

Taking gold first, we find that the output of 8,879,391ozs. for the year 1901 is the highest recorded, exceeding that for the year 1899, the highest previously recorded, by 235,514ozs., and showing an increase of 298,441ozs.; nearly 19 per cent. as compared with the output for 1900. The value at the mines of the 1900 yield was calculated at £3 16s. per ounce and came to £6,007,610, while that of 1901 was taken at £3 17s. per ounce and amounted to £7,235,653, the increase in value being thus £1,228,043. Tin shows a falling off of £16,702; coal of quantity but not value, the latter showing an increase of £13,726; lead and mica similar though insignificant discrepancies in values. The increase in value at the mines of copper raised was £31,573; ironstone had an increase of £3,988 and precious stones and silver exported showed increases of £1,000 and £4,000 respectively. The volume contains reports from the mining districts and a number of interesting maps.

FOREIGN TRADE OF CHINA AND JAPAN.

Some years ago the fact that the volume of Japan's foreign trade was growing at a much more rapid rate than the volume of China's trade, attracted some attention; but even when the figures were observed, no one seemed disposed to imagine that Japan would soon overtake China in this matter. The overtaking has very nearly been accomplished, however. Last year, the total volume of China's exports and imports was 437,959,675 Tls., or 547,449,594 yen, approximately. During the same year the corresponding figure for Japan was 508,166,188 taels. The difference is insignificant. It is certainly a very striking fact that whereas Japan's record twenty years ago (1881) was only 62¼ million yen, it has now grown to 508 millions—an eight-fold increase. We may also note that whereas Japan's foreign trade now amounts to 12 yen per head of her population, China's is less than 1¼ yen. But there is a strong probability that, if peace can be preserved and if the building of railways be continued in China, her foreign trade may make rapid strides during the next few years. It is an interesting fact that the comparatively large body of foreign merchants engaged in China's trade seem to find their account in a business representing only a slightly larger monetary total than that of a business on which a much smaller foreign community grows lean rather than fat in Japan.

"JAMES."

Amateur acting has its limitations and so has its criticism. A certain canon of gratitude forbids the critic to say what he really thinks. He must praise whatever is praiseworthy, sometimes even what is not praiseworthy, and he must turn his pen from everything blameable. Therefore he deems himself fortunate when, as is the case in this Settlement, several amateurs may be frankly discussed in terms of unstinted applause, without any reserve of suppression. From that point of view we desire to add a word to our comments on last Wednesday's performance. That word is simply that we have never seen the family butler so well played on any stage as it was played by Mr. Aslet. "James" figures in a great many farces, and always his part is most erroneously counted of minor importance, whereas in truth a faulty representation mars the whole realism of the piece. The amateur's "James" is usually a person who takes care to make his simulation evident. Refusing to become frankly a domestic servant, he retains in his capacity of butler traits of manner and styles of address which palpably differentiate him from the part he is playing. In short, he parodies the servant instead of representing him. But Mr. Aslet's study of "James" in "Confusion" was absolutely free from every blemish of that nature. It is impossible to conceive a more genuine butler. Nothing altered the uniformly deferential self-suppression of his manner. Even when alone with his wife and child, or when discovered by his employers in compromising situations, his fidelity to the servant's model remained inflexible. The value of his contribution to the general success of the farce is one thing. We are not speaking of that. Our tribute of sincere applause is offered to Mr. Aslet's butler as a histrionic achievement.

THE YUNNAN SYNDICATE.

The concessions obtained from China by the Anglo-French—or perhaps it would be more correct to say Franco-English—syndicate appear to be of a most important nature. At the recent statutory meeting of the shareholders, the chairman, M. Achille Adam, gave the following account of the matter:—

The concession grants to our syndicate the right to exploit the mines in seven counties or districts of the Province of Yunnan, which territory covers an immense extent, and comprises copper, gold, silver, coal, iron, platinum, nickel, and tin mines, as well as petroleum, precious stones, and quicksilver. The districts specified may be exchanged for others to be chosen by ourselves should they be found not to be sufficiently valuable, or should prove unsuitable. This is extremely important, because it practically offers us the whole province as a field for prospecting. It further gives us the right to construct railways, canals, and roads, which we may require in the course of our developments. The immense value of these rights, situated as they are in a province which has been well-known as a large producer of minerals for a considerable period of time, is assured. * * * * To give you an idea of the number of mines which have been worked or are still working in this territory, which forms part of our concession, I may tell you that Mr. Rocher states that there are 59 such mines, of which 27 are silver, 25 copper, six gold, and one tin. I do not include in these figures the number of iron mines, nor the number of mineral outcrops which have been located, but which so far have not been worked by reason of want of capital. I might add that at Koutsiou the recognised outcrops extend for about 50 miles, upon which are worked some 60 tin mines, as well as silver and copper. Mr. Rocher, referring to these in his report, states:—"I will not say that all these mines, which were before the rebellion in great prosperity, are susceptible of being exploited successfully by Europeans, but in any case many are rich, and the major part of them were abandoned, because the methods employed by the Chinese were of such primitive description; but a great many of them could, by European treatment, be again brought into active operation. Besides which, there are in the extent of our concession a number of deposits discovered since peace has been restored, and worked by individual people or by small local companies, whose capital did not extend beyond £80, and once this small capital was expended, the work was abandoned." Mr. Rocher states that, before the rebellion, in copper alone the province exported to the central Government 2,400 tons per annum. I may further add that one deposit of tin within our area employs something like 30,000 workmen, and produces between 1,500 and 2,000 tons of tin per annum.

What greatly enhances the value of the concession is that the district concerned will be traversed by a railway which the French Government has commenced to construct from Laokai to Yunnan-fu. As for the royalty that the syndicate will have to pay to the Chinese Government, it can not be called excessive. In the first place, there will be deducted from the gross profits all the working expenses, including customs duties, rent and taxes; then 8 per cent. will be set aside as interest on capital; then 10 per cent. for a sinking fund and 10 per cent. for a reserve fund, after which subtractions, 65 per cent. of the remainder will go to the Syndicate, 10 per cent. to the local government and 25 per cent. to the central government. The period of the concession is 60 years, with the option of a 25-years' extension. China may be said to have completely effaced herself in Yunnan.

NEW-ZEALANDERS.

Some one has been kind enough to send us a marked copy of the *New Zealand Times*, and from the notes he appends we gather that some very severe comments on the New-Zealanders have his approval as altogether true. Thus the New-Zealander proper is said to be the most narrow-minded, ignorant being on the face of the earth, "and also

to be quite persuaded that there is no other part of the world where a white man knows anything. The great industry of the islands is horse-racing." "There is usually a meeting on Tuesday, Wednesday and Saturday every week, ten months in the year, with pony race, hack race, trotting race, or a coursing match between." "Children are fairly healthy, up to three or four years of age, after which they go as they please—eat all day long, no regular meals, seldom in bed till 10 or 11 o'clock at night. The boys smoke cigarettes, and generally loaf. The girls are out to any hour at night by themselves, or with another. The other night I was late at a board meeting, and on my way home, about 10 o'clock, I met scores of girls, and one in particular, about seventeen years old, was leading home a young fellow, not more than twenty, if that, and he was as drunk as possible. Girls of seventeen or eighteen often frequent the opium dens of Chinamen, especially if they happen to have been in Sydney." The editor of the *New Zealand Times* dismisses all this as "modern burlesque," and indeed we ourselves are disposed to regard it in that light. But our correspondent calls it all true.

THE OUTLOOK FOR SILK.

Mr. Franklin Allen, Secretary of the Silk Association of America, in writing on the outlook for silk in the season of 1902-03, remarks that the new season's crop promises to be a plentiful one, while prices will be fair. Notwithstanding the greatly increased supply of Japan raws in the season just closed, the best estimates promise fully as large a crop for the new season. Estimates from Europe indicate a crop of Italian raws fully up to last season's supply despite the fact that prices of cocoons in Italy have averaged higher than for a number of years past. Estimates on the crop supply from Shanghai are based on a diminished output of 25 per cent. from last season. However, the supply from China always increases surprisingly when prices in Europe and America are relatively high. The supply of raw silk from Shanghai in the season just closed was 1,330,000 pounds more, or say, 16 per cent. greater than in the previous season, and the supply of Canton silk was 390,000 pounds more, or, say, 9 per cent. greater. Doubtless the American consuming market, which absorbed raw-silk materials at steady and fairly remunerative prices, had its effect on the supplies from China as well as from Japan. The world's supply of raw silk in the past five seasons, and in the present silk season (estimated), is as follows:—

	£		£
1897-98	31,135,565	1901-02	37,865,127
1898-99	31,812,378	1902-03	(estimated). 35,809,979
1899-1900 ..	36,964,528		
1900-01	35,600,000		

NOTES ON CURRENT EVENTS.

The Buddhist relics presented by Siam to this country last year have become a source of keen dispute among the Buddhists. After a sum, estimated at 150,000 yen, had been expended in arranging a worthy reception for the bones, it was decided that a shrine wherein to place them should be built in Kyoto. But this decision evoked strong opposition on the part of the people of Nagoya, who claimed that their city had special titles to the honour. Ultimately Nagoya won the day, and it was resolved that the relics should be sent thither on the 15th instant. At this

stage the friends of Kyoto played their last card: they appealed to the law, and have now succeeded in obtaining an injunction which temporarily stays the transmission of the relics to Nagoya. The dispute is unsightly. It demonstrates that the possession of the relics is regarded, not as a sacred trust, but as a useful means of making money. Meanwhile Siam has injected a comical element into the battle by sending word to the Buddhists of Japan that it is really regrettable to witness such a fracas, and that more relics can be sent at any moment if that will placate the disputants. This subtle suggestion that even in the matter of saintly bones the supply varies with the demand, should appeal to the Buddhist priests' sense of humour.

The Buddhist relics have at length found their way to Nagoya. They left Kyoto on the 15th instant. That the persons who desired to keep them in the latter city could not effect their purpose was owing to impetuosity. The court of law to which they appealed required them to put up a sum of twenty thousand *yen* by way of security for the relics, should the latter be temporarily assigned to their custody, but they failed to find the money, and thus the relics departed from Kyoto amid the sparkle of fire-works and other demonstrations. They were met at Nagoya by many personages of more or less distinction, including the Siamese Representative in Tokyo, and it would seem that the occasion was celebrated enthusiastically.

Among the names of passengers by the O. & O. mail steamer *Doric* on Saturday will be observed the name of Mrs. J. F. Lowder, who goes to England for good. A large number of foreign residents from Tokyo as well as Yokohama assembled on the Pier to bid her good-bye. Mrs. Lowder, who was the eldest daughter of the late Rev. S. R. Brown, D.D., (whose *Life*, written by Dr. W. E. Griffis, has just been published) arrived in Japan with her father in 1859 from America and has therefore spent forty-three years in this country. Married to the late Mr. J. F. Lowder, who was a stepson of Sir Rutherford Alcock, and at that time a member of the British Consular Service, Mrs. Lowder had opportunities of exercising wide influence in the foreign community, and it is not too much to say that there are no local institutions or undertakings for benevolent purposes which do not owe great part of their usefulness to the efforts of this amiable and kindly lady.

Last February the Department of Education appointed a committee of five educationists: Professors Tsuboi, Jimbo, Mitsukuri, Noguchi and Yamazaki, to compile a vocabulary of transliterated names of persons and places for use in the Normal Schools, the Middle Schools and the High Female Schools. The result of the Committee's labours has now been published in the *Official Gazette*. There is not much to be said about it. Doubtless different experts will find different points to criticise or condemn in such a list. The method of transliterating names has always been more or less capricious, and the Committee's labours are not without evidences of the members' special theories. But what is wanted in such matters is not perfection of system but uniformity of method. When we find ourselves confronted by an assemblage of *kana* syllables intended to represent a foreign name, it becomes a matter of paramount necessity, first, that we should be able to identify the origi-

nal name, and, secondly, that the combination of syllables should not prove, on examination, to embody some arbitrary expansions or abbreviations tending to render identification difficult. Such objects are at once achieved if we have a standard syllabus of transliterations serving for purposes at once of reference and of model. In that sense we welcome the result of the Committee's labours. Whether it is good enough to be adopted finally, we do not pretend to judge. That must be a matter not of individual opinion, but of the amount of credit attaching to the competence of the members of the Committee. Looking at their names, we believe them to be thoroughly competent, and we trust that their recommendations will be accepted and endorsed without reserve.

The question of child labour, which is beginning to give Japan food for thought, has become a topic of public discussion in South Carolina. Examination shows that the state has in its mills about 1,900 children under twelve years of age, which means that one-fourth of the cotton-mill employees are of tender age. This discovery throws some philanthropic people into a condition of hysterical excitement. They call themselves "champions of helplessness," and they denounce the children's employers as "vampires of commerce." One newspaper editor declares that he has "seen the poor little pallid faces, the hopeless eyes, the pinched foreheads, where he could fancy the brains withering and drying up under the horrible monotony and sickening atmosphere." But many other folks ridicule this talk as unreasoning sentimentalism, and declare that the children are employed in light-work departments; that they are treated kindly; that there is no discontent among them, and that they are as cheerful and full of mischief as average children wherever found. It is impossible to know where the truth lies, but the difficulties of acquiring facts and of legislating in such a matter are well illustrated by the controversy.

The latest theory is that there was a connexion between the comparatively cold weather in Europe last summer and the volcanic eruptions in the Antilles. Many people, when the atmosphere becomes exceptionally and unreasonably sultry, torment themselves with apprehensions that an earthquake is about to arrive, which theory seems to have no more rational basis than the fact that the teachings of Christianity have educated in human minds an instinctive tendency to associate evil things with heat. The theory of Mr. Combes about last summer's temperature, is not of such a fanciful character. He holds that the configuration of the Gulf Stream's bed was greatly affected by the volcanic eruptions—and indeed soundings taken in the Caribbean Sea and the Gulf of Mexico support his view—and that, consequently, the volume of heated water in that ocean river having been altered, there was a corresponding alteration in the amount of heat given out by it. It is true that the influence of the Gulf Stream upon the climate of Europe has begun to be denied by many men of science, who hold that such a factor is altogether insignificant compared with the effects of prevailing winds. But M. Combes declines to admit that reversal of ancient beliefs.

The police have become the objects of some criticism. It appears that on the 16th instant H.H.H. Prince Kanin boarded the train at Suzume-no-miya in Tochigi prefec-

ture, *en route* for Kuki. There was only one first-class carriage and in it eight foreigners were riding. The guard asked these foreigners to transfer themselves to a second-class carriage in order to give the compartment to the Prince; but they declined to do so. The matter being reported to the Prince, he replied that a second-class carriage would suit him excellently. Accordingly, the train proceeded with the Prince and his suite in a second-class carriage and the eight foreigners in a first class. This spectacle, the reason of which they did not understand, seems to have greatly perturbed the Tochigi police. They telegraphed instructions to Urawa to have the guard arrested, and when the train reached that place, the guard, to his profound astonishment, found himself promptly hand-cuffed with ropes on a charge of lese-majesty. Of course an explanation speedily followed and the man was released, but the police are hearing some unpleasant comments on their officiousness.

The Emperor, during his day's stay at the residence of Prince Mori of Choshu, inspected the Shimonoseki Forts and witnessed artillery practice there.

Count Katsura is still undergoing medical treatment in Kumamoto. His condition is gradually improving, his temperature being nearly normal and the pain in his stomach having disappeared. His return to Tokyo will be deferred, however, for a little time longer.

The *Official Gazette* of the 18th instant announces an issue of exchequer bills to the amount of 10 million *yen*. Applications will be received up to the 25th inst. at the Bank of Japan, and the bills will be redeemed by the 30th April, 1903.

The Emperor arrived in Tokyo yesterday by the 3.15 train, and was met at Shimbashi by the Empress.

Major-General Fukushima left Bombay on the 10th instant for Japan. He is now convalescent.

The *Kobe Herald* gives the following account of the improvements which the Japanese Government will ask the Diet's consent to carry out at Kobe:—

The plan as approved in Tokyo provides for the construction of two wharves near the two small breakwaters off the Customs enclosure at Ono. These wharves will follow much the same direction as the present Kobe pier and the smaller of the two will be 1,080 feet long. This pier will be of iron and will extend in a southerly direction from the westernmost breakwater. The space between this breakwater and the sea wall is to be reclaimed and this will give an additional area of some 5,000 *tsubo*. The pier will be 90 feet wide and both sides will be available for ocean-going vessels. The eastern structure is to be a breakwater 3,000 feet in length and 180 feet in width, covering an area of 10,000 *tsu'o* approximately. On the western side of this breakwater a wharf 960 feet long will be built. The branch railway will be carried down to both these piers, as well as to the present pier. There is only 27 or 28 feet of water at the positions selected for these wharves but it is intended to increase this by dredging. There can be no doubt that this scheme, if carried out expeditiously, will go far towards meeting the requirements of the port and add enormously to the facilities for the rapid and economical handling of both inward and outward freight. Moreover it has this advantage: it fits in with, amplifies and completes existing arrangements, as the two additional wharves will serve as an extension of the plan already in operation under the able and successful management of the Kobe Pier Co. With the construction of a large breakwater at Ono 3,000 feet long, there will be very few occasions when foreign mail and passenger steamers will be delayed here by boisterous weather.

THE CABINET AND THE PARTIES.

THE movement of political parties against the Cabinet continues to develop force and to increase in dimensions. Up to the present the position may be said to have been uncertain. Opposition to the continuance of the increased rate of land tax was tolerably universal, so far as party politicians were concerned; but their attitude toward naval increment did not exhibit the same unanimity or directness. Count OKUMA, and presumably his followers, did not consent to the land-tax project, but they were willing to endorse the programme of naval increment provided that some other source of revenue could be devised for the purpose. Several of the *Seiyu-kai* members were understood to entertain similar views, though many, apparently a majority, declared themselves frankly unfavourable to any increase of armaments. The reasons of this partial opposition were not difficult to appreciate. No party is willing to associate itself openly with a refusal to add to the strength of the Navy. That is where the KATSURA Cabinet's adroitness becomes apparent. If the nation clearly understands that Count KATSURA is driven from office by opponents of naval increment, his return to power at a later date with an overwhelmingly strong mandate, may be regarded as practically assured. It is therefore all-important that no political party, solicitous about its own popularity, should place itself unequivocally upon an anti-increment platform. On the other hand, the KATSURA Cabinet has managed matters so cleverly that its existence is unreservedly staked on the solitary issue of naval increment, the proposed continuance of the land-tax rate being reduced to a subordinate position. If the proceeds of the land tax, or any portion of them, were to be devoted to purposes independent of naval increment, then land-tax and naval increment might be differentiated, and the public might be invited to pass judgment on the two issues separately. Count KATSURA, however, has taken good care that no such differentiation shall be possible. He has made it absolutely clear that no idea of continuing the present rate of land tax would be entertained did not the necessity for naval increment present itself imperatively. Thus party politicians are confronted by the dilemma of having to sacrifice the naval-increment scheme and the continued-land-tax project upon the same altar. The question of keen interest is how a way of emergence from that dilemma can be found. That question has now been answered. Within the past few days three important meetings of *Seiyu-kai* sections have been held: one at Yonezawa—the *Tohoku* section of the party, representing, if we are not mistaken, eighteen prefectures—; one in Shikoku and one in Niigata. The *Tohoku* meeting was attended by over a thousand persons and Messrs. OZAKI YUKIO and HARA KEI were the principal figures, while the Shikoku meeting had for its chairman Baron

SUYEMATSU KENCHO. All three meetings passed resolutions which, though differing slightly in diction, were essentially uniform. In every case emphatic opposition to the present Cabinet was announced, and in every case the warrant for opposition, placed at the head and front of the resolution, was the eternal issue *gyosei sasshin zaisei seiri*—reconstitution of the administration, reform of finance. This question has been before the country ever since the first Diet met. Never a Cabinet has held office during the past eleven years that has not been roundly charged with neglecting its duty, violating its pledges and disappointing the country in the matter of *sasshin seiri*. If the *Seiyu-kai* come into office next month, there is no better chance of their achieving success, or even seriously attempting to achieve it, in these two respects than there is of the present Ministry's achieving it. The nation must understand that perfectly. Yet it is upon this obsolete issue that the opposition of the *Seiyu-kai* has now to be based. Every one must comprehend the disposition of the *Seiyu-kai* to oust the KATSURA Cabinet and to occupy the seats of power itself. That is all right. It is human nature, and particularly political human nature. But when the *Seiyu-kai* leaders do take the administrative reins into their hands, Japan's well-wishers had hoped that the unique spectacle of a Cabinet supported by a substantial and homogeneous majority in the House of Representatives, would mean a protracted period of office-holding with all the advantages of stability and strength. What reasonable expectation is there that anything like long life will await a Ministry which has to flog vitality into a dead horse in order to get carried to the places of power? According to appearances Count KATSURA's present defeat will prelude a signal victory and the life of any Cabinet succeeding his will be short.

THE KAISER'S VISIT TO ENGLAND.

"THE TIMES," according to a telegram in the *Asahi Shimbun*, denies that the visit of the EMPEROR of Germany to England has any political significance, and declares it to be a matter of pure friendship. That is certainly the wisest line to take. The temper of the British is much exasperated at present against Germany. It is an unpleasant and unwelcome fact, but concealment is out of the question. The German nation showed itself deeply unfriendly to England throughout the Boer war; so unfriendly that even the commonest principles of justice ceased to be respected, and not a word would our Teutonic cousins hear from the side against which their prejudices had been excited. The war, however, presented aspects which might well appeal to people romantically disposed—as, for example, the French proverbially are—to espouse the cause of the weak against the strong (though, the Boers entered the struggle with the conviction that they

themselves were the stronger). One might hope, therefore, that after the sword had been sheathed, the German nation would soon come to take a less partial view of the facts. But the restoration of the old *entente* has been again deferred by the Berlin Cabinet's action in the matter of the Yangtse Valley. There are, it is true, some Germans who deny that England has any right to view that action as unfriendly. It is in strict pursuance, they say, with the policy she has always professed, since it aims at keeping the Yangtse Valley open to all nations. Yes, certainly, that is its nominal aim. But the argument is not even remotely ingenuous, and to discuss it would be mere waste of time. Had Germany sought England's co-operation before inviting China to give pledges about a region where British influence was admittedly paramount, the situation would have been radically different. All this is so palpable that to suppose it obscure to the Germans would be to insult their intelligence. They have shown themselves adepts in the use of that particular adroitness which can always be exercised at the expense of a friend, and nothing now remains except to hope earnestly that these evil days are over, and that time will commence its healing office as speedily as possible. If the KAISER went to England, as the telegraph originally announced, for the purpose of showing the British people that they were mistaken in their estimate of his country's mood, he would have perpetrated a blunder foreign to his remarkable acumen. The British would have justly resented the notion that the honour of a passing visit from a European Sovereign should suffice to efface the deliberately unsympathetic acts of his Cabinet. But coming merely as a friend, the KAISER has doubtless received a friendly welcome, and very possibly many a Britisher who cheered the great monarch's progress through the streets of London, went home with a softened sense of Anglo-German relations. We entertain that hope, believing, as we do, that Germans and Anglo-Saxons are natural allies in the camp of humanity.

A JAPANESE STATESMAN.

SOMETIMES the utterances of prominent Japanese politicians are very remarkable: they seem to be made not only without any consideration of responsibility, but also with indifference to the existence of stenographers and a newspaper press by which such speeches are carried beyond the ears of the petty audiences immediately addressed and are brought to the hearing of the whole nation. One of the most notable of these utterances was that of Viscount WATANABE, on the occasion of his leaving office in the spring of 1901. It would be difficult to over-estimate the injury he inflicted on the national credit by his want of statesmanlike reticence, and if he achieved the feat of being the

first Minister of Finance in history to inform the world that his country was on the verge of bankruptcy, it was notoriety not fame that the achievement brought him. Similar criticisms apply to a speech said to have been made recently by Mr. OZAKI YUKIO, formerly a leader of the Progressists and now a prominent member of the *Seiyu-kai*. Mr. OZAKI is a born fighter. He has taught the public to expect belligerent declarations when he gets on his feet, but as he is always clever and eloquent, his martial mood seldom becomes offensive. Just now, the atmosphere being redolent with the savour of a coming contest, Mr. OZAKI naturally stands forth conspicuous. He has been saying extraordinary things. One is that before undertaking naval increment, it is essential to determine the national policy—whether it shall be a policy of war or a policy of peace. If war be the resolve, then every nerve should be strained and every financial sacrifice made to strengthen and augment the national armaments. But if a pacific policy is to be chosen, then—so we understand Mr. OZAKI to say—there is no occasion for any more ships or any more troops, and to add to the existing establishment would be merely to excite the suspicion and provoke the hostility of other Powers. Did Mr. OZAKI, before making such assertions, pause to think whether any Power in the world openly adjusts its armaments to an aggressive standard? Could any Power hope to enjoy a moment's tranquillity if it invited the nations to interpret its procedure in such a light? If the statesmen of Japan obeyed Mr. OZAKI's precepts, the empire would soon find itself in a parlous condition. The masses may reasonably expect a different kind of instruction from persons professing to supply political light and leading. Besides, Mr. OZAKI's utterances appear to betray ignorance of the principle that governs national armaments in this twentieth century. He speaks as though a large armament must necessarily be an aggressive weapon, whereas in truth it is simply an insurance against the aggression of others. States purchase their peace now-a-days by spending big sums upon their navies and their armies. That an empire should be strong enough, first, to defy attack, and, secondly, to protect interests essential to its integrity—that is the sole legitimate aim of armaments, and that is now their recognised aim. Does a statesman show either wisdom or patriotism when he tells the world that every ship added to his country's fleet, every battalion added to her army, is to be construed as an increase of deliberately offensive force? Nothing could be more mischievous and ill-judged. It is well known that Mr. OZAKI advocates an *entente* with Russia. He would have preferred a Russo-Japanese alliance to an Anglo-Japanese. Naturally we differ from him in the latter point, but as to the former, we fully endorse him. There is no moral reason why Japan and Russia should not frankly agree upon a line of policy which would guarantee the permanence of their

friendship in Asia. England would certainly welcome such an agreement. But in the meanwhile it should be evident to Mr. OZAKI and to all other publicists that the way to qualify for an alliance or an *entente* with a great Power is to be a worthily potential partner or friend. If Japan rests on her oars now; if she allows herself to think that her efforts in the past suffice and that she may henceforth relax them, she will very soon find that the descent from her hardly won position among the nations is a rapid business. We hope that she will not be so short-sighted, and that a question of vital national importance will not be subserved to party politics. On a previous occasion that danger was barely escaped: the Government's first project of naval increment, presented to the Diet nine years ago, encountered party opposition on the flimsy pretext that the statesmen in office could not be trusted to carry out the programme. History is repeating itself as usual. Mr. OZAKI YUKIO was one of the most prominent and vehement opponents of the first scheme of increment. He adopts the same attitude now towards the fourth. We should like to see him succeed in his policy of an *entente* with Russia, but in the interests of his country we sincerely trust that neither the motives nor the methods he advocates in the matter of armaments will ever find favour with a Japanese Ministry.

THE RAILWAY LOAN.

IT is alleged by the *Nichi Nichi Shimbun* that the Government has decided to abstain from introducing the proposed bill for facilitating the raising of foreign capital on the security of railways. Our contemporary assigns as a reason for this resolve the nature of the conditions required by British capitalists, and the unwisdom of making every required amendment of the law. A reason of that kind would be quite intelligible if British capitalists asked for some exceptional alterations of existing laws. But they do not ask for anything of the sort. What they want is what they would have in England, nay, even less than they would have there. Our information goes to show that the attitude of the capitalists has been marked throughout by the greatest moderation and fairness. Naturally they are unwilling to lend money on conditions which would not be acceptable in any country; but they declare their readiness to be satisfied if the security can be made reasonably available. For the sake of Japan's development it is to be sincerely hoped that this affair will not be abandoned after so much trouble has been taken and so much attention attracted. There is absolute necessity that cheap money should be obtained somewhere, unless the country's material progress is to be slow and halting. So far as concerns the amount actually in question—twenty-five million *yen*—its effect could not be very marked. But the point is that if this initial step be suc-

cessfully taken, it will prove the prelude to many similar transactions. The British public are shy about lending money to Japanese on any security other than that of a Government guarantee. They regard loans to private borrowers as distinctly perilous. That atmosphere of doubt would be at once dissipated if eminent financiers like Baring Brothers set an example of trustfulness. With a firm of that stamp leading the way, others would follow unhesitatingly, and not only would British capital be quickly brought within easy reach, but also the effect on Japanese securities in general could not fail to be wholesome. If, on the other hand, the project be abandoned now after such wide notice has been attracted, and if its abandonment be ascribable, as it will be ascribable, to reluctance on the part of Japanese statesmen to legislate in accordance with the English pattern, then it is plain that new force will be added to existing doubts about the possibility of financial transactions with Japan. In fact those doubts will be converted into convictions, and the difficulty of obtaining foreign capital will be greatly increased.

THE OSAKA AFFAIR.

A MASS-MEETING has been held in Osaka for the purpose of "demonstrating" the sentiment of the citizens with reference to the question of a supply of gas for the city. It is unnecessary to recapitulate the facts of this case: they are already quite familiar to our readers. We observe, however, that a Yokohama English journal, commenting on the meeting, says:—

Stripped of all glamour of unessentials, we see that the Municipality granted a right to the Company, and now seeks to withdraw it, contrary to the first principles of law. This mass-meeting is merely encouraging the proposed lawlessness, and that it should be unanimous only indicates to us an extraordinary inability to grasp the meaning of "law," or an extraordinary willingness to be led by false guides. These words were evidently penned in ignorance of some important facts. It is erroneous to allege that the Osaka Municipality "granted a right to the Gas Company," and that it "now seeks to withdraw the right." What really happened has been very clearly explained by the Mayor of Osaka. The Osaka Gas Company applied, in the first place, to the Governor of the City, who does not represent the Municipality and who has no title to grant any final permission for using the streets and roads of the city. The application (presented on February 18th, 1899) contained the words:—"It will be necessary to lay iron pipes in the ground and along the sides of the streets of the Osaka city and the neighbouring roads * * * It is requested that the above may be approved" (*Osaka shigai oyobi sono kinjo no dōro chichū mata wa karwa ni tekkan wo fusetu sezarū wo yezu * * * migi no gi on kiki-oki ai-nari-taku*). To this the Governor of Osaka made answer on July 1st, 1899:—"The petition is approved and the following provisions must be observed * * *

(1) Application for permission must be made, and it must be accompanied by a map, by a written statement of details of work and by a plan. * * * * Before sending in this application the Osaka City Authorities must be consulted (*negai no ken kiki-oki sôrôjô tsugi no kajô wo mamoru beshi* * * * I. * * * *sumen, oyobi kôji shiyô-gaki sekkei-zumen wo soye negai-ide kyoka wo uku beshi* * * *negai-izuru maye* (*Osaka-shi to kyôgi wo nasu beshi*), XIV. "Even after the gas-pipes are laid, the company may at any time be required, at its own expense, to change their position or to remove them altogether should such a step be deemed necessary in the public interests" (*gas-kan fusetsu-go to iyedomo kôyeki-jô litsuyô to mitomuru toki wa nandoki nitemo kaisha no hiyô wo motte kore wo iten seshime moshiku wa tori-harawa-shimuru koto aru beshi*.) These quotations make it plain that the Company merely obtained administrative sanction to take the preliminary steps of its enterprise, and that even such sanction was accompanied by a provision reserving the right to order alterations or removals of the pipes. Before pipes were laid, the Municipal Authorities had to be consulted. The Municipal Authorities and the Governor are distinct. It is not within the power of the Governor to grant to any company the definite privilege of using the streets and roads unless the consent of the Municipality has been obtained; and in consideration of giving consent the Municipality is entitled to demand some compensation for such use. At the close of 1901, the Company, having followed the routine prescribed above, obtained the necessary permission to lay pipes in a section of the city. The Municipality does not seek to withdraw that permission. What it claims is that permission to use the streets and roads in a part of the city can not be called permission to do so in every part of the city, and that when the Company seeks to have its privilege thus extended, it must be prepared to comply with the demands of the Municipality, made in the interests of the public. There is nothing "contrary to the first principles of law" in the position taken by the Mayor and endorsed by his fellow-citizens. We ourselves originally accepted the confident assertions of some of our local contemporaries that a charter had been duly granted to the company and that an illegal and unjust attempt was being made to alter its provisions. But the Mayor's statement puts the matter in a different light, and as his explanation was published some time ago in these columns, it ought to have been considered before the whole population of Osaka was accused of "extraordinary inability to grasp the meaning of law or extraordinary willingness to be led by false guides." The "false guides" in this instance appear rather to be the journalistic critics who pen such sweeping denunciations without taking trouble to master the facts of the case.

FOOTBALL.

The presence of H.M.S. *Goliath* in port enabled two games of football to be played on the Y.C. and A.C. ground on Saturday afternoon. The morning opened showery, but shortly after ten the clouds dispersed and brilliant sunshine predominated for the rest of the day, making matters almost ideal for footballers, despite the somewhat smart wind which prevailed at times. The Association match came off first. On opening Yokohama pressed, but the visitors retaliated by carrying the ball into the home territory and Waddilove was called upon to clear. After this play remained for a short space in the centre of the ground until Moss seized an opportunity to break away. Carrying the ball down the field he passed across to Read, but the latter sent the leather behind; a minute later Strome made a shot at goal with a similar result. Then the Navy collared the play again and pressed the home team hard for awhile, the goal being cleared with difficulty. They were not to be denied, however, and in the sequel of some rather wild play, Waddilove fell and Fergie kicked the ball through the posts. First blood for the Navy. This put the Naval men on their mettle and they made repeated dashes at the Yokohama goal only to be repelled in the nick of time. The combination of either side was far from perfect, though occasionally pretty bits of play were to be observed. At length Strome and van Smith got the leather and in the end Yokohama managed to score their first goal, equalising. Nothing farther resulted up till half-time. On change of ends Yokohama improved considerably, playing a more offensive game, though individual as opposed to combined play was still too conspicuous. Yokohama scored their second goal on a good pass from Read to Strome. The Naval men failed to score again, despite persistent effort and the whistle blew leaving Yokohama the victors by two goals to one. The teams were:—Y. C. & A. C.:—Goal, W. J. Waddilove; Backs, E. W. Kilby, A. W. S. Austen; Half-backs, A. R. Firth, E. G. Fradgley, W. B. Mason; Forwards, J. E. Moss, O. Strome, H. W. Kilby, A. W. Read, and K. van R. Smith. H.M.S. *Goliath*:—Forwards, Young, Wheeler, Fergie, Stringer, Bayley; Half-backs, Fackerel, Connor, Williams; Backs, Bay, Curtis; Goal, Green.

THE RUGBY MATCH.

Following the Association game, a match was played under Rugby rules between a fifteen of the Y.C. and A.C. and the officers of H.M.S. *Goliath*. The visitors displayed much the better combination as well as knowledge of the game, and they won by 14 points to 6.

The home team was:—Back, W. Goddard; $\frac{3}{4}$ backs, G. C. Allcock, F. O. Stuart, P. Mitchell, G. Hunt; $\frac{1}{2}$ backs, E. J. Moss, H. E. Hayward; Forwards, W. S. Moss, K. F. Crawford, F. Pollard, F. W. R. Ward, W. J. Waddilove, J. Cartwright, J. E. Moss, W. J. White.

In both matches Mr. J. H. Bathgate was referee.

In beginning to write these notes on the Rugby game I propose to deal first with what is, perhaps, the most important position on the field, namely the "half-back." Twenty-five years ago the "half" was the most important member behind the scrum, and he is just as important to-day. Formerly the "halves" were the men who did all the running and, as a natural sequel, the scoring, but now things have entirely changed. Nobody nowadays expects to see a "half" score a try, and there is really no opportunity afforded him unless it be when a scrummage is formed within a few yards of his opponents' goal line and he happens to get possession of the ball. Such an opportunity might occur but a true unselfish half-back if the ball comes out to him under the circumstances mentioned above should always pass out to that wing which is better likely to run in. And now we come to the most important thing that the "half" in these days is asked to do, and that is "passing." I am not now speaking of "passing" as between three-quarter and three-quarter, but only of "passing" as between the halves and the rest of the back division. It

is only 20 years since this passing came into vogue, and its development was mainly due to A. Rotherham, who showed that an unselfish half could be of invaluable assistance to the heavier and (probably) speedier three-quarters. And this passing of the half-back without a doubt brought about the introduction of four three-quarters which added still further to the responsibilities of the half. The half gets all the blame when things go wrong, and when things are going swimmingly he rarely gets his fair share of praise.

As to a half-back's necessary qualifications R. H. Cattell (English International) says:—"The most necessary qualifications for a half-back are quickness, unselfishness and pluck. At the same time a certain amount of weight is a great advantage; for behind losing forwards the half-back has a very hard time indeed. There is a tendency to play half-backs too light." I think none will doubt the soundness of these remarks, but since they were written (1896) the tendency has been, especially in the Scotch teams, to play heavier halves than formerly.

Now as to the play, and I will confine my remarks as far as possible. First I would say let the Yokohama halves learn the art of quick passing to each other; there is no use in a half getting the ball out of a scrum if he cannot part with it *instantly* to his partner if necessary, and yet I have never seen this done once in Yokohama. And in all passing let the half remember that mere direction in passing is absolutely fatal; he must look where he is going to throw the ball. Again, a high pass is likewise fatal; let him never pass the ball over his head, that is, at a height higher than himself, if he does it is ten to one the pass will be cut off by the opposing side. Hard and low is the motto for the half as regards passing.

In defensive play (hardest play of all for a half-back) bear in mind that the half must *never* stop the ball with his foot; the *only* way is to throw himself on the ball. The element of danger is much lessened if the half learns the art of throwing himself sideways on the ball, as it is silly to dive head first at the feet of the opposing forwards. It is enough for us here to keep to the old maxim "never pass in your own twenty-five." The Welshmen do it and so may we when we are as good as they are. Let the half who gets the ball in his own twenty-five *instantly* punt into *touch* and never up the open field.

Lastly in throwing out of touch, take a rapid look along the line before throwing; don't make up your mind as you go to get the ball as to whom you are going to throw it, the particular forward you are thinking of may not be in the position you supposed him to be when you come up to the line. Some halves are born not made but it is easy for a keen player to pick up wrinkles from a better player, and if our players here are quick to learn these little points when they see them, we shall not do so very badly in February.

OLD HEATHEN.

YACHTING.

Races for the King's Birthday celebration prizes, which were postponed from the 8th—or rather could not be brought off owing to lack of wind—took place on Saturday the 15th. There was a fine sailing breeze from the east which though moderate shortly before the races started freshened considerably in the course of the afternoon. The boats, however, were handicapped on the basis of a moderate wind.

The 39-raters class, in which there has been very little enthusiasm displayed latterly, ignored the affair, *Mary, Maid Marion* and *Golden Hind* going off on cruises.

In the other classes, however, the racing was capital—probably the best of the season, and though both wind and water were chilly everybody afloat thoroughly enjoyed himself. Six cruisers started and *Asagao* got first out of the harbour entrance, *Daimyo* close up. At the lightship she had established a considerable lead, and *Surprise* was close up on *Daimyo*. But by the time they reached the Honmoku Buoy *Daimyo* had overhauled the leader and got round that mark fifteen fathoms or so ahead of her. It

was a close reach back to the Lightship, and on this stage *Asagao* ran up on and passed the big cutter only, however, to be passed in turn on the run in to the harbour and home. *Surprise* came in seven minutes or so later than *Dainyo* and easily won the prize on her large allowance of 28 minutes. The trophy, which has been presented by Mr. Geo. D. Morgan, is a very fine piece of silver bronze. Following are the corrected times:—

	h. m. s.
<i>Dainyo</i>	3-55.30
<i>Molly</i>	3-56.03
<i>Mosquito</i>	4-09.30
<i>Surprise</i>	3-34.50
<i>Asagao</i>	3-44.45
<i>Virgin</i>	3-55.32

The raters had an exciting scurry over the same course for a handsome silver cigar tray presented by Mr. H. F. Arthur. Five boats started, but one (*Pele*) burst her mainsail in the race, being then in third place, and had to retire. *Edna* was first out of the harbour, *Pele* next but by the time they got to the buoy *Winsome* had taken second place. *Vixen* was close up and the four craft were almost on top of one another as they rounded. The sea that was running stood them up and down a good deal but they were all admirably sailed and nothing happened. Coming home *Winsome* assumed the lead, but the finish was very close *Edna* and *Vixen* crossing the line a biscuit's toss from each other at the windward end, while *Winsome* down to leeward just got her gun a few seconds earlier. *Stella*, however, with a big allowance of 30 minutes won the prize. Following are the corrected times:—

	h.m.s.
<i>Winsome</i>	4-06.46
<i>Edna</i>	4-07.00
<i>Stella</i>	3-14.14
<i>Vixen</i>	3-58.58

CHRISTMAS CARDS.

The cult of the Christmas Card grows with the passing years, to judge by the magnificent collection which Messrs. Raphael Tuck and Company have prepared for this year of grace. Seldom have we seen anything prettier, daintier, or more truly artistic in every way than these productions of this eminent firm. And they are justified in their enterprise, for, as Sir Conan Doyle, one of the Directors of the Company, said at a recent meeting of shareholders:—"My strong opinion is that, as long as human nature is what it is, people will wish to greet each other either at Christmas or the New Year; of course, if they greet each other, to save time they will do it by cards, if they send cards they will probably send pretty ones, and if they are going to send pretty ones they are sure to go to Raphael Tuck and Sons." The firm this year have prepared 1,500 different sets of cards, 1,200 in colour and 300 in black and white. From such a huge variety it is difficult to make a selection, but we think it appropriate that the collection, which is known as "The Crowning Year," should open with a beautiful panel in colours reproduced from the original picture in the possession of His Majesty the King. This historic subject carries us back to the days of the first Royal Edward who placed the Coronation Stone in Westminster Abbey. We referred on a previous occasion to the beautiful Christmas panel of St. John and the Lamb, and need only say here that it will be sure to be treasured by all lovers of things beautiful. Children's story-books, Father Tuck's delightful Annual—a never ending source of delight in all happy nurseries;—Calendars of all sorts, among them some capital sketches from Dickens, and amusing Ping-pong caricatures, lovely flower designs, scenes from the dear home land, from the works of Shakespeare, Tennyson and the poets; from Holy Writ, etc., all go to make up a collection which for variety and wealth of colour, originality of design and subject, surely reaches the high-water mark in Messrs. Raphael Tuck's glorious history.

YOKOHAMA LITERARY SOCIETY.

A very enjoyable evening was spent at the Van Schaick Hall on Friday by members and friends of the Yokohama Literary Society. After a pianoforte duo brilliantly executed by Miss Elsie Blundell and Mr. W. K. Vincent, the latter read a paper which he entitled "To Norrøway." It appears elsewhere in this issue. The paper was illustrated by some beautiful lantern views. Beginning with some of the famous men of Norway, including a clever skit on Ibsen by Phil. May, some of the more striking coast scenes of Norway were next thrown on the screen; these were followed by views of glaciers, lonely mountain tarns, the curious phenomena of the midnight sun, the *aurora borealis*, etc., all of which were shown in their proper colours. The lecturer was loudly applauded at the close. The second part of the programme was devoted to music by Norwegian composers and needless to say, under Mr. W. K. Vincent's admirable conductorship, it went splendidly. In Mrs. Hunter the Society welcomed a new violinist among the ranks of Yokohama players; her opening essay, a serenade by Olsen, was very pleasingly given, winning well deserved applause. Miss Vincent and Mrs. Irwine—the latter really supplying the place of another singer at very short notice—have seldom been heard to better effect. Mrs. Doering's contributions were very acceptable; while the closing Octette was one of the prettiest compositions we have heard at the Society's gatherings. The next meeting, owing to the St. Andrew's Ball falling on the proper date, is now fixed for December 5th, when the Rev. Walter Weston will speak on Alpine Ascents and Adventures. We append Friday's programme:—

PART I.

Pianoforte Duo... "Peer Gynt Suite," op. 46... Grieg.
(a) Dawn. (b) Anitra's Dance. (c) Peer Gynt's Flight.
Miss Elsie Blundell and Mr. W. K. Vincent.

"TO NORRØWAY"

(From North Cape to Christiania); illustrated by
Stereopticon Views,
Mr. W. Karl Vincent.

PART II.

Pianoforte Duo... "Peer Gynt Suite," op. 55... Grieg.
(i) Ingrid's Lament. (b) Arabian Dance.
(c) The Storm.

Miss Elsie Blundell and Mr. W. K. Vincent.
Song..... "Last Eve"..... Kjerulf.
Miss Vincent.

Violin Solo..... "Serenade"..... Olsen.
Mrs. W. Scott Hunter.

Song..... "Solveig's Song" (Peer Gynt)..... Grieg.
Mrs. E. C. Irwine.

Pianoforte Solo..... (a) "A Finnish Song"..... Engelberg.
(b) "Spring," op. 32, No. 3..... Sinding.
Mrs. J. G. Doering.

Octette (Vocal)...
"Norwegian Peasant's Bridal March"..... Söderman.
Mrs. Irwine, Mrs. W. K. Wilson, Miss E. B. Leach,
Miss Vincent, Messrs. E. T. Nicholas, S. F. Unite,
E. W. Kilby and S. H. Somerton.

THE PLAGUE.

The City Authorities desire to acknowledge receipt of the following sums contributed in aid of the poor people evicted in connection with the outbreak of plague in Yokohama:—

	Yen.
F. Schroeder, Esq.	5
Imperial German Vice-Consul W. Hagen...	10
E. H. Hobart-Hampden, British Pro-Consul	15
China and Japan Trading Co.....	100
H. Klingens, Esq., Netherlands Consul.....	25
Ferris Seminary	25
Marquis C. Nembrini de Gonzaga.....	10
Pierre Bure, Consul-General de Belgique...	10
Count Arco Valley	10
Hauptmann Madlung	13.50
Mr. H. Richter	5
Mr. H. Ivison	5
Mr. R. Bleifus	5
A. S. Rosenthal & Co.	50.00

Nov. 23rd being a national holiday known as the Nii-name-sai (festival of the rice harvest), the event will be duly celebrated at the Palace and elsewhere.

FIRES IN YOKOHAMA.

An outbreak of fire took place on Tuesday evening in that part of the Club Hotel annexe which was the old billiard room of the Yokohama United Club, when it occupied its former premises. Part of this detached building is used as a baggage room, but the main part where the billiard tables stood has been in only partial use. It was in the latter that the fire started shortly before seven o'clock. The alarm was quickly given and this first outbreak was speedily quelled, but immediately fire was discovered at the other end of the same building. This also was successfully tackled and as we go to press there seems to be no further danger. The damage can not be serious.

About 7 o'clock on Wednesday evening fire was found to have broken out in a godown, or shed, on Lot No. 211, occupied by Messrs. Hunt & Co. The building was a wooden construction with corrugated iron roof, and was used, we understand, for the storage of coal, charcoal and empty tea boxes; with servants quarters attached. The fire is supposed to have broken out in the servants' quarters, but in a very few minutes the entire building was in a blaze, the fabric and contents being very inflammable. The Yokohama Fire Brigade and the police fire engines were soon on the scene, and with a fairly good supply of water from neighbouring hydrants and an engine, the flames were very quickly suppressed and limited to the one building. Had a neighbouring three-storeyed building caught fire the loss would have been very considerable. Before 8 p.m. the fire was practically extinguished though streams of water were played upon the burning debris for some time after. The first alarm caused considerable excitement amongst the insurance men, who have recently been so hard hit. The loss in this case, however, should be small.

An alarm of fire was given from No. 32, Water Street on Thursday evening. The premises, which are occupied by Japanese, were saved by the energy of the occupant's neighbours who put out the incipient blaze with buckets of water. The damage was slight.

The goods salvaged from the late fire at No. 185 were sold on Wednesday by public auction by Mr. John W. Hall, who had an immense audience to oppose each other, with the result that the total sum realized was over 80,000 yen, which must be most gratifying to the insurers. The crowd was so great that the street was absolutely impassable.

LAUNCH OF THE "NIITAKA."

The *Niitaka*, a third class cruiser of 3,420 tons, 9,400 horse power and 20 knots speed, was launched at Yokosuka on the 15th instant. The Empress, accompanied by the chief officials of the Court and maids of honour, left the Palace at 9.30 a.m. for Shimbashi, whence Her Majesty took a special train for her destination. At the Yokosuka Station, where she arrived shortly before noon, the Empress was received by Admiral Baron Inouye, Commander-in-Chief of the Yokosuka Admiralty, and his subordinate officers; while a salute of 21 guns was fired from the 14 war-ships now at that port. After taking tiffin in the building of the Admiralty, the Empress proceeded to the scene of the launch at 2.20 p.m., escorted by Admiral Baron Yamamoto, Minister of the Navy, and other dignitaries. At the appointed hour 3 o'clock, the launch of the *Niitaka* was accomplished under the direction of Mr. Kurobe, Chief of the Shipbuilding Yard, upon whom fell the duty of starting the cruiser from the slip. The ceremony over, the Empress retired to the Admiralty and then left Yokosuka by the 4.10 p.m. train for Tokyo. Among those present were Prince and Princess Komatsu (junior), Prince and Princess Kwacho, Prince and Princess Nashimoto, some of the Ministers of State, Viscount Enomoto, Captain Hirayama, Principal of the Tokyo Navigation School, Mr. Watanabe, Chief of the Yokohama Chihō Saibansho, and others, over 2,000 in all.

LAW CASES.

JONES v. BENNEY.

Judgment was given in the Yokohama Ku Saibansho on Friday morning, by Judge Hasegawa, in the case brought by Mr. E. B. Jones, No. 179, against Mr. C. T. Benney, manager of Cobb & Co., No. 37, Yokohama, claiming yen 20. The Court dismissed plaintiff's case with costs.

HONGKONG AND SHANGHAI BANK v. HIOKI.

In the Yokohama Chiho Saibansho on Friday morning, before Judge Kano, was heard an action brought by the Hongkong and Shanghai Banking Corporation, No. 2, Yokohama, against Mr. R. Hioki, Bankruptcy Administrator in the estate of Messrs. Mourilyan, Heimann & Co., No. 35, Yokohama. Plaintiffs claimed from defendant recovery of yen 3,905.140, with five per cent. interest from June 13th this year until the execution of judgment. Mr. R. Masujima appeared for plaintiffs.

Mr. Masujima stated that about March, 1900, Messrs. Samuel Samuel & Co. made a contract with the Formosan Government for a camphor monopoly. Messrs. Mourilyan, Heimann & Co., were concerned in the monopoly indirectly, but subsequently were declared bankrupt. The bankrupt firm, in conjunction with Messrs. Samuel Samuel & Co., had applied to plaintiffs for assistance in the matter of depositing money with the Formosan Government as security for transactions in camphor. An arrangement was effected between the bankrupt firm and the Hongkong and Shanghai Bank to the effect that the latter should, on the strength of credit of Messrs. Samuel Samuel & Co., grant security corresponding to one-eighth of the whole sum to be deposited with the Formosan Government, the money supplied by the bankrupt firm to Messrs. Samuel Samuel & Co. having amounted to yen 226,250 in all. With this money Messrs. Samuel Samuel & Co. purchased Formosan Undertakings loan bonds which were deposited with the Formosan Authorities as security. In view of this, yen 3,905.140 now claimed by plaintiffs from defendant was not such as to be included in the estate of the bankrupt firm. The above sum was interest (at the rate of seven per cent.) on yen 226,250 above referred to. This money was first paid by Messrs. Samuel Samuel & Co. to the Hongkong and Shanghai Bank in April this year and by mistake the money was transferred to the bankrupt firm. In consequence plaintiffs claimed the recovery of the money.

Mr. Hioki urged that in accordance with Arts. 81 and 91 of the Code of Civil Procedure the money paid by a bankrupt firm, while the latter was adjusting accounts, ought to be recovered and on this contention he asked the Court to dismiss the plaintiffs' case.

The Court, after consultation lasting for half an hour, announced that the proceedings would be postponed until Nov. 24th.

JOVANSSEN v. CLUB HOTEL.

In the Yokohama Chiho Saibansho on Tuesday afternoon, before Judge Kato, the hearing was resumed of the suit brought by Mr. Adolphe Jovanssen, formerly manager of the Club Hotel, against the Club Hotel Ltd., of Yokohama, claiming over yen 18,000 damages on account of his sudden dismissal from the post of manager. Mr. Ideura appeared for plaintiff and Mr. Sawa for defendants.

At the outset of the proceedings the Judge asked Mr. Sawada why he (Mr. Sawada) brought with him Mr. de Becker to act as interpreter in the case. To this, Mr. Sawada replied that he should like to conduct the proceedings through the medium of Mr. de Becker, whose interpretation was second to none. The Judge, however, announced that so far as the circumstance of the present affair are concerned the Court would not allow any person other than Court interpreters to act and therefore Mr. de Becker was ordered to retire. Mr. Matsuda, Court interpreter, was then called to officiate.

Mr. George William Lewis, an Englishman residing at No. 66, in the former Settlement, Yokohama, was examined as a witness.

In response to the Judge's questions, the witness said:—I lived in Hongkong in 1893 for three months, namely from March 21st to about the 20th of June. But I am not sure as to the dates. I visited Hongkong more than dozen times altogether. I first visited Hongkong in November, 1890, and my last visit to that port was in July, 1901. As my visits were connected with business transactions I did not remain there for a long time. I sometimes stayed there for a week and sometimes a day only. I first came to Yokohama in February 11th, 1895, but I did not remain here all the time. I once went to England and had been at various places in China, at Kobe, etc. I can't say exactly.

Asked by the Judge as to whether the witness knew Mrs. Clyde, he replied:—I know her a little. I was acquainted with her for a little while. Only for a week or so. I first met her at the Club Hotel.

The Judge asked whether the witness if knew that Mrs. Clyde had ever been in Hongkong. To this, the witness replied in the negative.

Asked further by the Judge, the witness said: I don't know what business Mrs. Clyde had been pursuing in Yokohama formerly. As to the story that Mrs. Clyde was once a concubine I know nothing directly.

The Judge—What is meant by the word "directly?"

The witness replied that he had heard the above story by hearsay. The Court here announced that the further hearing would be conducted with closed doors.

On the Court reassembling Mr. Ideura criticised the evidence given at a former hearing by Mrs. Jovanssen and produced documentary evidence of various kinds in favour of his client.

Mr. Sawada said he wished to prove that Jovanssen entered the employ of the Grand Hotel immediately upon leaving the Club Hotel and it was arranged to call Mr. Eppinger as a witness on December 2nd.

SARDA v. BOISREGON.

In the Yokohama Chiho Saibansho on Thursday afternoon, before Judge Kato, the hearing was resumed of the suit, adjourned from Oct. 30th, brought by Mr. P. Sarda, No. 84, against Mr. A. Boisregon, legal representative of Messrs. R. Chauvin & Co., No. 250, Yokohama, claiming yen 368.465 with five per cent. interest from March 28th 1901, until the execution of judgment. Mr. Ishiura appeared for plaintiff and Mr. Akiyama for defendant.

Mr. Tsuda Urakichi, Japanese contractor for engineering work, of Ogimachi, Yokohama, was examined as a witness. He stated that he was not concerned in any way with repairing the interior of the building on lot No. 176, which defendant left on July 31st, 1901. It was Yabe Kunitaro who was concerned in the work.

Mr. Morris, of Messrs. Bieber & Bro., No. 176-B, was next examined as a witness. He gave various evidence as to the condition prevailing in the interior of the building, a sketch produced by the plaintiff's Counsel being referred to. He then said that he occupied the building from 1890 to about June, 1894, during which period no change was made on any portion of the house, only one room having been papered.

It was arranged to call as a witness Yabe Kunitaro at the next hearing and the case was adjourned until Dec. 4th at 10 a.m.

AMERICAN TOPICS.

The United States have the honour of recording in their favour the first award made by the Arbitration Tribunal at The Hague. It was a question relating to the Mexican Government's liability on account of a claim preferred by the Archbishop of San Francisco, and the sum involved amounted to \$1,420,682 (gold). The tribunal consisted of Professor Martens of St. Petersburg; Lord Justice of Appeal Sir Edward Fry; Professor Asser, a Dutch jurist; Drs. Lohman and Matzeer of Holland. It is now expected that the tribunal will be invited to pronounce

upon the liability of Russia in connexion with the seizure of several American sealing and whaling vessels on the high seas and the confiscation of the ships and their cargoes in 1891 and 1892; and afterwards upon the Samoan claims against the United States, Germany and England for losses caused by the bombardment of Samoa in 1899, in the sequel of Chief Justice Chambers' decision that Malietoa was the rightful King. It is plain that The Hague Tribunal is to play a great part in settling international disputes.

Contrary to popular belief, education is not at a standstill in the Southern States, but it is making marked advancement. The last census reports show that the percentage of Southern children who can read and write has increased in the last decade an average of 7 per cent., and in Louisiana, Georgia and South Carolina the average increase amounts to 10 per cent.

Miss Helen Roosevelt Roosevelt, whose engagement to Theodore Roosevelt Douglas Robinson was recently announced, has just come into possession of property in New York estimated to be worth more than \$1,000,000. Miss Roosevelt has just attained her majority. She inherited the property from her mother, who was Miss Helen Astor, daughter of William Astor. Both Miss Helen Roosevelt Roosevelt and her fiancé, who is the son of Douglas Robinson, are relatives of President Roosevelt.

Mrs. Gertrude Atherton is dramatizing her unique biography of Alexander Hamilton, which amused the public and disconcerted the critics for a long time after its publication. The play will be produced by Charles Frohman, who considers the character of Hamilton singularly well fitted for stage purposes. Mrs. Atherton is in Copenhagen, where she is writing the play. The California novelist has also been asked to write a play of old mission days in California for production in London.

State reports have become so voluminous and expensive in Massachusetts that a commission has been appointed to supervise, edit and compress them in the interest of economy. President Roosevelt is endeavouring to produce a similar reform in the Federal departments at Washington. Secretary Cortelyou has written, at his direction, to the head of every executive department on the subject, saying: "The President thinks there is much useless matter and a large number of un-necessary and expensive illustrations included in many of the reports and documents published; that many are issued at great expense which accomplish no practical good, and that there is too much public printing generally." Abuses of this kind are prevalent in almost every State in the Union.

A well-known expert on standard works of art recently received an offer of a large fee to go to the United States to value and criticise certain collections of wealthy Americans. He asked to be excused, and the real reason for his refusal, he explained privately, was the fact that "if I gave my honest opinion I would seriously offend my clients as well as certain well-known London dealers." In other words, it is notorious that immense quantities of worthless or spurious "art treasures" have been unloaded on wealthy American collectors, especially during the past two years. It is even said by those who ought to know that Morgan, Walters and Widener are the only ones among the large purchasers who have not been badly victimized.

A teacher in an American school recently received the following letter: "Sir,—Will you in the future give my son easier some to do at nites? This is what he's brought hoam two or three nites back. If fore gallins of bere will fill thirty to pint bottles, how many pints and half bottles will nine gallins of bere fil? Well, we tried and could make nothing of it at all, and my boy cried and laughed and sed he didnt dare to go back in the morning without doing it. So I had to go and buy a nine gallin keg of here, which I could ill afford to do, and then he went

and borrowed a lot of wine and brandy bottles. We fill them, and my boy put the number down for an answer. I don't know whether it is right or not, as we spilt some while doing it. P.S.—Please let the next some be in water, as I am not able to buy more here."

A brief history of the Great American coal strike which has now happily come to an end is opportune. It began on May 15, and is supposed to have involved 145,000 workers. The union demanded twenty per cent. increase in pay, an eight hour day for men employed by the day, and 2,240 pounds should constitute a ton. Upon the continued refusal of the operators to grant these demands the mining regions became the scene of repeated riotings, incendiarism, and murderous assaults on non-union men and mine guards. From \$3.35 per ton the price of hard coal increased to \$25, and with the famine at its height the President called a conference of the parties to the strike at Washington, October 3. This conference was fruitless, but on October 11 eventually successful negotiations for a settlement began with a visit by Mr. Secretary Root to Mr. J. P. Morgan at New York. Two days later Mr. Morgan laid before the President the offer of the operators to leave the dispute to a commission which was appointed by the President and accepted by the mine workers' leader on the 16th. The cost of the strike is estimated at \$142,500,000.

The annual convention of the American Street Railway Association is to be held this year in Detroit, and in anticipation of the event the *Street Railway Journal* has made a special interurban electric railway edition of the October number, with particular reference to Detroit as the centre of one of the most important systems in the Middle West. Detroit is connected by electric railways with Port Huron on the north, a distance of seventy-five miles, and with Toledo and Cleveland, O., on the south. Besides, the west lines extend from the city with only one slight break to the shores of Lake Michigan. One Detroit company controls an interurban system embracing a total mileage of 301.15, while a total of 401.15 miles of interurban electric railroad terminates there. Detroit is, in fact, one of the oldest interurban electric railroad centres in the United States. These lines are operated at rates of speed ranging from twenty miles to fifty miles an hour, and their trains carry special kinds of freight as well as passengers, in successful competition with the steam railroads. One of the special features of the lines operated inside the city is the issuance of workmen's tickets, which are good between the hours of 5.30 and 7 a.m. and 5.15 and 6.15 p.m. These are sold at the rate of eight tickets for 25 cents—practically 3 cents a trip.

"The Mineral Resources of the United States," just issued by the American Geological Survey, credits California with the production of 8,786,330 barrels of petroleum in 1901—an increase of 4,461,846 barrels over 1900, or 103.18 per cent. This is a much greater increase in quantity than any other state in the Union, Texas following with an increase of 3,557,619 barrels, though the percentage of Texas' increase is greater than that of California. The total output of the Texas fields last year was 4,393,658 barrels, or about one-half that of California. Ohio led all states last year, with West Virginia second and Pennsylvania third. The value of California's output in 1901 is placed at \$4,974,540, or \$0.566 per barrel, as against an average value of \$0.943 per barrel in 1900. The average value of the oil for the whole country last year was a fraction over 95 cents, as against \$1.19 per barrel in 1900. A bulletin on the production of petroleum in Russia and America says that since 1897 Russia has produced more petroleum than the United States, last year the output in Russia being 85,000,000 barrels, and in the United States 68,000,000 barrels. The facilities for handling the large Russian product are at present crude, costly and wasteful. The markets are far away from the production. It is said that three and one half barrels of oil equal one ton of Russian coal, which is high-priced and inferior in quality.

The irregular supply and the fluctuating price interfere with the sale of larger quantities of fuel oil in the great interior of Russia. During 1900 Russia produced about 17,800,000 short tons of coal, the higher grades of which sell for from \$7 to \$9 a ton. During the same year the United States produced about 270,000,000 short tons of coal.

The influence of good sanitation on the general health of a community is notably illustrated in the death rate record of Massachusetts. A recent report of the State Board of Health shows that of 1892 the death rate there was 20.8 per 1,000 in population, while in 1901 it was only 16.8. In the first five years of the decade the average death rate was 19.7; in the second five only 17.6. But there are some still more remarkable indications of the improvements produced by sanitary and medical science. Consumption claims more victims in that State than any other disease. In 1852 the death rate from consumption was 39.7 per 10,000. This has been steadily reduced until in 1901 it was only 17.5, and the rate is still falling. Then, again, the number of deaths due to typhoid fever is only one-fourth what it was half a century ago. Diphtheria, which was also formerly among the most malignant of the diseases prevalent in Massachusetts, has been stripped of much of its malignity since 1895 through the application of anti-toxin treatment, while the victims of scarlet fever, whooping cough and puerperal fever have been reduced one-half in fifty years, and the fatality of cholera infantum has likewise been diminished.

The annual report of Rear-Admiral Bowles, Chief of the Bureau of Construction and Repair, recently forwarded to the U.S. Secretary of the Navy, makes a plea for maintaining the equipment of the navy yards so that vessels may be built there. On this point Admiral Bowles says:—"This bureau is of the opinion that it should be the obvious policy of the department to so arrange navy yard plants that they should be efficient for shipbuilding, which is in reality one of the most important functions which they may be required to perform." In discussing the needs of the various yards, Admiral Bowles recommends the construction of a steel floating dry dock of the largest size at the Puget sound yard, saying that when the yard is amplified to the proportions contemplated one dock will be inadequate. He recommends various expenditures at Mare island, mainly in the way of batterments, which are included in the Secretary's estimates for 1904. Speaking of the need of slips for large vessels, Chief Constructor Bowles recommends that the block at Mare island now occupied by the new ferry slip and gatehouse, labor board, dispensary and fire engine buildings be utilized and these buildings be removed. He recommends building a slip for vessels 400 feet long, with a cantilever crane and runway, the whole to cost \$100,000. Up to July 1st, the end of the last fiscal year, the Union Iron Works was badly behind in contracts for the completion of naval vessels. In the construction of the battle-ship *Ohio* the firm was twenty-nine months behind time, armoured cruiser *California* was twelve months, armoured cruiser *South Dakota* thirteen months, protected cruiser *Tacoma* eighteen months, cruiser *Milwaukee* eleven months, monitor *Wyoming* nineteen months, submarine torpedo-boats *Grampus* and *Pike* fifteen months.

Mrs. Elizabeth Cady Stanton, so well known throughout the United States, died at 3 o'clock on the afternoon of Oct. 26, in her home, No. 250 West 94th street, New York. Mrs. Stanton was 87 years old.

The growing list of U.S. naval officers, who for one reason or another are anxious to quit the service has been increased by two through the tender of the resignations of Lieut. W. S. Montgomery, of the *Olympia*, and Ensign G. W. Ealler, who was recently detached from duty on the Asiatic station. Many of the recent resignations, it is said, have been due to dissatisfaction with the present conditions which the U.S. Navy Department is either unwilling or unable to explain.

THE CHRISTIAN DAIMYO.

CHAPTER XIII.

Negotiations between the Japanese and the Chinese. —Death of Ryusa, Konishi's father.—Death of the two brothers Ito.—Fall of Otomo Yoshimune.—Death of Gamo Ujisato.—Disgrace and death of Hidetsugu.—Conversion of the Governor of Kyoto's family, of Ota Hidenobu, of Kyogoku Takatomo, of the two sons of Tsugaru Tamenobu, of Kimura Shigetaka, of Hosokawa Okimoto and his nephew Tadatoshi, of Ukita Nobuzumi and of Akashi Kamon, of Asano Yukinaga, of Hachisuka Iemasa and of Terazawa.—New Embassies from the Philippines to Japan.

The Orientals possess in an unheard of degree the secret of dragging out affairs, even the most pressing. They therefore succeed infallibly, in their relations with Occidentals, in driving the latter to despair by the desperate slowness, which they apply to the conduct of their negotiations. But when two Oriental peoples are struggling with one another, the victory will indubitably be won by that one which will have been able to display the greatest total of inertia. This is what took place during the Korean expedition; the Chinese finally succeeded in ruining the Japanese by making them wait for years, before giving them a definite answer.

Some time after the departure of the Japanese from Seoul, the Chinese, at the instance of Konishi, had sent Jukeki, their delegate, to Fusan. This Jukeki was a cunning old gentleman, an adept in all the trickery of Chinese diplomacy, whose mission was rather to spy out the state of the enemy, than to conclude anything whatever. From Fusan, Konishi accompanied him to Nagoya, to which place the Taiko had returned, at the beginning of the year 1593. The latter, completely unable to understand the true state of affairs, received Jukeki as a conqueror, and as such personally dictated conditions to him. He required that a Chinese princess should be given to him in marriage; that the Japanese should be allowed to trade with China and Korea; that of the eight provinces composing this latter country, the four in the south should belong to the Japanese; and that, finally, the Emperor of China should pay an annual tribute to Japan. (18) Jukeki pretended to find the claims of the Taiko quite reasonable and promised to forward them at once to his government. John Naito, reputed for his knowledge in Chinese characters, was to accompany Jukeki to the Court of Peking, in order to bring back thence the response. At the same time the Taiko ordered Ukita to release the two Korean princes whom Kato had brought to Fusan.

Wishing finally to prove that he had by no means decided to bring the war to an end, he recalled to Japan the most tired soldiers, and replaced them by 50,000 fresh troops. Konishi, who had hoped for a little rest, received the order to proceed anew to his post.

This second voyage to Korea must have appeared all the more painful to Konishi as, in parting, he left Ryusa, his old father, aged 70 years, upon his death-bed. Ryusa, after having occupied the post of governor of Murotsu at first, and of Sakai afterwards, was nominated by the Taiko the principal purveyor of the whole army (19). In virtue of this new function, he had accompanied the Taiko to Nagoya, where he lived continually in his company. It was while busily discharging the many duties attached to this new post that Ryusa, feeling the approach of death, had himself transported to Kyoto, where he expired surrounded only by Christians. In order to avoid the splendour of a Buddhist funeral, to which his position as a high functionary would make his remains liable, he had ordered the Christians to bury him themselves and in secret. Ryusa had never feared to publicly show that he was a Christian, not even, after the edict of the Taiko. By a strange anomaly the latter only thought the more of him for this. In nominating Benedict Josei, the eldest son of Ryusa, governor of Sakai, he even went so far as to recommend him to imitate the Christian life of his father. With Ryusa disappeared one of

(18) Hideyoshi-fu, Vol. III.

(19) Hideyoshi-fu, vol. II.

the greatest benefactors of the Jesuits. His purse was always open to them, whether it was to help them to build churches, or found works of charity. From his own private means he had erected at Sakai an immense hospital for the abandoned sick. At his death he left more than two thousand pieces of gold for the reconstruction of the church at Kyoto, which, some years before, the Taiko had caused to be demolished.

The death of Ryusa began a series of misfortunes. The two brothers Ito, who had gone to Korea with their uncle Suketake, fell dangerously ill there. Hoping to recover their health in their native country, they at once embarked for Japan, but neither of them ever reached the end of his voyage. Bartholomew, the elder, died in the island of Tsushima, while Jerome, overtaken by a tempest, was shipwrecked in the province of Nagato, where he died soon after. At his particular request, his servants planted a wooden cross on his tomb, and went to announce the sad news to his afflicted mother. On the death of these two brothers, the domain of the Ito passed entirely to Suketake.

Otomo Yoshimune, in punishment for his cowardly conduct, on the occasion of the retreat of Konishi and Kuroda, was despoiled of his estates and exiled, with only five servants, to the house of Mori Terumoto. His son Fulgent Yoshinobu, was sent to the house of Kato Kiyomasa, who confided to him the command of 500 men. Such was the fate of the illustrious family of Otomo. Personally the fall of Yoshimune was not a great loss for the Christian religion. After his conversion he had brought that religion more shame than glory. But what was irreparable was the misfortune of the numerous *samurai* whom the *daimyo* brought downward in his fall. Several thousand of these unfortunate men found themselves suddenly destitute with their families. They were obliged to go and offer their services to other masters or to choose another profession. Forced by misery, some of them sold their daughters to houses of ill-fame. The annals of the Jesuits report one of these sad examples, where two Christian sisters were thus sold to a brothel of Kyoto, by their pagan parents. The reader knows with what passiveness young Japanese maidens obey in such cases the paternal will. These two Christian girls also allowed themselves to be taken to the brothels, but, on arriving at their destination, they resolved to die sooner than embrace a mode of life which their religion condemned. The eldest died, murdered by blows, and the second would have probably met the same fate, had not Melchior Asonuma, *kerai* of Mori Terumoto, warned in time, got her delivered (20). If this was already the fate of the pagan *samurai*, the misfortunes of the Christian *samurai* were greater still. Several *daimyo*, fearing to compromise themselves, refused to employ as followers persons who professed the proscribed religion.

After the departure of Otomo, Bungo was divided between several pagan *daimyo*. Mori Takamasa, of whom more anon, was nominated to Saeki. It was owing to him that Paul Shiga was able to remain in Bungo, and to support the Christians of that province (21).

Finally the tragic death of Gamo Ujisato deprived the Christians of one of the firmest supports in those difficult times. Here are the circumstances under which it came to pass. The Taiko, after having sent Jukeki and John Naito to the court of Peking, had again taken, without delay, the road to Kyoto. Yodogimi, his favourite concubine, had just given him a son, who received the name of Hideyori (Autumn, 1593). The unexpected arrival of an heir pleased the Taiko so much, that he renounced even the idea of returning to Nagoya, where, in fact, he never after placed foot. His principal occupation, henceforward, was the construction of a new residence at Fushimi, where a strong castle was built, according to his orders, on the celebrated "Momoyama," the Mountain of the Peach-trees. Following his example, the *daimyo* also constructed houses there, and the

"Momoyama" became the rendez-vous of all the *grandeues* of Japan. It was while these buildings were going on, that the incurable mistrust of the Taiko led to a series of bloody dramas, of which Gamo Ujisato was the first victim.

During a visit which the Taiko paid to Kyoto (1595), he wished to be for a day the guest of Gamo. The latter received him with unheard of pomp, and spent 1,400 gold pieces for gilding the fishes, which were to be served during the repast. Gamo himself presented the *sake* cup to his guest, and made him a princely present each time he drained it. After the first cup, he offered him 4,500 gold pieces, after the second several pieces of silk, and so on. The total value of the presents reached the figure of 10,000 gold pieces. The members of the Taiko's suite were also treated with much munificence. But scarcely had the Taiko retired, when Gamo began to vomit blood; he had been poisoned, and he died a few days after. Public opinion accused the Taiko of this poisoning, without, however, indicating his reasons. Some suppose that the distinguished character of Gamo, who had been brought up in Nobunaga's court, had wounded the vanity of the Taiko, whose low origin could never be mistaken, whether he wished to dance a "Nō" (22), or whether, in spite of his complete ignorance in such matters, he took into his head the notion of composing poems. Others, and among them the Religious, contend that the protestations that Gamo had made in favour of the Christian religion, at Nagasaki, at Nagoya or at Kyoto, had been reported to the Taiko, who from that moment had resolved on his ruin. Which of these theories is right? For want of evident proofs one is, however, reduced to simple hypotheses. What is sure, however, is that Gamo was convinced that the Taiko was the author of his death. Before expiring he expressed all his sorrow on this point, as well as the inanity of human life in these verses:—

Fukanedomo
Itsuka wa kana wa
Ch ru mono wo
Kokoro sewashiki
Haru no yama kaze.

"The flower withers of itself without that the breath of the wind dries it up,
"Why then, mountain-wind of Springtime, art thou angry against it?"

The principal vassals of Gamo, for the most part Christians like him, kept up for several years more the religion at Utsunomiya (Shimotsuke), whither Hideyuki, son of Ujisato, had been transferred, after the death of his father. Hideyuki manifested even the desire to receive baptism, but it is probable that he was never permitted to realize this wish.

Some time after this drama, the Taiko proceeded to another, more terrible still: the death of Hidetsugu, his adopted son. The latter had at first observed with pain that the Taiko, while ceding to him the office of Kwampaku, had reserved to himself all the power. But after the birth of Hideyori, his anxiety only increased, and he already saw the day when the Taiko would deprive him of his post in favour of this infant. To obviate this disgrace, he had circulated, among the *daimyo*, a positive invitation to swear to him entire fidelity. This step had been taken in the greatest secrecy, but Mori Terumoto while protesting his devotion to Hidetsugu, warned the Taiko of it (23). The latter appeared at first to attach no importance to the proceedings of Hidetsugu, but after a certain lapse of time, he signified to him to resign his position and retire immediately to the monastery of Mount Koya (24), to await there his orders. Hidetsugu submitted to this summons without offering the least complaint, and left on that very instant for Koya, accompanied only by ten servants, as the Taiko had ordered. But scarcely was he installed in his monastery, when a special envoy came to order him, on the part of the Taiko, to commit *harakiri*,

(22) A kind of operatic performance consisting of music and dancing.

(23) Hay p. 277.

(24) Situated in the province of Kii, this monastery was founded in 817, by the celebrated bonze Kobo Daishi. It served generally as a retreat for disgraced *daimyo* and courtiers.

an order which Hidetsugu at once obeyed (August, 1595).

In an access of cruelty, the Taiko caused the whole family of Hidetsugu to be massacred, not excepting even the women and the children still at the breast. All his vassals, among whom was then Simon Ikeda Tango-no-Kami were deposed. As to the *daimyo* who had followed his party, several had to pay for the attachment, which they had shown, with their lives. Among the latter was Kimura Shigeyoshi, *daimyo* of Yodo (Yamashiro). His wife was to share his lot, but she succeeded in concealing herself in a Christian family, whose religion she embraced (25).

One would be inclined to believe that, after the preceding examples, no *daimyo* would henceforth dare to expose himself to the Taiko's anger by

(TO BE CONTINUED.)

AUTUMN MEETING OF THE NIPPON RACE CLUB.

FIRST DAY.—MONDAY, 17TH NOVEMBER.

PATRONS:—H.I.H. Komatsu-no-Miya, H.I.H. Fushimi-no-Miya, H.I.H. Arisugawa-no-Miya.

PERMANENT COMMITTEE:—Sir Claude Maxwell MacDonald, K.C.B., K.C.M.G., President; Dr. Wheeler, Vice-President; R. D. Robison, Esq., Jas Dodds, Esq., V. Blad, Esq., Governor Sufu, T. Thomas, Esq., G. Philip, Esq., S. Isaacs, Esq., A. J. Easton, Esq., Count von Arco-Valley, L. Mottet, Esq., and T. Rinoie, Esq.

EXECUTIVE COMMITTEE:—A. G. Morey Weale, Esq., CHAIRMAN; A. Bianchi, Esq., K. Mori, Esq., L. Mottet, Esq., P. de C. Morriss, Esq., H. Keswick, Esq. and B. Runge, Esq.

CLERK OF THE COURSE:—B. Runge, Esq.

SECRETARY:—S. H. Somerton.

The first day of the Autumn Meeting of the Nippon Race Club was favoured with bright skies and pleasant, though somewhat chilly, weather, while the course was in excellent condition. The attendance in the Paddock and on the stand was fully up to the average and excellent sport was enjoyed. The fields of starters were larger than usual in recent seasons and one record at least was made, namely Uhlenhorst's time in the Australian Griffins race, 67 $\frac{3}{4}$ seconds for the five furlongs, and this without having been ridden at the finish. An unfortunate accident occurred in the fourth race, in which May Crown, ridden by Mr. Catto, fell and broke a foreleg, necessitating his being shot. This officiating officers of the day were as follow:—Judge, Mr. Bianchi; Asst. Judge, Mr. F. J. Hall; Starter, Mr. T. Thomas; Second Starter, Mr. P. de C. Morriss; Handicapper, Mr. de Cuers de Cogolin; Clerk of Scales Dr. Wheeler; Timekeeper, Mr. F. H. Bugbird.

The various events are detailed below:—

1.—THE COSMOPOLITAN PLATE, for Australian Subscription Horses of 1900-1901; weight for age; winners of 3 races at date of entry 5lb. extra, of more than 3 races 10lb. extra; Entrance, yen 5. winner yen 250, Second Horse 50 yen. One Mile.

Mr. Yodo's The Orb, 140lb. (Hakodate), 1
Mr. Sphinx's Fource, 150lb. (Miyagawa) 2
Mr. Scherz's Faule Grete, 150lb. (Mr. Mottu) 3

Faule Grete tested the temper of the starter severely being apparently determined not to start. At last when the three got away The Orb took the lead, with Fource next and Faule Grete last. The same order lasted all the way round The Orb passing the post a couple of lengths behind Fource, Faule Grete a length behind. Time, 1.53 $\frac{1}{2}$.

PARI MUTUEL, 5 yen—Fource 231, The Orb 58, Faule Grete 109; Total yen 1,791—The Orb, yen 31

2.—THE SHIMOSA CUP, for Subscription Country-Breds of Autumn, 1902; weight for age; Entrance, yen 5; winner yen 250, second horse, yen 50. Half a Mile.

Mr. Kawakita's Kiyokawa, *123 (Ichi) 1
Mr. Hansa's Alster, *123lb. (Mayeda) 2
Mr. Norfolk's Ping-pong, *123lb. (Sugiura) 3
Mr. Sphinx's Le Gone, *123lb. (Miyagawa) 0
Mr. Pond's Niicup, *130lb. (Hayashi) 0
Mr. Tatsuta's Komatsu, *123lb. (Kato) 0

Kiyokawa got the lead at the start and kept it to the end. A good race ensued between Alster and

(25) Hay, 473 and 474.

(20) Hay, p. 490.

(21) Lettera annua, 1596, p.260.

Ping-pong for second place, the former getting the position three lengths behind Kiyokawa. Time 56.6.

PARI MUTUEL, 5 yen—Kiyokawa 236, Le Gone 10, Niicup 11, Komatsu 10, Alster 89, Ping-pong 34; total yen 1,950—Kiyokawa, yen 7.50.

3.—The AUSTRALIAN GRIFFIN RACE, for Australian Subscription Horses of Autumn, 1902; weight for age; Entrance, yen 5; winner yen 250, second horse yen 50, third horse yen 25. Five Furlongs.

Mr. Hansa's Uhlenhorst, 140lb.(Mayeda) 1
Mr. Nishimura's Sanyo, 140lb.(Takahashi) 2
Mr. Cosmopolis' Suzon, 137lb.(Mr. Jarmain) 3
Mr. R. Field's Trust Not, 130lb.(Mr. Catto) 0
Mr. Kawakita's Kachikawa, 130lb.(Ichi) 0
Mr. Sphinx's Ma Mie, 130lb.(Mayejima) 0
Mr. Pond's Azuma, 130lb.(Kobayashi) 0
Mr. Pond's Sydney, 130lb.(Hakodate) 0
Mr. Tatsuta's Sakura, 137lb.(Sato) 0
Mr. Yodo's Tonegawa, 137lb.(Kurosaka) 0
Mr. B. Runge's Bambina, 130lb.(Kato) 0
Mr. Scherz's Margherita, 137lb.(Sugiura) 0
Sir Claude MacDonald's, Peking 137lb.(Higaki) 0
Mr. K. Sasaki's Cloudy, 130lb.(Rikizo) 0
Mr. Carnegie's Thistle, 137lb.(Horikoshi) 0
Mr. Carnegie's Shamrock, 137lb.(Tomioka) 0

This event brought out the large field of sixteen. After some difficulty in getting them away a fair start was effected. Uhlenhorst soon ran to the front and kept the lead to the finish, passing the post three lengths ahead of Sanyo, with Suzon a good third. Time, 1.07 $\frac{1}{2}$.

PARI MUTUEL, 5 yen—Trust Not 7, Kachikawa 6, Ma Mie 11, Azuma 33, Sydney 48, Sakura 5, Tonegawa 29, Bambina 13, Sanyo 178, Margherita 9, Uhlenhorst 123, Peking 35, Cloudy 4, Thistle 13, Shamrock 8, Suzon 60; total, yen 2,619—Uhlenhorst, yen 21.50.

4.—The ALL-AGED STAKES, for all Horses; weight for Age; Subscription Horses of 1899-1902 Spring that have not won more than 5 races allowed 7lb.; Entrance, yen 5; winner yen 250. One Mile.

Mr. Norfolk's Imperial Mistral II, 145lb.(Sugiura) 1
Mr. Kawakita's Arakawa (late Hawfinch), 140lb.(Ichi) 2

Mr. K. Sasaki's The Coronet, 140lb.(Mr. Mottu) 2
Mr. Pond's Saikio, 140lb.(Kobayashi) 0
Mr. C. de C. Hughes' Lady, 140lb.(Mr. Jarmain) 0
Mr. May's May Crown, 140lb.(Mr. Catto) 0

After several attempts a fair start was effected, May Crown went to the front with Imperial Mistral next, Arakawa about a length behind. Coming round the corner before the straight May Crown met with an accident and injured a leg. Imperial Mistral then took the lead and passed the post two or three lengths in front of Arakawa with Coronet a good third. Time, 1.53 $\frac{1}{2}$.

PARI MUTUEL, 5 yen—Arakawa 133, Saikio 36, Lady 25, The Coronet 73, Imperial Mistral 455, May Crown 116; total yen 3,771—Imperial Mistral paid yen 8.50.

5.—The SYDNEY CUP, for Australian Subscription Horses of 1900-1901 and Spring, 1902; weight for age; winners of 3 races at date of entry 5lb. extra, of more than 3 races 10lb. extra; an allowance of 3lb. for Spring Horses of 1902 that have not won a race; winner of race No. 1 excluded; Entrance, yen 5; winner yen 250, second horse yen 50, third horse yen 25. Three-quarters of a Mile.

Mr. R. Field's Tenryu, 145lb.(Mr. Catto) 1
Mr. Satsuma's Ojosama, 240lb.(Higaki) 2
Mr. Yodo's Fujikawa, 145lb.(Kurosaki) 3
Mr. B. Runge's Desdemona, 137lb.(Kato) 0
Mr. News' Figaro (late Hayabusa), 137lb.(Ichi) 0
Mr. Tatsuta's Tamagawa, 137lb.(Goto) 0
Mr. Decimus' Firefly, 140lb.(Mr. Mottu) 0
Mr. Norfolk's Patsie, 134lb.(Sugiura) 0

Patsie made the running three-quarters of the way round. In the straight Ojosama came to the front and Tenryu next in order. In the home stretch a fine race took place between Tenryu and Ojosama, the former just winning by a nose. Time, 1.22 $\frac{1}{2}$.

PARI MUTUEL, 5 yen—Tenryu 32, Tamagawa 51, Fujikawa 109, Desdemona 48, Figaro 15, Ojosama 282, Firefly 45, Patsie 119; total, yen 2,947—Tenryu, yen 92.

6.—The MANDARIN CUP, for all China Ponies, to be ridden by Full Members of the Club, or Visitors, whose names must be sent in to the committee before the meeting and approved by them; weight as per scale; Entrance, yen 5; winner yen 200, second pony yen 50. Three-quarters of a Mile.

Mr. Unverzagt's Max Willem (late Coronation), 150lb.(Mr. Nishimura) 1
Mr. Mottu's Sunrise, 150lb.(Mr. Mottu) 2
Mr. Kawakita's Hayakawa, 150lb.(Mr. Catto) 3
Mr. News' Etourdi, 147lb.(Mr. Jarmain) 0
Dr. Mansfeld's Standard Rose (late Hayakoma), 150lb.(Dr. Mansfeld) 0
Mr. Elliott's MacMorse, 150lb.(Mr. Elliott) 0

Max Willem got away with a good start and kept the lead throughout. In the straight Mr. Mottu on Sunrise challenged the leader and made a good race of it, Max Willem winning only by a head, Hayakawa finishing third. Time, 1.30 $\frac{1}{2}$.

PARI MUTUEL, yen 5—Hayakawa 227, Etourdi 39, Standard Rose 79, Sunrise 398, Max Willem 66, MacMorse 65; total yen 3,897—Max Willem yen 59.

7.—The NARITA STAKES, for Subscription Country Breds of Autumn, 1902; weight for age; winner of race No. 2 excluded; Entrance, yen 5; winner yen 200, second horse yen 50. Five Furlongs.

Mr. Tatsuta's Tsukigase, *123lb.(Goto) 1
Mr. May's Miss May, *123lb.(Mr. Catto) 2
Mr. Carnegie's Leek, *130lb.(Horikoshi) 3
Mr. Pond's Niicup, *130lb.(Hayashi) 0
Mr. Yodo's Shitaka, 135lb.(Kurosaka) 0

Miss May took up the running from the start and led till the Trees were reached, when Tsukigase collared her and increasing his lead won easily by several lengths from Miss May. Leek finishing third, Time 1.12 $\frac{1}{2}$.

PARI MUTUEL, yen 5—Niicup 27, Tsukigase 344, Shitaka 20, Miss May 83, Leek 20; total yen 2,232—Tsukigase yen 6.50.

8.—The NEW SOUTH WALES STAKES, for Australian Subscription Horses of Autumn, 1902; winner of race No. 3 excluded; weight for age; Entrance, yen 5; winner yen 250, second horse yen 50, third horse yen 25. One Mile and a Furlong.

Mr. Yezoye's Cameo, 130lb.(Sugiura) 1
Mr. Nishimura's Sanyo, 140lb.(Takahashi) 2
Mr. Pond's Melbourne, 130lb.(Hayashi) 3
Mr. Sphinx's Ma Mie, 130lb.(Goto) 0
Mr. Hansa's Elbe, 137lb.(Mayeda) 0
Mr. May's Lady May, 130lb.(Mr. Catto) 0
Mr. Carnegie's Rose, 140lb.(Horikoshi) 0

This was an easy win for Cameo, who ran to the front at the start and romped in an easy winner by half a dozen lengths. Time, 2.14 $\frac{1}{2}$.

PARI MUTUEL, yen 5—Ma Mie 26, Melbourne 250, Sanyo 48, Cameo 304, Elbe 31, Lady May 32, Rose 19; total yen 3,195—Cameo, yen 10.50.

9.—The BRISBANE CUP, for Australian Subscription Horses of Spring, 1902; weight for age; winners at date of entry 5lb. extra for 1 race, for 2 races or more 7lb. extra; Entrance, yen 5; winner yen 250, second horse yen 50. One Mile.

Mr. Decimus' The Beetle, 145lb.(Takahashi) 1
Mr. Carnegie's I.O.U., 137lb.(Horikoshi) 2
Mr. R. Field's Try Again, 140lb.(Mr. Catto) 3
Mr. Iris' Yamato, 140lb.(Rikizo) 0
Mr. Yodo's Fujikawa, 147lb.(Kurosaki) 0
Mr. Elliott's Hope, 130lb.(Ichi) 0
Mr. R. Field's Temper 130lb.(Tomioka) 0

* Mares and Geldings.—Allowance deducted. Yamato got away first but The Beetle came to the front at the Trees and I.O.U. ran into second place. In this order they finished, The Beetle winning by about half a length; Try Again third. Time, 1.53.

PARI MUTUEL, 5 yen—Temper 31, Try Again 52, Fujikawa 197, The Beetle 439, I.O.U. 23, Hope 58, Yamato 118; total, yen 4,131—The Beetle, yen 9.50.

SECOND DAY.—TUESDAY, 18TH NOVEMBER.

The second day of the Autumn Meeting proved scarcely as auspicious as the first. The sunshine of Monday was missing and the air was bleak though the wind was not so strong as on Monday. The costumes of the ladies showed that they were fully alive to the somewhat wintery weather to be encountered. The number of lady visitors was not up to the average of the ladies' day, but still they figured in fair numbers and the general attendance was moderately large. As usual on the second day, Tokyo furnished a goodly contingent of visitors, amongst whom were Baron Sannomiya, Grand Master of Ceremonies, Mr. Asada, Vice Minister for Communications, the British Minister, Sir Claude MacDonald and Lady MacDonald, Mr. Watanabe and a number of representatives of the foreign Legations, and Japanese officials, including Governor Sufu of Kanagawa and Mrs. Sufu. For the fourth race, the Nippon Derby, H.I.M. the Emperor had donated as first prize a fine silver punch bowl, and this was presented to the winner, Mr. Tatsuta, after the race by Baron Sannomiya, who expressed his pleasure in making the presentation to the winner on behalf of His Majesty. A very popular win was that of Mr. Elliott in the race for the Tientsin Cup, a handsome silver vase presented by Sir Claude MacDonald. Mr. Elliott rode his own pony, MacMorse, and after the race received the prize from the hands of

Lady MacDonald, who gracefully complimented the winner on his success. The first and the eighth events proved rather uninteresting as one resulted in a walk over and the other in a match between two horses. Several of the races, however, afforded good sport and the pari mutuel and sweeps were well patronised. The details are as follow:—

1.—The CHAMPAGNE CHALLENGE CUP, (Presented by Messrs. G. H. Mumm & Company); for Australian Subscription Horses of 1901 and thereafter, that have not run at more than two meetings; to be won three times in all by horses the *bona fide* property of same owner or owners, with yen 300 added by the Club until the Cup is finally won, when the Second Horse will receive the added money; weight 145lb.; winners 7lb. extra; Entrance, yen 10. One Mile.

Mr. R. Field's Tenryu, 145lb.(Mr. Catto) 1
There were no starters for this race but Tenryu, who with Mr. Catto up walked over the course. As a result though there were sweepstakes there was no Pari Mutuel on the race.

2.—The MIRA STAKES, for Australian Subscription Horses of Spring, 1902; weight for age; winner of race No. 9 First day excluded, winners at date of entry 5lb. extra for 1 race, 7lb. extra for 2 or more; Entrance, yen 5; winner yen 250, second horse yen 50, third horse yen 25. Three-quarters of a Mile.

Mr. B. Runge's Desdemona, 142lb.(Kato) 1
Mr. Decimus' Firefly, 145lb.(Mr. Mottu) 2
Mr. Yodo's Fujikawa, 147lb.(Kurosaki) 3
Mr. R. Field's Try Again, 140lb.(Mr. Catto) 0
Mr. Tatsuta's Tamagawa, 140lb.(Goto) 0
Mr. News' Figaro, 140lb.(Mr. Jarmain) 0
Mr. Norfolk's Patsie, 137lb.(Sugiura) 0
Mr. Carnegie's I.O.U., 137lb.(Horikoshi) 0
Mr. Elliot's Hope, 130lb.(Ichi) 0
Mr. Iris' Yamato, 140lb.(Sasaki) 0

The start was anything but a good one, one horse being left yards behind and two or three getting away with a good lead. Desdemona and Patsie were among the lucky ones and led the field for half a mile. Entering the straight Firefly ran into second place but failed to collar Desdemona, who finished a length ahead with Fujikawa a good third. Time 1.24 $\frac{1}{2}$.

PARI MUTUEL, 5 yen—Try Again 18, Tamagawa 14, Fujikawa 124, Desdemona 46, Figaro 18, Firefly 104, Patsie 68, I.O.U. 196, Hope 11, Yamato 17; total, yen 2,772—Desdemona, yen 60.

3.—The COLONIAL STAKES, for Australian Subscription Horses of Autumn, 1902; weight for age; winners at the meeting 5lb. extra; Entrance, yen 5; winner yen 300, second horse yen 50, third horse yen 25. Mile and a Quarter.

Mr. Pond's Melbourne, 130lb.(Hayashi) 1
Mr. Yezoye's Cameo, 130lb.(Sugiura) 2
Mr. Hansa's Uhlenhorst, 140lb.(Mayeda) 3
Mr. R. Field's Trust Not, 130lb.(Mr. Catto) 0
Mr. Sphinx's Ma Mie, 130lb.(Goto) 0
Mr. Nishimura's Sanyo, 140lb.(Takahashi) 0
Mr. Scherz's Margherita, 137lb.(Mr. Mottu) 0
Mr. Carnegie's Rose, 140lb.(Horikoshi) 0
Mr. Cosmopolis' Suzon, 137lb.(Mr. Jarmain) 0

Uhlenhorst got to the front in the first half mile and had a lead of five or six lengths passing the Stand. Going up the Dip, however, Melbourne came up and passed Uhlenhorst, Cameo at the same time challenging the leader. After a close race down the distance Melbourne passed the post about a head in front of Cameo, Uhlenhorst a good third. Time, 2.26.

PARI MUTUEL, 5 yen—Trust Not 20, Ma Mie 11, Melbourne 68, Sanyo 110, Cameo 371, Margherita 34, Uhlenhorst 219, Rose 9, Suzon 54; total, yen 3,942—Melbourne, yen 58.

4.—The NIPPON DERBY, for Subscription Country Breds of Autumn, 1902; weight for age; winners at meeting 3lb. extra; Entrance, yen 5; winner yen 200, second horse yen 50. Five Furlongs.

Mr. Tatsuta's Tsukigase, *132lb.(Goto) 1
Mr. Kawakita's Kiyokawa, *132lb.(Ichi) 2
Mr. Hansa's Alster, *124lb.(Mayeda) 3
Mr. Pond's Niicup, *130lb.(Hayashi) 0
Mr. Norfolk's Ping-pong, *123lb.(Sugiura) 0
Mr. Carnegie's Leek, *130lb.(Horikoshi) 0

Niicup made the running to the Trees when Tsukigase draw up and, passing Niicup in the straight, won easily by half a dozen lengths from Kiyokawa who had displaced Niicup in the home stretch. Alster was a good third. Time, 1.11 $\frac{1}{2}$.

PARI MUTUEL, 5 yen—Kiyokawa 387, Niicup, 29, Tsukigase 490, Alster 134, Ping-pong 90, Leek 37; total yen 5,251—Tsukigase, yen 10.50.

5.—The TIENSIN CUP, Handicap, for China Ponies, to be ridden by Full Members of the Club or Visitors, whose names must be sent in to the committee before the meeting, and approved by them; Entrance, yen 5. One Mile.

Mr. Elliott's MacMorse, 182lb.(Mr. Elliott) 1
Mr. Mottu's Sunrise, 152lb.(Mr. Mottu) 2
Mr. Kawakita's Hayakawa, 155lb.(Mr. Catto) 3
Mr. News' Etourdi, 135lb.(Mr. Jarmain) 0
Dr. Mansfeld's Standard Rose 140lb.
(Dr. Mansfeld) 0
Mr. Unverzagt's Max Willem, 135lb.
(Mr. Wrekmeir) 0

Etourdi was so troublesome that it was scarcely a matter of surprise that when a start was made it was a wretched one, the ponies being separated by a dozen lengths from first to last. McMorse got away well and was never passed, Sunrise taking second place a couple of lengths behind, Hayakawa third. Time, 2.14½.

PARI MUTUEL, 5 yen—Hayakawa 458, Etourdi 35, Standard Rose 30, Sunrise 472, Max Willem 118, McMorse 104; total, yen 5,476—McMorse, yen 52.50.

6.—The TOKIO STAKES, Handicap, for All-Comers. Entrance, yen 5; winner yen 300, second horse yen 50. Mile and a Quarter.

Mr. Norfolk's Imperial Mistral II, 148lb. (Sugiura) 1
Mr. K. Sasaki's The Coronet, 137lb.(Mr. Catto) 2
Mr. Kawakita's Arakawa, 140lb.(Ichi) 3
Mr. Sphinx's Fourree, 131lb.(Miyagawa) 0
Mr. Pond's Saikio, 135lb.(Kobayashi) 0
Mr. C. de C. Hughes' Lady, 125lb.(Mr. Jarmain) 0

Imperial Mistral soon after the start shook off The Coronet and Arakawa. Saikio however stuck close to the leader until passing the trees when she appeared to be finished. The Coronet made a try in the straight to collar the Mistral but the latter passed the post two lengths to the good. Time, 2.24½.

PARI MUTUEL, 5 yen—Arakawa 78, Fourree 55, Saikio 67, Lady 42, The Coronet 70, Imperial Mistral 448; total yen 3,420—Imperial Mistral, yen 7.50.

7.—The YOKOHAMA PLATE, for Australian Subscription Horses of Spring, 1902; weight for age; winners at date of entry 5lb. extra for 2 races, 7lb. extra for more than 2; winners at meeting 3lb. extra. Entrance yen 5; winner yen 300, second horse yen 50. Mile and a Furlong.

Mr. Decimus' The Beetle, 140lb.(Takahashi) 1
Mr. Carnegie's I.O.U., 137lb.(Horikoshi) 2
Mr. R. Field's Temper, 130lb.(Mr. Catto) 3
Mr. Yodo's Fujikawa, 147lb.(Kurosaka) 0
Mr. News' Figaro, 145lb.(Mr. Jarmain) 0

The Beetle and Fujikawa drew to the front at the half mile, with Saikio close up. At the trees Saikio fell behind and I.O.U. came into second place. The Beetle, increasing his lead, won by half a dozen lengths. Time, 2.12½.

PARI MUTUEL, 5 yen—Temper 56, Fujikawa 132, Figaro 42, The Beetle 542, I.O.U. 173; total, yen 4,252—The Beetle, yen 8.

8.—The NEGISHI CUP, for Australian Subscription Horses of 1900-1901; weight for age; winners of 3 races, at date of entry 5lb. extra; of more than 3 races, 10lb. extra; winners at meeting to carry an additional 5lb.; winner yen 250. Mile and a Half.

Mr. Yodo's The Orb, 140lb.(Hakodate) 1
Mr. Iris' Tasmanian, 150lb.(Rikizo) 2

This was a match between The Orb and Tasmanian and resulted in a win for The Orb by a couple of lengths or so. Time, 3.01½.

PARI MUTUEL, 5 yen—The Orb 515, Tasmanian 451; total, yen 4,347—The Orb, yen 8.50.

9.—The MELBOURNE STAKES, for Australian Subscription Horses of Autumn, 1902; weight for age; winners of 1 race at meeting 5lb. extra, of 2 or more races 7lb. extra. Entrance yen 5; winner yen 300, second horse yen 50, third horse yen 25. Three-quarters of a Mile.

Mr. Hansa's Uhlenhorst, 140lb.(Mayeda) 1
Mr. Cosmopolis' Suzon, 137lb.(Mr. Jarmain) 2
Mr. Yezoye's Cameo, 130lb.(Sugiura) 3
Mr. Pond's Azuma, 130lb.(Kobayashi) 0
Mr. Pond's Sydney, 130lb.(Hakodate) 0
Mr. Tatsuta's Sakura, 137lb.(Goto) 0
Mr. Yodo's Tonegawa, 137lb.(Kurohashi) 0
Mr. B. Runge's Bambina, 130lb.(Kato) 0
Mr. Nishimura's Sanyo, 140lb.(Takahashi) 0
Mr. Scherz's Margherita, 137lb.(Tomioka) 0
Sir Claude MacDonald's Peking, 137lb.(Higaki) 0
Mr. Carnegie's Thistle, 137lb.(Mr. Catto) 0
Mr. Carnegie's Shamrock, 137lb.(Horikoshi) 0

Uhlenhorst got the best of a very bad start and led all round, beating Suzon by a length, Cameo, a good third. Time, 1.23½.

PARI MUTUEL, 5 yen—Asama 31, Sydney 20, Sakura 14, Tonegawa 8, Bambina 33, Sanyo 113, Cameo 225, Margherita 10, Uhlenhorst 355, Peking 5, Thistle 14, Shamrock 14, Suzon 40; total yen 3974—Uhlenhorst yen 11.

* Mares and Geldings—Allowance Deducted.

THIRD DAY.—WEDNESDAY, 19TH NOVEMBER.

The sun shone out brightly and the temperature was far more comfortable on the Negishi Race-course on Wednesday than it had been on the two previous days. The persistent rain of the preceding night had naturally made the course heavier, but for all that it was not what might be called a mud-lark's day. The attendance of visitors was not so large as on Tuesday, but was fairly up to the average. Most of the events brought out good fields and several surprises were sprung upon those who were supposed to be "in the know." The sport all round was good and the speculation of the public in backing their fancy was as free and liberal as on the previous days. In the second race some trouble occurred through the rider of Fujikawa, who came in first, crossing the track of Try Again, who finished second. A protest was lodged by the owner, not the rider, of the latter horse and was upheld by the Committee, but the decision arrived at only amounted to a caution to the rider complained of. A change was made on Wednesday morning in the officer officiating as starter, Mr. P. de C. Morriss taking the place of Mr. Tom Thomas. The office of starter is a difficult and thankless one at the best. The events were as follows:—

1.—The PRIX DES HARAS, Handicap, for all Subscription Horses entered at the Meeting, Australian and Country Breds, (1902 Subscription Country Breds excluded), a forced entry of 10 yen—non-starters half forfeit, Handicap weights to be published at close of second day. Winner yen 300, Second Horse yen 100. Third Horse yen 50. One Mile.

Mr. Satsuma's Ojosama, 140lb.(Higaki) 1
Mr. Scherz's Faule Grete, 142lb.(Mr. Mottu) 2
Mr. Sphinx's Fourree, 142lb.(Miyagawa) 3
Mr. B. Runge's Desdemona, 139lb.(Kato) 0
Mr. Pond's Saikio, 148lb.(Kobayashi) 0

Saikio got away with a fair start and led till the half mile was passed. Here Ojosama came up and before the trees were reached disposed of Saikio, who also had to give place to Fourree and Faule Grete. After entering the straight Ojosama increased the lead and came in an easy winner by six or seven lengths from Faule Grete, who had got into second place in the run home. Fourree finished third. Time, 2.02½.

PARI MUTUEL, 5 yen—Fourree 81, Saikio 127, Desdemona 33, Faule Grete 51, Ojosama 59; total, yen 1,579—Ojosama, yen 27.

2.—The QUEENSLAND PLATE, for Australian Subscription Horses of Spring, 1902, and Autumn, 1902; weight for age; winners at date of entry 5lb. extra for one race, 7lb. extra for 2 or more; winners at meeting of one race 5lb. extra, of 2 races excluded; an additional 3lb. allowance for Autumn Subscription Horses that have not won 2 Races; Entrance, yen 5. Winner yen 250, Second Horse yen 50, Third Horse yen 25. One Mile.

Mr. Yodo's Fujikawa, 147lb.(Kurosaka) 1
Mr. R. Field's Try Again, 140lb.(Mr. Catto) 2
Mr. B. Runge's Bambina, 127lb.(Kato) 3
Mr. Tatsuta's Tamagawa, 140lb.(Kato) 0
Mr. Scherz's Margherita, 134lb.(Sugiura) 0
Mr. Pond's Sydney, 131lb.(Hakodate) 0

Bambina got away first and led for half a mile when Tamagawa came up, and after running level until the Trees were reached were overhauled and passed by Fujikawa and Try Again. The former after getting the lead kept it to the finish beating Try Again by two lengths; Bambina finishing third. Time, 2.06½.

PARI MUTUEL, 5 yen—Try Again 68, Sydney 62, Tamagawa 29, Fujikawa 57, Bambina 41, Margherita 29; total, yen 2,187—Fujikawa yen 8.50.

3.—The PEKING CUP, Handicap, for all China ponies, to be ridden by Full Members of the Club or Visitors, whose names must be sent in to the Committee before the meeting and approved by them; Entrance yen 5. Winner yen 200, Second Pony yen 50. Mile and a Quarter.

Mr. Mottu's Sunrise, 148lb.(Mr. Mottu) 1
Mr. Elliott's MacMorse, 145lb.(Mr. Elliott) 2
Mr. Kawakita's Hayakawa, 150lb.(Mr. Jarmain) 3
Mr. Unverzagt's Max Willem, 145lb.
(Mr. Nishimura) 0

Max Willem led for nearly half a mile with Sunrise next in order. At the Trees McMorse joined the two leaders but Sunrise on entering the Straight came away from the others and passed the post several lengths ahead of McMorse, Hayakawa a good third. Time, 3.01½.

PARI MUTUEL, 5 yen—Hayakawa 354, Sunrise 492, Max Willem 119, McMorse 164; total, yen 5,080—Sunrise, yen 10.50.

4.—The OLD SUBSCRIPTION CHAMPIONS for Australia

Subscription Horses of 1900 and 1901; weight for age; a forced entry for winners at the meeting of 1 race yen 10, of 2 races yen 20, and of more than 2 races yen 40. Optional to beaten horses at an entrance of yen 25. Winner yen 500. Mile and a Quarter.

Mr. Iris' Tasmanian, 140lb.(Rikizo) 1
Mr. Satsuma's Ojosama, 140lb.(Higaki) 2
Mr. Yodo's The Orb, 140lb.(Hakodate) 3
Mr. R. Field's Tenryu, 145lb.(Mr. Catto) 0

Tasmanian, The Orb and Ojosama made a good race of it, running fairly level till the last quarter mile when Tasmanian appeared to have most left in him and passed the post a couple of lengths ahead of Ojosama. Time, 2.35½.

PARI MUTUEL, yen 5—The Orb 515, Tenryu 158, Ojosama 83, Tasmanian 127; total yen 3,973—Tasmanian, yen 31.

5.—The "All 1902" CHAMPIONS, for Australian Subscription Horses of 1902; weight for age; a forced entry for winners at the meeting of yen 10 for 1 race; yen 20 for 2 races; yen 40 for more than 2 races; optional to beaten horses at an Entrance fee of yen 25. Winner yen 500. Mile and a Quarter.

Mr. Hansa's Uhlenhorst, 140lb.(Mayeda) 1
Mr. Pond's Melbourne, 130lb.(Hayashi) 2
Mr. Yezoye's Cameo, 130lb.(Sugiura) 3
Mr. Decimus' The Beetle, 140lb.(Takahashi) 0

The Beetle led for half a mile and then dropped behind, Uhlenhorst taking the lead followed by Melbourne close up. In the straight Melbourne ran into second place, but was unable to come up with Uhlenhorst who won by several lengths, Time 2.34½.

PARI MUTUEL, 5 yen—Uhlenhorst 122, Cameo 111, The Beetle 412, Melbourne 242; total yen 3991—Uhlenhorst yen 30.50.

6.—The ALL-COMERS HANDICAP, for all Horses; Entrance yen 5; Weights to be published at conclusion of second day's racing, winner yen 300, Second Horse yen 100. Mile and a Half.

Mr. Norfolk's Imperial Mistral II, 160lb.(Sugiura) 1
Mr. K. Sasaki's The Coronet, 142lb.(Mr. Mottu) 2
Mr. Kawakita's Arakawa, 140lb.(Ichi) 3
Mr. C. de C. Hughes' Lady, 120lb.(Mr. Jarmain) 0

After some trouble at the start Imperial Mistral took the lead. In passing the post on the first round, Imperial Mistral led by two lengths, followed by The Coronet, Arakawa and Lady. Imperial Mistral continued increasing the distance, and at the Shakespeare was fifteen lengths to the good. Thence it was a walk-over for him and he passed the post twenty lengths ahead of The Coronet. Arakawa was a fair third. Time, 2.59.

PARI MUTUEL, 5 yen—Arakawa 156, Lady 128, The Coronet 57, Imperial Mistral 718; total yen 6,115—Imperial Mistral, yen 8.50.

7.—The NIPPON SOLACE, for Subscription Country Breds of Autumn, 1902, that have started during the meeting and not won a race; weight for Age. Entrance yen 5. Winner yen 200, Second Horse yen 50. Half a Mile.

Mr. May's Miss May, *123(Mr. Catto) 1
Mr. Carnegie's Leek, *130lb(Horikoshi) 2
Mr. Norfolk's Ping-pong, *123lb.(Sugiura) 3
Mr. Sphinx's Le Gone, *123lb.(Miyagawa) 0
Mr. Pond's Niicup, *130lb.(Hayashi) 0
Mr. Tatsuta's Komatsu, *123lb.(Goto) 0
Mr. Hansa's Alster, *123lb.(Mayeda) 0

After a lot of difficulty in the start, Ping Pong got away with a lead but at the quarter mile was passed by Miss May and Leek. In the sequel of a good race home Miss May passed the post half a length ahead of Leek, Ping Pong third. Time, 2.02½.

PARI MUTUEL, 5 yen—Le Gone 40, Niicup 30, Komatsu 28, Alster 450, Ping-pong 70, Miss May 308, Leek 58; total yen 4,428—Miss May, yen 14.50.

8.—The CONSOLATION RACE, for Australian Subscription horses of Spring, 1902, that have started and not won a race during the meeting; weight for Age. Entrance yen 5. Winner yen 200, Second Horse yen 50. One Mile.

Mr. Norfolk's Patsie, 137lb.(Sugiura) 1
Mr. Iris' Yamato, 140lb.(Rikizo) 2
Mr. Carnegie's I.O.U., 137lb.(Horikoshi) 3
Mr. R. Field's Temper, 130lb.(Tomioka) 0
Mr. R. Field's Try Again, 140lb.(Mr. Catto) 0
Mr. News' Figaro, 140lb.(Kobayashi) 0
Mr. Decimus' Firefly, 140lb.(Mr. Mottu) 0
Mr. Elliott's Hope, 140lb.(Ichi) 0

After a capital start Patsie went to the front with Firefly close up. At the Trees Yamato displaced Firefly and took second place, Patsie winning by five lengths or so. Time 2.02½.

PARI MUTUEL, 5 yen—Temper 26, Try Again 88, Figaro 29, Firefly 486, Patsie 85, I. O. U. 428, Hope 38, Yamato, 57; total, yen 4,668—Patsie, yen 55.

9.—The SUBSCRIPTION SOLACE, for Australian Subscription horses of Autumn, 1902, that have started and not won a race during the meeting;

weight for age; Entrance yen 5; winner yen 200, second horse yen 50. One Mile.

Mr. Cosmopolis' Suzon, 132lb.(Mr. Jarnain) 1
Mr. Carnegie's Shamrock, 137lb.(Tomioka) 2
Mr. Hansa's Elbe, 137lb.(Mayeda) 3
Mr. Kawakita's Kachikawa, 130lb.(Sugihara) 0
Mr. Sphinx's Ma Mie, 130lb.(Goto) 0
Mr. Pond's Azuma, 130lb.(Kobayashi) 0
Mr. Pond's Sydney, 130lb.(Hakodate) 0
Mr. Yodo's Toneyawa, 137lb.(Kurosaka) 0
Mr. B. Runge's Bambina, 130lb.(Kato) 0
Mr. Nishimura's Sanyo, 140lb.(Takahashi) 0
Mr. Scherz's Margherita, 137lb.(Sugiura) 0
Sir Claude MacDonald's Peking, 137lb.(Higaki) 0
Mr. Carnegie's Rose, 140lb.(Horikoshi) 0
Mr. Carnegie's Thistle, 137lb.(Mr. Catto) 0

After the usual skirmishing at the start Margherita took the lead, but was displaced by Suzon at the half mile. The latter kept the lead to the finish, winning by about three lengths from Shamrock who had run into second place, with Elbe close up for third. Time, 2.02 $\frac{1}{5}$.

PARI MUTUEL, 5 yen—Kachikawa 18, Ma Mie 81, Azuma 61, Sydney 27, Toneyawa 21, Bambina 30, Sanyo 30, Margherita 47, Elbe 19, Peking 31, Rose 26, Thistle 24, Shamrock 8, Suzon 265; total, yen 4.491—Suzon, yen 17.00.

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

While there are some foreigners who regard the Japanese as a nation of optimists, there are others who hold the opposite view and maintain that the more thoughtful Japanese are most decided pessimists. Certain it is the writings of Schopenhauer, Nietzsche and Maxime Gorky are eagerly read in this country. For some months past a controversy has been going on in the Japanese literary world as to the tendency of the teaching of the two great modern apostles of naturalism and pessimism, Nietzsche and Gorky. As it is one of our chief aims in these Summaries to give an account of the general trend of modern Japanese thought on all the many topics which engage the attention of active and powerful minds, we now proceed to furnish a brief history of the Nietzsche and Gorky discussion carried on in various publications. As early as last March an article appeared in the *Taiyō* written by Mr. Hasegawa Tenkei entitled "What is the new tendency of thought?" of which the following is the substance:—The *Teikoku Bungaku* has been writing much on what it calls Romanticism, and Dr. Takayama has published a book entitled *Biteki Seikatsu* (A Beautiful Life). This work, it is said, contains the essence of the new thought which has in recent years established its dominion over the minds of reading, intellectual young men. Dr. Takayama's book is a reproduction of the teaching of Nietzsche*, so that though new here, it is not actually new. One of the leading characteristics of European literature in the nineteenth century was the prominence it gave to the development of the individual. The teaching of Nietzsche was by no means a reaction against that principle, but rather a further development of it in the direction of absolutism. The use made of Nietzsche's teaching here in Japan, proceeds Mr. Hasegawa, by the young men who proclaim his doctrine under the title of "the new ideas" is not one that we can commend. They push his doctrine to extremes and proclaim a theory that if allowed would soon undermine morality. This teaching is said to be advanced, but to us it seems retrogressive. It is evident that Mr. Hasegawa disapproves of Nietzsche's teaching, but he goes on to write in a later article in the same magazine (*vide* the Sept No. of the *Taiyō*) in praise of Maxime Gorky's views of human life. There are those, says Mr. Hase-

* It would have been perhaps more correct if Mr. Hasegawa had said that Dr. Takayama has given the Japanese public one aspect of Nietzsche's many-sided teaching. In one of the best short accounts of Nietzsche's philosophy we have met with, a book called "La Philosophie de Nietzsche," by Henri Lichtenberger, the artistic side of Nietzsche's mind is referred to in the following terms: "Nietzsche n'est pas seulement un penseur: il est aussi un artiste; et le sens artistique est aussi précoce et aussi profond chez lui que l'instinct scientifique et religieux" (p. 24). It is not to be wondered at that this side of Nietzsche's teaching should have specially attracted certain Japanese minds.—(WRITER OF SUMMARY).

gawa, who regard Gorky's teaching as the gospel of vagabondism and as mere animalism, and who think that Gorky's system is no better than that of Nietzsche's, speaking of both schools of thought under the term *Kinjū-tetsugaku* (a Philosophy founded on animal instincts), but those who think thus have failed to grasp the significance of Gorky's pictures of life. His object is to show not so much what ought to be, but what is—what exigencies, miseries and crimes men have been forced into by the circumstances in which they are placed.†

In the *Yomiuri Shimbun* a writer who adopts the *nom de plume* of "Kennan-dōshi" writes on the same subject in the following strain. The work of translating is proceeding apace. Gradually the country is being supplied with an immense variety of ideas and is being made acquainted with a large number of conflicting theories and views of life. In the study of foreign works it seems to me important to distinguish between authors that are studied for their style or on account of the aesthetic ideas to which they have given expression and authors which are studied on account of their claims on rational grounds to be read and followed. In discussing the views of Nietzsche and Gorky our writers fail to distinguish between the aesthetic side and the ethical and philosophic side of the systems of thought elaborated by these two writers. The tone of much that is written on this subject is too exclusively laudatory on the one hand or condemnatory on the other. One set of writers do nothing but harp on the sharpness of the thorns, while another set are perpetually dwelling on the fragrance of the rose. Some are prejudiced against the teaching of both these writers on account of certain blemishes which characterise it, and so reject the rose on account of its thorns. In order to thoroughly comprehend the teaching of Nietzsche and Gorky a careful study of the history of thought in Germany and Russia during the past thirty years must be made. Both these great minds are the products of psychical and philosophic causes of a pronounced kind, and so in order to understand the men one must become thoroughly conversant with the world of thought that generated them.

In this connection it may be well to mention that Dr. Kuwaki Genyoku has recently published a work on the ethical teaching of Nietzsche entitled *Nietzsche Rinrisetsu ippan* (A part of Nietzsche's Ethical Teaching), which sells at 50 sen a copy. As representing a very different school of thought Mr. Kimura Takarō, of Nippon Shūgi fame, has just given to the reading public a book whose title is likely to attract attention. It is called *Bairon, Bunkai no Dai-ma-ō*, "Byron, the Demon King of the Literary World." A writer signing himself "G. D." has in the *Kokumin Shimbun* strongly condemned both the above works as wanting in sobriety and altogether lacking in balance, that is to say, he disapproves of what he conceives to be Byron's theory of life and morals and also of Nietzsche's more philosophic, but in "G. D.'s" opinion, equally dangerous views. Byron, says "G. D.," adopted Pope's aphorism "Whatever is, is right" and Nietzsche gave expression to the same idea when he said:—*Nichts ist wahr; alles ist erlaubt*. Though in neither case do the above quotations represent the central principles of the views espoused by these two gifted writers, it is quite true to say that they are both leading Nihilists in the literary world; that the Japanese reading public who are ever thirsting for something out of the common should be supplied with such soul-destroying mental food as these books furnish is we suppose unavoidable, proceeds "G. D." That Mr. Kimura should actually go so far as to praise Byron's numerous misalliances and to represent that in Byrons which amounted to a

† This view seems to us to be correct. Gorky certainly has no pity for his vagabonds, nor does he ask for sympathy for them. He acknowledges that they are destitute of all human sentiments, but the reader is made to love their genuineness, freshness, and thirstiness of nature and sees that they are far more interesting as a study than the respectable, commonplace, conventional types of humanity, with whom they are occasionally contrasted.—(WRITER OF SUMMARY).

disease as though it were a virtue will not surprise any one who has observed how persistently of late years Mr. Kimura has figured as the apostle of Hedonism. To "G. D.'s" strictures Dr. Kuwaki has replied at some length in the columns of the *Kokumin Shimbun*. Mr. Kimura asserts that his motive for administering a dose of Byronism to the reading public just now is that his poetry is the best cure for the loathsome flattery, hypocrisy, pretence and general feebleness of the age. These are his exact words:—*Konnichi no gotoki yowaki bungakusha ōki jidai, hetsurai, gizen gibungakusha* (counterfeit literary scholars) *ōki jidai wa, subete shakai no jibutsu todokōri, ningen no fuhai seru jidai ni oite, warera wa yenyen taru rekka* (raging fire) *no Byron wo yō su, bōfu teki jimbutsu naru Byron wo yō su*.

* * *

A great deal of discussion has been carried on in various magazines and newspapers on the term of military service to be adopted by Japan. Germany having already decided in favour of the two years period and France and Austria having shown signs of willingness to follow suit. Dr. Amano Tameyuki has in the pages of the *Tōyō Keizai Zasshi* strongly recommended Japan's adoption of this reform. He is supported by Lieutenant-General Tani, but the opinion of the majority of military men is decidedly in favour of the 3 years' period. Those who argue for the shortening of the term of military service have quoted at considerable length the views of those Austrian writers who are opposed to the short period and have succeeded in showing that Austria's difficulties are not felt here. The question to be settled is whether efficient soldiers can be turned out by a system that only keeps troops under regular training for two years. According to some writers it is a question of numbers versus efficiency. A writer in the *Kokumin Shimbun*, who has published no less than 13 articles against the introduction of any change in Japan, maintains that Germany altered her system solely with the object of insuring to herself the command of a larger number of troops than France had at her disposal a few years ago. The Germans admit, according to this authority, that it is not possible to get the same efficiency out of the 2 year men. It takes fully three years for men to learn the profession thoroughly. It is not possible for the majority of men who are quite unaccustomed to handle a rifle to become reliable shots in less time. As regards expense, says the writer we are quoting, in the long run the short service plan will involve a larger expenditure than the 3 years' period now in operation. Full statistics are given on this point. The military writers on the subject, according to the *Jiji Shimpō*, assume an air of superiority of knowledge on the question at issue and try to make out that it is a point on which none but experts can express an opinion. But here as in England, continues our contemporary, educated men when the facts of a case are in their possession are pretty good judges of where the weight of argument lies, and the time has gone by for military experts to pooh-pooh public opinion on this and other questions connected with their profession.

* * *

Under the title "The Question of the Restrictions to be placed on the mutual intercourse of Civilised countries," the *Chūō Kōron* writes as follows:—It is a fact that with the growth of medical knowledge and the adoption of sanitary measures in all civilised countries diseases of various kinds are on the increase. It is said that no country is further advanced in the matter of sanitation than Germany, yet even these statistics show that disease, instead of diminishing, prevails to a greater extent than ever. It is the same with England, America and France. As disease is mostly propagated by intercourse between nations and communities, more attention should be given to preventive measures. . . . We are much more civilised according to Western notions than were our ancestors, but we may well envy the health and strength which they possessed. The Boers are not so civilised as the English, and yet we are told that the eyesight of the former is on

the whole far better than that of the latter. How would the eyesight of our young men compare with that of the youths of the Tokugawa era? Is not the amount of defective sight in this country something deplorable? This is one of the penalties we have had to pay for the adoption of foreign ways. In connection with the physical effects of certain surroundings some rather curious facts have been stated in foreign periodicals. It is said that compared with Europeans Americans invariably speak in loud tones and that the reason of this is that the majority of Americans are brought up amid the din of cities where conversation can only be carried on by people screaming at each other. It is affirmed that the ears of Londoners are less keen than those of people who reside in the country. In Japan the sense of smell has certainly deteriorated. The noses of our ancestors were as keen as those of hunting dogs. In Europe and America there is far more trouble with teeth than there used to be in the days when men and women ate simple food. Men get bald sooner than they did in the days when the hair was seldom combed or brushed. In England it is doubted whether the present race of Britons could endure the strain of such fights as were common in Nelson's time. The general effect of Occidental civilisation seems to be to promote physical weakness. The modern Parisian and the ancient Spartan are in this respect about as opposite as the poles. Sanitary measures are confined too exclusively to restrictions, to condemning this and that and do not deal with the rules, regulations and principles on whose observance anything like vigorous health depends. It is said that in North China last year our troops compared favourably with Western troops as regards health. Was not the reason of this the fact that our men are as yet comparatively free from the diseases that have come to be invariably associated with Occidental civilisation.

* * *

To the magazine for which we have just quoted Dr. Taguchi Ukichi contributes an article entitled "A defect in the Organisation of Society," of which the subjoined is the pith. Most of the evils of which moralists make so much in their writings are traceable to inherent defects in the organisation of modern Japanese society and in the distribution of property. To denounce practices that have grown out of the prevalence of evil states of society or bad habits while making no effort to alter the condition of things which lies at the basis of the whole of our Japanese life, is of no use whatever. One of the great evils of our time is the general love of idleness among well-bred people. It is, as Dr. Takagi has pointed out, partly traceable to the practice of lolling about on mats and the like, but there is another reason for it. Most of the well-to-do people who spend their lives in dreaming away existence have never had to work for money and have imbibed the notion that working for a livelihood is an inferior state of existence to that of the *far niente* life they are privileged to lead. Did the evil attendant on the prevalence of such views end with the death of those who hold them it would not be so bad, but idleness leads to general physical weakness, to the begetting of inferior children and the like, and thus it happens that the whole nation is sadly weakened by the presence of a race of idlers of the sort we find in Japan. Look at the nobility. Originally our *daimyō* were stalwart warriors, who commanded their armies in person and went through all the hardships of campaigns that lasted for months without feeling any ill-effects therefrom. But the present race of noblemen are not capable of sustaining any fatigue or hardship. The existence of a class of men who are ignorant of the value of money, because they have never had to earn it, is the source of constant evil. It is on these men that so many undesirable members of society thrive. Concubinage, the practice of using *geisha*, and the like, all depend largely on the existence of a leisured wealthy class. Looking at this question from another point of view, it is recognised that though hunger is not a valid reason for stealing it extenuates the crime very considerably. Is it not a fact that prostitution, the practices of *geisha*, and even concubinage,

are to a large extent the result of financial distress, of the immense difficulty of earning a living by pursuing ordinary callings? It is the case in America that any man who is prepared to work can earn a living, but it is not so here by any means. Property needs redistribution in order to remedy existing evils. (*Tekitō ni zaisan no bumpai saye okonowarete oreba, shizen kakaru genshō wa kiyuru*)* If hunger drives men and women to do what society condemns, surely some steps ought to be taken to alter the circumstances which condition the lives of such persons. . . . The trouble is that there is far too much conservatism with us still, and the development of the characters of men of a new type is very much hindered by the indifference with which they are treated by the circles in which they mix. Our system of patronising talent and giving pecuniary help to those who have shown ability has been carried too far and has in a great many cases prevented the full development of the powers and characters of the recipients of this State protection. Men whose whole education has been paid for and who never know what it is to want a cent lack the spirit of self-dependence possessed by those who have had to shift for themselves. It is true that most of our very best men lose all interest in the studies of youth when they take their seats in Japanese Cabinets in combination with men of the old school of thought. This fact has recently been impressed on the minds of two statesmen of my acquaintance, one of whom studied in France and the other in England. They say that their former fellow-students are now carrying into practice the principles and theories that they adopted when young, but that in Japan there is no opportunity for this to be done. (*Nihon wa shakai no soshiki ga fukuwannen de, hogo shūgi no heigai ga jinbutsu wo koroshite shimau kekkuwa to naru.* "In Japan the organisation of society is imperfect, so that the abuses arising from the principle of protection have the effect of killing off men of character"). A Society, it seems, has been formed that calls itself the 苦學社 Kugakusha (Association for helping needy Students). Well, one of the members came to me to ask for money for this Society. I told him that he seemed not to understand the very meaning of the term *kugaku*, suffering when studying,† and that instead of being called a *kugakusei* (a suffering student) he should be named *kojikisei*, (a begging student). What claim has any young man when in perfect health to be living on the charity of others? Let such become type-setters, or what not, and earn enough money to pay their school fees. Charity of this class does more harm than good. It only encourages the spirit of dependence on others which is already far too prevalent among our young men. It is the very opposite of this that we need to see developed in this country. There is one thing in the possession of the Anglo-Saxon race which may well excite our envy, that is the quiet but determined way in which each individual among them maps out his own course and lays deep and sure the foundations of life-long independence.

* * *

To some the existence of a powerful Association patronised by Prince Konoe and Viscount Nagao, often referred to in these columns, known as the Tōa Dōbunkai (East Asia One Script Society), seems to be a step towards an alliance of the yellow races. Whatever the final object of the Society may be, it is important that the public should be furnished with information as to the class of work that it is actually carrying on. We find in the columns of the *Nihon Shimbun* a full account of the doings of the Society, which we transcribe in an abbreviated form. The principal objects which the Society sets before itself are the collection and publication of reliable information on Chinese and Korean affairs, the opening up of those countries by means of education and

* "If only property were suitably distributed, these phenomena would disappear of themselves." Are we to understand by this that Dr. Taguchi is at heart a socialist? (WRITER OF SUMMARY.)

† The term is more frequently used in this sense than in the sense of "assiduous study" given in Brinkley's Dictionary.—(WRITER OF SUMMARY.)

the press, and the encouragement of closer intercourse between the Japanese and their near neighbours. The work carried on by the Association in thus described by the writer of the article from which we are quoting:—

CHINA.—At Shanghai during the past two years there has been a school founded by the Dōbunkai called the Tōa Dōbun Shoin (書院). In China the term *Shoin* is used for schools. This institution was first established at Nanking, but was moved to Shanghai and considerably enlarged about two years ago. In this school there are 169 Japanese students under preparation for entering the commercial or political world in China. The course extends over 3 years. 142 students are to become merchants and 27 will become politicians. The expenses of these students are borne by the Japanese local authorities and firms which have sent them over or in a few cases by the parents of the students. Mr. Sugiura Jugō, the well-known Tōkyō educationist, is the Director of the Shanghai School, and the former Director of the Second High School, Mr. Kikuchi Kenjiro, is the Dean and superintends the teachers. He has 14 teachers under him, one of whom is an American and three of whom are Chinamen. Mr. Sugiura is now in Tōkyō, being Director also of the Tōkyō Dōbunshoin, so that the management of the Shanghai school is left almost exclusively to Mr. Kikuchi.

FUCHAU.—There is a school belonging to the Association at this place called the 東文學堂 Tōbungakudō, whose object it is to educate Chinese students, who are taught Japanese and instructed in general subjects. Though the school was first started about four years ago by a few enthusiasts in the cause of education residing in Fuhkien, its subsequent success was largely owing to the efforts of a member of the Dōbunkai, Mr. Nakajima Shinyu. So highly is the establishment thought of that last July the Fuhkien local Government granted an annual sum of 1,000 *yen* towards its support and have allowed its graduates to rank with the graduates of the Fuhkien University. The applications for entrance to this school last July were numerous. For the department of General Knowledge there were 100 applicants against 40 vacancies, and for the Political Science Department 329 applicants against 34 vacancies. There are at present 154 students in the school. The graduates last year numbered 20.

LINTONG.—At Sawtow there is a school that bears the name of the Lintong Tōbungakudō, which was founded 2 years ago. It suffered from the Boxer troubles, and was closed for a while, but is now commencing work again. Its objects are the same as those of the Fuchau school, though on account of the comparative ignorance of the people in the Lintong districts it is not so prosperous as the Fuhkien school. But the local authorities are beginning to recognize its importance. The students in attendance now number 100.

KOREA.—(1) At Pyongyang there is a school known as the Nichigo Gakkō, (Japanese Language School), which was founded in 1900. It has 90 students who are studying the Japanese language and general subjects under Mr. Mafuji Yoshio, the Director of the school, and two other teachers. (2) At Songjin (in Hongyondo) there is a Gakudō founded by the Dōbunkai that has about 40 pupils. (3) At Sōul there is an excellent school, originally established by foreigners, which now receives help from the Dōbunkai and is managed by Japanese. It is attended by over 100 students. The yearly graduates from this school become officials, school-teachers, or enter business. In all cases they are able to fill posts of influence. (4) The Kannan Gakudō has been in existence 4 years. It was started by a Japanese called Yakushiji Chirō in Kang-Kyong, Chhng-Chhondo, but in its early years it made little progress from want of funds. It is now under the protecting wings of the Dōbunkai and promises well. The students in attendance number 45. (5) The Tatsujō Gakkō is a school that was only placed under the superintendence of the Dōbunkai last year. It is situated in Taiku, Kyongsando and is attended by 35 students.

In Tōkyō there is the Tōkyō Dōbun Shoin, which is a preparatory school for Chinese students who intend to enter various technical schools. It is situated in Kanda (Nishiki-chō) and is attended by 60 pupils, who mostly come from the Southern provinces of China. Mr. Sugiura, the Director, has 11 teachers under him in this school. Its enlargement, it is said, will soon be necessary, as there is an ever increasing demand for this class of education on the part of the Chinese. The above account only covers the direct educational work of the Dōbunkai. In many indirect ways the Society is helping forward the enlightenment of China and Korea. It pays salaries to men employed in certain Chinese schools and frequently acts as a go-between when the Chinese are desirous of employing Japanese military instructors.

* * *

Learned Japanese seem to find endless material for controversy in their old code of chivalry known as Bushidō. The part it has played in the formation of national character in the past and its suitability for adoption as a basis of ethics in this twentieth century are subjects on which there is a great variety of opinion. It seems to be generally considered that "The Soul of Japan," by Dr. Nitobe, somewhat overstates the case of the Bushidō. The language strikes one as being exaggerated in some parts. In the pages of the *Tetsugaku Zasshi* (Nos 187 and 188) Mr. Kobayashi Ichirō, under the title *Bushidō Hihan*, discusses at great length but with no little clearness the function fulfilled by the old code and analyses with considerable acuteness its varied contents. We can do no more than give a brief outline of his views. The Bushidō was essentially a practical code that was the embodiment of the feelings and sentiments of practical men. What is specially worthy of note connected with it is the manner in which it adjusted the relations of those two great factors in man's inner nature, the feelings and the will. The former were made entirely subservient to the latter, and the latter under the influence of the code reached an extraordinary degree of development. When once he had set his mind on a given course the ancient *samurai* knew no fear, no doubt, and no flurry. We may well ask whence came this wonderful resolution that enabled men to face death with stolid complacency? It was the result of a variety of concurrent, co-operative influences which we proceed to enumerate. (1) There was the high sense of duty inherited from the warriors of the Ōchō era (pre-Fujiwara times). (2) Combined with the above there was the teaching of the Zen sect known as the 觀心法, *kwanshin-hō* (Way of getting to know the heart). The essence of the teaching of this sect was that true happiness comes from cultivating utter indifference to outward things, that truth can only be discovered by introspection. It taught resignation and self-denial and represented the life that each mind lived apart from his fellow-men to be the grandest of lives. These ideas helped the *samurai* to think and act alone and tended to fortify his soul against all appeals made to his feelings and against proposed unworthy compromises. (3) The wars of the time furnished excellent opportunities for putting the warrior's principles into practice and there is nothing that strengthens principle as much as practice. (4) Self-devotion and self-sacrifice were regarded by the society in which the warriors of whom we write lived as the highest virtues and these men identified themselves with their native provinces and their lords and knew no honour and no happiness apart from these. When they laid down their lives in the cause of their country or of their masters, it was not done as a kind of payment for benefits received, but rather out of thorough sympathy with the cause for which they died. (5) The *samurai* were impressed by a high sense of their own importance as models for the imitation of all other classes, and they strove to live up to the position which society had accorded to them. Matsudaira Rakuō, the noted Bakufu Councillor, thus states the position which the *samurai* occupied in his days. "Samurai are set high above the four orders of the people as men whose chief duty it is to observe the laws

of justice and truth. Therefore they neither till the ground, manufacture articles, nor engage in trade, but sit with folded hands, eating till they are satisfied and keeping themselves warm, with nothing whatever to do but invariably to avoid deviation from what is right." We have given the chief elements of strength in the character of the *bushi*, says Mr. Kobayashi, now let us proceed to consider what were his defects. (1) *The sense of personal rights was wanting in the samurai.*—He became the tool of others and was far too ready to sacrifice himself on occasions when in other countries equally brave men would have asserted their own claims for consideration. The idea of individual rights, which has figured so prominently in modern European civilisation, originated with the Greeks. The reason of the suppression of this sentiment in Japan was the prevalence of Confucian and Buddhist teaching, both of which are fundamentally opposed to it. In the highest type of life the assertion of personal rights and devotion to the cause of society do not actually come into conflict. They modify, and harmonise with, each other. (2) *The samurai were responsible for a narrow-minded system of caste that did an immense amount of harm.*—Originally they were in no way superior to other classes of the community. The rank they occupied was as a matter of fact bestowed on them by the classes who tilled the ground and furnished them with food. As a class they could only exist by the suffrage of the people. The art of war does not entitle those who follow it to assume a higher rank than those who pursue the more necessary arts of peace. The doctrine that all intelligence and all goodness were confined to a special class tended to debase the lower orders and to prevent them from developing the powers with which they had been endowed. It was the establishment of this caste system that at the end of the Ōchō era resulted in such a large influx of intelligent men into the Buddhist priesthood. The sons of commoners who were blessed with more than ordinary intelligence saw no suitable sphere for the exercise of their talents elsewhere; so they became priests. (3) *The inquiring and exploring spirit was wanting in the ancient bushi.* It may at first sight seem to be unreasonable to expect warriors to be pioneers in general knowledge. But our Japanese *samurai* were not ordinary warriors. They were educated men, as education went in those days, and they claimed to be the leaders of society. Even such a noted *samurai* as Yamaga Sokō despised the search for knowledge and the spirit of inquiry. What knowledge they did seek to acquire was not sought after for its own sake, but only as an aid to morals. (4) *Public spirit as known and practised to-day was unknown to the ancient warrior.* His self-culture and his close observance of the etiquette of his class had not the welfare of the community as a whole as its object. He did not believe that the virtues which he practised could serve as a model for the artisan and the peasant and could tend to better their lots. He knew of no public in our sense of the word. His lord, his parents and his native province were the only concerns of which he took cognisance. To all else he was indifferent. Thus it is seen that in order to form a suitable basis for twentieth century ethics our Bushidō needs to be considerably modified in some particulars and developed in others.

* * *

In recent years Dr. Tsubouchi Shōyō (Yuzō) has, in addition to his duties at the Waseda Semmon Gakkō, devoted himself to the study and translation of standard English books. He has just published a work called 英詩文評釋 *Yeishibun Hyōshaku* (Criticism and Explanation of English prose and verse) in 2 vols. to which the *Kokumin Shimbin* refers in very flattering terms. In reviewing the book the *Kokumin* says that no such masterly work has hitherto been published in Japanese. Very few Japanese readers of foreign books thoroughly comprehend and appreciate the meaning of the original, and the explanations of passages that are commonly heard in schools do not usually go beneath the surface of the language used. Dr. Tsubouchi's

work will be an immense boon to all Japanese teachers. Vol. I. sells at 70 *sen* a copy and Vol. II. at 60 *sen*. The work is issued by the Waseda Semmon Gakkō Press.

The *Peking Rōjō* (The Defence of Peking) is the title of a work embodying information supplied by Lieutenant-Colonel Shiba. It contains a minute account of the troubles through which the besieged passed from June 10th—Aug. 8th, 1900. The narrative, it is said, reads like a romance, so vividly are the stirring events described. From a military point of view Lieut.-Colonel Shiba's account of the life and military operations of the besieged should prove most valuable, as it is history written by an expert, who took a foremost part in the defence of the Legations.

The *Shina Tsūshō* (通商) is the title of a very elaborate work on Chinese Commerce published under the auspices of the Shina Chōsa Kai, a body that devotes itself to collecting and publishing information on Chinese affairs. It is founded on consular and other reports and on special investigations carried on under the superintendence of the officers of the society. It contains minute accounts of China's foreign commerce, of her mines and her banking system. The work should prove a valuable reference book for all who contemplate trying their luck in the neighbouring continent.

NEWS OF THE WEEK.

A Japanese paper says that there is some talk of the Bank of Japan again lowering the rate of interest at no distant date. The reason assigned this is that the money market is extremely dull at present.

The Nanao Railway Company is about to issue debentures to the amount of *yen* 5,000,000 for the purpose of replacing its plant and of meeting various other expenses required for the expansion of its business.

The Yokohama Municipal Authorities, at a meeting of Nov. 17th, voted a sum of *yen* 4,800, which the authorities intend to present as rewards to officials and others, 117 in all, who worked faithfully in the matter of stamping out the pest in this port.

In consequence of the action of the French Jockey Club in suspending J. Reiff, the American jockey, the stewards of the English Jockey Club have announced in the *Racing Calendar* the withdrawal of Reiff's license to ride in England.

The British Admiralty has given out contracts for the construction of three warships described as "scouts." They will have a speed of 25¼ knots, when in fighting trim; their engines will be of 17,000 horse-power, and their seagoing qualities will be superior to those of the torpedo-boat-destroyers.

It is hoped that the audience will gather early at the Public Hall this evening and thus allow of "Confusion" beginning punctually on the stroke of nine o'clock. Consideration for the reasonable wishes of the majority, if nothing else, should be sufficient to prompt dilatory theatre-goers to amend their ways.

Early on the morning of Nov. 18th Mizutani Ishi, a maid servant of a public bath-house near the Daijingu shrine, Uyeno-machi, Yokohama, was badly cut in the throat and chest with a knife by Yagimoto Tokichi, an employee of the bath-house. The latter was at once arrested. The matter was the outcome of a love affair.

The steamer wrecked on Three Kings Island is doubtless the *Eltingamite*, a steel vessel; built at Newcastle in 1887 by Messrs C. S. Swan and Hunter; owned by the well-known Australian firm of Huddart, Parker & Co. Ltd., and registered at Melbourne. Her chief dimensions were: length, 310.5 feet; beam, 40.8 feet, and depth 19.7 feet. She was commanded by Capt. Le Neven.

The Osaka Shosen Kaisha has decided to construct two steamers, one having an aggregate

tonnage of 250 tons with 11 knots speed and the other an aggregate tonnage of 200 tons with 12 knots speed. The former will run between Ujina and Mitsuama in the Inland Sea, and the latter between Anping and Hongkong. The order for these vessels will shortly be placed with a ship-building yard in Japan.

A Japanese paper reports that an American lady in Yokohama named Alexandra Russell, who has been studying the "Zen-gaku" (literature of the Zen denomination of Buddhism) under the directions of the chief priest of the Engaku temple in Kamakura, removed her abode to the Shoden-in temple of Kamakura on November 12th for the purpose of further studying this particular branch.

An Osaka report says that an announcement as to the disposal of lands in the Japanese settlement, Tientsin, having been made, the Naigai Cotton Company of Osaka has applied to purchase land to the extent of one thousand *tsubo*. The market price is said to be about *yen* 12 per *tsubo*. The principal business houses in the Japanese settlement are the Mitsui Bussan Kaisha, the Specie Bank, the Naigai Cotton Company and a few others.

Will the responsible authorities kindly give some attention to the state of the Pier—we mean to that part of it upon which people walk? There is a hole in the flooring into which a person might tumble even in daylight and lose his life, and into which a foreign child would have run on Saturday last had not a lady who had observed the danger checked her in the nick of time. The place during daylight is marked by no warning of any kind. Should any accident occur after their attention has been publicly called to the existence of this menace to human life, the Pier officials will find it difficult to shirk responsibility. Perhaps the matter might fittingly come under the notice of the Harbour Police.

With reference to the proposed cutting of a tunnel through the Bluff, Yokohama, it appears the matter has been definitely settled. A few days ago, persons interested in the scheme held a meeting at the Honmoku Club and after a good deal of discussion resolved to appoint a committee of eleven. A design drawn by Mr. Mita Zentaro, chief expert of the Yokohama Water Works Bureau, was presented for consideration and passed. The tunnel will be cut to a width of 24 feet and its entire cost is put at about *yen* 60,000. It was arranged that the Yokohama City Authorities should be requested to defray one-half of the cost and that the remainder be raised among the citizens, Messrs. Minowa Saburo, Ishikawa Seiyemon and the proprietor of the Myokoji temple having proposed to subscribe *yen* 10,000 jointly. A formal application for a grant-in-aid will be presented to the City Office at an early date.

With regard to the Government Iron Foundry in Kyushu, the *Asahi* has a paragraph to the effect that whatever steps may be taken by the Authorities, either to convert it into a private concern or continue it as a semi-official institution as at present proposed, it will never become a paying concern unless the methods of working the establishment are radically changed. The paper suggests that the first thing to be taken into consideration is to economize expenses in the matter of transportation of iron ore from various mines, and then proceeds to state that the Authorities should at once operate the Akaya iron mine in Echigo with a view to transporting the output to Matsuzaki, a sea-port in that province, instead of forwarding the ore to the foundry direct, and establish a melting furnace in that part for the purpose of turning out pig iron there, coal being supplied from Hokkaido all the time. Another smelting furnace should also be established in the neighbourhood of Otaru, Hokkaido, for a similar purpose and ore from the Akaya mine be sent thither in exchange for coal. Pig iron turned out at these places would then be forwarded to the Foundry to be refined into steel rails and other articles. By so doing, the establishment which is now in difficulty will

ultimately find itself in a position to be able to place its output on the market at moderate prices.

Mr. M. de Oliveira Lima, of the Brazilian Legation courteously informs us (in a letter which unfortunately reached us too late for its contents to be utilised in Thursday's issue) that a telegram has been received at the Legation from Rio de Janeiro stating that the new President elected on March 1st., Mr. Francisco de Paula Rodrigues Alves, was inaugurated on the 15th inst. and that his Cabinet includes the following: Foreign Affairs—Baron do Rio Branco, Minister at Berlin; War—Marshal Francisco de Paula Argollo; Navy—Rear-Admiral Julio de Noronha; Finance—Senator Leopoldo de Bulhens; Industry and Communications—Senator Lauro Muller; Interior and Justice—Congressman Jose Joaquim Seabra, who is also acting as Minister of Foreign Affairs until the arrival of Baron do Rio Branco.

CORRESPONDENCE.

RELIGION AND PHILOSOPHY.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In answer to the note by "Reader" in your issue of the 13th, I am not so well acquainted, possibly, with the schoolboy's waste paper basket as your correspondent may be; but I should like to point out to him that it is no disgrace for any one to investigate roots and meanings; and that the meaning of "Christos" is (as all students know) "oiled" or "anointed," and that of "Chrestos" (which to a Greek has always had the same sound as the first, and therefore quite naturally comes into the mind on hearing it) has the meaning of "good, noble, upright." What your correspondent has to object to in this exposition, or wherein it is a disgrace, is more than can be seen with such wisdom as is possessed by

Yours respectfully,

THE WRITER OF THE LETTER.

Tokyo, November 13th, 1902.

IMPERIAL INVITATIONS.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—I see in the *Japan Daily Mail* of to-day correspondence, "Imperial Invitations," with my signature. This correspondence as well as the Skat—Advertisement in the *Japan Times* of Sept. 30th are falsifications. The person who has committed these perfidies, likely will try some more experiments.

DR. MENGE.

Tokyo, November 14th, 1902.

THE TRIAL OF JEANNE D'ARC.

Jeanne D'Arc, Maid of Orleans. The Story of her Life as set forth in the Original Documents. Edited by T. Douglas Murray. (Heinemann. 15s. net.)

THE publication of this translation is a notable event for the English reader. Sixty years ago Quicherat discovered in the French archives the official texts of the Trial and Rehabilitation of Jeanne d'Arc and embodied them in his *Procès de Condamnation*, &c. For many years it has been possible to buy a French edition of the official text for a few francs. But not till to-day has an English publisher thought it worth his while to issue a well-edited English translation, arranged and annotated by a competent scholar.

The *Trial and Rehabilitation of Jeanne D'Arc* is one of those rare documents of life, which it is absurd to class merely as historical documents. It ought to be recognised as a classic in literature, and should be placed on the shelf of every intelligent reader as a living story, a profoundly mournful and indeed terrible narrative of human fatuity and human frailty. It not only contains the testament of one of the finest spirits known to history, Jeanne d'Arc, but it is also one of the deepest commentaries on the greed and callousness of the human mind and an artistic narrative thrown together by the hands of those designing artists Time and Chance. It so happens that the official account of the great drama played in 1431 in the Castle of Rouen (reported almost verbatim so far as interrogations and Jeanne's answers are concerned) falls into artistic form inasmuch as the language of the Depositions, the Exhortations, and Admonitions, the Articles of Accusation, the Recantation, and the Sentence of Death give us the psychology of the Prosecution in no less complete a fashion than Jeanne's replies to her judges reveal absolutely her own extraordinary and

exalted spirit. That is to say, that the verbatim report of this damnable trial, though unfortunately throwing but sidelights on prime movers behind the scene, the English nobles, not only gives us the very soul and body of the time, but by its clear exhibition of the whole machinery of Church and State arrayed to crush this girl of twenty, and half foiled, having resort to both fraud and violence, we are really brought more into the very heart and secret truth of things than if Jeanne d'Arc's life had been treated artistically by the greatest of the great creative artists.

The trial at Rouen was in fact a pre-arranged affair, in which Cauchon, the Bishop of Beauvais, practically undertook Jeanne should be found guilty of heresy and be condemned to the stake. But to secure the verdict against her the law had to be violated, and all the forces of fraud, calumny and deceit brought into play. The ecclesiastics selected to try Jeanne were, as we should say nowadays, "a packed jury"; no counsel was allowed her; no evidence was called on her behalf; the few lawyers and doctors in divinity who did not show themselves prejudiced against her were, as was De Houpperville, driven away, imprisoned, or silenced, or, as Lohier, they refused to take part in illegal proceedings, or as the Dominican, Brother Ysambard, for giving Jeanne advice were threatened by the English with death. Further, the decision of the University of Paris against Jeanne was based on a concoction of her evidence submitted by the Bishop of Beauvais. And lastly, Jeanne was not only illegally kept in the hands of the English while she was being tried by the French Ecclesiastics, but the evidence goes to show that after her Recantation, and her assumption of a woman's dress, Jeanne was violently treated in the prison, was molested, beaten, and ill-used by the lowest English soldiers so that she might "relapse." Whether she was actually violated or outraged in prison by an English noble, as Brother Ysambard states, or not, there is not the least doubt that the English were prepared to stick at nothing in order to bring her to the stake. In short, in this most infamous and cowardly trial, there are only two bright spots in the proceeding—first, that certain of the clerics present were evidently anxious to thwart the Prosecution and save Jeanne from death; and secondly, that though preparations were made for torturing Jeanne, and the instruments and executioners shown her, ready for their unholy work, Jeanne's superb answer seems to have shamed her Judges, and they decided "that it was expedient to delay it, at least for the present." That the Bishop of Beauvais wished Jeanne to be tortured seems to be implied by his action, three days later, in again taking up the matter:—"We did in particular consult them (the Assessors) on the question of submitting Jeanne to the torture." But only two out of the fourteen Assessors voted for the torture, and the matter dropped. Of the figures in the trial the two that stand out pre-eminent are of course Jeanne herself and her persecutor Pierre, by the Divine Mercy Bishop of Beauvais, that "Reverend Father in Christ." The smooth and lying spirit of this worldly prelate is admirably reflected in the bland hypocrisy of his general comments on the various stages and steps taken in the trial, also in the skill shown in the underground manipulation of the Bishop's own creatures, and the utilization of the various Archdeacons and Canons in the public Exhortations and Admonitions, done professionally and above board.

Of Jeanne herself the attentive reader of these hundred pages of her answers to her judges can only repeat the words of the great Count de Dunois, who fought by her side. "I think that Jeanne was sent by God . . . there was in her something divine," inasmuch as her faith, her courage, her strength of soul and her clairvoyance caused her indeed to perform miracles for her country. If we look at Jeanne solely through the medium of her own responses to her judges, one knows not whether to marvel most at the intensity of her faith or at the subtlety of its wit which put her enemies to confusion. "Do you know if you are in the grace of God?" she was asked, a most dangerous and fatal question to her had she answered yea or nay. But she replied, "If I am not may God place me there; if I am may God so keep me." Her intense courage, prudence, faith, and common sense are sufficient to account for her earthly success, but they cannot account for her marvelously fulfilled predictions. Her "Voices," as Mr. Andrew Lang has well said, were her own inner convictions and the depths of her own soul speaking to her in the guise of heavenly visitants. The most pathetic and unbearable passages in these documents are to be found in the glimpses the Rehabilitation affords of those hours of her mental agony when Jeanne, after long days and nights of confinement with the lowest English jailors, beset and worried ceaselessly by the snares of the pious ecclesiastics, surrounded by her enemies, and weakened by illness, broke down, and for a little time was indeed only a frightened and tortured girl of twenty. Marvellous it is how she kept her courage, her will, her supreme faith in God in the face of the crushing array of

malignant faces; at her Recantation, as Manchon says, "*She certainly smiled.* The executioner was there with the cart, waiting to take her to the burning"—and after her abjuration she entreated, "*Lead me to your prisons that I may be no longer in the hands of the English.*" To which my Lord of Beauvais replied, "*Lead her back whence she was taken.*"

The peculiar psychological interest of *The Trial and Rehabilitation* is, in short, that it stands out in literature as the type and symbol of the countless thousands of unrecorded cases where brave and fine spirits have been ensnared and doomed by the hate and callousness of many enemies interested in their death. It is the daily drama of muddy human motives, human baseness, and average weakness that is here brought into high significance, and realised for us so terribly, simply because the figure of the victim is at once so heroic, so simple and pure, so brave and compassionate. It is not often that the meshes of the web spun deliberately by crafty men for their victims' undoing are shown forth in the light of day, but artistically the beauty of the trial is that the hypocrisy and falsity of the whole Prosecution, of these "venerable and circumspect Fathers in Christ," of this "discreet and learned Reverend Paternities" is more and more forced on them and forced out of them by Jeanne's own devout faith and simple reliance on God. There is internal evidence in the Six Public Examinations and in the Nine Private Examinations to show that the better the judges succeeded in entrapping Jeanne to commit herself on points of theological doctrine, the more they themselves fell under the spell of Jeanne's astounding personality, and that secretly the majority of her judges at the end wished themselves out of the affair, and indeed repented of their share in this legal murder. It is extremely interesting to compare the personal testimony and personal gossip of the clerics and notaries as recorded by them in depositions twenty years afterwards, and preserved in the Rehabilitation. The tide had, of course, turned then in favour of Jeanne, but making allowance for the cowardice of the human soul it would seem that just before and at the execution most of the clerics present were in the state of mind of Maître Jean Alépée, Canon of Rouen, who "was heard to say these words weeping greatly, 'God grant that my soul may be in the place where I believe this woman's to be.' Thus Loyseleur, who was guilty of the most infamous act of all—of visiting Jeanne in prison in an assumed dress and worming out of her secret confessions which he then carried to the Bishop of Beauvais—would seem to have publicly entreated her forgiveness, and for this act to have been roughly handled and grossly ill-treated by English soldiers. Other "Reverend Paternities" expressly state that they left Rouen a day before the execution. Many apparently were deeply concerned at Jeanne's "relapse," but at this final stage the Bishop of Beauvais, in active collusion with the English, probably had the more merciful of the ecclesiastics at a complete moral disadvantage. We shall never know what pressure was brought to bear upon them, behind the scenes; the execution was hurried on again illegally, and the English at length had the satisfaction of seeing the girl of twenty, who had beaten them repeatedly in the field, roasted alive. "The executioner," says a deposition, "was stricken and moved with a marvellous repentance and contritions, quite desperate, and fearing never to obtain pardon and indulgence from God And says another deposition, the executioner complained "of the cruel manner of fastening her to the stake—for the English had caused a high scaffold to be made of plaster, and as the said executioner reported he could not well or easily hasten matters, nor reach her, at which he was much vexed. . . ."

—The Academy.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

RUSSIA AND FRANCE.

Shanghai, Nov. 15.

Russian official circles are concerned at the reduction of the French Navy in the Mediterranean. The *Novoe Vremya* says it is now a mere plaything, and demands a speedy change.

INDIAN FRONTIER EXPEDITION.

A British expedition under General Egerton is assembling at Kohat, on the North-Western frontier of India, near Peshawur, against the Waziris. It consists of four columns of 800 men each and starts on the 17th.

THE IRISH AGITATION.

The proprietor of the Limerick *Leader* has

been sentenced to ten months' hard labour for intimidation. There are various indications that the Law is beginning to get the better of the National League.

RUSSIA AND AFGHANISTAN.

The agitation in St. Petersburg with the object of securing Russian advantages in Afghanistan continues. The *Novoe Vremya* urges that Great Britain, having completed the South African war, will utilize petty frontier troubles to strengthen her grip on Afghanistan to the prejudice of Russia.

MOROCCO.

London, November 16.

British warships which have returned to Gibraltar report that the uneasiness at Tetuan has subsided.

IRELAND.

Mr. St. John Brodrick, speaking at Dewsbury, said that a gigantic conspiracy was afoot in Ireland but the forces of law were too strong for the conspirators.

GERMANY.

Uproarious scenes are occurring in the Reichstag over the tariff bill, which is arousing the intensest feeling among the Socialists, who are making four hour speeches for the purposes of obstruction. The Government have retaliated by abolishing votes by roll-call.

BRITISH EDUCATION BILL.

The Education Bill has passed through committee in the House of Commons.

THE FALL IN SILVER.

London, November 13.

The *Standard* says the latest fall in the price of silver is due to the appointment of the Straits Currency Commission to consider the establishment of a gold currency.

THE MACKAY TREATY.

London, Nov. 14.

At a dinner of the China Association where Admiral Seymour and Sir James Mackay were the principal guests, Mr. Wm. Keswick, M.P., who presided, said he believed that Sir James Mackay's arrangement was equally advantageous to China and to Britain.

THE SOMALILAND AFFAIR.

Central African troops have left Blantyre for Somaliland.

OUTBREAK IN MOROCCO.

Later.

Owing to disorder at Tetuan (Morocco) a Spanish mail steamer has been sent to embark the Europeans. Three British cruisers have gone hastily to Tetuan, where a serious Kabyle rising is endangering the Europeans.

THE TRANS-SIBERIAN ROUTE.

Mr. Chamberlain has said that the Trans-Siberian route will not be overlooked in settling the mail contract.

ATTACK ON THE KING OF THE BELGIANS.

London, November 16.

While the King of the Belgians and members of his family were returning in Brussels from a service in memory of the late Queen, an Anarchist named Rutino fired three shots at the train, one missile grazing the face of Count Oultremont. Rutino was arrested.

AUSTRALIAN LINER WRECKED.

The liner *Elinjaunte* from Sydney for Auckland (New Zealand) was wrecked upon Three Kings Island on Nov. 11th. The passengers and crew took to the boats and rafts, and 139 were saved after having suffered during a week terrible privations.

DEATH OF PRINCE EDWARD OF SAXE-WEIMAR.

London, November 17.

Prince Edward of Saxe-Weimar is dead.

(Note—H.S.H. Prince Edward of Saxe-Weimar was born in 1823, being the eldest son of the late Duke Bernard of Saxe-Weimar-Eisenach. He married a daughter of the 5th Duke of Richmond. Entering the British Army he rose to the rank of General of the 1st Life Guards; commanded the Home District in 1870-76; the Southern District, 1878-83; and the forces in Ireland from 1885 to 1890.

THE ATTACK ON KING LEOPOLD.

London, November 18.

Rubino, who fired at the Royal cortège in Brussels, is an avowed anarchist. Photographs of the Belgian Royal Family were found on him. Although he declares he had no accomplices, it is believed that the crime was organized by London anarchists.

THE LATE PRINCE EDWARD OF SAXE-WEIMAR.

The late Prince Edward of Saxe-Weimar succumbed to appendicitis.

MOROCCO.

The Pretender to the Moorish throne has been captured at Fez by the Sultan's troops.

AN INDIAN INCIDENT.

Later.

In reply to a question addressed to him in the House of Commons by Major Rasch, Lord George Hamilton, Secretary of State for India, said that the punishment of the 9th Lancers consisted of the stoppage of all leave of the officers and men, except those who were sick, until the 1st June, 1903. The punishment had been inflicted by the Government of India because the native who had been assaulted had died under circumstances making it reasonably certain that his assailants were men of the regiment.

MR. CHAMBERLAIN FAREWELL.

London, November 19.

An enthusiastic demonstration by all parties in Birmingham occurred at the farewell banquet tendered to Mr. Joseph Chamberlain. Mr. Chamberlain said his trip to South Africa would be a business affair and not a parade; it was a national and not a party mission.

Subsequently a great torchlight procession and display of fireworks took place.

DEATH OF MR. HENTY.

Mr. George Henty, the novelist, is dead.

[NOTE—*Who's Who* says:—Henty, George Alfred, author; *b.* Trumpington, Cambridge, 8 Dec., 1883. *Educ.*: Westminster; Caius Coll. Cam. Went to Crimea in Purveyor's Dept. of Army; invalided home; promoted to rank of Purveyor; sent out to Italian Legion; at end of war was in charge of Belfast and afterwards of Portsmouth districts; resigned commission and was for some years engaged in mining operations in Italy, etc.; became in 1866 special correspondent of the *Standard*; was through Austro-Italian, Franco-German, and Turco-Servian wars; Abyssinian and Ashanti Expeditions; with Garibaldi in the Tyrol, etc. Left Cambridge for the Crimea before taking degree. *Publications*: March to Magdala; March to Coomassie; novels, A Search for a Secret; All but Lost; Gabriel Allen; A Hidden Foe; The Curse of Carne's Hold; Rujub the Juggler; Dorothy's Double; A Woman of the Commune; The Queen's Cup; Colonel Thorndyke's Secret, 1898; also over seventy books for boys.]

LOCOMOTIVES FOR JAPAN.

Messrs. Dubs and Company, of Glasgow, have secured a contract to supply 30 locomotives to the Japanese Government.

IRISH AFFAIRS.

Later.

It is announced that nine Nationalists have seceded from the Irish party and that they have formed a group under the leadership of Mr. Healy.

SAMOA.

The award in the Samoa arbitration case has been published. Every point is decided in favour of the Germans. The question of damages is reserved for future decision.

ANOTHER IRISH M.P. IMPRISONED.

Mr. Duffy, M.P., has been sentenced to three months' imprisonment for conspiracy and inciting to violence.

EXPLOSION AT CAIRO.

London, Nov. 20.

A nitro-glycerine magazine has exploded at Cairo. Eighteen Egyptians were killed and many injured.

THE WAZIRI EXPEDITION.

The Waziri expedition is meeting with obstinate resistance. Colonel Tonnochy, commanding the fourth column, is badly wounded. Reinforcements have been asked for.

COUNT BENCKENDORFF.

Count Benckendorff, the Russian Minister to Copenhagen, has been gazetted Russian Ambassador to London.

THE FIGHTING IN WAZIRISTAN.

Later.

Colonel Tonnochy is dead. Captain White has been killed while leading the stormers, who attacked a tower held by the outlaws. Three British officers and eight natives were wounded. The other columns are meeting with little resistance.

ANOTHER ITALIAN PRINCESS.

The Queen of Italy has given birth to another daughter.

(RECEIVED AT THE LEGATION OF FRANCE.)

FRANCE AND SIAM.

Saigon, November 13.

The Yellow Book, relating to the convention with Siam, has been distributed to the members of Parliament. Deputy M. Fr. Deloncle declares its contents to be crushing for the French negotiators.

FRENCH MONASTIC SCHOOLS.

The Chamber has adopted, by 345 votes to 237, the project which completes the Law of Associations and provides sanctions for preventing the opening of monastic schools.

FRENCH NEWS.

Saigon, November 14.

M. Deloncle has introduced a project of law tending to the creation of a chamber of colonial affairs in the Court of Cassation.

20,000 miners resumed work this morning in Pas-de-Calais. In Nord the resumption of work is nearly complete.

FRENCH NAVAL MATTERS.

Saigon, Nov. 15.

In answer to a question in the Chamber of Deputies, the Minister of Marine justified the suspension of the completion of three ships-of-war, for reasons connected with parliamentary procedure. He demonstrated that the temporary suspension would not delay the completion of the naval programme. The chamber voted confidence in the Government by 331 to 154.

A LUNATIC.

A lunatic fired two shots from a revolver into the lobby of the Chamber. The balls struck the ceiling.

THE MINERS.

The syndicate of miners in the Nord and Pas de Calais districts have voted for recommencing work.

Saigon, Nov. 16.

Work has been completely resumed in the Nord and Pas de Calais districts.

ATTACK ON KING LEOPOLD.

An Italian named Robbini fired three blank cartridges from a revolver, in Brussels, at the Royal cortège as it was returning from the church of St. Gudule, whither the King had been in connection with a memorial service for the late Queen. Robbini was at once arrested.

FRANCE AND SIAM.

Saigon, November 17.

In considerations of reports presented by M. M. Etienne, Bonvalst and Deloncle, members of the Chamber of Deputies, the colonial group in the Chamber has unanimously rejected the treaty with Siam.

(RECEIVED AT THE FOREIGN OFFICE IN TOKYO.)

MEDICAL INSPECTION.

The medical inspection to which ships entering Kungsan from Japan, China or Fusan have hitherto been subjected, was abolished from the 15th instant, according to a telegram received by the authorities.

BRAZIL.

Mr. Horiye, acting Chargé d'Affaires of Japan in Brazil, telegraphs that Mr. Francisco do Poura Roderigues Arubus (the transliterated name is difficult to identify) has become President of the Republic of Brazil.

KOREA.

Yuensan November 17.

Medical inspection of ships coming from Japan has been abolished.

(FROM THE "JIJI SHIMPO.")

SOUTH AMERICAN TROUBLE.

London, Nov. 12.

The United States Consul in Caracas reports that the war in Venezuela has practically ended.

ITALY AND ENGLAND.

Italy is rendering every possible assistance to England relative to the Somaliland affair. A British war-ship is now selecting a point in Italian territory with a view to landing the British troops in Somaliland.

MOROCCO.

London, Nov. 14.

The state of affairs in Morocco is assuming a serious aspect. The Kabyles have laid siege to Tetuan and yesterday severe fighting took place there. The lives and property of foreign residents are threatened, and consequently several foreign war-ships have assembled at Tetuan. The French and Spanish journals are unanimous in saying that the affair is of grave importance.

RUSSIA AND FRANCE.

The *Novoe Vremya*, in a leading article, severely criticises the reduction of French war-ships in the Mediterranean.

THE KING OF PORTUGAL.

The King of Portugal is expected to arrive in England next Monday. His Majesty will stay at Windsor Castle.

INDIAN FRONTIER TROUBLES.

Four companies (?) of the British army will start for Waziristan in a few days to suppress frontier troubles.

ATTACK ON KING LEOPOLD.

London, Nov. 15.

King Leopold was fired at thrice by an Italian named Robbini with a revolver at Brussels to-day. Fortunately the King escaped injury. Robbini was arrested on the spot.

VENEZUELA.

General Matos, commanding the rebels in Venezuela, has fled to Curacao (the Dutch island of that name in the Leeward Group). Fourteen other leaders of the rebel army have been made prisoners.

BULGARIAN CABINET.

The Bulgarian Cabinet has resigned in consequence of dissension among the Ministers.

VOLCANIC ERUPTION IN SAMOA.

Owing to a volcanic eruption in Samoa property in the neighbourhood has suffered much damage. Six craters are emitting fire and ashes.

MOROCCO.

The Kabyles are the only tribe concerned in the trouble in Morocco. The Sultan of Morocco is doing his best to suppress the disturbance with a view to preventing interference from other countries.

THE ATTACK ON KING LEOPOLD.

London, November 17.

The Belgian Police are endeavouring to find accomplices of Rubino, who has declared himself to be an Anarchist. He also confessed that he purchased his pistol in London for the purpose of taking the life of the King.

RUSSIA AND MANCHURIA.

An Imperial Edict issued by Russia announces that Manchuria is included among her military sections, Halbin being fixed upon as headquarters.

(FROM THE "JAPAN HERALD.")

THE TRANS-SIBERIAN ROUTE.

London, Nov. 14.

Mr. Henniker Heaton, M.P., speaking in the House of Commons, asked the Postmaster-General whether he was aware that letters from China to England arrived overland in 26 days against 44 by steamer.

Mr. Austin Chamberlain, in reply, said he believed it was a fact that letters sent from Chefoo had reached London in 26 days. The possibilities of the trans-Siberian route would not be overlooked in settling the mail service for the future. The steamship contracts were terminable in January, 1905, by giving two years' previous notice.

GENERAL YOUNG ON WAR.

London, Nov. 16.

General Young has handed the reporters the text of a speech that he was unable to deliver at the New York Chamber of Commerce banquet. In this speech he contends that the only humane war is that which is fast, furious and bloody, until it reaches a speedy end.

The Japanese, General Young thinks, would have ended the war in the Philippines sooner than the Americans.

RUSSIA IN MANCHURIA.

London, November 17.

The Russian Ministry of War has declared the establishment of a mobilisation department at Harbin, with railway station Commandants at Port Arthur and Harbin, Manchuria.

RUSSIA'S FAR EASTERN SQUADRON.

London, November 19.

A Kiel telegram, reporting the arrival of the Russian Squadron of seven vessels proceeding to the Far East, mentions that the crews number 3,000 and the guns 247. The vessels have a displacement of 45,000 tons.

GREAT BRITAIN AND SIAM.

The *Temps*, defending the Siamese Convention, affirms that Lord Rosebery in 1893 informed the French Government that he would not hesitate to run the risk of a great war to stop France from annexing the southern provinces of Siam.

(FROM THE "N.-C. DAILY NEWS.")

BRITAIN HOLDS HER OWN.

London via Bombay, November 8.

Imports in October show an increase of 2½ millions sterling, and exports 1½ million.

THE KAISER IN ENGLAND.

London via Bombay, November 9.

The Kaiser arrived at Port Victoria and took the train for Shorncliffe. After reviewing and addressing the 1st Dragoons, he took train to Sandringham. At the luncheon there the King, toasting the Kaiser, recalled his generosity to the men's families while his regiment was in South Africa. The Emperor in reply said he was glad that the money had done good, and announced a further gift.

A DISCORDANT NOTE.

London via Bombay, November 11.

Mascagni, the composer of "Cavalleria Rusticana," has been arrested at Boston at the instance

of his managers for alleged failure to complete a contract.

London via Bombay, November 12.

Signor Mascagni, who was arrested at Boston, has been released on the reduced bail of \$4,000. He has instituted a suit for \$50,000 gold against his managers for detention and false arrest.

A FRENCH HISTORIC CASTLE IN FLAMES.

London via Bombay, November 12.

The Château d'Eu, belonging to the Duke of Orleans, is on fire and is threatened with total destruction.

November 13.

With the exception of one wing and a portion of the chapel, the Château d'Eu is destroyed.

The literary and artistic treasures in the château were saved.

THE EXCLUSION OF ASIATICS FROM CAPE COLONY.

November 14.

The Cape Immigration Bill has been passed considerably amended.

THE LORD MAYOR OF LONDON AND ROUMANIA.

London, November 14.

The *Jewish Chronicle* is authorised to announce that as an expression of regret and displeasure at the persecution of the Jews by Roumania, the Roumanian Minister in London was not invited to the inaugural banquet at the Guildhall by Lord Mayor Samuel.

(FROM THE "OSTASIATISCHE LLOYD.")

NEWS FROM EUROPE.

Berlin, November 10.

H.M. the Emperor was received in the heartiest way by the official British circles and the people, but not so by the Press.

The Italian-Turkish complication in the Red Sea has been settled by the conciliatory attitude of Italy. The Massnahbarges will be treated in future as non-Turkish ships as far as the facilitation of the Customs is concerned.

The Chief Procurator of the Most Holy Synod in Russia, Senator Pobjedonosszew, has resigned. It is reported that he will probably be succeeded by Count Scheremetjewow.

Berlin, November 12.

The reports of the London *Daily News* and other English newspapers that there were disagreements between Germany and Great Britain over the evacuation of Shanghai are absolutely unfounded. It is also untrue that the evacuation question has been coupled with the cession of Delagoa Bay to Great Britain, as the latter matter has not recently been under discussion. The Shanghai evacuation question has been settled by the four Powers concerned, on the understanding that the evacuation is to take place simultaneously, and that all Powers shall have the right of re-occupation in the event of any Power landing troops. Great Britain has declared that in evacuating Shanghai she is not seeking any special advantages. Germany is content with this. While China is bound by her declaration to grant to no single Power special advantages in future, neither Germany nor Great Britain have so bound themselves. By this the political portion of the Shanghai question is settled. Only technical points regarding the simultaneous withdrawal of troops and engagement of transports remain.

Berlin, November 12.

The pretender Muli Mohamed has been overcome and completely surrounded by the troops of the Sultan of Morocco. The position of the latter has been thereby considerably strengthened.

LATEST SHIPPING.

Pig Iron, No. 3	2.00 to 2.50
Hoop Iron (¾ to 1½ inch)	5.10 to 6.05

KEROSENE.

The market is a little quieter.

American	\$2.66
Russian	2.53
Langkat	2.47½

SUGAR.

The market is firm and prices are unchanged.

	PER POUND.
Brown Takao	Y. 5.10 to 5.65
Brown Manila	5.20 to 6.55
Brown Daitong	4.65 to 6.50
Brown Canton	6.00 to 7.10
White Java and Penang	6.70 to 7.50
White Refined	8.80 to 10.70

EXPORTS.

RAW SILK.

There has been a moderate demand at practically unchanged prices during the week. The debris of the late fire was sold on the 20th instant and fetched what seem to be high prices considering the amount of damage. The market closes quiet.

QUOTATIONS.

Filatures—Extra Best, Coarse	Y. 1,080 to 1,100
Filatures—Extra, Fine	—
Filatures—Extra, Coarse	1,040 to 1,050

BOVRIL AT THE FRONT.

Bovril has played such a conspicuous part in South Africa that it forms no inconsiderable feature of the story. The *Lancet* has had frequent references to Bovril in the reports of the officers of the Royal Army Medical Corps. Nearly every newspaper correspondent has had to refer to Bovril to make his story complete. Rudyard Kipling and Baden-Powell have written their Bovril stories. Over 500 British hospitals and similar public institutions use and prescribe Bovril, not beef tea, but Bovril.

The reason is not far to seek. Bovril is a nourisher as well as a stimulant. It contains the albumen and fibrine, the sustaining properties of the beef. It is this fact, together with its absolute purity, that commends Bovril to physicians and scientists, and proves in practice what it demonstrates in analysis.

SAVE YOUR HAIR

With Shampoos of Cuticura Soap and Light Dressings of Cuticura.

This treatment at once stops falling hair, removes crusts, scales, and dandruff, soothes irritated, itching surfaces, stimulates hair follicles, supplies the roots with energy and nourishment, and makes the hair grow upon a sweet, wholesome, healthy scalp when all else fails.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, and for all the purposes of the toilet, as well as by millions of women in the form of washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves to women and mothers.

COMPLETE TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure the most torturing, disfiguring, itching, burning, and scaly skin, scalp, and blood humours, with loss of hair, when all else fails. Sold throughout the world. Australian Depot: R. TOWNS & CO., Sydney. British Depot: 27-28, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. POTTER DRUG AND CHEM. CORP., Sole Props., Boston, U. S. A.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 60 doses. CUTICURA PILLS are alterative, antiseptic, tonic, digestive, and the purest, sweetest, most successful and economical of blood and skin purifiers, humour cures, and tonic-digestives.

"FAIS CE QUE DOIS: ADVIENNE QUE POURRA!"

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence. What is intended for insertion in the "JAPAN WEEKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, NOVEMBER 29TH, 1902.

DEATHS.

At the German Hospital, on the 24th Nov., R. J. BENNINGTON, Chief Officer of the steamer *America Maru*.

On the 25th November, at 3.40 p.m., ANNIE BOYES, (née Sands), wife of Richard Boyes, aged 31 years. No flowers desired.

SUMMARY OF NEWS.

A NEW Seamen's Hospital erected under the auspices of the Mariners' Relief Association of Japan was opened on Nov. 20th at Nagasaki. The building has cost yen 7,000.

THE formal opening of the new Oye Bridge, in front of Yokohama Railway Station, will take place early in December. The work of construction was started in 1899.

MR. MATSUMOTO JUTARO, the well-known business man of Osaka, says a Japanese paper, has under contemplation the erection of three images of Kwan-non (the goddess of mercy), namely one on

Itsukushima, a second at Ama-no-Hashidate, and a third in Matsushima. The images are said to be of bronze and to be over ten feet high.

MR. DE ATH, of Kobe, one of the oldest foreign residents of Japan, who is leaving for a trip home, during the past week has been the recipient of handsome souvenirs from the foreign community of Kobe and the Japanese traders of Kobe, Osaka, Kyoto, etc.

At the general chapter of the Order of Carmelites, held during October in Rome, the Very Rev. Pius Rudolph Meyer was elected Father-General. Father Meyer has spent 20 years in the United States and is the first citizen of North America to be elected to the office.

THERE is a scheme afloat in Hokkaido for establishing an institution to be called the Hokkaido San-shi-kai (Silk Association) with a view to developing the silk industry of the Island. Baron Sonoda, Chief of the Hokkaido Administrative Office, has consented to be President.

A FINE arts institutions devoted to the works of women, called the Joshi Tokyo Bijutsu Gakko, was formally opened on Nov. 22nd in Sarugakuchō, Kanda, Tokyo. The function was attended by over three hundred persons, amongst whom were Viscount Honjo, Baron Miura Yasu and others interested in education.

IN connection with the coming Fifth Domestic Exhibition in Osaka a trade marks' hall will be established in the compound of the exhibition. As its title shows, the hall will be devoted to exhibiting trade marks registered throughout the country. Mr. Ito Kijuro and a few other citizens of Osaka are the promoters of the undertaking.

THE ceremony of unveiling the statue of the late Lieut-General Prince Kitashirakawa, Commander-in-Chief of the Imperial Body Guards, took place on Nov. 28th at 9 a.m. in the compound of the First Regiment of Infantry of the Imperial Body Guards in Kojimachi, Tokyo. His Highness, succumbed to illness during the Formosan expedition of 1895.

THE Russo-Japanese Association, in Tokyo, will give a dinner some time in December in honour of Mr. A. Iswolsky, Russian Minister to Japan, who recently became honorary President of the body, with a view to introducing the Minister to all the members of the association. The association will establish branches in Hakodate and Vladivostok.

AN amalgamation has been effected between four cotton spinning companies in western Japan, namely the Okayama, the Bizen, the Kasa-oka and the Nishinari. On Nov. 22nd a meeting of representatives of the establishments was convened in Osaka. The assets of the companies combined are: the Okayama, yen 846,500; the Bizen, yen 300,000; the Kasa-oka, yen 202,000; and the Nishi-nari, yen 520,000.

As a result of a conference between the Governor of Kanagawa and the Acting Mayor of Yokohama on Nov. 20th, it was agreed that steps should be taken within ten days from Nov. 28th to abolish the official stoppage of communication between Kaigan-dori, the pest affected district, and other parts of the city. It may be said that the pest has been effectively suppressed by the prompt and able measures adopted by the authorities.

CAPTAIN GEORGE MCKINNON, one of the oldest master mariners in the employ of the Pacific Mail Company, who went out in the *Korea* on her first voyage as executive officer, says the San Francisco *Chronicle* will remain in port on waiting orders,

the position having been abolished on the big liner. A chief officer will be next in authority to Captain Seabury. Mr. E. A. Bunker, late second engineer of the steamer *San Jose*, goes out as second engineer of the *Korea*.

MURATA KOZO, an employé of Messrs. A. Meier & Co., No. 34, Yamashita-cho, was arrested on Friday by the Kagacho Police on a charge of embezzlement. It is alleged that he took a crossed cheque drawn on the Hongkong and Shanghai Bank and intended for the payment of silk goods purchased by the firm, endorsed it and cashed it at a Chinese exchange shop, appropriating the money (yen 1,481.90) to his own use.

ONE of the best known whaling companies in Japan is the Nippon Enyo Gyogyo Kabushiki Kaisha (Japan Deep Sea Fishing Joint-stock Company). It began business in 1900 in Yamaguchi prefecture and has enjoyed a prosperous career. According to a report of the Japanese Consul in Gensan, Korea, the company with a fleet of five vessels had a catch of 35 whales off Gensan from the beginning of October to November 7th this year. In 1901, the company's vessels caught 38 whales in three months and 22 during two months in 1900.

THE British four-masted bark *Kentmore*, owned by the Standard Oil Company, arrived at New York on the 28th September after an unusually tedious voyage. The vessel sailed from Yokohama on December 10th last. On March 15th the vessel experienced light trades and very moderate weather, and consequently made a very long passage. Almost all of the crew were on arrival found to be suffering from scurvy, and several were in a pitiable condition. Malnutrition is stated to be responsible for the illness. Several were also suffering from "moon blindness." It was stated on board that the men were supplied with very little besides salt meat.

A FATAL affray took place on Jizo-zaka, Yokohama, about 8 p.m. on Nov. 23rd when Mrs. Kurahashi Hisa, of No. 2,708, Negishi, Yokohama, was shot by a man named Uyeki Yasujiro, of Kitagata, Yokohama. The latter committed suicide on the spot, by shooting himself through the brain. The cause remains unknown but is believed to be the outcome of a quarrel. The man is said to be indebted to the unfortunate woman for a loan of yen 1,900.

QUITE recently an iron works was established in Chefoo under the auspices of a Japanese named Mr. Shotatsu Yokichi. The enterprise met with success and at present is engaged in repairing seven vessels, namely a French, a British, two Chinese and three Japanese steamers, while they are in receipt of an order from a United States war-ship for the manufacture of some machinery to be used in her engine-room. Many orders are also forthcoming from the Chinese for various kinds of machines.

A CASE of supposed suicide occurred on the voyage of the N.-D.L.S. *Gera* from Japan to Shanghai, says the *N.-C. Daily News*. The *Gera* arrived there on Nov. 20, bringing the body of the deceased, a lady passenger who embarked at Yokohama. The body was conveyed to the Shantung Road Mortuary and an enquiry into the circumstances attending her death was ordered. Our contemporary said next day:—At the inquest held at the German Consulate on the body of Marie Rugger, who hanged herself on board the N.-D.L.S. *Gera* between Yokohama and Shanghai, a verdict of "suicide while of unsound mind" was returned.

POLITICAL GOSSIP.

Several Tokyo newspapers state that a general meeting of parliamentary members of the *Seiyu-kai* is to be held in Tokyo on the 25th instant, when a resolution will be proposed, and doubtless passed, in the sense that the time is not adapted to naval increment. This meeting will be preparatory to the general assembly of the Party on the 4th proximo.

Meanwhile rumours grow in force and volume that Marquis Ito contemplates some kind of compromise and is preparing a project in that sense. He concedes the point that the land-tax must be restored to its former rate, but he wishes to preserve the naval, expansion programme, funds for that purpose being obtained by postponing certain State enterprises, by economizing military outlays, by reducing subsidies and by amending the budget. Marquis Ito doubtless understands that the nation will ultimately refuse its confidence to any politicians who, at this crisis, subserve the question of national armament to party interests.

Count Itagaki's views on the question of the day are reported by the *Chiuo Shimbun*. The Liberal leader indulges in a little of the pride of the white-headed publicist. It is not uncommon with Japanese statesmen of the *Genro* class to deduce from retrospects of the great events in which they have taken part, a conviction that their own prescience was always prominent, and that their political opponents were always shallow-minded. That is one of the pleasures of memory. We need not enter into the particulars of the Count's enjoyment. What interests us is to find that he opposes naval expansion on account of the Anglo-Japanese alliance. His interpretation of that alliance is that England wants Japan's army, and that Japan, in turn, may reasonably claim the use of England's navy. That reminds us of the school-boy who, in the early days of his academical career, received the vigorous protection of his big brother, but who found, when that protection was withdrawn, that he suffered far more than he would have done had he never enjoyed it.

Marquis and Marchioness Ito, accompanied by Messrs. Samejima, Koyama, Tokioka and Hitaka, visited the Ise Shrines on the 23rd instant, and subsequently repaired to Futami-no-ura. The meeting of the Marquis with Marquis Yamagata, who is now in Nara, is expected to decide the political situation.

Just at present public opinion seems to be persuaded of the imminence of a political rupture. Marquis Ito, Marquis Yamagata, Marquis Saionji and Count Katsura are now in Kyoto, or are supposed to be there, and the result of their consultations is eagerly expected. One newspaper—the *Hochi Shimbun*—alleges that Baron Kodama will take part in the conference, and that there is even talk of his becoming Minister President in place of Count Katsura. The same journal indicates some of the components of a new Cabinet, as, for example, Baron Ito at the Foreign Office, Mr. Tsuzuki Keiroku and Baron Suyematsu representing respectively Count Inouye and Marquis Ito, and the present Minister of War and the Navy remaining unchanged; All that is mere conjecture. The only fact apparent at the moment is that the general public entertain little hope of such a settlement being effected in Kyoto as will leave the Cabinet undisturbed.

Mr. Ema Shunichi, a representative of Tokyo in the House of Representatives, has been arrested in Shizuoka. He is said to be accused of embezzling a sum of six thousand *yen*, but some allege that the charge has been trumped up by his political enemies. Mr. Ema is a barrister by profession.

The question immediately exercising the public mind is whether there will be a meeting in Kyoto between Count Katsura and Marquis Ito. Apparently there will be no such meeting. Count Katsura, who left Bakan on the morning of the 25th instant by the *Saikyo Maru*, is now expected to proceed direct from Kobe to Tokyo by sea. Whether this has any deep significance, our Tokyo contemporaries do not pretend to judge.

As for the report that Marquis Saionji was to be present at the Ito-Yamagata conference in Kyoto, it is contradicted by the news that the Marquis left Kyoto for Tokyo on the 24th instant.

Marquis Ito reached Kyoto on the evening of the 24th and proceeded to Marquis Yamagata's villa on the following morning. A long private conference resulted, and the two statesmen subsequently lunched together. On his way back, Marquis Ito visited Marquis Kido's grave. Marquis Ito and his party were to leave Kyoto by the night train on the 26th.

During his stay in Kyoto Marquis Ito denied himself to all visitors and there was consequently no opportunity of discovering the nature of the decision, if any, formed by the two statesmen at the Murin-an. The *Fiji Shimpō*, however, asserts that some fragments of the conference have leaked out, and these, pieced together, indicate a resolve on Marquis Ito's part to oppose the Katsura Cabinet's programme. The Marquis is believed to have said that though naval increment may be necessary from an international point of view, the state of the empire's resources must be given some weight in deciding such a question. Further, as to the various enterprises contemplated by the Cabinet, their advisability demands close scrutiny, for it is undeniable that many undertakings essayed by the *Meiji* Government since the Restoration proved distinctly unsuccessful. If naval increment and the continuance of the land tax appeared immediately essential to the empire's welfare, the opposition of a majority in the House of Representatives should not be allowed to stand in the way, nor should the *Meiji* statesmen hesitate to give their support to the Katsura Cabinet. But, taking all things into account, it does not appear that these two problems press for instant solution. In short, the impending session of the Diet is not the time to bring them forward, and Marquis Ito finds himself compelled to disapprove the Ministry's projects.

Equal uncertainty prevails as to the views expressed by Marquis Yamagata, but on the whole they are believed to have been opposed to those of Marquis Ito. During the conference the two statesmen's voices sometimes assumed the high key of argumentative vehemence, and sometimes broke into laughter. Marquis Yamagata returned Marquis Ito's call in a purely formal manner, merely leaving his card at the Nakamura-ro.

Does this then mean a change of ministry? That question can not yet be answered. In some quarters the impression prevails that Marquis Ito, unwilling to precipitate a crisis,

has prepared, or will prepare; a programme reconciling the views of the Cabinet with those of the political parties, the object being to tide over the present session of the Diet without any governmental upheaval. But if Marquis Ito takes the view attributed to him above, namely, that naval increment and land-tax continuance must be postponed, it is difficult to see how any reconciliation of policies is possible. Will Count Katsura wait quietly and patiently until it suits the convenience of his political opponents to displace him?

Ninety-five parliamentary members of the *Seiyu-kai* held a friendly gathering at the Maple Club on the afternoon of the 25th instant. According to some reports the proceedings were uneventful, and the views expressed took the form simply of a resolve to pursue the policy already clearly outlined at meetings of the Party's committee and of its sections. But the *Asahi Shimbun* says that an important question was mooted, namely, what course should be adopted in the event of Marquis Ito's announcing a view contrary to that already declared by the Party. Those present showed much embarrassment in the presence of this question, and the final decision was to postpone the matter until some definite announcement should be made by the Marquis.

Count Katsura reached Kobe on the 26th and repaired to the Tokiwa Hotel, where he was subsequently visited by Marquis Yamagata, who had come from Kyoto for the purpose. The two statesmen had a long conference, and the Marquis returned to Kyoto by the 2.40 p.m. train. He did not again meet Marquis Ito in Kyoto, as the latter had started for the north by the 2.50 train.

These incidents are interpreted to signify that Count Katsura's friends advised him against taking part in the Kyoto conference, since such a course would indicate subservience to the will of the elder statesmen, and would alienate the sympathies of his supporters.

On the other hand, there is a rumour that Marquis Ito attaches little importance to the question of continuing the land tax at its present rate. His attention is occupied by a much larger question, namely, reform in the Departments of War and of the Navy. He is credited with alleging that those Departments have hitherto occupied a kind of extraterritorial position, and that no Cabinet has ventured to invade the sanctity of their appropriations. Yet it is in the outlays on account of the Army and the Navy that room for retrenchment really exists. Count Katsura, it is added, being himself an army officer, does not care to attack this problem. But if the whole weight of the Elder Statesmen's influence were brought to bear upon him, he would have to yield. Yes, so he might. But is it not probable that his yielding would take the form of retirement? Why should there be placed on his shoulders, stalwart as he has shown himself, a burden from which all his predecessors shrank?

The fact is that outside a small circle, no one knows anything for certain. All is surmise and conjecture.

VISCOUNTESS AOKI'S RECEPTIONS.

We are asked to say that Viscountess Aoki will receive every Monday after four; beginning on Monday next.

THE DIET.

The seventeenth session of the Diet opens on the 6th proximo, and the first duty to be discharged will be the election of a president and a vice-president. The former office is now much coveted, for though it does not carry any great power, the politician elected is recognised as possessing a high title to public esteem. In by-gone days the choice afforded an opportunity of estimating the relative strength of the parties, as each set up its own candidate. But the *Seiyu-kai* has now an overwhelming majority in the House, and the success of its representative is a foregone conclusion. According to the *Fiji Shimpō*, the desire of the big Party is to re-appoint the former president, Mr. Kataoka Kenkichi, and the former vice-president, Mr. Motoda Hajime. It is understood, however, that Mr. Kataoka, having accepted the post of principal of the *Doshu-sha*, will decline the presidency of the Lower House, should the honour be offered to him. In that event, the *Seiyu-kai*, should it insist on choosing one of its own members, would doubtless select Mr. Matsuda Masahisa or Mr. Hara Kei. But there is said to be a strong undercurrent setting towards the election of Mr. Kato Takaaki. The great advantage of choosing him would be that he commands the confidence of all sections of the political world, and that his choice for the presidency would be almost unanimously supported, whereas if the *Seiyu-kai* insist on a candidate of their own colour, the Progressists will assuredly put up Mr. Kono Hiro-naka, and there will be a contest, one-sided indeed, but not the less vehement. The President of the Japanese House of Representatives does not occupy quite the same position as the Speaker of the British House of Commons. The rulings of the former have not yet come to carry the weight attaching to the rulings of the latter, nor is the Japanese office invested with the dignity carried by the British. It would be better for Japan were the contrast less marked. Hence foreign well-wishers would welcome the choice of Mr. Kato, since he would bring to the discharge of his duties qualities which have earned universal trust and respect.

The *Fiji* thinks that even before the Budget comes up for discussion, there will be a controversy about the question of administrative reform. Last session, when the House of Representatives showed a disposition to become clamorous on this subject, the Cabinet promised that reform should be undertaken, and even went so far as to seek and obtain an appropriation for carrying out investigations. The pledge has not been broken. It is seen from the Budget that, speaking financially, reforms have been effected which produce a saving of four hundred thousand *yen*. But the political parties will not be content with that—very far from it. They claim that much greater economies could be achieved. The Cabinet, however, is understood to affirm that the purpose of its reforms has not been mere saving of money. It has aimed rather at improving official efficiency, and it insists that its efforts in the latter direction have been as thorough as the circumstances immediately permit. Hence there is a ground of dispute which may present itself immediately. There are rumours that Marquis Ito has a reform scheme of his own, but nothing certain is

known on that subject. What is beyond all query is that great need exists for some changes which will facilitate the transaction of business. The obstructions encountered by a man seeking to carry out any enterprise in Japan and the time needed to overcome them, cost the nation very dear.

That Marquis Ito is the pivot of the situation the *Fiji Shimpō* is as convinced as every careful onlooker must be. This point, however, having been fully discussed in our own columns, we need not revert to here. But reference may be made to two cartoons published by the *Fiji*, in illustration of Marquis Ito's perplexity. One is based upon the celebrated incident which preceded the fight at Dan-no-ura. Kajiwaru Kagetoki, the arch intriguer of the time, advised Yoshitsune that the wisest formation for attack would be to move backward with his galleys; in other words, to adopt a tactical order suitable for immediate flight. Yoshitsune replied that he knew something about preparing to advance to the onset, but that he had never practised the art of preparing to fly by way of prelude to attack. The bystanding generals laughed scornfully at Kajiwaru, but he maintained his point, alleging that to rush in upon the foe without any thought for the contingency of discomfiture was to copy the ways of a wild boar. Yoshitsune, of course, paid no heed to Kajiwaru's counsels, and the *Hei* forces were hopelessly broken by the *Minamoto* onset, the only result of Kajiwaru's advice being that henceforth a doubtful or timid policy came to be called *Kajiwaru-riu* (Kajiwaru style) or *sakaro* (turned oars). This historical event is utilized by the *Fiji*'s cartoonist. He represents Marquis Ito and his following attacking the Cabinet's strong-hold from a distance, but the Marquis has seated himself facing his horse's tail and the animal's head is turned away from the fortress. Another cartoon depicts the Marquis dressed as a farmer. He has just received an amulet from the Ise Shrine, and its legend has overthrown him with astonishment. For the picture is a gourd on a catfish—the proverbial Japanese type of impossibility—and above it is a superscription indicating that seventeen (the seventeenth session of the Diet) will be lucky or unlucky—a truly Delphic utterance.

Our contemporary further thinks that many members of the Lower House are supremely alarmed by the contingency of dissolution. Their resources are almost exhausted, and they could not face the ordeal of another election. Therefore many of them are open to be "approached." But the *Fiji* says nothing as to whether it thinks that dissolution is among the probable weapons of the Katsura Ministry. We do not think so ourselves, and we have given our reasons for not thinking so. The situation is one of the most interesting that has ever been witnessed on the Japanese political stage.

FOREIGN ADVISERS OF JAPAN.

On the 27th of September we reproduced from the columns of a Yokohama contemporary a paragraph attributed to a Kobe journal in which the writer, speaking of Japan's foreign advisers, asked whether "the time had not come to abolish an office that had for thirty years been a constant source of irritation and estrangement between resident foreigners and the Japanese Government." We condemned such writing, and said, among other things:—

The Kobe newspaper's aim is to prove that the foreign employee is not worthy of the service he has adopted, and that Japan would be much better without him. What are the limits of that doctrine? Does Japan's superiority cease when the employee is the standard of comparison, or does it extend to the foreigner in general? Resentment so blind that for the sake of casting some dirt at those from whose opinions it happens to dissent, does not hesitate to bespatter its own countrymen in general as well as all nationals engaged in Japan's service, is a kind of moral condition which, we rejoice to think, is altogether exceptional.

It will be observed that the Kobe newspaper included in its condemnation Japan's advisers during the past "thirty years," thus referring to a large number of European and Americans who occupied the highest and most responsible posts filled by foreigners in Japan throughout nearly the whole of the Meiji era.

The editor of the Kobe journal now addresses us for the second time protesting against being supposed to have included "all nationals engaged in Japan's service" and claiming that, in another part of the same article, he "carefully guarded against any such misconception, by explicitly making a distinction between the foreign employee who has done so much to advance the best interests of Japan and the foreign adviser who for his own selfish purpose has acted the part of a mischief maker." The paragraph on which he relies to extenuate his gross accusations is this:—

It is almost thirty years since the Japanese Government adopted the practice of attaching foreign advisers to the various departments and it would be interesting to have the opinion of a competent Japanese observer on the results. Professor Chamberlain has set forth what foreign employes have done in the matter of reforming Japan's administrative methods. Englishmen took the navy in hand, and transformed junk manners and methods into those of a modern man-of-war. The establishment of the mint was also English work. No less a feat than the reform of the entire educational system was chiefly the work of a handful of Americans. A Frenchman began the codification of Japanese law, which Germans continued and completed. Germans directed the higher medical instruction of the country, while the army was organised on Franco-German methods. "The posts, the telegraphs, the railways, the trigonometrical survey, improved mining methods, prison reform, sanitary reform, cotton and paper mills, chemical laboratories, waterworks, and harbour works—all are the creation of the foreign employes of the Japanese Government." The curious thing is that the Government has almost to a man got rid of those who rendered such great assistance in the practical Westernisation of Japan, while it has retained foreign advisers on matters of policy who could very well have been dispensed with at a very early stage.

Readers will see that whatever distinction this second paragraph sets up, is a distinction between the former advisers of the Japanese Government and the present advisers. All the present advisers on matters of policy are condemned *en masse*. They will also recall that in the paragraph on which we originally commented, the office of adviser is said to have been for thirty years a constant source of irritation and estrangement between resident foreigners and the Japanese Government, and they will perceive that in the paragraph adduced by way of vindication there is a query as to what might be the opinion of a competent Japanese observer about the results of the Japanese Government's practice of attaching foreign advisers to the various departments during the past thirty years. Nevertheless the editor of the Kobe journal protests that he has been unjustly treated, and insists that his condemnation of the foreign employee was discriminating and limited. We give publicity to his protest, and we append our own opinion that the unscrupulous malice of his original article is on a par with the evasive subterfuge he employs in his defence.

CHINESE NEWS.

Saturday, Nov. 22.

The *Asahi Shimbun* publishes a long telegram from Tientsin which makes some demands on our credulity. It says that a Russian projector having applied through his Government for exclusive privileges of gold-mining in coöperation with Chinese in three districts of Kirin, the Chinese Commander-in-Chief at Mukden forwarded the application to Peking with his recommendation. In Peking, however, the question was "hung up," and did not move until General Chang Sun sent a sum of a hundred thousand taels to Yung Lu, when the desired permission emerged speedily from the duly qualified office. As for the permit, it grants a monopoly of gold mining in the named districts to a Russo-Chinese syndicate, at the head of which is a Mr. Astatieff (?), and it provides that the Russian members of the syndicate are to have eighty per cent. of the profits and the Chinese twenty per cent. With regard to Chinese subjects already engaged in the mining industry, their rights seem to be tolerably safeguarded, and there are other provisions more or less restricting the powers of the syndicate.

It is stated that owing to destitution generally prevailing a large part of the province of Kwangsi is in a state of revolt.

Sir Ernest Satow left Peking on the 20th instant.

The branch office of the Mitsui Busan Kaisha in Shanghai was completely destroyed by fire on the 20th instant. The news is published by the *Fiji Shimpō* and no particulars have yet arrived.

Tuesday, Nov. 25.

It would appear that the publicists represented by the *Nichi Nichi Shimbun*—a not unimportant body—have abandoned all hope of China being able to defend herself against invasion by a foreign enemy. Such is the evident interpretation of an article published in our contemporary's columns, where it is urged that what China wants is not a navy to guarantee the safety of her shores, but an army to suppress mobs and prevent anti-foreign outrages. It is difficult to endorse that dictum. The work here assigned to an army belongs properly to police, and, for the rest, no organization, whether military or administrative, has ever proved competent to prevent outrages of the kind perpetrated by the Chinese against foreign life and property. The aversion for foreigners that has grown up in China during the past century, seems destined to be the cause of her national ruin, unless some antidote can be found, and it is probably under the influence of that apprehension that our Tokyo contemporary writes. But we can not perceive that the necessary antidote would be furnished by a strong army. Still less do we understand how any country with a long littoral, as China has, can hope for immunity from attack without a navy to defend herself.

Wednesday, Nov. 26.

The Kaiping-mine complication, as to the facts of which we have but a very rudimentary idea, has been settled. Sir Ernest Satow called at Kaiping *en route* for Taku, and owing to his representations the Chinese flag was hauled down, to be replaced by the British. Sir Ernest then resumed his journey to Shanghai. He is to visit Viceroy Chang at Nanking before embarking for England.

The German journal of Shanghai alleges,

according to a telegram to the *Asahi Shimbun*, that although the officer commanding the German contingent of the garrison has received instructions to place himself in communication with his English and French colleagues for the purposes of simultaneous evacuation, no instructions of any kind have reached the British and French commanders, so that the question is "hung up." The *Fiji Shimpō's* news, however, is that whereas the Germans and the English are ready to take their departure, the French are still without orders. A fine mutual trustfulness the Powers are showing in this matter, are they not?

Meanwhile the Japanese contingent of 280 men under Major Inamura reached Nagasaki on the 21st instant in the *Saikyo Maru*. They seem to have had a hearty send-off and to be thoroughly satisfied with the demeanour of the foreign population towards them. Some of their officers have been doing the trumpet of Philippi to a reporter of the *Asahi Shimbun*. They have told him that the health of the Japanese troops was far better than that of any of their comrades, and that they deserve the credit of having completely avoided avoidable diseases, though the others did not fare so well by any means.

Captain Nishida, the second in command of the contingent, is represented as saying that the English garrison awaits the arrival of transports from India in order to take its departure, and that the place will probably be evacuated before the end of the year.

The discussion of the new commercial convention between China and Japan was resumed on the 24th instant, the chief Chinese Commissioner being Lu Hai-kwan, and the Japanese Mr. Odagiri.

Thursday, Nov. 27.

Presumably the regulation period—40 days—of a Viceroy's mourning for his mother has expired in the case of His Excellency Yuan Shih-kai, for the telegraph announces his return to official life in a very active form. On his return from his native province he is making visits to Hankow, Nanking and Shanghai, and it would seem that the outcome of his tour will be fatal to the great Taotai Shên. Viceroys Yuan and Chang are both said to be strongly opposed to the supremacy of Shên I-fai in so many profitable state enterprises, and they have determined to combine their strength for his overthrow. Against such a combination he is not likely to stand long. In fact we may assume that he has passed finally from his place of prominence on the official stage, and that when the Peking Government refused his application for permission to abbreviate the monstrously long period of mourning to which his parent's death had condemned him, the deliberate intention of the Court was to sentence him to permanent retirement.

Mr. Lessar was to leave Peking on the 25th instant. His health is said to be much broken, but a period of rest will doubtless restore him.

General Iso, commander-in-chief of Manchuria, has applied to be relieved of his office on the grounds that international relations have become too onerous for him and that he finds it impossible to collect the Indemnity fund. The Peking court is said to be disposed to grant his request.

It is said the Chinese Government is pressing Russia for the rendition of Newchwang, but that Russia is unwilling to

consider the question practically until the evacuation of Shanghai has been completed. If the Chinese have any sense of patriotism or national dignity they must bitterly resent the attitude of the Powers towards these various questions. What Europe considers is the aggressive titles of her own States not the title that China has to the integrity of her own empire. Japan has certainly enhanced her claims on Chinese gratitude by being the first to withdraw her garrison from Shanghai. We trust that England may be the second.

The branch of the Specie Bank in Shanghai is about to issue dollar (Mexican) and five-dollar notes. Specimens of the notes have been sent to those concerned.

Friday, Nov. 28.

The Japanese Consul in Chefoo reports that England is to open a post-office in Chefoo from the 1st of December, and that there will thus be four foreign post-offices in the place.

JAPANESE PRIVATE CLAIMS.

We yesterday published figures from the *Niroku Shimpō* relating to the amounts of the principal claims preferred by Japanese in connexion with the Boxer outrages. The *Niroku's* figures are not confirmed by the *Fiji Shimpō*. We learn from the latter that the sums actually paid by the Treasury on the 20th instant, were:—

	Yen.
The Mitsui Firm	324,846
Mr. Higuchi Chuichi	23,184
The Murai Firm	12,979
The Tohi Bank	65,655
The Kajima Bank	11,965
The Tonomi Firm	13,450

Our contemporary adds that the original claim of the Mitsui amounted to 800,000 yen. On the other hand, the Foreign Office publishes the following figures:—

	Yen.
Specie Bank	165,586
Mr. Tanaka Tomekichi	850
Mr. Ando Fujio	349
Mr. Oseko Hanyū	260
Mr. Kojō Teikichi	758
Mr. Yamada Keisuke	12,400

The Foreign Office publishes a further list of compensation paid to private individuals on account of the Boxer outrages:—

	Yen.
Mr. Abe Hikotaro (Yushun Company)	111,262
Mr. Nishigori Saburo (employee of the Peking University)	1,051
Mr. Tei Eisho (ex-Consul at Tientsin)	3,097
Mr. Ishii Kikujiro (ex-Secretary of Legation)	2,544

Up to the 22nd instant the total sum paid over was 650,235 yen.

It is announced that the sums paid to Japanese subjects on the 24th instant as compensation for losses in connexion with the Boxer outrages, were:—

Mr. Takenouchi Saikichi	139,960 yen.
The Chikushi Bank	49,840 "

The following compensations to private individuals have been paid in connexion with the Boxer outrages:—

	Yen.
The family of Mr. Narabara (who was assassinated)	35,171
The family of Mr. Kojima Shotaro (killed)	22,804
Baron Nishi	3,318
Mr. Matsumura Choku	6,397
The Fukutomi Company	21,974
Mr. Mochizuki	332
Mr. Kodera Umekichi	518
Mr. Yamamoto Sanichiro	15,351
Mr. Nakane Moroto	216

GARDEN PARTIES IN TOKYO.

On the 22nd instant Count Okuma, with his wonted benevolence, threw open his garden at Waseda for the purposes of a charity party, the object of the charity being the women's prison gate home which is under the direction of Mr. and Mrs. Hara, and which owes so much to their indefatigable efforts. It is scarcely necessary to comment on the genuine kindness of this act of Count Okuma's, for when admission to a garden is given on payment, some injury can not fail to be done by the crowd of visitors. Still there is less reason for apprehension on that score in Japan than there would be in Europe or America, and probably the beauties of the Waseda Park with its grand display of chrysanthemums, dwarfed trees and shrubs and conservatories, were as much respected as admired by the great concourse of pleasure-seekers on Saturday. Refreshments were served, of course, doubtless at Count Okuma's expense, and there was *mochi* throwing for frolicsome people. The proceedings were enlivened by a band of young folks who discoursed some pretty music.

Mr. and Mrs. Hara Rokuro gave a garden party at their residence in Tokyo on the 25th instant. They were fortunate in the weather, and the grounds, bathed in autumn sunshine without a disturbing breath of air, prevented a really lovely spectacle. This garden is unquestionably one of the most attractive in Tokyo. Owing to the number of years that have elapsed since it was laid out, there is no longer any possibility of detecting whether the original features of the ground were utilized in their entirety, or whether the hills and dales are artificial. The park, as it now stands, may be described as a series of miniature mountains and valleys grouped round a lake. There is no very striking *coup d'oeil*, except when occasional glimpses of the sea show through the boughs of old pine-trees, but the spectator is delighted by a succession of exquisitely restful scenes, so interwoven as to suggest labyrinth-like continuity. The place has historical interest apart from its delights of landscape. For it was here that the first building for a British Legation was erected by the Tokugawa Government forty years ago, and it was here that two Choshu youths, now the foremost statesmen of Japan, headed a band of *samurai*, who set fire to the edifice and thus guaranteed Goten Yama, as the site was called, against being perverted from an almost sacred haunt of Tokyo landscape-lovers into a residence for the "southern barbarians." Standing beside the verandah of Mr. Hara's sumptuous Japanese residence is an ancient tree, still vigorous, though its trunk was hollowed by the conflagration whose charred traces it plainly shows. Count Inouye, one of the leaders of that escapade, was present at the garden party, and his comrade on the occasion, Marquis Ito, is now deciding the fate of the Ministry at a conference in Kyoto. Another feature of the place is a *Kuri* carried thither from Miidera, where it once formed part of the cluster of temples famed as the scene of Benkei's alleged escapade in the thirteenth century. The whole interior of this building is covered with pictures from the brush of an artist of the early Chinese school. It was entirely in harmony with such surroundings that the amusements provided for the guests should take the form of *No Kyôgen*, which, being performed by Kwanze Tetsunojo, were of

the most artistic type of the time. Refreshments were served at four o'clock on an eminence overlooking the blue waters of the Shinagawa Bay, and the party broke up at five o'clock.

KOREA.

Telegrams from Seoul state that Baron Ginsburg has left Korea and that his departure must be interpreted as an evidence of the failure of his loan project. It will be remembered that he was supposed to be negotiating with Li Yong-ik a loan to Korea of ten million *yen*, the Russo-Chinese Bank furnishing the money and the security being a ginseng monopoly and certain mining concessions. It is added that Baron Ginsburg realized a large sum in connexion with the Liaotung works of the Russian Government, and that he is a prominent shareholder of the Russo-Chinese Bank.

There is another ferment in the Korean capital. Messrs. Kwon Cho-hyok and Nam Ku-puk have been arrested. The former is chief of the bureau of artillery and engineers in the War Office, and the latter is editor of a newspaper. Apparently the sins laid to their charge are that they preferred against the redoubtable Li Yong-ik and his coadjutor Ming Kyong-sik, accusations of employing the Lady Om in the capacity of a celebrated Chinese beauty of ancient times who tempted her Sovereign to his destruction. The incriminated men are further suspected of conspiring to assassinate Li Yong-ik and Ming Kyong-sik. Another rumour asserts that the accusations against the apprehended persons are mere inventions, and that the true cause of the disturbance is competition for political power between Li Yong-ik and Li Keun-thaik, chief of the metropolitan police. Mixed up in the trouble is Om Chun-won, father of Lady Om and formerly governor of Seoul. It is a hazy business, but so are all Korean complications.

Further bewildering reports come from Seoul. It is now stated that the alleged arrest of the editor of the *Seoul News* is incorrect. He is not involved in the trouble. The source of disturbance is as already stated, a struggle for supreme power between Li Yong-ik, Minister of Finance, and Li Keun-thaik, Chief of the Metropolitan Police. The latter is said to have preferred charges against the former and to have applied for his arrest, but the application has not been granted. Li Yong-ik, on his side, has accused Kwon Cho-hyok (chief of the artillery and engineer bureau) of a plot to assassinate him. Kwon, of course, denies any such crime, and one Nan Cheung-sik, a former Vice-Minister, has been apprehended as a witness, it being the custom in Korea to imprison witnesses as well as accused persons. Such is the outward aspect of affairs, but as to the influences operating beneath the surface, no onlooker ventures to be explicit.

The plot against Li Yong-ik appears likely to end in smoke. What substance it had originally, over and above the semblance of reality imparted to it by rumour, we must await fuller news to determine. Correspondents of Tokyo journals now allege that the whole affair is assuming a shadowy aspect—or, to use their own expression, is turning into a wraith. Korea's chief trouble seems to be the incapacity of her leading officials to refrain from intriguing

against one another. The evident inference is that they find their posts sufficiently profitable to suggest such manoeuvres. Yet their legitimate emoluments are very small.

The Japanese Consul in Seoul reports the outbreak of an epidemic of cattle disease in the neighbourhood of that city.

A SOCIAL QUESTION.

It is curious and interesting to find that Kobe society is more or less exercised about a question which occupied the attention of Hongkong folks as much as thirty-six years ago—the question of dance engagements. Away back in the days before Hongkong had begun to shake off its evil reputation and when the cemetery in the Happy Valley was becoming rapidly peopled, ladies were few and far between in the Crown Colony. Probably there were not more than five-and-twenty in the whole place, and as a natural consequence each of them had friends of the other sex more intimate and numerous than is usual in better balanced communities. Persons that made a study of sociological questions considered such a state of affairs agreeable for the ladies, and, at the same time, commiserated the men who were not among the favoured followers. There is no doubt that these individuals had a chilly time of it. Their situation developed its least agreeable features on dancing occasions, for not only did the ladies engage themselves many deep a fortnight or three weeks beforehand, but also the sway of each over her loyal swains was so complete that she did not hesitate to pretext imaginary engagements with the latter whenever an ineligible outsider ventured to ask for a dance. There was a great deal of grumbling. Men were heard to declare that a lady had no business to make promises until she actually entered the ball room, and that to have phantom names on her programme was a downright shame. The ladies never seemed to pay the smallest attention to such grievances. They knew well that their monopoly would soon be broken down, as indeed it was, and so they just amused themselves in the sunshine. Apparently Kobe ladies are behaving similarly, and the ancient problem of their right to do so is again on the *tapis*. Right to do so indeed! When did a lady show any practical solicitude about the abstraction called "right" in such matters?

RAILWAYS OF JAPAN.

We have received from the Railway Bureau a pamphlet containing statistics of railway business, both Government and private, in Japan proper and Hokkaido, for 1901, together with a highly complete map showing the lines running from end to end of the Empire. Formosa is excluded from these statistics. We learn that the total length of official and private railways at the end of 1901 was 4,026 miles 16 chains, of which official lines totalled 1,059 miles and 48 chains. The length of the Government and private railways not yet opened to traffic totals 1,828 miles 30 chains, of which 983 miles 88 chains belong to the Government. In addition to the above, the length of private railways for which provisional charters have been granted, is put at 793 miles 36 chains. The average number of passengers per mile in 1901 was a little over 30,000 on Government lines, while that on private railways shows a slight falling off as compared with official lines. The average quantity of goods carried per mile was 4,000 tons on private lines and that on official railways a little over 2,500 tons.

THE NIPPON YUSEN KAISHA.

The half-yearly meeting of the Nippon Yusen Kaisha was held in the company's building on the 25th instant, the chair being occupied by Mr. Kondo Rempei, President of the Company. The following report and statement of accounts were presented and adopted unanimously:—

THE NIPPON YUSEN KAISHA.
TO THE SHAREHOLDERS.

Gentlemen:—The Directors submit to you the annexed Statement of the Liabilities and Assets of the Company, and Profit and Loss Account for the Half-Year ended September 30th, 1902.

The Gross Profits of the Company for the past Half-Year amount to yen 3,542,413.063, out of which there has been paid:—

Depreciation of the Company's fleet and property	yen 660,350.830
Insurance Fund	154,933.090
Ships' Structural Repair Fund	395,164.860
	1,210,448.780

leaving a balance of yen 3,011,141.148, including yen 679,176.865 brought forward from the last Account.

The Directors now propose that yen 116,598.210 be added to the Reserve Fund, raising it to yen 1,672,923.696; yen 800,000.000 to the Fund for the Extension of Services and Improvement of the Fleet, bringing that amount to yen 2,000,000.000; and that yen 71,358.110 be allowed as Directors' and Auditors' fees. From the remainder the Directors recommend a Dividend at the rate of Ten per cent., together with Two per cent. as special Dividend, thus making Twelve per cent., per annum, which will absorb yen 1,320,000.000.

The Balance, yen 703,184.828, will be carried forward to the next Account.

REMPEI KONDO, Chairman.

BALANCE SHEET, 30TH SEPTEMBER, 1904.

LIABILITIES.		Yen.
Share Capital	22,000,000.000	
Debentures	1,200,000.000	
Insurance Fund	2,096,515.649	
Ships' Structural Repair Fund	1,699,141.019	
Reserve Fund	1,556,325.486	
Dividend Equalization Fund	3,300,000.000	
Fund for the Extension of Services and Improvement of the Fleet	1,200,000.000	
Sundry Creditors	4,511,782.283	
Amount brought forward from last account	679,176.865	
Net Profit for the Half-year	2,331,964.283	
	40,574,905.585	

ASSETS.

Reduced Book Value of Fleet	21,599,216.118
Reduced Book Value of Launches, Barges, &c.	229,652.571
Payment on account of new ships ...	796,826.530
Buildings and Land	3,624,289.764
Yokohama Stores Depart., &c.	948,853.986
Public Loans and other Securities ...	1,334,915.440
Cash at Bankers and in hand	9,179,026.811
Coal in Stock	96,901.119
Sundry Debtors	2,765,223.246
	40,574,905.585

PROFIT AND LOSS ACCOUNT.

	Yen.
To Depreciation of fleet and property	660,350.830
To Insurance Fund	154,933.090
To Ships' Structural Repair Fund ...	395,164.860
To Reserve Fund	116,598.210
To Fund for Extension of Services and Improving fleet	800,000.000
To Directors' and Auditors' fees	71,358.100
To Dividend (10 per cent.)	1,100,000.000
To Special Dividend (2 per cent.) ...	200,000.000
To Balance carried forward to next account	703,184.828
	4,221,589.928
By Balance brought forward 31st March, 1902	679,176.865
By Amount of Gross Profits for the Half-Year, ending 30th September, 1902	3,542,413.063
	4,221,589.928

We have examined the above Accounts, with the Books and Vouchers of the Company, and find them to be correct.

TAKESHI ARISHIMA
TOKUJIRO OBATA } Auditors.
TATSUMI IIDA }

Tokio, 25th November, 1902.

Mr. Kondo Rempei, President of the Nippon Yusen Kaisha, was able to set forth a fine record when addressing the shareholders at the last semi-annual general meeting. He explained that since September, 1899, when the Directors and Auditors were re-appointed, the following changes have to be noted:—(1) The assets of the Company have grown from 34,960,000 yen, in round numbers, to 40,500,000 yen, being an increase of over 5½ millions. (2) The number of ships has increased from 66 to 70, and the tonnage from 195,500 tons to over 221,000 tons. (3) The value of the ships has been written down from 106 yen per ton to 97 yen. (4) The average age of the ships has diminished from 14 years to 13 years, whereas the average tonnage has increased from 2,963 tons to 3,170 tons. (5) The fund for the extension of services and improvement of the fleet has grown to 2 million yen, and the reserve for the equalization of dividends to 3½ millions.

The President was also able to tell his hearers that the Company had amassed a largely increased quantity of that valuable but intangible asset, credit; that a considerable addition of trained men had been made to the staff; and that important reorganizations had been effected.

As for the future, trusts are being formed in America; Germany is giving increased encouragement to maritime enterprise; England is being led to take similar steps, and, altogether, great activity is observable in maritime circles. The Nippon Yusen Kaisha must not be wanting in the spirit of enterprise.

After hearing the report and the President's speech, Mr. Iwaya Matsuhei proposed, and the meeting unanimously voted, that the Directors and Auditors be asked to continue in office, and that Mr. Ogawa Senkichi's name be added to the Board of Directors.

This recognition of Mr. Ogawa's services will be heartily welcomed by the officers of the Company, for he is recognised by all as one of the ablest and most popular of its managing officials.

The Report indicates that the Company is not showing any laggard disposition in the matter of adding to its fleet. That was the mistake made by the old Mitsu Bishi; a mistake which led to the establishment of its rival, the Kyôdô Unyu Kaisha. The ships now actually ordered and under construction have an aggregate tonnage of 20,307 tons. The whole are being built at the Mitsu Bishi yard in Nagasaki. It is noteworthy that the Mitsu Bishi were the pioneers of maritime enterprise on a large scale in Japan, and that they are now incomparably the greatest ship-builders in the empire.

It is to be observed that although comparatively unfavourable results were expected from the half-year's working—the half-year ended 30th Sept., 1902—such was by no means the case all round. In domestic waters the cargo carried showed an increase of 33,000 tons compared with the figure for the preceding half year, but rates were so greatly cut down by competition that the actual monetary receipts were smaller. On the Shanghai line, the depreciation of silver affected homeward rates and checked the course of exports. In the case of Korea, bad crops throughout the southern, the eastern and the western regions had an injurious influence upon exports, but in the north the harvest was good, and in consequence cargoes were easily procurable from Yuen-

san. On the Shanghai-Tientsin route, trade and the movement of merchandise suffered from the prevalence of the cholera epidemic, but on the European line steady progress was made, the average cargo carried being 900 tons per steamer. The results on the American line, however, were not satisfactory. Outward cargo offered in fair quantity but at rates cut down by competition, and homeward cargo was small, so that, although owing to an increase in the service the bulk of cargo carried was larger, the average per ship diminished. With regard to the Australian service, the terrible drought that has prevailed in the Commonwealth during the past seven years necessarily affected trade, and, moreover, owing to the action of a certain company the combination of ship-owners on that route was broken up last July, so that competition rates thenceforth prevailed. From Hongkong to Australia, however, an increase of cargo is recorded. The record for the Bombay service is one of the best, for a revival of the cotton spinning industry in Japan necessitated large importations of raw material, and further it was found possible to effect with other carrying companies arrangements such as to maintain rates at a reasonable figure. Outward cargo also continued to increase. In the direction of Vladivostok, the completion of the Trans-Asian Railway and the establishment of a line of steamers connecting with it, had some effect, of course, in diminishing the number of Nippon Yusen Kaisha passengers, but owing to an increase in the number coming from Europe, America and Australia, there was a growth of twenty per cent. over all the lines.

The general result was that whereas cargoes showed a diminution, there was an increase in the passenger traffic which redressed the balance. Thus, though the total earnings of the Company's fleet were less than they had been in the corresponding period of last year when many vessels were chartered by the Government for the purposes of the North-China campaign, they showed a slight increase compared with the figure for the six months immediately preceding, so that the Directors were able to declare a dividend of 12 per cent. All things considered, that result must be regarded as eminently satisfactory.

A SUICIDE.

Mr. Arai Go, formerly a member of the House of Representatives and now president of the Agricultural and Industrial Bank of Gumma, committed suicide by jumping over-board from the *Heian Maru* as she was steaming across the Bay of Harima just before daylight on the 25th instant. Mr. Arai was not seen committing the fatal act. Attention was attracted by the extinguishing of the light in the cabin, and on investigation it transpired that Mr. Arai had disappeared. In his travelling bag were found various documents showing that he made away with himself deliberately. No cause is assigned, but of course the supposition is that he was suffering from temporary insanity. This is not the Mr. Arai Shogo, of parliamentary fame, who attracted so much attention in the first session of the Diet by his speeches about treaty revision, and who subsequently received the soubriquet of "red blanket" (*akai-ketto*).

THE "JIMMIN" AND THE GERMAN SOLDIERS.

The *Jimmin* objects to our comments on its action with regard to the alleged misconduct of some German soldiers and the subsequent steps taken by the German Authorities to correct the false accusations published by it. In its latest reference to the subject our contemporary addresses itself solely to the question of its own failure to insert Dr. Mansfeld's letter of contradiction. It now inserts the letter and invites us to say frankly whether we consider that the publication of such a letter was necessary in the first instance. We are obliged to answer in the negative. It is right in principle, and the laws of Japan require, that a journal should give space to any individual's denial of charges or criticisms appearing in its columns, as well as to any proofs adduced by that individual in support of his denial. But it is not right, nor does the law require, that a journal should publish a letter of contradiction which contains either abusive or threatening terms. We gather from the *Jimmin* that Dr. Mansfeld's letter reached it in Japanese without the Doctor's card and without any guarantee of *bona fides*, and we find that its concluding paragraph contains a demand for an apology and a threat in the presence of which our contemporary's unwillingness to publish, even supposing that the prescribed forms had been complied with, is explicable. We had presumed, of course, that Dr. Mansfeld wrote in German and enclosed his card, or some covering letter, as is necessarily done by correspondents familiar with newspaper etiquette. A letter carrying merely a Japanese signature, or rather a transliteration of a foreign signature, imposes on an editor no obligation to publish. But it is necessary to remind the *Jimmin* that these questions are mere corollaries. The main issue relates to the conduct of the German soldiers, and our contemporary's original accusations against them derive no justification from its present contention.

THE LONG-DESIRED COOKERY-BOOK.

Housekeepers in Hongkong have for many years been in possession of an Anglo-Chinese Cookery-book, compiled by that eminent sinologue, Dr. J. Dyer-Ball, and have found it of inestimable benefit. Capitally compiled and carefully arranged, it is a boon and a blessing to the prudent housewives of the Colony who desire to tickle the, at times, querulous palates of the household with a greater variety of homely but tasty dishes than the ordinary Celestial cook usually has knowledge of. Of course mistakes occur occasionally even in homes where Dr. Dyer Ball's useful compilation is in daily use, for John Chinaman can be very perverse at times and can most inconveniently misunderstand the number, or even lose the page, of the particular dish his mistress desires. Still, on the whole, we believe, the system has worked excellently, and many a worried lady in Hongkong has blessed the author of her cookery-book. Such a volume has long been desired in Japan and we have often wondered why it had never appeared. Perhaps no one had the courage to tackle the subject, for the question of ability may be left out of the discussion. At last, however, the "long-felt want" has been supplied, and we return hearty thanks on behalf of the ladies and the hosts of bachelor housekeepers among the foreign communities of Japan to Mrs. A. M. Chal-

mers and Mr. E. F. Crowe for their timely and useful book *High Class Cookery (in English and Japanese)*. The little work is in two parts, the first, English, the second Japanese; the first for the good house-wife's own use, the second, of course, for the cook. Turning the book over we find that 19 different soups are enumerated; 16 ways of serving fish are given; while there are 23 varieties of cooked meats; 13 ways of sending poultry and game to table; 7 kinds of vegetables; 11 different sauces, forcemeat, etc.; 26 recipes for pastry, puddings, creams, etc.; and last but not least 10 savouries and various forms of serving eggs. The book concludes with a table of weights and measures, and a vocabulary of culinary terms in English and Japanese. We can speak in the highest praise of the dainty volumes, our only regret being that curries have not entered more largely into the field exploited by the authors, for curry is the Japanese cook's very weakest point. The volumes are clearly printed, bound in Japanese crêpe covers, and turned out in a Japanese binding. There ought to be a very large sale for them throughout the treaty ports, and loud should be the chorus of praise bestowed on the industrious compilers; indeed, they should receive the *cordon bleu* instant. What reception the book will have in the kitchen remains to be seen. A poet in the *Kobe Herald* has his doubts, to judge by a verselet which he prints:—

"Mrs. Beeton," as written by C-r-w-e,
Is declared by the servants no go,
They all do abuse it,
And swear they won't use it—
For the Guild has decided it so.

We sincerely hope this poet is a pessimist whose prediction will be entirely falsified by events.

NOTES ON CURRENT EVENTS.

The *Kokumin Shimbun* discusses the question of naval increment in terms which leave no doubt about its views, though no definite declaration is made. Figures accompany the article, their object being to show that if first-class fighting material alone be considered, Russia will be much stronger on the Far-Eastern sea than Japan in a few years, unless the latter country adds considerably to its present establishment. The figures are:—

	Japan. Tonnage.	Russia. Tonnage.
1903	134,504	160,922
1904	131,617	195,262
1905	128,727	201,380
1906	125,837	209,328

By the year 1907, Russia's strength according to the *Kokumin Shimbun*, will be twice that of Japan.

Mr. A. H. Lay, now Acting Japanese Secretary to H. B. M. Legation in Tokyo, has been appointed acting Consul in Chemulpo, whither he will proceed in about a fortnight. There can be little doubt that the substantive appointment will be conferred on Mr. Lay in due course. We beg to offer him our sincere congratulations and to hope that this may be a step towards higher and well merited promotion. It seems a pity that the services of such an accomplished Japanese scholar should be lost to Japan, but as the Chemulpo Consulate has been placed on the Japan establishment, Mr. Lay may subsequently be appointed to one of the important consulates in this country, unless in the meanwhile he is transferred to a still more responsible sphere.

On the 23rd instant the graduation ceremony took place at the Officers' College,

His Imperial Highness Prince Kacho representing the Emperor. There were 707 graduates in all, of whom eight received special marks of honour from the Emperor in consideration of proficiency and good conduct. Among the graduates twenty-five Chinese were included, 20 of them being natives of Hupeh and five natives of Fuhkien. The branches of the service selected by these Chinese were infantry (16), cavalry (2), artillery (4), and land transport (3). No comparably numerous batch of Chinese students had ever previously graduated at a Japanese military college.

The manager and another official of the Nakabashi Bank have been arrested on more than one charge which, if proved against them, will entail evil consequences. The *Hochi Shimbun* conjectures that this may be an outcome of the resolute policy adopted by the principal public procurator of the Tokyo Local Court, Mr. Kawabuchi, who is determined to scrutinize closely the transactions of the various small banks now springing into existence. Something in the way of strict supervision is assuredly wanted. There are in Tokyo institutions proudly calling themselves banks, which, judging from the buildings where they carry on business, should rank with a tenth-class lodging house.

The Japanese troops in garrison at Shanghai were the first to take their departure. They embarked on the 22nd instant. The "send-off" seems to have been very cordial, the German band playing "farewell" to the departing comrades and a large number of officers from all the contingents accompanying them to the pier. These details are given by the *Fiji Shimpō's* Shanghai correspondent. The *Asahi's* correspondent states that the officer commanding the German contingent has received orders to prepare for departure.

The *Nichi Nichi Shimbun* publishes a telegram said to have been received at the Specie Bank on the 22nd instant. It says that Consols have fallen $\frac{5}{16}$, the quotation now being £92 $\frac{5}{16}$; Japanese War-bonds (5 per cent.) have fallen £1 12s. 1 $\frac{1}{8}$ d., the quotation becoming £106 1s. 10 $\frac{3}{8}$ d.; and the Japanese four-percents have declined to £87 5s., the fall being 2s. 6d. Similar depreciations are recorded in the case of other securities but no explanation is offered.

We read in the *Chiuo Shimbun* that it is intended to locate 500 immigrants on the Government lands in the neighbourhood of Bekenai, which is a place on the banks of the Teshiwo River. Pankesakuru appears to be the appellation of the particular spot chosen for this new effort of colonization.

The fifteenth "Annual Report of the Vancouver Board of Trade," a copy of which has reached us, shows that the gold produced in the Canadian Yukon Territory in 1901 was over forty million *yen* in value. A Government Assay Office has been established in Vancouver. It commenced business on the 29th of July 1901, and there is now to be built in Ottawa a branch of the Imperial Mint, where it is expected that the gold purchased at the Assay Office will be coined, and where Canadian money will be struck to replace the American silver now circulating in the province.

The Salmon Pack on the Fraser River during 1901, totalled 990,252 cases, being the largest on record. There were 49 canneries in operation. Owing, however, to low prices on the London market, the result of competition, the profit

derived from the enterprise was discouragingly small. It seems that the number of fish entering the Fraser is materially diminished owing to their being trapped on their way to the river's mouth. The trapping is done by Americans, whereas in Canada the law forbids anything of the kind. By way of remedy it is proposed to retaliate in kind; that is to say, to trap the salmon that pass close to the southern shores of Vancouver Island *en route* for American waters.

Mr. Ogawa of Tokyo has published, under the above title, another of his pretty albums. The book contains 104 portraits of the beauties of the capital, and is thus an excellent index to the kind and quality of Japanese personal charms in this class of life. We shall say nothing of the faces. Those that are curious about them had better buy the album: they will be well repaid. Concerning the binding and general "get up," however, nothing but praise can be spoken.

One imagines that Mr. Stead's career of anti-English criticism might have been abandoned by this time, but he has found in the sequel of the South-African War a new opportunity to denounce and abuse his countrymen. Lord Milner, he declares, has been guilty of bad faith and sharp practice because he attempted to make the Boer prisoners take the oath of allegiance before their release. Mr. Chamberlain—whom he calls "Shylock"—he accuses of still more flagrant bad faith because the Boer delegates in Europe have not been allowed to return to the new territories in order to stir up a fresh campaign of hostility to England. Lord Kitchener he denounces as a breaker of promises because he has not succeeded in obtaining amnesty for all the Cape Dutch who joined the Boers. And the British Government he charges with repudiating its just liabilities because it will not pay some fifty million pounds sterling for all the property destroyed in the Transvaal and the Free State. In short, if Mr. Stead can persuade the Boers that they have been execrably treated by England and that they have just cause for the gravest complaint against her, he will evidently spare no pains to persuade them.

Charitably disposed persons among our readers have doubtless observed the announcement in our advertising column that a concert of exceptional excellence is to be given on the 29th instant in the Uyeno Music Academy for the benefit of the Ladies' Lunatic-Aid Association. We need scarcely call attention to the matter. But it will be well perhaps to mention that the asylum for which help is sought is for female lunatics, and that, though maintained by the benevolent efforts of many of the leading ladies of Tokyo, its resources are very limited in comparison to the demands on them. The success of the projected concert will make a material difference in the comforts that the managers of the asylum are able to afford to the unfortunate inmates at Christmas time.

Ill as many folks think and speak of Ireland, it is the second best behaved part of the United Kingdom so far as criminal statistics show. England arrested 621 out of every 100,000 units of her population in 1900 on penal charges; Scotland arrested 1,489, and Ireland arrested only 744. The Irishman has his passionate sense of grievance—an ill-defined sense which, in the great majority of cases, he could not explain with any pretence of intelligibility—but his nature is not radically

bad. A glass of whisky and a black-thorn are his principal temptations.

The 23rd instant having been the festival called *Niiname no Matsuri* (new-tasting festival, or harvest fête), was celebrated as usual at the Imperial Palace, and all the houses in Tokyo hung out national flags. The Emperor himself attended the ceremony.

It is stated that the Great Northern Telegraph Company, the Great Eastern and the Chinese Telegraphs have formed a combination with the object of competing with the American Trans-Pacific cable. The combined companies will use the Taku-Shanghai cable and the Taku-Kiakta telegraph for the transmission of news. Possibly we are on the eve of some improvement in the matter of telegraphic rates. The charges have been onerous for a sufficient period, it must be admitted.

Tokyo journals repeat the statement that Mr. Iswolsky, Russia's present Representative in Tokyo, has been transferred to Copenhagen, and that he will be succeeded by his predecessor, Baron Rosen, who is expected to reach Japan next spring.

On the evening of the 25th instant Viscount and Viscountess Aoki entertained a large party at their residence in Tokyo. The presence of a number of British naval officers created a situation unusual in Tokyo, namely, a preponderance of gentlemen, and exceptionally spirited dancing resulted. The large ball-room presented a most animated scene, but there was nothing like crowding, as the couples seldom exceeded twenty-five or thirty. It need scarcely be said that all the arrangements were excellent, as is invariably the case at entertainments given in this proverbially hospitable house.

The Japanese public have subscribed for only one-half of the last issue of Exchequer Bills. Thus some five million *yen* worth have to be taken over by the Bank of Japan.

The distribution of prizes to exhibitors at the autumn exhibition of the Fine Arts Association, took place in the Uyeno galleries on the 22nd instant. His Imperial Highness Prince Arisugawa presided, and the ceremony derived special interest as being the 25th anniversary of the Association's founding. The most notable prize-winners were Mr. Kato Tetsujiro (embroidery), Mr. Tsuda Shukyo (metal sculpture), Mr. Araki Kwampo (painting), Mr. Yamada Chosaburo (metal work), Mr. Satake Yeiko (painting), Mr. Kato Tomotaro (porcelain), Mr. Unno Shomin (bronze casting), Mr. Matsumoto Shonen (painting) and Mr. Ando Jubei (cloisonné enamel). These all received gold medals. We omit the names of the silver-medallists.

The British Representative in Tokyo has addressed to the Japanese Minister of State for Foreign Affairs a despatch dated Nov. 20th, stating that having informed the British Government of the steps taken in this country to celebrate the Coronation of King Edward and of the very friendly language employed by the Japanese press, His Majesty signified his desire that expressions of profound satisfaction should be conveyed to the Japanese Minister of State for Foreign Affairs. Sir Claude MacDonald adds his own sincere pleasure at being the medium of transmitting his Sovereign's message.

It is reported that the *Sumidagawa Maru* went ashore about 50 miles east-

ward of Yaensan on the 26th instant. The *Tetorigawa Maru* proceeded to her assistance. The report indicates that the vessel sprang a leak and had to be beached. Nothing is said as to loss of life.

Mr. and Mrs. Inouye Katsunosuke have arrived in Tokyo, from Berlin where Mr. Inouye has been serving for some years as Japanese Representative. They are staying at the home of Count Inouye.

It is expected that Mr. Hayashi, Minister in Peking, will return shortly to Japan.

The Committee of the Russo-Japanese Association have decided to give an entertainment to the Russian Representative, M. Isowolsky, and to invite Admiral Alexieff to Tokyo.

The Siamese war-ship which is to meet the Crown Prince in Japan and carry him to Siam, left Bangkok on the 19th instant. The Prince is expected to reach Tokyo about the 15th of Dec.

JAPAN SABBATH ALLIANCE.

(COMMUNICATED.)

The first Convention of the Japan Sabbath Alliance met in the Ginza Hall, Tokyo, on Saturday, Oct. 25, 1902, in pursuance of a call issued by a joint committee of Japanese and foreigners,—the former appointed by the Evangelical Alliance of Japan and the latter by the General Missionary Conference, held in the Fall of 1900. In spite of the inclement weather there was an attendance of over sixty—one-fourth being foreign Missionaries. Deep interest was manifested in all the proceedings. Rev. C. B. Moseley, of Kobe, presided until the Constitution was adopted and the permanent officers elected. In the afternoon Revs. C. B. Moseley and T. Ukai read interesting papers on the Sabbath question, emphasizing the great need of Sabbath observance and outlining the scope and aim of the Alliance.

The object of the Alliance is to strive to secure a proper observance of the Christian Sabbath:—

1.—By informing the public mind concerning the nature, purpose and importance of the Christian Sabbath, and of its relation to the interests alike of the domestic, industrial, national, social, moral and religious life of the people.

2.—By uniting in a strong and effective organization the friends of the Christian Sabbath throughout the Empire.

A committee—three Japanese and three foreigners (Revs. H. Kozaki, J. Soper, K. Hoshino, J. H. Hamilton, G. Sinuma and H. Topping)—was appointed to prepare an address on the work and aims of the Alliance, to be published both in Japanese and English, for general distribution. There are four ways in which the Alliance hopes to arouse interest in the subject of Sabbath observance:—(1) By production of suitable literature; (2) by special lectures and addresses; (3) by organization of branches of the Alliance in the chief centres; (4) By individual effort and personal work. The Alliance holds that the law requiring a periodical rest-day is not an arbitrary law, but a benign law, having in view the very best interests of man's three-fold nature,—physical, intellectual and moral.

On Sunday afternoon, Oct. 26, a general meeting was held at the Y. M. C. A. Hall, Kanda. Three addresses were delivered by the following speakers:—Rev. K. Ibuka, President of the Meiji Gakuin, on "The Sabbath from the Moral and Religious Point of View;" Hon. T. Ando, President of the National Temperance League, on "The Sabbath from the Industrial and Hygienic Point of View;" and Rev. Julius Soper, Dean of the Aoyama Theological School, on "The Duty of Christians regarding the Sabbath."

The following are the officers of the Alliance: Rev. H. Kozaki, President; Rev. C. B. Moseley, Vice-President; Dr. M. N. Wyckoff, Treasurer; Revs. H. H. Coates and T. Ukai, Secretaries; Revs. J. Soper, J. W. Frank, Y. Chiba, K. Hoshino, M. Tomita, Advisers.

THE SYSTEM OF PRELIMINARY EXAMINATION IN JAPAN.

THE question of preliminary magisterial examination in Japan has been frequently discussed in the local press by both correspondents and editors, but its importance probably justifies the renewed attention it is now receiving. We endorse the general views expressed by two of the local English journals on the subject. The Japanese system, as at present pursued, is open to many abuses. It errs in harshness towards an accused person even more, perhaps, than some European systems err in the opposite direction, and it often leads to apparent abuses of a very oppressive nature. What is difficult to understand is that in this one respect Japanese legislators show themselves conservative. In all other matters their spirit is distinctly progressive: they keep fully abreast of the European average. But they cling to the preliminary examination of a suspect exactly as it was practised in France a quarter of a century ago. The framers of the Japanese Codes borrowed this particular procedure from France so far as mere forms were concerned; but students of history know that such a method of investigation may almost be said to have been indigenous in Japan. Possibly the latter fact may be partially responsible for the refusal of Tokyo legislators to remain faithful to French example, for whereas the French long ago modified the system in all essentials, the Japanese preserve it unchanged. They are understood to maintain that its results are sufficiently satisfactory to forbid precipitate change, and although extensive alterations of the Code of Criminal Procedure were submitted for the Diet's approval last session, they did not include any radical modification of the *yoshin saiban*. We can only repeat our hope that a different view will soon be taken of the matter, and that the country's penal procedure will be brought into consonance with higher models.

There are one or two points, meanwhile, which may be briefly referred to. They are points with which the public should already be quite familiar, but owing to frequent changes of journalistic personnel in the foreign settlements, it often happens that knowledge garnered by one editor in the course of controversy or experience is not acquired by his successor until the old routine of error and correction has been followed. Thus in this instance we find the familiar want of appreciation as to the judges' usual reason for refusing bail. One of our local contemporaries writes as though the danger of an accused person's escape were the chief, if not the only, motive for refusing to liberate him pending his public trial. That is not so. Unwillingness to grant bail is ascribable, in a great majority of cases, to an apprehension that the incriminated person would employ his liberty to destroy the proofs of his guilt. It will be apparent that such a consideration may have special applicability to the very case which has

inspired the present discussion. Then, again, we find this statement:—"It is absurd to suppose that with the efficient police force in Japan, any accused person could not be prevented from leaving the country, more especially in the case of foreigners who are comparatively few and easily identified." It appears to have been forgotten by the writer of such a comment that in no country do the police exercise surveillance over persons released on bail, nor are they in any country held responsible for the movements of such persons. It appears to have been also forgotten that precisely in the case of foreigners the police—even assuming their general alertness in such matters—would be at fault; for whereas the system of passports for foreign travel might prove of some assistance in restraining native absconders, the foreigner, who enjoys absolute freedom of movement, can leave the country whenever he pleases. Quite recently a foreigner did leave the country, bequeathing to his sureties the pleasure of paying his bail.

COURTESY TO THE IMPERIAL FAMILY.

IN the *Japan Times* of the 20th instant, a writer signing himself "Curiosity" is responsible for the following:—

Dear Sir,—In the *Japan Times* of the 19th inst., an account is given of the arrest of a guard of a Nippon Tetsudo train for putting an Imperial Prince into a 2nd class carriage. In it it is stated that several foreigners were at the time in the first class carriage of the train, and they refused the guard's request for them to move into a 2nd class carriage under the circumstances. There can be no doubt that these foreigners were clearly within their rights, when they acted as they did. I have always understood that in Europe and America people guard their own rights most jealously and would not submit to an encroachment upon them, however slight. Now I am very curious to know whether there is no margin left in the Western code of independence and self-assertion to allow a man to accede to the guard's request under the above circumstances. Would that be considered an unpardonable abandonment of one's rights? In other words, would a majority of Foreign gentlemen have acted under the same conditions as those particular foreigners did? I am interested in this, more as an ethical question and as a means of discovering the differences between Japanese and Western ideas. For it is almost impossible to imagine a Japanese who travels first class to act under similar circumstances in foreign country as the foreign gentlemen above mentioned did. Will not some of your foreign readers kindly answer my question?

We record this as a *bonâ fide* inquiry from a Japanese. Certain liberties taken by the writer in his use of the English language set the cachet of sincerity on his letter. His question probably presented itself to many of his countrymen, and it is in the interest of both sides that an answer should be given. But the answer can not be either a simple negative or a simple affirmative. For we want to know, in the first place, what is to be understood by the phrase "would a majority of foreign gentlemen have acted under the same conditions as these particular foreigners did." We want to know how did these particular foreigners act. The assumption is that they refused to remove to a second-class carriage although requested by the guard to do so in order to make room for an Imperial Prince and his suite. We venture to doubt whether that is an

even approximately correct description of what happened. Our idea is that the guard, who, it may be assumed, could not express himself in English, failed altogether to convey to the foreign travellers the import of his request and that they declined to move simply because they did not apprehend any reason for doing so. However, "Curiosity" evidently assumes that they did fully apprehend, and he wants to know whether their refusal, under such circumstances, may be taken as an example of what any foreign gentleman would have done. We reply emphatically "no." There is not any foreign "gentleman" who, travelling in Japan, would decline to move to a second-class carriage were he civilly asked by a guard to give place to a Japanese Imperial Prince. That is quite certain, and because it is certain, we have no hesitation in conjecturing that the Suzume-no-miya guard failed completely to make himself intelligible to the foreign occupants of the first-class carriage. Perhaps we ought to add that although a request of that kind coming from a guard in Japan would doubtless be acceded to by foreign travellers, it would be regarded as something quite inconsistent with European customs. In Europe if a royal or imperial personage desires segregation when performing a railway journey, he takes care to duly notify the railway authorities beforehand, and the fact that such notice has not been given would be construed as a tacit admission of readiness to dispense with all distinctions, and to travel in free contact with the public. Hence it is very conceivable that if in a Western country first-class passengers were asked suddenly by a guard to give up their compartment to a prince, they might decline thus to consult the convenience of his improvident highness or of the somewhat presumptuous railway authorities. But in Japan there would be no hesitation. The foreign "gentleman's" reflection would be "this is a custom of the country," and he would unhesitatingly comply. And this also may be added that the foreigner in Japan shows at least as much respect for Japanese imperialism as the Japanese themselves do. We have often seen a foreigner in the streets of Tokyo remove his hat when one of the Imperial Princes passed, whereas the Japanese present at the time remained covered. The Suzume-no-miya incident requires further investigation before "Curiosity's" queries can be properly applied to it, but on the general subject of courtesy we trust that what we have said will dispel his doubts.

MARQUIS ITO.

THE eyes of the Japanese public are directed anxiously on Marquis Ito. He has preserved reticence in a marked manner, and it is well understood that his attitude at present is not definitely opposed, or definitely hostile, to the KATSURA Cabinet. The Marquis left Oiso on the 22nd instant for Ise, whence he will proceed to Kyoto.

A visit to the Shrines of Ise and thereafter to the autumnal celebrities of the western capital is the pretext of his journey. But it happens that Marquis YAMAGATA is now in Nara, and that Count KATSURA, who has happily recovered from his illness, leaves Kumamoto to-day (24th) for Tokyo. The three statesmen will thus be in Kyoto on the 25th, and their combined presence there at a juncture like that of to-day can not be regarded as a merely fortuitous coincidence. Marquis Iro is believed to have thought out a plan which would enable the Government to proceed with its programme of naval expansion and, at the same time, to restore the land tax to its original rate. It is expected that he will submit the scheme for consideration by Marquis YAMAGATA and Count KATSURA. If it be approved by them, a basis of compromise will thus be found; for, on the one hand, the *Seiyun-kai's* objection to continuing the land tax at its present rate will be removed, and, on the other, the Cabinet's desire to develop the Navy will be gratified. To the ordinary onlooker it seems that the *Seiyun-kai* leaders—Marquis Iro excepted—do not want a compromise. The nature of the resolutions adopted by the various sections of the Party appears to indicate that nothing less than the Ministry's overthrow is sought, inasmuch as the alleged ground of each resolution is a sin of omission against which no cabinet could defend itself successfully before a tribunal of its political enemies. Moreover, it is alleged in some quarters—well informed quarters too—that eight-tenths of the *Seiyun-kai* are determined to oust the KATSURA Cabinet at once, if it be in the power of a parliamentary majority to do so, and that the moderate counsels of the remaining two-tenths have no prospect of being heard. There are, however, two points to be noted. The first is that compromise always finds favour with Japanese politicians and statesmen. Their habit is to regard each other's views as worthy of respect. The second is if Count KATSURA resigns it will be very difficult to find a successor. Marquis Iro is the only statesman who could succeed him with any prospect of administrative success. But Marquis Iro is now the leader of a political party. He would come into power in that character, and it is patent to every close observer that an important section of the nation, the section represented by the House of Peers, is not yet prepared to extend frank support to a party Cabinet. Count KATSURA's administration has clearly demonstrated that the mandate of a political party is not at all essential to the successful conduct of public business in Japan. When the Count came into power there might have been some doubt upon that point. But his remarkably clever management of State affairs has given new vitality to the Imperial system, apparently moribund two years ago. The advocates of that system can point to an object lesson now actually before the

eyes of the nation, instead of relying solely on the bureaucratic achievements of ante-diet days. Obviously, therefore, a party Cabinet, even under the leadership of Marquis Iro, could not hope for a long and stable tenure of office, above all if it constituted itself the representative of a policy which must ultimately be denounced as unsound, the policy of leaving the Navy as it is and trusting the nation's security to the forbearance or assistance of other Powers. It may be assumed, then, that Marquis Iro has no ambition to take office immediately, and it is certain that if the *Seiyun-kai* attempt to throw him over, not only will a serious split occur in their own ranks, but also they will once more find themselves in the wilderness where they wandered in the days of the Meiji statesmen's solidarity. Many things thus make for a compromise, and all things point to Marquis Iro as the pivot of the situation. One other contingency, indeed, should not be omitted from the calculation. It is that the KATSURA Cabinet, defying Marquis Iro and the *Seiyun-kai*, may dissolve the House of Representatives and appeal to the country. We believe that Count KATSURA is much too sagacious to adopt that course. His able administration has won the applause of the whole nation, and he is the exponent of a programme which may be deferred but can not be abandoned. Everybody understands clearly that the charges preferred against him by his opponents, charges of neglecting administrative reconstruction and financial reform, are mere pretexts which would have served equally well for assaulting any Ministry in the past, and which will probably serve the same purpose frequently in the future. If Count KATSURA sees plainly that to pursue a policy which must ultimately succeed would involve an immediate collision with the Diet, he will place his trust in time and quietly lay down the reins of power, sure of seeing himself justified by public acclaim by and by; whereas if he dissolves the House of Representatives he will immediately create for himself and his policy a host of implacable enemies. He is much too far-seeing, we think, to choose a path plainly leading to failure when the route to success lies invitingly open.

ARMAMENTS.

IT is notable, though not at all inexplicable, that whenever Japan contemplates an increment of her army or her navy her purpose provokes opposition in the columns of the local foreign press. Such was the case thirty years ago when she adopted conscription; such was the case when, in 1872, her first considerable war-vessel arrived from England; such was the case when the Diet, in its early days, rejected the Government's proposal to build two line-of-battle ships; such was the case when the *post-bellum* programme invited public attention: such was the case when the

third scheme of naval increment came before parliament, and such is the case to-day when the problem of further increment is broached. This pertinacity of disapproval must obviously be attributed to the same sentiment, and that sentiment may be called the mercantile sentiment. It is essentially repugnant, and must always be repugnant, to men with commercial instincts to see large sums expended on unproductive objects. They have a natural aversion to anything of the kind. They think that the country's prosperity, which is synonymous with their own business success, would be much better promoted either by lightening taxation to the extent of the proposed outlay, or by devoting the money to productive enterprise. From one point of view that is a good, wholesome conviction. Nothing so thoroughly disgraces and discredits Occidental civilization of this twentieth century as the practical admission made by every nation that it fears the predatory impulses of its neighbours and sees an imperative necessity to expend vast sums in insuring itself against their aggression. The mercantile sentiment, in so far as it re-inforces a protest against the tyranny of international menace, is laudable. But States have to live in the world of realities, not in a world of ideals. Some day on the eve of the millenium may see a Power strong enough morally and materially—why not an Anglo-Saxon Power!—to dictate disarmament to the nations. That day is not yet, however, and pending its arrival the Power that ventures to differentiate itself by disarming must be prepared for self-effacement, for perpetual insecurity and probably for loss of integrity. There are European nations which exist by sufferance, but in each and all of their cases special reasons can be adduced for the world's forbearance towards them. As for Japan however, even though she could so thoroughly divest herself of the pride of patriotism as to become similarly a pensioner of comity, can it be imagined for an instant that safety would be assured to her? Not for an instant. She might not have to fear invasion, perhaps, since she enjoys geographical assistance in that respect and since the valour and fighting quality of her troops are now universally recognised. But conceive what her position would be were her navy over-powered. In the first place, her littoral would be entirely at the mercy of an enemy, and in the next her mercantile marine would be entirely swept off the seas. Or even though such bitter disaster did not at once overtake her, would she not immediately have to step out of the council of Powers controlling the affairs of the Far East, and instead of being one of the dictators, would she not have to accept dictation? These things are as certain as that the sun shines. Japan is an Oriental country. That is what she is when we come to the bed-rock of plain speaking. She may be free from many, if not all, of the attributes supposed

to be discredibly distinctive of Orientalism; but, on the other hand, she can not claim any of the immunities that Christendom extends to one of its recognised members. Her national preservation would always be a matter of interest to numerous sympathisers, but the sacrifices that any Western Power would make to preserve it may be measured with a very small unit. And if a Japanese publicist now sets himself to consider seriously what factors have chiefly contributed to win for his country the place she holds to-day among the nations, he is compelled to confess that incomparably the most potent of them are militant force and approved competence to wield it. What would Japan's position be to-day if she had not fought and beaten China in 1894-5, and if she had not marched in the relieving forces in 1900? Up to the eve of the Chinese war, was she not appraised, by English-speaking people at all events, as a Power distinctly weaker than China, and would she not be so appraised to-day had not the logic of hard facts controverted the estimate? It may be humiliating to our sense of morality but it is nevertheless incontrovertible that her military and naval achievements have done far more, incomparably more, to raise Japan from the ruck of unconsidered States than her productive industry, her commercial enterprise, her enlightened liberality and her finely progressive instincts. Those who now advise her to make no further effort on account of her navy are in fact advising her to step down from her hardly won place, and to efface herself as a controller of the Far East's destiny. There is no middle course. She must choose between authority and insignificance, between consideration and contempt, between the insurance of armaments and the chances of foreign benevolence. Those that advise her to the contrary may honestly believe in the friendliness of their counsels, but they can not deny that they are recommending a course which no other nation, China excepted, dares to adopt. As for the talk of financial inability, it is not sincere and can not lay the smallest claim to sincerity. The land tax, even at its present rate, is an altogether paltry impost. The fraction added to it four years ago has not been felt at all by the agricultural classes, and its reduction would not produce an appreciable improvement in their circumstances. Everyone is well aware that the land-tax talk is purely political "bunkum." Yet that the land tax should remain at its present rate is all that the Government asks for carrying out its naval programme. There is no question of any addition to the people's burdens.

This is a crisis in Japan's modern career. Political parties have done her much mischief already. They now seem likely to crown their record by pulling her down from the place of eminence to which her statesmen have with difficulty raised her.

A STRANGE STORY.

A TELEGRAM to the *Asahi Shimbun* from Berlin says that the death of HERR KRUPP is said to have been precipitated by chagrin. He was attacked in the most scurrilous and vehement manner by the *Vorwärts*, and the effect upon him was such as to produce an access of heart trouble which carried him off. The telegram adds that the leading Berlin journals unite in eulogizing his memory, and in condemning his traducer, and that he will assuredly have a splendid funeral, the EMPEROR himself being represented at it.

If this be true, it may have the effect of strengthening public opinion against the abominable abuses which disfigure present-day journalism. There are newspapers at this advanced stage of civilization which deliberately adopt the rôle of pandering to the lowest tastes of humanity, wholly reckless what suffering or loss they inflict on individuals provided that they find a pecuniary gain for themselves in the transaction. Lying on our desk is a copy of a recent number of the *Niroku Shimpô* of Tokyo, which contains a shocking story about a foreigner of Kobe who is mentioned by name, the firm to which he belongs being also indicated. The incidents of the tale could not possibly have occurred. They are contrary to nature, as every well-informed man must know. But among the readers of the *Niroku Shimpô* probably not more than ten per cent. will pause to reason about the statements advanced by it with an air of absolute assurance. The rest, the remaining ninety per cent., will accept the story in its entirety, and will set down the event as another evidence of abominable depravity on the part of a European. What is to be said of such journalism? Nothing, we think, except that penal codes are plainly defective since they do not provide summary punishments for editors guilty of these rascalities. The editor of the *Niroku Shimpô* is an accomplished gentleman; a scholar and a man respected by those that know him. On the staff of his paper there are employed some men that can not possibly be in sympathy with villainy of any kind. Does the editor and do all the respectable members of his staff intend to disavow responsibility for everything that does not emanate direct from their own pens? That is a theory that has been gravely advanced by, or on behalf of, certain Tokyo journals. Their editors are supposed to exercise no supervision over some special columns of the paper. They are to be dissociated from anything appearing in these columns. What monstrous nonsense! With much greater reason might a father claim that he must be held blameless for allowing his children to commit theft or arson. Mr. ZUMOTO, Editor of the *Japan Times*, in an essay recently read before the Japan Society of London on journalism in this country, spoke of the indifference displayed by educated men towards the attacks of newspapers. His language sug-

gested that this apathetic mood deserved applause as an evidence of philosophic calm. A strange doctrine truly! Does it not plainly mean the banishment of the newspaper to the limbo of public scorn; its treatment with unconcern because it merits no consideration? That is the inevitable outcome of journalism of the type of the former *Yorozu Choho* and the present *Niroku Shimpô*. While, as foreigners, we confess extreme indignation that villainous calumnies should be circulated in the columns of such newspapers to the defamation of Occidentals, as journalists and as friends of Japan we sincerely lament their existence. They are enemies alike of their country and of their craft. And with them may be classed not a few other Japanese newspapers which, while they do not deliberately propose to themselves a career of battenning upon calumny, have no hesitation in publishing matter which offends against all the rules of delicacy, and which could not be admitted into any domestic circle. One of the reforms most urgently needed in Japan is efficient public rebellion against the demoralizing action of one section of the press and the slanderous action of another. We fail to detect any substantial difference between a procuror of the worst type and a newspaper editor who makes a livelihood by retailing filth, or between a common burglar and a journalist who lives by stealing and selling the fair fame of his neighbours.

THE CHRISTMAS "GRAPHIC."

The *Graphic* Christmas issue, which has just come to hand, is a delightful number which should be welcomed, at any rate, to all British homes. It is, as usual, illustrated throughout in colours, and contains a number of good stories by such popular writers as H. S. Merriman, Eden Phillpotts, H. B. Marriott Watson, the Rev. S. Baring Gould, Mrs. Stepney Rawson, J. A. Barry, and Roma White, with a characteristic poem by Thomas Hardy. These stories are illustrated by the well-known artists Seymour Lucas, R.A., C. Napier Hemy, A.R.A., and Frank Craig, R.I., while humorous pages are contributed by H. M. Brock, Tom Browne, R.I., W. Ralston, John Hassall, R.I., Reginald Cleaver, A. Guillaume, and Claude Shepperson, R.I. Two beautifully coloured plates are given away with the number—"Lady Craven," from the portrait by George Romney, and "Snowed Up in the Coaching Days," by Cecil Aldin.

LADY SAMUEL.

Lady Samuel, on Lord Mayor's Day, was attended by the following Maids of Honour:—Miss Samuel, Miss Ida Samuel, Miss Gertrude Samuel, Miss Constance Benjamin, Miss Sono Fukuzawa (the grand-daughter of Viscount Hayashi, the Japanese Minister), Miss May Dimsdale, Miss Truscott, and Miss Winnie Bazley-White. Lady Samuel, says a London paper, finds one of her principal delights in gardening. One of her glass-houses is given up to a rare collection of Japanese dwarf trees, said by a Japanese visitor at the time of the Coronation to be the finest in England. All Lady Samuel's trees are picked ones sent direct to her, and she labels each with its age at the time received. She has now oaks, junipers, larches, and sago palms well over a hundred years of age. Lady Samuel also collects colour prints. Like her husband, too, she is devoted to fishing, and has had several of her best catches, landed in the beautiful lake of their park, mounted and given a place at the Mote.

FOOTBALL.

Saturday was one of those ideal days which fall occasionally in "the little summer of St. Martin" and tend to make the waning of the year such a pleasant season in this part of Japan. The sun shone from out a vault of the deepest blue, beneath which were blowing balmy breezes, which yet had a touch of Autumn in their quality, reminding one that the respite from grey skies and a chilly temperature was but brief, and that full advantage must be taken while the opportunity was with us. To football players the day was ideal for their sport and in Yokohama two games were played in the course of the afternoon.

The Association match led off at 2 o'clock, the teams being purely local, and the sides were consequently dubbed White and Colours. The play was very loose and the Colours had the stronger combination of the two. They kicked off and were the first to score, Van Smith making the point in the sequel of some fairly respectable passing. Nothing further was made during the first half. On changing end, Colours again pressed, but Whites cleared their lines and Thwaites, collaring the ball ran it down the field. He passed to Ford and Ford passed the leather back to Thwaites, who thereupon made a shot and put the ball through, thus equalising. Resuming, Colours made determined efforts to score and eventually Read, with a very long shot, managed to beat the opposing goal-keeper and thus made Colours two goals to the Whites' one. This score had not increased when the whistle blew. The teams were:—

Whites:—W. J. Waddilove, goal; W. B. Mason, A. W. S. Austen, backs; P. S. Moss, H. W. Kilby, E. J. Moss Jr., half backs; M. Marshall, W. Graham, J. R. Thomson, C. Thwaites, S. R. Ford, forwards. Colours:—E. Powys, Jr., goal; M. Hodges, Rev. W. Weston, backs; H. Y. Irwine, E. G. Fradgley (Capt.), C. H. Moss, F. J. Marques, half backs; K. Van R. Smith, J. L. Graham, O. Strome, N. W. Van Cleeve, and A. W. Read, forwards.

The Rugby match was very interesting and to the surprise of many the local fifteen managed to make a draw of it, for there can be no doubt that the Glories were far the better team. The visitors won the toss and for the first five minutes play was in the centre of the ground. Then the Naval men broke away and pressed their opponents hardly. The territory was cleared, however and Yokohama secured a touch-down. For a while the ball returned to the centre of the field, and then the visitors got it again and kept it in their opponents' territory for some time, Shettle eventually scoring a try, which Sherbrooke converted with splendid judgment. Play had continued some fifteen minutes and both teams seemed by now to have taken their opponents' measure. On kicking-off again the home side made a rush but were repulsed and gradually forced back within their own lines, despite Wheeler's persistent efforts to break away. At length the Glories secured another try, which Sherbrooke failed to convert, and nothing further resulted during the half. On change of ends the Naval team carried the attack at once down the ground but were repulsed and Yokohama gradually worked the leather along the field. From a clever rush by Wheeler and Hayward a try was secured, but Kilby unfortunately failed to make the goal, only to redeem himself a minute or so later when he converted Crawford's try into a goal, thus equalising the score. From this time on the play was mostly distinguished for the better combination shown on both sides, and one or two brilliant rushes by Kilby and Wheeler, followed by several capital scrums. The teams were:—Y. C. and A. C.—Back, W. Goddard; Three-quarters, F. O. Stuart, P. Mitchell, S. Wheeler and E. W. Kilby; Halves, H. E. Hayward and H. W. Kilby; Forwards, W. S. Moss, K. F. Crawford, F. Pollard, F. W. R. Ward, J. Cartwright, W. J. White, G. Hunt and J. E. Moss. Officers of the H.M.S. *Glory*:—Back, Campbell; Three-quarters, Crossman, Sherbrooke, Sartorius, and Brown; Halves, Shettle and Talbot; Forwards, Kilbut, Atten-

borough, Ireland, Wilson, Turles, Morris, Calvert, and Dorman.

H.M.S. "GLORY" VERSUS Y.C. AND A.C.

An excellent game of Association Football was played on Tuesday afternoon between a team from H.M.S. *Glory* and an eleven of the Y.C. and A.C. The *Glory* has such a reputation for football among the fleet on this station that it was feared the local representatives would have a hard time of it. But as matters turned out the Y. C. & A. C. won the match by two goals to one.

Play began very punctually in sunshiny and windless weather, and within five minutes of starting Yokohama scored the first goal. They had forced the game from the commencement and the forwards collaring the ball Kilby made a shot for goal. The leather struck the bar and rebounded into play, whereupon Strome seized the opportunity and sent it through the posts, to the surprise of the Naval goal-keeper. The game from this time onward was very fast, the ball travelling quickly from one end to the other, and both goal-keepers were called upon repeatedly to clear their lines. Twice the *Glory* men nearly scored, but Waddilove proved an efficient guardian and fisted out in time, and at half time the score stood: Yokohama, one to *Glory's* nothing. On change of ends the Navy pressed and kept the ball in their opponent's territory for some time. At length, in the sequel of some smart play in front of goal, Handsford scored for the visitors, this equalising. This caused Yokohama to buck-up a bit and on resuming they secured the ball and worked it down the ground. From a penalty kick immediately in front of the goal, Kilby made the second point for Yokohama, completely beating the Naval goal-keeper. Nothing further was made ere the whistle blew. The game, as we said before, was fast, the Naval men being very speedy and on the whole they played with more judgment than the home side, using their heads admirably and passing quickly. The tendency among the local players is to hang on to the ball too long, waiting till they are tackled ere passing out or in, and they are besides very indifferent punters. The sides were:—Y.C. and A.C.:—Goal, J. Waddilove; Backs, G. Allcock and A. W. S. Austen; Half-backs, A. R. Firth, E. G. Fradgley, W. J. White; Forwards, A. W. Read, S. R. Ford, O. Strome, K. van Smith, and H. W. Kilby. H.M.S. *Glory*:—Goal, Morgan; Backs, Harcourt and King; Half-backs, Watson, Crossman, and Wade; Forwards, Ingram, Handsford, Chambers, Cottrell and Moore.

H.M.S. "GLORY" V. Y.C. AND A.C.

A game under Rugby rules was played on the Yokohama Cricket ground on Wednesday afternoon between a fifteen from the British flagship *Glory* and a team of the Y.C. and A.C. The weather was again perfection. Yokohama were unable to play the team originally selected and it is not to be wondered at therefore that they went down before their swift opponents, the score standing at the close, H.M.S. *Glory*, 14 points; Y.C. and A.C., 6. That is, two goals and one dropped goal for the Navy, and two tries for Yokohama. The play was much more even than the score indicated and showed improvement all round, H. W. Kilby in particular playing a sound game. Yokohama made a try in each half, while the *Glory* made one goal and their dropped goal in the first half and the second converted goal in the second half.

FOOTBALL NOTES.

This week I propose to deal shortly with forward play touching only the more important points. Granted that a forward has all the necessary physical qualifications, the first practical qualification for a good forward is without a doubt the ability to dribble. Every Rugby player knows that it is not the easiest thing in the world to dribble an oval ball at top speed but after all it is only a matter of practice. And now let us suppose that a forward has started a dribbling rush. The instant he gets going the other forwards should spread out being careful to keep behind the man dribbling the ball. A good dribbling forward is often disgusted

when he finds himself pinched at having nobody to pass to. There is no need when attacking by a dribbling rush to pick up the ball until you are near the enemy's line then pick it up by any means for a *kick* over the line usually means no try.

It has been a source of wonder to me why our local forwards have paid so little attention to "following up." True there are one or two who never lose sight of this most important factor in the forward game, but the majority have hitherto been inclined to wait, thinking no doubt that, as in the Association game, the ball will be back here presently. F. Mitchell, England's International captain for 1896 and captain of the Cambridge fifteen the previous year, has written some very pertinent remarks on this subject. He says:—"A forward must follow up every kick, (whether it be kick-off, drop out, or free kick) as hard as he can run. There must be no slacking, no waiting for the opposing three quarters to return the ball if it has not found in touch. He must set off at top speed, converging slightly, but not too much towards the point where the ball will fall. If two or three forwards come charging down on a back at the same moment, he will evade them (if at all) with the greatest difficulty. On the other hand, it is the simplest thing in the world to dodge a single man running at top speed. When a forward sees that his own backs are off with the ball, he should follow up hard so that he may be at hand to take a pass. The same rule applies in the case of a single player breaking away with the ball from a line-out; he should never be unsupported." Our local forwards have improved a great deal as regards following-up; they can, however, do a great deal better. Only those who have experienced it know the extremely pleasant feeling a forward has when, after following up keenly, the opposing three-quarter fumbles, and he gets possession with only the back between him and the goal. In the open field forwards in tackling should carry out the universal rule which is "low and hard." In a line out it is better to tackle high, or in other words go for the ball at once, otherwise a tall forward who has the ball may keep it clear until he can drop it into the hands of one of his halves.

A word or two with reference to kicking and I have done for the present. The really valuable forward should be absolutely safe on the three important points, kicking, catching and tackling. The most important branch (so to speak) of kicking is utterly neglected; I refer of course to place-kicking. We have here the poorest lot of place-kickers that I have ever seen in any clime. This is severe but it is true, and nothing but the most strenuous practice will rectify matters. Carry the kick through and "dinna press"; all golfers will understand what is meant by this. Above all look at the *ball* all the time, not at the goal; to look at the goal is fatal. Finally do not take any semicircular lengthy runs at the ball. A man who understands his business will find that six or seven yards run at the most and a straight run at that is all that is required.

OLD HEATHEN.

CHRISTIANITY IN CHINA.

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—There is an issue between a reader of the *Japan Mail* and the *Japan Mail* itself on a matter of historical verity.

1. The *Japan Mail*, in an editorial, had the following:—

"It is not too much to say that Christianity has been forced on China at the point of the sword. When the Peking Government had been beaten to its knees in 1860, and when the grip of England and France was at its throat, it was required to repeat a formula of toleration and privilege, dictated by its conqueror, and the concessions thus obtained by force were afterwards extended by fraud. The wretched story need not be repeated here."

2. To this exceedingly strong statement I demurred. I did not know of evidence sufficient to justify it, and so wrote partly for information

and partly to throw some light on the situation, and save our Christian sympathizers and helpers of the past from the imputation of having rammed Christianity down the throats of the Chinese as if with the end of a handspike. In my response, I quite agreed with the editor of the *Japan Mail* in some things, notably as to the rascality of that jesuitical interpolation of which, I am glad to say, the more sensitive moral sense of many Protestant missionaries refused to avail itself. It also stated some things which I know to be true, having been told them by Hon. S. Wells Williams himself, on a voyage across the Pacific, and shortly after the affair was over. He told me of repeated conferences with the Chinese Commissioners themselves. He knew perfectly well the shoals and the snags in the whole tortuous channel they were navigating. He knew all about their solicitude on the "Missionary Question," and of their various backings and fillings on all the issues raised, and this one among them. He did not say they had no trouble, and I did not say that he did, but they had less trouble with this than with other vital features. It was my conclusion about it that it was the "freest" thing they did in the whole treaty. That did not mean that it was an absolutely free and spontaneous offering made without request, for there is never anything of that kind, but that, so far as freeness went, of all it was among the freest.

3. To this demur of mine the *Japan Mail* now makes rejoinder. The points are as follows:—

The *Japan Mail* says, "our correspondent took exception to a statement made by us that it is not too much to say that Christianity has been forced upon China at the point of the sword."

That was the smaller part of our objection. It lay, chiefly, against that vehement assertion that when the Peking Government had been beaten to its knees in 1860, and when the grip of England and France was at its throat, it was required to repeat a formula of tolerance and privilege dictated by its conquerors. It was against this part of the quotation, now left out, that the chief objection lay at the time, and continues to lie now. The *Japan Mail* also makes a citation from a documentary report of S. Wells Williams to establish the point that the concession made in the missionary question was not voluntary, but was obtained with delay and difficulty, and only after a succession of disappointments, and was therefore a part and parcel of the extortion made by the two governments which had China on her knees and were gripping her by the throat. In other words, the *Japan Mail* claims to be justified and supported in a position that there was nothing spontaneous in any part of the treaty; that the formula of tolerance and privilege were also extortions, and now, further more and finally, that Dr. Williams and Dr. Martin, availing themselves of the "menaces of Horatio Nelson Lay," were the parties who, so far as the Americans were concerned, dictated the "formula of tolerance and privilege" which are referred to as if there was something in them discreditable to their manhood, and which have been exacted in a way that compelled their classification with knuckle-dusters and bullies. I do not for a moment attribute to the Editor of the *Japan Mail* any such discourteous estimate of Dr. Williams and Dr. Martin; he is too much of a gentleman for unworthy tactics. He always evinces too high an estimate of good men to do them an injustice. In no man's hands can the reputation of Dr. Williams be more safe than in the hands of the Editor of the *Japan Mail*, and yet, according to the logic of the article now under consideration, it is impossible not to look upon each Missionary Secretary concerned as a *particeps criminis* in a disgraceful coalition to rob China of a precious right and inflict upon her an irreparable wrong.

4. And now finally the "correspondent" appears with hat in hand to ask for one more hearing, which, if granted him, will make him promise that he will not again trouble the *Japan Mail* on this subject. He must repeat his demur against the harshness of the charge and the inadequacy of the evidence adduced in support of it. A few questions will cover the ground.

1. Is the "Blue Book" quotation from Dr. Williams enough to set aside what I affirm as having been said by Dr. Williams to myself? Not that I can see. There is nothing contradictory between the two. There was more of difficulty in the way than I had set forth and I am quite ready to be instructed. Perhaps the word "free-est" should have given place to the words "least constrained" in a treaty where nothing is ever really "free." So that if allowed to amend the sentence, it should read, "the religious liberty articles were the least constrained in the whole series." This will be amply borne out by the facts. The *Japan Mail* says the Russians were the first to propose the insertion of an article referring to Christianity, and the Chinese showed themselves not unwilling, for though they were wholly ignorant about toleration as a religious question, they saw no reason against allowing missionaries to travel through the country as they could generally speak the language. Along with such feelings on their part, take the promptness with which Kueiliang, after a "few moments" consideration, sent back his approval to the missionary article as it now stands. Is there, then, rebutting evidence enough on the part of the *Japan Mail* to render nugatory my own testimony and argumentation? I can not see that there is. The best that can be claimed for it is that it modifies somewhat (and he may differ about the degree of modification even then) but it does not invalidate and leave the field to the dominance of those harsh accusations against those who acted for Christian Missions.

2. In this reiteration of the *Japan Mail* of its original charges, is there presented any evidence to justify such strong language as—"when the grip of England and France was at its throat, it was required to repeat a formula of tolerance and privilege dictated by its conquerors"? I cannot say that there is, and that is just what I continue to deny. The *Japan Mail's* conception of the order observed in treaty-making is not my own. As I read the *Japan Mail's* portrayal I should conclude that the whole thing is gone over in a lump and then, "sign this treaty as a whole, or take the point of the sword."! Not so at all; the articles were freely discussed and accepted or rejected by one or the other side without the intervention of a sword-point, or spear-point, or even a knife-point. It is not that the Chinese were allowed no liberty of choice as they went along, as to the form of stipulation they accepted. My conviction abides—the present editorial of the *Japan Mail* gives no warrant for what it says about requiring the Chinese to repeat a formula dictated by its conquerors when that religious liberty article was under treatment. Kueiliang knew very well the latitude of movement open to him when it came to that question. To the form in which it was finally submitted to him he did not object and passed it without delay. Nor did he assent to it in face of a spear-prod of any kind.

3. But now what was the nature of these unjust exactions extorted by violence from the prostrate and helpless Chinese suppliants? It is often referred to as if it is something black and atrocious, something to be classed with meeting a man on the highway, treating him to a slug shot or a sand bag and then robbing him of his watch and his wallet. What is the nature of this grievous wrong which has been inflicted by Christianity? What are these concessions extorted by Drs. Williams and Martin?

Well there they are; they speak for themselves. They simply stipulate—those treaty provisions—that a man shall not be persecuted by his neighbour on account of his religious opinion; and that, if a man choose to become a Christian, he shall not on that account be treated as if he were a culprit. That is all there is of it. This is the "formula of tolerance and privilege dictated by the conquerors, and which the Chinese officials have been compelled to repeat at the point of the sword. (The exact wording of the text we shall give at another time and place, when the whole subject will come up for consideration.) What are these "privileges" so-called? The Missionary Articles simply asked, "Persecute no man for his opinions" and the Chinese response is simply, "We will persecute no man for his opinions."

Some say that the Tolerance Articles ought to be eliminated from the treaties altogether. If this were done in face of all that is past—the situation would be interpreted thus,—on the part of the Chinese: "We desire and intend to resume persecution for opinion's sake;" and on our part "We wish to allow you an entirely free hand to persecute for opinion's sake, when and as you like." And this is the Twentieth Century!

This communication must not end without a disclaimer. There is no intention of charging the *Japan Mail* with unfriendliness to Missions: to impute such a spirit and such a purpose would belie the testimony we have on all sides. In this one particular thing I cannot agree with the *Japan Mail*, and I say so. It is a fair issue of interpretation of testimony and of topical argumentation in which it is perfectly honourable to differ. But now, apart from this, it is to mention with gratitude and appreciation how generously the *Japan Mail* has dealt with Missionary interests. The *Japan Mail* and the *Kobe Herald* are both counted upon as journals in which Missionaries and their interests may expect candid treatment. These papers may have their criticisms to offer, which is right and proper, and they are accepted as the chidings of friends. So then, in exchanging sentiments with the *Japan Mail* we are exchanging with a friend and not an enemy.

This letter is written in South China, which will excuse its tardy appearance.

Yours, etc.,

WILLIAM ASHMORE.

Swatow, October 22nd, 1902.

[The strong phrase used by us referred, not to the clauses inserted in the sequel of negotiations by that unquestionably great and noble-minded man, Dr. Wells Williams, but to the Chinese text of Article VI. of the Convention of Peking; to the Chinese text of Article XIII., and to the Chinese text of the form of passport drafted by Baron Gros. With all these things the Protestant missionaries had nothing whatever to do. If our correspondent reads Henri Cordier's "Relations de la Chine," he will probably agree with us.—Ed. J.M.]

MISS MARIE CORELLI AND HER TITLED FRIENDS.

Miss Marie Corelli, the well-known authoress, has been dealt with by a London newspaper in a manner which will be highly amusing to those who are aware of her frequently expressed contempt for newspapers and newspaper publicity. It appears that Miss Corelli's name was omitted by the *Gentlewoman* from its list of guests at the Braemar Gathering, and she thereupon wrote to the editor of that journal in the following terms:

"Private and Confidential,

"Invercauld Arms Hotel,

"Braemar,

"Miss Marie Corelli presents her compliments to the *Scottish Gentlewoman*, and notes with some surprise that her name has been omitted from the list of the friends invited by Mr. Farquharson of Invercauld to the 'Royal Enclosure' at the Braemar Highland Gathering. She notes the name of her friend, Lady Byron, is included, and wishes to point out that as she (Miss Corelli) was the means of taking Lady Byron to the gathering, and as Mr. Farquharson's invitation was for 'Miss Marie Corelli and party,' without any allusion to Lady Byron at all, Miss Corelli can only conclude that her name was purposely omitted. Miss Corelli begs to say that the omission has caused the greatest surprise and offence to many persons, including Lady Byron, who is at present staying in Braemar as Miss Corelli's guest. The letter is confidential but an explanation is requested, as Miss Corelli was with Lady Somers and Lady Kennard."

Miss Corelli's communication, it will be observed, is not only haughty, it is also strangely inconsistent with her public professions. Nettled by its tone and unable to resist the temptation to "show up" the novelist the editor of the *Gentlewoman* published it, along with his reply, which ran as follows:—

"142, Strand, London

"October 6, 1902.

"The Editor of the *Gentlewoman* presents his compliments to Miss Marie Corelli, and begs to acknowledge her letter from Braemar without date. He assures Miss Corelli that he at once realises that an apology for misunderstanding her is clearly due. But he thinks that Miss Corelli has forgotten a letter,

also without date and also from Scotland, which she addressed to this office in the year 1898. And, indeed in all those of her books which the Editor has been able to read, Miss Corelli has gloried in the opportunity of expressing her contempt for the Press and in particular for those 'snobs' (Miss Corelli's favourite word) who seek newspaper notice in any of the social, literary, or other relations of life.

"Miss Corelli's conjecture that her name was 'purposely omitted' from the account sent by the *Gentlewoman's* Scottish correspondent, describing the party in the royal enclosure at Invercauld, is perfectly correct. In deference to Miss Corelli's express opinions on 'newspaper puffs,' the Editor long since gave instructions that her name should not be mentioned in the *Gentlewoman*. Now he realises that Miss Corelli has been misunderstood, and that it would really have gratified her to be named as present in the 'royal enclosure.' The Editor begs forgiveness for pointing out however, that he does not comprehend why 'an explanation is requested,' because 'Miss Corelli was with Lady Somers and Lady Kennard.' No such titled companionship was necessary to induce the Editor to give this frank explanation. He can only plead, however, some little excuse for his mistake because of the apparent sincerity of Miss Corelli's letters and writings on the subjects of "snobs" and newspapers.

"Logical consistency obliges the Editor to understand that the word "Private" at the head of the letter should be read "Public," unless, indeed he has again misunderstood, and that Miss Corelli's letter is not, as it appears to be, a request for publicity.

"The Editor proposes, by way of making reparation and emphasising his apology, to print Miss Corelli's letter and this reply in the *Gentlewoman*.

What Miss Corelli thought, what she said, and what she did, when she received the above reply and when she read the correspondence in print, may be conjectured. She must have been greatly vexed.

LAW CASES.

JOVANSSEN v. HOPKINS.

In the criminal section of the Yokohama Chiho Saibansho at a quarter to 2 o'clock on Nov. 21st, judgment was given by Judge Danno in the adultery case brought by Adolphe Jovansen, formerly manager of the Club Hotel, Ltd. against R. G. Hopkins, formerly secretary of that Hotel, and Rachel Bretel Jovansen, wife of the plaintiff, both of whom appeared before the Court to hear the judgment. Mr. Hattori, Court interpreter, read the text of the judgment, translated into English.

George Hopkins was sentenced to eight months' major imprisonment and Rachel Bretel Jovansen to six months' major imprisonment; books, documentary evidence and other articles presented to the Court in connection with the case are to be returned to the respective parties. The Judge also announced that private damages to the amount of one thousand yen should be paid to the plaintiff by Hopkins and Mrs. Jovansen jointly.

The text of the judgment was as follows:—

JUDGMENT.

RACHEL JOVANSSEN,
Native of France, residing at Club
Hotel, No. 5, Yamashita-cho,
Yokohama. Aged 34 years.

REGINALD GEORGE HOPKINS,
British subject, residing at No.
129, same street, same city.

Aged 33 years.

Judgment is hereby given in the case in which the above mentioned persons are charged with having committed adultery.

DECISION.

The accused, Rachel Jovansen, is sentenced to six months' major imprisonment, and the accused Hopkins to eight months' major imprisonment.

The articles which have been taken will be returned to the producers.

FACTS AND REASONS.

The accused, Rachel Jovansen, is a native of France and a Catholic. While she was living in Denmark she became familiar with Adolphe Jovansen, a Danish subject, and a Protestant. Owing to the fact that Adolphe Jovansen went to Stockholm, Sweden, and became an employe of the Grand Hotel in that city the marriage between him and Rachel Jovansen was on the 20th of March, 1890, celebrated, after having obtained the consent of her father and

mother, at St. Eugenio, a Catholic Church in Stockholm, in the presence of two witnesses, by a priest named Lieber, according to the formalities of marriage required by the laws of Sweden, they thereby becoming legal husband and wife. Later on they went over to London, England, where they lived together for more than eleven years during which time four children were born to them, three being dead, one living. It happened that Adolphe Jovansen, the husband, was to come out to this country to get a situation and he, together with his wife and child, left London and arrived at Yokohama on the 20th of September, 1901. Since their arrival and about the beginning of October, 1901, Adolphe Jovansen was engaged by the Club Hotel at No. 5, Yamashita-cho, Yokohama, as its Manager, and the husband and wife were living together in the Hotel. While they were in the hotel Rachel Jovansen became familiar with Reginald George Hopkins, a Secretary of the same hotel from about February of this year. The accused Hopkins, knowing that Rachel Jovansen was the wife of Adolphe Jovansen, had been secretly holding familiar intercourse with Rachel inside the same hotel, and when Adolphe Jovansen was discharged from the hotel at the beginning of March last the accused Rachel Jovansen refused to live with her husband and remained alone with her child in the hotel. Since that time both the accused have been keeping up their relations till about the end of May last, during which time they secretly met at the house of Evangeline Clyde, No. 181-B, Yamatecho, Yokohama, and were holding illicit intercourse with each other. Adolph Jovansen did make a complaint relating to the adultery above described to the Public Procurator of this Court on the 29th of June last.

It may be seen from the depositions made at this Court by the accused Rachel Jovansen that she is a native of France and a Catholic. That while she was living in Denmark she became familiar with Adolphe Jovansen a Danish subject and a Protestant. That, owing to this fact, Adolphe Jovansen went to Stockholm, Sweden, and became an employe of the Grand Hotel in that city and a marriage between him and Rachel Jovansen was on the 20th of March, 1890, celebrated, after having obtained the consent of her father and mother, at St. Eugenio, a Catholic Church in Stockholm, in the presence of two witnesses, by a priest named Lieber according to the formalities of marriage required by the laws of Sweden, they thereby becoming legal husband and wife. That later on they went over to London, England, where they lived together for more than eleven years during which time four children were born to them, three being dead and one living. That Adolphe Jovansen, the husband, was to come out to this country to get a situation and he, together with his wife and child, left London and arrived at Yokohama on Sept. 20th last year. That since their arrival and about the beginning of Oct. last year Adolphe Jovansen was engaged by the Club Hotel at No. 5, Yamashita-cho, Yokohama, as its manager, and the husband and wife were living together in the hotel. That in the beginning of March last when Adolphe Jovansen was discharged from the hotel the accused Rachel Jovansen refused to live with him and remained alone with her child in the hotel.

The accused Hopkins has admitted in his depositions before this Court that he was a secretary of the Club Hotel between February and May this year; and that Rachel Jovansen is the wife of Adolphe Jovansen.

The accused Rachel Jovansen and her counsel have maintained that a marriage between Rachel Jovansen and Adolphe Jovansen is invalid and that, therefore, they are not husband and wife from a legal point of view. Considering this point Dr. L. Lönholm, an expert witness, stated before this Court that he did not find any provisions in the law of Denmark whereby it is required to give notice to the local authorities in case a Danish subject is married in a foreign country, but that he considered such marriage is valid according to the fundamental rules of private international law. That such provisions are made in the law of the Netherlands only.

That in 1890 or about that time the principles of private international law that the law of a place where marriage takes place will be complied with were in force in Denmark as regard formalities relating to marriage.

In connection with the formalities of marriage that were in vogue about the same time in Sweden Dr. Lönholm referred in the first place to the formalities of marriage in Europe generally. He stated that in all parts of Europe in the middle ages it was common to celebrate marriage before a priest in the church according to religious ceremonies. In Sweden, too, marriage was celebrated in the Church. He further said that in case a person of the same creed it was necessary for the contracting parties to go to a Church and have their marriage celebrated there. When a Jew was to marry a person who did not believe in the Christian religion or when persons were neither a Lutheran nor a Catholic were to marry, such marriage was celebrated at a municipal office. Marriage was celebrated in the Church where a Catholic and a Lutheran were parties to the marriage. The marriage between a Lutheran and Jew might be celebrated at either a church or a municipal office. It was entirely at the option of the parties. When a Lutheran was to marry a Catholic the officiating priest would, prior to marriage, make three publications one after the other on three Sundays in succession and a marriage certificate is granted after making investigations whether the conditions complied with the law of the countries to which the parties belonged and of the place where the marriage was to take place, and also after the publications had been made. Should a priest grant a marriage certificate without making such investigations he would be fined. A marriage certificate made by a priest was, therefore a document sufficient to prove the validity of marriage. Dr. Lönholm also stated that if the signature and legalization in the Public Procurator's Office Exhibit No. 4 (annexe of married certificate) were not a forgery, it would be a proof sufficient to justify the validity of the marriage. The marriage certificate is signed and sealed by F. M. Lieber, pastor, and in it is mentioned that on the 20th March, 1890, Carl Adolphe Jovansen was married to Miss Rachel Euphrase Madeleine Bretel in the Catholic Church St. Eugenio in Stockholm, Sweden. The Acting Vice-Consul for Sweden and Norway has certified under his signature and seal that the certificate of marriage of the two abovenamed persons was considered by him to be authentic and entitled to full belief and credence. There is not the least question of all these legalised documents being a forgery. It may therefore be considered that the marriage certificate in question is a true and correct one.

In France, of which country Rachel Jovansen is a native, the principle of *locus regit actum* is applied in Art. 170 of the Civil Code. Counsel for the accused pointed out a clause in the above-mentioned article of the French Code which says, "After having made the notifications provided in Art. 63 of the same Code," and argued that in the case under consideration such notifications not having been made the marriage was null and void according to legal opinion in France. Legal opinion on the question is, however, divided. Moreover, the point raised by counsel is applicable only to cases where the parties to the marriage proceed to a foreign country, without previously making the notifications provided in the French law, and are there married. It is not reasonable that a French citizen living in a foreign country should have to make notifications relating to a marriage at a foreign town or village where he has a domicile for more than six months. The notifications to be made in a foreign country are for the purpose of protecting the interests of the people of that country and no French legislators have a right to order such notifications to be made. In the present case, where a French citizen living in Denmark was married in Sweden, the only question is whether the marriage was celebrated according to the marriage formalities of the State where it took place, and, of course the notifications referred to in the French Code

are not applicable. It follows then that, for the reasons already given, the marriage between the accused Rachel Jovansen and Adolphe Jovansen is a valid one, and that therefore, from a legal standpoint, they have been husband and wife from the 20th of March, 1890.

It has been admitted by the accused that on the evening of February 16th last both the accused met in the sitting-room of Rachel Jovansen at the Club Hotel; that on that occasion the accused Hopkins was assaulted by Adolphe Jovansen, but that the former made no defence; and that both the accused held meetings by night and day in the house of Evangeline Clyde, No. 133, Yamate-cho, Yokohama.

Both the accused have denied their guilt, but the statement of the accused must be considered as doubtful, when the fact is taken into consideration that in spite of the fact that the accused Rachel Jovansen and Adolphe Jovansen have been for more than ten years living together as husband and wife, and that there is a child born to them as stated by Rachel Jovansen herself, yet she suddenly insisted, when the present case arose, that the marriage contracted in 1890 was invalid. As to the accused Hopkins, it is to be noted that he has admitted the fact that he was arrested at Shanghai while living with the wife of another man, and that he was punished at Hongkong for embezzlement.

In the records of the preliminary examination of Adolphe Jovansen it is stated that he found the accused doing an immoral act in the sitting-room of Rachel Jovansen on the evening of February 26th last. In the records of the preliminary examination of Serigawa Kojiro, a witness, it is mentioned that the accused were always together during the absence of Rachel's husband, and that the other boys in the Club Hotel had asked him how he could be ignorant of the relations between the accused, as he was Hopkins' house-boy. Serigawa therefore paid attention to their doings, and twice observed Rachel Jovansen coming out of Hopkins's room early in the morning while it was still dark. In February last he saw her coming out twice, two or three days apart. The room was not a place where Jovansen's wife and other such persons had to go. In the records of the preliminary examination of Nakamura Gen, a witness, it was stated that while she was employed at Clyde's house, towards the end of March or the beginning of April this year, she found a man and woman engaged in an immoral act. In the records of the preliminary examination of the same witness it is mentioned that she stated the man and woman were the accused.

Nakamura Kinnosuke, another witness, stated before the Court that while he was acting as a detective independent of the present case, it happened on the night of May 29th last he looked through a window of Clyde's house and saw both the accused committing an immoral act.

Summing up all this evidence it is proper to conclude that the accused became familiar from about February this year at the latest, and had since that time been holding illicit intercourse; that as stated before, when Adolphe Jovansen was discharged from the Club Hotel in the beginning of March, Rachel Jovansen refused to live with him and remained alone in the Hotel; and that since then the accused had been holding illicit intercourse till about the latter part of May last, at the house of Evangeline Clyde, No. 133-B, Yamato-cho, Yokohama. According to the evidence given by Dr. Munro before the Court, the accused Rachel Jovansen was ill in May last and he gave her prescriptions four or five times in that month, the last time a prescription was given being on the 19th of the month; and that when he attended her on the 26th of May she was not recovered entirely but was very much better. His evidence is, on the whole, not sufficient to prove the innocence of the accused.

It is seen from the text of the complaint of adultery filed at this Court by Ideura Rikio, the attorney for Adolphe Jovansen, made a complaint of adultery to the Public Procurator of the Court on June 26th, 1902.

All things considered, the facts stated are clearly established by the evidence given above.

The acts of both the accused fall within the scope of Clause 1 of Art. 253 of the Criminal Code which says: "When a woman who has a husband commits adultery she shall be punished by major imprisonment for from six months to two years. The person who has committed adultery with her shall be punished in like manner."

As the offences also fall within the purview of Clause II of the same Article both the accused should be dealt with within the limit of the term of punishment prescribed. As to the articles which have been taken, Art. 202 of the Code of Criminal Procedure shall be applied.

The judgment is signed by Judge Danno (presiding), and Judges Kobayashi and Mabuchi.

R. G. Hopkins and Rachel Bretel Jovansen appealed, through their Counsel, Messrs. Ohashi and Otsuka, on the afternoon of Nov. 25th against the judgment rendered by the Yokohama Chiho Saibansho on the 21st. As already reported, the former was sentenced to eight months' major imprisonment and the latter to six months major imprisonment, and together they were ordered to pay one thousand yen damages to Mr. A. Jovansen.

SATO v. THWAITES & CO.

In the Yokohama Chiho Saibansho on the morning of Nov. 21st, before Judge Kano, the hearing was resumed of the suit, adjourned from Nov. 7th, brought by Mr. Sato Rennosuke, No. 3, Fukuromachi, Ushigome, Tokyo, against Messrs. Thwaites & Co., No. 61, Yokohama, claiming yen 9,995.55 damages, alleged to have been caused through the breaking of a contract. Messrs. Yamanaka and Sasaki appeared for plaintiff and Mr. Ideura for defendants.

As arranged at the previous sitting, Mr. Ishii Black, the well-known story-teller, residing at No. 19, Ichome, Yoko-amicho, Honjo, Tokyo, was examined as a witness.

In response to the Judge's questions, the witness said:—With regard to the contract between the parties to give an exhibition of ten illusions at Kinkikan, Kanda, Tokyo, I came to Yokohama with Mr. Sato, the plaintiff, on Sept. 15th to arrange the matter and a contract was signed between the parties on Sept. 17th. The number of illusions to be exhibited at the Kinkikan was ten in all. So far as I know, ten illusions were arranged to be displayed at every performance, namely one in the afternoon and one in the evening, for 30 days, to be commenced on Oct. 5th. The partial display of the illusions had no value from a business point of view. The defendants had not raised any objection as to the selection of Kinkikan in giving the performance, having agreed to give a display of the performance there through Mr. Davis and his company. On Sept. 26th the defendants went to Tokyo, and the final arrangement was effected. At first, it was proposed to give a display at the Public Hall, on the Bluff, Yokohama, but owing to the narrowness of the Hall the project was abandoned, the Kinkikan having been ultimately chosen for the purpose. Asked by the Judge whether or not the defendants received payment of two hundred yen in advance from plaintiff every day, the witness replied: The money was arranged to be given to defendants prior to the starting of every performance. The first performance was given at Kinkikan on Oct. 5th when the plaintiff paid to defendants yen 200, namely 100 yen before the commencement of the afternoon display and the remaining 100 yen before the commencement of the evening performance. There was no display on Oct. 6th owing to a dispute arising between the parties as to the number of illusions. This was due to the fact that the defendants failed to give a display of full ten illusions on the first day, Oct. 5th. The witness then gave an explanation as to the nature of the illusions exhibited on the 5th and those remaining unexhibited. Continuing, he said that he received three hundred yen from plaintiff at the end of October as remuneration for his services as interpreter on the stage.

Mr. C. H. Thorn, of Messrs. Whitehead and Hoag, Yokohama, was next examined as a witness. He said, though a Court interpreter, that he was acquainted with Messrs. Thwaites & Co. for several years, but as to the plaintiff, Mr. Sato

the witness knew him only for a few weeks prior to the performance being given. He then proceeded to say that on Oct. 6th he, with Mr. Charles Thwaites, went to the Kinkikan to act as interpreter. A dispute arose between plaintiff and defendants, as the former failed to pay yen 200 until 1.30 p.m. Accordingly defendants proposed to pull down all the fittings of the exhibition. In the meanwhile defendants asked plaintiff to extend the area of the stage but plaintiff did not. In the midst of the dispute, a police-inspector and a few police-men from the Kanda Police Station appeared on the scene to settle the matter, in compliance with the request of defendants. Even in the presence of the police officers plaintiff would not pay the money. The witness, however, said that he did not know why plaintiff refused to pay the money. At any rate, in the opinion of defendants, the hall of the Kinkikan was too narrow for giving a display of ten illusions at one performance.

Mr. Ogawa, police constable of the Kanda Police Station, was then examined as a witness. He gave evidence to the effect that he only watched the dispute and had not interfered in the affair. He saw Mr. Sato, plaintiff, carrying with him yen 200 in paper money, wrapped in two bundles. That was on Oct. 6th. The money was frequently shown by plaintiff himself before the parties concerned.

This closed the examination of the witnesses.

It was arranged to summon as witnesses Mr. Kudo Kamesaburo, police-inspector of the Kanda Police, Mr. Shiba Shuntaro, formerly *banto* of Messrs. Thwaites & Co., on behalf of defendants, and Mr. Sarashima on behalf of plaintiff. The case was adjourned until Dec. 5th at 10 a.m.

ROGERS v. SUZUKI.

In the same Court on Nov. 21st before Judge Kano, was heard an action brought by Mr. G. W. Rogers, No. 55, Yokohama, against Mr. Suzuki Ichisaburo, of No. 21, Ichome, Sakaye-cho, Yokohama, claiming yen 246.500. Mr. Yano appeared for plaintiff and Mr. Matsuda for defendant.

Mr. Matsuda applied to the Judge for permission to bring his client to the Court. This was granted. The case was adjourned until Dec. 5th.

HONGKONG AND SHANGHAI BANK v. HIOKI.

In the Yokohama Chiho Saibansho on Monday morning, before Judge Kano, the hearing was resumed of the suit, adjourned from Nov. 14th, brought by the Hongkong and Shanghai Banking Corporation, No. 2, Yokohama, against Mr. R. Hioki, Bankruptcy Administrator, in the estate of Messrs. Mourilyan, Heimann & Co., No. 35, Yokohama. Plaintiffs claimed from defendant recovery of yen 3,905.140, with five per cent. interest from June 13th this year until the execution of judgment.

Plaintiffs were represented by Mr. R. Masujima and defendant appeared in person.

Mr. Masujima said that he should like to explain with regard to the sum of yen 226,250 which was supplied by plaintiffs to Messrs. Samuel Samuel & Co. through the medium of Messrs. Mourilyan, Heimann & Co., that the sum of yen 3,905.140 was a portion of the interest. He stated that yen 226,250 was a deposit of guarantee and not a loan. As a proof of this assertion he applied to the Court for permission to examine as a witness Mr. H. Rose, manager of the Formosan branch of Messrs. Samuel Samuel & Co., who was now in Yokohama. The application was granted.

Mr. Hioki referring to Art. 91 of the Commercial Code, and Art. 81 of the Civil Code, said that money paid out by a bankrupt firm while the latter was adjusting accounts can be recovered subsequently. In consequence, on June 4th this year defendant applied to plaintiffs for the payment of yen 3,905.140, which was paid on June 13th, to be included in the estate of the bankrupt firm. Plaintiffs' claim was therefore unreasonable and he asked the Court to dismiss the case. The proceedings were adjourned until Dec. 3rd.

THE LE PREVOST CASE.

Mr. Carl Bremer, of Messrs. Fraser, Farley

& Co., Yokohama, was released on bail of *yen* 1,005 on the afternoon of Nov. 24th. He has been undergoing detention in the Negishi prison since Nov. 8th in connexion with the charges against Mr. Le Prevost, formerly manager of the Silk Department of Messrs. Cornes & Co.

A New York telegram of Oct. 24th said:—Godfrey Bloch, a member of the firm of H. Mendelson & Co., silk importers, of No. 23 Greene Street, a witness in the Rosenthal silk fraud case, has disappeared. Mr. Bloch was subpoenaed as a witness before the Federal Grand Jury, and was expected to give valuable testimony in aid of the prosecution.

He was at one time a confidential clerk in Rosenthal & Co.'s employ and in a written statement made to the Federal authorities charged a customs examiner with having entered into an arrangement with the firm to pass goods below value, he receiving a share of the profits.

The Government is suing Rosenthal & Co. for the recovery of \$1,000,000 penalties for alleged under-valuation of Japanese silks.

NAKAMURA v. SINGLETON, BENDA & CO.

The above case, in which Mr. Nakamura Shingoro, of Masagocho, Yokohama, claimed salary amounting to *yen* 120 from defendants, which was expected to be resumed on Wednesday, has been postponed indefinitely.

ALLEGED EMBEZZLEMENT.

Yoshida Tami-ichiro, advertisement agent of the *Kobe Chronicle* Office, Kobe, was arrested in Yokohama on the morning of Nov. 26th by the Kobe Police on a charge of embezzlement. It appears that the man, after having collected from the Mitsu Bishi and four other companies charges for advertisements amounting to about *yen* 500, decamped from Kobe several days ago and had been concealing himself in the house of a Mr. Hayashi in Nishi-tobe of this port, until he was detected by the police. It may be added that the accused was a police-constable of the Bluff Police Station, Yokohama, during 1899.

Lafayette Cole, an American, and T. C. Thompson (Haruyama Kazuo) were charged in the Kobe Chiho Saibansho on Friday, with fraud, the allegation of the prosecution being that on October 21st they went to a restaurant in Ono and ordered food and drinks to the value of *yen* 7.98 though they had no money to pay for them. Thompson in defence said Cole had invited him to the restaurant, and Cole said he went on Thompson's invitation. Judgment was reserved.

CUSTOMS APPEALS.

WOOLLEN STUFFS.

The Minister of Finance gave a decision on Nov. 21st in the case of an appeal by Mr. E. Schoeninger, representative of Messrs. Gysin and Schoeninger, No. 21, Harima-machi, Kobe, against a judgment rendered by the Kobe Customs with regard to nine boxes containing woollen cloth imported on Sept. 3rd this year by the steamer *Laos*. The decision of the Customs was upheld and the appellant was ordered to pay a specific duty of nine *sen* three *rin* per yard in accordance with No. 337 of the Import Tariff Table. In this case, the Kobe Customs maintained that the cloth was a woollen stuff prepared with worsted on both sides of the stuff thus rendering either side uniform in every respect. On the other hand, the appellant proposed that an *ad valorem* duty of ten per cent. should be imposed on the article, which he said was a kind of serge coming under No. 335 of the Import Tariff Table.

SOLDER.

On Nov. 18th the Minister of Finance gave judgment in the following case:—

In an appeal made by Mr. F. B. Abenheim, representative of Messrs. Bruhl Freres, No. 22, Yokohama, against a decision of the Yokohama Customs with reference to *felofox* (?), a kind of solder, imported on May 6th this year. The Minister's decision was to the effect that the

article, contained in tins, was a kind of solder and therefore a five per cent. *ad valorem* duty should be imposed upon it in conformity with No. 239 of the Import Tariff table, while that contained in bottles is a kind of chemical substance, to which a ten per cent. *ad valorem* duty was applicable in accordance with No. 136 of the Table. In the above case, the Yokohama Customs proposed to impose a ten per cent. *ad valorem* duty on the article contained in tins and in bottles alike, in accordance with No. 136 of the table, but the appellant raised an objection and maintained that a five per cent. *ad valorem* duty ought to be levied in each case.

PLATE GLASS.

A decision was rendered by the Minister of Finance in an appeal by Mr. Victor Heller, of Messrs. Heller Bros, No. 176, Yokohama, against the decision of the Yokohama Customs relative to plate glass imported. The appeal was quashed and the appellant was ordered to pay a twenty per cent. *ad valorem* duty in accordance with No. 168 of the Table, as decided by the Customs Authorities. The foreign importer proposed that a ten per cent. *ad valorem* duty should be imposed in accordance with the Austro-Japanese Conventional Tariff.

WOOLLENS.

The Minister also gave judgment in an appeal by Mr. R. Forshaw, British merchant, of No. 60, Yokohama, against a decision of the Yokohama Customs in respect to four cases of wool and cotton mixed cloth, to which the Customs imposed a ten per cent. *ad valorem* duty in accordance with No. 340 of the Import Tariff Table. The merchant was ordered to pay the above duty as maintained by the Customs. The importer's protest was that the article came under the category of No. 55 of the Anglo-Japanese Conventional Tariff and therefore a duty of three *sen* nine *rin* should be imposed.

LAMP SOCKETS.

In the case between the Yokohama Customs and Messrs. Helm Bros., No. 43, Yokohama, in which the former imposed a twenty per cent. *ad valorem* duty on lamp sockets imported, the Minister gave judgment to the effect that the firm should accede to the Customs' decision and pay the above duty in accordance with No. 452 of the Table, the article being made of metal and porcelain. The foreign firm protested that a ten per cent. *ad valorem* was applicable on the ground that the articles were accessories of lamps.

WOOLLEN FABRICS.

The Minister of Finance has given a decision in the case of an appeal brought by Mr. G. Weil, of Messrs. Oppenheimer Freres, No. 28, Kobe, against a judgment rendered by the Kobe Customs with regard to some woollen fabrics imported by the firm. The appeal was quashed and the appellant was ordered to pay specific duty at the rate of nine *sen* three *rin* per yard, as levied by the Kobe Customs, in accordance with No. 337 of the Import Tariff Table. In this case, the Kobe Customs maintained that the woollen cloth was prepared with worsted and belonged to the category of worsted coatings, the figures running on either side of the stuff being uniform. Regarded from every point of view the stuff could not be regarded as a kind of serge, as proposed by the appellant, who urged that a duty of ten per cent. *ad valorem* should be imposed in accordance with No. 335 of the Tariff.

YACHTING.

The usual *sendoes'* race which closes, or perhaps we should say follows the closing, of the yachting season took place on Saturday afternoon for prizes subscribed by owners. The boats sailing were exclusively those of the cruising class. There was a fresh northwesterly breeze and very little sea; all, even *Daimyo*, had a reef tied down which was afterwards shaken out when the wind moderated, and the racing was parti-

cularly good, especially between *Daimyo* and *Asagao*, and *Molly*, *Mosquito* and *Surprise*. The start was very level, *Mosquito* perhaps having the best, *Daimyo* much the worst of it. Most of the yachts tacked as soon as they crossed the line and stood over to the pier in order to weather the shipping. *Daimyo* was first through the harbour entrance and first also round the Lightship, but at the latter mark *Asagao* was close at her heels, even at times running ahead of the big cutter, which, with topmast housed, could not set her topsail and for the same reason had to smother the throat of her spinnaker. All over the course they were close to each other but at the Lightship *Asagao* had lengthened her lead to three minutes and that space separated them the remainder of the way home. After passing the Lightship *Virginia's* rudder broke off and she gave up, being taken home with admirable judgment by her *sendo* who worked her by sail alone.

Following are the corrected times:

	h.m.s.
<i>Daimyo</i>	3.18.45
<i>Molly</i>	3.21.35
<i>Mosquito</i>	3.20.03
<i>Surprise</i>	3.19.05
<i>Asagao</i>	3.14.55
<i>Virginia</i>	gave up.

Asagao's crew therefore won the first prize of ten *yen* and *Daimyo's* the second of two *yen*.

THE PSYCHOLOGICAL METHOD OF TEACHING

Mr. Howard Swan, whose book "Flashes from the Far East" was reviewed not long ago in these columns, is again before the public through the medium of a small volume published by the Kokumin Eigakukai. It consists of a resumé of lectures delivered by Mr. Swan at the Teachers' Summer School opened in Tokyo during the present year. The report says that the lectures are arranged by Mr. K. Ando, but are authorised and, we presume, have been revised, by Mr. Swan so that the little book may be taken as largely an exposition of the latter's system. In his introductory lecture he said that he had been for some ten years engaged in the work of searching for some effective system of organising education.

"The classica system is based upon the study of ancient classical languages,—in the West, Greek and Latin, in the East, Sanscrit and Chinese. Ruskin proposed to base education upon Art, Herbert Spencer upon Science, Taine and others, upon imagination or the influence of surrounding circumstances. Language is the true basis; and with the coming of the linguist Gouin, with his theory of sequences, it was seen that the study of modern languages might be made an efficient basis of education. The union of philology, art, science and the study of imagination, with the theory of sequences, has led to what is now termed the Psychological Method.

Prof. Swan's method of teaching English is founded on the principle of sequence or series first enunciated by Gouin, and elaborated by himself and M. Victor Bétis, of Paris.

Then followed his remarks upon the Japanese method of studying foreign languages—the method which treats a living language like a dead one, and which causes many scholars to speak it as if through the telephone. His one year's stay as an English instructor in Japan, whither he came through Baron Kanda's introduction, had induced him to formulate a special method of teaching Japanese students in the English language with success; and he expressed his desire to recommend this new method to the teachers of English."

We can not find space to describe Mr. Swan's method in detail but undoubtedly his Symbolic Grammar Charts are admirably suited for their purpose. They ought to convey to the pupil's mind a very clear notion of time and grammar. We read with interest that for the ninth lecture:

Prof. Swan came on the platform with an attitude apparently ready for the deliverance of a great lecture. And indeed the students' expectation was not belied, for he evinced the ability of an accomplished lecturer on this morning more than on any other day since the opening of this summer school. The writer's feeble pen can scarcely trace all the philosophical ideas, historical references and ethical explanations contained in this enthusiastic lecture, which was made with a rare eloquence.

THE CHRISTIAN DAIMYO.

(CONTINUED FROM LAST ISSUE.)

One would be inclined to believe that, after the preceding examples, no *daimyo* would henceforth dare to expose himself to the Taiko's anger, by disregarding his prohibitions. It was exactly the contrary that happened, at least so far as his edict forbidding anyone to embrace the Christian religion was concerned; for never were there so many conversions of *daimyo* and *samurai* as precisely at this epoch. The chivalrous spirit of these latter, far from fearing the danger, seemed on the contrary to brave it as if purposely.

The two sons of Maeda Motokatsu, Governor of Kyoto, and better known under the name of Geni Hoin, had been the first to open the march. Before these last events, towards the beginning of the year 1595, the elder, Sakon, had already received baptism.⁽²⁶⁾ Hardly 18 years of age, he was of such an impetuous character, that one might have said that he sought on purpose to bring on himself the ill-will of the Taiko. Only a few days after his baptism, he was exposed to the greatest danger. At the funeral of Hidetoshi, another nephew of the Taiko, Sakon ought, according to the Buddhist rite, to burn incense before the deceased. But scarcely had the ceremony commenced than Sakon left the place. Happily the *daimyo* charged with summoning the guests as their turn to offer incense came round, guessing that Sakon did not wish to take part in a ceremony which his religion prohibited, omitted his name, and thus saved him from the danger. But Sakon ran a much greater risk several months after. This was at the time of Hidetsugu's disgrace when, despite the absolute prohibition of the Taiko, Sakon accompanied Hidetsugu into exile, and would even have gone with him to Koya, had not the latter conjured the rash young man not to irritate the Taiko any further. It will be seen in the sequel that years did not render Sakon more prudent.

Toshimune, the younger brother of Sakon, and at least as hot and reckless as his elder brother, was converted a little after the latter. Soon, four nephews of the Governor, as well as several other members of his family embraced Christianity⁽²⁷⁾.

The same year, a personage of higher birth than the sons of the Governor, had his name inscribed among those of the neophytes; this was the grandson of Nobunaga, Samboshi, better known under the name of Ota Hidenobu. When, in 1582, his father perished at the same time as Nobunaga, Maeda Motokatsu had been able to save this infant, which was then aged only two years, and had taken refuge, along with it, at Gifu. The reader is already aware that the Taiko had at first proclaimed Samboshi the successor of Nobunaga, and had taken him under his guardianship. But the Taiko soon ended by forgetting the grandson of his old master, and no longer thought save of consolidating his own power. Since this time Samboshi had grown up, and was declared a major at the age of 15 years. It was also on this occasion that he exchanged the name of Samboshi for that of Hidenobu. His *daimyate* of Gifu, the sole relic of the vast possessions of his grandfather, included a certain number of Christians, and it appeared that several persons of his household professed this religion. Samboshi had also demanded, from his earliest years, permission to receive baptism, but his *kerai* had induced him to defer this ceremony till his majority. It was thus that, in 1595, he was baptized at Gifu: he took the name of Paul⁽²⁸⁾. Several members of his family were converted about the same time; among others his brother,—his father's son by a concubine,—who was baptized under the name of Vincent⁽²⁹⁾. Hidenobu had a large church, an hospital and an orphanage built at Gifu, and provided for the upkeep of these establishments.

The conversion of Kyogoku Takatomo, *daimyo* of Takato (Shinano), followed closely on that of

Ota Hidenobu⁽³⁰⁾. The Kyogoku descended from the Sasaki, a powerful family which traced back to Yoritomo. They resided at Zeze (Omi), till Nobunaga dispossessed this family and offered it an asylum in his own residence. Takayoshi, father of Takatomo, had received baptism in the life time of Nobunaga and had died shortly afterwards. The wife of Takayoshi, baptized under the name of Mary, was one of the most zealous Christians of whom the annals of the Religious make mention. She became the adviser of her children and converted them all, except a daughter who had become a concubine of the Taiko. It was owing to this daughter that the Kyogoku were able to re-enter into possession of their domains, and to obtain several favours of the Taiko. Takatsugu, the eldest of the family, possessed at that time the paternal domain of Zeze, and John Takatomo had obtained the important *daimyate* of Takato, where he received baptism from the hands of a Religious, whom he had invited to come into his state.

Tsugaru Tamenobu, *daimyo* of Hirosaki, finding himself then (1595) at Kyoto with his two sons, shared the general enthusiasm on the subject of the Christian religion. Not being able, on account of his concubines, to become himself a disciple of this religion, he induced his two sons to embrace it at once. Nobuhira, the second, then 11 years of age, received baptism immediately. To the great regret of Tamenobu, his eldest son, retained by his duties as page near the Taiko, could not at this moment absent himself, and had to defer his baptism for several years. But his father recommended him to visit the Religious every time he could find leisure, and to thoroughly instruct himself in the religion⁽³¹⁾. The young man did not for an instant forget the advice of his father: he studied the Christian religion and received baptism. Unfortunately he died several years after (1607), and his brother Nobuhira inherited his rights.

In spite of the aforesaid impediments, Tamenobu resolved nevertheless to become inscribed in the number of neophytes, but his precipitate departure for his domains left him no time for it. He led with him, however, a catechist, promising to have a church constructed at Hirosaki.

Kimura Shigetaka, *daimyo* of Kasai (Dewa), had just been dispossessed by the Taiko, for not having been able to suppress a revolt in his state. He had come to Kyoto to exculpate himself, but all in vain: the Taiko was not accustomed to go back on his decisions. To console himself in his misfortune, Kimura had devoted himself to the study of the Christian religion, and became a fervent believer, for he converted nearly all his *samurai*.⁽³²⁾ He followed, later on, the fortunes of Ieyasu, who admitted him among the number of his *kerai*. But neither he, nor his descendants got back the lost *daimyate*; till the restoration of 1868, the latter had to content themselves with the rank of simple *samurai*.

Hosokawa Okimoto, brother and first vassal of Hosokawa Tadaoki, *daimyo* of Tanabe, struck by the constancy of Gratia, his sister-in-law, had resolved to fathom the precepts of religion. Owing to his relations with Takayama, he became more and more convinced, and received baptism at Osaka, in the greatest secrecy⁽³³⁾. He himself was the first to speak of it openly, to the great despair of his parents, hostile to the foreign religion. Gratia alone welcomed this conversion as the greatest happiness that could happen in her family.

And in fact from that moment her lot ameliorated from day to day. Thanks to the intervention of Okimoto, her husband relaxed a little the rigour with which he had, up to that time, treated her, and even accorded her permission to have her two daughters baptized. Probably on the advice of Okimoto, Gratia even went a little further than this permission, and also baptized her eldest son, Tadatoshi, the only one of her four children who was not yet a Christian (1595)⁽³⁴⁾. Okimoto was the guardian and at the same time the adviser

of Gratia's children: it was owing to him that they always preserved Christian sentiments.

The family of Ukita, *daimyo* of Okayama (Bizen), also furnished its contingent of neophytes. Hideie, the head of the family, had remained deaf to the exhortations of Konishi, but on the other hand his relatives were less insensible. Ukita Nobuzumi,⁽³⁵⁾ cousin germain of Hideie, and Akashi Kamon, his brother-in-law, declared themselves Christians with a great number of their subordinates.⁽³⁶⁾ Nobuzumi is generally designated, in the writings of the Jesuits, under the name of Thomas Sakyo-no-suke. Akashi Kamon is often called John Kamondono.

Then Asano Yukinaga, the eldest son of Asano Nagamasa, *daimyo* of Kofu (Kai), was also converted at this period at Osaka.⁽³⁷⁾ His father Nagamasa, very much in favour with the Taiko, had always been favourable to the Christians and to their pastors, although he had several times received severe orders to carry out against them. Yukinaga himself had been sent to the Amakusa isles to repress a revolt, which had broken out, in 1593, in the whole province of Higo, and whose consequences might have proved disastrous for the Christians in those parts, save for the intervention of Yukinaga.

Melchior Asonuma, Mori Terumoto's vassal; was the cause of another illustrious *kerai* of this same *daimyo* becoming converted, during a voyage he had made to Osaka. This *kerai* was called Hirata; he took the name of Paul in baptism. Two grandsons of Sakuma Nobumori, a general who had been disgraced in the time of Nobunaga, also became Christians. The Taiko had recalled Jinkurō, the father of these two young men, and had taken him into his service⁽³⁸⁾. They enjoyed the favour of the Taiko at the time of their conversion.

Hachisuka Iemasa, *daimyo* of Tokushima (Awa), received baptism at Osaka in the greatest secrecy⁽³⁹⁾. For a long time previous he had frequented the Jesuits of this town, and had exhibited enthusiasm for their doctrine. By the aid of the few notions of cosmography and astronomy that he had collected in his visits to the Religious, he proved, to all who wished to listen to him, the inanity of the Japanese mythology and consequently the necessity of believing in a universal Creator. His son-in-law, Maeda Sakon, ⁽⁴⁰⁾ the exalted *daimyo* of Kameyama, had ended by completely convincing him, and thus the son of the ex-bandit became a convert, and a zealous propagator of the Christian religion.

Finally, Terazawa, the fanatical Governor of Nagasaki, changed his hatred into admiration and asked to be baptized.⁽⁴¹⁾ The discretion and the modesty of the Jesuits, as well as the exemplary conduct of the Christians, so struck him that he wished to study a religion which he only knew by his prejudices. He fathomed it so well that he declared himself the disciple and defender of it. Already in 1593, he had insinuated to the Taiko to relax his vigour with regard to the Religious, affirming that in showing himself indulgent towards them, he would succeed better in attracting foreign merchants to Japan. From this moment greater liberty was accorded to the Jesuits, who profited by it to bring back the Christians, who since the last troubles had strayed away. Terazawa himself caused the churches of Nagasaki to re-open, and encouraged the Religious to celebrate, at least on the great festivals, the ceremonies of their religion, at which he even assisted himself. Knowing that the Jesuits found themselves in a state bordering on misery, he helped them with all his might, and induced the Christian *daimyo* to do likewise. It was at this time that Kuroda Yoshitaka presented the Religious with 1500 gold pieces and 600 sacks of rice. Konishi had 2200

sacks sent them, Arima and Omura displayed no less liberality in this occasion.

One can easily imagine the joy that the Jesuits must have experienced in seeing that the Christian religion, though officially proscribed, was applauded by those, whom the Japanese people regarded as best and noblest. Especially from this moment a sort of kinship, perhaps closer than that of blood, was established between them and their Christians. It is easy to blame the obstinacy with which the Jesuits held on to Japanese soil, when the Taiko's edict had banished them thence. But, who then would have acted otherwise? The human heart tears itself away with difficulty from those it has gained to its convictions at the price of the greatest sacrifices. Therefore one understands the "jesuitical tricks" they had sometimes recourse to, in order to conceal their sojourn in Japan. Thus, when in October 1597, Terazawa received orders to embark all the Jesuits, then in Japan, on a vessel under sail for Macao, on the advice of Terazawa himself, the whole crew was clad in religious dresses, to make the onlookers believe that all the Jesuits had left the country.

Besides, if all the Religious had shown so much tact and discretion as the Jesuits, the bloody drama, which was to open the year 1597, had never perhaps taken place. Unfortunately it was not so: the indiscreet zeal of the Spanish Franciscans was to cause this fatal catastrophe.

The step which the Spaniards had taken, at Nagoya in 1592, had remained without result: the two envoys perished in a shipwreck on their return to the Philippines. The next year, another delegate, accompanied by four Franciscans, came to Japan without, however, reaching a satisfactory result. For the claims of the Taiko having exceeded the expectation of the Spanish envoy, the latter asked to be allowed to remain with his companions in Japan, till new instructions reached him from Manila. The Taiko consented to this demand, and allowed the five Spaniards complete liberty to visit the principal town of Japan, and to remain there as long as they liked. He even pushed his condescension as far as to invite them to tea. It was during this ceremony that he seized familiarly the cord of a Religious and struck himself over the shoulders with it to see, said he, if he could support the discipline which the Franciscans were in the habit of giving themselves with this cord (42).

The Franciscans immediately seized on this favourable occasion to install themselves in Japan, in despite of the prohibition of the Pope (43), and occupied residences at Osaka and at Nagasaki. Soon they opened their oratories to the Christians and celebrated public offices. Then, when they were very nearly capable of expressing themselves in Japanese, they commenced to preach in public, displaying, in so doing, unheard of audacity.

In vain the Governor of Kyoto warned them of the prohibition issued by the Taiko against the preaching and the assembling of Christians; all was useless. Their ardour was only increased when in the following year (1594), three other Religious of the same order, carrying the answer from the Governor of the Philippines, came to reinforce their number. In this answer, the Governor excused himself for being unable to recognize the Taiko as suzerain, declaring that as a Spaniard, he could not render submission to a foreign king. Although this response may not have quite pleased the Taiko, he nevertheless received the Religious favourably, for if they did not bring him the title of suzerain of the Philippines, as he had hoped, they gave him at least the assurance that the Spaniards were disposed to open commercial relations with Japan.

(42) Pagés, Histoire des 26 martyrs Japonais, p. 18.

(43) Pope Gregory XIII. had, in 1585, forbidden under pain of major excommunication, any Religious, who was not a Jesuit, to go to Japan to preach there or to exercise any religious ministry (Pagés, Annexe p. 3-4).

AMERICAN MATTERS.

Ithaca, N.Y. Oct. 18, 1902.

Twenty years ago the electric trolley car was a novelty and an uncertainty. It was a cumbrous affair, with rubber covered ropes to manage the stick with a wheel at the end of it and keep the trolley on the wire. The "controller," or battery, was frequently out of order, and the giving out of the "power" was a frequent occurrence. It seemed, with the motive power up in the air, like trying to imitate a fly walking on the ceiling. Indeed one old lady in Albany is said to have come in from the country and seeing the tram car without horse, sail or steam, supposed that a chipmunk on top of a hop pole was running along the wire and pushing the car along. Oliver Wendell Holmes (whose son has just been appointed Chief Justice of the Supreme Court at Washington) wrote a poem which set forth that the Salem witch had again mounted her broom stick and was careering in mid-air, working wonders, but this time with a useful purpose.

For a long time, it seemed problematical whether electricity as a motor could be applied in the cities and rural districts, but to-day we can see that a great revolution has been wrought in the methods of popular transportation. If steam railways have made a net work over the country, the trolley has made something like lace work. Over one billion dollars are already invested in the American trolley railways and their rolling stock and machinery, and it is now almost possible to travel from Wisconsin to the sea coast by the method of electric propulsion. There are indeed, at present, frequent breaks, but then it may be said that the whole chain of distance has been surveyed and so planned, that within a year or two all the links of the chain will be complete.

Ohio seems to lead all the states thus far, largely because of the lack of engineering difficulties and the regularity of distribution in the population, owing to the absence of those bold natural features which, however valuable to the artist and student of landscape, add to the cost of railway building. On some of these Ohio trolley lines, they have sleeping cars, carry baggage, traverse the whole length of the state, and run sixty miles an hour. The average American will go fast, even if he gets smashed. Apart from the victims, numbering hundreds in the larger cities annually, the system has made a record in so injuring the president of the United States by a collision, that his strenuousness has been considerably modified. Surgeons have been called in and he has been for weeks a prisoner within walls. It is to be hoped that the prophecy of an English surgeon of repute, that the wound will ultimately cause the President's death, has no foundation, though the prophet has expressed his vaticination in formidable scientific phraseology.

Yet let no one suppose that whole armies of Americans are killed daily, or that America is quite the land which Jules Verne, or the European caricaturists, represent it to be. Millions travel daily in "the trolley" without harm to man, beast, or vehicle. Of course, when new lines are just laid out, new machinery and new men are employed, and everything is novel and strange; perfection in the time table, or absolute safety to life and limb cannot be guaranteed; but, after a few weeks, machinery and men become accustomed to each other, and the ratio of accidents is very much smaller than when horses and vehicles are used to do the same work in kind and quantity. The invention of the rubber-cushioned projection, which, in case of collision with a human being, may bruise but rarely kills, has robbed the rails of what was at first terror. Both horses and people soon get used to the trolley car, which mounts up and down hill with a facility to which even the steam locomotive is a stranger. One sign of the steady revolution going on is the substitution of electric power for the steam engine on the New York elevated railways. The smoke, dirt and noise of the puffing and wheezing engines are over, and since early summer most of the trains have moved without visible propulsion.

I enjoyed a trolley ride from Boston to New

York during the past summer in vacation days. I had scores of times traversed the same space from the Hub City to Springfield, and down the Valley of the Connecticut River and along Long Island Sound, but I confess that after the trolley ride it seemed a new country. This was not merely because I could ride in the open tram cars, that have their seats crosswise with the track, so that every person can see immediately in front of him over the landscape; or, because these summer cars have no other enclosure than their roofs and supporting posts, but because the trolleys go over new and in many places over irregular ground. When railways were built in New England two or three generations ago, they had naturally to follow the lines of least resistance, and there, as in other states, the old Indian trails, where not already overlaid by ordinary public turnpike or macadam roads, were utilized by the wooden ties and iron rails for the locomotive. Naturally the levels and the valleys were threaded by the iron bands, and the towns on the hills were left behind, usually to wither away or at least suffer loss of business and prestige. The story of the "hill towns" is almost as pathetic as that of the hill top churches or abandoned farms. But the trolley has worked wonders here and elsewhere. In or near the large cities, it has compelled a new social distribution, building up the suburbs, increasing the area of town and village limits, and fostering the tendency of people to live in the city rather than the country, when "the city" means plenty of room and air. The startling result is seen in the report of the U.S. census, which shows that the centre of population instead of moving many miles westward within a decade, as it has done every ten years, is practically stationary, because of this thickening density of population in the old seats of culture and industry.

To the "hill towns," the trolley has brought new blood and varied life. A trolley ride from Boston to New York means visitation of the old historic towns and the delightfully picturesque villages where so many of the first makers of the nation were grown. To the cultivated tourist, there is much of the same charm now possible, which is commonplace in ancient and venerable England, which is so plethoric of places in which things happened. For obvious reasons of health, protection and availability, the New England fathers built on the hill-top. Now, the once "deserted villages," made so by the steam railways, are throbbing with new life, because they are easily accessible from the valley. There is a steady reflux of people who, not only on the "old home coming" days, and Thanksgiving seasons, make short trips of visitation, but who let their suburban life give way to a more purely rural type throughout the long summer months. What with the bicycle and automobile, the electric light easily established even in villages from some distant centre, with the telephone in the farmer's house, and free mail delivery all along the country roads, the aspects of home life are changing. The trolley has come and with it the love of natural beauty, a desire for more outdoor art, an impulse to make beautiful even the deserted "God's Acre," and to mark with tablet, inscribed boulder, statue, or monument, the places of historic interest.

I was specially impressed with the richness of the great tobacco fields in the Connecticut River Valley. Here are grown not only the ordinary qualities of the plant, but in fields surrounded by gauze, jealously and vigilantly kept tight from all insect and other intruders, and made frost-proof, Sumatra tobacco is cultivated. To see them plant tobacco by machinery gives almost a comic view of the case. In the slow moving machine, one arm reaches out and with its iron fingers digs a hole. Another arm seizes a young tobacco plant, puts it into the hole, the third disposes the earth properly around each stalk, while a fourth spurts water over the young plant and earth, and especially around its roots. Somehow the process reminded me of a Chinaman rolling and sprinkling clothes previous to ironing.

The political situation this year is a curious one; the Republicans have posed as the great

apostles of prosperity. They preach and imagine that if only they are kept in power, prosperity will continue. But, on the other hand, as even our local prophets of the Democratic faith foretold, the price of the necessities of life has gone up, the various "trusts" of every sort have enriched the few with millions far more palpably than they have the masses with dimes, and the breaking out of the coal strike, which has continued nearly six months, has utterly upset their campaign plans. Only a few Republicans seem to see that to make a profession is one thing and to live up to it is another. As it stands now, the supposed friends of the labouring man are held responsible for every industrial disturbance and even for the crop failures, should there be any. If the Republicans are universal providers of prosperity, why should we not hold them responsible for the three hundred million dollars worth of damage done annually by worms and sects. Even the Protectionists are not very logical when, after having put sixty-seven cents a ton duty on foreign coal, they propose to nullify the law by executive interpretation, by waiving the legal duties during the continuance of the coal strike. Verily it seems as though excess of boasting would work ruin, for there are even Republicans that believe that the Democrats will sweep New York, and some other states usually considered Republican, at the coming election, especially if New York should have a rainy day, which makes it hard for the country Republicans to get out to vote, and very easy for the Democrats, who for the most part are massed in the cities.

But on the other hand, since the New York State Democrats have come out flat-footed for socialism, and put a plank in their platform, urging ownership of the anthracite coal mines by the national government, it is probable that many in their own party will take alarm and vote the opposite ticket. It seems amazing that the party heretofore most strenuous in upholding rights of the individual state should urge the central government to over-ride the State of Pennsylvania, and take possession of the coal mines. Even Goldwin Smith, the Canadian, has written urging that the national government should take a new step in the exercise of sovereignty, and, by possessing the coal mines put an end to this phase of the strife between Capital and Labour, which in the eyes of foreigners, who do not understand our system of political checks and balances, seems an inherent weakness in our political system.

It is hardly probable, however, that the people of the United States will hasten to overcome their political conservatism. Their government is probably the most stable in the world. It is one that has changed less during the last century than any other on the planet. As Brooks Adams thinks, it may be that our great national danger is from ultra-conservatism. Amendments of the Constitution can indeed be made, but it is extremely difficult to so rouse the whole nation as to get them passed. As matter of simple fact, about five thousand amendments, in all, to the Constitution have been proposed, but only five of them have within the century become part of the Constitution. Hence we do not look for any remarkable tendencies toward socialism in the national government during the present decade.

W.E.G.

HEYDRICH RECITAL.

A small, but enthusiastic, audience assembled at the Public Hall on Saturday, 22nd November, to hear the Piano-Recital by Mr. Hermann Heydrich. This kind of entertainment does not appeal to the general public; but chiefly, if indeed not entirely, to those persons who are amateurs of the particular instrument. Doubtless the exchequer would have felt the benefit of a more varied programme had there been included therein some vocal, or violin, music. Such a course would have given both performer and listener relief from the inevitable monotony which prevailed all through the *soirée*: and would have undoubtedly been a greater attraction to the general concert-goer.

We append the programme, from which it

will be seen that the recital exhibited many styles of pianoforte music, ranging from the classic Bach, Beethoven and Mozart down to the popular composers of recent times, Godard and Heller. It included also three agreeable *pièces-de-salon* from the pen of the *bénéficiaire*.

Mr. Heydrich is a player of no mean calibre; in fact we have heard none so good in Yokohama since the regretted departure of Signor Gentile. It would be invidious to be hypercritical on the present occasion or to comment too strongly upon some obvious mannerisms of the executant. To our thinking the Nocturne by Field, and the more modern excerpts were the best-rendered numbers; the excessive use of pedal and *tempo-rubato* in the Prelude by Bach and the Sonata by Beethoven being contrary to the classical purity and spirit of those compositions. We shall be glad to hear Mr. Heydrich again, and hope that a more popular programme will then attract a larger and more remunerative house.

- 1.—a. Prelude in F ma (from 4th Suite anglaise) Bach.
b. Sonata in D'mi op. 31. No. 2Beethoven.
Largo, Allegro—Adagio—Allegretto.
- 2.—a. Nocturne in B flat maField.
b. Fantaisie Impromptu in C sharp mi.....Chopin.
c. Menuetto in E flat maMozart-Schulhof.
- 3.—a. Romance in B flat ma..... } Hermann
b. Album leaf in A flat ma } Heydrich.
c. The Mill (a characteristic piece).
- 4.—a. Warum? (from Phantasie—Stuecke)... R. Schumann.
b. 2nd Mazurka in B flat maB. Goddard.
- 5.—a. Bridal—Procession from Wagners' "Lohengrin"Liszt.
b. Fantaisie in E. flat ma. from an opera by HalevyStephen Heller.

TORISHIMA.

According to the story told by a member of the N. Y. K. steamer *Hiogo Maru*, which arrived in Yokohama on Nov. 24th from the Bonin islands, the condition of Kita Torishima, where the disastrous volcanic eruption took place last summer, has undergone quite a change. The whole of Torishima is now covered with green grass and a considerable number of albatross are again flocking there. Thin streams of smoke were still curling up from craters, but there was no immediate danger of eruption, so far as outside appearances went. A sailing-vessel was seen lying near the island and it is thought probable the craft belonged to Mr. Tamaki Hen-yemon, the lessee of the island. A religious service for the repose of the souls of the unfortunate people who lost their lives in the recent eruption, took place in the Bonin islands on Nov. 18th, being attended by over 4,000 persons.

In this connection, the *Tokyo Asahi* has a paragraph to the effect that Captain Rosehill and others interested in Minami-Torishima (Marcus island) have submitted a petition to the Washington Government against the Japanese Authorities, claiming compensation from the latter.

ONE OF THE WORLD'S UNKNOWN HEROES.

Under this heading, the Editor of *The Spirit of Missions* has an appreciative article which we take the liberty of reproducing:—One of the most heroic figures of the present-day world is a man whose very name is known to few and whose life is familiar to even fewer. He lives in a small hired house in the city of Tokyo. His name is Samuel I. J. Schereschewsky. For six years he was Missionary Bishop of Shanghai. Nineteen years ago illness, contracted largely through his work, rendered him almost helpless. Refusing to be a burden to the Mission, he resigned his see. But he refused to consider that his working days were over. With his paralyzed body he could no longer go about the work of evangelization, but he could at least sit in a chair and work for China by translating the entire Bible into easy Wenli, so that more of the common people might read its message. This he has been doing for many years, working with such restless energy, in his struggle against pain and helplessness, that he has kept two secretaries busy. He wrote his

translation of the entire Bible in Roman characters, upon the type-writer, though he could use only one finger of each hand, and needed eight years to complete the task. Bishop McKim, calling upon him the other day, found that he was just completing the last chapters of the Book of Malachi. If his life is spared, he proposes to undertake the preparation of a reference Bible. He has worked under conditions that put to shame many of us who speak or think of the great deeds we might do if our circumstances were only different.

THE UNITED STATES ELECTIONS.

A REPUBLICAN VICTORY.

A Washington telegram of Nov. 5th said:—The latest returns received up to 10.30 p.m. show that the Republicans (including in this description the fusionists elected from the Pittsburgh-Allegheny districts in Pennsylvania) will control the next House by a vote of 204 Republicans to 179 Democrats, with one district, the Eighth Tennessee, and two California districts remaining so much in doubt that the official returns will be needed to decide the result. The totals given are believed to be correct, although there are a few districts, such as two in Colorado and one in Minnesota, where the Republican and Democratic managers do not concede defeat, but the general results could not be affected.

The table by states is as follows:—

State—	Dem.	Rep.
Alabama	9	—
Arkansas	7	—
California	2	4
Colorado	3	—
Connecticut	—	5
Delaware	1	—
Florida	3	—
Georgia.....	11	—
Idaho	11	1
Illinois	9	16
Indiana.....	4	9
Iowa	1	10
Kansas.....	—	8
Kentucky	10	1
Louisiana	7	—
Maine	—	4
Maryland	2	4
Massachusetts	4	10
Michigan	1	11
Minnesota	1	8
Mississippi	8	—
Missouri	15	1
Montana	—	1
Nebraska	1	5
Nevada	1	—
New Hampshire	1	2
New Jersey	3	7
New York	17	20
North Carolina	10	—
North Dakota	—	2
Ohio	4	17
Oregon	—	2
Pennsylvania	4	28
Rhode Island	1	1
South Carolina	7	—
South Dakota	—	2
Tennessee	7	2
Texas	16	—
Utah	—	1
Vermont	—	2
Virginia	9	1
Washington.....	—	3
West Virginia	—	5
Wisconsin	1	10
Wyoming.....	—	1

Totals 179 204

The Eighth Tennessee and the First and Second California districts are not included in this table, being classified still as doubtful, leaving three votes to be added to the column according to later returns.

A correspondent in Washington telegraphing on Nov. 6th said the choice for Speaker lay between Representative Cannon of Illinois, Dalzell of Pennsylvania, Payne and Sherman of New York, and Littlefield of Maine, the general opinion being, however, that Cannon would be chosen.

AMERICAN TOPICS.

Figures which have reached the U.S. Treasury, but which have not yet been compiled and digested, indicate that the world's gold product for the present year will foot up around \$300,000,000 worth, of which the United States will furnish as good a proportion as it did last year, when it produced some \$78,000,000.

Paymaster Charles W. Penrose, of the cruiser *Michigan*, who was recently convicted of embezzlement by a court martial at Erie, Pa., and sentenced to dismissal, has tendered his resignation to the President and it is believed that it will be accepted. The acceptance of the resignation will wipe out the stigma of the sentence of dismissal.

Honolulu is soon to have a new line of steamers if official reports received by the French consul there can be taken as conclusive. The steamers of the Messageries Maritimes, now sailing from Marseilles to Sydney, are next month to come to Honolulu, and will include also New Caledonia, Tahiti and San Francisco in their itinerary.

A tablet commemorative of the settlement of Newark by the pioneers on Oct. 30, 1660, was unveiled on October 30th, 1902, in the Old First Church in Broad-street, by the New Jersey Society of Colonial Dames. Preceding the exercises at the church the Colonial Dames gave a formal reception in the New Jersey Historical Society building to Governor and Mrs. Franklin Murphy.

According to the federal census of 1900, the population of Greater New York was 3,437,202, but the Board of Health, as a basis for arriving at the percentage of mortality, estimates that the population now amounts to 3,632,501, which is an increase of 195,299 in two years. Of this increase 45,398 is in Manhattan, 43,634 in Bronx and 83,068 in Brooklyn. At the present rate of progress the next federal census will show New York to be a city of considerably more than 4,000,000 inhabitants.

Princeton University formally installed Mr. Woodrow Wilson as its head, on October 25. More than a hundred other colleges and universities were represented at the ceremonies, and many well-known men in other than the educational profession were present. In his address the new president said that he would introduce no startling innovations into the curriculum or administration of the university. He emphasized the fact that the highest service of a university is national rather than private or personal.

A New York police captain named Donohue died suddenly the other day in his office, and the executor of his estate found in his desk and on his person \$200,000 worth of property—\$35,000 being in bills, \$11,000 in jewelry, a deed for a house worth \$35,000, several savings bank books, certificates of shares in well paying stocks and a number of uncashed cheques for dividends. This thrifty police-man had been on the force twenty-three years as patrolman, sergeant and captain, but his total pay during that time amounted to only \$50,400.

Captain Bowman H. McCalla, of the U.S. Navy, now on leave, has been selected for assignment as commandant at Mare island, Cal. Rear-Admiral Merrill Miller, the present commandant, will be detached from the yard in December and McCalla will succeed him then. This is an unusual honour to confer on an officer below flag rank. Capt. McCalla served in Cuban waters as commander of the *Marblehead* during the Spanish war and saw further service in the Philippines during the period of hostilities there while in command of the *Newark*. He commanded the first division of the American bluejackets and marines sent to relieve Peking and was twice wounded in that campaign. His latest duty was in command of the flagship *Kearsarge*.

The New York *Evening Post* has obtained from forty-four college professors east of Chicago answers to questions which show that a large

majority of these expert authorities favour increased federal regulation of corporations, and, if necessary, constitutional amendments to confer this power upon Congress. A large majority were of the opinion that Congress had not exercised all its powers in the enactment of the Sherman act. Almost two-thirds of those who answered the question favoured the appointment of another tariff commission not merely for its direct influence on legislation, but also for the value of the information on tariff problems, which its investigations would bring out. Forty-three favour the reduction of repeal of import duties on articles whose production in the United States is controlled by monopolies.

The death of Frank Norris, the novelist, occurred at San Francisco, on October 25th. Mr. Norris was a Harvard graduate who had settled in San Francisco and devoted himself to literature. He was only thirty-two years old, but had gained a high reputation as a writer. Before going to Harvard he received his early education at the San Francisco high school and the University of California. He studied art in Paris in 1887. Mr. Norris gained his first laurels in journalism. He acted as a correspondent in South Africa for the *San Francisco Chronicle* in 1895 and 1896, and was sent to Cuba during the Spanish-American war for *McClure's Magazine*. He had also been editor of the *San Francisco Wave*. The novel that brought him the greatest fame was "The Octopus," a story of the struggle between the wheat growers of California and the railroads. Both this story and his earlier works, "McTeague" and "Blix," have been warmly commended for their sincere realism.

A calculation of the amount of motive power used in the manufacturing establishments of the United States naturally deals with large totals. On the face of the returns it would occasion little surprise to be told that the motive power so used aggregated 11,300,081 horse power in the census year. The figures, however, become more striking when we learn that they represent not far from a doubling of the total for the year 1890, and are considerably more than three times those for the year 1880. Thus far steam engines supply more than three-quarters of the power used in manufacturing, accounting for 8,742,416 horse power, or 77.4 per cent of the whole. Water wheels supplied 1,727,258 horse power, or 15.33 per cent.; electric motors, 311,016 horse power, or 2.7 per cent.; gas and gasoline engines, 321,051 horse power, or 1.3 per cent., and other forms of mechanical power, 54,490 horse power, or five-tenths of 1 per cent. It should be recollected in considering these figures that they relate only two manufacturing occupations, and take no account of the great amount of power used for other purposes.

In his Proclamation setting apart to-day as a day of Thanksgiving in the United States, President Roosevelt says:—

"Over a century and a quarter has passed since this country took its place among the nations of the earth, and during that time we have had on the whole more to be thankful for than has fallen to the lot of any other people. Generation after generation has grown to manhood and passed away. Each has had to bear its peculiar burdens, each to face its special crisis, and each has known years of grim trial, when the country was menaced by malice, domestic or foreign, when the hand of the Lord was heavy upon it in drought or flood or pestilence, when in bodily distress and anguish of soul it paid the penalty of folly and a froward heart.

"Nevertheless, decade by decade, we have struggled onward and upward; we now abundantly enjoy material well-being, and under the favour of the Most High we are striving earnestly to achieve moral and spiritual uplifting. The year that has just closed has been one of peace and of overflowing plenty. Rarely has any people enjoyed greater prosperity than we are now enjoying. For this we render heartfelt and solemn thanks to the Giver of Good, and we seek to praise Him not by words only but by deeds, by the way in which we do our duty to ourselves and to our fellowmen."

Canada has made giant strides of late years. This fact has been apparent to the most casual observer, while to the student taking an interest

in the economic development of a people there is abundant evidence of material progress which augurs well for the immediate future of the country. Comparatively young business men in Canada have a recollection of geography lessons at school in which it was set forth that the two chief items of export in Canadian trade were fish and lumber. It is interesting now to note that in the list of exports for the first quarter of the present fiscal year fish stood sixth and lumber seventh, animals and their produce and products of the mines in first and second places respectively, replacing fish and lumber, which were formerly the only two really important staple exports of the Dominion. Although there has been a remarkable expansion in nearly all departments of Canadian trade the past year or two, the greatest development has been in connection with the iron and steel industries and in agriculture. When the end of the current half-year is reached it will be found that the results of the operations in these branches of industry have caused very substantial additions to the domestic trade of the country.

The report of the Governor of Hawaii to the U.S. Secretary of the Interior shows that the shipments of merchandise from the territory for the past fiscal year were less by \$3,260,695 than the shipments of the year ending June 30, 1901. All of this falling off except \$86,885 is chargeable to the one item of sugar, and is shown to be due solely to a decrease in the market value of that article and not to a diminished production, the sugar shipped in the past year being 720,553,357 pounds, against an aggregate shipment of 690,879,234 pounds of the year before, or an increase of 29,674,123 pounds. The exports of rice, coffee, wool, honey and fruit also show a falling off from the figures of value of the preceding year, while during the past year no molasses nor curios were shipped at all. Hides and sundries are the only two articles of export which show a gain over last year, the total increase being \$196,610. The difference between this amount and the total decrease of \$283,494, which amounts to \$86,886, shows the actual falling off in the value of shipments, other than sugar, of the past year as compared with the year before. Of the total value of shipments, not including specie, from the territory during the past year of \$24,793,735, \$38,813 represents the value of foreign merchandise shipped, as against a value of \$24,754,922 of domestic merchandise shipped. Of this total value the shipments to foreign countries were worth \$63,547 and those to the mainland were worth \$24,730,188. The population of Hawaii in 1900 is given as 154,001, an increase over 1890 of 64,011, or 71.1 per cent. Of the total population the Chinese numbered 25,767; Japanese, 61,111; Caucasians, 28,819; Hawaiians, 29,799; part Hawaiians, 7,857; South Sea Islanders, 515, and negroes, 233. The proportion of whites in the entire population decreased from 67.4 in 1890 to 43.4 in 1900, due to the large immigration of Chinese and Japanese, particularly the latter.

CALENDARS.

Among the first portents heralding the death of the year is the advent in our office of a deluge of calendars which shipping and insurance companies shower upon the mercantile community with lavish hand. The first in the field this year is the Nippon Yusen Kaisha which issues a large and handsome card. A beauteous daughter of Japan points to a modern mail-steamer which proudly flaunts the ensign of Japan and the house-flag of the N.Y.K., while at her feet kneels another female figure clad in *kimono* and *obi* of a richness of design and colouring that only the daughter of a noble house could aspire to. The artist has also brought within the purview of his design the allegorical pine (*matsu*) and cherry (*sakura*) of the island empire, and a sketch of the globe, showing the links which bind Japan to Europe and America, through the services of the N.Y.K., is outlined on a handsome screen, the whole forming one of the most artistic productions ever sent out by the Nippon Yusen Kaisha.

PACIFIC RECORDS.

Monday, Nov. 24.

A correspondent kindly points out some errors in the account which we took from the San Francisco Chronicle regarding the last trip of the P.M. steamship *Korea* to America. He has corrected the averages with the knots made per day and makes out the following table:—

October.	As reported in San Francisco.	per hour.	CORRECTED.	per hour.
19.....	394—17.4	394—16.41
20.....	419—17.9	419—17.45
21.....	424—18.1	424—17.66
22.....	422—18.	422—17.58
23.....	414—17.76	414—17.25
24.....	419—18.	419—17.45
25.....	422—18.11	422—17.58
26.....	436—18.6	439—18.16
27.....	414—17.7	414—17.25
28.....	392—16.9	392—16.33
29.....	381—17.6	—

The *Korea's* best run was 436 miles on Oct. 25, and her average for the whole voyage was 17.8 knots per hour. Now the *Empress of Japan* in June, 1897, made a run of 441 knots on one day, or 18.37 knots per hour, and her average for her record trip was 17.47, a little bit better than the *Korea's*.

Wednesday, Nov. 26.

On Monday morning we printed a note from a correspondent who had corrected the table of the *Korea's* run from Yokohama to San Francisco and the average speed made by her per hour, as printed by the *San Francisco Chronicle*. Another correspondent now writes that the table thus drawn out would have been correct had the *Korea's* runs been of 24 hours each, but as she was travelling to America her running time was considerably shortened every day in order to keep pace with the sun, and his contention was so convincing that we sought and obtained from Capt. Seabury, the Commander of the *Korea*, the actual runs per clock on the now famous voyage. Captain Seabury very kindly acceded to our request and we now present the corrected run of the *Korea* as clocked by her Commander:—

Korea's Log, voyage 2, Yokohama to San Francisco; sailed, October 18th, 12.43 p.m.; arrived, October 28th, 10.30 a.m.

Date.	Time noon to noon.	Day's run knots.	Av. per hour knots.
Oct. 19.....	22.37	394	17.4
" 20.....	23.30	419	17.85
" 21.....	23.25	424	18.1
" 22.....	23.21	422	18
" 23.....	23.20	414	17.75
" 24.....	23.17	419	18.
" 25.....	23.18	422	18.11
" 26.....	23.20	436	18.64
" 27.....	23.24	414	17.69
" 28.....	23.27	392	16.7
" 29.....	21.34	381	17.6

The *Empress of Japan* was running in an opposite direction to the *Korea* in 1897, and on the day she made 441 knots her noon to noon time works out at 24 hours 48 mins., or 17.78 per hour.

AUTUMN MEETING OF THE NIPPON RACE CLUB.

OFF DAY.—SATURDAY, 22ND NOVEMBER.

PATRONS:—H.I.H. Komatsu-no-Miya, H.I.H. Fushimi-no-Miya, H.I.H. Arisugawa-no-Miya.

PERMANENT COMMITTEE:—Sir Claude Maxwell MacDonald, K.C.B., K.C.M.G., President; Dr. Wheeler, Vice-President; R. D. Robison, Esq., Jas Dodds, Esq., V. Blad, Esq., Governor Sufu, T. Thomas, Esq., G. Philip, Esq., S. Isaacs, Esq., A. J. Easton, Esq., Count von Arco-Valley, L. Mottet, Esq., and T. Rinoie, Esq.

EXECUTIVE COMMITTEE:—A. G. Morey Weale, Esq., CHAIRMAN; A. Bianchi, Esq., K. Mori, Esq., L. Mottet, Esq., P. de C. Morris, Esq., H. Keswick, Esq. and B. Runge, Esq.

CLERK OF THE COURSE:—B. Runge, Esq.

SECRETARY:—S. H. Somerton.

The interest of owners in the autumn races at Negishi was apparently not satiated with nine

races a day for three days, but required an off day with seven races to bring the season to a close. The attendance of visitors was not so large as night have been expected from the programme offered and the pleasant weather, but there was little falling off in the speculation on the *Pari Mutuel* and Sweeps. The officers who officiated on the three regular days of the meeting again carried out the arrangements, with the exception that Mr. Mottet acted as starter in place of Mr. P. de C. Morris. Besides the six events set down in the programme, a match race was run between Sunrise, MacMorse and Max Willem, which resulted in a very easy win for the former. The events were as follows:—

Race No. 1.—For Autumn Australian Subscription Horses, 1902. Weight for Age. $\frac{3}{4}$ Mile. Winner, *yen* 100; Second Horse, *yen* 50.

Mr. Sphinx's Ma Mie, 130lb.(Goto) 1
Mr. Carnegie's Thistle, 137lb.(Horikoshi) 2
Mr. Pond's Sydney, 130lb.(Hakodate) 3
Mr. Pond's Azuma, 130lb.(Kobayashi) 0
Mr. Scherz's Margherita, 137lb.(Sugiura) 0
Mr. K. Sasaky's Cloudy, 130lb.(Mr. Jarmain) 0

Mr. Pond, who had two horses in, declared best to win. Margherita made the running from the start but was finished when passing the Trees. Here Ma Mie came up with Thistle next in order, and the same positions were maintained to the finish, Ma Mie winning by two lengths, with Sydney a good third. Time, 1.30 $\frac{1}{2}$.

PARI MUTUEL, 5 *yen*—Ma Mie 128, Margherita 44, Cloudy 14, Azuma 39, Sydney 75, Thistle 67; total 1,651 *yen*.—Ma Mie, *yen* 13.

Race No. 2.—The Tsukigase Cup (Presented by Mr. Tatsuta). For Country Bred Subscription Horses of 1902. Handicap. Half mile. Second Horse *yen* 50.

Mr. Carnegie's Leek, 132lb.(Horikoshi) 1
Mr. Norfolk's Ping-pong, 120lb.(Sugiura) 2
Mr. Hansa's Alster, 130lb.(Mayeda) 3
Mr. Scherz's Le Gone, 124lb.(Mr. Jarmain) 0
Mr. Pond's Niicup, 129lb.(Hayashi) 0

After a lot of trouble at the start, Leek got away with a lead and kept it to the finish, beating Ping-pong by three lengths or so with Alster a good third. Time, 1.0 $\frac{1}{2}$.

PARI MUTUEL, 5 *yen*—Le Gone 35, Ping-pong 215, Alster 311, Niicup 27, Leek 142; total *yen* 1,835—Leek, *yen* 20.

Race No. 3.—The Uhlenhorst Cup (Presented by Mr. Hansa). For Autumn Australian Subscription Horses of 1902. Weight for Age. Winner of Race No. 1 excluded. One Mile. Second Horse, *yen* 50.

Mr. Carnegie's Shamrock, 137lb.(Horikoshi) 1
Mr. Nishimura's Sanyo, 140lb.(Takahashi) 2

Only two horses started and the match lay between Shamrock and Sanyo. The latter got the best of the start but Shamrock took the lead at the Houses. After a neck and neck race round to the straight Shamrock kept the best of the position and though Sanyo appeared to have plenty left in him if he had been ridden in the home stretch, Shamrock won by two lengths. Time, 2.04 $\frac{3}{4}$.

PARI MUTUEL, 5 *yen*—Sanyo 368, Shamrock 250; total *yen* 2,781—Shamrock, *yen* 11.

Race No. 4.—Mr. Norfolk's Cup (presented by Mr. E. C. Davis). For All Comers. Handicap. One Mile and a Quarter. Second prize presented by Mr. Carnegie.

Mr. K. Sasaky's The Coronet, 145lb.(Mr. Mottu) 1
Mr. Kawakita's Arakawa, 142lb.(Ichi) 2
Mr. C. de C. Hughes' Lady, 118lb.(Mr. Jarmain) 3
Mr. Sphinx's Fourcee, 134lb.(Miyagawa) 0
Mr. Pond's Saikio, 135lb.(Kobayashi) 0

Lady made the running until reaching the Trees, with The Coronet close up. Entering the straight the latter came to the front and Arakawa displaced Lady. In this order the race was finished, The Coronet passing the post a length before Arakawa. Time, 2.33 $\frac{1}{2}$.

PARI MUTUEL, 5 *yen*—Fourcee 67, Arakawa 90, The Coronet 403, Saikio 42, Lady 78; total *yen* 3,060—The Coronet, *yen* 7.50.

Race No. 5.—For Spring Australian Subscription Horses, 1902. Handicap. One Mile. Winner, *yen* 125; Second Horse, *yen* 50.

Mr. Carnegie's I.O.U., 133lb.(Horikoshi) 1
Mr. Iris' Yamato, 131lb.(Kato) 2
Mr. R. Field's Temper, 126lb.(Hayashi) 3
Mr. Tatsuta's Tamagawa, 126lb.(Miyagawa) 0
Mr. Decimus' Firefly, 133lb.(Sugiura) 0

After a lot of trouble at the start Yamato jumped

ahead with a lead of two or three lengths and kept it until after negotiating the Dip, when Firefly came to the front, but only retained the lead for a furlong or so. At the Trees I.O.U. came to the front and after a good race with Yamato, who had run into second place, won by about three lengths. Time 2.01 $\frac{1}{2}$.

PARI MUTUEL, 5 *yen*—Yamato 173, Tamagawa 56, Firefly 196, I.O.U. 225, Temper 108; total *yen* 3,411—I.O.U. *yen* 15.

Race No. 6.—For Autumn Australian Subscription Horses, 1902. Handicap. One Mile and a Furlong. Winners of Races No. 1 and 3 excluded. Winner, *yen* 125; Second Horse, *yen* 50.

Mr. Hansa's Elbe, 134lb.(Mayeda) 1
Mr. Carnegie's Thistle, 126lb.(Horikoshi) 2
Mr. Nishimura's Sanyo, 135lb.(Sugiura) 3
Mr. B. Runge's Bambina, 130lb.(Kato) 0

Elbe made the running and kept a slight lead to the finish, though Thistle made a game try and was only beaten by a head or half a head after shying over to the outside rails just before the Stand. Sanyo was a fair third. Time 2.20 $\frac{3}{4}$.

PARI MUTUEL, 5 *yen*—Bambina 52, Elbe 199, Sanyo 338, Thistle 127; total *yen* 3,222—Elbe, *yen* 16.

Race No. 7.—Match Race, Three Quarter Mile.

Mr. Mottu's Sunrise, 155lb.(Mr. Mottu) 1
Mr. Elliott's MacMorse, 157lb.(Nimmerfall) 2
Mr. Uverzagt's Max Willem, 155lb.(Mr. Harckmeister) 3

Max Willem got away and led for nearly half a mile, when Sunrise came up and going easily won by half a dozen lengths. Sunrise had started a warm favourite, Time 1.44 $\frac{1}{2}$.

PARI MUTUEL—Sunrise 535, MacMorse, 173, Max Willem 137; total *yen* 3,802—Sunrise *yen* 7.

NEWS OF THE WEEK.

On Nov. 24th a collision took place between a passenger train and a goods train at the Nakazumi Station on the Kyushu Railway. As a result, 16 persons were injured more or less seriously.

Rats continue to be caught throughout the Colony of Hongkong at the rate of about 2,000 per week, and amongst those destroyed, says the *China Mail*, from 35 to 40 per week are found to be plague infected.

A carriage in which Mrs. Ford and Mrs. Kilby were driving collided with a telegraph post in the Recreation Ground on Saturday afternoon. A shaft was broken and other damage caused, but the ladies were not injured.

Mr. M. Inagaki, Japanese Minister to Siam, arrived in Yokohama on Nov. 24th by the *Korea* from Bangkok and proceeded at once to the capital. A Tokyo paper says that he will probably be transferred to a European court.

The leader of the German Voluntary Medical Detachment in the late South African war, Naval Surgeon-in-Chief Dr. Mathiolus, has been appointed physician-in-chief of the German naval hospital in Yokohama, and shortly leaves for his post.

The *China Mail* says that the Committee to consider the advisability of adopting a gold currency in the Straits and Federated Malaya consists of Sir David Barbour, Mr. W. Adamson, C.M.G., Mr. Johnson of the Colonial Office, and Mr. Blain of the Treasury.

According to a statement from Paris, the great De Blowitz is about to resign the journalistic sceptre which he has wielded so well for more than thirty years, and it is added that his place is to be taken by his colleague at Vienna, Mr. William Lavino, who is a relative of Sir Edward Lawson, the proprietor of the *Daily Telegraph*.

The former site of the Club Concordia, adjoining the main building of the Oriental Hotel—one of the best building sites in Kobe Settlement—has been bought by the Hotel Company with the intention, the *Kobe Herald* understands, of building a first-class three storey hotel there. The price was *yen* 290,000.

Akijiro and Ichigoro, two coolies, employed by a forwarding agent named Ishizaki, at Sakaicho Itchome, have been arrested by the Kagacho Police

on a charge of having stolen 33 tins of varnish, valued at *yen* 28, from the godown of the American Trading Co. The goods, which were sold to a man named Koizumi at Onoyecho Nichome, have been recovered.

The Japanese Coronation Squadron, the *Asama* and *Takasago*, are expected to arrive at Yokosuka this morning from England.

On Wednesday and Thursday the yachts in harbour had their flags half-mast as a token of sympathy with Mr. R. Boyes, a member of the Yokohama Yacht Club committee, whose wife died the other day.

Chiba Torakichi, police constable of the Kamakura Police Station, was arrested in Kamakura on Nov. 26th on a charge of having destroyed official documents. The accused was taken at once to the Yokohama Chiho Saibansho for trial.

A Siamese man-of-war is reported to have left Bangkok on Nov. 19th for Japan to receive the Crown Prince of Siam, who is expected to arrive in Yokohama about the 15th of December from Vancouver. His Highness leaves the latter port on Dec. 1st.

The launch of the third class cruiser *Tsushima* will take place in the Kure naval station about the middle of December. The cruiser is a sister vessel of the *Niitaka*, which was launched at Yokosuka on Nov. 15th and has an aggregate tonnage of 3,366 tons with a speed of 20 knots.

The trial of the steamer *Keijo Maru*, built by the Kawasaki Shipbuilding Yard to the order of the Osaka Shosen Kaisha, took place in the Inland Sea on Nov. 25th when satisfactory results were obtained. The vessel will be delivered in a few days to the steamship company, which intends to use her on the Korean service. Her sister steamer, the *Heijo Maru*, will be launched from the same yard early in January next.

For some time past both the Ping-Pong and Table Tennis Associations have been considering changes in their rules. The Table Tennis camp favoured a below-the-level of the table service, but the Ping-Pong Association have just adopted the far more sweeping rule that in future the ball must first strike the server's own side of the table, and then leaping the net strike the other side of the table. The service may be either underhand or overhand.

A Sydney (N. S. W.) telegram of Oct. 28th said:—The Shell Transport Co.'s steamship *Clam* has arrived here from Batoum, having made a record voyage. She used oil as fuel, which increased her speed half a knot as compared with her last voyage under coal. The consumption of oil was 18 tons a day, against 24 tons of Welsh and 28 tons of English coal. Her crew is one-third smaller than usual.

A good woman of Rotterdam recently put the worthy governor of the city gaol in a dilemma. She had been sentenced to three days' imprisonment for neglecting to send her children to school. The *Rotterdamsche Courant* states that as the poor soul was a widow, with nobody to care for her little waifs, of which she has six, she solved all difficulties in her own rough way by presenting herself with them all clinging to her skirts. Then the governor was in a fix, and there was a long debate, which ended in the derelict youngsters going for three days to the poorhouse.

The civil ceremonies connected with the wedding of Prince Yamashina and Lady Tsune-ko, daughter of Prince Shimazu, were conducted at the Imperial Palace on the morning of Nov. 26th, in accordance with the customs of old Japan. There were present nearly all the Princes and Princesses of the Blood, besides many dignitaries of exalted rank. His Excellency Count Arco Valley, German Minister to Japan, proceeded to the Palace of Prince Yamashina in Kojimachi the same morning and offered congratulations.

Mrs. McWilliams, the Honorary Secretary and Treasurer of the Doll Show recently held at the Public Hall, has handed to the Convent authorities,

on behalf of the Orphan Children there, a cheque for *yen* 501.72, representing the net proceeds of the show. The accounts, audited by Messrs. F. J. Hall and G. G. Brady, show gross receipts of *yen* 1,418.59 and an expenditure of *yen* 916.87. The committee of the Doll Show take this opportunity of tendering their grateful thanks to the prize givers, to the many generous contributors, to the Press particularly for their kindness in advertising and printing entirely free of charge, to Rear-Admiral Evans the Captain and Officers for the valuable assistance given by the orchestra of the U.S. flagship *Kentucky*, to the Auditors, and to all kind friends who combined to make the show a success.

Interviewed by a representative of the *Yokohama Shinpo* with regard to the vacant post of Mayor of Yokohama, Mr. Otani Kahei, while recommending for the post Mr. Saito, Acting Mayor of Yokohama, said that Mr. Ichihara Seiko, Chief of the Yokohama branch of the First Bank, would be a suitable person to occupy the position and the citizens of the port are generally in favour of recommending him. As to his personal character and ability, there was nothing to be desired. He was a man highly versed in English and capable of properly discharging public affairs. Mr. Otani then remarked that Mr. Ichihara's appointment to the Mayoralty would be welcomed not only by the citizens but also by foreign residents of this port. It was a question, however, whether Baron Shibusawa, the founder of the First Bank, would consent to Mr. Ichihara leaving the bank.

With regard to the affair on Jizozaka, Yokohama, on the night of Nov. 23rd, it is now stated that the unfortunate woman, Kurahashi Hisa, aged 29 years, was the mistress of a German who resided for some time at No. 3,708, Negishi, Yokohama, and who left this port for home last year, but is expected to return here early in January next. The property of the foreigner is said to have been left under the woman's charge. The latter is now undergoing treatment at the Rokkaku hospital, but is not expected to recover, as she is unable to take food in consequence of her throat having been perforated by a bullet. As to Uyeki Yasujiro, who killed himself on the spot, he was the father of two daughters and two sons and belonged to a well-to-do family, having been the owner of extensive forest-lands and rice fields in the suburbs of Yokohama. The origin of the affair seems to be that the woman, who had been on familiar terms with Uyeki long before she became the mistress of the German, became attached to a Japanese interpreter in one of the police stations of the port and that this aroused jealousy on the part of Uyeki, her former lover.

KOREA'S SILK TRADE.

Concerning the trade in silk between Korea and Japan, the *Jiji* says, while noting the rapid growth of the trade, that it is no exaggeration to state that the Chinese merchants are still having the lions' share in this line of business. As a proof of this assertion the journal publishes the following table showing the value of silk goods imported into Chemulpo from Japan and China during recent years:—

	From Japan. Yen.	From China. Yen.
1897	18,677	422,935
1898	17,375	600,198
1899	15,006	437,979
1900	22,228	509,810
1901	31,686	921,201
Total	104,972	2,898,233

As will be seen from the above, Japan's trade with Korea falls far short of that of China. This discouraging feature was chiefly due to the fact that exports from Japan are for the most part used by Japanese residents in Korea, while the Chinese stuffs are largely in demand among the Koreans generally. The Japanese silk classed as *Kaiginu* is at present in demand not only among Japanese but also among Koreans in high

circles. The *Jiji* finally remarks that Japan's trade will never exceed that of China unless the Japanese traders entirely give up rivalry among themselves.

COMMERCIAL CONVERSATIONS.

MR. SAKUTARO TACHI.

There is an old story with which, probably, most people are acquainted, but which, being illustrative, my mood tempts me to drag in. It runs somewhat in this fashion: A guest, finding himself cashless, and yet under the unwritten obligation to tip a manservant in his host's house, resorted to the expedient of asking his valet to lend him a florin. The valet negotiated a loan of that sum with the butler, and the butler eventually received the same florin as a tip from the guest. Some idea of the value of passing on obligations after this fashion appears to have possessed the Chancellor of the Exchequer, and I leave those who have the inclination to puzzle out where individual enrichment comes in. For the time my concern is not with black or white Sir Michael in detail, but it was in connection with a survey of financial questions some time before the Budget was disclosed, that I found myself investigating an agitation in Japan against a House Tax. Why should British residents in Japan object to a House Tax? At home they have to pay an Inhabited House duty, and nothing could be more regular and right than the Japanese, in adapting their methods to Western standards, copying us in the art of extracting cash for the purpose of meeting either national or municipal expenditure.

Then, too, on learning of the opposition aforesaid, memories were revived of certain Anglo-Japanese questions which my Editors interested themselves in eight or nine years ago, when they stood almost alone among British contemporaries in supporting the claim of the Japanese Government to be relieved from the implied distrust involved in a continuance of the system of extra-territorial jurisdiction. Everyone recognises the wise foresight of my Editors now that we have entered into a political alliance with the Great Britain of the East. When, therefore, I drew attention to the importance of the agitation which was proceeding in Japan against payment of a new House Tax by the foreign settlements it was with no surprise that I found my immediate chief anxious to have a Japanese view of things to set off against some of the rash opinions of those who could only regard the tax from the purely personal standpoint.

My lucky star was in the ascendant, for opportunely chance put me on the track of Mr. Sakutaro Tachi, whom I was able to run to earth in London, via Oxford and Bournemouth—a round-about way of doing things which I learned long since on the Olympian heights.

It is only necessary to preface the record of my confab by pointing out Mr. Tachi's ability to speak with something approaching authority on the Japanese view of this House Tax question. He is associated with the Faculty of Law in the Tokio Imperial University, where—when at home—he is an Assistant Professor. He was ordered by the Japanese Government to study European Diplomatic History in England, France and Germany for three years. One year has already been spent with us, and he proceeds shortly to France for the purpose of continuing his investigation.

Mr. Tachi's response to my request for a chat was of the most cordial character, conveyed with a courtesy beyond reproach, and couched in the English language freely and correctly used. Do not, therefore, think that either the expressions for which I make him responsible hereafter, or the readiness of replies, are products of the imagination. They are, short of phonographic mimicry, exact and truthful as the spoken word can be reflected in print.

I opened thus: "I am deputed, Mr. Tachi, to obtain your views on this House Tax question because of the independent attitude my Editors adopt towards problems involving the rights of nations."

"Any help I can give you I shall be most happy to afford."

"Thank you. Perhaps you will best be able to judge of what 'we' think if first I give you an extract from an editorial note written hot on the heels of the news that opposition was developing to the tax?"

"I should be glad if you would do that, because I find from my reading of responsible English papers, that somewhat erroneous impressions have got abroad as to what my countrymen are doing, or trying to do, and the grounds which they have for justifying their action."

"Precisely; and it is because my Editors think 'the other side' should be represented that you find me here, Mr. Tachi. Well, the comment of *Commerce* on April 2, this year, alluding to the raid by the Japanese revenue authorities was in these terms: 'We would recommend those who may be alarmed by this information to keep cool, however, for we

think we see in this objection to the House Tax the last show of resistance by the old-fashioned Anglo-Eastern firms to the introduction of the new régime. At a time when these same firms were exerting all their powerful influences to resist the grant of greater freedom to the Japanese Government in dealing with foreign settlements, and the abolition of the consular jurisdiction, we took the unpopular side of Japan. Events have since proved that we were right in trusting the Japanese with fuller powers in the administration of the law. Now that the whole kingdom has been thrown open to foreigners and the facilities for trading have been immensely widened; now that we have formally allied ourselves with Japan in respect of Far Eastern questions which may arise, it will be recognised that it is not from pure cussedness that we cry a halt to fears of an explosion through the levy of a House Tax. The firms and companies which have to meet the new impost must expect to pay in some fashion for the facilities they have acquired, and even should their contention be upheld that the House Tax is contrary to old treaty obligations, we do not doubt that they will still have to contribute to the revenue in some way. The difference is apparently one of means only: the end will be the same. Those are our views; now what do you think, Mr. Tachi?"

During the reading of this note, Mr. Tachi listened intently, for it was a revelation probably to him to find the Japanese position so frankly stated, and he said: "Good; in your journalistic way and language you have anticipated in the main what I have to say in defence of my country. We want you to trust us more fully; to think of us as appreciating our new responsibilities, and as wishing to respect all rights established by the laws of civilised nations."

"That is the very point we have in our own way endeavoured to drive home."

"Yes, and I am glad to find you to that extent on our side."

"I take it, Mr. Tachi, that you argue from the standpoint of things being altered materially since the old treaties were made?"

"Yes and no. Yes, because my country admittedly has made vast strides in all ways, and what may, conceivably, have been right before she had adapted her ways to those of the West has now become irksome and inequitable. So much has been recognised by later treaties. No, if by material alteration you allude to the old treaty conditions which are utilised by some opponents of the House Tax to justify their action."

"Am I to understand, then, that you do not admit that the old treaties even freed the foreign settlements from liability to such a tax as that now under discussion?"

"That is my position. I cannot, for a moment, admit that the Japanese Government has been guilty of bad faith in this connection. Let us look at the matter from a practical point of view. The claim of the foreign residents seems, to say the least, anomalous. Some thirty years ago, the Japanese Government prepared, at its own expense, the sites for building purposes within the limits of various foreign settlements, and leased the bare land to foreigners on payment of a small sum, utterly insufficient to reimburse the expenditure incurred by the Government for the preparation. The lease was to run in perpetuity, and the land was subject to no other charges than that of an insignificant annual payment, one part of which was to be appropriated for municipal purposes."

"Your mention of that word 'municipal,' Mr. Tachi, suggests to my mind possibly the strongest reason for the new impost."

"I am coming to that immediately. What I wish to lay stress upon now is the fact that, having done what they did on the liberal basis I have stated, the Japanese Government certainly could hardly have expected that it would be requited with such an outburst of condemnation as it has been. True it is that the Government has allowed municipalities to impose a tax on houses built upon the leased land. But there is nothing outrageously exceptional in that! The tax is similar to that paid by Japanese subjects, and is levied solely for municipal purposes. Now that the municipal expenditure has enormously increased, it does seem unfair for foreign residents, who share in the benefits of municipal works, to evade contributing an equitable part of the total expenditure, under the plea of the alleged illegality of the taxation."

"I am compelled to agree with your conclusion, as I think others should who will stay to consider what Japan is and what she was; and who will concede the right of nations to be freed from conditions imposed in other times to meet circumstances which no longer exist."

"But I do not confine myself to the argument of changed conditions," Mr. Tachi continued, "for in my opinion, the Japanese Government is not endeavouring to recover a right given up, but only to exercise inherent rights which no treaties have ever abrogated or restricted."

"If you could establish that argument firmly, Mr. Tachi, it would go far in inducing many people to take a different view of this particular question."

"I think I can; at any rate I will give you my reasons for thinking that the Japanese Government was fully authorised to sanction this House Tax, irrespective of the special rights conceded in the past to foreigners and the foreign settlements. The question whether the House Tax, imposed by the municipalities, is illegal turns upon this question, whether buildings erected after the lease are to be deemed, in this particular case, a part of the property held under the lease in perpetuity, as well as the land itself. If this is not the case, then the buildings do not share in the immunity from taxation secured, for example, by Article 18 in the New Anglo-Japanese Treaty. The articles in the New Treaties respecting the leases in perpetuity confirmed the leases which already existed by prior compacts, as they stood, and did not introduce any alteration as to the kind of property comprised in such leases. Hence, the whole question rests on the meaning of the word 'property' as used in the New Treaties, whether it means simply 'land' or 'land and buildings thereon,' as, for instance, the *Economist* correspondent holds."

"That will raise some nice definitions, will it not?"

"Possibly, although I may be able to put the matter in such a light in a moment that what, for the instant, looks puzzling will appear clear as the noon-day sun. Contrary to those who argue that the question turns on the inclusiveness or exclusiveness of the word 'land' as used in the Treaties, I maintain that it rests on the nature and terms of the original compacts. These compacts were made with each particular foreign settlement, at various times and on somewhat different conditions, between the Japanese Government on the one hand and the Treaty Powers on the other."

"Can you give me, off-hand, one or two definite references to such documents?"

"Certainly. There is, for example, the 'Further Arrangement Relative to the Settlement at Yedo, 1870, May 3 (for Tokyo Foreign Settlement)'. Again, we have the 'Arrangement Relative to the Foreign Settlement at the Port of Hiogo and at Osaka, 1868, August 7 (for Kobe and Osaka Foreign Settlements)'; and there are others which fully establish the point that foreign settlements were the subject of very special negotiations and careful discussion."

"I will take that for granted, Mr. Tachi; but what do these special arrangements prove?"

"According to my interpretation of them they show, beyond all doubt, that the original compacts were made for the leases of bare land, especially prepared for the use of foreigners. So the property, considered in the original compacts to be the object of the leases, was evidently restricted to land."

"Again let me admit your view of the compacts to be accurate, is there no loophole left for the opposition to plead for land being used in its inclusive sense?"

"Oh, yes, there must be something in the nature of a 'loophole,' as you term it, or we should not have had the question submitted to arbitration. But if we come down to the strictly legal position, what do I find? I find the laws of the different Treaty Powers differing in their definitions. I find that the English law is stretched to a very wide extent in regard to the accessory relation of buildings to the land. But the Japanese legal ideas on the subject, which have since passed into a Code, are more definite and exclusive. Buildings erected after the lease cannot be conceived, in the eye of the Japanese law, to form a part of the property held under the original lease."

"How does that difference of national laws affect the international question?" I am confessedly not great on international law—the home variety is quite complex enough for me—but this seemed to be an enquiry of the obvious order."

"The difference is very vital, and the authorities, as I know and read them, are all on the side of the Japanese Government."

"What is the authoritative pronouncement then?"

"It is that when terms used in a compact have a different legal meaning within the two contracting States, they are to be construed in the meaning which is proper to them within the State to which they apply, or upon which the obligation is imposed."

"That brings us to an interesting position indeed, for if, as you say, the Japanese law separately considers 'land' from 'houses,' I do not see that the opponents of the tax have a leg upon which to stand, since the definition being disputed it must be interpreted under the Japanese code."

"Exactly. Concerning the leases in perpetuity, Japan stands in the position of being entitled to a reading of them according to Japanese law. It is needless to add that the right of taxation, being inherent in the Sovereignty of a State, knows nothing of extinction by disuse. The fact that the Japanese Government refrained from levying the House Tax prior to the New Treaties does not prevent it from imposing the tax or sanctioning the imposition by municipalities. So far as I can see, therefore, if my

point is sustained by the arbitration the House Tax will have to be passed as well within the authority of the Japanese authorities to levy."

"I cannot traverse your argument, Mr. Tachi, and shall be quite interested to watch whether the arbitration confirms your reasoning."

"I have, however, not quite exhausted the matter," Mr. Tachi said apologetically, possibly thinking my interest was flagging.

"Oh, don't let me lose any points you have to make. I am a tireless recording deity."

Too anxious apparently not to prolong my labours, I received for reply: "Only one more argument on my side and I will finish, but it is an argument which you and your countrymen will appreciate I am sure. It is: that strong presumption exists in favour of the right of taxation. That right is inherent in sovereignty. Until the contrary is positively established any particular State must be presumed to possess it. Consequently, legally speaking, there is nothing which prevents the Japanese Government from enforcing the House Tax, either pending the arbitration or prior to it, on the condition that it returns the sum levied in the event of the arbitrators deciding against the Government. At the same time, to those who would criticise the Japanese Government for imposing the tax without first arbitrating on their right to do so, I would suggest that allowance should be made for the Japanese being wishful to assert the prestige of sovereignty and the majesty of their own laws."

"Then you do not expect trouble, Mr. Tachi?"

"Trouble, no. My countrymen are imbued with what you designate a law-abiding spirit. They will accept the award in this matter, whatever it may be, but, as you will probably realise, I have little fear of the direction it will take."

As my readers know this is not the first occasion I have had of chatting with "one of our friends from the Far East," and I certainly trust it will not be the last, for admiration of the intellectual force which they are developing is almost beyond the powers to express even in the fairly wide vocabulary of

HERMES, in *Commerce*.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE KAISER IN ENGLAND.

London, Nov. 21.

The Kaiser has expressed himself as being highly gratified with his visit to England and has spoken with much gratification of the friendliness shown him by the English people everywhere.

SOUTH AFRICA.

Martial law has been repealed in the Orange River Colony and ordinances similar to those issued in the Transvaal have been substituted. Permits are retained but will be as little irksome as possible.

NEW GOVERNOR-GENERAL OF AUSTRALIA.

Shanghai, Nov. 22.

Lord Tennyson has been appointed Governor-General of Australia.

NARROW ESCAPE OF THE KAISER.

At Queensferry the Kaiser's horses shied at the colours of the Black Watch, but Lieut.-Gen. Archibald Hunter rushed to their heads and controlled them, thus preventing an accident.

THE RECENT SHIPPING DISASTER.

All hope for the missing boat of the *Elngamite*, containing thirty persons, has been abandoned.

BRITISH EDUCATION BILL.

The House of Commons has completed the committee stage of the Education Bill, to which some new clauses had been added. The closure was freely applied. Altogether the committee stage occupied 45 days. The Government secured very large majorities in all the divisions.

THE 9TH LANCERS.

Shanghai, November 23.

When the Indian Budget came before the House of Commons, Col. the Hon. H. Legge brought up the case of the 9th Lancers. Lord George Hamilton, Secretary of State for India, defended the collective punishment, which had been authorised by the highest military authorities in India. He said Britain's success in ruling the coloured races had been due to the fact that she established perfect equality of all races before the law.

MR. CHAMBERLAIN.

It is reported that Mr. Chamberlain visits Cairo for a day or two, also Aden and Mombassa, and that he intends to make a short trip on the Uganda Railway.

THE SUGAR CONVENTION.

Later.

The Government will introduce on Monday a resolution approving of the Sugar Convention. The Opposition will move a direct negative.

THE SUEZ CANAL BOARD.

The *Financial News* mentions a report that the British Government is about to propose to replace Stoces(?) Lee on the board of the Suez Canal and also to appoint a third representative, who will probably be Sir James MacKay.

SOMALILAND.

London, November 24.

Manning cables that his column has reached Garrero, fifty miles north-east of Boholte, whither they were about to proceed the same day with reliefs and provisions for the garrison.

KRUPP'S DEATH.

Krupp's death caused a great sensation.

SEVERE EARTHQUAKE.

A severe earthquake was experienced at Jamaica yesterday.

GREAT BRITAIN AND VENEZUELA.

London, November 25.

Great Britain is pressing several long-standing claims upon Venezuela, and it is understood she has given Venezuela a limited time wherein to comply.

ROOSEVELT AND THE TRUSTS.

President Roosevelt, in a speech delivered at Philadelphia, said the United States has to deal with many serious industrial questions, including the trusts, but they had the power and would find a way to solve them.

THE CENSUS.

London, November 26.

The quinquennial census, in reference to the mercantile marine, shows a decrease of British seamen of 7,155; the following are previous decreases: 2,558, 4,597; foreign seamen have increased since 1891 by 8,720, lascars by 12,288, the percentage of foreigners in the overseas trade being 20 in 1891 and now 26.

THE SUGAR CONVENTION.

The House of Commons has adopted the resolution approving of the Sugar Convention after an amendment by Sir W. Vernon Harcourt had been rejected by 213 to 126.

MR. CHAMBERLAIN.

London, November 27.

Mr. Chamberlain left Victoria Station in the royal train. He had a magnificent "send off," the platform being crowded by Ministers and members of the House of Commons. The cruiser *Good Hope* left Portsmouth at three in the afternoon; her first stoppage will be at Port Said on Dec. 3rd.

THE DUKE OF CONNAUGHT.

Later.

The *Renown* has left Malta for Genoa, to take on board the Duke and Duchess of Connaught, who go to India.

THE P. AND O. COMPANY.

The London *Telegraph* says that the P. and O. Company have decided to maintain their headquarters in the Thames, berthing their large new steamers in Tilbury Dock. The railway companies have made considerable concessions.

THE FRENCH MINING STRIKE.

All the French miners have returned to work, except those in the Loire basin.

HERR KRUPP.

Herr Krupp has been buried at Essen. The Kaiser followed the hearse on foot.

THE EDUCATION BILL.

Archbishop Walsh, on behalf of the Irish hierarchy, publicly condemns the Irish members for their failure to support the Education Bill.

(RECEIVED AT THE LEGATION OF FRANCE.)

SNOW IN EUROPE.

Saigon, November 21.

Snow has fallen prematurely in Paris and in most of the departments.

THE ITALIAN PRINCESS.

The Queen of Italy has been delivered of a daughter.

THE TROUBLE IN MOROCCO.

Saigon, November 23.

The cruiser *Du Chayla* has set out in the direction of Morocco, where occurred the trouble now actually terminated. The armoured cruisers *Chanzy* and *Amiral Pothuan* are ready to follow her.

THE FRANCO-SIAMESE TREATY.

Saigon, November 25.

The newspaper polemic on the subject of the treaty with Siam continues. Deputy Etienne, replying to articles in the *Temps*, demands that the negotiations be supplemented so as to include; (1) the tracing of the frontier as far as the littoral; (2) the autonomy of the provinces of Battambang and Angkor; (3) that the 25 kilometre zone on the right bank of the river Mekong be reduced to a servitude purely military; (4) the precise definition of the conditions necessary for qualification as a French citizen without including Chinese established in Indo-China and Cambodians residing in Siam; (5) the maintenance of French jurisdiction over all protected persons; (6) the definition of real advantages in place of vague promises with reference to public works.

(RECEIVED IN TOKYO.)

LAND SALES AT NEWCHWANG.

Mr. Segawa, Japanese Consul at Newchwang, telegraphs under date of the 23rd instant that 116 parcels of land adjoining the area sold by auction on the 14th inst., is to be rented to Japanese subjects from the 3rd of December. The upset price will be from 27 to 28 roubles per unit (2.16 square metres).

(FROM THE "JIJI SHIMPO.")

JAPAN AND RUSSIA.

London, November 19.

The *Novoe Vremya* publishes a Tokyo telegram announcing that the Japanese press agrees in opposing the naval expansion programme proposed by the Japanese Government.

FIRE IN GLASGOW.

A fire has occurred in Glasgow and the steamer *Sheda* (?) of the Anchor S.S. Company was burned.

FIRE IN ODESSA.

London, Nov. 20.

A fire which occurred in the Emanlochef kerosene reservoir at Odessa destroyed 750,000 poods of oil.

WIRELESS TELEGRAPHY.

M. Marconi announces that messages by wireless telegraphy have been successfully exchanged between Cornwall and Cape Breton. The Italian war-ship *Carlo Alberto*, during her voyage to Nova Scotia across the Atlantic, maintained communication with Cornwall.

THE GERMAN EMPEROR.

The Kaiser will leave England for home to-morrow.

VISCOUNT CRANBORNE.

Viscount Cranborne, Under Secretary for Foreign Affairs, in reply to a question of Mr. Henry Labouchere, in the House of Commons, declined to give a definite answer as to whether England had concluded a reciprocal treaty with a certain Power regarding Japan and China.

DEATH OF THE GOVERNOR OF BENGAL.

London, November 22.

The Calcutta press expresses profound regret at the death of Sir John Woodburn, K.C.B., Governor of Bengal. His funeral took place yesterday.

ACCIDENT ON THE DANUBE.

A steamer has been wrecked on the Danube and 30 persons were drowned.

PORTUGAL AND ENGLAND.

The Governor of Mozambique is about to pay a visit to Lord Milner, British High Commissioner, in Johannesburg.

ENGLAND AND GERMANY IN VENEZUELA.

President Castro of Venezuela has raised a protest against England in consequence of that Power having dispatched a war-ship to the Orinoco river. He regards this as an infringement of

the sovereignty of Venezuela. In the meanwhile Germany is assuming a strong attitude in pressing her demands against Venezuela. Great Britain refuses to give her consent to the blockading of the Orinoco.

RUSSIAN MINISTER OF FINANCE.

London, November 24.

M. de Witte, Russian Minister of Finance, as a result of his recent tour, believes that Dalny will become the leading railway station in East Asia, and recommends that place, instead of Port Arthur, as the terminus of the Trans-Siberian Railway.

FROM LONDON TO JAPAN.

The International Wagonlit Company proposes to carry mail matter between London and Japan within 15 days by way of Siberia.

SOMALILAND.

Lord Kitchner held a conference on board his steamer at Aden with regard to the Somaliland affair.

SOUTH AMERICAN TROUBLES.

A peace conference relative to the South American troubles has been held on board the United States war-ship *Wisconsin*.

(FROM THE "JAPAN HERALD.")

THE U.S. AND THE PHILIPPINES.

London, November 21.

President Roosevelt has declared that in no other Oriental country, whether ruled by Asiatics or Europeans, is there anything approaching the individual liberty and self-government thus the Filipinos now enjoy.

NEW SPANISH MINISTER TO CHINA.

Senor Pamon Pena has been appointed Spanish Minister to Peking.

CHINA.

London, November 23.

It is rumoured that Sir Ernest Satow has been summoned home for the purpose of a conference which is likely to have important consequences.

THE CHINESE EASTERN RAILWAY.

St. Petersburg telegrams state that, in consequence of M. de Witte's tour in the Far East, Dalny has been selected as the terminus of the main line of the Chinese Eastern Railway, instead of Port Arthur.

THE ESSEN IRON WORKS.

London, November 24th.

Herr Krupp has willed the Essen Iron Works to his widow, with a proviso that the Works are not to be sold or transferred to a Company within twenty-five years.

Herr Krupp's daughter will inherit the property on the widow's death.

THE ANGLO-JAPANESE TREATY.

London, November 25.

Mr. Labouchere in the House of Commons asked Viscount Cranborne, the Under-Secretary for Foreign Affairs, whether there were any secret clauses attached to the Anglo-Japanese Treaty, and whether any pledges or assurances had been given which were unknown to Parliament.

Viscount Cranborne made an evasive reply.

THE EVACUATION OF SHANGHAI.

The *Standard's* Berlin correspondent reports that the German Commander at Shanghai has been instructed to come to some understanding with the English and French Commanders as to a simultaneous evacuation of the city.

(FROM THE "N.-C. DAILY NEWS.")

OOM PAUL'S MEMOIRS.

London, via Bombay, Nov. 17.

Mr. Krüger's Memoirs are to be published tomorrow. They do not contain any sensational revelations, but they mention that Mr. Rhodes visited Mr. Krüger at Pretoria during his second term as President of the Transvaal Republic.

Later.

Mr. Krüger's Memoirs mention that Mr. Rhodes said when visiting Mr. Krüger: "We must work together," and suggested securing Delagoa Bay as the seaport for the Transvaal.

Mr. Krüger refused unless Portugal was willing to sell, and denounced the wickedness of grabbing.

Mr. Rhodes then ceased his overtures.

THE ESCAPE OF KING LEOPOLD.

London, November 17.

It is surmised that Rubino fired at the third carriage, because the King usually took that position. His riding in the first carriage on this occasion was quite exceptional.

AN UNACCOUNTABLE BLUNDER.

London, November 18.

The Brussels police arrested Mr. Keir Hardie, M.P. for Merthyr Tydvil, in the course of a search for anarchists. He was released after enquiry.

ANOTHER VICTORY FOR LABOUCHERE.

Mr. H. Labouchere, Editor of *Truth*, has secured the verdict in the libel action brought by Mr. Cowen, promoter of the Article Club, and of the periodical styled *Commerce*.

THE KING OF PORTUGAL'S VISIT TO ENGLAND.

The King of Portugal landed at Dover yesterday afternoon, and went direct to Windsor to visit King Edward.

ALL QUIET AT THE CAPE.

London, November 19.

The Cape Parliament is prorogued to the 15th of January.

A HINT TO OOM PAUL AND HIS FRIENDS.

It is stated at Brussels that the British Government has informed President Krüger and the former delegates of the Boer Republics that their decree of banishment will remain in force until the return of Mr. Joseph Chamberlain, with whom the revocation of the decree rests.

TRIAL OF LIQUID FUEL IN THE NAVY.

The British Admiralty has ordered that a portion of the boilers on the cruisers *Beiford* and *Arrogant* are to be fitted with appliances for the consumption of liquid fuel.

A B.-P.-O. NOT REQUIRED AT PEKING.

London via Bombay, November 20.

Mr. Austen Chamberlain, Postmaster-General, replying to Mr. Henniker Heaton in the House, said that his enquiries had satisfied him that a British Post Office at Peking was unnecessary.

NEW PAYMASTER-GENERAL.

Sir Savile B. Crossley has been appointed Paymaster-General vice the Duke of Marlborough.

RECRUITING FOR THE ARMY.

London, November 21.

The Hon. St. John Brodrick, Secretary for War, replying to a correspondent, said that since the war 21,520 regulars and 15,298 militia had been recruited. The standard of height for the Hussars had been raised two inches.

BAD COMPLEXIONS

Dry Thin and Falling Hair and Red Rough Hands Prevented by

CUTICURA SOAP

MILLIONS use CUTICURA SOAP, assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative, antiseptic, cleansing purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the toilet, bath, and nursery. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA OINTMENT, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odours. No other medicated soap is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the BEST skin and complexion soap, and the BEST toilet and baby soap in the world.

COMPLETE EXTERNAL AND INTERNAL TREATMENT FOR EVERY HUMOUR,

Consisting of CUTICURA SOAP, to cleanse the skin of crusts and scales, and soften the thickened cuticle; CUTICURA OINTMENT, to instantly allay itching, inflammation, and irritation, and soothe and heal; and CUTICURA RESOLVENT PILLS, to cool and cleanse the blood. A SINGLE SET is often sufficient to cure torturing, disfiguring humours, eczemas, rashes, and irritations, with loss of hair, when all else fails. Sold throughout the world. Australian Depot: R. TOWNS & Co., Sydney. British Depot: 27-28, Charterhouse Sq., London. French Depot: 5 Rue de la Paix, Paris. POTTER DRUG AND CHEM CORP., Sole Props., Boston, U.S.A.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, odourless, economical substitute for the celebrated Liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humour cures. Put up in screw-cap pocket vials, containing 60 doses. CUTICURA PILLS are alterative, antiseptic, tonic, and digestive, and beyond question the purest, sweetest, most successful and economical blood and skin purifiers, humour cures, and tonic-digestives, yet compounded.

YOKOHAMA: SATURDAY, DECEMBER 6TH, 1902.

DEATH.

Died, on Thursday, December 4th, 1902, at 10.45 a.m., ALFRED E. BUCK, Envoy Extraordinary and Minister Plenipotentiary of the United States of North America to Japan.

SUMMARY OF NEWS.

HEAVY snow fell at Sapporo on the afternoon of the 2nd inst.

MAJOR-GENERAL Fukushima will return to Tokyo on or about Dec. 10th. He was expected to reach Hongkong on Nov. 30th from India via Singapore.

A SCHEME is on foot in the town of Fukui for opening an automobile car service between Fukui and Katsuyama. The plan is backed by an American.

THE death is announced of Mr. R. Clark, "shore gunner" of the P. & O. Company at Kobe. Mr. Clark was a native of Poole, Dorset-

shire, and was 62 years of age. He had been in the service of the company for some forty years, of which twenty were spent in Kobe.

FIRE broke out at Mera-mura, Himi-gori, Toyama prefecture, on the night of the 1st inst. Forty houses were destroyed, including a primary school.

THE Imperial yacht *Hatsukaze* which was recently presented to the Crown Prince by the Mitsu Bishi & Co., left Shinagawa Bay on Nov. 26th for Yokosuka, where she will remain for some time.

SHORTLY after 11 p.m. on Nov. 14th fire occurred in the store-house quite close to the Tsurugigasaki lighthouse on Miura cape, Sagami province. Fortunately the fire was confined to the house in which it originated.

THE Imperial Household of Japan received on Nov. 27th a telegram from the Kaiser offering congratulations upon the marriage of Prince Yamashina and Lady Tsune-ko. A message of thanks was at once dispatched to the German Court by His Highness.

In compliance with the request of the citizens of Nagoya, the Railway Bureau will shortly undertake the work of extending Nagoya Station with the object of finishing it by March next year. This step is due to the rapid growth of business in that city.

THE Osaka Shosen Kaisha steamer *Yoshii Maru* ran aground near the mouth of the Tsuda river, Tokushima prefecture (Inland Sea), about 9 p.m. on Nov. 27th. The passengers and cargo are reported to be safe. A salvage party was at once dispatched from Kobe.

HIS Excellency Baron Komura, Minister for Foreign Affairs, gave a dinner party at his official residence on Dec. 2nd to which Mr. Tanaka, Minister for Household Affairs, Mr. K. Inoue and his wife, the German Minister, Baron Aoki and others were invited.

ON the afternoon of Nov. 29th fire occurred in a minor temple in the compound of the West Hongan temple, Kyoto. For a time considerable anxiety was felt lest the temple itself should be wrapped in flames, but fortunately the fire was confined to the building in which it originated.

AN emigration establishment calling itself the Nippon Shokumin Kabushiki Kaisha (Japan Emigrants Joint-stock Company) has been organized in Yokohama under the auspices of Mr. Taki Nobushira, of Nagoya, Mr. Yokoi Tokio, ex-President of the Doshisha in Kyoto, and several others.

A MEETING with reference to the election of the Mayor of Yokohama was held on Dec. 2nd at Mr. F. Watanabe's residence in Yokohama, but the members dispersed without arriving at any decision as the negotiations between the land-owners' party and the merchants' party are still unsettled.

A GUNNER of 89 Company R.G.A., stationed at Stonecutters' Island, Hongkong, took a book and a lighted candle into a match on the night of the 20th ult. and read himself to sleep. The

match caught fire and the artillery-man was burned to death. He was found the next morning under a heap of charred debris, all that was left of the match.

THE ceremony of unveiling the statue of the late Lieut.-General Prince Kitashirakawa, which was fixed to take place on Nov. 28th in the compound of the barracks of the Imperial Body Guards, has been postponed until next year owing to the indisposition of Princess Kitashirakawa Hiroko, the youngest daughter of the deceased Prince.

THE subscribers to the telephone in Tokyo having now attained the number of 20,000, the Department of Communications is about to lower the fee. The Tokyo Municipal Council, however, has decided that the subscribers should be more heavily taxed. It is stated that the Department of Communications will proceed in spite of this decision.

ON the evening of Nov. 28th the officials of the Department of Agriculture and Commerce and others interested in the St. Louis Exhibition had an opportunity of seeing a magic lantern display illustrative of the exhibition, the performance being given in the hall of the Department. The pieces displayed were minutely explained by Mr. James W. Davidson, whose utterances were ably interpreted by Mr. Henry Sato.

A SHANGHAI telegram dated Nov. 29th, received by the *Jiji*, says that His Excellency Sir Ernest Satow, British Minister to China, arrived at Shanghai on that day on his way to England, while Mr. Odagiri, Japanese Consul-General in Shanghai, started for Nanking on the night of the 28th. The foreign troops in Shanghai have received orders of withdrawal from their respective Governments and it is expected that the British force will evacuate the place on Dec. 20th.

A MAN named Morita Rikizo, aged 25, gave himself up to the Nagasaki police on Nov. 26th after having made a murderous attack on his former wife and her adopted mother. After assaulting the women with a sword and inflicting severe, though it is thought not fatal, wounds, he turned the weapon on himself but failed to accomplish mortal injury. Jealousy is put down as the cause of the affair.

WITH regard to the proposed formation of a syndicate by Japanese tea merchants, it is now stated that the general organization meeting of the body will take place on or about Dec. 5th in the Taitokan Hall in Shizuoka. The title of the syndicate is said to be the Seicha Yushitsugyo Domei-kai ("Tea Exporter's Union"). Its office will be in Yokohama, while branches will be opened in Kobe and Shizuoka. The business of the syndicate will practically commence in the spring of next year.

WE read in London papers that Lord Ribblesdale, accompanied by the Japanese Minister, Viscount Hayashi, opened a Japanese bazaar the other day in the Fulham Congregational Church, with the object of liquidating a debt of £2,500 on the building. His lordship, in his opening remarks commented on the smart appearance of the bazaar and the change which had come over such efforts as compared with the old days, when the only articles supplied were black velvet smoking caps or landscape pictures depicting a river, a bridge, and cows in the foreground. Viscount Hayashi responded to a hearty vote of thanks, and briefly expressed his gratitude for the reception they had given him.

DEATH OF H. E. COLONEL BUCK.

This sad event took place at 10.45 a.m. in the park of the Shiba Detached Palace, whither His Excellency had gone by invitation to form one of a duck-hunting party given by the Emperor. For several years Colonel Buck had suffered from a weak heart, and at times his condition inspired uneasiness. But during the past few months he enjoyed exceptionally good health, and although a slight hemorrhage from the lungs took place three weeks ago, its effects soon disappeared. On the morning of the 4th, he seemed to be well and in excellent spirits, nor did his appearance suggest to any of those present at the Palace party that cause existed for solicitude. He joined in the amusement of netting ducks, but just as, after the capture of one bird, he was turning round merrily to renew the pastime, he fell to the ground without a word or a groan and died instantaneously. Mrs. Buck was not present, being confined to her room by a cold. All possible measures to restore animation were adopted immediately under expert direction but the heart never beat again. The body was carried to the United States Legation in the evening. Colonel Buck was in his seventy-first year. A strenuous political career had aged him prematurely, and for a long time it had been evident to his intimate friends that his tenure of life was frail. He was a man of rare beauty of disposition. None that knew him could fail to love him, and he leaves behind him in this country a memory that will long be cherished.

POLITICAL GOSSIP.

Saturday, Nov. 29.

Marquis Ito arrived at Oiso from Kyoto on the morning of the 27th instant, and proceeded to Tokyo the same afternoon in order to be present at the dinner given in the Hama Detached Palace to celebrate the wedding of His Imperial Highness Prince Yamashina. The Marquis remained in Tokyo that night and attended a garden party at the residence of Count Inouye on the 28th instant.

As to the political situation, conjectures are still rife but nothing certain, or even approximately certain, is known about the issue. There can be no doubt that Marquis Ito disclosed his views fully to Marquis Yamagata when the two statesmen met in the latter's villa at Kyoto, and that Marquis Yamagata conveyed the gist of the interview to Count Katsura in Kobe. Beyond that everything is nebulous. Count Katsura continued his journey northward by the *Saikyo Maru*, and reached Tokyo at noon on the 28th. It is expected that he will meet Marquis Ito in the capital, and it is widely conjectured that matters of much greater importance than the mere continuance of the land-tax rate have to be discussed. Another view, pretty generally held, is that, after conference with Count Inouye, a source of revenue sufficient for purposes of naval increment has been found independent of the land tax. We do not venture to express any opinion, though we are inclined to be sceptical on that point—sceptical, at all events, to the extent of doubting whether the supposed source could be made available without measures which the Cabinet may be unwilling to take. Perhaps it may be added with

confidence that Marquis Ito desires to avoid a ministerial crisis, and will endeavour to bring about a compromise if that be possible.

The *Kokumin Shimbum* publishes the gist of some remarks recently made by Marquis Ito to a friend. The Marquis sets out by repeating the truism that a country's enterprises of every nature must be commensurate with its resources. He laments the fact that superficialism and rashness seem to be prevailing defects of Japanese economical society now-a-day, and he declares that no scientific diagnosis is required to determine whether the country's condition is healthy or unhealthy. Looking back across the long vista of years comprised in his experience, he recalls that he has been thrice required to deal with difficult financial conditions: once at the commencement of the *Meiji* era; once in 1877, after the rebellion in the south, and once again at the present epoch. This last occasion is the most perplexing in consequence of the greatly widened range of affairs that demand consideration. It is plain that far-reaching investigation and profound reflection must be exercised under such circumstances, and that a responsible statesman's duty is to keep his mouth closed until he can speak with assurance. Freedom of utterance is one of the prominent features of constitutional government. Therefore the Marquis does not complain because his followers in the *Seiyu-kai* have been expounding their views without any reticence. But he intends to keep his own lips sealed until the words that are ultimately to issue from them have been fully weighed. To this *resumé* may be added the contents of a paragraph in the *Shogyo Shimpō* where the Marquis is represented as comparing himself to a horse enclosed in a glass case. If he moves his head or any of his limbs, something is smashed. So he proposes to keep quiet.

Monday, Dec. 1.

Various rumours continue to be published about the political situation. They are evidently pure conjectures. Marquis Ito has not yet spoken definitely, and until he speaks there can be no clear light. Everything goes to indicate, however, that his present intention is to find some way of preserving the naval increment scheme independently of the land tax. A few days more must remove all doubt as to his final attitude.

Meanwhile it is definitely denied that any credit can be placed in a recently circulated story to the effect that the Marquis had indicated the Departments of War and of the Navy as the places where administrative reconstruction and financial reform must commence. He has not, it is now alleged, made any such statement. Neither has he used words attributed to him by other newsmongers, to the effect that he promised his support to the present Cabinet on certain conditions, and that he must withdraw his support unless the Cabinet now accepts his views. That is a canard having for its obvious parent a desire to discredit the Katsura Ministry by representing it as holding office on sufferance.

On the whole, although there have been many tales circulated, we find it surprising and significant that so little attempt has been made to amass political capital at the expense of the Ministry in power. Much of that apparent forbearance is due, of course, to the tact and skill shown by Count Katsura and his colleagues in the management of State business. Their enemies can not find any handle to attack

them. But something is also attributable to the strength of the conservatives. The liberals, by which term the *Seiyu-kai* may be designated, know that their chief, if not the only, title to power is the possession of a majority in the Lower House; a title by no means sufficient for the smooth conduct of public business. They shrink, therefore, from taking office at once, and their timidity inspires some forbearance towards their rivals.

The above represents the state of public opinion on this subject up to the evening of the 28th ult. Thereafter a change is said to have occurred, and the present belief is that the situation can not be adjusted on lines of compromise. Marquis Ito's idea, apparently, is to restore the land tax to its original figures and to obtain funds for naval increment from other sources, supplementing any deficiency by issuing loan bonds. Such, at all events, is the programme attributed to him by Tokyo journals. On the other hand, Count Katsura's policy is to dispense altogether with loans and to defray the State's expenditures entirely out of current income. Here, then, is a radical difference of opinion which, according to "the man in the street," can not be adjusted. But if two parties to a dispute are willing to find a way of compromise, they generally succeed. What people want to know, therefore, is Count Katsura's mood. With his usual sagacity the Premier keeps himself quietly in the background. We hear a great deal about what this statesman thinks or that statesman says, but as to Count Katsura's views, though they are all-important, no one undertakes to enlighten the public. What we ourselves believe is that he will not make any large sacrifice for the sake of remaining in office. He would be more than human if he did not reflect that those who render administration impossible for him are morally bound to undertake the duty themselves, and he would be much less sagacious than he is if he did not know that the people of Japan appreciate nothing more than timely self-effacement.

Tuesday, Dec. 2.

Marquis Ito has had a long interview with Count Matsukata, and he has also been visited by the members of the *Seiyu-kai's* Standing Committee, to whom he is said to have made a general statement of his views, with the result that His Excellency and the Party leaders are believed to be in general accord. It was reported that the Marquis was to meet the Ministers of State on the 1st instant, and rumour says also that the Cabinet is divided into two sections, one of which, headed by Admiral Yamamoto, favours a strenuous attitude, extending even to the dissolution of the Lower House; while the other, headed by Count Katsura, advocates resignation, so that the opponents of the Ministry may have an opportunity to carry out their own theories.

We mention these statements because they are in the air. But the fact is that nothing definite is likely to be known before the 4th instant, when a general meeting of the *Seiyu-kai* is to be held, and when Marquis Ito will announce his views either in writing or orally.

Professor Tomizu has been proclaiming bellicose views at a meeting of the Korean Association (*Chosen Kyokai*) in Tokyo. The Professor's idea is that Russia's southward advance via Liaotung and Korea, and her movement towards Peking via Mongolia, must inevitably bring her at last into collision

with Japan, and that instead of waiting to fight her until she is ready to open the lists, the wisest plan would be for Japan to throw down the gauntlet while her foe is still comparatively unprepared. It can not be charged against Professor Tomizu that he stands forth as the sole exponent of an extravagant view. Several European publicists have attributed to Japan, as a matter of reason, the ideas now ventilated by the Professor, and have even urged that she would be nationally unwise did she fail to see this aspect of the problem. We do not imagine, however, that Professor Tomizu is likely to obtain any large following, or that his special form of patriotism will be translated immediately into action.

Wednesday, Dec. 3.

Marquis Ito visited Count Katsura at the latter's official residence on the 1st instant. Tokyo journals differ as to the preliminaries of the meeting, but truly it is a matter of very small importance whether the Marquis proposed to go to the Count or the Count invited the Marquis. At all events, the mountain went to Mahomet. At the Premier's residence were Admiral Yamamoto, Baron Sone and Baron Utsumi. The conference lasted from 10 a.m. until 2 30 p.m., with an interval for luncheon, and was followed, after Marquis Ito's departure, by a discussion among the four Cabinet Ministers until 4.20 p.m. Nothing precise is known as to what passed, but there is tolerably general agreement that Marquis Ito expressed disapproval of the proposal to continue the land tax at its present rate. He considered that the voice of the nation had been heard with sufficient clearness on that point, and that it would be unconstitutional to disregard the people's desire. The land tax, he added, is one of the chief items of State revenue in Japan. In times of emergency it can always be drawn upon for ten, twenty, or thirty million *yen*. But there must be urgency to warrant such a step, and in the present instance urgency can not be said to exist. For though the programme of naval expansion is commendable and can not be called excessive, means of carrying it into operation can be found independently of the land tax, if not immediately, then next year. The means contemplated by Marquis Ito seem to be reduction of the expenditures planned by the Cabinet in other directions, notably in that of railway construction. Our readers have probably noticed that allusions have been frequently made of late to a project of railway extension involving an outlay of 130 million *yen* spread over 10 years. It may be well to explain what that project means.

In the *post bellum* programme of 1896, a sum of 94,800,000 *yen* was set down for railway extension and another sum of 26,400,000 *yen* for railway improvement; of which amounts 67,800,000 *yen* and 26,900,000 *yen* respectively, were to be expended by the end of the 34th fiscal year (March 31st, 1903), leaving only some 30 millions for subsequent expenditure. But the work did not proceed as rapidly as had been anticipated, partly owing to mistakes in projects and partly owing to the appreciation of commodities. Thus the line from Hachioji through Kôshu and Shinshû, which stood in the estimates for 27 million *yen*, has already cost 20 millions and is not yet half finished. Under these circumstances the present Cabinet proposes to add to the 30 millions remaining from the old programme another sum of

100 millions, the total, namely 130 millions, to be spread over a period of 10 years, next year's expenditure being 13,300,000 *yen*, namely, 10,670,000 *yen* for construction purposes, and 2,630,000 *yen* for improvement purposes. As to the lines on account of which these outlays are to be incurred, they are:—

	Yen.
The O-U Railway (Awamori to Echigo, &c.)	3,600,000
The Central Railway (Hachioji, &c.)	2,950,000
The Kure Railway	620,000
The Shinonoi Railway	120,000
The Kagoshima Railway	1,140,000
The Maizuru Railway	600,000
The Sanin-Sanyo Junction Line	1,640,000

The expenditure on account of Railway Improvement includes an item for connecting the sea and land communications at Kobe and Yokohama, and an item for doubling the Tokaido line.

Marquis Ito is of opinion, apparently, that this programme is not so pressing as that of naval increment, and that some of the funds destined for the former might advantageously be diverted to the latter. He is said to have indicated other sources of revenue also, but as to that the reports are vague. All accounts agree that nothing like a conflict of views took place at the conference. Marquis Ito merely explained his ideas in a friendly manner, and his hearers refrained from giving any expression to their individual convictions. On the 2nd, however, a Cabinet meeting was to be held for the purpose of discussing the matter.

It is evident that if all this be true, a very difficult situation is created for Count Katsura's Ministry. To accept and give effect to Marquis Ito's views would necessitate material modifications of the Budget, which must be placed in the hands of the two Houses on the 8th instant at latest. Grave doubts are entertained whether a compromise can be found along such lines. Opposition journals go so far as to report that Marquis Ito has informed the *Seiyu-kai's* Committee that a conflict with the Cabinet is inevitable, and urged them to marshal the Party with a united front. But such assertions do not command credence. If Marquis Ito has decided to oppose the Ministry, he has no occasion to incite the *Seiyu-kai* to activity. What seems certain, however, is that the Marquis assembled the committee on either the 30th ultimo or the 1st instant, and laid before them his views, at the same time enjoining secrecy for the present. The 4th instant is fixed for the general meeting of the Party, and then, of course, the grand issue must become apparent.

Another tolerably unanimous report is that Marquis Ito and Count Matsukata have had a conference at which a difference of views was developed. Count Matsukata is represented as being a staunch advocate of continuing the land tax at its present rate, and also of increasing the navy. He agrees, however, that works of railway and telephone development may be postponed, and he insists that any funds economized should be applied to riverine improvements, his view being that the ten millions accruing from the increased land tax are a mere bagatelle compared with the money lost every year by inundations.

Thursday, Dec. 4.

The progress of events, now rapidly approaching a climax, does not bring any new revelations. We are to-day in possession of the gist of what passed between Marquis Ito and four representatives of the Cabinet, including the Premier, at the latter's official residence on the 1st instant. But, in truth, the nature of the interview might have been

accurately inferred from previously announced facts. Marquis Ito declared himself emphatically favourable to the scheme of naval expansion. His interpretation of the nation's mood and his reading of the signs of the times compelled him to advocate that measure. He went even so far as to say that he would have advocated something larger had the country's resources permitted. But when the problem of ways and means had to be considered, he differed from the Cabinet. No doubt the continuance of the land tax at its present rate seemed the simplest and least onerous method of obtaining funds. There could be no question, however, that the country was opposed to that procedure. The recent general election had furnished a clear index to public opinion. Hence, while Marquis Ito carefully refrained from querying the abstract propriety of recourse to the land tax for such an object, he felt compelled to conclude that the time was inopportune for that course. It appeared to him that there should be no insuperable difficulty in obtaining the necessary funds by recourse to revenue accruing from the other increments of taxation voted in recent years. He thought that whatever financial embarrassment Japan felt must be attributed in the main to the extravagant spirit that had overtaken Government and people alike after the war of 1894-5, and from that point of view he was unable to endorse the large programme of railway and telephone extension planned by the Cabinet. Telephones were undoubtedly useful instruments of communication, but country folks could dispense with them for a little longer. In brief, therefore, his view was that while the programme of naval expansion should be pushed forward by all means, the land tax ought to be restored to its original rate, and funds should be obtained for naval purposes by cutting down expenditures in other directions. The Marquis took care to explain that any conflict observable between his views and those of the Cabinet must not for a moment be attributed to the fact that he had not previously been consulted by the Ministry. The Cabinet was the Emperor's Cabinet. No obligation devolved on it to take any outsider into its confidence. On the other hand, recognising that proper autonomy, he himself would most gladly defer to the Cabinet's opinions wherever such a course was possible. But he had no choice where a definite difference of opinion became apparent.

We take these details from the *Nichi Nichi Shimbun*, which is usually quite trustworthy in such matters. The same journal alleges that the reply of the Cabinet Ministers was very brief. They simply said that having elaborated their financial programme in concert and having obtained the Imperial sanction for it, they could not now make any change. Thereafter both sides refrained from any discussion, and the meeting resolved itself into an ordinary luncheon party.

It will be observed that Marquis Ito does not at all condemn the policy of recourse to the land tax: he merely denies that the moment is appropriate. Thus the gulf dividing him and the Cabinet is apparently narrow, but to bridge it the Ministry would have to make a second concession, namely, the abandonment of its programme of railway and telephone expansion.

The Standing Committee of the *Seiyu-kai* held a meeting on the afternoon of the 2nd instant for the purpose of receiving a communication from Marquis Ito. Its gist may be gathered from what is written above, with the addition that the Marquis hinted

at the probability of a collision with the Cabinet.

Meanwhile the Progressists have spoken. They are frankly in favour of naval expansion, but they oppose the continuance of the land tax and they condemn the Cabinet's plans for the extension of railways and telephones. It is now asserted by Japanese readers of public opinion that the nation, as a whole, may be said to be in favour of naval expansion. As for the apparently contradictory fact that certain leading members of the *Seiyu-kai*—Baron Suyematsu, Mr. Ozaki Yukio, Mr. Matsuda Masahisa and Mr. Hayashi Yuzo, for example—have declared themselves hostile to the increment scheme, it is explained by saying that these men announced their own individual views only, and that the Party does not endorse them. Everything is explicable if it be approached with a sufficiently liberal mind.

Among the "Elder Statesmen" Count Matsukata favours the Cabinet's programme and Count Inouye is with Marquis Ito. Count Inouye, in his capacity of head of the *Yuraku-kai*—an association of which the Mitsui section of the business world are the backbone—is said to have compiled a financial statement which has been submitted to Marquis Ito.

The opposition journals naturally claim that a split has occurred in the ranks of the Meiji Statesmen, Marquis Ito with Count Inouye being ranged on one side, while Marquis Yamagata and Count Matsukata stand on the other.

The *Kokumin Shimbun* may be said to have "thrown aside the spoon"; in other words, to have given up the case. It thinks that a collision is inevitable. The *Jiji Shimpō* thinks so too, but with the reservation that it will not be a destructive collision. The *Jiji's* astute idea is that the Meiji Statesmen will be anxious to avoid any disruption of their union and that the House of Representatives will shrink from the risk of dissolution. Hence there will be a small contest and then Marquis Ito will step into the arena bearing an olive branch.

It is plain that the resolutions adopted by the Progressists are the same, in all essentials, as the views expressed by Marquis Ito. Such a fact is quite sufficient to suggest to the sensation-mongers that a meeting is about to take place between Marquis Ito and Count Okuma, and that a big current is setting beneath the surface of the political sea. We should think that Marquis Ito finds the *Seiyu-kai* quite unwieldy enough already without any addition of a Progressist element. He has had sufficient experience of the dog wagged by its tail.

Friday, Dec. 5.

The situation remained unchanged up to yesterday morning. Nothing of any special importance had occurred during the preceding twenty-four hours except that Count Katsura, returning Marquis Ito's visit at the latter's temporary residence in Torii-zaka, repeated the Cabinet's inability to make any radical change of policy at this eleventh hour. That might have been anticipated. If a compromise is to take place—and at present there are no apparent evidences of anything of the kind,—it must be at a later period. The members of the *Seiyu-kai* are determined to fight if they are permitted to enter the arena. Their determination has been evident for some time. But we are much mistaken if the nation credits them with any motive of a particularly high or patriotic nature. No

soberly thinking person imagines that the people will be rendered sensible of any improvement in their condition as a result of reverting to the old rate of land tax. There is nothing in that, nothing, at all events, beyond a mere pretext for fighting. The *Seiyu-kai* want to occupy the seats of power, and they are ready to mount any steed capable of carrying them to that goal. Their mood is natural. It is the mood of political parties the world over. But their sagacious leader knows well that if administration was difficult for him as a party leader two years ago, it will be more difficult to-day. The opponents of party cabinets can now take their stand upon accomplished facts. They can justly claim that neither the coöperation of the *Seiyu-kai* nor the opposition of the *Kensei Hon-to* is essential to the competent discharge of governmental duties. No Ministry could have made a fairer record than the Katsura Ministry has made, and the House of Peers will now be able to say that their reluctance to entrust the management of state affairs to a political party virtually independent of the Imperial mandate, can not possibly be stigmatized as an obstacle to good administration. Marquis Ito, then, if he returns to office, may have the chagrin of finding himself practically impotent for legislative purposes. He will be able to carry his measures by acclaim in the Lower House, but the Upper will look askance at everything coming to them with the *Seiyu-kai's* cachet. It is there that the strength of Count Katsura and his followers lies; for Count Katsura must now be regarded as virtually the head of the conservatives. It is a curious position, in one sense, for at heart and by his record the Count is one of the most liberal of Japanese statesmen.

A meeting which took place between Marquis Ito and Count Okuma at Mr. Kato Takaaki's "festive board" has set the tongue of rumour wagging. People actually talk as though a coalition of the *Seiyu-kai* and the *Kensei Hon-to* were a probable contingency, and actually assign as a reason the evident resemblance between the programmes of the two parties at the present juncture. It seems singular that these observers do not take cognisance of two very obvious questions, namely, what could the *Seiyu-kai* gain by combining with the *Kensei Hon-to*, and when has it happened that coincidence of principles was held a valid reason for combination of parties in Japan? The *Seiyu-kai* is numerically quite strong enough to control the situation in the House of Representatives, and since it is fighting for power, its members will be naturally unwilling to take superfluous partners who would claim a share of the spoils. As for similarity of platforms, the difficulty hitherto experienced by outsiders in analysing Japanese politics, has been to discover, not points of agreement, but points of difference, between the various parties.

Yesterday two important meetings, took place: general meetings of the members of the two big parties. Marquis Ito was expected to speak at the *Seiyu-kai* meeting and Count Okuma at that of the *Kensei Hon-to*. Before going to press we shall probably have news of what took place.

Later.

Since writing the above we have received news of the resolutions passed at the *Seiyu-kai's* meeting, but it is not possible to give any details of Marquis Ito's speech in this issue. The resolutions were:—

1. The administrative and financial reforms which the Government undertook to carry out are not considered sufficient.

2. Inasmuch as there is reason to fear that the Government's financial policy is not in accord with the country's economic condition, therefore the extensive public works already undertaken must be reduced as far as possible, and the works newly contemplated must be deferred until ample means to carry them out are provided by financial reform.

3. Naval expansion is approved, but resources for the purpose must be obtained by economizing other administrative expenditures, and the programme must not be carried out without due measures to prevent an excessive outflow of specie.

4. No necessity is apparent for continuing the increased rate of land tax beyond the time originally fixed by law.

5. Bills tending to increase administrative outlays should neither be presented nor supported.

The above resolutions, having been drafted by the Standing Committee and approved at a meeting of the Party's parliamentary members, were subsequently presented to the general meeting and adopted unanimously.

Count Okuma, speaking through the *Asahi*, indicates with his usual perspicacity the real inwardness of the situation. All the talk, he says, about reorganization and retrenchment springs ultimately from the conflict between oligarchical and constitutional government. That is the true issue at stake, and since the nation has been granted a constitution, it will never be content until it sees its own representatives in the seats of power. A Cabinet of oligarchs may propose excellent measures, as all bodies of clever men are able to do, but no measures elaborated by it will ever be appreciatively welcomed by the friends of constitutionalism. Whatever steed be saddled for the race, there can be no doubt about the goal for which each is struggling.

All of which, however hackneyed, is absolutely true. But on the other side of the account there stands one big item, namely, that the nation has probably less confidence in political parties now than it ever had. What would happen to the *Seiyu-kai* if Marquis Ito severed his connexion with it? How many men worthy of public trust would remain in its ranks?

The Kwanto parliamentary members represent an important section of the *Seiyu-kai*. They are the section that used to deploy into line under the leadership of Mr. Hoshi Toru. On the 3rd instant they met in Tokyo and adopted a resolution declaring themselves radically opposed to naval increment. These gentlemen were well aware before they came together that the leader of their party, Marquis Ito, had already declared himself most unequivocally in favour of naval increment. They have thus offered another example of the insubordination distinguishing the big Party's doings at this crisis. In the first place, its Standing Committee adopted important resolutions off their own bat, and then conveyed them to Marquis Ito, as though it was for them to dictate his policy, not for him to suggest theirs. Then the branches of the *Seiyu-kai* throughout the empire voted that a Ministry which had violated its pledges as to administrative reconstruction and financial reform could not be trusted to carry out other programmes, whereas Marquis Ito himself has carefully refrained from invoking the aid of these bogies. And now we have the Kwanto members publicly announcing themselves hostile to a national measure which Marquis Ito, with almost equal publicity, has approved. It must be confessed that such a want of discipline, such a flagrant display of insubordination, does not tend to enhance the *Seiyu-kai's* reputation for practical administrative purposes. Marquis Ito and his lieutenants have a hard task.

CHINESE NEWS.

Saturday, Nov. 29.

The reliefs of the Japanese troops stationed in North China have landed and their predecessors are to return immediately to Japan. The places where these troops will be stationed remain as hitherto, namely, Tientsin, Peking, Shanhaikwan, Taku and Chingwan-tao. With the exception of a reduction of the Shanhaikwan garrison by one company, there will be no change of arrangements. Lieut-Colonel Harada succeeds Major Okuno in the command.

The *Dai-ni Nagata Maru*, a steamer (305 tons) belonging to the Oguri-gumi, left Newchwang on the 19th instant with 700 Chinese passengers for Taku. During the night of the 20th she was caught in a gale and ran on a reef some three miles from the Shantung shore. No difficulty seems to have been found in landing the crew (18) and passengers. As the scene of the accident is much infested by bandits and pirates, the *Takachiho* was despatched to guard the wrecked vessel.

Monday, Dec. 1.

Mr. Wang, the recently appointed inspector of Chinese education in Japan, left Peking on the 29th of November, and was to proceed in the first place to Nanking for the purpose of consulting with Viceroy Chang before setting out for Tokyo. It is stated that Wang's commission extends to the duty of bringing Japan and China closer together, as well as of superintending Chinese students in this country. His emoluments are put at twenty thousand taels annually.

Mr. Lessar was to have left Peking on the 26th ultimo, but owing to some difficulty about a sleeping car on the Trans-Asian line, his departure was delayed by one day.

It is stated that Yung Lu is suffering so much from rheumatism that he has resolved to retire from the discharge of active official duties.

In order to replenish the imperial exchequer, now somewhat impoverished, it has been decided to sell an area of waste land, measuring about thirteen miles in circumference, in the vicinity of the Summer Palace.

Viceroy Yuan returned to Peking on the 27th of November, his period of mourning having expired.

Viceroy Chang is signaling his assumption of control at Nanking by remodelling the Kiangsu forces. They have hitherto maintained the ways and weapons of ancient China, but they are now to be reorganized on the lines of Viceroy Yuan's troops.

It is stated that orders to evacuate Shanghai on the 20th instant reached the officer commanding the British garrison on the evening of the 28th ultimo, and that the French and German troops will leave at about the same time. Transports for the use of the British troops have already reached Shanghai.

Sir Ernest Satow arrived in Shanghai on the 29th ult.

Mr. Odagiri, Japanese Consul-General in Shanghai, left that place for Nanking on the 28th ultimo, doubtless for the purpose of consulting with Viceroy Chang on the subject of the new commercial treaty.

Tuesday, Dec. 2.

The rumour of Yung Lu's desire to resign is again circulated. It is stated that the Empress Dowager intends to lay down the administrative reins definitely next year, and that Yung Lu wishes to anticipate that event by an interval sufficient to place himself beyond the range of all consequent complications. His wife is reported to have communicated her husband's intention to the Empress Dowager, who replied that it would not be too late next year to settle the question.

Yung Lu's resignation would mean a great deal to a great many people, but its probable effects pale into insignificance compared with those that would be likely to follow the retirement of the Empress Dowager. Has the Emperor learned the value of prudence? Is he so much wiser than he was in 1898, that he can be safely trusted to set the rate of progress and estimate the degree of radicalism consistent with public tranquillity? Certainly the catastrophes his rash conduct precipitated four years ago ought to have taught him much, but it is not the habit of human nature to profit rapidly by such lessons.

It will be remembered that a story was diligently circulated within the past few days, to the effect that the choice and nomination of another heir to the Throne of China had come again upon the *tapis* at Court. Rumour now has it that this story having reached the ears of the Empress Dowager, Her Majesty showed much annoyance, and directed the Minister of War (Yung Lu) to make search for the person guilty of inaugurating the tale.

It is stated in official circles in Tokyo that the Chinese Government has arranged to borrow forty millions of francs from the Russo-Chinese Bank for the purpose of constructing the section of the Lu-Han Railway that lies between Ching-ting and Taiyuen in Shansi. The work will therefore be soon commenced. The Russo-Chinese Bank is believed to have obtained the money from two or three banks in France, and it is believed that, when a suitable occasion occurs, the public will be invited to subscribe the amount.

Wednesday, Dec. 3.

The Shanghai branch of the Specie Bank issued convertible dollar notes to the value of a hundred thousand dollars on the 1st instant. A telegram to the *Jiji* says that the notes have been well received by the inhabitants and, that the Taotai has added to their credit by making a public recognition.

It appears to have been a premature report that Viceroy Yuan had already returned to Chili. He is said to have been in Shanghai on the 29th ultimo *en route* for the north. Apparently he did not land from his steamer, but, remaining on board, received there a long visit from Taotai Shên I-fai.

Sir Ernest Satow left Shanghai *en route* for England on the 1st of December.

Thursday, Dec. 4.

An imperial decree has been published in Peking ordering that in addition to the usual tests—with the exception of the last—of eligibility for office, a degree must in future be taken at the Peking University. The reason assigned is the State's urgent need of men educated according to modern standards. Of course the news comes by telegram, and may therefore be modified hereafter, but if it

prove correct, it must be regarded as important.

A sensational telegram is sent to the *Asahi Shimbun* from Peking. It alleges that Yung Lu's idea in endeavouring to arrange a match between his daughter and Prince Chun—the prince of Kaiser-and-kowtow fame—was to raise Prince Chun, in the first place, to the position of Minister of War, and, in the second, to that of father of the heir to the Throne. In short, if a son were born to Yung's daughter and the Prince, the child would have been declared Prince Imperial, and Yung might have looked forward to an enviable old age. But these plans seem to have aborted. The Prince never took kindly to the proposal, and did not readily forgive the fate meted out to the unfortunate young lady previously betrothed to him—the fate of swallowing gold. Even the Empress Dowager appears to have treated the project with comparative indifference, her reference to it being confined to a remark that as Yung Lu has no son, it would be desirable to give him a grandson of suitable rank. The palace intrigues in Peking are usually concealed with complete success from outside observation. A great deal of the above may be pure conjecture.

A recent telegram announced that the new loan contracted with the Russo-Chinese Bank was for the purposes of the section of the Lu-Han Railway running to Taiyuen. But later intelligence seems to indicate that a Chingting-Chinan road is in question. We find this second statement difficult of credence. No concession has yet been given, or sought, so far as we are aware, for a line from Chingting to Chinan, which latter city, as our readers probably know, is the capital of Shantung. A road is projected which would follow the route of the Grand Canal from Tientsin as far as Kucheng, and thence pass eastward to Chinan, but a line direct from Chinan to Chingting is a different affair. On the other hand, the Chingting-Taiyuen road is an originally projected branch of the Lu-Han railway from Peking to Hankow.

There are again conflicting statements about the evacuation of Shanghai. One story is that the departure of the German and French troops has been postponed until the 7th of February. Another is that the steamer *Clive* is to arrive on the 18th instant for the purpose of removing the English force, and the steamer *Tailung* is expected shortly to carry away the Germans, of whom a portion will go north to relieve some of their comrades in Chili, and a portion will return at once to Europe, 40 or 50 men remaining in Shanghai as a temporary measure for the purpose of making arrangements in final settlement of the occupation.

KOREA.

Saturday, Nov. 29.

We believe we are correct in saying that the green-covered volume of over 200 pages just issued by the Imperial Maritime Customs of Korea is the first publication of the kind. It purports to be "Returns of Trade and Trade Reports for the year 1901": it is published by order of the Chief Commissioner of Customs, and it reflects much credit upon its compilers. We have first a general report on the trade of the country, by the Secretary to the Chief Commissioner, with a large number of exceedingly interesting tables; then come the returns from various

ports framed upon the admirable model of the Chinese Customs. Chemulpo, Chinnampo, Kunsan, Mokpo, Fusan, Masampo, Wonsan, and Songchin are all heard from, Wonsan furnishing a special map of the adjacent coast. It may be suggested that the future reporter from Chinnampo should content himself with plain "Wiju" and leave "Euiju" severely alone.

The United States Representative in Seoul is reported to be still pressing upon the Korean Government the claims of the American firm by which the electric trams and the water works were constructed. Dr. Allen naturally insists that if Korea can not discharge her liabilities in connexion with these enterprises, they ought to be handed over to the foreign creditors.

Monday, Dec. 1.

Reports from Seoul represent Li Yong-ik as having fallen into disgrace. He has doubtless, many enemies as all men have that have risen from obscurity to comparative distinction, and these have apparently made capital out of an act of violence on his part, namely, the beating and abusing of an official connected with the taxation bureau, who belongs to a family that has been very close to the Throne during the past five hundred years. It is stated that the Cabinet Ministers have decided to prosecute Li, and that his house is already surrounded by police, but that the Emperor's approval has not yet been obtained, and Li is said to be lying concealed in the Palace.

The *Fiji Shimpō's* correspondent sends an account differing from the above. He says that Li Yong-ik's offence is the use of an ideograph signifying "subject" to describe himself, when addressing the lady Om. In Korea any one calling himself the "subject" of a person other than the Sovereign, is supposed to be a conspirator. Even Cho Pyong-sik, who is generally supposed to be of the same political colour as Li Yong-ik, appears to be in league with the latter's enemies.

According to the *Kokumin Shimbun* Li Yong-ik is charged with having concluded some kind of agreement with Russia. What the agreement is and why it should constitute a crime, our contemporary's correspondent does not explain. He adds that Pak Wi-pyong, recently Korean Representative in Peking, has been arrested on the ground of slandering Lady Om, whom he compares to the Empress Dowager; that Li Yong-thai, who was to have come to Japan as Minister, has met with the same fate because of his alleged proclivities for Japan or relations with her, and that Li Keun-thaik, chief of police, has been apprehended for preferring false complaints. It would appear from this account that a fit of impartial indignation has seized officialdom in Seoul, and that the friends of Japan and of Russia are equally objects of displeasure. But it is all extremely vague. Nothing seems tolerably certain except that the invariable woman is to be sought.

In the *Asahi Shimbun* it is alleged that the Pedlars' Guild is in arms against Li, and that its members are waiting at the exits from the Palace to seize him when he emerges. The same journal adds that a near relative of Lady Om, namely, Om Chung-yuen, has been arrested, and that the commotion in political circles is very great.

Korea's commercial treaty with Denmark has been concluded.

Tuesday, Dec. 2.

Li Yong-ik has been stripped of all his

offices except one. That means that he ceases to be Head of the Imperial Estates Bureau, Head of the Imperial Printing Bureau, Head of the Ginseng Administration and Acting Minister of Finance, and that there remains to him only the post of Commander of the Imperial Guards.

As to the memorial presented by the Cabinet asking for the impeachment of Li Yong-ik, the Emperor is said to have replied that although the prayer of the memorialists was in accordance with the dictates of administrative discipline, the special duties discharged by Li in the Palace made it advisable that no extreme procedure should be adopted against him. This reply did not at all satisfy the memorialists. They repeated their petition, this time adopting the peculiarly Korean device of seating themselves at the gate of the Palace and waiting, by night and by day, some favourable expression of the sovereign's will. Meanwhile the citizens are said to have closed their shops and to have assembled in the Street of the Great Bell, declaring that should the Cabinet Ministers' representation be rejected, the people will petition *en masse*. A later telegram says that, to these demonstrations, the Emperor returned an evasive answer, in the sense that Li Yong-ik would be dealt with, but not saying how or when. Thereupon the Ministers tendered their resignation *en masse*. It need scarcely be added that the tongue of rumour does not fail to busy itself with France and Russia in this complication. The Representatives of those two countries are said to have addressed a note to the Throne with reference to Li Yong-ik, but the other Foreign Ministers are not interfering in any way.

The extraordinary ignorance prevailing about Korean affairs outside the circle of those immediately concerned in them, is illustrated by this incident. What has Li Yong-ik really done? What is the crime laid to his charge? Did he, in one of his official capacities, use outrageous violence towards a member of a highly respectable family? Or did he apply a suspicious ideograph to himself when addressing the Lady Om? Or did he traffic with Russia to the detriment of the national interests? All these things are charged against him, but which, if any, of them is correct, we have not the least conception.

Wednesday, Dec. 3.

Li Yong-ik's story is beginning to display interesting features, but they are precisely the sort of features that might have been expected to develop from a political point of view and in accordance with precedent. In the first place, he is said to have fled and to be lying concealed either in the hotel of M. Waeber or in the Russian Legation. In the second place, the Russian and French Representatives are reported to be exerting their influence to shield him against the result of the accusations laid at his door. Meanwhile the sometime dictator is to be succeeded in his post of War Minister by Li Hayong, formerly Korean Representative in Tokyo, and in his post of Chief of the Bureau of Imperial Estates by Cho Chong-hiu, of whom we hear for the first time.

The outside world would not take much interest in these political commotions in Seoul were it not for their collateral effects upon the relations between Japan, Russia and France. Considerable tact must be exercised by the Representatives of those Powers to adjust their conduct so that it shall furnish no confirmation of the reports so recklessly circulated. Thus far they have

succeeded excellently, but it is not wholesome that the tongue of rumour should perpetually occupy itself with misrepresentations calculated to foster international suspicion. Diplomatic skill is potential within a limited sphere only, and while Governments remain calm, public opinion may be gradually educated to a dangerous condition. Does the man in the Japanese street pause to reason out the credibility of the stories constantly dinned into his ears by newspaper reporters about Russian intrigues in Korea and French support of them?

Thursday, Dec. 4.

The commotion in Seoul appears to be subsiding. Li Yong-ik's enemies are now said to be satisfied with his fall from official high places, and to be willing that the proceedings in impeachment should be abandoned. It would seem, therefore, that there are not to be any of the usual assassinations, and that Japan will not receive any fresh access of Korean refugees. Thus there is something to be thankful for.

THE BONES OF BUDDHA.

The bones of the saint have not yet found a resting place, it would seem. Arriving in Japan, they have become involved in the stream of speculation and speculation that engulphs so many projects and reputations in these refined times. Our readers have heard of the dispute between Kyoto and Nagoya about the possession of the bones, and they have heard also that Nagoya won the day. It is not to be supposed that reverence for these holy relics has paramount influence in such matters. There is another side, which found vivid illustration at Nagoya, for from the moment of the bones' arrival there, worshippers began to flock to the city, so that hotel keepers, petty tradesmen and "deligent" priests found themselves basking in the sun of prosperity. The Nagoya folks had agreed to pay a sum of 136,000 *yen*, which is what the journey of the relics to the Owari city is alleged to have cost. But having obtained the bones, the main result appeared to have been accomplished, and there did not seem to be any necessity for hurry in the matter of re-imbursing their carriers. So instead of paying the total amount of 136,000 *yen* on the 14th of November, as promised, Nagoya suggested the expediency of dividing the amount into five instalments, the first, fifty thousand *yen*, to be handed over on the 27th November. Even this preliminary payment was not made, however. The Nagoya debtors alleged that they could not scrape together more than twenty thousand. Then the Kyoto Committee, becoming exasperated, undertook to examine the Nagoya Committee's books, which ungraceful proceeding disclosed the fact that tens of thousands of *yen* had been "muddled away" on eating, drinking and other carnal amusements. Very likely the 136,000 *yen* of travelling expenses included many items of a similar character. Kyoto then got mad and announced its intention of re-annexing the bones, so unless some compromise can be effected, they are likely to resume their travels, and be the means of running up another bill of costs. Siam really played Japan a very scurvy trick when it bequeathed these relics to her.

A WELCOME PARTY.

The *Tokyo Ginko Shukai* (Bankers Association), the *Tegata Kokwanjo* (clearing House), the *Koshin-jo* (Intelligence Office) and the *Ginko Club* (Bankers Club) held a combined meeting on the 27th instant in the Bankers' Association Building, to welcome Count Matsukata, Baron Shibusawa and Baron Iwasaki on their return from Europe. Before dinner a seance was held, at which each of the distinguished guests spoke in response to words of greeting from Mr. Toyokawa Ryohei.

Baron Iwasaki said that he had been entertained by his friends on the eve of his departure and he now received this honour on his return, for which he desired to express sincere thanks. His journey had been undertaken mainly for reasons of health, and it had consequently been impossible for him to make any minute or extended observations. But he had been profoundly struck by the condition of the countries of the Occident, their prosperity, their enterprise, and their progress. The contrast they presented to his own country had been forced upon his attention, and he could well conceive that while such a striking difference might have a completely dispiriting effect upon some Japanese observers, it might stimulate others to extravagant efforts. Both extremes would be equally regrettable. Passing to review his experiences in detail he declared that England had impressed him above all other lands. A small country without any special endowment of natural resources, she had spread her dominion to every part of the world and she stood at the head of all nations in the matter of financial strength. What were the factors making for that remarkable result? He found them in the character of the Englishman. In his unfailing allegiance to probity, in his keen sense of honour, in his untiring industry, and in his indomitable resolution which, recognising no such thing as failure, held tenaciously to its purpose in the face of all obstacles. A very different state of affairs existed in Japan, and if his countrymen hoped to achieve any national successes, they should take England for model. That indeed, was easy to say but hard to accomplish. The only hope lay in the united efforts of scholars, of moral teachers, and of statesmen to educate the qualities in which the Japanese people were so unfortunately deficient. Feeling this to be the urgent need of the time, he could not but proclaim it loudly.

Baron Shibusawa warmly endorsed Baron Iwasaki's dictum that a country's greatness depends mainly on the character of its inhabitants. He then went on to speak in some detail of the banking institutions of the West as they had come under his observation. A feature of these institutions in America was some absence of centralization, but their manner of doing business was prompt and bold, and their celerity in dealing with bills exceeded that even of England. In the latter country he had been much struck by the abundance of the deposits and the great resources of the banks. Above all he had found that the systems of loans on security and loans on credit were practised simultaneously with equal extensiveness; a fact well worthy of attention in Japan, where some people argued in favour of loans on security and others in favour of loans on credit, few voices being raised in favour of pursuing the two plans at the same time. The speaker's allusions to German banks were scanty: he seems to have lacked either time or facilities for research. In France what appeared most worthy of

attention was the care taken to collect and circulate information about everything relating to business.

Count Matsukata, after bearing witness to the truth of the remark made by Barons Iwasaki and Shibusawa that a country's career depends upon its people's character, explained that his own chief purpose in making his recent visit to the Occident had been to observe the conditions obtaining as to the gold standard and the circulation of money. In America the independent note-issuing power of the various banks had apparently caused some disorder prior to the adoption of the gold standard, but since that measure, public confidence had been restored. Nevertheless the financial system of the country seemed to be deficient in the lack of a central bank, and it was regrettable that Mr. Gage's project could not be carried out. In England and Germany a central bank existed and the mechanism of finance left nothing to be desired. Italy also had a similar point of economical concentration, and the speaker had found her financial condition much sounder than he had been led to anticipate. In Austria the central bank was very strong. It had a specie reserve of six hundred million *yen*. In Russia also there was a central bank, but it belonged to the Government alone and had no shareholders among the people. Russia had adopted the gold standard at about the same time as Japan, and her paper, once greatly depreciated, had now recovered its place in public credit. Hard money and notes circulated in approximately equal quantities and the financial condition appeared unexpectedly sound. Her revenues and expenditures totalled some nineteen hundred million *yen*, and any deficiency of revenue was usually made up from the surplus of previous years, which surplus sometimes reached 140 or 150 million *yen*. In that respect Russian finance resembled Japanese, Japan sometimes having a surplus of 14 or 15 million *yen* against a total revenue and expenditure of from 200 to 300 millions. The resemblance was natural seeing that in both countries the French system of finance prevailed. Silver had ceased to command the respect of financiers: they were united in regarding gold as the only suitable basis of currency. Thus silver had fallen from a ratio of 32 in 1897 to a ratio of 42 to-day, which figures suggested how Japan would have fared had she clung to the white metal. European financiers were now beginning to busy themselves with the problem of a gold currency for China, and all Western countries competed to increase their stocks of gold; a competition in which Japan must necessarily engage. The Count urged the importance of uniting the small banks of Japan into larger and more solid institutions, and of adding savings' sections to the machinery of commercial banks. He concluded by asserting that Japan did not fall short of other countries in the matter of resources. She could take her due place in the race of nations if only her people showed resolution and enterprise. But they must not lose time. If the present opportunities were let slip, nothing would remain but regrets.

BURNING OF THE TEMPLE KOSHO-JI.

On the morning of the 29th ultimo the temple Kōshō-ji in Kyoto was almost completely destroyed by fire, only one storehouse and three or four buildings escaping with or without injury. This temple belongs

to the Nishi Hongwan-ji. A small interval separated it from the celebrated Hiun-kaku, which forms part of the latter, and there was imminent danger that the flames would spread to the Hongwan-ji, which would have been a national disaster of irreparable extent. Happily by the vehement exertions of the priests that calamity was averted, but not before damage requiring some thirty thousand *yen* to repair had been suffered by the roofs of the Hiun-kaku and the main building. Some fourteen persons were injured, but only slightly. The chief abbot of the Koshō-ji is Baron Hana-zono. He was living within the precincts of the temple at the time of the conflagration. The Koshō-ji was reported to share with the Chion-in the honour of being the finest specimen of a Buddhist structure in Kyoto. As to the cause of the fire, it is reported to have been the use of a naked candle by one of the servants. The flames broke out at 1 a.m., it is said, but the exact hour is difficult to ascertain from the telegrams.

COUNT INOUE.

Count and Countess Inouye gave a garden party on the 28th November at their Azabu residence, partly to celebrate the sixty-sixth anniversary of Count Inouye's birthday, and partly to welcome Mr. and Mrs. Katsu Inouye, who have just returned from Berlin, where Mr. Inouye served as Japanese Representative for several years. Although the weather had been very unpropitious in the forenoon, happily no rain fell from 2 o'clock until 5, by which time the guests had nearly all taken their leave. Want of sunshine nevertheless deprived the garden of some of its beauty, but nothing could mar the geniality and good fellowship that always mark these annual celebrations of Count Inouye's birthday. Marquis Ito was among the guests. His Excellency looked remarkably well and showed no sign of the weighty political cares now supposed to oppress him. After some time spent in wandering about the garden and viewing certain recent additions to its features, especially two *cha-shitsu* of the daintiest construction, the guests assembled on the upper lawn, where refreshments were served. Count Inouye's health was drunk again and again with the greatest enthusiasm, and four lusty shouts of *banzai* were given for him at the call of the oldest person present, Viscount Hayashi. Even this did not seem to satisfy the younger members of the party, a group of college lads, for they hoisted Mr. Katsu Inouye shoulder high with vehemence thoroughly typical of their feelings. Count Inouye's reply to the strenuous outburst of cheers evoked by Viscount Hayashi's call was characteristic. "Thank you all," he said. "A long life is not wholly agreeable, I assure you." Subsequently there was a performance of quaint dances, all of a congratulatory nature, as well as a display of juggling feats, and the party broke up at 5 o'clock, after a memorably enjoyable time.

SILVER.

Silver has dropped again. Its latest tumble is $\frac{5}{16}$, and it is now quoted at $21\frac{3}{8}d$. per ounce. Where this *débâcle* is to end the keenest observers decline to predict. We can not, however, be very far from the point where cost of production will become a determining factor. In the meanwhile, the embarrassment of men doing business with China must be very great, and the weight of the Indemnity increases

steadily. Everything goes against the unfortunate empire. Even the compensation furnished by a stimulus to exports is more or less discounted by these rapid fluctuations in the gold value of the purchasing medium, for a merchant necessarily hesitates to conclude any large transaction of buying in the face of a possible further depreciation of silver, which would handicap him in competition with a later purchaser.

Silver is still falling. It is now quoted at 21¹¹/₁₆ per ounce, and the exchanges are correspondingly influenced. China, of course, is the country chiefly affected. The Hong-kong and Shanghai mercantile communities must be experiencing some embarrassment.

NAVAL INCREMENT.

Three leading newspapers of Tokyo, the *Nichi Nichi Shimbun*, the *Kokumin Shimbun* and the *Fiji Shimpō*, are lending their powerful influence to promote the cause of naval increment. Their arguments need not be repeated here, being already familiar. Without proceeding to details and thereby creating mischievous ideas about the object of the empire's armaments, it is impossible for a journal to say anything new about the reasons which impose upon this country the duty of self-protection. In the *Nichi Nichi's* columns, however, some interesting facts are stated for purposes of comparison. For instance, the number of ships of war possessed by each of the maritime Powers in proportion to the length of its litoral, shows that Japan is very far from coming up to the standard of the others. She has 3,300 miles of coast and 219,012 tons of naval armament, so that for every mile of litoral, she can show only 66 tons of shipping. The corresponding figures for the four principal maritime Powers of Europe are: England 863 tons; France 669 tons; Germany 674 tons, and Russia 328 tons. From another point of view there is an equally conspicuous difference. Thus each unit of the Japanese nation contributes 1.25 *yen* to the exchequer on account of military and naval expenditures, whereas the figures for the above four European States are: Russia 3.80 *yen*; England 29 *yen*; France 10.80 *yen* and Germany 5.50 *yen*. One more comparison is made, namely, a comparison founded on the foreign commerce of the countries under consideration. Thus Japan's foreign commerce gives an average of 11.90 *yen* per head of population, and is nine times her military and naval outlays; England's commerce averages 210 *yen* per head of her people and is seven times her naval and military expenditures; and Russia's commerce shows an average of 10 *yen*, which is only three times her unproductive outlays. All these figures are adduced to prove that Japan must spend more if she wishes to keep abreast of the time, and that an outlay of 115 million *yen* spread over ten years for an increase of 80,000 tons is, after all, a very modest programme.

THE GERMAN SCHOOL IN TOKYO.

On the 29th ultimo the German Association (*Doitsu-gaku Kyokai*) held a meeting in Tokyo to celebrate the opening of the new buildings of the German School in the Kanda district. His Excellency Count Arco Valley, accompanied by the members of the Imperial German Legation, attended the meeting. The Count made one of those tactful, clever speeches for which he is famous.

He expressed on behalf of the members of his Legation and himself the greatest pleasure at the event of the day, and the conviction that the new school would promote the better understanding of the German language and German literature. Japan and Germany were far apart from a geographical point of view, but the spirit and sentiments of the two nations showed much in common, and everything tending to draw them together was to be welcomed. He was glad to be able to speak of a gift of books and educational instruments made by the Emperor of Germany to the new school. News of the gift had just been received and the books and instruments had been handed over to Mr. Omura in Berlin. His Excellency concluded by expressing sincere hopes for the development and prosperity of the school, hopes shared by his Sovereign and by the leaders of thought in Germany.

TOKYO LAWN TENNIS TOURNAMENT.

The last round of the Ladies' Singles in the Tokyo Lawn Tennis Tournament will be played on Monday, the 8th inst. at 3 p.m. between Miss Squire and Miss R. Squire. Below will be found the results of the matches hitherto played. Perhaps it should be explained that the games have been 90 up, a method of scoring which facilitates handicapping and enables the relative strength of the combatants to be tested more surely than is the case in the ordinary game of sets.

FIRST ROUND.

1. Miss R. Squire (received 30 from scratch) beat Miss Strange (received 30 from scratch) by 90 to 73.
2. Miss Squire (received 5 from scratch) beat Miss W. Squire (received 15 from scratch) by 90 to 64.
3. Princess Koudacheff (received 12 from scratch) beat Mrs. Vickers (received 30 from scratch) by 90 to 83.
4. Mrs. White (received 30 from scratch) beat Miss Von Fallot (received 25 from scratch) by 90 to 80.
5. Mrs. Messayedoff (received 20 from scratch) beat Miss Hall (scratch) by 90 to 49.
6. Mrs. Von Erckert (received 25 from scratch) beat Miss K. Takayanagi (received 30 from scratch) by 90 to 72.

SECOND ROUND.

1. Miss R. Squire (30 from scratch) beat Princess Koudacheff (12 from scratch) by 90 to 79.
2. Miss Squire (5 from scratch) beat Mrs. Messayedoff (20 from scratch) by 90 to 78.
3. Mrs. White (30 from scratch) beat Mrs. Von Erckert (25 from scratch) by 90 to 88.

THIRD ROUND.

1. Miss Squire (5 from scratch) beat Mrs. White (30 from scratch) by 90 to 79.
2. Miss R. Squire, a Bye.

FINALS.

Miss Squire (5 from scratch) to play Miss R. Squire (30 from scratch).

JAPANESE DECORATIONS FOR BRITISH OFFICERS.

King Edward has granted permission to three British officers to accept and wear decorations bestowed by the Emperor of Japan. Major-General Creagh, Commander of the forces in North China, receives the Second Class of the Rising Sun; Major Wingate receives the Fourth Class of the Rising Sun, and Captain St. John, who served as General Creagh's Aide-de-camp, receives the Fourth Class of the Sacred Treasure. The proximate reason for granting the decorations is that these officers attended the recent manoeuvres. So far as we can remember this is the first instance of British officers being allowed to accept and wear Japanese decorations without being in the service of Japan.

JAPANESE CAVALRY.

That perennial question, the horsing of Japanese cavalry, has been again brought upon the *tapis*. Much appeared about it in these columns during former years, but all criticisms then penned were vitiated by the old-fashioned fallacy that the cavalry charge would always continue to be a feature of war, and that, consequently, momentum must be a primary requisite in the organization and equipment of a squadron. It is now seen, however, that the part to be acted by cavalry in the campaign of the hereafter will be very different from what it has been hitherto. No feature will be less likely to disfigure a battle than the hurrying of a mass of horsemen at an infantry square or an artillery park, and as for the duty of neutralizing an enemy's cavalry should he attempt to use it in the old way, it will be performed much better by the rifle than by the trooper. The main function of horses for military purposes will be, first, to carry scouts, and, secondly, to transport men to points where, as infantry, they can best overcome the enemy's advantages of position. Hence what is wanted in the horse is not weight nor speed, the two constituents of momentum, but hardiness, endurance and ability to subsist on easily procurable fodder. Japan need scarcely take into consideration any part of the world except Far-Eastern Asia in organizing her army. If fate compels her to fight on the neighbouring continent, there are districts where flanking movements on a very large scale may have to be undertaken, and where there will be corresponding necessity for wide-range scouting. The best and most useful animal under such circumstances would be one accustomed to the climatic and topographical features of the district, and ready to subsist upon food locally procurable. It is a question whether the Chinese pony does not fulfil these conditions better than any other animal could. The Japanese pony, though a most unsightly beast so far as "points" are concerned, would probably live down any two Australian or even Irish horses on active service in Japan, but we believe that the Chinese pony satisfies still more fully the requirements of endurance and hardiness. No one would have thought of classing the Boer ponies above English cavalry horses for campaigning purposes a few years ago, but the verdict might be different now. At all events the horsing of Japan's cavalry is a problem not to be solved along the lines of ordinary stud theories. Japanese military men have to look closely at the capabilities of the material under their hand before they go farther afield and spend large sums to procure an animal possibly less serviceable and certainly far more costly. They are fully alive, we believe, to all the facts that have to be taken into account. Officers in big garrison towns like Tokyo or Osaka like to be able to appear on parade and in the streets on big, handsome beasts imported from Australia or California or specially bred in Japan. Would they take these animals with them on active service?

SIR CLAUDE MACDONALD'S DESPATCH.

We mentioned last week that in accordance with the express commands of the Emperor, a despatch addressed by H.E. Sir Claude MacDonald to His Excellency the Minister of State for Foreign Affairs, had been published throughout the empire. Instead of re-translating the Japanese version

into English we have obtained a copy of the original, which runs thus :—

British Legation, Tokyo,
November 20th, 1902.

To His Excellency Baron JUTARO KOMURA,
Minister of State for Foreign-Affairs.

Monsieur Le Ministre,

On the 11th of August last I forwarded to the Marquess of Lansdowne an account of the festivities in Japan in connection with the Coronation of His Majesty.

His Majesty's Principal Secretary of State for Foreign Affairs, having laid my despatch in question before His Majesty my gracious Sovereign, has received the King's commands to express his satisfaction at the success of these festivities, as well as his high appreciation of the friendly sentiments expressed by the press of all shades of opinion in Japan towards His Majesty and the nation over which he rules.

It affords me much pleasure to bring to Your Excellency's notice the satisfaction of His Majesty at the friendship displayed by Japan towards himself and his people.

I avail myself of this opportunity to renew to Your Excellency the assurance of my highest consideration.

(Signed) CLAUDE M. MACDONALD.
H.B.M. Envoy Extraordinary and
Minister Plenipotentiary.

THE LATE ARCHDEACON SHAW.

A memorial brass has just been affixed to the south wall in S. Andrew's Church, Shiba, to commemorate the life and work of the late Archdeacon A. C. Shaw. The design was carried out by Messrs. Gawthorp of Long Acre, London, under instructions from Mr. J. Conder, F.R.I.B.A.

The inscription on the brass is as follows :—

In memory
of
Alexander Croft Shaw,
M.A., Archdeacon,
Founder of
S. Andrew's Church, Shiba,
Chaplain to H.B.M. Legation.
Sent out under the
Society for the Propagation of the Gospel,
he was one of the first two Missionaries
of the Church of England to this City,
where he arrived September 25th 1873.
Here for twenty-nine years he remained,
bearing witness to Christ
by teaching and example,
building up many in the Faith,
and drawing many hearts by his
gentle courtesy and self-forgetfulness.
He fell asleep 13th of March, 1902, aged 56.
This Tablet is placed to testify to the honour
and affection in which he was held by the
British Community in Japan and by a large
circle of Japanese and other Friends.

NOTES ON CURRENT EVENTS.

On the 27th instant the United States Representative and Mrs. Buck held a reception at the American Legation in Tokyo to celebrate Thanksgiving Day. A very large number of persons of all nationalities attended, not merely because of the day, but also to signify their esteem for the exceptionally popular Minister who now has charge of United States interests in Japan.

The *Asama* and the *Takasago* arrived at Yokosuka on the 28th November, returning from their voyage to England, where they took part in the naval celebrations on the occasion of the Coronation. Admiral Yamamoto, Minister of State for the Navy, Admiral Ito and a number of officers and officials went to Yokosuka to welcome the ships. There were fireworks and music, and we gather from newspaper accounts that quite a demonstration took place.

The Department of Agriculture and Commerce has published returns showing the actual yield of the barley crop during the

present year. The figure is 18,587,154 *koku*, being 2,053,053 *koku*, or 9.9 per cent., below last year's yield, and 989,448 *koku*, or 4.9 per cent., below the average crop.

The Foreign Office paid to the Nippon Yusen Kaisha on the 29th ultimo, in satisfaction of the latter's claims on account of losses in connexion with the Boxer troubles, a sum of 67,725 *yen*. The total hitherto paid out by the Foreign Office in satisfaction of private claims is 1,013,955 *yen*.

The promoters of the Fifth National Industrial Exhibition, to be held at Osaka in 1903, have issued a prospectus, headed by a view of the buildings as they will appear when completed. The circular sets forth very lucidly in English the various attractions that will be presented by the exposition itself as well as by the many places of note that are situated within reach.

The death is announced of Mr. Kawasaki Chitora, at the age of 68, in Nagoya. Mr. Kawasaki was among the most renowned modern representatives of the Tosa School. He had been much connected with the encouragement of art education, and at the time of his death he was chief of the designing section of the Nagoya Applied Arts School. Readers of the *Kokka* are familiar with Mr. Kawasaki's beautiful and accurate delineations of the armour of old Japan; a branch of study which had special importance for a painter of the Tosa Academy.

The rates of exchange announced by the *Official Gazette* for Customs' purposes, are striking. The Shanghai tael is put at 1.121 *yen*; the Mexican dollar at 90 *sen*; the Manila dollar at 84 *sen* and the Hongkong dollar at 82.7 *sen*. That is a veritable slump. The Mexican dollar is now worth only 21½ pence, whereas some of us can remember when it stood at 60 pence.

Mr. Yamamoto Azuma died on the 28th instant at the age of 69. He was a renowned *Kyôgen-shi* of the *Okura-riu*; that is to say, a performer of *No-kyôgen* in the *Okura* style. Only a short time ago he was preceded to the grave by Mr. Okumura Yosaku, a not less celebrated *Kyôgen-shi* of the *Izumi-riu*, and Tokyo journals, alluding to the deaths of these two artists within such a brief period, regard the events as a public calamity, and declare that scarcely any *Kyôgen-shi* of equal merit now remains. The performer of *Kyôgen* is as highly thought of in Japan as the greatest actors on the ordinary stage, and since his performances are for the amusement of a higher order of society than frequenters of the theatre, he enjoys correspondingly greater honour. The history of his rise to eminence is not associated with the contempt that attaches to the beginnings of the theatre.

The Diet assembles on the 6th, but that day being Saturday, the business of organization can not be completed before Monday the 8th. Thus the official opening is expected to be on the 9th, and business will commence on the 10th.

The Osaka City Assembly met on the 1st instant and adopted a resolution to the effect that if the Gas Company applied for permission to lay pipes in the streets, the interests of the city must be considered, and compensation must be obtained from the Company. There seems to have been vehement opposition but it was apparently confined to three members, and when, after sundry delays, a signed ballot was taken, the

votes showed that three stood for the Company, that four members had absented themselves from the division and that all the rest were against the Company. It may be assumed, therefore, that in the whole assembly only seven members were in agreement with the Company's claim.

A duck-hunting party was given at the Shiba Detached Palace on the 1st instant. Among the guests were the Staffs of the French, Russian, German, Dutch, Brazilian and Belgian Legations. A number of wild-fowl were captured. The Emperor and Empress were represented by H.I.H. Prince and Princess Kanin.

M. Boissonade has been appointed an honorary professor of the Imperial University.

In accordance with a bill passed by the Diet last session, the Government has now promulgated a law directing that the next census shall be taken in 1905; that the one following shall be in 1910, and that every succeeding census shall be at an interval of 10 years.

CARRIAGE ACCIDENT ON CAMP-HILL.

Quite a "serious mix-up" took place on Camp-hill about 2 p.m. on Saturday. Mr. and Mrs. B. H. Betts, and the latter's sister were coming down the hill in a dogcart accompanied by a betto. They had just passed Dr. Wheeler's gateway when a heavily laden cart came up zig-zagging as those vehicles usually do to render the ascent more easy. Doubt as to the particular direction in which the cart was about to turn ended in the dogcart colliding with it, and the horse, startled by the shock, bolted down the slope first throwing his party out into the road. Mrs. Betts was the most severely injured, being indeed rendered insensible. She was severely cut on the left arm and also badly bruised on the chest. Her sister likewise sustained a severe shock, and Mr. Betts was injured on the left leg. Mrs. Betts was carried into Nagasaki's photographic store and Dr. Wheeler was called and treated the sufferers, the first named lady being conveyed home in an ambulance. The betto escaped unhurt.

Meanwhile the horse continued downhill and opposite the Iceworks ran into an empty jinrikisha with the result that both vehicles were upset and damaged, the horse was thrown down and the jinrikisha-man sustained slight injuries for which and for the damage to his property he has been compensated.

MUTINY ON A U.S. GUNBOAT.

A telegram to the *Manila Cablenews* says :— "A cablegram received by the War Department to-day states that forty-eight members of the crew of the gunboat *Isla de Luzon*, en route from Manila to New York, have been placed in irons on account of mutiny. During a high sea, the bed plates of the ship's machinery became loosened and the machinery shifted slightly, the ship acquired a decided list and a panic occurred among the crew. They sought to have the course of the steamer changed, and when the officers refused a mutiny followed which was quelled without bloodshed and the rebellious members of the crew were placed in irons." The *Isla de Luzon* was one of the Spanish fleet conquered by Dewey. It was settled and sunk at Cavite, but was subsequently raised by the Hongkong Dock Company, brought over to Hongkong and, says the *China Mail*, refitted here under the superintendence of the much-kissed Hobson.

It was reported that General Miles, Commander-in-Chief of the U.S. army, at present on a visit to the Philippines, will leave Manila for Hongkong on Dec. 15th and travel home by way of China and Russia.

INTERESTING CRITICISM.

THE *Anglo-Japanese Gazette* is a monthly magazine published by the Japan Press in Seething Lane, London. In its fourth number, that for October, a writer signing himself "C.L.B." discusses the house-tax question briefly and dispassionately. He does not throw any new light on the matter. He does not profess to throw any new light. On the other hand, he makes no misstatements of any consequence and the view he adopts is perfectly legitimate. Nevertheless his article is very strongly denounced by one of our local contemporaries, which calls it "an extraordinary travesty"; expresses astonishment that "any one with any pretence to know anything of the subject should perpetrate such stuff," and concludes that "it would probably be difficult to make a greater misrepresentation of the actual facts." It appears to us that the critic is more at fault in this case than the writer he criticises, and since the incident illustrates the discordant nature of the conceptions entertained about the house-tax question, a few lines may be devoted to the matter.

"C.L.B.'s" first point is that the idea of fair play is not satisfied when foreign residents in the former settlements claim exemption from a municipal tax which their Japanese neighbours have to pay. "The outsider," he says, "does not see why a foreigner should not pay a house tax if the native has to." This statement is denounced by the critic, and astonishment is expressed at the ignorance which betrays a man into "perpetrating such stuff." Wherein the ignorance consists, there is no attempt to prove, unless proof is to be sought in a subsequent allegation that "the writer ignores the fact that the land tax is contended by the foreigners to have been intended to cover all municipal purposes." The "land tax" "covering all municipal purposes"! What a profound acquaintance with the subject this assertion displays! Among the many correspondents and journalists that have discussed the matter in the past, not one has had the fine temerity to claim that the "land tax" paid by foreigners covers all municipal charges. What part of the land rent is to be regarded as "land tax" remains uncertain to this day, and the uncertainty has afforded an opportunity for sundry conjectures. But the most largely licensed critic has not previously "perpetrated" the marvellous allegation that municipal taxes are included in the "land tax." Let us assume, however, that the critic intended to say "land rent" and that correct diction was a secondary consideration with him. His point then becomes, as we understand him, that the foreign residents do pay house tax since house tax is a municipal impost and all municipal imposts are included in the land rent. If that be the contention, then we have to admit, first, that a tax which did not exist at the time of fixing the

land rent was nevertheless included in that rent; and secondly, that whereas Japanese subjects, in common with the subjects and citizens of all countries in the world, are liable to have their burden of taxation increased or diminished according to local or national exigencies, foreign residents in Japan are exempt from any such liability in the matter of municipal taxes, and are secured for all time against any addition to the charges assessed nearly half a century ago. In other words, it is claimed for the foreign residents that they are entitled to a privilege never previously granted by a State to any section of its inhabitants, the privilege of perpetual immunity from every change of local taxes. That is in truth, the claim advanced, as witness an article attacking this same "C.L.B." in the columns of a Kobe journal, where it is stated that, "the kernel of the dispute is not an attempt on the part of foreigners to evade legitimate taxation, but the claim by the lease-holders that the Japanese Government, in return for what were described by Mr. BERTIE, the English negotiator, as numerous and important concessions, should abide by the *status quo* as regards property in the Settlements to which it consented when the Treaty was made." There is not the slightest ambiguity about this claim. What the Kobe journal explicitly contends, and what the Yokohama journal implicitly alleges, is that foreign residents are enjoying a special exemption granted by Japan in consideration of "numerous and important concessions" made by the British Government in other directions. In the face of such a claim there remains no room for the pretence that the house tax is included in the land rent and that no discrimination is made in favour of foreign residents. "The kernel" of the anti-house-tax case is that such discrimination is enjoyed and that its enjoyment was purchased by concessions of another kind. Hence "C.L.B.'s" mistake is not his statement that foreign residents are exempted from a house tax which their Japanese neighbours have to pay, but his failure to note the claim that such exemption was expressly purchased by the British negotiators and deliberately sold by the Japanese Government. As to that claim, there is one comment to be made; namely, that no Government can be held to have deliberately divested itself of one of the fundamental attributes of sovereignty, unless there exists most unequivocal evidence of the fact. The right of adjusting taxation so as to meet the State's exigencies is a fundamental attribute of sovereignty. If at the time of Treaty Revision, Japan agreed to abandon that right in favour of the foreign residents in the former Settlements, the agreement must be producible in absolutely explicit form. There is no such agreement. Attempts have been made to infer that some intention of the kind was present in the minds of the negotiators, but, as a matter of fact, the

history of the negotiations bears a wholly different interpretation.

"C.L.B." is further condemned for saying:—"There is hardly a single instance of a foreign resident in Yokohama demanding that the Japanese Government should allow him to pay something towards police protection and towards lights." Concerning that assertion—not a very serious or brilliant assertion, it must be admitted, the critic says:—

Probably it would be difficult to make a greater misrepresentation of the actual fact. The writer will probably be astonished to learn that up to the last the foreign landholders in Kobe taxed themselves voluntarily to police, light and repair the roads of the Settlement, besides doing much to add to the comfort and beauty of the place. Even in Yokohama, where the Municipality was quickly handed over to the Japanese authorities, the lighting of the streets was in the hands of foreigners up to the time the revised treaties came into force.

It is unquestionably true that the foreign residents of Yokohama paid for, or contributed to, the cost of lighting the streets up to the time when the revised treaties went into operation, but it is unquestionably very misleading to assert that "the foreign landholders in Kobe taxed themselves voluntarily to police, light and repair the roads of the Settlement, besides doing much to add to the comfort and beauty of the place." The "voluntary" element in the story is difficult to detect. By the "Arrangement" of 1868, it was provided that the municipal affairs of the Kobe and Osaka Settlements should be in the hands of the local Japanese and Consular Authorities, in conjunction with a standing committee elected by the foreign community, and on account of the expenses a certain proportion of the ground-rent was to be appropriated annually, each land-renter being liable to a further payment of limited amount to provide for the cost of a foreign police force. With the fund thus accruing the municipal outlays were defrayed. Where the "voluntary contribution" came in, we really fail to see, and truly we think that "C.L.B." would have better merited the attacks made upon him had he committed himself to assertions like those of his assailants.

There is one question worth propounding in this context. Granting the correctness of the assertions that the Yokohama foreign residents paid for the lighting of the streets up to the date of the operation of the revised treaties, and that the Kobe residents taxed themselves to police, light and repair the roads of the Settlement, why should both communities be exempted from those burdens now? As a matter of fact the abolition of the Settlements and their inclusion in the communes imposed new local obligations of a fiscal nature on the residents. Yet we have it here explicitly declared that their fiscal burdens were heavier in pre-revision days than they are now. Is that the *status quo* so vehemently contended for?

"A STRANGE STORY."

IN a recent issue we commented strongly on a story published by the *Niroku Shimpo*—a story of a revolting nature, wholly unfit for the columns of any journal, and obviously false in some important details. Our comments are partially traversed by the *Japan Times*, which points out that the story did not appear originally in the *Niroku Shimpo*, and that, consequently, the latter journal can not be held primarily responsible for circulating such an abomination. If the order of precedence in these matters be of any importance, we concede the justice of the *Japan Times*' remarks, and amend our former statement in the sense that the *Niroku* did not set, but merely followed, a shocking example. The first offender appears to have been the *Osaka Mainichi*, which paper, since it enjoys the distinction of having the largest circulation in Japan, now also enjoys the distinction of having disgusted an unprecedentedly great number of persons by a single act of brutality.

But if we concede the point made by the *Japan Times* in this respect, namely, that the offence against decency was perpetrated not by one journal only, but by several, and that the *Niroku Shimpo* merely formed one of the obscene mob, instead of being its leader, we most emphatically dissent from our contemporary's inference that since the tale appeared in four or five journals, it merits the credence due to united testimony. The *Japan Times* is perfectly cognizant of newspaper practice in this country in the matter of acknowledging intelligence extracted from the columns of another journal. There is no idea of acknowledgment, in 99 cases out of every 100. A paragraph appearing in newspaper A may be paraphrased, or may be extracted verbatim, for the purposes of newspaper B, but in either event the source is rarely indicated. It is quite easy to see that the Tokyo journals which opened their columns to this disgusting fabrication, took the thing from the *Osaka Mainichi*. Possibly it is less immoral to exhibit a stolen bestiality than to manufacture it for exhibition. That is a metaphysical distinction which we can not undertake to decide. But when we are asked to admit that a statement derives truth from the mere fact of repetition, we must demur. Besides! the *Japan Times* is mistaken in supposing—as it apparently does—that when we denounced the tale as impossible in some of its leading features, we were influenced either by the character of the journal publishing it or by the hypothesis that only one newspaper had spoken. For the matter of that, we attach as much credence to the utterances of the *Niroku Shimpo* as we do to those of almost any other Japanese journal. Our denunciation was based solely on inherent evidences furnished by the story itself. And we now repeat, in spite of the iteration of the tale by several newspapers and in spite of the protestations of the *Niroku Shimpo*—which suggests that we are ventur-

ing to pass judgment on matters beyond our knowledge—we now repeat that the facts related are in some essential respects necessarily false, and that when parts of a story pass beyond the range of the possible, the credibility of what remains becomes a vanishing quantity.

There is a word to be said to the *Niroku Shimpo*. That journal, replying to our article, assumes the position that revelations of the kind in question are made in the interests of good ethics. Such a plea has been frequently advanced in defence of the doings of the yellow journal, and has always been dismissed as a contemptible subterfuge. To corrupt the minds of thousands of persons for the sake of punishing the corruption of one, is a procedure too extravagant for serious consideration. The yellow journal collects dirt and sells it for the sake of the money brought by the transaction, and for that sake solely. No one is deceived for an instant by miserable pretences about the sweetening influences of the free atmosphere of exposure, or about the corrective effects of obscenity publicly pilloried. The man is a public enemy, deserving permanent confinement in a house of correction, who acts upon the belief that a newspaper's columns are a proper place for recording the detailed history of all sins however revolting. There is a beautiful flower called the purity of innocence which it should be the aim of every one to shelter and cultivate. Tokyo and some other Japanese cities are cursed by the presence of blackguards in whose creed the defilement of their fellow-citizens' minds does not weigh for an instant against the profits of publishing a sensation. It results that no household which takes in the newspapers expressly designed for the reading of women and young people can escape contamination. Is that the result that the *Niroku Shimpo* contemplates? Is that the state of "good morality" it labours to promote?

IS IT ANTI-FOREIGN?

WE observe that at a recent meeting of the Kobe Municipal Assembly, when the question of carrying out certain harbour improvements was under consideration, a member named Mr. NAKAJIMA, as well as a Mr. MUROTANI, objected to the proposal that the improvements should be made at the American hatoba instead of at the Japanese. The point relied on by the objectors was that the authorities, in choosing the American hatoba, had been influenced solely by partiality towards foreigners; had, in fact, obeyed the general disposition prevailing in Japan to do for strangers much more than is done for natives. A Kobe journal, in recounting this incident, applies the term "anti-foreign" to the objection—which, it may be added, received short shrift at the hands of the meeting—but we are inclined to think that though the epithet is very natural, its use is scarcely justifiable. It is a fact with which every

careful observer must be familiar that a foreigner receives far more consideration than a native from Japanese officials and from the Japanese public generally. We have noticed the discrimination again and again, and we have frequently heard, or overheard, emphatic comments passed on it by Japanese. If a foreigner happens to be travelling by rail, he will receive from the guard and the porters attention such as is paid to Japanese of very high position only. If he accosts a policeman, the latter treats him with marked deference and is conspicuously helpful. If he finds himself in a Japanese crowd, he is sure not to be jostled or incommoded. Above all, in transactions where chicanery is at a premium, the foreigner fares better than the Japanese. This last proposition will probably be traversed by many of our readers, and we therefore hasten to say that its scope is limited. In some minor transactions of every-day life the alien is probably more victimized than the native. He is charged a higher rent for a Japanese house; he has to pay more for the necessities of existence; the *jiurikisha* coolie fleeces him with less compunction, and the inn-keeper presumes unconscionably on his ignorance. But it has fallen within the range of our own experience to observe that in fixing the prices of articles which have no settled market value, the Japanese tradesman will supplement his *jin-muki* demand by several hundreds per cent. if a fellow-countryman of rank and wealth is to be exploited. However, without insisting on that point, which, after all, has a very narrow application, we think it will be agreed that the Japanese must often labour under a sense of being discriminated against. The fact is perhaps more palpable in society. Any one that has visited a ball room in Tokyo must have noticed how the Japanese guests are thrust into the back-ground, and how the foreigner seems to have a monopoly of enjoyment. There, indeed, the fact that the Japanese lady does not dance is mainly responsible. But the average individual seldom pauses to analyse causes. He observes results only and shapes his opinion accordingly. Hence ninety-nine Japanese out of every hundred must carry away from a foreign-style entertainment the feeling that they have been effaced by the foreigner and subordinated to him. There is certainly much to be said on the other side. The foreign resident has his own causes of complaint and can justly urge that he, too, is unpleasantly discriminated against. It is not, agreeable, for example, to have one's progress through the streets of a city punctuated by choruses of children crying "neko papa," neither is it agreeable to observe that the women of Europe and America are regarded by the average Japanese as creatures very beautiful and very interesting but altogether not to be imitated. However, we are not here seeking to strike a balance. Our aim is merely to point out that in many important

respects the foreigner meets with consideration such as the native does not enjoy, and that the fact has gradually forced itself upon the offended attention of a section of the Japanese people. The matter has probably no special importance. But it is apt to have results inviting erroneously interpretation, as seems to have been the case in Kobe.

THE LATE DR. PARKER.

The death of Dr. Parker, of the City Temple, which we recorded on Tuesday, removes a commanding figure from the ranks of English Non-conformists. A short time before his death, Messrs. Cassell & Co. published a Life of this eminent divine written by Dr. William Adamson, which the *Academy* reviewed in the following appreciative strain:—

Nothing could be conceived in a more sympathetic spirit than Dr. Adamson's book, though, as an old familiar friend, he is, no doubt, in a position to reveal the worst. He is a hero-worshipper, and Dr. Parker is his hero. This provides him with a standard by which things are ranked in importance. To a mere member of the outside public much that is recorded in these pages of Dr. Parker's tours and receptions and presentations seems trivial; but the simple kindness that breathes in the lines disarms criticism. Rather it persuades Gallio into a sympathetic frame, and convinces him that the man's character is an electricity that gives life to the common coil through which it is turned.

It is indeed impossible to read of Dr. Joseph Parker's achievements and not to embrace the conviction that in his own line—as the exponent of a certain biblical theology of human life and ends, as an impassioned vindicator of what to him are divinely revealed testimonies, as a fearless commentator on external affairs as seen in the light of his thus illumined conscience—he is a man touched with genius. First, last, and altogether he is a preacher. He was daubing a wall with (probably hideous) paint, when Joseph Parker determined that he was a preacher. Since then he has preached to all the world about everything. It is his fad, his hobby (he says so), his life. Read here the history of his Thursday midday services at the City Temple. It is an extraordinary record of the persuasive power of a very convinced and straight-forward egoism (the biographer sanctions the word), determined upon a right line of conscience, shedding its light upon the daily path of the common man. He goes into the pulpit from a bath. And mixed thousands listen to a clean man talking clean thoughts about a dirty world. He talks paradox or surprise, but that is because he feels so clean that he may. You will remember the phrase that illumined bills of the evening papers:—"God damn the Sultan." But the bold phrase was arrived at by way of climax, and the passage which led up to it is worth quoting, because it shows how little the speaker, as he gradually clambered to it, had expected to find it at the top of the ladder. The Emperor William on some festive occasion about the time of the Armenian troubles had uttered the words "My friend, the Sultan."

I was astonished. I could have sat down in humiliation and terror. The Great Assassin had insulted civilisation, and outraged every Christian sentiment, and defied concerted Europe. He may have been the Kaiser's friend; he was not yours, he was not mine; he was not God's. Down with such speaking! and let every man's voice be heard in this matter; then the Liberals may come back to power. So long as any man can say "My friend, the Sultan," I wish to have no commerce or friendship with that man. The Sultan drenched the land with blood; cut up men, women, and children; spared none; ripped up the womb; bayoneted the babe; and did all manner of hellish iniquity. He may have been the Kaiser's friend, but in the name of God, in the name of the Father and of the Son and of the Holy Ghost—speaking of the Sultan not as an individual, not merely as a man, but speaking of him as the Great Assassin—I say, God damn the Sultan! Everybody was astonished; they all shouted for joy; and the preacher, you may be sure, was the

most surprised man in that big place. Take another example—one of a different kind. The preacher—the born preacher, who is preacher first and last—must reflect his own emotions into other souls or he is a mere block, he feels. A few years ago Dr. Parker lost his wife. That is not, you would say, a matter for the preacher to expand himself upon. On the contrary, it is quite a fitting opportunity. Mrs. Parker would seem to have been an exceptional, an admirable, woman; and to have been recognised as such by frequenters of the City Temple. The preacher is bound by his temperament to miss no opportunity of impressing his mind upon others: the more intensely stirred his own, the more importunate the necessity. The sermon is a fine effort of eloquence, but the note of personal originality was struck afterwards in an epilogue. You know so well the attitude to be attempted; what then do you think of this—the parenthesis: "I asked God—though I have not prayed for several days—to send her to be near me. . . ." It is almost too natural to be sincere; yet, remembering the man's life, his "formation" (as the monks say), the rest of him as it is shown before the critical world of his intimates and rivals, one accepts it, with its daring.

SUDDEN DEATH IN YOKOHAMA.

A young German named Paul Dollfus, who only arrived in Japan on Oct. 26th by the Nordd. Lloyd steamer *Sachsen*, was found dead in bed on Tuesday morning in his room at the Hotel Geneve under circumstances which impart some mystery to the affair. It appears that Mr. Dollfus, who was a resident of Dresden and a chemist by profession, left Europe for the purpose of taking up an appointment as advisory dyer to a large blanket factory in the neighbourhood of Tokyo. He does not appear to have been over-cautious in the contracting of monetary liabilities and the result was that latterly he found himself owing a saloon and restaurant at No. 75 a considerable amount for chits; he was also in debt to the hotel in which he resided. It is stated that he attempted to borrow money from the former wherewith to satisfy the latter and on being refused announced his intention of taking his own life. It is further observed that the deceased had consulted a local physician who intimated to him that his heart was weak and that he should not enter upon his duties for a time.

On Tuesday about 8.30 a.m. M. Dubois, the proprietor of the Hotel Geneve, had occasion to call Mr. Dollfus but on knocking at the door and failing to elicit a response was informed by the roomboy that the gentleman was still asleep. Desisting, M. Dubois went downstairs, and a little later was summoned by the boy who declared the guest had shot himself—an idea which had its rise in the fact that a revolver lay on the table close to the bed. On going upstairs M. Dubois found that the deceased was still partially warm and at once sent for Dr. Koch, who arrived in a few minutes and declared life to be extinct. Later an examination was conducted by Dr. Wheeler and the Japanese responsible officials which resulted in the discovery of several phials of poison, prussic acid, arsenic, etc., in the deceased's effects, and these with the dregs of a draught that had been drunk from a glass standing near the bed, were taken charge of and will be analysed. Till this investigation is completed it is impossible to say whether the case is or is not merely one of death from natural causes.

A peculiarly sad feature of the case is that the young wife of the deceased (her husband was only twenty-eight years of age) is understood to be coming out in the *Bayern*. Her distressing situation when she arrives may be imagined.

We learn that no doubt is entertained by the authorities as to the fact that the death of Mr. P. Dollfus resulted from the taking of poison. It is also stated officially that the deceased had not entered into any contract with a Japanese factory in Tokyo, and it is also denied that his wife is coming out in the steamer *Bayern*. It is even

doubtful whether he was married. The body is now in the German Hospital and the funeral takes place to-day. It appears that a search of the deceased's effects has disclosed the fact that no letters or documents exist throwing light upon the sad occurrence.

The *Asahi Shimbun* and the *Jimmin* publish very sympathetic paragraphs with reference to the death of Mr. Dollfus. It is most sad, they say, that a foreign expert should have come to a distant country to take up a promising appointment, and should at once find himself crippled by disease and confronted by destitution. Certainly it is a lamentable story.

EXTRAORDINARY RELIGIOUS MOVEMENT.

A religious movement of great interest has occurred in America among Polish Catholics. There are over two and a half millions of Poles now living in the United States, and their material condition is one of steadily increasing prosperity.

Their nation is one, as is well-known, of deep-seated piety. But they are quite as tenacious in their love of personal liberty as in their devotion to religion, and this has brought about a separation from the Roman Catholic communion which is of considerable magnitude. More than twenty years ago the people demanded equal rights with the clergy in the management of ecclesiastical property. Two of their priests refused to acknowledge Roman jurisdiction in matters of property, but later on they were reconciled to Rome by the Papal Delegate, Archbishop, now Cardinal, Satolli. But dissatisfaction still remained, and finally one of the pastors, Rev. Anthony Kazlowski, after trying to pacify the people in his parish, but in vain, consented to lead out such as were determined upon independence. Thus was organized in 1894 the "Polish Catholic Independent Church" of America. Numbers grew, and at last the increase of adherents, including other priests, caused the new body to seek a unifying centre. Accordingly, in 1897, Father Kozlowski was unanimously nominated to be Bishop. He applied to the "Old Catholics" of Europe for consecration, and on the 31st of November, 1897, at Berne, he was duly consecrated by Rt. Rev. Dr. Herzog of Switzerland, assisted by Rt. Rev. Bishop Gul, of the so-called Jansenist Church of Holland, and Rt. Rev. Bishop Weber of Bonn.

Bishop Kozlowski has adherents in all parts of the United States, and there are now 26 churches, 24 priests, 80,000 baptized members, 13,000 school children, 31 buildings, and other property besides.

Great indignation is expressed by the Roman Catholic hierarchy, and tremendous pressure is exerted to prevent an increase of the schism, and to destroy the work as far as it has already gone. Under the influence of this tremendous pressure Bishop Kozlowski has sought for aid.
